In the debate which ensued upon the address, the Marquis of Hartington said, in reference to the fugitive-slave circulars which had been issued by the Admiralty, that although the country did not want its ships made asylums for the destitute, the discretion of their commanders should not be interfered with. He trusted the present circular would be suspended pending the result of the inquiry to be made by the Royal Commission. He was not disposed to raise objections to the preliminary steps taken by the Government in regard to the Eastern question. Her Majesty's ministers had doubtless done their best to maintain the integrity of Turkey. Nevertheless, he thought the policy indicated by Palmerston had not been acted upon. He urged a speedy explanation of the purchase of the Suez Canal shares. He thought it would have been better if the advice of Par-

liament had first been taken, and questioned the soundness of the purchase, commercially and politically. He also asked for explanations of Mr. Cave's mission to Egypt. Mr. Disraeli replied: On the subject of the fugitive-slave circulars, it was the strong desire and intention of the Government to discourage and abolish slavery wherever possible. The Government had given an earnest of this desire by what they had already done in Africa. He admitted the responsibility for the first circular, though he had never seen it when it was issued. He would not defend it for a moment. Its recall had satisfied the country. The second circular was, however, prepared by the Lord High-Chancellor, and contained an accurate definition of the law. The circular was rendered necessary by acts of English officers in foreign courts entailing legal actions, and the

payment of compensations by the Government. The Royal Commission would not only inquire into the present state of the law, but would also see wherein it was advisable to alter it, and how by negotiation alteration could be effected. With reference to Herzegovina, Mr. Disraeli declared the Government could not have acted otherwise than it did. A refusal to recommend the Porte to give favorable consideration to the Austrian proposals would have placed England in an undesirable state of isolation. If England had refused to agree to the note, the Sultan would necessarily at once have rejected it. Then England would have been in the unpleasant position which would have followed if further questions had arisen as to whether we should support the Sultan in resistance to the other powers. If England had proposed a conference, its only course would

THE BRIG OF AYR, SCOTLAND.

probably have been to adopt the very suggestions contained in the Austrian note. If the present proposals should not prove successful in settling the complication, England would be as free as to the future as she was before the Austrian note was written. The Government had bought the Suez Canal shares at the request of the Khedive, while an offer was pending for them from a French company. It had bought them under the conviction that the English people would not view with satisfaction the possession of all the shares by France. Mr. Cave's mission to Egypt was expected to produce results which would secure the adequate representation of English interests in the management of the canal. He considered that the purchase of the shares gave additional security to freedom of intercourse with India.

In the House of Commons, February 22d,

Mr. Whitbread, of Bedford, moved a resolution calling for the revocation of all the circulars in reference to fugitive slaves recently issued by the Admiralty. This was rejected, February 24th, and instead of it an amendment, offered by Mr. Hanbury, from Tamworth, "that it is desirable to await further information from the Royal Commission appointed to inquire into the subject," was adopted. During the debate on this subject, Mr. Gathorne Hardy, Secretary of State for War, said that the Government hoped, by means of the commission, to be able to reconcile the maintenance of the utmost extent of personal liberty with their own international obligations and good faith toward friendly nations.

On the 14th of February the Chancellor of the Exchequer moved a vote for £4,080,000 to pay for the purchase of the shares of the Suez

Canal. The opposition leaders made a strong stand against the measure in the debate, February 21st, Mr. Lane and Mr. Gladstone severely criticising the policy of the ministry in the purchase. Sir Stafford Northcote, Chancellor of the Exchequer, and Mr. Disraeli, replied, the latter remarking that he did not recommend the purchase as a financial investment, but as a political measure calculated to strengthen the empire. The motion was adopted. The bill making the appropriation of £4,080,000 exchequer bonds was passed on its third reading March 6th. On the 8th of August the House finally ratified the clauses of the bill for the purchase of the shares. The House also, August 5th, voted the payment of the expenses of Mr. Cave's mission to Egypt.

On the 17th of February Mr. Disraeli introduced a bill in the House of Commons to authorize her Majesty to take, in addition to her former titles, the style and title of "Empress of India." The proposition was received with great disfavor by the Liberal party, and excited general disapproval among the people and in the press. It became the subject of long and fierce debates in the House, yet was insisted upon by the ministry, and pressed through with energy. On the 16th of March the Marquis of Hartington moved a resolution: "That, while willing to consider a measure enabling her Majesty to make an addition to the royal style and title which shall include such dominions of her Majesty as to her Majesty may seem meet, this House is of opinion that it is inexpedient to impair the ancient and royal dignity of the crown by the assumption of the style and title of Emperor." Lord Hartington said, in support of his resolution, that any addition made to the Queen's title should include the assertion of sovereignty over the colonies, and remarked that the Government ought to show, what they had not yet shown, how the proposed addition would contribute to the promotion of English interests in India. Lord Hartington's motion was defeated by a vote of 305 to 200. Among other arguments which were urged against the bill were that the assumption of an additional title was derogatory to the title which the English sovereign had borne for a thousand years, and which had become equal to any title known on the earth; that the title "Empress" could not be translated into any Indian equivalent which would convey the full sense sought to be conveyed by it; and that the fact of English sovereignty in India spoke for itself, and did not need the phrasing of a new form of words to express it. The fear was also widely expressed that the new title would be used in England, and in intercourse with European Governments. On this subject the Government made pledges that the title "Empress" should be used only and solely for India. The bill was passed in the House of Commons March 23d, the vote being 209 in favor of it, and 134 against it. It then went

to the House of Lords, where, April 4th, the Earl of Shaftesbury offered a motion for an address to the Queen, praying her not to assume the title of Empress. He argued that the title was distasteful to the vast majority of the people. His motion was defeated by a vote of 137 to 91. An attempt was made by Mr. Fawcett to offer a similar motion in the House of Commons, but was defeated by the considera-

ROBERT BURNS'S COTTAGE, NEAR Ayr.

tion that for the House to entertain it after having passed the bill would be for it to offer a censure upon itself. The bill passed the House of Lords April 7th, and received the royal assent April 27th. On the 28th of April the Queen issued her proclamation, assuming the new title. After reciting the provisions of the act passed by the Parliament, this proclamation declares:

We have thought fit, by the advice of our Privy Council, to appoint and declare, and we do hereby, by and with the said advice, appoint and declare, that henceforth, so far as conveniently may be, on all occasions and in all instruments wherein our style and titles are used, save and except all charters, commissions, letters patent, grants, writs, appointments, and other like instruments, not extending in their operation beyond the United Kingdom, the following addition shall be made to the style and titles at present appertaining to the imperial crown of the United Kingdom and its dependencies—that is to say, in the Latin tongue in these words: "Indiæ Imperatrix;" and in the English tongue in these words: "Empress of India."

And our will and pleasure further is, that the said addition shall not be made in the commissions, charters, letters-patent, grants, writs, appointments, and other like instruments hereinbefore specially excepted.

And our will and pleasure further is, that all gold, silver, and copper moneys now current and lawful moneys of the United Kingdom, and all gold, silver, and copper moneys which shall, on or after this day, be coined by our authority with the like impressions, shall, notwithstanding such addition to our style and titles, be deemed and taken to be current and lawful moneys of the said United Kingdom; and, further, that all moneys coined for and issued in any of the dependencies of the said United King-

dom and declared by our proclamation to be current and lawful money of such dependencies, respectively bearing our style or titles, or any part or parts thereof, and all moneys which shall hereafter be coined and issued according to such proclamation, shall, notwithstanding such addition, continue to be lawful and current money of such dependencies respectively, until our pleasure shall be further declared thereupon.

The language of the proclamation was afterward (May 2d) attacked in both Houses of Parliament, on the ground that it involved a violation of the promise of the Government that the new title should be used only and solely in India. In the House of Lords the Lord-Chancellor, in answer to an inquiry by Lord Selborne, maintained that every engagement entered into by the Government had been fulfilled both in the letter and in the spirit, and the proclamation applied only to cases where of necessity the complete title of the crown must be used. There were certain documents, which originated in the United Kingdom, but did not spend their force there, in which it would be necessary to set forth the full titles of the sovereign, but with that exception it was not intended to use the new title in England. A similar explanation was made in the House of Commons by the Chancellor of the Exchequer, and Mr. Disraeli said, in answer to an inquiry whether the imperial title would be used in military commissions, that the proclamation would completely cover every single public document or instrument of state which could be employed in the whole of the administrative system, with the exception of military commissions. These were purposely omitted, because the army served the Queen in India as well as in other parts of the world, and it was not thought right that the title of Empress of India should be omitted from their commissions. On the 11th of May Sir Henry James moved, in the House of Commons, a resolution that, having in view the declarations which have been made by the ministers during the progress of the act, the proclamation did not "make adequate provision for restraining and preventing the use of the title of Empress in the internal affairs of her Majesty's dominions other than India." This resolution was negatived by a vote of 334 to 226. Arrangements were made to have the new title assumed and proclaimed in India with grand ceremonies, in presence of the native princes, on the 1st of January, 1877.

Sir Charles Adderley, President of the Board of Trade, introduced a bill to amend the merchant shipping acts of 1875 into the House of Commons, February 10th. The temporary act of the previous year had worked so satisfactorily that all of its provisions were made permanent in the new bill. An additional clause provided for the establishment of a court of survey, to which any ship-owner charged with dispatching an overloaded ship might immediately appeal; or he might have a survey made for himself, with the assistance of an as-

essor appointed by the local marine board. The bill gives authority to local officers to detain ships suspected to be unseaworthy until they can communicate with the Board of Trade, and provides for the appointment of commissions of a superior class of officers to conduct investigations of shipwrecks. A clause was added imposing additional restraints on deck-loading. The bill was passed in the House of Commons May 26th, and in the House of Lords July 22d.

In the House of Commons, April 5th, Mr. Dixon moved a bill in amendment of the Elementary Education act of 1870. The bill contained provisions for the establishment of school boards in all the districts of the country, as well as of the towns, throughout the United Kingdom, and for the universal enforcement of compulsory attendance upon the schools. It was favored by the Nonconformists in preference to the bill which it was understood the Government was about to propose, because they believed that educational affairs would be administered more satisfactorily to them by boards chosen expressly for the purpose than through the ordinary local officers. Mr. Dixon's bill was defeated on the second reading, by a vote of 281 to 160. The bill agreed upon by the Government was introduced into the House of Commons by Viscount Sandon, May 18th, was passed by the House by a large majority early in August, and became a law August 15th, to go into operation on the 1st of January, 1877. This act is intended to supplement the educational act of 1870, by enlarging the provisions for enforcing attendance upon the schools. By the act of 1870, direct compulsion could be applied only in districts where school boards were established, and its adoption was left optional with the boards. The optional feature is retained in the new act, but the privilege of applying compulsion is extended to the local authorities of all the districts, as well those where there are not as those where there are special school boards. The compulsory by-laws made by the school-attendance committees of such districts are, when sanctioned by the education department, rated as equally binding with those of any school board. The chief means, however, relied upon in this law for securing attendance, is indirect compulsion. Its operation is universal and obligatory. During the year 1877 no child under nine years of age, after 1878 no child under ten years of age, can be employed at all. No child who is under eleven years of age in 1877 (to be raised to twelve years in 1878, to thirteen in 1879, and to fourteen in 1880) may be employed who has not obtained a certificate of proficiency in reading, writing, and elementary arithmetic, or of previous due attendance at a certified efficient school. Every person taking a child into his employment contrary to the provisions of the act is liable to a fine not exceeding forty shillings. A parent who employs his child in any

labor, exercised by way of trade or for the purpose of gain, is liable to the same penalty. That the expense of school fees may not prevent the children of the poor from obtaining an education, school boards are still allowed to remit the fees charged in board schools, while the boards of guardians are empowered to pay the fees of children attending either board or voluntary schools. Still further to encourage regularity in attendance, those pupils who shall, before they are eleven years of age, have passed Standard IV. of the new code, and have also attended three hundred and fifty times in not more than two schools during each of two years, will be entitled to the payment of their fees by Government during three years. In 1879 the standard of attendance qualification is to be increased to three hundred and fifty attendances during each of these years; in 1880, during each of four years; in 1881, during each of five years. The scholars whose fees are thus paid must pass a higher standard during each year of their attendance. The fees are to be paid only for children attending

schools whose average fee does not exceed sixpence per week, and they can be obtained in one year by not more than ten per cent. of the scholars presented for examination at the annual visit of her Majesty's inspector.

The bill "for amending the law in respect of the appellate jurisdiction of the House of Lords" was introduced in the House of Lords by Lord Cairns, February 10th, and, having passed that body, was affirmed by the House of Commons August 9th. It establishes a court within the House of Lords, to relieve that House of the duty of hearing the trial of cases of appeal. The court is to sit during the whole judicial year, and will consist, besides certain judges who are *ex officio* judges of this court, of Lords of Appeal in Ordinary, who are appointed to that office by the crown, and are entitled to sit during their term of office as members of the House of Lords and as members of the Judicial Committee of the Privy Council. A final appeal will lie from this court, as now lies from all the other courts of the kingdom, to the full court of the House

BATH, ENGLAND.

of Lords, consisting of the Lord-Chancellor, the Lords of Appeal, the Judicial Committee of the Privy Council, and the Law Lords.

On the 5th of October, the Queen appointed as Lords of Appeal under this act Mr. Justice Blackburn and the Right Honorable G. S. Gordon, and raised them to the peerage under the titles of Lord Blackburn of Kilearn and Lord Gordon of Drumearn.

The bill for removing the electoral disabilities of women, which has been regularly offered several years, was again introduced in the House of Commons, and again rejected, the vote being 239 to 152. It is noteworthy

that the bill was opposed by Mr. John Bright, as "in the interest of the women themselves, as the principle of the bill was untenable, and was contradicted by universal experience."

Another attempt was made to obtain the repeal of the so-called "Contagious Diseases Act." The bill having that object in view was defeated in the House of Commons, July 19th, by a vote of 122 in favor of the repeal, to 224 against it.

The House of Commons, May 18th, against the opposition of the Government adopted a resolution to the effect that it regarded it expedient that the law which forbids the general

sale of intoxicating liquors in Ireland during a part of Sunday should be amended so as to apply to the whole of that day. The majority in favor of this resolution, or against the Government, was 57.

The bill known as the "Permissive Prohibitory Bill," the object of which is to give to local authorities a discretionary power to prohibit the sale of intoxicating liquors within their districts, and which has been much favored by a portion of the temperance reformers, was defeated in the House of Commons, June 14th, by a vote of 299 to 81. In the House of Lords, June 30th, the Archbishop of Canterbury moved for the appointment of a select committee to inquire into the prevalence of habits of intemperance and into the manner in which those habits had been affected by recent legislation and other causes. He was prompted, he said, to bring forward the subject by a memorial from 8,000 clergymen of the Established Church, calling upon the Episcopal Bench to draw the attention of their lordships to it, with a view of ascertaining whether a remedy could not be found for the evil. The committee was ordered. In the House of Commons, July 6th, Mr. Cross, in reply to a question, said that the Government were fully alive to the importance of the inquiry ordered by the Lords.

On the 30th of June, Mr. Butt offered in the House of Commons a resolution calling for the appointment of a select committee, to inquire and report upon the nature, the extent, and the grounds of the demand made by a large proportion of the Irish people for the restoration to Ireland of an Irish Parliament, with power to control the internal affairs of that country. In the debate on this resolution, Mr. J. P. Smyth, who had proposed to move an amendment declaring that the Irish people preferred the repeal of the Union to home-rule, but was precluded from moving it by the rules of the House, made a forcible speech against home-rule. He opposed the proposition of Mr. Butt as a vain and illusory expedient for the removal of Irish grievances, and described his scheme of federation as nothing more than the creation of a vestry which the Irish people would reject with indignation. For his own part, he would not be satisfied with anything less than a separate and independent Parliament and government, united to the rest of the empire only by the crown. The discussion was continued by Mr. O'Connor Power, Captain Nolan, Mr. Kirk, Mr. R. Power, Mr. Jacob Bright, and others, in favor of the motion, and Mr. Kavanagh and Sir F. Wilmot, against it. Sir M. Hicks Beach continued the discussion against the resolution with an argument showing that the principle of federation adopted in Canada was inapplicable to Ireland, and closed with the declaration that the seventy-six years of the Union had brought with them a great advance in prosperity, and some day those who supported

this motion would be glad that the Government had rejected a scheme to reduce Ireland to the rank of a province from that of a component and governing part of the first empire in the world. The motion of Mr. Butt was rejected, by 291 votes to 81. On the 1st day of August Mr. O'Connor Power moved a resolution, "that in the opinion of the House the time has come when her Majesty's gracious pardon may be extended to the prisoners, whether convicted before the civil tribunals or by courts-martial, who are and have been for many years undergoing punishment for offenses arising out of insurrectionary movements connected with Ireland." The resolution was supported by several members, among them Mr. Jacob Bright, and was opposed by Mr. Hardy, Home Secretary at the time the murders in Manchester took place, the Solicitor-General for Ireland, and Mr. Cross, who all showed that the prisoners had in view by the resolution were not held for political offenses, but on criminal charges. Mr. Power offered to withdraw his resolution, but a division was insisted upon. The resolution was lost, by 117 votes to 51. A bill was passed with reference to the Irish peerage, the effect of which will be to put an end to the further creation of Irish peers.

A bill was passed amending the law relating to cruelty to animals, the object of which is to regulate the practice of vivisection. It provides that the person wishing to practise vivisection must have a license, and that the place where he performs his experiments must be registered and open to inspection. The animals must previously be rendered insensible by chloroform or some other anæsthetic, *curars* alone being excepted; and the act prevents cats, dogs, asses, horses, and mules, being made the subject of experiment, except under certain conditions, when a special license is required.

On the 3d of March Mr. Osborn Morgan offered, in the House of Commons, a resolution to the effect that the parish churchyards of England and Wales having been, by the common law of England, appropriated to the use of the entire body of the parishioners, it is just and right, while making proper provision for the maintenance of order and decency, to permit interments in such churchyards either without any burial services, or with burial services other than those of the Church of England, and performed by persons other than ministers of that church. The resolution excited an active debate, and was defeated by a majority of 81 votes. A resolution of similar purport was moved by Earl Granville in the House of Lords, May 15th, and was rejected by a vote of 148 to 56. A bill was introduced in the House of Lords proposing the establishment of burial boards, to be elected by the parishioners, and asserting a control over burials of dissenters in churchyards, "in order to prevent the occurrence of any unseemly

scenes." The second reading of this bill was postponed, May 29d, for six months.

A bill was passed for the more effectual suppression of the slave-trade by her Majesty's subjects in India.

A bill was passed for the regulation of commons. It carries out the recommendations which were made by the committee on that subject in 1869, maintains the principle that all existing rights shall be preserved, and while it does not assume to prevent any legal inclosures of lands taking place under it, gives urban authorities a *locus standi* to appear against all schemes for inclosure.

A bill was passed to prevent the pollution of rivers. Its principal object, as stated in the preamble, is to prevent the establishment of new sources of pollution. It makes provisions against putting offensive matters into streams, prescribes the duties of sanitary authorities to afford facilities of sewerage to manufacturing establishments, prescribes the legal proceedings to be taken to enforce its provisions, and gives the necessary powers to local boards and officers.

The Turkish question, and the relations of England to it, occupied much attention during the later weeks of the session. Parliament was prorogued August 15th. In her speech on this occasion, the Queen spoke of her relations with all foreign powers as being friendly. In regard to the Eastern question she said: "The efforts which, in common with other powers, I have made to bring about a settlement of the differences unfortunately existing between the Porte and its Christian subjects in Bosnia and Herzegovina, have hitherto been unsuccessful, and the conflict begun in those provinces has been extended to Servia and Montenegro. Should a favorable opportunity present itself, I shall be ready, in concert with my allies, to offer my good offices for the purpose of mediation between the contending parties; bearing in mind alike the duties imposed upon me by treaty obligations and those which arise from considerations of humanity and policy." In regard to relations with the United States she said: "A difference has arisen between my Government and that of the United States as to the proper construction of that article of the treaty of the 9th of August, 1842, which relates to the mutual surrender of persons accused of certain offenses. The inconveniences to both countries which would follow on a cessation of the practice of extradition are great and obvious, and I entertain the hope that a new arrangement may soon be arrived at by which this matter may be placed on a satisfactory footing." The speech then referred to the return of the Prince of Wales from India; to the assumption by the Queen of the title "Empress of India;" to the reestablishment of peace and order in the Malay Peninsula, which was considered assured; to the settlement of the controversy with the Orange Free State with reference to the province

of Griqua-Land, and the consequent advance in establishing friendly relations with the South African states; and to the conference on South African affairs which was then sitting in London.

The Eastern question received considerable discussion in Parliament during the later part of the session, and engaged public attention predominantly during the rest of the year, after the adjournment of Parliament. The news of the riot at Salonica, and the murdering of consuls on the 6th of May, had the effect of strengthening the convictions of the Liberal party that more effective measures ought to be adopted to secure protection to the Christian subjects of the Porte, and stimulated them to urge that the Government should take a more decided stand on this matter than it had ever before assumed. A large fraction of the party went so far as to advise that the Government should withdraw from the position it occupied of affording indirect protection to Turkey, and should join with the other powers in demanding substantial reforms assured by valid guarantees as the alternative of war. The Government, however, adhered to the course which it had marked out for itself, and which was conformed to its traditional policy of maintaining the integrity of the Turkish Empire. In May the Government replied to the memorandum which had been agreed to by the conference of the great powers assembled at Berlin, commonly called the "Berlin note," refusing its adhesion to it on account of one point, viz., that in which the memorandum suggested that the six powers unitedly should have to consider "other and more efficacious measures," in case, at the expiration of the proposed armistice, their friendly intervention should have been unable to lead to a pacific result. The Government objected to this declaration that it contained the principle of an armed intervention in the internal affairs of Turkey, and a menace to the liberty and independence of that empire in which Great Britain could not join even with the reserve of the condition which stipulated that no decision could be taken except by collective agreement of the six powers. On the 9th of June Mr. Disraeli stated, in the House of Commons, that the Berlin note had not been presented to the Porte, and he believed it had been withdrawn, in view of the change in the head of the Turkish state; and that the refusal of the British Government to give its sanction to it had been received in no unfriendly spirit by the powers, but rather the contrary. He added that there were three points in the current negotiations on which the Government concurred entirely with the powers; that there should be no undue pressure put upon the new Sultan of Turkey, but that he should be given time to mature measures and a policy; they were all in accord in impressing Servia with the importance of temperate conduct on her part; and they had agreed in the recognition

of the new Sultan. On the 22d of June Mr. Disraeli advised a postponement of debate and action on Turkish affairs, till the result of the action of the Turkish Government should be known, basing his recommendation on the ground that debate at that time might excite unreasonable expectations and lead to delusive hopes. June 26th, attention being called, in the House of Lords, to reports of massacres in Bulgaria by Bashi-Bazouks and Turkish troops, Lord Derby said that the statements were not borne out by official advices. He thought they were exaggerated, but admitted that the situation in Serbia was critical. On the 8d of July the Government was sharply questioned, in the House of Commons, to make known what its policy was. Mr. Jenkins said the country had a right to be taken into confidence before it was committed to a policy of which it might not approve. The Government would be supported by public opinion in endeavoring to preserve peace, or in a policy of neutrality; but it would not

be supported in a policy of maintaining the integrity of Turkey and of repressing the struggles of its Christian subjects for liberty by the sacrifice of British blood and treasure. Mr. Fawcett said that the House of Commons ought to be consulted on this subject, as well as foreign powers. Mr. Disraeli said that the papers explaining the action of the Government would be laid on the table as speedily as possible, and added, by way of further explanation of the delay in submitting them, that in negotiations of this kind there were always confidential documents which it had never been the custom to publish without the consent of the Government from which they proceeded. July 10th it was reported that no answer had been received to the inquiries which Lord Derby had instituted in regard to the outrages in Bulgaria; whereupon the Government was urged to press its inquiries with energy, Mr. Forster saying "it was humiliating and revolting to the conscience of the nation that it should be supposed to be supporting a gov-

BIRMINGHAM, ENGLAND.

ernment which could be capable of these atrocities." Lord Denbigh gave notice, in the House of Lords, July 17th, of a motion instructing the Government to withdraw from the Declaration of Paris regarding belligerent rights. Lord Derby said that the treaty of Paris, although it had not been formally ratified, was yet binding, and could not well be departed from. In the House of Commons Mr. Disraeli read dispatches from Sir Henry Elliot, British minister at Constantinople, saying that there had been outrages committed in Bulgaria, but that the worst stories told of them were regarded as fictions.

On the 31st of July Lord Stratheden moved

in the House of Lords a resolution that the House was ready to support the measures which might become necessary for upholding the Paris treaties of the 30th of March and 15th of April, 1856. Earl Granville and Lord Derby both admitted that the state of affairs in the East was critical, and the Turkish administration bad. The fleet, it was explained, had been sent to Besika Bay, for the protection of the Christian subjects of the Porte. On the same day, a resolution was moved in the House of Commons, declaring it the opinion of the House that the Government, while maintaining the respect due to existing treaties, should exercise all their influence

with the view of securing the common welfare and equal treatment of the various races and religions which are under the authority of the Sublime Porte. Mr. Gladstone spoke at length in criticism of the policy of the Government; after some further debate, the resolution was withdrawn. The debate on the outrages in Bulgaria was continued in the House of Commons, August 7th and 9th. Mr. Anderson spoke strongly against the course of the Government. Mr. Bourke defended the ministry, while he admitted that the outrages had been committed, but ascribed them wholly to the Bashi-Bazouks and independent troops. The Marquis of Hartington affirmed that the reports of the outrages had been substantiated, and declared that it was impossible for the Government to address Turkey in terms too strong for the occasion. Mr. Bourke stated that repeated and strong statements had been made to the Porte on these outrages, and that a British consular agent had been sent to Philippopolis, so that the Government might be placed in direct communication with the scene of the outrages. On the third reading of the appropriation bill, August 11th, Mr. Evelyn Ashley called attention to the delay in obtaining official information regarding the outrages, and the want of prompt and energetic action in the matter. He complained that the Government had, from the first, treated the matter with indifference, and that even now no remonstrance worthy of the character and power of England had been addressed to the Porte. Mr. Bourke said that the Government had always felt the deepest sympathy for the Christian subjects of Turkey, and had done its best to procure an improvement of their position; but this sympathy ought not to blind them to other important considerations. To prevent a recurrence of similar scenes elsewhere, General Sir Arnold Kemball would accompany the Turkish army as military *attaché* of the Government. Mr. Disraeli denied altogether that the Government had any knowledge of the atrocities in Bulgaria until they learned them from the newspapers. What he had disclaimed in answer to Mr. Forster was, not the existence of atrocities, but certain specific statements which were brought forward, and of which he said that the knowledge in the possession of the Government did not justify them. Mr. Disraeli then went on to give a flat contradiction to the assertion that England was peculiarly responsible for what occurred in Turkey, or that the Turks were its especial *protégés*. Like Russia, France, Germany, and Italy, England was an ally of Turkey, and had guaranteed, along with Austria and France, the territorial integrity of Turkey. As long as England was governed by English parties who understood the principles on which its empire rested, and were determined to maintain them, the influence of England in that part of the world would never be a matter of indifference. The state of affairs required much care and man-

agement, and those who supposed that England was acting from blind superstition, or from want of sympathy with the aspirations of Eastern Europe, were mistaken. The duty of the Government, however, was to maintain the empire of England, and they would never agree to any step which would assail the existence of that empire.

The discussion was carried on before the public quite as actively after the adjournment as it had been during the session. The excitement was increased by the publication of a report by Mr. Eugene Schuyler, and of other accounts agreeing with his, in the *Daily News* and *Times*, confirming in detail almost the worst that had been alleged regarding the outrages in Bulgaria. Mr. Gladstone, September 3d, published a pamphlet, entitled "Bulgarian Horrors, and the Question of the East," in which he urged that England should move to stop the anarchical misrule in Bulgaria, and make effectual provision against a recurrence of outrages by excluding the administrative action of the Ottoman Government from Bulgaria as well as from Bosnia and the Herzegovina. He favored, however, upholding the territorial integrity of Turkey. He gave a freer utterance to his views at a great public meeting held at Blackheath, September 9th, at which resolutions favoring energetic measures were adopted. At a large meeting of citizens of London, September 18th, presided over by the Lord-Mayor, and at a workingmen's meeting, held at Exeter Hall, London, on the same day, Prof. Fawcett, M. P., presiding, similar views were expressed. Mr. Disraeli made an address at the Buckinghamshire Agriculturists' dinner, at Aylesbury, September 20th, in which he entered into a full defense of his course and the policy of the Government. Sir Stafford Northcote defended the Government, at Edinburgh, September 11th. Lord Derby was waited upon, September 27th, by a deputation from the meeting of citizens of London of the 20th, and made a full exposition of the position of affairs in the East, in the course of which he made reference to a circular which had been sent to Sir Henry Elliot, at Constantinople, instructing him to make very strong representations to the Porte of the indignation which England felt at the outrages, and to express expectation that the recurrence of such atrocities should be prevented. Numerous other meetings were held all over the kingdom, and the opportunity was generally taken by members of Parliament to explain to their constituents their position on the action of the Government upon the subject. Among the more important of these occasions was that on which Mr. Bright addressed the Manchester Reform Club, October 3d, in support of the views of the Opposition. A "Great National Conference on the Eastern Question" was held in London, December 15th, at which it was arranged should be discussed the misgovernment of the

Turkish Empire and the hopelessness of reforms; the responsibilities of Europe, and of England in particular, in reference to the Eastern question; the review of the recent negotiations, the present diplomatic situation, and the means of averting war; the exactions that should be made from Turkey in the way of reforms, and security for their being carried out; and a protest should be made against war for the Ottoman power, and against holding out hopes of support to that power in case of war. The Duke of Westminster and the Earl of Shaftesbury presided; the two chairmen, Mr. Gladstone and Canon Liddon, the Rev. Baldwin Brown, Sir F. Fowell Buxton, M. P., Prof. Fawcett, M. P., and numerous other men of distinction, spoke. An association was formed for the purpose of watching events, of giving further expression to public opinion, and of spreading correct information upon the subject throughout the country.

A select committee appointed by the House of Commons to consider the causes for the depreciation of silver, of which Mr. Goschen was chairman, published their report early in July. The committee did not make any recommendations with regard to legislation, and considered that, in view of the many uncertain elements entering into every calculation as to the future, they were not authorized to offer an opinion regarding the future course of the silver-market, beyond indicating the various cir-

It should be added—

4. That the Scandinavian Governments have also substituted gold for silver in their currencies.

5. That the Latin Union, comprising France, Belgium, Switzerland, Italy, and Greece, have since 1874 limited the amount of silver to be coined yearly in the mints of each member of the union, suspending the privilege formerly accorded to all holders of silver bullion, of claiming to have that bullion turned into coin without restriction.

6. That Holland has also passed a temporary act prohibiting, except on account of the Government, the coining of silver, and authorizing the coining of gold.

With regard to India and the East, the committee said:

So much must depend upon the prosperity of the populations, on the abundance of the crops, in fact, on their powers of production, that it is impossible to make any forecast; and, as regards actual facts, no more can be stated than that, on the one hand, they have always possessed a very large power of absorbing bullion; while, on the other hand, that power has been diminished by the growth of the sums annually payable by India to the home Government. The only facts in any calculation as to the future which are certain, and appear to be permanent, are the increased total production of silver, and the effect caused by the necessity of the Indian Government to draw annually for a heavy amount. Both are adverse to the future value of silver, as far as they go; but they may be partially counterbalanced by changes in the trade with the East.

The elections for members of the School Board in London, held in the first week in December, were warmly contested between

the friends of the old School Board, whose policy had been marked in favor of undenominational education, and those who sought to give more scope to the policy of denominational education. The result was a decisive victory for the friends of the old board, and approval of their policy. Of fifty members elected, the friends of the old board returned thirty-one; the National Society, or Denominational Church party, returned eighteen; and one Roman Catholic priest was elected. Four women were chosen members of the board.

NEW DOCKS AT CHATHAM, ENGLAND.

• circumstances which had to be taken into account. They were of the opinion that the evidence taken conclusively showed that the fall in the price of silver was due to the following causes:

1. To the discovery of new silver-mines of great richness in the State of Nevada.

2. To the introduction of a gold currency into Germany in place of the previous silver currency. This operation commenced at the end of 1871.

3. To the decreased demand for silver for export to India.

A deputation from a meeting of Churchmen and Dissenters had an interview with the Duke of Richmond and Gordon, July 8th, with reference to the school-books used in the Roman Catholic schools during the time fixed for secular teaching. They alleged that, mixed with the secular teaching in Roman Catholic schools, there was religious instruction, with the commendation of Roman Catholic ceremonies, pilgrimages, worship of relics, and the

depreciation of Protestantism. They contended that as Protestants were bound by law to abstain from all religious teaching during the secular hours, and also from attacks upon other church systems, the Roman Catholics ought to be guided by the same rules as required by the Education Act. The deputation also complained that, while Protestants were prohibited from appointing ministers or clergymen as teachers, the Roman Catholic schools were taught by the various orders of the Roman Catholic priesthood in contempt of this general rule. The Rev. Dr. Rule produced the books to which references were made. The Duke of Richmond and Gordon, in reply, said that the books to which the deputation had referred should be looked into, and their complaints considered. A few days afterward Cardinal Manning, presiding at a meeting in aid of the Catholic Poor School Committee, referring to this deputation, said that the school-books had been carefully revised a few years ago, so that

they might be made to conform to the law; and, although they contained references to some Catholic practices, such as pilgrimages, it was merely in the way of history, and if that were forbidden they might as well forbid geography and geology.

Early in the year the Home Secretary issued a volume which had been several years in preparation, the design of which was to show the number of landholders, and the amount and condition of their estates, in England and Wales, not including the metropolis. It is commonly known as "The New Domesday-Book." It gives a complete list of the landowners in the kingdom, great and small, with the extent of the estate of each, and its rental value. The following is a summary of the number of land-owners, with the relative extent and gross amount of their possessions, showing also the rental values of their estates, and the relative proportion of the estates of each class to the whole landed property of the kingdom:

ENGLAND AND WALES.

TOTAL NUMBER OF LAND-OWNERS.	Total Amount of Estates in Acres.	Value of the Gross Products of the Lands.	Average Produce per Acre of Each Class.	Ratio of the Estates of Each Class to the Whole Territory of the Kingdom.	
Of less than one acre.....	708,289	151,171	£29,127,679	£193 14s.	0.5
" one acre and less than ten.....	121,983	478,679	6,438,825	18 9	1.4
" 10 acres and less than 50.....	72,640	1,750,080	6,508,290	8 14	5.8

" 100,000 and more.....	24	4,981,894	623,148	0 3	26.1
Tracts of which the acres are not reported.....	11	10,740
Of which the produce is not reported.....	11	1,147
Total.....	182,182	18,946,694	£18,698,608	£1	100

The book also gives tables of the average of the kingdom. The average for the whole of England and Wales is £3 per acre, and

ranges from £14 13s. per acre in Lancashire to 10s. in Cardiganshire. The average value in Scotland is £1 per acre, and ranges from £9 4s. in Edinburghshire to 2s. in Shetland.

The island of Barbadoes was disturbed by serious riots in April. Their origin was ascribed to the opposition of the colored population against the execution of a plan entertained by Governor John Pope Hennessey for the incorporation of Barbadoes in a confederation of the Windward Islands. The plan involved changes in the character and composition of the legislative body, which the insurgents regarded as infringements of their habitual rights, and was thought to be to the financial disadvantage of Barbadoes. The island was in a disturbed condition during the whole early part of the month. The Governor was denounced as a tyrant, and the insurgents were uttering threats and committing outrages, burning houses, goods, crops, and cattle-sheds, digging up the potatoes, and stealing all they could. The city of Bridgetown was threatened, and it was reported at one time that several families had fled for safety to the ships in the harbor. With the permission of the Governor, the citizens of this place organized companies of volunteers to assist in suppressing the insurrection. A conflict took place, in which the insurgents were utterly defeated, with the loss of a considerable number of their men disabled or taken prisoners. On the 28th of April Governor Hennessey telegraphed to Lord Carnarvon that the riots had ceased. The Government had been besought to take measures in reference to the insurrection, but, in view of its prompt suppression, judged that none were necessary. Shortly after the suppression of the insurrection a statement was sent to Lord Carnarvon, signed by the bishops and archdeacons of Barbadoes, thirty-four clergymen, and four Moravian missionaries, stating that the riots were not caused by any suffering among the people, but were largely promoted by a general impression among the negroes that the land and property of the planters would be divided among them, with the Governor's consent. The belief was very general that the property had been awarded to the negroes by the Queen, at the Governor's instance, and was wrongfully withheld from them.

Mr. Disraeli, on the 16th of August, was raised to the peerage, under the title of the Earl of Beaconsfield.

The Prince of Wales, returning from his journey to India, landed at Portsmouth, April 11th, when he was received with befitting ceremonies and festivities. An address of welcome by the corporation was made to him, an ode of welcome was sung by the choir, after which he, escorted by members of the royal family, took the train for London. Here the Victoria station and route to Buckingham Palace were decorated. He was met at the station by a deputation from the corporation

of the city of Westminster, with an address. A reception was given him by the civic authorities of the corporation of London at Guildhall, May 19th.

Sir Salar Jung, premier of the dominions of the Nizam, or representative of the former Mogul Emperors of India, visited England in June and July on a mission respecting the political relations of the Nizam's territory to the crown. He was regarded as perhaps the ablest, and certainly the strongest, of the viziers of the native states of India, and had rendered service to the English during the mutiny, the value of which was freely and thankfully acknowledged. Through the conservative influence which he exerted over the Mohammedans of the Deccan, he had secured Hyderabad and the Madras Presidency to the British crown. His request, which implied substantially the restoration of the independence of the Nizam's dominions, could not be granted, for reasons of obvious political expediency. Nevertheless, he was cordially welcomed, and was given every possible courtesy and honor, and his visit proved to be of an agreeable character to himself and the people with whom he came in contact. He left a record of his own impressions in his reply to an address presented to him by the East India Association, in which he said, "I feel confident that the close intimacy and intercourse between the gentlemen of England and India cannot fail to be productive of lasting benefit to either country."

GREECE,* a kingdom of Southeastern Europe. Reigning King, George I., King of the Hellenes, born December 24, 1845, second son of the reigning King of Denmark; elected King of the Hellenes by the National Assembly at Athens, March 18 (30), 1863; accepted the crown June 4, 1863; declared of age by a decree of the National Assembly, June 27, 1863; married October 27, 1867, to Olga, daughter of Grand-duke Constantine of Russia, born August 22, 1851. Issue of the union are three sons and two daughters: Constantinos, Duke of Sparta, born August 3, 1868; George, born June 25, 1869; Alexandra, born August 30, 1870; Nicholas, born February 9, 1872; Maria, born March 3, 1876.

The area of the kingdom amounts to 19,358 square miles; the population, according to the census of 1870, to 1,457,894 persons.

In the budget for 1876 the revenue was estimated as follows (1 drachma = 19.3 cents):

	Drachmas.
1. Direct taxes.....	12,785,000
a. Land tax, tithe.....	10,000,000
b. Duty on cattle and pastures..	1,245,000
c. Duty on beehives.....	40,000
d. Licenses.....	800,000
e. Taxes on edifices.....	650,000
2. Indirect taxes.....	16,205,000
a. Customs.....	11,500,000
b. Stamp.....	4,200,000
c. Miscellaneous.....	505,000

* See ANNUAL CYCLOPEDIA of 1874 for statistics on the population of large cities, on nationalities, on religious denominations, and on education.

3. Produce of national property.....	Drachmas.	2,788,800
4. Public service.....		1,104,900
a. Posts.....		700,000
b. Telegraphs.....		400,000
c. Printing-office.....		4,800
5. Sale of national property.....		8,065,000
6. Miscellaneous receipts.....		1,095,700
7. Ecclesiastical receipts.....		808,000
8. Arrears.....		1,510,000
Total revenue.....		38,926,900

The expenditures were estimated as follows:

1. Interest on foreign debt.....	Drachmas.	1,328,000
2. Interest on internal debt.....		6,485,469
3. Pensions.....		8,070,820
4. Civil list.....		1,125,000
5. Salaries of deputies.....		450,000
6. Department of Finance.....		1,884,240
a. Foreign Affairs.....		1,152,978
b. Justice.....		8,091,782
c. Interior.....		4,777,477
d. Worship and Education.....		2,106,410
e. War.....		7,469,800
f. Marine.....		1,959,890
12. Cost of general administration.....		2,947,450
13. Miscellaneous expenditures.....		1,985,000
Total.....		89,068,941

The actual budgets of the kingdom differ, however, widely from the budget estimates. Since the establishment of Greece as an independent kingdom, there have been few financial terms without a deficit.

The foreign debt, according to Mollet (in reports by his Majesty's secretaries of embassy and legation, 1875), amounted, at the close of 1874, to 385,500,000 drachmas; the home debt, to 94,600,000; total debt, 480,100,000.

The army of the kingdom is formed by conscription, with the general privilege to procure substitutes, which is done to a very large extent. The strength of the army on the peace-footing was, according to the budget of 1876, 12,188 men with 636 horses; on the war-footing the army numbers 29,584 men, with 50 guns.

The navy, in 1875, consisted of 2 iron-clad frigates, 1 royal yacht, 8 screw-steamers, and 10 sailing-vessels.

The general commerce, in 1874, was as follows, in drachmas:

COUNTRIES.	Imports.	Exports.
Great Britain.....	83,730,000	46,827,000
Turkey.....	21,218,000	8,291,000
Austria and Hungary.....	15,647,000	7,751,000
Russia.....	19,626,000	2,428,000
France.....	17,567,000	3,490,000
Italy.....	7,214,000	1,564,000
Other countries.....	6,065,000	5,689,000
Total, 1874.....	120,867,000	75,486,000
" 1873.....	117,685,000	76,858,000
" 1872.....	123,181,000	67,373,000
" 1871.....	108,586,000	76,882,000

The movement of shipping, in 1878 and 1874, is shown by the following table:

ENTERED AND CLEARED.	Year.	Vessels.	Tons.
Ocean navigation.....	1878	16,624	2,282,109
Coast ".....	1878	96,090	4,004,825
Ocean ".....	1874	21,494	3,550,025
Coast ".....	1874	121,009	4,495,408

The merchant navy, on December 31, 1874, consisted of 5,202 vessels, of 250,077 tons; among them there were 20 steamers, of about 6,048 tons, and 4,097 sailing-vessels, of 42,877 tons.

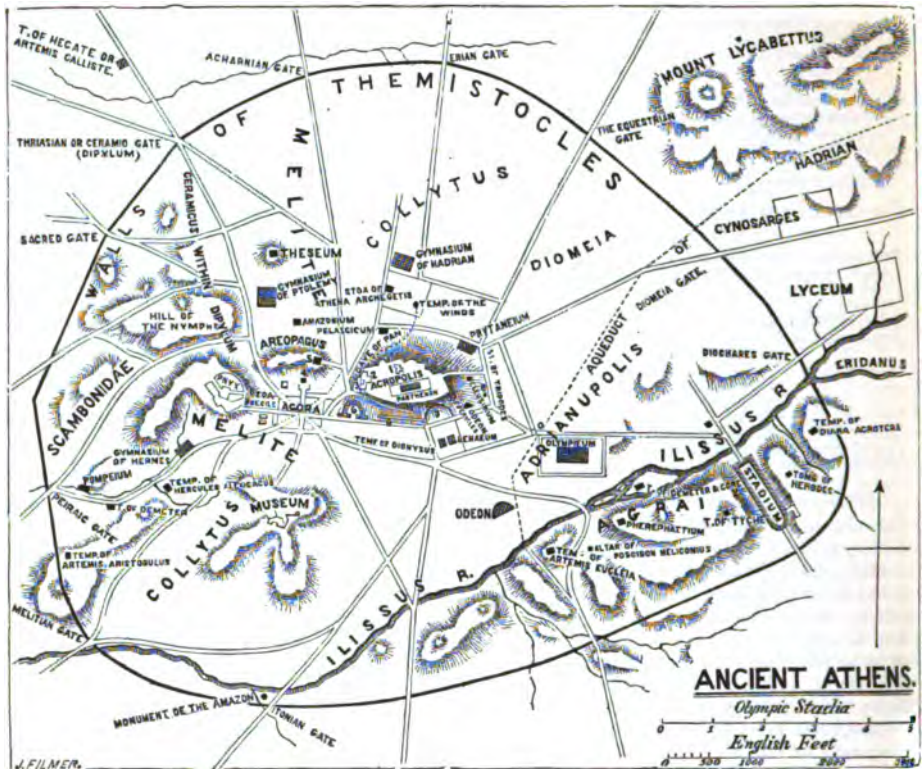

Greece had, in 1875, only one railroad in operation. It connects Athens with the ports of Piræus and Phalerum, was opened in 1869, and is 12 kilometres long (1 kilometre = 0.62 mile). The aggregate length of the electric telegraph-lines is 1,600 kilometres; that of the wires, 1,800 kilometres.

The Chamber of Deputies, after having disposed of forty-three out of one hundred and four of the bills brought before it by the Government, was adjourned by the King early in February, because a quorum could not be obtained. On the 22d of April King George with his family departed from Athens to visit his native land, Denmark, and the other countries of Europe. Many speculations were indulged in as to the object of his visit and its probable duration. Some professed to think that he would not return, or that his return would be made conditional upon certain alterations being made in the constitution. Minister-President Kumunduros was credited with the remark that the country would prove, while he and his fellow-ministers conducted the Government in the absence of his Majesty, how

PLAN OF ATHENS AND THE PORT TOWNS.

well it could do without the King. After the departure of the King the minister addressed a circular to the departmental prefects, in which he referred to the quiet which prevailed throughout the country, and expressed the hope that, even in the existing precarious state of foreign affairs, the peace of the nation would be preserved; for in the Eastern question the Government would pursue a policy friendly to Turkey. This circular was also sent out to the Greek representatives in foreign countries. It seems to have had a wholesome effect on the mind of the Turkish Government, for the Porte expressed a willingness to proceed to the solution of the questions of difference existing between it and the Greek Government,

1. Erechtheum. 2. Propylaea. 3. Temple of Nike Apteros. 4. Temple of Ares. 5. Sanctuary of Semna. 6. Odeon of Herodes. 7. Theatre of Dionysus. 8. Stoa Eumeneia. 9. Monument of Lyciscrates.

PLAN OF ANCIENT ATHENS.

viz.: that of the Greco-Turkish Railroad; that of naturalization, which had been pending for several years; that of the ratification of the Greco-Roumanian trade convention; and that of the adjustment of boundaries. In a short time the question as to the rights of native Greeks residing in Turkey was settled by the concession by the Turkish Government of its position. The Government adhered steadily to the policy which was outlined in the circular of the minister-president. Nevertheless, as the difficulties in the way of the settlement of the questions between Turkey and the great powers seemed to increase, it did not neglect to care for the provision of the country for defense in case of emergencies which should require the exhibition of force. The Cretan Assembly had refused to accept the reforms which had been imposed upon that province by Ali Pasha. The Porte having refused to grant the demands of the Cretans, advice was sought from the Greek Government. It counseled them to appeal to the great powers, and await the result. The recruiting-officers of the Servians were ordered to be arrested if they were found within the Greek territory. No relations or unions were acknowledged between Greece and Servia, and the hope which was

expressed by Prince Milan in his manifesto of a participation of Greece in the struggle was pronounced to be without foundation. In July, five cannon belonging to Montenegro were found at Corfu. The Turkish Government wished to seize them, but the Greek Government declined to permit it. The general secretary of the Minister of the Interior, who, on an official visit to Corfu about this time, had put himself in communication with Bosnian insurgents, was subjected to an examination on this account.

The Chambers were opened in extra session on the 2d of October, but without a speech from the throne, the King not having yet returned from his visit abroad. It was significantly remarked that his presence was not needed, and on the contrary might have been made use of to the disadvantage of the country by the party of action, who would have made it an occasion for turbulent demonstrations. The address of the minister-president at the opening of the Chambers made no mention of the Turkish question. M. Zaimis, the ministerial candidate, was elected President of the Chamber of Deputies, by 75 against 54 votes. On the 1st of October a public meeting, attended by about 8,000 persons, was

held at Athens. It was addressed by Professors Pappunigopulon, Cocino, and Damala, who dwelt upon the intolerable position of the Greek provinces of Turkey, and expressed regret that the powers, in their proposals for the pacification of the East, had ignored the interests and just claims of these provinces, thus creating an inequality between them and the provinces inhabited by the Slavs. They maintained that the Greeks had been treated with neglect, as the reward for the services they had rendered at the wish of the powers to the cause of peace, and they urged the Greek nation to complete its preparations and hold itself in readiness for every eventuality. To a deputation visiting him from this meeting, Minister Kumunduros replied, on the 3d, that Greece would act very unwisely if it should now plunge itself into the inevitable dangers attending a participation in the Turkish controversy. When it came to a settlement, Europe would not ignore the rights of Greece. An armament would cost money, and whoever sought it must apply to the Chambers. On the 20th of October the minister-president laid before the Chambers the programme of the Government. Without believing that war would come immediately, he would have Greece ready for any event, so far as concerned necessary preparations. He had a bill to lay before the Chambers to perfect a military organization, so that Greece would soon be in a position to demand and defend the rights it claimed. The bill contemplated the imposition of an obligatory military service, and an increase of the regular forces. The military exercises which the youth in the schools had gone through during the year would facilitate this work. Besides, all men between twenty and thirty years of age should be drilled, and if necessary incorporated into the army. By such measures, the Government would soon have a considerable force on a war footing. In regard to internal policy, the minister advised the leaders of the different groups in the Assembly to select a ministry which knew the wants of the country, and go hand-in-hand with it. The bill introduced by Minister Kumunduros provided for a land-force of 200,000 men, of which 120,000 should consist of active troops, and 80,000 should be enrolled as reserves or Landwehr, and for the raising by loan of the sum of 10,000,000 drachmas, to be secured by an increase of taxes. The deputies, shortly afterward, 88 to 77, passed a vote of confidence in the Government, approving its precautionary policy. Nineteen deputies, however, did not vote.

On the 11th of November the Minister of Foreign Affairs, M. Contostavlos, made to the Chamber an address, in which, after expressing his agreement with the views previously expressed by M. Kumunduros, he made substantially the following declarations:

We have followed a peaceful policy, and shall adhere to it, unless events compel us to another. In-

asmuch as there exists a probability that we may be embarrassed by the events of a war, we propose military preparations, not as significant of warlike designs, but as a measure of precaution. We expect that Europe, guided by a sense of justice and seeking a permanent peace, will undertake efficient and suitable steps in the East to secure the rights of the Christian people and preserve tranquillity, and will thereby facilitate our adherence to the policy which we have marked out and held to, but for the further observance of which we need a moral support. Indeed, I would be wanting in sincerity if I sought to conceal the fact that continued inactivity when the future of the Greeks subjects of the Porte is concerned would be scarcely conceivable, nay, would be impossible, for the kingdom of Greece. What binds the free Greeks and the others is not only community of race, language, thought, and national traditions; it is in a higher degree the consciousness of the obligation that free Greece owes to all Greeks. For the freedom of the Greek kingdom was obtained only by the common struggles of all Greeks, and no power on earth could bind Greece to quiet and inactivity in the face of the perpetration of injustice against the subject Greeks.

The defensive bill passed its first reading in the Chamber of Deputies on November 23d. Subsequently the clause providing for an increase of one-half per cent. in the taxes on articles of consumption, for the purpose of securing the interest and payment of the loan of 10,000,000 drachmas contemplated in the bill, was lost on a second division—82 to 81. Upon this vote Kumunduros and his fellow-ministers resigned. The formation of a new cabinet was undertaken by Deligeorgis. Upon the appearance of the new ministry in the Chamber the deputies, by a vote of 88 to 59, made it understood that it was not acceptable to them. The King seemed to have no resource but to call Kumunduros again to the head of the ministry. Besides the office of minister-president, Kumunduros also took charge of the Department of Justice. Bubulis was appointed Minister of the Marine, and the other ministers of the old cabinet were retained in the posts they had previously held. A proposition made by the newly-organized ministry to refer the bill for defensive preparations to a special committee was adopted by the Chamber, 101 to 57—Zaimis, Trikupis, and Bulgaris, with their followers, voting for it, while only the party of Deligeorgis stood out against it. After that the Chamber approved of the obtaining of a loan of 10,000,000 drachmas for the reorganization of the army and for other especial military measures.

Judicial processes were begun, February 7th, against M. Valassapulos, ex-Minister of Worship; M. Nikolapulos, ex-Minister of Justice; and the Archbishops of Cephalonia, Patras, and Messene, for simony. The case was one that attracted great popular interest. The court was held in the new court-room, in which the Chamber of Deputies had sat for three months, and which was capable of holding one thousand men. The President of the Court of Cassation, Balbis, presided over a court of twelve judges. The Chamber of Deputies was represented by five prosecutors chosen from the

body; thirty-five advocates were retained by the defense; one hundred and six witnesses had been summoned for the prosecution, and one hundred and seventeen witnesses for the defense. Special places were assigned for stenographers and journalists, as well as for the diplomatic body and the advocates, while the public occupied the galleries. The first five days were consumed in the hearing of the technical objections of the defense to the competency of the court to try the case. Among the objections to the jurisdiction of the court

was one set up by the inculpated bishops that they were amenable only to a spiritual court. On this it was ruled that the crime for which they were arraigned was a civil crime, of which the civil tribunals could take cognizance. Finally, all of the objections were overruled, and the court asserted its full jurisdiction over the whole body of the offense and over all the accused. The first witness called was Kastorches, Archbishop of Pthtiatia, a man of more than ninety years of age. His evidence went to show that bribery with regard to the

GENERAL VIEW OF THE ACROPOLIS AT THE PRESENT DAY.

nomination of bishops had become so customary as to be now looked upon as quite a matter of course; it was indeed, he said, considered impossible at the present time that a

fares that they were, to use his own language, "quite intoxicated" on the subject.

GROUND-PLAN OF THE ACROPOLIS.

Autonopulos, Abbot of Egina, testified that before the appointment of his friend Averkios to the see of Patras, Averkios being at the time a candidate for the see, he had gone to see him, and found him very gloomy. He inquired what was the matter, and Averkios confessed to him at length that he had been asked for money in order to get the nomination, and saw no hope of obtaining the see by any other means. The abbot refused to believe this; but finally arranged to go and see the minister, and find out for himself, taking with him the sum demanded. He went accordingly to Valassapulos, and spoke to him about the appointment of his friend. After some conversation, the minister made use of the words, "I must be satisfied." The abbot asked him whether he required money, and, being answered affirmatively, put down a sum and departed. Averkios was consequently nominated to the see of Patras. On the part of the accused, Valassapulos repelled every charge. The Archbishop of Patras, Averkios Lampiris, stated that, during his long residence in Athens, he had had friendly intercourse with the most

bishop should succeed to his appointment by any other means, and the minds of the clergy had become so familiar with this state of af-

prominent men in Greece, especially with Messrs. Bulgaris, Deljannis, and Grivas. After he had been nominated by the synod to the archbishopric he suddenly encountered obstacles, which he was advised to overcome by means of a sum of money. He declared to his friend Anthimus that he would rather lose his appointment than obtain it by such means. Anthimus, however, would not agree to this, and, without consulting him further, and against his expressed refusal to pay any money, had paid to the minister Valassapulos 10,000 drachmas, which had been borrowed for the expenses of his installation. After his nomination he desired to make a present to Bulgaria, but the latter refused it. Kompothekras, Archbishop of Cephalonia, refused to say anything in his defense. The defendants, Charitakis and Oekonomopulos, denied absolutely that they had had any part in the corrupt transactions. The two ministers and the three archbishops were all found guilty of the offenses charged against them, and sentenced, April 13th, as follows: Valassapulos, former Minister of Worship, to one year's imprisonment, deprivation of political rights for three years, and to pay over the sum he had received as a bribe to the poorhouses; Nikolopulos, ex-Minister of Justice, to an imprisonment of ten months; the Archbishop of Cephalonia to a fine of 10,000, the Archbishop of Patras to a fine of 4,400, and the Archbishop of Messene to a fine of 4,000 drachmas, these being double the several amounts they had paid as bribes. The Synod of the Church also imposed an interdiction of three years upon each of the bishops, during which time their dioceses should be managed by commissioners. The deputy of the King at the synod declined to sign this judgment, regarding it as too severe.

Early in January a new convention with the Laurion Mining Company was approved by the Chamber of Deputies, under which the taxation on the clear proceeds of the silver-bearing ores was reduced from fifty-three per cent. to ten per cent.

GREEK CHURCH. The following table gives a statistical account of the clergy of the Greek Church for 1876:

COUNTRIES.	Metropolitans and Archbishops.	Bishops.	Secular Priests.	Monks.	Nuns.
Austria proper	1	2	862	80
Hungary.....	2	3	3,100	200
Russia (inclusive of Asiatic provinces)...	16	22	50,756	10,862	14,707
Greece.....	16	15	4,661	1,880	150
Roumania.....	1	2	2,702	4,762	4,076
Serbia.....	1	2	712	122
Turkey.....	49	51	(?)	(?)	(?)
Montenegro.....	1	(?)	(?)
Total.....	87	118	(?)	(?)	(?)

monks and nuns, to the total population, is as follows:

COUNTRIES.	NO. OF INHABITANTS FOR EVERY		
	Secular Priest.	Monk.	Nun.
Austro-Hungarian monarchy.....	864	10,900
Russia.....	1,060	5,000	8,700
Greece.....	850	900	10,000
Roumania.....	490	867	1,008
Serbia.....	1,900	11,000
Total.....	4,614	28,687	14,708

In Russia, according to the report for 1874 of the President of the Holy Synod, there were 55 dioceses; in the exarchate of Georgia connected with it since, 8 dioceses; in America there is a mission under the Bishop of "the Aleutian Islands and Alaska." On the 31st of December, 1873, there were 40,364 churches and 13,386 chapels. During the year 1874 there were built 419 churches and 140 chapels, at a cost of 699,591 rubles (about \$600,000), a third part of which was given by the Government, about two-thirds from the funds devoted to religious instruction, some little being added from the local revenues of the bishops. The Orthodox inhabitants of the empire at the close of 1873 were reported as 55,777,152. (There were no returns received up to that date from the dioceses of Kamtchatka and Tomsk, or from the army and navy.) The births, marriages, and deaths, in the Orthodox Church (except in the diocese of Kamtchatka and the eparchy of Georgia, concerning which the reports were not in) were: Births, 3,272,414, of which 1,667,949 were males; marriages, 602,427; deaths, 1,223,209 males, 1,155,986 females—in all, 2,379,195. The ecclesiastical educational establishments were 242; 186 being ecclesiastical schools, 52 seminaries, and 4 ecclesiastical academies, these latter being at St. Petersburg, Moscow, Kiev, and Kazan. One hundred and twenty-eight professors and teachers were employed in the academies, 850 in the seminaries, and 1,560 in the schools. The scholars numbered respectively 562, 12,396, and 26,227; 503 in the academies, 6,201 in the seminaries, and 9,430 in the schools receiving aid. The parochial schools numbered 7,722, with 165,889 male scholars, and 27,874 females. During 1874 there were 9,033 converts to Orthodoxy, 1,707 of these from Romanism; 11 had been Armenians, 782 Protestants, 2,890 schismatics from the Orthodox Church, 427 Jews, 747 Mohammedans, and 2,519 idolaters. In 1876 Bishop Bugnion, of the Greek Church, made arrangements with the Government of South Australia for the introduction of 40,000 adults of the same religious faith as himself into the Northern Territory, who were then residing in South Russia, Mauritius, America, and India. The immigrants were to receive grants of land at a small rental, and at the end of ten years have the fee simple.

The proportion of the secular clergy, and

The following particulars concerning the missions of the Russian Church in Japan and China are from the last report of the President of the Holy Synod, Count de Tolstoy. The Russian mission in Japan took its rise from the diocese of Kamtchatka in 1870. Last year its *personnel* consisted of the archimandrite Nicholas, the head of the mission, the monk Anatolius, twelve catechists and thirty catechetical scholars preparing for missionary work under the immediate direction of the missionaries. Two of the catechists, Peter Salsloff and Paul Savabe, zealously engaged in proclaiming the gospel at Sendae, were prepared for holy orders. By decree of the Holy Synod, in accord with the Minister of Foreign Affairs, Paul, Bishop of Kamtchatka, visited Japan. The great importance of the Japan mission, and the work which had been carried on there year after year, demanded an increase of the number of laborers. Wherefore, by a decree of the Holy Synod, Enthymius and Moses, two monks of the Petchersky Lavra at Kiev, were appointed to missionary duty in Japan. With the increased number of missionaries, the need of increased support became evident. The Holy Synod felt it necessary to ask for a grant for the Japan mission of the balance of the Government appropriation for its support. It also permitted the head of the mission to use, for its necessary expenses, what remained of a sum granted for its support from the special funds of the Holy Synod. It was determined also that subscription-books should be sent, by the head of the mission, to St. Petersburg, to individuals, for subscriptions in both the capitals, for the needs of this mission.

The work of the Peking mission was temporarily checked in 1873 by the death of two of its members. At present the mission is in charge of the archimandrite Palladius. A monk in this mission, Flavian by name, who was assigned to it in 1874, is very busily engaged in superintending the schools, and in editing new translations for the mission. The organization of the Russian Church is described as follows in "A Brief Explanation of the Seven Holy Mysteries," by Alexander Jeloboffsky, archpriest of the Church:

Those persons who, by the will of God, are appointed to serve in the Church, and to teach men the Holy Faith and a good Christian life, are divided into three orders: 1. Bishops (in Russian *episcop*, *archierie*); 2. Presbyters (*presbyter*, *svaischennike*, *serie*); 3. Deacons (*diacon*). The bishops are the principal, the chief, pastors and teachers of the Christian Church. The word bishop (*episcop*) signifies an inspector, a superintendent; *archierie* means a chief priest. [It may be considered but another form of the word hierarch, which is of like derivation.] The bishops can celebrate all the seven Christian mysteries. It appertains to them to ordain men to the ministry. Without bishops there could not be priests. On account of their great episcopal dignity, they bless the people with both hands; during the service they wear special robes indicating their office, and, in token of their high authority, they either hold in the hand, or there is carried before them, a pastoral staff. Some bishops

are called vicar-bishops, others archbishops, metropolitans, and, among the Greeks, patriarchs. All these names, however, designate one office, that of the episcopate, and only differ among themselves in dignity and precedence. Vicar-bishops (the term vicar denotes their position and duty) do not have independent sees or dioceses, but assist other bishops, under whom they are placed. On account of the greatness of some dioceses, for we have some with a very large population, or covering a great extent of country (there are dioceses five or six hundred miles long, e. g., Novgorod), it would be very difficult for one bishop to acquaint himself with all the churches, clergy, and Orthodox population of these; an additional bishop is given in such cases, as an assistant to the diocesan. An archbishop is a chief bishop. The word metropolitan is not Russian: it designates a bishop who presides over one of the chief cities of the empire; "mother cities" they may be called, such as St. Petersburg, Moscow, and Kiev. The titles of archbishop and metropolitan are, however, given to a bishop for special services and merits. The metropolitans wear not a black mitre (*cloubuk*), like the other bishops, but a white one, ornamented in front with a cross of precious stones. Consecrations to the episcopate are performed not by one bishop, but by several. When there occurs a vacancy in the episcopate, the Holy Synod nominates to the see several worthy archimandrites, and presents their names to the Emperor for confirmation. On his designation, one of these candidates is chosen.

The second, the most numerous order of the ministry, is that of presbyters or priests. These are ordained by the bishops, and receive through them, from the Lord God, authority to instruct the people in the Christian faith, and to celebrate all the mysteries except that of orders. Priests lay hands on priests, but they cannot ordain. As a bishop with us is always celibate, so, on the contrary, the priests, like their people, living in the world, and with laymen, themselves also lead a family life. It is only conceded to a priest to marry before ordination. Very high and holy is the priest's office, and he who is hallowed by it, and joined to the Saviour, ought not afterward to be affianced to any human being.

As bishops, on account of special services and worth, are given the honorary titles of archbishop and metropolitan, so worthy and honored priests are distinguished by the titles *protierie* and *protopresbyter*. The name presbyter, signifying an elder, is given to them.

The senior priests who are set over the army chaplains are called *glavnie svaischenniki*. One of them is the "Superior Priest of the Guards and Grenadiers," and the other the "Superior of the Army and Navy." These appoint the clergy in their departments, watch over their zealous and faithful service, guide and instruct them in their various difficulties; in a word, their duties in regard to the army chaplains closely resemble those of the bishops with their clergy. To their high positions these honored priests are appointed by the Holy Synod, subject to the Emperor's confirmation. The third, the largest order of the ministry, consists of the deacons. The name signifies *one who serves*. Such a name is given to the deacon because he does not and cannot celebrate any mystery, but only serves (assists the priest) in the celebration of the mysteries. Every divine service can be celebrated by the priest without a deacon, none by the deacon without a priest. Ordinations to the diaconate, as well as to the priesthood, are performed by the bishops. Some deacons, serving bishops, or connected with an imperial chapel, on account of their special dignity, are called by the name of *protodiacon*.

These three orders, bishops, priests, and deacons, make up the Christian hierarchy—the pastors, the teachers, the stewards of things spiritual. Ordination to each of these is a mystery, and is solemnly

performed, with special ceremonies, in connection with the divine liturgy.

Other persons serving in the Church (readers, etc.) do not form a part of the Church hierarchy.

The supreme authority to which every bishop, priest, and deacon is subject, and which examines into and decides the special and most important affairs connected with the Faith and the Church, for us Orthodox, is the Holy Governing Synod. This consists of most worthy bishops and honored priests.

The members of the Synod are appointed thereto by the Emperor.

In Austria proper there is one ecclesiastical province, with a metropolitan at Czernowitz, and two bishops in the Bukowina and Dalmatia. There were besides, in 1870, 316 parishes, two in Vienna, three in the Littoral, 219 in the Bukowina, and 92 in Dalmatia. The number of the secular clergy, together with the candidates for the priesthood, was 433, of whom three were in Vienna, nine in the Littoral, one in Galicia, 292 in the Bukowina, and 128 in Dalmatia. The number of monasteries was 14, three in the Bukowina, and 11 in Dalmatia, together with 85 members belonging to them. In the lands of the Hungarian crown there are two ecclesiastical provinces, of which one with a metropolitan at Carlowitz is for the Servian, and the other with a metropolitan at Hermannstadt is for the Roumanian nationality. The Church in the entire monarchy is ruled by an Episcopal Synod, the Emperor having the chief superintendence. The bishops of each province form a synod under the presidency of the metropolitan. The Episcopal Synod for the entire monarchy comprises all the bishops, the Metropolitan of Carlowitz presiding. The latter bears the title of patriarch, and in ecclesiastical affairs all the bishops of the empire are subordinate to him. In each of the three provinces church congresses are occasionally held, consisting of the bishops and representatives of the clergy and laity. In the administration of his diocese every metropolitan, archbishop, and bishop, is assisted by a consistory. The number of inhabitants connected with the Greek Church in Austro-Hungary, according to the census of 1869, was 3,050,830, of whom 461,511 were in Austria proper, and 2,589,319 in Hungary.

In Turkey the ecclesiastical power is vested in the Ecumenical Patriarch of Constantinople and the Holy Synod. The latter consists of the four metropolitans who carry the patriarchal seal, and of from six to eight other metropolitans who are called by the patriarchs; but all the Greek bishops who are present in Constantinople can take part in its deliberations. The national churches of Roumania, Servia, and Bulgaria, are dependent upon the Patriarch of Constantinople in doctrinal matters, but are otherwise independent. In each of these three countries the ecclesiastical power is in the hands of a synod, which in Servia consists of the bishops, and in Roumania and Bulgaria of the bishops and archbishops.

Some years ago the Bulgarian Church undertook to resume its ancient autonomy, and while the movement was favored by the Government of Turkey, and not discountenanced by the Russian Church, the Greek Churches denounced the Bulgarians as schismatics or even heretics. There have been for some time past symptoms of a reconciliation. A mixed commission in 1876 came to an understanding, and submitted to the Patriarchate of Constantinople a scheme for a concordat. On November 5th, a commission met in Constantinople to consider the question, How shall those who have been ordained among schismatics be received, when they return to their mother-church? This meeting was supposed to have particular reference to the Bulgarian question.

The venerable Patriarch of Jerusalem, Cyril, after presiding most worthily in that see for twenty-seven years, was, in 1872, deposed from his office, and even excommunicated as a schismatic, by the Synod of Jerusalem, because differing from them in regard to the Bulgarian question. This decree was annulled by the synod in 1876.

GRUPPE, OTTO FRIEDRICH, a German philosopher, poet, and archæologist, born April 15, 1804; died January 7, 1876. He attended the gymnasium in his native town, Dantzic, and afterward studied philosophy, natural sciences, and the old German language and literature. His literary labors, particularly his art reviews, brought him in connection with the *Allgemeine Preussische Staatszeitung*. In 1842 and 1843 he had an appointment in the ministry of Ecclesiastical and Educational Affairs, was appointed Extraordinary Professor of Philosophy in Berlin in 1843, and Life Secretary of the Royal Academy of Fine Arts in 1868. As a philosopher he was a decided opponent of Hegel, while as a poet he showed particular talent for epic poetry. He wrote "Ariadne, die tragische Kunst der Griechen in ihrer Entwicklung und ihrem Zusammenhange mit der Volkspoesie" (1854); "Die römische Elegie;" "Ueber die Theogonie des Hesiod;" and "Minos."

GUATEMALA (REPÚBLICA DE GUATEMALA), one of the five independent republics of Central America, extends from 18° 50' to 18° 15' north latitude, and from 88° 14' to 93° 12' west longitude. Its boundaries are, on the north, the Mexican State of Chiapas; on the east, British Honduras and the Caribbean Sea; on the south, the republics of Honduras and San Salvador; and on the southwest, the Pacific Ocean.

No further progress has been made during the past year in the negotiations relating to the district of Peten, claimed by Mexico.*

The President of the Republic is Lieutenant-General Rafino Barrios, elected May 7, 1873; and the cabinet is made up of the following

* Minute details concerning the territorial division, area, and population of Guatemala may be found in the ANNUAL CYCLOPEDIA for 1875.

members: Interior and Finance, Señor F. Al-
burez; War and Public Works, Señor J. M.
Samayoa; and Foreign Affairs and Public In-
struction, Señor Macal.

The standing army is composed of 3,200
men, besides which there is a militia force of
13,000.

The Government, not satisfied with merely
having established public schools throughout
the country, still continues to bestow upon
the cause of education a degree of care and
zealous attention which cannot fail to prove

fruitful in happy results. One of the first im-
portant acts of Minister Macal, after his ap-
pointment to the portfolio of Foreign Affairs
and Public Instruction, was to visit the schools
and other educational establishments in the
several eastern departments, publishing at his
return a report on the condition of the "schools
of the east," from which we extract the fol-
lowing particulars:

DEPARTMENTS.	SCHOLARS.	
	Males.	Females.
Sacapa.....	746	110
Chiquimula.....	1,294	180
Jalapa.....	797	157
Jutiapa.....	585	44
Santa Rosa.....	706	218
Total.....	4,078	784

The number of scholars attending all schools,
public and private, in the capital, was 3,527; the
total monthly expenditure for the public schools
of the city being \$15,824.25 per month.

Señor Macal proposes a complete reorgani-
zation of the public schools, especially those
for the primary branches, and some desirable
modifications in the present system of manage-
ment. It is also highly probable that gym-
nasiums will be established in connection with
the public schools.

The department of the Interior and Public
Works was engaged in examining several
schemes proposed for the development of the
agricultural interests of the republic.

No regular returns of the finances and com-
merce of Guatemala were published last year,

GUATEMALA LA ANTIGUA.

so that the most recent statistics to be con-
sulted on these branches are those given in the
ANNUAL CYCLOPEDIA for 1875.

In the matter of the national debt the Gua-

temala Government issued a decree on April
27, 1876, by virtue of which the loan decreed
on February 28th of the same year was in-
creased to \$500,000.

A premium of 20 per cent. was granted on this second loan, both capital and premium to bear interest at one per cent. per month, payable every three months.

Another decree of same date directs that all promissory notes and orders emanating from this war debt shall be admissible in payment in all the Government offices. After July 1st the interest on this debt and on the promissory notes was to be paid at the National Bank. After the same date the 25 per cent. increase on certain import dues decreed on March 11th, and the new duties on certain goods, might be paid for by promissory notes given toward extinction of the debt.

Another decree, of April 27th, provides that on and after May 1st payments might be made in the public offices, one-half in National-Bank notes and the other half in money, and that after June 1st the entire sums might be paid in the notes of the above bank. The object is to enhance the value of these notes.

From the following extract from an official organ it would appear that Guatemala is determined not to be behind Costa Rica in the matter of railways:

The need of a railway in our republic is evident, not only to place us on a level with the general movement of progressive ideas, but also to meet the requirements of commerce and public and private business. Accordingly, the Government has decided, as a first and most important undertaking, to open a line of railway from the port of San José to Esquintla, the most difficult part of the road in the rainy season. On October 9th a meeting of capitalists and business-men was held, at which it was agreed to support the Government railway scheme. Under date of October 10th a commission was appointed to undertake the necessary preparatory studies of the scheme. The gentlemen named were Señors Juan Serigiers, Francisco Comacho, and Gregorio Uruela.

The republic of Guatemala has enjoyed a year of undisturbed peace, although there was some probability in the early months of President Barrios taking up arms against General Gonzales, the disturber of San Salvador.

GUIGNIAUT, JOSEPH DANIEL, a French scholar, born May 15, 1794; died March 13, 1876. He entered the Normal School at an early age, where he was the fellow-student of Augustin Thierry, Patin, Dubois, and others; upon leaving, was appointed professor in the Collège Charlemagne, and in 1818 became Master of Conferences at the Normal School. Equally well versed in Greek and in German, he conceived the idea of popularizing in France the great German works on ancient mythology. In the execution of this idea he published in 1825 the first volume of "Religions de l'Antiquité considérées principalement dans leurs Formes symboliques et mythologiques," the fourth and last volume of which appeared in 1851, and which was principally a translation of Dr. F. Creuzer's "Symbolik." He also furnished to Burnouf for his translation of Tacitus two treatises, one entitled "Sur la Vénus de Paphos et son Temple" (1827), and the other "Sur le Dieu Sérapis et son Origine" (1828). He contributed a number of articles to the *Globe*, the *Lycée*, of which he had been one of the founders in 1828, the *Journal de l'Instruction publique*, and other journals. After the reorganization of the Normal School under the name of preparatory school, he took the place of M. Boissonade in the Sorbonne, was again appointed Master of Conferences, and afterward Director. In 1835 he exchanged his title of Director of the Normal School against that of Professor of Geography, in the Faculty of Letters, and was elected a member of the Academy of Inscriptions and Belles-Lettres in 1847. He was called to the Royal Council of Instruction in 1846, of which body he was secretary until 1850. In 1854 he was appointed Professor of History in the College of France, and in 1866 became a member of the Council of Public Instruction. In 1860 he was elected perpetual secretary of the Academy of Inscriptions. He was created an officer of the Legion of Honor in 1847, and commander in 1862.

H

HANEBERG, DANIEL VON, a German Catholic prelate, born June 17, 1816; died June 17, 1876. He studied at the University of Munich, and was ordained priest in 1839. He was appointed professor of the University of Munich in 1844, and member of the Bavarian Academy of Sciences in 1848. His lectures were chiefly on the Old Testament. In 1850 he entered the Benedictine order, became Abbot of St. Bonifacius in 1854, and founded the Reform School at Andech. He established missions in Algiers, Constantine, Tunis, and one in Constantinople. In 1871 he sympathized with the Old Catholics, and was even present at some of their meetings, but afterward withdrew from the movement. In 1864 he refused the bishopric of

Treves, but in 1871 was elected Bishop of Spire, which he accepted. Among his works are: "Geschichte der biblischen Offenbarung" (1850; third edition, 1868), "Die religiösen Alterthümer der Bibel" (second edition, 1869), "Ueber das Schulwesen der Mohamedaner" (1850), "Erörterungen über Bendo-Wakidi's Geschichte der Eroberung von Syrien" (1860), "Ueber die Theologie des Aristoteles" (1863), and "Beleuchtung von Renan's Leben Jesu" (1864).

HANSON, SIR RICHARD DAVIES, a British author and jurist, born in 1805; died March 4, 1876. He was admitted to the bar in 1828, and practised for a short time in London. In 1830 he took part in an unsuccessful attempt

to found the colony of South Australia, which project did not receive the sanction of Parliament until 1834. Owing to the delay in the establishment of the colony, he was not among the first to settle there, as he had intended. In 1838 he accompanied Lord Durham to Canada, as assistant commissioner of inquiry into crown-lands and immigration; went from there to New Zealand, and finally settled in South Australia in 1846. In 1850 he was appointed Advocate-General, and in 1856 Attorney-General, which office he was forced to resign in 1859, upon the election of a new Legislature. In 1861 he was appointed Chief-Justice, upon the retirement of Sir Charles Cooper, which office he held up to his death. He was the author of "Jesus of History," and of a series of papers on "Law and Nature."

HARVEY, Sir GEORGE, a British painter, born in 1805; died January 23, 1876. He displayed a taste for drawing at a very early period of his life, but having been apprenticed to a bookseller, he enjoyed but limited opportunities for cultivating his talent. From the year 1823 to 1825 he studied at the school of the Trustees' Academy, in Edinburgh. In the year 1826 the Scottish artists resolved to establish an academy of their own, framed upon the model of the Royal Academy in London. Harvey was invited to join it as an associate. He became an academician in 1829. Incidents from the history of the Covenanters supplied the subjects for some of the pictures by which he first won fame. His work, "First Reading of the Bible in Old St. Paul's," produced in 1847, made him known at the London Exhibitions. He painted very many domestic subjects, and completed all his works with a masterly hand. His "Dawn revealing the New World to Columbus," and his "Quitting the Manse," are in the Scottish National Gallery. He was elected President of the Royal Scottish Academy on the death of Sir John Watson Gordon, in 1864, and was knighted in 1867.

HASENCLEVER, RICHARD, a German physician, and one of the leaders of the Old Catholic movement, born May 16, 1818; died June 8, 1876. He showed in his youth considerable talent for music and mathematics, and desired to become an artist, but, in deference to his parents' wish, he studied medicine. After graduating from the University of Bonn, he settled in Düsseldorf, where he became a warm friend of the poet Immermann, for whom he composed the music to a number of his plays. In 1845 he was married to the only daughter of the painter Schadow. He was the author of a number of medical works, of which one, on the diseases of the eye, became well known. He was a member of the Prussian Chamber of Deputies and of the first German Reichstag, in both of which bodies he was a bitter opponent of the Catholic party. When the Old Catholic movement began he became one of its leaders, organizing an Old Catholic congregation in Düsseldorf. He was the

author of "Ueber die Grundsätze einer rationalen musikalischen Erziehung" (1874), and "Das neue Dogma der Unfehlbarkeit des Papstes im Lichte der Vernunft und der alten Lehre betrachtet" (1874).

HAUG, MARTIN, a celebrated German Orientalist, born January 30, 1827; died June 3, 1876. He studied at the University of Tübingen, devoting particular attention to Sanskrit, and afterward went to Göttingen, where he attended the lectures of Ewald and Benfey. In 1856 he went to Heidelberg in order to take part in the preparation of Bunsen's Bible. In 1859 he went to India as Superintendent of Sanskrit Studies, and Professor of Sanskrit, in the Poona College. Here he soon gained such a reputation by his superior knowledge of Sanskrit that the Indian priests initiated him into the secrets of the ritual of the Vedas and the hitherto secret fields of Indian learning. In 1868 he undertook, at the instance of the British Government, a scientific journey through the province of Guzerat, on which he gathered numerous Zend, Bahlavi, and Sanskrit manuscripts. In 1866 he returned to Germany on account of his health, and in 1868 became Professor of Comparative Philology in the University of Munich. His most important works on the explanation of the Zendavesta are "Die fünf Gatha's oder Sammlungen von Liedern und Sprüchen Zarathustra's" (Leipzig, 1858-'62, 2 vols.), and "Essays on the Sacred Language, Writings, and Religion of the Parsees" (Bombay, 1862). His principal work on ancient Indian literature was an edition and translation of one of the oldest ritual books of the Vedas, the "Aitareya Brahmana of the Rigveda" (Bombay, 1863, 2 vols.). Of his older works the best known are "Ueber die Schrift und Sprache der zweiten Keilschriftgattung" (1855), and "Ueber die Pehlewisprache und den Bundehesch" (1854). He published, at the order of the Government, in connection with one of the most learned Parsee priests, the following works: "An Old Zand-Pahlavi Glossary" (1867); "An Old Pahlavi Pâzund Glossary," with a long "Essay on the Palilavi Language" (1870); "The Book of Ardâ Virâf, together with other Pahlavi Texts," with a translation, notes, a glossary, and a short grammar (2 vols., 1872-'74). Among his other works are "Brahma und die Brahmanen" (1871), and "Ueber den Werth und das Wesen des wedischen Accents" (1874). He was a member of the Royal Bavarian Academy of Sciences, to the journal of which he contributed a number of valuable papers.

HAYES, RUTHERFORD BIRCHARD, was born October 4, 1822, at Delaware, Ohio, whither his father, Rutherford Hayes, a merchant, and his mother, Sophia Birchard Hayes, had removed from Vermont in 1817. He graduated at Kenyon College, Ohio, in 1842; studied in the Law School of Harvard University under Judge Story and Prof. Greenleaf, from 1843 to

January, 1845, and was admitted to the bar in Ohio in March following. He began the practice of the law in Lower Sandusky, now Fremont, Sandusky County. In 1850 he removed to Cincinnati, where his integrity and ability soon secured for him professional success. In the fall of 1856 he was an unsuccessful candidate for Judge of the Common Pleas Court. In April, 1859, he was chosen City Solicitor by the City Council of Cincinnati, to fill a vacancy; and the following spring he was elected by the people to the same office. In April, 1861, in common with the entire Republican ticket, he was defeated for reelection.

In politics Mr. Hayes had always been a Whig, with strong antislavery convictions. He became a member of the Republican party on its organization, and in 1860 earnestly advocated the election of Mr. Lincoln to the presidency. June 7, 1861, he was appointed by Governor Dennison major of the Twenty-third Ohio Volunteer Infantry, which soon after was assigned to duty in West Virginia. In September Major Hayes was appointed by General Rosecrans Judge-Advocate of the Department of Ohio, which position he held for about two months, and in October he was promoted to the rank of lieutenant-colonel. He distinguished himself in the battle of South Mountain, September 14, 1862, where he was severely wounded in the arm by a musket-ball, and on the 24th of October following he was appointed colonel of the Twenty-third Regiment. In the spring of 1864 Colonel Hayes commanded a brigade in General Crook's army which moved to cut the main lines of communication between Richmond and the Southwest, and he led the force which successfully stormed the enemy's works at Cloyd Mountain. In the first battle of Winchester, July 24, 1864, he commanded a brigade in a division of General Crook's army, and while forced to retreat displayed great personal bravery under deadly fire from the enemy. Subsequently he led his brigade into the thickest of the fight at the indecisive battle of Berryville. In the battle of Winchester, or Opequan, September 19, 1864, Colonel Hayes bore a conspicuous part in the operations of Crook's corps of Sheridan's army. He succeeded to the command of the division, and led it in the assault on South Mountain, or Fisher's Hill, September 22d, and in the battle of Cedar Creek, October 19th, where his horse was shot under him. Colonel Hayes was now made a brigadier-general, and on March 13, 1865, he was promoted to the rank of brevet major-general, "for gallant and distinguished services during the campaign of 1864 in West Virginia, and particularly at the battles of Fisher's Hill and Cedar Creek, Virginia." During the war he was four times wounded.

In the autumn of 1864, while in the field, General Hayes was elected to represent the Second District of Ohio in Congress, and took his seat December 4, 1865. He was made

chairman of the Library Committee. In 1866 he was reelected. He made no elaborate speeches in Congress, but was a careful voter and an honest worker. In 1867 he was elected Governor of Ohio by a majority of 2,983 over Judge Thurman, and, having resigned his seat in Congress, was inaugurated, January 13, 1868. In 1869 he was reelected Governor by a majority of 7,506 over George H. Pendleton. Having refused to be reelected, Governor Hayes retired from the office of Chief Executive after four years' service. In 1872 he was induced against his wishes again to be a candidate for Congress, but the election went against the Republicans, and General H. B. Bauning was the successful candidate. In 1875 ex-Governor Hayes was a third time elected Chief Executive of Ohio, by a majority of 5,544 over his Democratic opponent, Governor William Allen. The campaign was vigorously contested, and was of national importance. Its leading issue was the financial question. The Republicans had declared in favor of that policy "which, without unnecessary shock to business or trade, will ultimately equalize the purchasing capacity of the coin and paper dollar."

The Democrats denounced "the contraction of the currency heretofore made by the Republican party, and the further contraction proposed by it, with a view to forced resumption of specie payment," and demanded that "the volume of currency be made and kept equal to the wants of trade."

The wide-spread interest aroused by this campaign, and the success of the Republican candidate, gave to Governor Hayes a national reputation. The Republican State Convention of Ohio which met in March, 1876, recommended his nomination for the presidency by the National Republican Convention. The convention met in Cincinnati, June 14th, and on the following day Governor Hayes's name was presented for the first place on the ticket by ex-Governor Noyes of Ohio, and he was finally nominated. (For the particulars and the result of the election, see UNITED STATES.) In 1852 Mr. Hayes was married, in Cincinnati, to Miss Lucy W., daughter of Dr. James Webb. He is the father of eight children, of whom five are living.

HELL-GATE, IMPROVEMENT OF. Hell-Gate, or Hurl-Gate, is the name of a narrow, navigable channel between Long Island and Ward's and Manhattan Islands, connecting Long Island Sound, through the East River, with New York harbor, and with the Hudson. Through this narrow passage two tides must pass, and their enormous force renders the accumulation of sediment in the channel impossible, and its depth would admit of the passage of the largest vessels at either tide. Owing, however, to numerous reefs in the channel, and the swift and constantly-shifting eddies which they produced, Hell-Gate has always been impassable to large ships, and exceedingly dan-

gerous to smaller ones. Its perils, however, have not prevented it from being much used as a thoroughfare between New York and the Eastern ports, and numberless wrecks and mishaps have occurred. The removal of these destructive obstacles would not only shorten by a great deal important commercial highways, but would render New York twice as easy of defense in case of a naval war and blockade. The Government and the merchants of New York, therefore, both turned their attention to this object long before any sufficient method of dealing with submarine obstructions of this character was known.

In 1848 Lieutenants-Commanding Charles H. Davis and David Porter, of the Navy, made a careful survey of Hell-Gate, and reported upon the character of the dangers of the channel, the best manner of navigating it, and the best plan for rendering it safer. The reports of these officers pointed out the Gridiron as the most dangerous reef, and the Pot and Fry-pan Rocks, and Way's Reef, and the Bread-and-Cheese Reef, by Blackwell's Island, as also very dangerous. They proposed that Pot Rock, the Fry-pan, and Way's Reef, be destroyed by blasting. Lieutenant Davis advised further the clearing of the middle channel by blasting; his associate questioned the feasibility of this, and proposed the destruction of a part of Hallett's Point Reef. The large reefs, Lieutenant Davis proposed, should be faced with walls or piers conforming to the shape which the waters had given the reefs, and provided with spring-fenders, which would turn the vessels striking against them into the channel-ways. No sufficient method of submarine blasting to carry out their projects was then known, and these officers suggested no new device.

The first efforts at opening the channel were made in 1851, when \$18,000 was raised by the citizens of New York, and about \$1,000 more than that sum was expended on the different rocks in Hell-Gate, including Pot Rock, the Fry-pan, Way's Reef, Shelldrake, Bald-headed Billy, Hoyt's Reef, Diamond, and Hallett's Point Reefs. The blasting done at that time was on the plan of surface-blasting invented by M. Maillefert, and was superintended by M. Maillefert himself. It consisted simply in depositing charges of powder on the surface of the rocks, and exploding them by an electric current. This plan proved very successful at the beginning; but it was soon found that, after knocking off the rough projections and coming down to a smooth surface, it was very difficult to go any deeper. Much of the labor spent upon the portions of the rocks which were cleared away might have been saved if the services of the diver had been employed in the selection of spots where the charges might be so laid as to throw the dislodged masses into deep water. The work accomplished by M. Maillefert was of high value, although his method was entirely inefficient to remove any considerable portion of the Hell-

Gate rocks, or indeed to accomplish any more than it did already. Nevertheless, Congress was induced, during the following year, to appropriate \$20,000 for carrying on the work which had already been begun by the private subscriptions of citizens. Of this, \$18,000 was expended on Pot Rock, which was lowered only about two feet. In 1856 the advisory council to the "Commission relative to the Encroachments and Preservation of the Harbor of New York" made a report upon the subject of improving Hell-Gate, recommending the removal of Pot Rock, the Fry-pan, Way's Reef, a part of Hallett's Point Reef, and a number of small rocks near shore, and the construction of sea-walls quite similar to those proposed by Lieutenant Davis. They advocated the method of drilling, instead of the Maillefert process.

No improvements, however, were undertaken until 1866, when the duty of examining Hell-Gate was committed to Brevet Major-General Newton, of the U. S. Engineers. He surveyed the different rocks, and made a report to Congress the following year. In 1868 Congress made the first appropriation (\$85,000) for carrying on the work according to the plan recommended by General Newton. The history of the operations for the first year or two is one of accidents and vexatious failures. After the appropriation of \$85,000, proposals were issued for the removal of the Pot and Fry-pan by contract. The contract was bid off by Sidney F. Shelbourne, who worked upon these rocks without success with a machine which was driven at first by water and afterward by steam power; this machine was finally wrecked by a colliding scow. The Maillefert contract expired at the close of the year 1869, after Way's Reef had been lowered to the depth of 17½ feet, and Shelldrake to 18½ feet. General Newton finally took the work into his own hands.

The only method of drilling under water before in use, i. e., from diving-bells, would not do here at all, on account of the powerful currents, and also of the danger from colliding vessels. It was after long reflection, and a close study of the ground, that General Newton worked out his idea of a cupola-scow. In his first report he proposed a platform, which could be floated on scows to the places of operation, having sliding supports, which could be lowered to the bottom and then coupled together. From this the drills could be worked by an engine, and, to protect them from the currents, they could be made to pass through iron tubes reaching to the bottom. Another apparatus thought of was an iron caisson of oval form, having its top above the water to support a platform for the operations, with self-adjustable legs at its bottom. It should contain chambers inside, which could be filled with air when it was to float, and with water when it was to sink. It became apparent, however, that neither of these machines, if made of suf-

cient size to be stable, would answer for some of the smaller rocks to be operated upon, and also that they could not be easily protected against the collisions which were sure to occur. They gave place, therefore, to the idea of the steam-drilling cupola-scow, with which many of the submerged reefs have been successfully demolished. This apparatus consists of two parts, the first a large scow, moored to the shore, serving as a fixed platform, with a well-hole through its bottom, affording passage for the drills. It is built very strong, with an overhang or guard to take the shock of colliding craft. The other part is a hemispherical cupola, open at top and bottom, made with a powerful iron frame, covered with boiler-iron. Its diameter is thirty feet. Its hemispherical form is the one most favorable to stability; for the pressure of the currents, being normal to its surface, passes through its centre, and tends to hold it more firmly in place, rather than to subvert it. When it is required to move the dome, it is slung to the bottom of the scow with chains by four hoisting-engines. The dome serves as a framework for holding twenty-one drill-tubes. The drills have cross-shaped cutting edges $5\frac{1}{2}$ inches long; together with their rods, they have a length of 10 feet, and a weight of 600 to 700 pounds. The engines raise them through a distance of 18 inches, and, releasing them, they fall upon the rock by their own gravity. Before the cupola is unslung from the scow, a diver explores the bottom to find the right spot for sinking the caisson. The bow and aft moorings of the float are arranged to pull directly against the tidal current at ebb and flood; it is further provided with side-anchors to stay it. The mooring-chains are fastened to capstans, with which the position of the scow can be altered. The dome stands upon the bottom by sliding legs, which are let go after it is lowered into position, and which fix themselves as they strike the bottom by self-acting cams. The diver examines the rock under the dome, to determine which of the drill-tubes may best be employed. As absolute fixity of the platform is not obtainable, the drill-rods are attached to the pistons of the engines by a rope, whose length is regulated by a feed-gear. The nitro-glycerine, which was the principal material used in these blasts, was brought to the spot on a small scow, after the drilling-scow had been removed fifty or a hundred yards, and there filled in tin cases of various lengths, according to the depth of the holes, and lowered to the diver. He is guided to the first hole by a cord, and finds his way to the others by cords attached to the plugs. Before the cartridges are lowered, they are attached to the electric wire. The friction-battery and the wet-battery, with underground connection, which allowed of a much smaller length of leading-wire, were both employed in these blasts. Mr. Striedinger, the engineer in charge, gave great attention to the improve-

ment of the cartridge-caps, and was able, in every case, to procure an explosion, even when the nitro-glycerine was frozen; the percussion was produced by about 25 grains of fulminate. The holes were drilled 6 or 8 feet apart, and to a depth of about 4 feet below the level to which the rock was to be broken; the charges averaged 50 or 60 pounds of nitro-glycerine. When a reef has been sufficiently broken up by the blasts, the fragments are dredged up and removed by Morris & Cummings's steam-grapple. This machine has been able, so far, to do its work without protection against the currents; but, should the force of the water become too violent, as it is probable it may in some parts of Hell-Gate, it is proposed to shut out the currents by a network of chains, with one side resting upon the bottom, and one side buoyed up by a boat. A similar chain-netting was devised for the purpose of excluding currents from the lower part of the drill-cupola, if this should ever become necessary.

The construction of the scow-drill machine was commenced in July, 1869, and, after long experiments upon the drills, to determine the weight and size of point required, and upon the explosive power of nitro-glycerine, the practical work was commenced in May, 1871, upon Diamond Reef, near the mouth of the East River. The surface of this rock had first to be dredged; it was then drilled with holes 7 to 13 feet deep by $4\frac{1}{2}$ inches diameter at the surface and $3\frac{1}{2}$ inches at the bottom, and blasted with 80 to 55 pounds of nitro-glycerine charges. During the same year operations were carried on in alternation upon Coentie's Reef. This reef was broken up, during two working-seasons, with 400 charged holes and 56 surface-blasts, and the consumption of 22,606 pounds of nitro-glycerine. Owing to a blunder in the title of the appropriation bill, the dredging was obliged to be left over, in part, until 1875. In Hell-Gate the Frying-Pan was leveled in July, 1872, with 17 holes and 11 surface-blasts. Pot Rock was commenced upon August 5th. The number of blasts was 40 holes blasted and 60 seam and 24 surface-blasts. During the labors here sixteen collisions occurred; two of the vessels were sunk, and one of them, being driven under the scow, carried away the dome, which was recovered, considerably injured, in 80 feet of water. Work was remitted upon these rocks until stricter regulations should be enforced upon pilots. Way's Reef was removed to the depth of 26 feet below mean low-tide mark during the latter part of 1874. The size of the rock rising above that level was 285 feet length by 115 feet greatest width. The drill-holes were 262, with an average depth of 8.13 feet and an aggregate depth of 2,130 feet. Thirty-five hands was the average working-force employed on the scow. Computations of Engineer Striedinger, in a report to General Newton, gave the following numerical data: Average

depth of drill-hole per cubic yard of rock, 9.7; average number of pounds of nitro-glycerine required per yard, 5.54; number of feet drilled per machine per shift of 8 hours, 6.5; average cost per foot of hole drilled, including placing and removing of scow, lowering and raising cupola, the expenses of drilling, of sharpening drills, and loss of steel, \$2.05; cost of dredging and dumping *débris* per cubic yard, \$4.29.

For the removal of Hallett's Point Reef a different method was employed—that of tunneling. This plan for the destruction of dangerous reefs under water was suggested in 1868 by G. C. Reitheimer, former superintendent of the Holyhead Breakwater Works, and in the same year it was advanced by General Alexander, of the U. S. Engineer Corps, who proposed it for the removal of Blossom Rock in San Francisco harbor, and by A. W. von Schmidt for the same object, who projected making an excavation deep enough to receive the exploded fragments. The plan of each was to sink a large shaft of iron or other material to the surface of the rock, and, after so

VERTICAL SECTION OF COFFER-DAM AND EXCAVATION AT BLOSSOM ROCK.

adjusting it at the bottom as to prevent the entrance of water, to bore downward into the interior. Mr. von Schmidt exploded Blossom Rock in 1869 according to this plan, but without following out his project of a deep excavation to receive the *débris*.

Hallett's Point Reef has been a serious obstruction in the East Channel, dangerous to large and small craft alike; it did not leave enough sea-way for vessels floating down with the ebb and steering clear of Flood Rock, and vessels have often been cast against it; it created, besides, dangerous eddies at either tide, particularly a strong drift toward the Frying-Pan, when the tide set in from the sound. The reef was semicircular in form, 720 feet across, and running out 800 feet into the channel.

The work was commenced in July, 1869, by the construction of a coffer-dam, of irregular pentagonal form, between high and low water marks, reaching 95 feet out upon the rock, and having a breadth of 145 feet at the shore. The shaft, 105 feet by 95 feet, was sunk to the depth of 33 feet below mean low water. Tunnels, 10 in number, were then driven into the rock and connected by cross-cut galleries at regular distances. The tunnels were carried out to distances varying from 51 to 126 feet

before any transverse sections were made. The tunnels radiated from the centre, and the galleries followed concentric lines around the shaft. As the distance between the tunnels became greater, additional branching tunnels were made until, at the last, they numbered in all 35. There were 10 galleries, whose mean distance apart was 25 feet from centre to centre. The area covered by the tunnels and shaft was 2½ acres. Tunnels varied at the shaft from 13 to 22 feet high, with an average height of 19½ feet, and from 9 to 12½ feet wide, with an average width of 10½ feet; but they decreased rapidly as the reef declined, until their dimensions were little greater than the heading. The first gallery had a height of 12 feet and a width of 9 feet, but the outer ones were much smaller. The number of piers left standing was 172. The total length of tunnels was 4,857 feet, and of galleries 2,568 feet, making in all 7,425 feet.

The process of driving ahead the tunnel was by drilling a number of holes converging toward each other, and springing out a mass of rock, thus creating a cavity, into which the surrounding portions could be exploded from holes drilled perpendicularly to the face. When large charges can be safely used in tunneling, the convergent lines are drilled deep around a pyramidal mass with a rectangular base, and perpendicular holes (one or more) are made within the base, and all are charged and fired together, thus producing a deep excavation. This rapid process could not be much used, however, in the Hallett's Point excavations, owing to the danger of heavy charges and simultaneous firing. Charges of not more than eight ounces of nitro-glycerine were generally employed, and the Bickford fuse used to set them off. The cartridges were made with cases of pasteboard, coated with an impervious composition, and the percussion was produced by means of a cap containing fulminate of

GROUND-PLAN OF TUNNELS AND GALLERIES AT HALLETT'S POINT.

mercury. The explosive material was nitro-glycerine and the compounds of nitro-glycerine, except in spots where the rock was sufficiently laminated to require only gunpowder. Owing to the impracticability of heavy blasts

and simultaneous discharges, and of enlarging the excavation as it advanced, the progress was slow compared with land-tunneling. Up to July, 1872, the drilling was mostly done by hand. The Burleigh steam percussion-machine was then adopted. It proved to be much better than the hand-drill, even for the small holes required by these operations, drill-

BURLEIGH DRILL AT WORK.

ing 30 feet of holes in eight hours, at a cost of 36 to 37 cents per foot, including repairs, against a cost of 95 cents per foot by the manual process. Experiments were made with the Ingersoll percussion-machine, which proved not inferior to the other; the diamond drill was also used, which was found to be an excellent instrument, but useful here only for exploring the rock ahead, the varying dip of the rock and the frequent quartz-veins rendering it incapable for general work. The new Rand drill was employed later, with approved success.

The bottom was accurately surveyed in 1871, and the plans and calculations for the work were based on as many as 18,000 soundings. The inclination of the tunnel was varied so as always to leave a roof of 6 to 15 feet thickness with an average of 10 feet between the mine and the water. The tunnels were kept free from water by constant pumping; in some of these the floor was inclined so as to convey off the water. The total mass of the reef has been computed at 110,461 cubic yards. The utmost care had to be taken not to leave too thin a roof, and not to break through the roof by too heavy explosions; and the unmanageable character of the rock, which is a very hard hornblende gneiss of variable inclination, with foliations and intersecting quartz-veins, greatly enhanced the difficulties of the work. Of the expense of tunneling, blasting represented 46 per cent., and the removal of the rock to the shaft 17 per cent. The amount of explosives employed was carefully proportioned to the work done, according to the principle that the charges required in blasting are proportionate to the cubes of the lines of least resistance. The numerical coefficient of nitro-glycerine for this rock expressed in pounds, that is, the weight required for a line of least resistance of one foot, General Newton found by experiment to be .088. This into .75 gave the amount required in pounds of dynamite (formula, $L^3 \times .088 \times .75$).

The insufficiency of the appropriations of Congress greatly delayed the work. The

amount of rock excavated and carried away through the shaft was 47,461 cubic yards, leaving only about 30,000 yards to be dredged away, provided that the shattered masses were not heaped together upon the bottom by the explosion—a result which General Newton sought to avoid by distributed charges. When the works were ready for the explosion, which was to shatter the remaining shell of the reef, the pillars and roof were charged with a multitude of small charges of explosive material distributed all through the remaining rock, and every charge was connected with an electric wire, excepting a certain number which were not primed, but must explode from the concussion. In the concluding portion of the work there were 67 men employed, 3 foremen, 17 miners and chargers, and 47 helpers. The engineers in charge were: John Newton, lieutenant-colonel of engineers, brevet major-general; James Mercur, captain of engineers; Joseph H. Willard, first-lieutenant of engineers; Julius H. Striedinger, civil engineer, assistant; Bernard F. Boyle, mining engineer, overseer; James Quigley and Robert S. Burnett, assistants. Captain William H. Heur was for a long time resident engineer at Hallett's Point. The minimum amount of explosive material would have been employed if every square pier had received one charge in its centre, and every oblong pier two charges; but General Newton determined to decrease the lines of least resistance by using a greater number of blasts, and thus diminish the vibratory and disturbing effect upon the reef.

The day before the blast the water was let into the mine by means of a siphon over the coffer-dam. The explosion was delayed until Sunday, by reason of a delay in the delivery of explosives, and General Newton received many remonstrances against firing the mine on that day, but refused decidedly to risk the lives of his men by a day's delay. The holes were divided into 184 groups of 20 holes each, every eighth group having a separate battery; and all the wires were conducted over a plate or cross-bar in the bomb-proof near the shaft, which acted as a circuit-closer and effected the simultaneous ignition of all the primers. This plate was also made the means of establishing the voltaic current; for when the operator, General Newton, touched the key of his battery, it caused a torpedo to explode which broke a cord, by which the plate was suspended, and it falling plunged a number of pins, with which its under side was studded, into small cups of mercury, thus generating the electricity which exploded the mine. At 2.51 P. M., the hour of high tide, September 24th, the blast took place. The explosion lasted three seconds. It was marked by a vast mass of foaming water, composed of numerous distinct spouts, rising up in the air to the height of 40 or 50 feet, above which issued fragments of rock mingled with mud, which were projected 15 or 20 feet higher, accompanied by a thick cloud of black

smoke. The vibration of the earth was very slight, the least tremor and a low booming sound only being experienced in the city of New York; yet the shock was perceptible at a considerable distance in some directions, even as far as Springfield in Massachusetts. No damage resulted to property in the neighborhood. The amount of explosive material discharged was: dynamite, 28,901 pounds; rendrock-powder, 9,061½ pounds; vulcan-powder, 14,244 pounds: total quantity, 52,206½ pounds. The explosives were contained in 13,596 cartridges. The number of separate blasts was 4,462, and the number of charged holes 4,427, of which 3,645 were primed; the holes were 2 or 3 inches in diameter, and of 9 feet average depth; they were made from 6 to 10 feet apart. The blasts were connected together by 100,000 feet of wire, and with the batteries, of which there were 64 with 960 cells, by 120,000 feet of leading-wire. The usual charge was three cartridges with a primer of dynamite, which was exploded by the percussion of fulminate of mercury, discharged by the voltaic current. Rendrock and vulcan powders were found preferable, notwithstanding their inferior explosive power, to the liquid nitro-glycerine. The concussion was not greater than was expected by the engineers, although great fears had prevailed among the people. The success of the explosion was greater than the engineers had looked for, the rock being broken into smaller fragments, and settling to a greater depth, than was expected. Before the middle of 1874 the explosive substances used almost altogether in the blasts was nitro-glycerine. Mica-powder, giant-powder, several thousand pounds of rendrock, and finally a large amount of vulcan-powder, all compounds of nitro-glycerine, were afterward employed. The latter compounds, it was demonstrated, though possessing less explosive power than nitro-glycerine, did more effective work; and that notably of vulcan-powder, costing less than one-half the price of nitro-glycerine per pound, ten ounces would break as much rock as eight of the pure substance.

The total amount of money appropriated by Congress for the East River and Hell-Gate improvements, from 1868 to 1876 inclusive, has been \$1,940,000, viz.: In 1868, \$85,000; 1869, \$180,000; 1870, \$250,000; 1871, \$225,000; 1872, \$225,000; 1873, \$225,000; 1874, \$250,000; 1875, \$250,000; 1876, \$250,000. The sum expended up to the time of the Hallett's Point explosion was nearly \$1,717,000. The principal part of the remainder of the appropriation already made will probably be consumed in the dredging of Hallett's Point Reef. The estimated cost of completing the improvements (from the date of August 1, 1876) is \$5,139,120, and the estimate of the entire cost about \$6,926,000. The obstruction which is to be next operated upon is the great sunken Flood Reef, which has nearly three times the area of the demolished Hallett's Point Reef.

The entire commercial results of opening up

a safe passage for vessels of every size through Hell-Gate cannot be predicted with any certainty. The transoceanic trade may not be diverted to any considerable extent from its old route; and, if it is drawn into this new thoroughfare, it will probably be by slow degrees. The fogs of Long Island Sound, with its crooked channel and rocky shores, would prevent the ocean-ships from using this road for the sake of the 200 or 300 miles that would be gained; and the risk and inconvenience of crowding the East River with shipping would be another deterring cause. On the other hand, the convenience of the immediate connection, which could be made with the railroads, and the long extent of wharfage which could be utilized in the upper East River, would act as strong attractions. But if the improvements were made simply for the benefit of the coastwise trade, no doubt can be entertained of their importance and utility.

HEMANS, CHARLES ISIDORE, a British scholar; died in Bagni di Lucca, Italy, October 26, 1876. He was the son of Mrs. Felicia Hemans, the well-known poetess. He left England early in life, and, after residing in various parts of Europe, finally fixed his abode in Italy, chiefly in Rome, where he soon became known as a scholar of considerable historic and archæological attainments. He was the author of "Catholic Italy," "A History of Ancient and Mediæval Christianity and Sacred Art in Italy" (2 vols., embracing a period from A. D. 900 to 1500), and "Historic and Monumental Rome." He was also a regular contributor to the *Academy*.

HENDRICKS, THOMAS ANDREWS, an American statesman, born in Muskingum County, Ohio, September 7, 1819. In 1822 his father settled in Shelby County, Ind. Thomas graduated at South Hanover College in 1841, studied law at Chambersburg, Pa., was admitted to the bar there in 1843, and returned to Indiana to practise. In 1845 he was elected to the Legislature, and in 1850 a delegate to the State Constitutional Convention. From 1851 to 1855 he represented the Indianapolis district in Congress, from 1855 to 1859 was Commissioner of the General Land-Office, and from 1863 to 1869 was a member of the United States Senate, in which he was regarded as the Democratic leader. He served in the Committees on Claims, Public Buildings, the Judiciary, Public Lands, and Naval Affairs. He was strongly opposed to the Republican plan of reconstruction, and held that the prosperity of the white people of the South was of more importance than that of the negroes. He opposed the exalting of the freedmen into a governing class, while a part of the white people were to be disfranchised. He also took ground against the proposed amendments of the Constitution, believing that the foundations of government ought not to be disturbed during the war or immediately after its close. He supported measures necessary to maintain the

prosecution of the war. In the Democratic National Convention of 1868, which assembled in Tammany Hall, New York, Mr. Hendricks was a leading candidate for the presidential nomination. On the twenty-first ballot he received 132 votes, while General Hancock received 135½. It seemed probable that Mr. Hendricks would be the choice of the convention, when the name of Horatio Seymour was brought forward, and unanimously agreed upon. As the Democratic candidate for Governor of Indiana, Mr. Hendricks was defeated in 1860 by Henry L. Lane, and in 1868 by Conrad Baker, but in 1872 was elected for the term ending January 1, 1877. Prior to the assembling of the National Democratic Convention in St. Louis, in July, 1876, Governor Hendricks's name was prominently brought forward for the first place on the ticket, but Mr. Tilden became the nominee for President, and Governor Hendricks was chosen as the candidate for Vice-President. (For Governor Hendricks's views on finances and other public questions, see his letter of acceptance. For the result of the election, see UNITED STATES.)

HENNEBERG, RUDOLF, a German painter, born September 13, 1826; died in Brunswick, his native town, September 14, 1876. Having finished his studies, he held for one year a position as auditor in the circuit court in Brunswick; and in 1850, following his own inclinations, devoted himself to the study of art in the academy at Antwerp. In the following year he went to Paris, where he became a pupil of Couture. In 1861 he went to Italy and spent two winters in Rome, devoting himself to the study of the works of the old masters, and particularly of Titian. After a short residence in Munich, he went to Berlin in 1866, and to Rome in 1873, where he remained up to a short time before his death. In 1867 he sent to the Paris Exhibition his "Wild Huntsman," which gained for him a medal and considerable reputation. In the following year appeared his "Chase after Fortune," for which he received a gold medal in Berlin, and the art medal of the Vienna Exposition, and which placed him in the front rank of German artists.

HERBERT, Sir PERCY EGERTON, a British general, born in 1822; died October 7, 1876. He was the second son of the second Earl of Powis; entered the army in 1840, and rapidly advanced. He served in the Kaffre War of 1851 to 1853, and in the expedition into the Orange River sovereignty. He took part in the Crimean War, was wounded at the Alma, and distinguished himself at Inkerman and at Sevastopol. He afterward served in India, when he took part in various affairs and skirmishes. He was Treasurer of the Household in 1867, and became major-general in 1868. In the latter year he married the only child of the Earl of Kerry. He was M. P. for Ludlow in 1854-'60, and from 1865 up to his death sat for South Shropshire.

HEUGLIN, THEODOR VON, a German explorer, born March 20, 1824; died November 5, 1876. After having passed through the gymnasium, he devoted himself to the study of the natural sciences, particularly pharmacy, and then made extensive travels through Europe. The year 1850 saw him in Egypt, Arabia, and on the shores of the Red Sea. Prepared by his study of the Oriental languages and customs, and well acquainted with life in the East, he was in 1852 attached to the Austrian consulate in Khartoom, as secretary to the consul, Dr. Reitz, and, on his journey thither, had occasion to visit some very interesting regions. He remained for some time in Dongola, and visited the oasis El-Khâb and the plain of Bajuda. His first enterprise, together with Dr. Reitz, was an official journey to Abyssinia, through entirely unknown regions. After the death of Dr. Reitz, Heuglin became consul. He brought with him from this journey numerous interesting scientific notes, which he published under the title of "Reisen in Nordostafrika" (1857). His next journey was into the territory of the White Nile, and to Kordofan, from which he brought back a large number of interesting animals, both living and dead, which he sent to the Zoölogical Garden in Vienna. In his "Systematische Uebersicht der Vögel Nordostafrikas" (1854), he mentioned 754 distinct species of birds. In 1857 he traveled over the west coast of the Red Sea, and the Somali coast. The results of this journey he described in Petermann's *Mittheilungen* for 1860 and 1861. In 1861 he set out on a journey from Egypt into the interior of Africa, to determine the fate of the celebrated explorer, Edward Vogel. Among his companions were a number of men distinguished as explorers, among them Hansal, Steudner, Schubert, and Kinzelbach, while he was afterward joined by Munzinger Bey. After traveling through Abyssinia and the neighboring countries of the Gallas, the Bogas, and the Kunamas, meeting with a very friendly reception on the part of King Theodore of Abyssinia, they returned and arrived again in Khartoom in July, 1862. In the beginning of 1863 we find Heuglin and Steudner again as members of the expedition of the Dutch lady Miss Tinné to the Bahr-el-Ghasal, the western tributary of the White Nile. Heuglin returned alone to Khartoom in March, 1864, Steudner having died the previous year. In November of the same year he was in Suez, whence he returned to Europe in 1865. He now devoted himself entirely to working up the scientific material which he had brought home from his journeys; first making journeys to France, Holland, and Northern Germany, everywhere comparing the libraries of those countries. He then published the "Reise nach Abessinien und den Gallaländern" (1868), "Ornithologie Nordostafrikas" (57 numbers, 1869-'75), and "Reise in das Gebiet der westlichen Zuflüsse des Weissen Nil" (1869). In 1870 and 1871 he made two trips to the North-

ern Ocean, the first to Spitzbergen and the other to Nova Zembla, which he described in "Reisen nach dem Nordpolarmeer in den Jahren 1870 und 1871" (3 vols., 1872-'74). In the beginning of 1875 he again set out for Africa, in order to explore the unknown territory of the Beni-Amér, and in the latter part of that year accepted an invitation to enter the service of the Khedive.

HODGSON, WILLIAM NICHOLSON, M. P., born in 1801; died April 2, 1876. In politics he was a Conservative, and proclaimed himself in favor of "strict neutrality in our diplomatic intercourse." He sat in Parliament for Carlisle from 1847 to 1852, being defeated in the latter year. Being returned by the same constituency, he represented them from March, 1857, to April, 1859, when he was again defeated. In July, 1865, he was again returned, and retained his seat until 1868, when he was once more rejected. In November, 1868, he was returned for East Cumberland, a few days subsequent to his defeat at Carlisle.

HOGG, Sir JAMES WREID, Bart., a British statesman, born in 1790; died May 27, 1876. He received his early education at Dr. Bruce's Academy, Belfast, and afterward studied at Trinity College, Dublin. Having been called to the bar, he went to India in 1814, and obtained a large and lucrative practice at the Calcutta bar. In 1822 he accepted the appointment of Register of the Supreme Court of Judicature, Calcutta, which he held until his return home in 1833. In 1834 he entered the House of Commons as member for Beverly. This town he represented until 1847, when he was elected a member for Honiton, for which borough he sat until the general election in 1857, when he was defeated by two votes. He was elected a director of the East India Company in 1839, of which he was throughout his career one of the leading spirits, and its principal spokesman in the House of Commons. In 1858, when the Government of India was transferred to the crown, he was elected a member of the Council of India, in which he sat until 1873, when he resigned. In politics he was a liberal Conservative, and was a staunch supporter and friend of Sir Robert Peel, from whom he received a baronetcy in 1846. He is succeeded by his eldest son, Sir James Mac-Naghten Hogg, chairman of the Metropolitan Board of Works.

HOLZGETHAN, LUDWIG, Freiherr von, an Austrian statesman, born October 1, 1810; died June 12, 1876. He entered the service of the state in 1831, was appointed Councilor of Finance in Verona in 1850, and President of Finance in Venice in 1852. In 1870 he became Minister of Finance for Austria proper, first under Potocki, and then under Hohenwart, after whose retirement in October, 1872, he was for a time president of the ministry. In January, 1872, he became Minister of Finance for the empire. He was created a knight (*Ritter*) in 1855, and a baron (*Freiherr*) in 1865.

HORSMAN, EDWARD, a British statesman, born in 1807; died December 1, 1876. He was educated at Rugby, was admitted to the Scotch bar in 1831, and was one of the commissioners to inquire into the state of the Kirk of Scotland. In 1836 he was elected to Parliament from Cockermonth, which he represented until the general election in 1852, when he was defeated. But early in the following year he was returned for Stroud, and was one of the members of that constituency until 1868, when he was again defeated. In May, 1869, he was returned from Liskeard, which borough he represented up to his death. In politics he was a Liberal. He was sworn a privy-councilor in 1855, being appointed at the same time Chief Secretary for Ireland, which position he resigned in 1857.

HOWE, SAMUEL GRIDLEY, an American philanthropist; died in Boston, January 9th. He was born in that city, November 10, 1801. He studied in the Boston Grammar-School, thence went to Brown University, where he graduated in 1821, and studied medicine in Boston. In 1824 he went to Greece, and served as a surgeon in the patriot army, and in various other capacities, till 1830. In 1831 he returned to the United States, and soon became interested in the project for establishing an institution for the blind in Boston. He accepted the charge of it, and embarked at once for Europe, to acquire the necessary information and engage teachers, visiting the schools of France and England for this purpose. While in Paris he was made President of the Polish Committee, and undertook to carry and distribute funds for the relief of the detachment of the Polish army which had crossed into Prussia. In the discharge of this duty he was arrested and imprisoned for about six weeks by the Prussian Government. He was then liberated, and escorted over the French frontier by night. In 1832 the Perkins Institution for the Blind, in Boston, was put in operation under his charge. One of his greatest achievements was the successful education of Laura Bridgman, the blind deaf-mute, who was a pupil in this institution and whose instruction was undertaken by Dr. Howe personally. She was born at Hanover, N. H., December 21, 1829. Up to the age of two years she possessed all her faculties, but a severe illness at that time occasioned the loss of sight and hearing, and consequently of speech, while the sense of smell was also destroyed, and that of taste greatly impaired. She recovered her health gradually, but none of her lost senses were restored. She entered the institution when she was eight years old, and soon acquired such a familiarity with the building and its various apartments that she could wander at will through it unattended. Dr. Howe resolved to undertake the task of instructing her, a work which until that time had never been attempted with success. The first step was to teach her the names of objects: for

this purpose an object with which she was familiar, such as a fork or spoon, and with its name in raised letters, was put into her hand. This was repeated many times and with different objects, till she had learned that the word bore some relation to the object. As yet, however, her idea of this relation was very vague. The next step was to present her the separate letters in relief, at first so arranged as to form the name of an object which she knew. Finding that she recognized the word, her teacher disarranged the letters, and taking her hands in his own, proceeded to reconstruct the word, causing her to observe each letter which composed it; having done this several times, she constructed the word herself without assistance. The same process was then repeated with other words, and before the close of her lesson the idea had evidently dawned upon her mind that this was the means by which she could communicate her own thoughts to others. This process was continued until she had become familiar with a considerable number of words. She was then furnished with type having the letters in relief, and a board which had been pierced with holes for the reception of the type. Objects known to her were then presented, and she would compose the names with the type. This afforded her great delight. She was next taught the manual alphabet, which she acquired very readily. This having been attained, her teacher presented her with an object with which she was not familiar, and left her for a time to inform herself concerning its form and use. The teacher then spelled its name with the manual alphabet, the child following each letter till she had comprehended that it was the name of the object, when she herself spelled it in the same way, then composed it with her types, and finally, as if to make assurance doubly sure, placed the words thus composed by the side of the object. All this was accomplished in the first three months. The same course, together with some lessons on the physical relations of objects, was continued through the year. Laura never wearied of this instruction, but when left to herself was constantly spelling words either with her type or the manual alphabet. Her instruction was confined for the first two years to the names of objects; the attempt was then made to instruct her in their qualities, and subsequently in their relations to each other. There were many difficulties connected with each step, but patience and perseverance overcame them all. She was next taught to write, and her first effort was to write a letter unassisted to her mother. She subsequently acquired the rudiments of arithmetic; took lessons on the piano, on which she became a skillful performer; and acquired a practical knowledge of needle-work, and of some household duties. At the funeral of her benefactor and instructor Miss Bridgman was one of the most deeply-afflicted mourners.—Dr. Howe took a

prominent part in founding the experimental school for the training of idiots which resulted in the organization, in 1851, of the Massachusetts School for Idiotic and Feeble-Minded Youth. He was actively engaged in the anti-slavery movement, and was a Free-soil candidate for Congress from Boston in 1846. He engaged earnestly in the sanitary movement in behalf of the soldiers during the civil war. In 1867 he again went to Greece as bearer of supplies for the Cretans in their struggle with the Turks, and subsequently edited in Boston *The Cretan*. In 1871 he was one of the commissioners to visit Santo Domingo and report upon the question of the annexation of that island to the United States, of which he became an earnest advocate. He published an "Historical Sketch of the Greek Revolution" (1828), and a "Reader for the Blind," in raised characters (1839). In 1843 Dr. Howe married Julia Ward, an American poetess, who survives him.

HUNGARY, a kingdom of Europe, and one of the two main divisions of the Austro-Hungarian monarchy. (All the affairs which are common to the entire monarchy have been treated of under the head of AUSTRIA.) As the Military Frontier, which had formerly its own administration, has been wholly incorporated, partly with Hungary proper and partly with Croatia and Slavonia, the lands of the Hungarian crown now consist of three large historic divisions, namely :

DIVISIONS.	Area.	Population in 1869.
Hungary proper.....	87,046	11,530,897
Transylvania.....	21,217	2,115,024
Croatia and Slavonia.....	16,732	1,864,084
Total.....	125,045	15,509,455

The Hungarian ministry, as reconstructed on October 20, 1875, was composed as follows: 1. President of the Ministry, Koloman Tisza; 2. Minister near the King's person (*ad latus*), Baron Wenckheim; 3. Minister of Finance, Koloman Szell; 4. Minister of the Interior, Koloman Tisza; 5. Minister of Education and Public Worship, Dr. Augustin Trefort; 6. Minister of Justice, Bela Perczel; 7. Minister of Public Works, Thomas Pechy; 8. Minister of Agriculture, Industry, and Commerce, Baron Simonyi; 9. Minister of Croatia and Slavonia, Count Pejacevitch; 10. Minister for the Defense of the Country, B. Szende von Keveasztes. Besides its share in the common debt of the monarchy, Hungary has a special debt, amounting, at the end of 1870, to near 700,000,000 florins (including a debt of 269,000,000 florins for redeeming real estate and commuting the wine-tithes). The assets of the state were estimated at 696,600,000 florins.

The aggregate length of railways open for traffic was, on January 1, 1876, 6,415 kilometres (1 kilometre = 0.62 mile). The number of private and official letters, newspapers, etc., was 76,672,000. The length of telegraph-

wires, in January, 1875, was 48,167; of telegraph-lines, 14,838 kilometres. The number of telegraph-stations was 837.

The most important events in Hungary during the year related to the negotiations for the renewal of the "Ausgleich," or compact with Austria, which, in some shape or another, claimed attention during the whole year, and to the discussions concerning the attitude of the country toward the insurrectionary movements in the Herzegovina and Servia. The "Ausgleich" is a treaty or common constitution defining the relations of the Austrian Empire and the kingdom of Hungary. It formed a part of the plan of adjustment by which the claims of the two states were brought into harmony, and Hungary obtained autonomy as to her own affairs, while she recognized the Emperor of Austria as her King, and accepted the same laws in matters common to both states. It embraces political provisions, respecting the common affairs of the countries, the method of their treatment in the delegated bodies, and concerning the direction of the common jurisdiction; financial and commercial clauses, concerning the adjustment of the proportion which each division of the state should pay toward the common expenses; the regulation of customs and trade; and provisions relative to the common defense. This compact was first concluded in 1867, to last for a period of ten years. In anticipation of its expiration in 1877, the cabinets of the two states began, before the close of the year 1875, to make preparations for renewing it. Hungary had made new demands in the renewal of the treaty for changes in the financial clauses, and had formed a project for the establishment of an independent national bank in Hungary, whose notes should be held as equal in all respects to those of the Austrian bank. On the 2d of January the cis-Leithan ministers went to Pesth to consult with the Hungarian ministry respecting the renewal of the treaty. They were there presented by the Hungarian Minister of Commerce, Simonyi, with the project which had been adopted by the Hungarian Ministerial Council on the 30th of December. At the end of March the Hungarian ministers visited Vienna, where the subjects which had been considered in the conference of January, at Pesth, were again discussed in the presence of the Emperor. The negotiations proceeded harmoniously, with every prospect of a speedy satisfactory adjustment, till about the 18th or 20th of April. On the 18th the directors of the bank in Vienna held a meeting for the discussion of the Hungarian project for a bank, the result of which was a decision to oppose the proposition. On the 22d of April Minister-President Tisza, having returned to Pesth, informed the delegation of Liberal members of the Diet that he had told the King that he neither could accept, nor advise the Parliament to accept, the compromise under the conditions which he had found to be the ones ac-

ceptable to the Austrian Government. On the 24th the Hungarian Ministerial Council approved a declaration that the Austrian propositions could only afford the basis for future negotiations; if the Hungarian demand, now reduced to a minimum, could not be granted, the cabinet would retire from office. By the influence of Count Andrassy, who saw the necessity, in view of the pending difficulties in the East, of securing harmony in the empire, and who declared that if Tisza and his colleagues went out of office he would also resign, another conference was held, and an adjustment was made on the 2d of May, by which the compact was renewed in all its important points for ten years longer. The proportion which each country should contribute to common expenses was settled to remain as before. The question respecting the consumption tax was left as it was; on the question of the customs duties, Austria made a concession in the matter of an indemnification for repaid indirect taxes in case of export, amounting to about one and a half million of florins annually in favor of Hungary. The demand of Hungary for an independent bank was not granted, and the unity of the bank of issue and of the standard of valuation was adhered to. Whether a part of the metallic reserve should go to Pesth was left to be decided in the negotiations of Hungary with the national bank for the prolongation of the privilege, which it was expected would be completed during the year.

The result of the negotiations was not satisfactory to the Hungarians, and Tisza was obliged to defend his course to his friends. He said, in a conference of his party, May 6th, that it had been a question whether they should reject what they could obtain and expose the land to all the consequences of such an act, or should accept the compact and defend themselves before the Diet. The latter course had been adopted: first, because, all things considered, the compact contained a not unimportant advance upon the present conditions; and, second, because, more than any other country, Hungary needed peace, and it was the present duty of the Government to see that the whole power of the monarchy, unimpaired by division, be exerted for peace. The Liberal deputy Jokay also advised his friend to accept the compromise, because no better adjustment could be reached. The position and action of the ministers were sustained by the House of Deputies, May 11th. Nevertheless, about seventy members of the majority, who were not present at the sitting of the House, dissented, and endeavored to form a party in opposition to the course of the ministry. Negotiations relating to the further solution of the question of the bank were continued till near the close of the year, the Hungarians continuing to press their demand for the reorganization of the national bank in a dual shape. In the mean time three fractions of the Constitutional party in the Austrian

House of Deputies had combined to resist the ratification and execution of the compact. The directors of the national bank gave unfavorable answers to the propositions made to them by the Hungarian ministry, and refused to consider the question of a dual bank. A new difficulty had also arisen with reference to the adjustment of the debt of eighty millions owed by the state to the bank. The Austrians claimed that Hungary should be charged with a proportion of the debt, while the Hungarians refused to acknowledge the obligation. The Austrian ministry were placed in an embarrassing position, since on one side they had pledged themselves to their Hungarian colleagues to support the compact, and on the other hand they could not afford to break with their party at home. With a view to effect another compromise, corresponding to the demands of the Austrian Constitutional party, they visited

Pesth, December 8d, to ask that certain "technical modifications" might be made in the compact. The Hungarian ministers adhered firmly to their position, and refused to recede one step from the stipulations which had been made in May. In consequence of this condition of affairs, both the Austrian and Hungarian ministers sent in their resignations. At the close of the year the Emperor had not accepted the resignations, and was seeking means to adjust the difficulty.

The situation of Hungary, with its borders touching those of the European provinces of Turkey, causes it to take a peculiar interest in all questions and movements connected with those provinces. Consequently the discussions concerning the Eastern question, which filled so large a place in the history of all European countries during the year, were watched by the Hungarian Parliament and people with

BUDA, HUNGARY.

great interest, and the ministers were often questioned on the subject. In February the matter of the payment of 100,000 florins, spent for the subsistence of Bosnian refugees in Hungary, formed one of the items of the account for common expenditures to be settled between the finance ministers of the two parts of the empire. On the 11th of March Minister-President Tisza declared in the Chamber of Deputies that in case Serbia joined the insurrection against Turkey, the accord of the powers would not be disturbed, and Hungary would act only as its own interests should direct. On the 18th of May the delegations of the two states met at Pesth, to adjust the budget, and at the same time a conference was held with Andrassy upon the Turkish question. On the 14th of June Tisza replied in the Chamber of Deputies to an inter-

pellation by Franzi, respecting the situation in Constantinople, that the aim of the Hungarian Government was to preserve peace, and avoid, at all events, whatever would involve the empire in embarrassment. On the 4th of July a decree was published in the Hungarian official paper by the Minister of the Interior, admonishing the magistrates that they would be held responsible for repression and punishment, according to the law, of all movements against the peace of Austria with the Porte. Many arrests and seizures of arms were made; the frontier guards were strengthened, and monitors were stationed at Semlin. On the 6th of July Count Andrassy held a conference with the Hungarian ministers, at which a clear understanding and full accord were reached with reference to Eastern politics. During this month (July) the deputy Miletics was arrested

in Southern Hungary on a charge of exciting agitations and being an agent of the Servian Omladina. The minister-president authorized a prosecution to be instituted against him. On the reopening of the Parliament, September 28th, the case was referred to the Committee on Privileges. They made a report, October 2d, justifying the arrest, and their report was approved by the Chamber. About this time Tisza declared in the House of Deputies that the Government was in entire accord with the policy of Count Andrassy. On the 17th of November the minister declared, in answer to interpellations by Simonyi and Helfy, that the administration must and would treat the Eastern question by consideration neither of Russian nor of Turkish, but of Austro-Hungarian interests. The principles announced by Tisza were afterward strongly supported by Simonyi, leader of the Conservative Opposition, who defended the policy of peace, and said that the interests of the Magyars and the German-Austrians were to be regarded as well as those of the Slavs. There "should be no talk of a Magyar-Turkish policy. Austria will, in case Russia oversteps her bounds, know how to defend the interests of the whole state with arms, but till then she must observe a friendly neutrality toward the southern Slavs. This was the true Austro-Hungarian policy in foreign affairs." A few days after this, in reply to an interpellation in reference to some proceedings of the Austrian Government against the Statthalter of Dalmatia, the minister-president stated that while the Hungarian Government was in accord with that of Austria with respect to its foreign policy, it had nothing to do with Austrian internal affairs. A demonstration of students at Pesth, in the shape of a torch-light procession to the Turkish minister, was arranged to take place late in October, but it was forbidden by the police. Some of the adherents of the extreme Left attempted to take advantage of this occasion to make a demonstration against the ministry and its position on the Eastern question, but the authorities had anticipated such an event, and had made ample preparations to repress any disorder that might arise. Patrols were stationed throughout the city, the streets were promptly cleared of disorderly persons, and a wholesome impression was made upon the populace.

The estimates for 1877 were submitted to the House of Deputies by the Minister of Finance in October. The total expenditure for the coming year was calculated at 233,000,000 florins, and the revenues were estimated at 218,000,000 florins, leaving a deficit of about 15,000,000 florins, or about the same as the deficit of the preceding year. That the deficit was not reduced, was not because the expenditures had not been lessened, for there was an actual reduction in the year's estimates of administrative expenditures of 4,000,000 florins; but was partly because of the high

price of gold, and partly because the estimates of the proceeds of various sources of revenue had been reduced, which had been set at too high a figure in former estimates. The probable receipts from these sources of revenue had now been calculated on the actual proceeds of the last few years, and the minister thought the calculation would prove a correct one. He pointed out that there must always be an uncertainty about the revenues of a country depending mainly on agriculture. In spite of the floods which had devastated the land in the spring, and the frosts which had come afterward, the returns of revenue had been beyond all expectation favorable, there having been a large increase in the nine months past over the receipts for the corresponding period of the previous year.

The first session of the Hungarian Diet was dissolved by a royal decree, March 27th. A second session was called to meet the next day (the 28th), which after completing a few formalities, adjourned to meet again April 20th. On the 20th of June the Diet again adjourned till September 28th. Aside from the discussions concerning the compact with Austria, the relations of the kingdom to the Eastern question, and the adjustment of financial affairs, its proceedings were not of marked importance. On the 20th of January the House of Deputies approved a proposition of the Government for the redemption of from 20,000,000 to 22,000,000 florins out of the proceeds of the second half of the rent-loans, to make the beginning of a sinking-fund. On the 16th of February the House of Deputies adopted a measure recommended by the ministry to have a register of the services which had been rendered to the country by Francis Deak enrolled among the statutes, and approved of a plan for the erection of a monument to Deak by a national subscription.

The floods at the end of February and beginning of March were very destructive. The villages along the banks of the Danube and the Theiss were submerged, hundreds of houses were carried away or ruined, and immense quantities of property and crops were destroyed. The Ofen and Alt-Ofen quarters of Buda-Pesth were overflowed; a hundred manufacturing buildings in the river quarters of the city, were undermined; and 12,000 out of the 18,000 inhabitants of Alt-Ofen were reported to have been rendered homeless. On the 28th of February the Emperor devoted 15,000 gulden to the relief of the sufferers by the flood in Pesth and its vicinity, and the Empress added a gift of 10,000 gulden. The Emperor and Empress also bestowed 40,000 florins for the relief of the people throughout Hungary who had been visited by the inundations.

A remarkable speech was made in February by Bishop Herwarth to his electors in Pesth, in which among other things he declared himself in favor of the introduction of a law mak-

ing civil marriage obligatory, and referred to France and Belgium as countries in instance to show that the existence of such a law need not involve a breach with the Church.

The ninth International Statistical Congress met at Pesth, September 1st, and was opened by the Archduke Joseph.

HUNT, CHARLES SEDGWICK, died in New York, October 15th. He was born at Litchfield, Conn., April 7, 1842. In 1855 he entered the Naval Academy at Annapolis, where he remained for two years, and then became a student at Phillips Academy, Andover, Mass. At the outbreak of the war he entered the navy, and became acting master on the war-sloop Juniata, but resigned his commission toward the close of the war, and entered Harvard College, where he graduated in 1868. He then became a reporter on the *New York Tribune*. For a time he was financial editor of the *New York Standard*, and from 1871 to 1873 was Albany correspondent of the *Tribune*, in which capacity he rendered valuable service in exposing fraud. In 1878 he became an editorial writer on the *Tribune*, writing chiefly upon topics of finance and political economy. He was also associated with Mr. John F. Cleveland in the preparation of the "Tribune Almanac." Early in 1876 he joined the editorial staff of the *New York Times*, where he continued until his death. Mr. Hunt was a thorough and enthusiastic student of political economy, and many of his articles in the *Tribune* and in the *Times* attracted wide attention.

HUSSEIN-AVNI PASHA, a Turkish statesman and general, born in 1819; assassinated in Constantinople, June 16, 1876. In 1850 he went to Constantinople, where he studied law for some time; but, meeting by chance one of his townsmen, who was in the military school of Harbije-Mekteb, and as the military career at that time seemed to offer greater inducements to young Turks than that of the law, he was easily induced to change his career. He graduated from the military school in 1842, with the rank of captain on the general staff, and in 1850 became major. He distinguished himself in the war in the Crimea, in 1856 was the Turkish delegate to the commission to regulate the Persian frontier, and was soon after appointed Director of the Military School of Harbije-Mekteb, and at the same time chief of the general staff of the army. He took part in the war with Montenegro as commander of a division, and after his return was appointed President of the General War Department, a position ranking next to that of Minister of War, which position he

held for two years. His renown rapidly increased, and he particularly succeeded in gaining the confidence of the two most prominent statesmen at that time, Fuad Pasha and Aali Pasha. When Fuad Pasha was appointed Grand-Vizier, with the portfolio of War, he induced the Sultan to appoint Hussein-Avni Pasha to the position of commanding general of the army corps comprising the Guards, and at the same time his representative in the ministry of war. This position he held up to the fall of Fuad Pasha and Aali Pasha in 1866, when he was also compelled to retire. In the early part of 1867 he again came into favor, being appointed Governor-General of Bosnia, which position, however, he never assumed. The reason for this was that he was, immediately after receiving this appointment, intrusted with the chief command of the forces in Candia; and, as he was unable to produce any favorable results in that island, he was recalled in April, 1867, and was placed in command of an army corps on the frontier of Greece. But owing to dissensions between Omer Pasha, his successor, and Aali Pasha, the Grand-Vizier, who was his personal friend, the former resigned, and Hussein-Avni Pasha was again appointed to the chief command of the troops in Candia. With the aid of Aali Pasha he succeeded in quelling the rebellion, and in 1869 was rewarded for his services by the position of Minister of War. This position he held until the death of Aali Pasha in 1871, when he was removed by Mahmud-Nedim Pasha, the new Grand-Vizier, and was sent into exile, on a charge of misappropriation of public moneys. With the accession of Midhat Pasha on July 31, 1872, he was permitted to return, and when Eessad Pasha was Grand-Vizier he was first Minister of the Navy, and afterward of War. In February, 1874, he finally reached the goal of his ambition, and was appointed Grand-Vizier. His administration was not a successful one, and when in April, 1875, he was dismissed, it was with the displeasure of the Sultan; and, in order to have him out of the way, he was shortly after appointed Governor-General of Smyrna. This position he, however, resigned in May, and then made a tour of England and France. In August, 1875, he, together with Midhat Pasha and Mahmud-Nedim Pasha, all three bitter enemies of each other, was called upon to form a new cabinet, receiving the department of War, which position he retained up to his death. He was one of the principal actors in the eventful scenes that led to and accompanied the overthrow of Abdul-Aziz, whom he did not long survive.

I

IDAHO. The assessment-rolls of the different counties for 1876 were as follows:

COUNTIES.	Cash Value of Real and Personal Property.	Total Amount of Taxes.
Ada.....	\$1,275,608 00	\$28,701 18
Alturas.....	212,573 00	6,597 98
Bear Lake.....	165,021 00	3,300 43
Boisé.....	641,542 66	21,170 91
Idaho.....	345,920 30	7,956 16
Lemhi.....	195,865 00	4,407 68
Nez-Perce.....	298,888 00	8,068 03
Owyhee.....	692,824 50	22,500 54
Oneida.....	497,181 00	9,942 62
Shoshone.....	56,470 00	1,562 98
Territory.....	\$4,881,277 46	\$114,198 45

The receipts into the Territorial Treasury, from December 1, 1874, to October 31, 1876, were \$61,674.28; amount on hand, \$9,676.77; total resources, \$71,351.05; disbursements, \$55,496.30; balance, \$15,854.75. The bonded debt (coin) amounted to \$71,886.45; the unfunded debt (currency), consisting of unredeemed warrants and accrued interest, was \$56,606.82, after deducting cash in the Treasury. The Governor, in his message to the biennial session of the Legislature, December 4, 1876, says:

Being unable to meet our obligations at this time, it is due to our creditors, as well as to the people themselves, whose honor is involved, that at this session measures be taken which will afford sufficient time; and, what is more important still, provide the means of payment according to the new promises we make.

It is recommended that an act be passed, supplemental to that of January 8, 1875, providing for a new series of ten per cent. gold bonds, running fifteen years from December 1, 1876, with interest semi-annually, both payable at the Territorial Treasury. Let the principal of the coin debt, yet unprovided for, be merged in these bonds. Allow to creditors ten per cent. difference upon the principal of their old bonds, but none on accrued interest.

It is also worthy of consideration whether it is not sound economy to put the warrant debt into currency bonds having sufficient time to run to give us the advantage of growth in population and resources. Let this be done, and a sure income provided to pay as we go all our current expenses as well as interest. This will justify the repeal of the law under which we now pay ten per cent. interest on warrants which we sell at thirty per cent. discount.

The estimated revenue for the years 1877 and 1878 is as follows:

From property-tax.....	\$62,500
From license and poll tax.....	23,250
Total.....	\$85,750

The estimated expenditures are:

ITEMS.	Amounts.
Territorial prisoners.....	\$10,000
Interest on bonds.....	13,000
Salary of Controller.....	3,000
Salary of Treasurer.....	2,000
Printing blanks.....	2,000
Interest on prison-fund warrants.....	5,000
Interest on general-fund warrants.....	3,000
Salary of three district attorneys.....	9,000
Total.....	\$47,000

The whole number of children in the Territory, between the ages of five and eighteen years, so far as reported for 1875, was 3,852; for 1876 it is 2,777; some of the more populous counties not having reported.

In the former year, the number attending school was 2,093; receipts, including balances, \$23,734; expenditures, \$18,478.63. In 1876, 2,724 were reported as attending school; receipts, including balances, \$36,215.42; expenditures, \$16,590.55. Says the superintendent in his report: The reports of the county superintendents show, "for the most part, but a meagre array of figures, which by no means represent the flourishing condition of many schools in the Territory, and the deep interest taken in education by the people. This is not the fault of the county superintendents, but that of the system under which they are compelled to act. The law makes the county superintendencies *ex-officio* appendages to other important and responsible county offices, which confine the incumbent to his place of business and to a routine of duties; thus rendering the personal supervision of schools impossible. The county superintendent can only collate and report such information as he may receive from reports made to him by the trustees of the different school-districts in his county. The law gives to the trustees of the various school-districts the entire control and supervision of schools within their respective districts, as regards the qualifications of teachers and all local matters pertaining to education. The same reflections and remarks will apply with equal force to the Territorial Superintendent of Public Instruction. He cannot go beyond the source of information thus furnished, however much good-will he may bring to the task."

A large share of the wealth of Idaho lies beneath the soil. The surface has only been sufficiently worked to indicate the rich deposits yet awaiting development. Capital, skill, and machinery, are wanted. Owing to the great distance from railroads and navigable streams, the most enterprising have found almost unconquerable discouragement.

It was proposed to the Legislature to memorialize Congress to cause a thorough geological survey to be made, as has already been done in other Territories and States; and, as soon as resources will permit, to organize a Geological and Mining Bureau, for the purpose of developing the mines, forming a cabinet of ores, and of publishing useful knowledge in this most important department of industry.

Provision was made at the last session of the Legislature for a revision and publication of the Territorial laws under the supervision of commissioners.

IGLESIAS, José María, a Mexican statesman, born in Mexico, on January 5, 1822. Before completing his twentieth year he was appointed professor in the Colleges of San Gregorio and San Ildefonso, both in his native city. In the first he occupied the chair of Arts, and in the second that of Modern Languages—French and English. At the age of twenty-two he received his diploma as lawyer, and at twenty-four he became Professor of Law. His first official position was that of chairman of the Board of Aldermen (1846). On the occupation of the capital of the republic by the American troops, in 1847, young Iglesias hastened to rejoin the Government, for the time being established at Querétaro, for which proof of loyalty he was rewarded with the position of Minister of the Supreme Military Court, and shortly afterward with that of Auditor of the Army of the East. After the celebrated peace treaties he returned to the capital, and was chief of a section of the Board of Public Credit, from 1850 till 1852, in which latter year he was elected deputy to Congress, where he won his first laurels as an orator of distinction. The year 1855 saw him at the head of the second section of the Ministry of Finance, where his superior intelligence, brilliant qualities, and fidelity, elicited the admiration and secured for Iglesias the friendship of Don Miguel Lerdo de Tejada, elder brother of the late President of Mexico, Don Sebastian Lerdo de Tejada, and then minister of the department (1856). Under the Comonfort Administration Iglesias was intrusted with the portfolio of Justice (1857), and immediately after the termination of the War of Reform he was appointed administrator of the public fund. When on May 31, 1863, Juarez was constrained to quit the capital, Señor Iglesias followed the fortunes of his chieftain, and during the eventful peregrinations of the national Government he was successively Minister of Finance, of Justice, and of Public Works. In spite of unusually arduous official duties, he found time to devote to writing his monthly reviews published under the unassuming title of "The Foreign Intervention." On the return of the legitimate Government to Mexico, Iglesias was still a member of the cabinet, having been, for the third time, appointed to the portfolio of Finance, which he now retained until his election to the general Congress in 1868. In September of that year President Juarez made him Minister of the Interior, intrusting him provisionally with the portfolio of Justice, which last post he resigned in October, 1870. In 1872 he once more became administrator of public funds, and held that office until May 16th of the following year, on which day he took the accustomed oath preparatory to entering upon the high functions of President of the Supreme Court of Justice—a post equivalent to that of Vice-President of the Republic. Among the candidates proposed simultaneously with Señor Iglesias for the office was General Porfirio Diaz, over whom he obtained a ma-

ajority of 4,410 votes. Señor Iglesias has ever been a faithful and close student; he has attained much eminence among the men of letters and journalists of his country, and his unaffected and forcible eloquence places him in the front rank of Mexican parliamentary speakers. His whole political career has been an almost uninterrupted series of successes.

ILLINOIS. The State of Illinois is one of the most flourishing and progressive in the Union. In the last two years there have been incorporated under the general law 513 companies for purposes of pecuniary profit, and 150 for educational, religious, literary, and benevolent purposes. There have also been 34 new railroad organizations formed under the railroad act; eleven cities and sixty-one villages have organized under the general law for that purpose. The name of the town of Milton in Coles County has been changed to Humboldt, New Rutland in La Salle County to Rutland, and Clintonville in Kane County to South Elgin. The financial condition of the State is especially gratifying. On October 1st the bonded debt was \$1,480,600.27, and there had been a reduction of \$250,371.88 during the year. The last of the State bonds became payable after 1879. On December 1, 1874, there was a balance of \$2,126,532.06 in the Treasury, and the receipts from that time to September 30, 1876, amounted to \$9,262,169.99, making a total of \$11,388,702.05. The disbursements for the same period were \$8,979,747.71, leaving a balance on hand of \$2,408,954.34. The receipts from the canals for two years were \$267,928.32; disbursements, \$171,189.74: net receipts, \$96,638.58. The lock and dam across the Illinois River near Copperas Creek are nearly completed. The total cost is \$410,532.29, of which \$62,329.80 has been expended by the United States Government.

The amount of money raised for school purposes was \$9,605,623.90 in 1875, and \$9,948,769.64 in 1876, making a total of \$19,554,393.54 for two years, of which \$13,977,901.85 was raised by direct taxation. The expenditures for school purposes were \$8,066,949.97 in 1875, and \$8,268,539.58 in 1876, or \$16,335,489.55 for the two years. The number of children of school age in the State is 973,589, of whom 687,446, or about 75 per cent., were enrolled in the schools during the past year. There are twelve charitable and reformatory institutions which receive aid from the State, and all are reported to be in a satisfactory condition. The new asylum for feeble-minded children at Lincoln is nearly finished, as is also the new wing of the Southern Insane Asylum at Anna. The penitentiary at Joliet contained over 1,600 convicts at the end of the year. The institution is overcrowded, and a new prison is in contemplation. The cost of maintenance for each convict at Joliet in 1876 was 40½ cents per day.

The new Capitol at Springfield, though not fully completed, has been occupied by the va-

rious departments of the government. The total amount expended upon it is \$3,432,216.68, and a new appropriation will be required to finish it.

The militia of the State has been greatly increased during the year, and now consists of 5,145 men, constituting one brigade of seven regiments, three battalions, and eight detached companies, or 85 companies in all. These organizations are altogether voluntary and independent.

The crop reports of the year show that there were 8,935,686 acres of corn, with a prospective yield of 251,066,311 bushels. The estimated area of hay-meadow was 2,518,750 acres, yielding 3,895,974 tons, of an aggregate value of \$24,449,057. The total value of hogs, on May 1st, was \$8,934,647.

The political canvass of the year was opened

by the Independent or Greenback party, which held a convention at Decatur in February, and nominated Lewis Stewart, of Kendall County, for Governor. It also appointed delegates to the National Convention of the party, and put in nomination candidates for presidential electors.

The Republican State Convention was held at Springfield, on May 24th. It appointed delegates to the National Convention at Cincinnati, nominated candidates for presidential electors, adopted a platform, and put a State ticket into the field. The following were the nominations for State officers: For Governor, Shelby M. Cullom, of Sangamon County; for Lieutenant-Governor, Andrew Shuman, of Cook; for Secretary of State, George H. Harlow, of Tazewell; for Auditor of Public Accounts, Thomas B. Needles, of Washington;

CHICAGO BEFORE THE FIRE.

for State Treasurer, Edward Rutz, of St. Clair; for Attorney-General, James K. Edsall, of Lee.

The platform adopted was as follows:

The Republican party of the State of Illinois, through its delegated representatives assembled in this, the one hundredth year of the existence of the republic, proclaims the following as the foundation principles of its faith and practice:

1. That the doctrine of the inherent sovereignty of man leads to a republican form of government, as that form furnishing the surest guarantee of impartial protection to property, liberty, and life; that our fathers having affirmed the equality of rights of all men, regardless of condition or nationality, and that affirmation having been, after the lapse of nearly a century, embodied as a part of the Constitution of the United States, it should be enforced by whatever statutory or executive instrumentality may be necessary to insure its vitality.

2. That the policy of leniency by the Republican party toward the people recently in rebellion against Federal authority having resulted in the death by

violence of at least 5,000 Unionists, white and black, since the commencement of the present policy of reconstruction; also, in placing in power in the Lower House of Congress a political party dominated by ex-Confederates; and finally in relegating back into the control of disloyal whites nearly every State reconquered to Federal authority by Federal arms—it is the duty of the Executive branch of the Government to extend especial care over Union men throughout all the South, so that American citizenship there shall be in name, at least, what it is not now in fact—as secure as it is in foreign lands and upon foreign seas.

3. That as the three amendments to the Constitution of the United States—which may be accepted as the crystallization of the blood of brave men—require Federal statutes for their enforcement, so, too, in their turn, Federal statutes require a Chief Executive whose public life is a guarantee of the alacrity and fidelity with which he will discharge these great public trusts.

4. That the credit of the General Government, under Republican administration, having appreci-

ated to a point when the present rates of interest upon United States optional bonds are no longer necessary, therefore laws should be passed authorizing the speedy funding of such securities into longer-time bonds, bearing lower rates of interest.

5. That it is the duty of the Government of the United States to redeem every promise it has made in absolute good faith, and we therefore look with confidence to the National Republican Convention to so solve the difficult problem of the currency that the credit of the nation shall remain untarnished, and just regard be maintained for the rights and interests of all the people, East as well as West, North as well as South; that it is hereby further declared that the Republican party has given to the people the best system of paper currency ever devised, and would deprecate any legislation that might by any possibility cause a return to the system of paper currency in existence before the war.

6. That the efforts of President Grant to purify the public service by a rigid enforcement of the internal revenue and customs laws, even to the extent of punishment of prominent members of his own political party, furnish an example of Executive efficiency and impartiality for which a parallel may be sought in vain throughout the records of the Democratic party; and while it has been the aim of his administration that no innocent man should be convicted, yet it has been his special order, "Let no guilty man escape."

7. That the Republican party remembers with gratitude the services of those soldiers and sailors who upheld the cause of the Union during the late war of the rebellion, and we therefore most indignantly condemn the policy of the Democratic party in the national House of Representatives in its removal of Union soldiers from positions of honor and trust, and the appointment of rebel soldiers in their stead.

8. That as the results of the elections to be held the present year for the choice of Representatives and Senators in Congress, and President and Vice-President of the United States, will determine practically the question of the continued preservation or possible overthrow of constitutional liberty, the Republican masses of Illinois are most earnestly requested to show by their works the same devotion to this great cause which they exhibited in 1860 and 1864, when Abraham Lincoln was their national leader, to the end that the broad shield of the Government of the United States may be continued everywhere, over the humblest as well as over the most exalted of its citizens, and that the life and the death of their martyr President shall not have been in vain.

The Democrats held a convention at Springfield, on the 22d of June, to appoint delegates to the National Convention of the party, but the regular nominating body gathered in the same city, on the 27th of July. The ticket for State officers was: For Governor, Lewis Stewart, of Kendall County; Lieutenant-Governor, A. A. Glenn, of Brown; for Secretary of State, F. Y. Thornton, of Fulton; for Auditor, John Hise, of Cook; for Treasurer, George Gundlach, of Clinton; for Attorney-General, Edward Lynch, of Lincoln. The platform was as follows:

Resolved by the Democracy of Illinois in convention assembled. That the members of the National Democratic Convention at St. Louis deserve the plaudits of the whole country for the manner in which they discharged the duties devolved upon them, and we hail the result of their action in the platform of principles adopted, and the presentation of the names of those eminent statesmen, Samuel J. Tilden, of New York, and Thomas A.

Hendricks, of Indiana, for the suffrages of the people, as opening up a new and better era in American politics, and giving our people an opportunity, by the election of these great men to the offices for which they are presented, of restoring prosperity once more to the oppressed business interests of the land; of redeeming the country from the disgrace and infamy of the peculations, robberies, and malfeasances that have tended to disgrace and humble us in the estimation of civilized nations, and have reduced the industrial classes of our country to the verge of poverty.

Resolved. That we hereby adopt, indorse, and reaffirm the National Democratic platform adopted at St. Louis, on the 28th day of June last, and we pledge the Democracy of Illinois to cooperate with their brethren of the whole country in their efforts for the election of the national ticket, and for the restoration of honesty and economy in the administration of our Government.

Resolved. That the Democratic party, in presenting candidates for State officers, do pledge our earnest and hearty support of each and every nominee of this convention, and hereby declare that we will use our utmost efforts to secure the success of the ticket.

Resolved. That the Democracy of Illinois call upon the Legislature to devise some plan by which the labor allotted to convicts as a punishment for crime, and performed by them under compulsion, shall not come in injurious competition with the free labor of those who have themselves and families to support and educate, as becomes free and enlightened citizens.

The last resolution constituted a minority report from the Committee on Resolutions, but was adopted by the convention. The candidates for Governor and Auditor were those of the Independent party, and the effect was virtually to merge that organization into the Democratic party.

The election took place on the 7th of November. The returns were officially canvassed on the 27th of the same month, the Secretary of State, Auditor, Treasurer, and Attorney-General, constituting the canvassing board, and the result was announced by proclamation of the Governor. It showed that the total number of votes cast for presidential electors was 552,937, of which 277,226 were for the Hayes and Wheeler ticket, 258,602 for the Tilden and Hendricks, and 17,109 for the Cooper and Cary, making the Republican plurality 18,624, and majority over all 1,515. The total vote for Governor was 551,702, of which Cullom had 279,266, and Stewart 272,436; majority for the former, 6,830. For Lieutenant-Governor there were three candidates, and the Republican received 278,168 votes, the Democratic 256,084, and the Greenback 17,783. Of the 19 members of Congress elected 12 were Republicans and 7 Democrats. The Legislature chosen at the same time has 24 Democrats, 22 Republicans, and 5 Independents in the Senate, and 79 Republicans and 74 Democrats in the House. This makes the total Republican strength 101, Democratic 98, and Independent 5, giving the latter the balance of power on a joint ballot. As the Legislature had the task of electing a United States Senator, this became a matter of no little importance in the session of 1877.

The State Central Committee of the Democratic party held a meeting on the 21st of December, and adopted the following resolutions:

Resolved, That the committee do hereby affirm the constitutional right of the Senate and the House of Representatives (after the President of the Senate shall have opened all the certificates received by him) to count the electoral vote for President and Vice-President of the United States, and declare the result of such count.

Resolved, That we deny the existence of any constitutional right or power in the President of the Senate of the United States, independently of authority from the two Houses, to count said votes and declare the result thereof, and would regard such a proceeding as revolutionary.

Resolved, That we have entire confidence in the intelligence and patriotism of Congress and of the people, and that in this great emergency they will rise above party, maintain the right, sustain constitutional liberty, and that Congress will fairly and impartially determine the result of the late presidential election in such manner as will command the confidence and support of all good citizens.

Resolved, That a mass-meeting be held in each county in this State, on the 30th day of December next, of all citizens irrespective of party, who are in favor of perpetuating the republican feature in our system of government by giving effect to the popular choice of electors of President and Vice-President, made on the 7th of November last, for the selection of delegates to a convention to be held at Springfield on the 8th of January next—each county to be entitled to the same number of delegates as were sent to the State Democratic Convention of July last.

Resolved, That this committee have an abiding confidence that the mass-meetings herein recommended will be participated in by all friends of free government, and that their proceedings will be in harmony with the gravity of the occasion.

At the convention of January 8, 1877, the following resolutions were adopted:

Resolved by the citizens of Illinois in convention assembled, on the 8th day of January, 1877, That a count of the votes for President and Vice-President by the President of the Senate, without the concurrence and direction of both Houses of Congress, would be contrary to usage, revolutionary in character, and dangerous to the rights of the people.

Resolved, That in the absence of any statute, rule, or order, regulating the counting of the electoral vote, the two Houses of Congress have the right, under the Constitution, to count the votes of electors, to decide all questions arising thereon, and declare the result; and that no vote should be received and counted for President or Vice-President without the concurrence of both Houses of Congress, and in the performance of this duty each House is vested with the authority to inquire into the qualifications of electors and the manner of their appointment. This has been the construction of the provisions of the Constitution respecting the subject, as shown by an unbroken usage from the first election of President to the present time, and by the adoption by both Houses of Congress *unanimously* of the rule known as the "twenty-second joint rule" in February, 1865, under which the electoral votes were counted by Congress in 1865, in 1869, and in 1873, which rule was acquiesced in and maintained, so long as both Houses of Congress were controlled by the same political party.

Resolved, That it is the duty of the Senate and House of Representatives to resort to all parliamentary means to secure a fair and honest count of the electoral vote, and that the people will hold

Senators and Representatives responsible for the consequences which may follow a failure of the two Houses to agree upon a mode for making such count.

Resolved, That while we have no doubt that Samuel J. Tilden and Thomas A. Hendricks are fairly entitled to a majority of the electoral votes for President and Vice-President, we at the same time believe it to be our duty, and are willing, to submit the question as to who have been fairly and constitutionally elected to the decision of the Senate and House of Representatives, to whom it constitutionally belongs; and we demand of them, as we believe, do a vast majority of the people of all parties, that they come to some agreement for an honest and fair count of the electoral vote, pledging ourselves to abide by the result, whatever it may be.

Resolved, That it is a well-settled principle of law that when an official duty is to be performed upon the happening of a certain contingency, and no mode has been provided for deciding when the event has occurred, those who are required to perform the duty are the sole judges as to when the contingency arises; and, in accordance with this principle, we declare that it properly devolves upon each House of Congress to decide for itself when the contingency shall arise that requires its separate action under the Constitution, in the election of President by the House of Representatives, and a Vice-President by the Senate.

Resolved, That in case the two Houses, after exhausting all parliamentary means, are unable to agree upon such a count of the votes cast for President and Vice-President, as will secure to any person a majority of the whole number of the electors appointed, it will then become the duty of the House of Representatives immediately to choose a President, and of the Senate a Vice-President, as provided by the Constitution; and if the House of Representatives shall choose a President, or the Senate a Vice-President, according to the provisions of the Constitution, then such constitutional action must be sustained, and all forcible opposition thereto be proceeded against as treason and revolution.

Resolved, That the concerted assertion by the leading Republican newspapers on the morning after the election, that South Carolina, Florida, and Louisiana "had gone for Hayes," before any definite information could possibly have been received from those States, followed by the orders to the army of the United States to see that "Boards of Canvassers are unmolested in the performance of their duties," issued before the Canvassing Boards had assembled, and without any reason to suppose that such boards would be molested in an honest discharge of duty, together with the knowledge that the result of the presidential election, as declared by the people at the polls, could be changed by falsely counting the votes of South Carolina, Florida, and Louisiana for Hayes, and that the Returning Board of Louisiana, composed of the same persons as now, had arbitrarily, unfairly, and illegally changed the result of a former election, could only have been intended as an assurance to the canvassing officers in those States in advance that they would be sustained in any canvass they might make, however iniquitous, and especially to the canvassing officers of Louisiana, that they would be sustained in repeating the arbitrary and illegal action by which they had continued themselves and their party in power two years before; that the subsequent action of the canvassing officers in two of the States mentioned, in open disregard of the highest judicial tribunals in their respective States, and the action of the Louisiana Returning Board, by which a majority of eight thousand votes for Samuel J. Tilden was fraudulently and illegally changed into a majority of nearly four thousand for Rutherford B. Hayes, in connection with Judge Bond's usurpation in overriding the State courts, the action of the army

in setting up an illegal Legislature in South Carolina, the concentration of troops and munitions of war at convenient points elsewhere, and threats in the partisan press that members of the House of Representatives will be arrested and imprisoned if the House exercises its constitutional prerogatives in regard to the count of the electoral votes, establish the existence of a conspiracy by force and fraud to proclaim and inaugurate a President and Vice-President of the United States contrary to the constitutionally expressed will of the American people.

Resolved, That it is the duty of the House of Representatives, the grand inquest of the nation, to inquire into said conspiracy, and if officers of the Government have been engaged in the conspiracy, and have committed overt acts in furtherance of the plot, by the illegal use of the army, or otherwise, to take immediate action to defeat the conspiracy, and to bring the conspirators to trial at the bar of the Senate.

Resolved, That the president of this convention send a copy of these resolutions to the President of the Senate and the Speaker of the House of Representatives of the United States, with a request that each lay the same before the bodies over which they respectively preside.

In his inaugural address to the Legislature of 1877, Governor Cullom used the following language in reference to the same subject as that considered by the Democratic convention:

Eleven years have passed since that struggle ended. Just at the time when all hoped and believed that the era of good-will and prosperity had come with the beginning of our new national century, a presidential election occurred which has left the country in an excited condition, owing to the unprecedented closeness of the electoral vote, and the discussion of questions arising from the unfortunate omission of the national Constitution and the laws to provide with particularity the manner of counting the returns contained in the certificates of the electoral colleges. The contest must now be settled by the light of the Constitution. It must be settled according to the Constitution. It must be settled by reason, and not by violence. The people of the nation must listen to the voice of history, so fresh in all our memories, and stamp with prompt and positive condemnation any movement—if any shall be made—looking to an appeal from a constitutional decision of the contest, by those in whose hands it is placed, to force, involving the American people in another war. One attempt has been made to destroy this country and dissolve the Union by a portion of the people when they were dissatisfied with the result as declared at the polls. That struggle cost the country ten thousand million dollars in property and labor, and a million men in battle, a fearful price for refusal to abide the decision of the ballot.

As citizens of the State of Illinois, we claim the right to hold our elections in our own way; giving all our people a fair and equal chance to cast their votes. We claim the right to prescribe the manner in which our polls shall be purged of fraudulent votes, and how and by whom the result of our elections shall be ascertained and announced. All these things we regulate by the laws made by our State Legislature, and when the result is so ascertained and announced we expect it to be respected, as well by our own citizens as by others. While we claim these rights for our own State, we concede the same to every other State in the Union; and insist that when the people of any State have held an election, and the result has been ascertained and announced by the persons and in the manner provided by the laws of such State, that result shall be respected everywhere as the will of the people of that State.

The people, without regard to party, owe it to themselves and the country to purify the ballot-box, and protect it from fraud; the people owe it to themselves, in the interest of good government, to favor all lawful means, the object of which is to secure a free and honest ballot and the protection of the citizen in his right to cast it. Fraudulent voting is worse than no voting, and, unless a man is allowed to vote his sentiments, his vote is a falsehood and a fraud.

As a citizen, I confidently believe that the two distinguished statesmen for whom the electoral vote of Illinois was cast for President and Vice-President have received a constitutional majority of the electoral colleges. I have an equal confidence and certainty that when the votes shall have been counted in the presence of the two Houses of Congress, and the result announced in accordance with the Constitution and the usage under it, whatever that result may be, it will be accepted and cheerfully acquiesced in by the people.

Hon. Shelby M. Cullom, the present Governor of Illinois, was born in Wayne County, Ky., November 22, 1829. The following year his father removed to Tazewell County, Ill. Young Cullom worked on a farm, and attended a district-school during his early years, and at the age of nineteen went to the Rook River Seminary, at Mount Morris. After two years' study his health failed, and he returned to the farm, but he subsequently studied law at Springfield, and was admitted to the bar in 1854, being almost immediately after elected city attorney. In 1856 he was candidate for elector on the Fillmore ticket, and at the same time ran for the Legislature, and was elected. He was chosen again in 1860, and became Speaker of the House. In 1864 he was elected to Congress from the Springfield district, and served for three successive terms. As a member of Congress he displayed not only energy and tact, but considerable ability as a speaker. In the Fortieth Congress he was chairman of the Committee on Territories, and took a prominent part in support of the bill for the suppression of polygamy in Utah. Since 1870 he has devoted himself chiefly to private business and his duties as President of the State National Bank at Springfield, but consented both in 1872 and 1874 to be elected to the Legislature of the State. He was Speaker of the House during the session of 1873.

A decision of the Supreme Court of the United States, rendered at Washington in April, reversed the decrees of the Circuit Court in Northern Illinois in several cases in which an injunction had been granted against the collection of taxes by counties under the law of 1872 for the taxation of railroads. The validity of the law was sustained, and the cases sent back to the Circuit Court with directions to dissolve the injunctions. The opinion of the court was delivered by Mr. Justice Miller, and established the following points:

1. While this court does not lay down any absolute rule limiting the powers of a court of equity in restraining the collection of taxes, it declares that it is essential that every case be brought within some of the recognized rules of equity jurisdiction, and

that neither illegality nor irregularity in the proceedings, nor error nor excess in the valuation, nor the hardship nor injustice of the law, provided it be constitutional, nor any grievance which can be remedied by a suit at law, either before or after payment of the tax, will authorize an injunction against its collection.

2. This rule is founded on the principle that the levy of taxes is a legislative and not a judicial function, and the court can neither make nor cause to be made a new assessment if the one complained of be erroneous, and also in the necessity that the taxes, without which the State cannot exist, should be regularly and promptly paid into its Treasury.

3. *Quære*: Whether the same rigid rule against equitable relief would apply to taxes levied solely by municipal corporations for corporation purposes as that here applied to State taxes? Probably not.

4. No injunction, preliminary or final, can be granted to stay collection of taxes until it is shown that all the taxes conceded to be due, or which the court can see ought to be paid, or which can be shown to be due by affidavits, have been paid or tendered without demanding a receipt in full.

5. While the constitution of Illinois requires taxation in general to be uniform and equal, it declares in express terms that a large class of persons engaged in special pursuits, among whom are persons or corporations owning franchises and privileges, may be taxed, as the Legislature shall determine, by a general law, uniform as to the class upon which it operates, and under this provision a statute is not unconstitutional which prescribes a different rule of taxation for railroad companies from that for individuals.

6. Nor does it violate any provision of the Constitution of the United States.

7. The capital stock, franchises, and all the real and personal property of corporations, are justly liable to taxation; and a rule which ascertains the value of all this, by ascertaining the cash value of the funded debt and of the shares of the capital stock as the basis of assessment, is probably as fair as any other.

8. Deducting from this the assessed value of all the tangible real and personal property, which is also taxed, leaves the real value of the capital stock and franchise subject to taxation as justly as any other mode, all modes being more or less imperfect.

9. It is neither in conflict with the constitution of Illinois nor unequitable that the entire taxable property of the railroad company should be ascertained by the State Board of Equalization, and that the State, county, and city taxes should be collected within each municipality on this assessment in the proportion which the length of the road within such municipality bears to the whole length of the road within the State.

10. The action of the Board of Equalization in increasing the assessed value of the property of a railroad company, or an individual, above the return made to the board, does not require a notice to the party to make it valid, and the courts cannot substitute their judgment as to such valuation for that of the board.

11. The Supreme Court of the State of Illinois having decided that the law complained of in these cases is valid under her constitution, and having construed the statute, this court adopts the decision of that court as a rule to be followed in the Federal courts.

In concluding his opinion, the justice said:

But, if for no other reason, we should reverse the decrees of the Circuit Court in these cases because the same questions, involving the same considerations urged upon us here, have been decided by the Supreme Court of the State of Illinois in a manner which leads to the reversal of these. The cases referred to are those of Samuel E. Porter, County

Treasurer, and John W. Cook, County Clerk, *vs.* Rockford, Rock Island & St. Louis Railroad Company, decided at the January term, 1874, and the subsequent case of the Chicago, Burlington & Quincy Railroad Company *vs.* J. J. Cole and another, decided in June, 1876. In these two cases all the points arising in the present cases were presented to the court and decided adversely to the railroad companies. These questions all grew out of the validity and the construction of the tax law involved in the present cases, and out of the same action of the Board of Equalization. The validity of the statute is not seriously questioned here on account of any conflict with the Constitution of the United States. If any such claim be set up it is sufficient to say it is without foundation. As the whole matter, then, concerns the validity of a State law as affected by the constitution of the State, that question, and the other one of the true construction of that statute, belong to the class of questions in regard to which this court still holds, with some few exceptions, that the decisions of the State courts are to be accepted as the rule of decision for the Federal courts. It is, nevertheless, a satisfaction that our judgment concurs with that of the State court, and leads us to the same conclusions.

In a case brought against the Toledo, Wabash & Western Railroad Company in the Mason Circuit Court a decision was rendered in May, establishing the point that a railroad company could not show the cost of constructing and operating its road by way of sustaining, as just and reasonable, rates of charges which would afford a fair profit upon the investment.

INDIA, a British viceroyalty in Asia. Viceroy and Governor-General of Bengal, Lord Lytton, appointed in 1876; commander-in-chief of the army, Sir Frederick P. Haines. The Executive and Legislative Council is composed as follows: the Viceroy, the commander-in-chief, Major-General Sir H. W. Norman, A. Hobhouse, E. C. Bayley, Sir William Muir, Sir Andrew Clarke, and Sir Alexander J. Arbuthnot. The lieutenant-governors of the provinces are honorary members of the Council, when it meets in their respective provinces. Government Secretaries: For the Interior, A. C. Lyall; for the Finances, R. B. Chapman; for Agriculture and Commerce, A. O. Hume; for Foreign Affairs, C. V. Aitchison; for Military Affairs, Colonel H. K. Burne; for Public Works, Colonel C. H. Dickens. The lieutenant-governors and chief commissioners of the different provinces are as follows: Bengal, Lieutenant-Governor, Sir R. Temple; Northwestern Provinces, Sir I. Strachey; Punjab, Lieutenant-Governor, R. H. Davies; Central Provinces, Chief Commissioner, E. H. Morris; Oude, Chief Commissioner, Sir G. T. V. Couper, Bt.; British Burmah, Chief Commissioner, A. Rivers Thompson; Madras, Governor-General, Duke of Buckingham and Chandos; Bombay, Governor-General, Sir P. T. Vodehouse.

The results of the great Indian census, extending over a term of years from 1867 in Berar to 1871-'72 in almost all the other provinces, were published in the latter part of 1875. Each province took its own census, and sent the reports to the General Government, by whom the returns were revised and corrected.

This caused the statements of the central Government to differ considerably from those of the various others. Behm and Wagner, in *Bevölkerung der Erde*, iv. (Gotha, 1876), have sought to reconcile the different statements, and in some cases have substituted their own figures. In this work they were assisted by a large number of official and non-official works, all of them very valuable. These sources are—

1. "Annual Statements exhibiting the Moral and Material Progress and Condition of India."
2. "A List of the Civil Divisions of India."
3. "A Map of the Civil Divisions of India."
4. "Report on the Census of Bengal."
5. "Census of the Northwest Provinces."
6. "Central Provinces Census."
7. "Report on the Cen-

sus of British Burmah, taken in August, 1872." 8. "Report on the Mysore General Census of 1871." 9. "Report on the Coorg General Census of 1871." 10. "Report on the Census of the Madras Presidency, 1871." 11. "Census of the Bombay Presidency." 12. "Preliminary Map of the Bombay Presidency." 13. "Memorandum on the Census of British India of 1871-'72." 14. A large number of manuscripts from the India Office. 15. "India, Native States." 16. "The Jummoo and Kashmir Territories," by Fred Drew; not official. 17. "Gradation List of Chiefs of the Indian Empire," in supplement to *Allen's Indian Mail*, July 4, 1876. The following table is taken from *Bevölkerung der Erde*:

PROVINCES.	Square Miles.	Population.
I. BENGAL PRESIDENCY:		
1. Lower Bengal—		
Under British administration (1871-'72).....	158,595	60,595,524
Feudatory states (estimate).....	28,274	2,218,296
2. Assam.....	58,356	4,282,019
3. Northwestern Provinces—		
Under British administration (1872).....	81,408	30,781,204
Feudatory states (estimate).....	5,125	657,018
4. Oude (1869).....	23,992	11,220,233
5. Punjab—		
Under British administration (1868).....	101,829	17,611,498
Feudatory states (estimate).....	103,528	5,244,000
6. Central Provinces—		
Under British administration (1872).....	84,968	8,201,519
Feudatory states (1872).....	28,584	1,049,710
7. British Burmah (1872).....	88,556	2,747,148
8. Ajmeer (1872).....	2,661	816,082
9. Berar (1867).....	17,884	2,281,565
10. Mysore (1871).....	27,077	5,055,412
11. Coorg (1871).....	2,000	168,812
II. MADRAS PRESIDENCY:		
Under British administration (1871).....	123,818	31,231,177
Feudatory states (estimate).....	9,471	8,226,427
III. BOMBAY PRESIDENCY:		
Under British administration (1872).....	124,462	16,849,206
Feudatory states (1872).....	69,250	6,840,000
STATES UNDER NATIVE PRINCES, WHO ARE ASSISTED BY BRITISH POLITICAL AGENTS:		
1. Rajpootana Agency.....	130,000	9,260,000
2. Central India Agency.....	64,850	8,362,000
3. Hyderabad, under the Nizam, assisted by a British resident.....	90,000	9,000,000
4. Manipoor, east of Assam.....	7,600	126,000
Total { Under British administration.....	905,046	190,540,548
{ Feudatory states.....	556,982	48,068,500
Total, British India.....	1,462,028	238,609,048

For the area and population of the native states there are three different statements, that of the "Memorandum on the Census," that of a work entitled "India, Native States;

Approximate Area and Population" (1876), and that of Behm and Wagner. The three statements are compared in the following table:

NATIVE STATES IN	MEMORANDUM.		INDIA, NATIVE STATES.		BEHM AND WAGNER.	
	Area.	Population.	Area.	Population.	Area.	Population.
Bengal.....	89,321	2,212,909	88,900	2,211,000	88,324	2,218,296
Northwest Provinces.....	5,445	907,018	6,300	1,106,000	5,125	657,018
Punjab.....	114,358	5,299,448	115,800	5,568,000	103,528	5,849,000
Central Provinces.....	28,584	1,049,710	28,584	1,049,710	28,584	1,049,710
Madras.....	9,810	2,027,048	23,800	4,760,000	9,471	8,226,427
Bombay.....	68,258	9,298,612	72,200	8,829,000	69,250	6,840,000
Rajpootana.....	118,947	8,981,583	123,000	9,260,000	130,000	9,260,000
Central India.....	81,140	7,699,502	88,750	8,400,000	74,850	8,362,000
Hyderabad.....	78,000	10,666,080	60,000	9,000,000	90,000	9,000,000
Manipoor.....	7,584	126,000	7,600	126,000	7,600	126,000
Total.....	546,695	48,376,910	569,184	50,408,710	556,982	48,068,446

The following table gives the area and population of the provinces by divisions and dis-

tricts, according to the "Memorandum of the Census."

DIVISIONS AND DISTRICTS.	Sq. Miles.	Population.	DIVISIONS AND DISTRICTS.	Sq. Miles.	Population.
I. LOWER BENGAL:			VII. BRITISH BURMAH:		
<i>Divisions.</i>			<i>Divisions.</i>

The Prince of Wales continued his journey through India during the first part of the year, returning home in March. On New-Year's-day he held a grand chapter of the Order of the Star of India, at which a large number of native princes were present. The general arrangements were similar to those when the Duke of Edinburgh held the first grand chapter. A vast inclosure of canvas was prepared, running southeast and northwest on an open plain about a mile from Government House. The rajahs' tents were ranged on the longest side of a parallelogram opening on the inclosure at one end, on the Maidan on the other. At the northeastern extremity of the inclosure was a dais, with silver pillars and a canopy of blue silk and satin, the color of the order. On the dais were two chairs. The one for the Viceroy was of silver and blue, with a crown behind, and golden lions at the side. The foot-

stool was the same, with golden lions. On the right of the Viceroy was a similar chair with the Prince of Wales's plumes at the back and silver arms, with a footstool of blue and silver. Before the dais was a scarlet carpet and a cloth-of-gold tent, carpeted with scarlet and the royal arms in the centre. Behind the dais and on each side rows of seats were arranged. The front rows were for members of the order. Behind were eight compartments for native chiefs, European ladies and gentlemen. Outside the chapter-tent, which is used by the Viceroy for durbars, were seats rising in tiers. At the approach to the grand entrance were lines of marines and sailors. On the left, looking toward the tent, were drawn up infantry in light order as a guard of honor. A large flag-staff with the Union Jack stood in front, where a military band was placed. The prince then continued on his journey, arriving at

BANIAN TREE.

Bankipoor on the 4th, at Lucknow on the 5th, at Cawnpoor on the 10th, and at Delhi on the 11th, being everywhere received with great enthusiasm. At Delhi the prince reviewed the troops stationed there, attended by the Rajahs of Scindia and Bhurtpoor. On January 20th he arrived at Lahore, and was received at the station by the Lieutenant-Governor, the judges, and other high officials. On the plateau facing the fort were a number a feudatory chiefs mounted on elephants, and attended by their sirdars, retainues, and followers, forming a most picturesque spectacle. Among the chiefs present were the Rajahs Kuper, Tulla, Nabha, Mandi, Faridkote, Chamba, Luket, Kalsia, and the Nawabs of Bahwalpoor, Malerkatta, Patondi, Lonara, and Dupina. From Lahore the prince went on to Djumma, the capital of Cashmere. The maharajah had ridden out

to meet him outside the city, and in the evening of the 20th the procession arrived in the capital. In the streets the troops of the maharajah were drawn up in lines, presenting a magnificent appearance in their new uniforms. A large camp had been placed at the disposal of the prince, near the new palace which had been built expressly for him, and which had cost £500,000. On the 22d the prince took part in a chase, and in the evening was the guest of the maharajah in his own palace. After supper he received the valuable presents of the maharajah, consisting of magnificent shawls expressly made for him, and valuable jewels. On the 28th the prince was in Agra, this being the ninth and most important day of the Muharram, the Mohammedan New-Year's festival, lasting ten days. On this day the subordinate princes generally appeared before the

rajah, bringing with them their contingent of troops, and their part of the tribute. On this occasion the ceremonies were changed into a reception of the Prince of Wales, the native princes tendering him their tributes in person. The parade took place in the afternoon, and was an imposing spectacle, every prince leading his own troops, and then taking his place at the side of the Prince of Wales.

On February 1st the prince arrived at Gwalior. He was met by the Maharajah of Scindia several miles from the city, who accompanied him to the palace, the route of which was lined by 14,000 of the maharajah's picked troops. At the review held by the Prince of Wales on Tuesday, about 8,000 men of Scindia's forces of all arms were present. They all presented an admirable appearance. The march past was followed by an excellent sham fight, in which the maharajah directed the operations personally, the prince and the military officers of his suite acting informally as umpires. The prince arrived at Bumbussa on February 19th, and was met a few miles from the place by Sir Jung Bahadoor and suite and the British resident in Nepal, all having crossed the river Sarda into British territory the previous day. The prince on reaching his camp received the visit of Sir Jung Bahadoor, who came in state, wearing magnificent jewels and attended by a brilliant suite, bringing with him a letter from the Maharajah Dhirajh of Nepal. His royal Highness afterward returned the visit, and was received with due ceremony. A picked force of Nepaulese infantry, cavalry, and artillery, was drawn up and paid the prince the usual military honors. Presents were exchanged, Sir Jung Bahadoor presenting the prince, among other things, with a fine collection of living wild beasts and birds. The prince, on leaving Sir Jung Bahadoor's tent, inspected the Nepaulese force, and complimented Sir Jung on their appearance. Sir Jung Bahadoor returned into Nepal in the evening, and the prince shortly afterward also crossed into Nepaulese territory. Sir Jung Bahadoor welcomed the prince, and expressed the pleasure it gave his master and himself to see him in Nepal. Everything would be done to render his royal Highness's visit an agreeable one, and to gratify his every wish. The speaker said, in conclusion, that he had never forgotten the visit which he paid to England in 1850, and the reception extended to him by Queen Victoria and the late prince consort. It was his intention to visit England last year, but an accident prevented him, and he hoped to be able to repeat his visit on a future occasion. The Prince of Wales, in reply, thanked Sir Jung Bahadoor for his expressions of good-will, and for the services of the Nepaulese Government to the British cause during the Indian mutiny. His royal Highness had always strongly wished to visit Nepal, and was glad to have had an opportunity of doing so; Sir Jung Bahadoor assured the

prince that nothing in his career gave him greater satisfaction than to be able to assist the British Government during the mutiny, and, should the necessity arise at any future time, he would feel it his duty to render England the utmost assistance in his power. During his stay in Nepal the prince gave himself up to the pleasures of the chase, being accompanied by Sir Jung Bahadoor. The visit to Nepal formed the last stage in the journey of the prince, and he then returned to Bombay, where he left on board the *Serapis* on March 18th.

An important change took place in the Government of India in 1876. Lord Northbrook, the Viceroy, had already expressed his intention in 1875 of resigning his position. This he did in the beginning of January, and on the 4th of the same month Lord Lytton was appointed his successor, and was confirmed by the India Office. Lord Lytton arrived in Bombay on April 7th, and immediately entered upon his office. In the beginning of the year, Sir William Muir introduced into the Legislative Council a bill to enable the Government of India to declare certain coins of native states to be a legal tender in British India. Hitherto the native states had coined their own money, and, as their rupees varied considerably in value, no little inconvenience and loss were caused to all persons who had business transactions within the feudatory states. The proposed law provides that any chief may enter into an arrangement with the Government whereby he will, for a definite period of not less than thirty years, abstain from coining. The Government, on its part, will undertake to strike coins for him at its own mints, these coins being identical in fineness with the corresponding coins of British India, and it will be careful that each coin shall clearly indicate by its device the chief for whom it has been struck. These coins will then be a legal tender throughout British India, while the British rupee will pass in each state which accepts the offer. Two of the native members of Council—the Maharajahs of Benares and Vizianagram—expressed their general approval of the bill; but the former suggested that, instead of asking native princes to abstain from coining, the Government should hold them responsible for the correctness of the weight and value of their coins. It was also mentioned that the little Rajpoot state of Ulwar had signified its readiness to enter into an arrangement such as that proposed by the bill, and that Holkar had opened negotiations for the same purpose.

The financial statement of Sir William Muir was published in April. The budget for 1876-'77 estimated the revenue at £50,480,000, and the ordinary expenditure at £50,383,000. The extraordinary expenditure for public works was fixed at £8,759,000, to meet which it was proposed during the financial year 1876-'77 to raise £8,000,000 by loans, including £360,000 on account of the Scindia and Holkar Rail-

ways. The remaining £2,640,000 was to be raised in England by the Secretary of State. No loan was to be raised in India, and no fresh taxation was intended for the year 1876-'77. The cash balances in India at the end of 1875-'76 were estimated at £16,243,214, and at the end of 1876-'77 at £18,552,614. The budget showed all branches of the revenue to be favorable. The receipts from customs duties have increased since the new tariff act came into operation, but the fall in the rate of exchange caused an estimated loss of over £1,000,000. The Government resolved to restrict the expenditure on public works as far as possible while exchange continued unfavorable. The drawings of the Secretary of State on the Indian Treasury during the ensuing financial year were to amount to £18,500,000, and the loss by exchange was estimated at £2,800,000.

In September the Viceroy published a resolution in council, the principal points of which are as follows:

The budget announced that the Secretary of State would borrow £2,640,000 in England. This now appears the estimate of the cost in rupees of supplying the sum still remaining to be raised by the Council bills on India, but he expects the entire loss by exchange to be largely in excess of the budget estimate. The adverse rate of exchange has made this insufficient, and the home loan will be £4,000,000. The sum to be supplied to the Home Treasury from India will thus be reduced to £12,800,000, of which £3,344,184 has been already obtained. The Government cannot form an approximate estimate of the unfavorable effect on the customs revenue. The unprecedentedly large opium-crop in Bengal will probably cause the expenditure under the head of "opium" to exceed the estimate by £500,000. The increased amount borrowed will increase the charge for interest. The resolution went on to say that the financial prospects gave cause for very grave anxiety.

BOMBAY, FROM MALABAR HILL.

The local governments and heads of departments have been instructed to stop all outlay which is not absolutely necessary, or to which the Government is not committed, or a discontinuance of which would not cause a disproportionate loss. The expenditure on extraordinary public works will be largely reduced. Municipal corporations, native states, and private persons, are warned not to apply for loans except for purposes which cannot be postponed. New expenditure will not be sanctioned unless it is really indispensable. The Viceroy invites the earnest coöperation of local governments and heads of departments in reducing the threatened deficit by every possible means; and the resolution concluded by stating that the present financial disorder is entirely due to the recent rapid fall in the value of silver in relation to gold. It was considered remarkable that the resolution said nothing regarding any of the many suggestions which had been made for meeting the difficulty caused by the diminished value of the rupee.

On August 19th Lord Lytton, the Viceroy, published the following proclamation, with regard to the assumption of the title "Empress of India" by the Queen of Great Britain and Ireland:

I hereby publish, for the information of the governors, administrators, princes, chiefs, nobles, and peoples of this empire, the subjoined act passed by the Imperial Parliament of Great Britain and Ireland, on the 27th of April, 1876, together with a royal proclamation, dated at the court of Windsor, the 28th of April, 1876, in the thirty-ninth year of her Majesty's reign, transmitted to this Government by the most Honorable the Secretary of State for India, in his lordship's dispatch No. 70, of the 18th of July, 1876. Moreover, I publicly notify, under this my hand and seal, that it is my intention to hold, at Delhi, on the 1st of January, 1877, an imperial assemblage, for the purpose of proclaiming to the Queen's subjects throughout India the gracious sentiments which have induced her Majesty to make to her sovereign style and titles an addition specially intended to mark her Majesty's interest in this great dependency of her crown, and her royal confidence in the loyalty and affection of the peoples and princes of India. To this assemblage I propose to invite the governors, lieutenant-governors, and heads of administrations from all parts of the Queen's Indian dominions, as well as those princes, chiefs, and nobles, in whose persons the antiquity of the past is associated with the prosperity of the future, and who so worthily contribute to the splendor and stability of this great empire. I shall forthwith

issue such orders in council as may be suitable to the historical importance of the occasion, and in conformity with the desire which will be felt by all her Majesty's subjects in India to manifest the affection which they cherish for their august sovereign by public rejoicings and appropriate demonstrations of loyalty.

In the latter part of November the Viceroy made a journey to the Peshawur frontier. He reviewed four thousand troops, and held a durbar of all the chiefs of the British districts on the Peshawur frontier, and met various chiefs of the Afreedee and Momund tribes. While at Peshawur the Viceroy commenced his inquiries into the measures necessary for the reorganization of the frontier in a personal interview with the Lieutenant-Governor, the commander-in-chief, and the superior local officials.

The troubles in the Malay Peninsula continued during 1876. Brigadier-General Ross, with one hundred and eighty men, proceeded, on January 4th, to Kotah Lama, a village on the Perak River, and disarmed the inhabitants without opposition. Accompanied by a small party, the general afterward again landed, and was surprised by the enemy in an ambuscade in the jungle. The Malays, after a harmless volley, rushed out upon the British force with their spears. Major H. L. Hawkins and three men were killed, and Surgeon Townsend and two men wounded. The village, with its stores of rice, was subsequently burned. Several Malays were killed. This village had always had a bad reputation. The abode of robbers

actual murderers of Mr. Birch, the English resident at Perak, were captured. One of them made a complete confession, stating that nine men had perpetrated the murder, and gave their names. In March the chief Datu Sagor, who was present when Mr. Birch was murdered, was captured, while Ismael and several other Malay chiefs surrendered to the Rajah of Quedah, who handed them over to the British. New disorders were reported in March and April, but at the close of April everything was quiet, and the rebellion was suppressed.

The inhabitants of the Naga Hills, who had been punished for outrages committed on surveying-parties in 1875, again attacked a surveying-party under Captain Butler in the early part of 1876, for which they were again severely punished.

The river Leh, in the Punjaub, overflowed its banks in August, and destroyed over three hundred houses in the cities Reavul Pindi and Sudder Bazaar.

In the early part of December a Mohammedan meeting of sympathy with the Turks was held in the Colvotollah Mosque, Calcutta, at which 10,000 persons were present. After prayers for the Queen and the Sultan, the memorial to the Queen which had been prepared by the committee was read, adopted, and signed. The proceedings were most orderly, and marked by much earnestness.

In Baroda, Sadash Rao, the nephew of the deposed Guicowar, laid claim to the throne,

and attempted to incite a rebellion, for which he was, in February, banished from the country. In April an agrarian outbreak occurred at Bustar, in the presidency of Madras. Thousands of peasants had assembled, but the troops which were immediately dispatched to the scenes of the disorder succeeded in restoring quiet before the close of the month.

Different parts of India were visited during 1876 by the plague and the cholera, the diseases appearing in most places with terrible severity.

In the latter part of the year large districts

GOVERNMENT BUILDINGS AND OCHTERLONY MONUMENT, CALCUTTA.

and escaped prisoners, its name had always been a terror to the neighboring districts, and a disgrace to the Bandahara of Perak, who possessed authority to control the inhabitants of this village. But he neither had the power nor did he show any inclination to exercise a proper control, and its destruction gave general satisfaction. In February three of the

in Bombay and Madras were threatened with famine, through the failure of the crops on account of excessive drought. Large quantities of grain were sent to the distressed districts by the Bombay Government; but the collectors were directed not to distribute gratuitous alms except in cases of extreme necessity, and, as far as possible, to exact a fair day's

labor on the relief-works. In the Deccan, in addition to the failure of the crops, extreme dearth of water and fodder was expected. In the Madras districts rain came in time for a partial relief.

On October 31st the delta of the Ganges was visited by the most destructive cyclone known in history. On the evening of the terrible event there were no extraordinary signs of the approach of the storm. At eleven o'clock the wind freshened, but nothing unusual was seen in this. Suddenly, about midnight, a mighty wave was seen, and in the next instant houses and land were engulfed, and masses of human beings and *débris* of all sorts were swept away on the top of the flood. The flood extended for many miles inland. The cyclone and storm-wave appeared to have expended their fury on the districts of Backergunge, Noacolly, and Chittagong; and a glance at the map will show

how probable it is that a storm-wave occurring in that region could not fail to do immense destruction. The district is honeycombed and broken up with rivers in all parts of the Gangetic Delta; and some of these rivers, such as the Ganges and the Megus, carry powerful floods of water to the bay of Bengal. The consequences of a tidal wave must therefore be tremendous in these districts, because not only does such a wave pour out upon the land its own waters, but by rushing up the great rivers it rolls their floods back, and these, rising rapidly, must burst over the surrounding country, and carry destruction with them. The total area of the inundated districts was about 4,000 square miles—Backergunge, with the island of Dukhin Shabbazpoor, possessing 1,818 square miles; Noacolly, 900 square miles; and Chittagong, nearly 400 square miles. Sir Richard Temple, after a personal inspection

DELHI.

of the afflicted districts, at the instance of the Government, came to the conclusion that not less than 215,000 people had been lost; and this fatality is distributed as follows among the Deltaic provinces: Backergunge, possessing a population of 437,000, lost a fourth of that number; Noacolly, with a population of 403,000, lost 90,000; and Chittagong, with a population of 222,000, lost 20,000. Thus, out of a grand total population of 1,062,000, 215,000 people were estimated to have perished! Besides the loss of human life, large numbers of animals, both domestic and wild, were drowned.

A convention representing the Sunday-schools of India was held at Allahabad, January 19th. Chairmen were chosen for the different days, from the different denominations represented in the meeting. A number of papers were read on subjects pertaining to the

interest, growth, and improvement of Sunday-schools, several of them having especial reference to the adaptation of the schools to the wants and customs of the people of India. A Sunday-school Union of India was organized, and the churches of the country not represented in the convention, as well as those which were so represented, were invited to join in carrying on the legitimate work of such an organization. An executive committee was appointed, and instructed to labor for obtaining the adhesion of the different Sunday-schools in India to the Indian Sunday-school Union, and for the formation of auxiliary unions in Bengal, Madras, Bombay, Burmah, the Northwest Provinces, Oude, the Central Provinces, and the Punjab. Arrangements were made for establishing a monthly periodical in the English language, for the use of teachers and Sunday-school workers in India,

to be called the *Indian Sunday-School Journal*. The first number of this periodical was issued a few weeks after the adjournment of the convention. A resolution protesting against the custom of child-marriage was adopted, and it was decided that the subject be brought more prominently before the Indian public. A second meeting of the convention was appointed to be held in 1878, the exact date and place to be hereafter arranged. Statistics of the existing Sunday-schools in India were presented, of which the following is a summary:

CLASSIFICATION.	No. of Sunday-Schools.	No. of Officers and Teachers.	No. of Scholars of all Ages.	No. of Bible-Classes.	No. of Scholars in Same.
I. CHRISTIAN SCHOOLS:					
1. English-speaking.....	74	463	4,349	74	666
2. Anglo-vernacular.....	23	114	1,515	50	521
3. Vernacular.....	358	805	17,175	435	5,279
II. NON-CHRISTIAN SCHOOLS:					
1. Anglo-vernacular.....	21	133	3,395	26	420
2. Vernacular.....	141	266	5,804	47	619
Total.....	617	1751	32,131	632	7,491

The total number of scholars, fifteen years old and over, was 10,907; number of scholars under fifteen, except the infant-classes, 12,025; number of scholars in the infant-classes, 4,187; average attendance of teachers and scholars, 22,064; number of officers and teachers who are church-members, 1,554; number of scholars who are church-members, 7,819; number of conversions, 542; number of library-books, 8,950; number of English periodicals taken, 3,053; total expenses of the schools during the year, 6,804 rupees.

NORTHBROOK, THOMAS GEORGE BARING, Earl of, was born in 1826. He received his education at Christchurch, Oxford. He was successively private secretary to the late Lord Taunton at the Board of Trade, to Sir George Grey at the Home Office, to the present Lord Halifax at the Indian Board, and at the Admiralty until 1857, when he was returned to the House of Commons for the united boroughs of Penrhyn and Falmouth, and this constituency he continued to represent in the Liberal interest until his succession to the peerage on the death of his father in the autumn of 1866. He was a Lord of the Admiralty from May, 1857, to the return of the Conservatives to power in 1858; Under-Secretary of State for India from June, 1859, to January, 1861; and Under-Secretary of State for War from the latter date until the Liberals went out of office in June, 1866. Upon the formation of Mr. Gladstone's administration in December, 1868, Lord Northbrook resumed office as Under-Secretary of State for War; and when Lord Mayo was assassinated in February, 1872, he was appointed Governor-General of India. Upon his resignation from this office in 1876, he was created an earl.

LYTTON, EDWARD ROBERT BULWER-LYTTON,

second baron, the new Viceroy of India, was born November 8, 1831. His father was the eminent novelist and statesman, who held office as Secretary for the Colonies in the second administration of the late Lord Derby, and was created a peer in 1866. The present baron was educated first at Harrow, and afterward at Bonn, in Germany, where he devoted himself especially to the study of modern languages. He entered the diplomatic service of the crown when nearly eighteen years of age, and on the 12th of October, 1849, was appointed *attaché* at Washington, where his uncle, Sir Henry Bulwer, afterward Lord Dalling and Bulwer, was the British minister, and to whom he acted for the time as private secretary. In February, 1862, he was transferred as *attaché* to Florence, and in August, 1854, was removed to the embassy at Paris. After the peace of 1856 he was promoted to be paid *attaché* at the Hague. On the 1st of April, 1858, he received the appointment of first paid *attaché* at St. Petersburg, and two months later was filling a similar post at Constantinople. While paid *attaché* at Vienna, he acted as consul-general at Belgrade, and was also employed upon a special mission to prevent the renewal of hostilities between the Turks and the Servians after the capital of the latter had been bombarded. As a recognition of his services in this capacity, he was, in October, 1862, gazetted second secretary in her Majesty's diplomatic service, and was soon after promoted to be secretary of legation at Constantinople; afterward occupying a like position at Athens, and then at Lisbon. Having assisted in the negotiation of a commercial treaty between Great Britain and Austria, he was transferred to Madrid, and six months later was promoted to the secretaryship of embassy at Vienna. More recently he has been secretary of embassy at Paris, and British minister at Lisbon. In May, 1875, he was offered the generalship of Madras, then vacant by the death of Lord Hobart, but declined that post; and in January, 1876, was appointed Viceroy of India. He wrote "The Wanderer," "Lucille," "Julian Fane—a Memoir," a collection of the national songs of Servia, "The Ring of Amasis," the poetical works of "Owen Meredith," "Chronicles and Characters," "Orval; or, The Fool of Time," "Fables of Song," and published the speeches of his father, the first Lord Lytton, with a prefatory memoir.

INDIANA. The assessed value of taxable lands and improvements in Indiana is \$621,416,973; railroads, \$338,436,919; telegraph companies, \$173,241; other corporations, \$4,045,503; personal property, \$283,667,147; total taxable property, \$1,197,769,783. There are 282,391 persons in the State subject to a poll-tax of 50 cents. At the beginning of the last fiscal period of two years, November 1, 1874, there was a surplus in the Treasury of \$244,203.78; the receipts from revenue, in 1875, were \$1,393,029.78; in 1876, \$1,277,-

678.73. During the same period \$384,042.55 was received on account of the benevolent institutions, being derived from the earnings of inmates and the contributions of counties. During these two years the payments from the Treasury amounted to \$2,408,718.25, besides \$73,679 in redemption of bonds. The State debt now amounts to \$1,097,755.12, consisting of \$510,000 six per cent. bonds, due April 1, 1879; \$200,000 six per cent. bonds, due December 1, 1879; \$200,000 seven per cent. bonds, due April 1, 1878; \$139,000 six per cent. war-loan bonds, due in 1881; \$29,000 old bonds, required to be redeemed under the act of 1872; \$16,469.99 five per cent. certificates of State stock, and \$3,285.13 two and a half per cent. certificates. The indebtedness of the State to the school-fund amounts to \$3,904,-783.21, and consists of five per cent. non-negotiable bonds; the common-school fund held by the counties amounted to \$2,528,988.33 in June, and the congressional township school-fund was \$2,442,100.89, making the total permanent fund for educational purposes \$8,870,-872.43. The revenues to be used in support of the schools realized during the year ending June 30th amounted to \$3,174,156.77. There are 9,434 schoolhouses in the State, valued at \$11,-548,993.67. The number of teachers employed is 13,411, of whom 13,317 are white and 94 colored—7,852 male and 5,559 female. The number of children enrolled in the schools during the year was 516,270, of whom 509,307 were white and 6,963 colored. The total number of children of school age in the State was 668,969 whites and 10,261 colored, or 679,230 in all. The average number of school days in the year ending August 31st was 129.

The number of children provided for in the Soldiers' Orphans' Home during the year was 294. There were 308 inmates in the Deaf and Dumb Asylum at the close of the year. The expenses of this institution for the year ending March 31st were \$63,553.66. The number of pupils in the Institute for the Blind during the year ending October 31st was 106. The expenditures for two years were \$65,518.36.

The Hospital for the Insane contained 482 patients on the 1st of November, 1874. During the two years following 927 were admitted and 696 discharged, leaving the number at the close of that period 713. The number of deaths was 47 in 1875, and 79 in 1876. Of those discharged 516 were recovered, 50 im-

proved, 105 not improved, and two not insane. The expenses of the institution for two years were \$290,033.24. A new and extensive building, consisting of six distinct hospitals connected by towers, is in process of construction.

On the 15th of December the Northern Prison contained 603 convicts, an increase during the year of 92. The revenues of the prison for two years amounted to \$145,712.59, no part of which came from the State Treasury. The ordinary expenses during the same period were \$130,059.16. The prisoners are let out to labor on contracts at 45 cents each per day. The average number of convicts in the Southern Prison during the year was 531. The contract for labor with the Southwestern Car Company at 60 cents per day for each prisoner was canceled near the beginning of the year on account of the bankruptcy of the company. New contracts entered into since have been on the basis of 45 cents per day for each prisoner.

The political canvass of the year opened early with the Republican Convention, which was held at Indianapolis on the 22d of February. Delegates to the National Convention were chosen and candidates nominated for

PURDUE UNIVERSITY BUILDING, LAFAYETTE.

presidential electors as well as for the State offices to be filled in October. The State ticket was as follows: Governor, Godlove S. Orth; Lieutenant-Governor, Robert E. Robertson; Secretary of State, Isaiah P. Watts; Auditor, William M. Hess; Treasurer, George F. Herriott; Attorney-General, Jonathan W. Gordon; Judges of the Supreme Court, W. P. Edson, A. C. Vorhis, John F. Kibby, and H. C. Newcomb; Reporter of the Supreme Court, L. S. Miller; Clerk of the Supreme Court, Charles Schull; Superintendent of Public Instruction, Oliver H. Smith. The declaration of principles adopted consisted of twenty-one resolutions. The first expressed fidelity to the

principles of the party and the equal right of all voters to exercise their suffrage without interference. The second declared the duty of the Government to execute all laws intended to secure the rights of citizens. The third was directed against the doctrine of State rights. The fourth and fifth were as follows:

4. While we believe that the national Government is entirely independent of the States, when acting within its own proper circle, we also believe that the State governments are entirely independent of the national when acting within their own proper circles; and we will maintain this independence of both, to the end that harmony may exist between them, that the national welfare may be advanced, and that the States may be secured in the exercise of ample jurisdiction over all their domestic affairs, so that they may be enabled to develop their material interests and employ all the means necessary to the intellectual and moral enlightenment of the people.

5. We are willing and anxious to restore entirely amicable relations between the people of the Northern and those of the Southern States who were engaged in the rebellion, and with a view thereto are ready to forgive and grant amnesty to all those who desire to be forgiven and amnestied; but we are neither ready nor willing to extend this forgiveness and amnesty to those who remain unrepentant for their attempt to destroy the Union, or to place the rebellion and those who fought on its side upon an equality with the cause of the Union and the gallant soldiers who defended it; we believe that the war for the Union was right, and the rebellion wrong, and that thus it should forever stand in history.

The sixth condemned the discharge of Union soldiers from public offices. The seventh was as follows:

7. We believe that, in conducting the civil service, men should be selected for office on account of their qualifications, integrity, and moral character, and not on account of mere party service, in order that thereby the public business may be faithfully conducted, administrative economy secured, and that it shall not be brought in "conflict with the freedom of elections."

The eighth declares the duty of the Government to provide by necessary laws for the preservation and enforcement of "equal justice." Then came the following:

9. We insist on perfect religious freedom, and freedom of conscience to every individual; are opposed to any interference whatever with the church by the state, or with the state by the church, or to any union between them; and in our opinion it is incompatible with American citizenship to pay allegiance to any foreign power, civil or ecclesiastical, which asserts the right to include the action of civil government within the domain of religion and morals: because ours is a "government of the people, by the people, and for the people," and must not be subject to, or interfered with by, any authority not directly responsible to them.

10. A country so bountifully supplied as ours is with all the sources of wealth—possessing unsurpassed capacity for production, every necessary facility for the growth of mechanic and manufacturing arts, and all the agencies of labor—needs only the fostering aid of Government to establish its material prosperity upon a durable basis; in our opinion, therefore, it is the duty of the Government so to regulate its revenue system as to give all needful encouragement to our agricultural, mechanical, and mining and manufacturing enterprise, so that harmonious relations may be permanently established

between labor and capital, and just remuneration be secured to both.

11. In our opinion it is the duty of the Government, in passing laws for raising revenue, so to lay taxes as to give the greatest possible exemption to articles of primary necessity, and to place them most heavily upon luxuries and the wealth of the country.

12. We believe that it is the duty of the Government, in furnishing a national currency, so to regulate it as to provide for its ultimate redemption in gold and silver; that any attempt to hasten this period more rapidly than it shall be brought about by the laws of trade and commerce is inexpedient; therefore, in our opinion, so much of the so-called resumption act as fixes the time for the resumption of specie payments should be repealed; and after such repeal the currency should remain undisturbed—neither contracted nor expanded—we being assured that the financial troubles of the country, when relieved from interference, will be speedily and permanently cured by the operation of the natural laws of trade, and by preserving that course of policy which the Republican party has constantly maintained of steadily looking to an ultimate resumption of specie payments.

13. The greenback currency was created by the Republican party as a matter of absolute necessity, to carry the Government successfully through the war of the rebellion, and save the life of the nation. It met the fierce opposition of the Democratic party on the declared ground that it was unconstitutional and would prove worthless, and if this opposition had been successful the war would have resulted in the independence of the Southern Confederacy. If the Democratic party was sincere in this opposition, one of its objects in now seeking to obtain possession of the Government must be to destroy this currency, along with that furnished by the national banks, so that the country may be compelled to return to the system of local and irresponsible banking which existed under the Administration of Mr. Buchanan; and, therefore, as it is necessary that this currency shall be maintained in order to save the country from this most ruinous system of local and irresponsible banking, and from consequent financial embarrassments, its best interests require that it shall be left in the hands of its friends, and not be turned over to its enemies.

The next resolution draws a comparison between the management of the financial interests of the nation prior to 1861 and since, to the great advantage of the latter period. The next declares opposition to the payment of the "rebel debt" and compensation for emancipated slaves. Then follow declarations in favor of economy in administration, free education for all, the moral and intellectual development of the people, and faithful care for the soldiers and sailors of the civil war. The closing resolutions were the following:

20. The Administration of General Grant commands our fullest confidence and approbation—our respect for him as a man of unspotted honor and as a statesman of wisdom and prudence, and our admiration for his high qualities as a soldier remains unabated—and we especially commend him for the example he will leave to his successors of removing from office those of his own appointment when he has found them to be unfaithful, and of causing those who have proved dishonest to be so prosecuted that "no guilty man should escape."

21. In our opinion, the Hon. Oliver P. Morton possesses in an eminent degree the ability and qualities which fit him for the office of President of the United States. During his service as Governor of this State,

when the Union was in the utmost peril, he displayed executive abilities of the very highest order, and his senatorial career has been distinguished by such statesmanlike wisdom as to win the approbation of the whole country. We know his faithfulness to every public trust, his earnest devotion to the cause of the Union, his unflinching advocacy of the rights of the oppressed, and therefore present his name to the National Republican Convention for nomination for the office of President.

The Democratic Convention was held at Indianapolis, on the 19th of April. The prominent candidates for the nomination for Governor were Hon. Franklin Landers and Hon. William S. Holman; but their supporters being about equally divided, both names were withdrawn, and James D. Williams was nominated. The rest of the State ticket was—for Lieutenant-Governor, Isaac P. Gray, of Randolph County; Secretary of State, John E. Neff, of Randolph County; Auditor, Ebenezer Henderson, of Morgan County; Treasurer, Benjamin O. Shaw, of Marion County; Attorney-General, Clarence A. Buskirk, of Monroe County; Superintendent of Public Instruction, J. H. Smart, of Allen County; Judges of Supreme Court—First District, S. H. Buskirk, of Monroe County; Second District, A. G. Downey, of Ohio County; Third District, John Pettit, of Tippecanoe County; Fourth District, James L. Worden, of Allen County; Clerk of the Supreme Court, Gabriel Schmuck, of Perry County; Reporter of the Supreme Court, Augustus N. Martin, of Wells County. Presidential electors were also nominated, a State Central Committee was appointed, and delegates were chosen to the National Democratic Convention. The following was the platform adopted:

The Democracy of Indiana declare their fidelity to all the provisions of the Federal Constitution, to a perpetual union of the States, to local self-government in every section, to all public trusts and obligations, to the honest payment of the public debt, to the preservation of the public faith, to the maintenance of free schools, and to the pure and economical administration of the Federal, State, and municipal Governments. They contemplate with alarm the distress that prevails, the wide-spread financial ruin that impends over the people, and the corruption that pervades the public service, and they charge that these evils are the direct results of the personal government, unwise legislation, vicious financial policy, the great contraction of the currency, and the extravagance and selfishness of the party and its officials who have so long held unchecked control. They invite all who believe in and earnestly desire official purity and fidelity, the adjustment of financial questions upon a sound basis, having a regard for the interests and welfare of the whole people and not a class, and the recognition of the final settlement of all questions submitted to the arbitration of the sword, to unite with them: thus declare—

1. That the civil service of the Government has become corrupt, and is made the object of personal gain, and it is the first duty which the people owe to themselves and the Government to restore the tests of honesty, capacity, and fidelity, in selection of persons to fill all public positions.

2. The repeated exposures of corruption in the administration of every branch of public affairs calls for continued and thorough investigation, not only that corrupt practices may be brought to light and guilty parties to punishment, but also that it may be

made clear to the people that their only remedy for reform is by making a general and thorough change.

3. That retrenchment and economy are indispensable in Federal, State, and municipal administration, as an essential means toward lessening the burdens of the people; and we commend the efforts of the majority of the House of Representatives for the reduction of the expenses of the Federal Government to a just standard, and their determination to lessen the number of useless offices.

4. We believe in our ancient doctrine that gold and silver are the true and safe basis for the country, and we are in favor of measures and policies that will produce uniformity in value in the coin and paper-money of the country, without destroying or embarrassing the business interests of the people.

5. We oppose the contraction of the volume of our paper currency, and declare in favor of the adoption of measures looking to the gradual retirement of the circulation of the national banks, and the substitution thereof of circulating notes issued by authority of the Government.

6. We recognize with patriotic satisfaction the vast recuperative energies with which our country is endowed, and we observe that, in spite of the interference with the laws of commerce which has been practised, our currency has improved in proportion as our wealth has increased, and the sense of national and local security has been confirmed. We are, therefore, of the opinion that a natural return to specie payments will be promoted by the increase of national wealth and industries, by the assurance of harmony at home and peace abroad, and by strengthening our public credit under a wise and economical administration of our national affairs.

7. The legal-tender notes constitute a safe currency, and one especially valuable to the debtor classes because of its legal-tender quality, and we demand the repeal of the legislation enacted by the Republican party providing for its withdrawal from circulation and the substitution thereof of national-bank paper.

8. The act of Congress for the resumption of specie payments on the 1st of January, 1879, was a party measure, devised in secret caucus for party ends, and forced through the House of Representatives without the allowance of amendment or debate under party discipline. It paralyzes industry, creates distrust of the future, turns the laborer and producer out of employment, is a standing threat upon business-men, and should at once be repealed without any condition whatever.

9. As Democrats we may indulge in laudable pride at the great success of our common-school system, which had its origin in Democratic policy, and its development in Democratic measures. We will stand by and forever maintain our constitutional provision which guarantees our common-school fund from diminution and misappropriation, and its use only to support non-sectarian common schools, and we denounce as enemies of the schools the Republican politicians who, for party ends, have sought to bring them into political and sectarian controversy.

10. We believe that a license law properly guarded is the true principle in legislation upon the liquor-traffic.

11. It is not the right of any political party to make the just claims of Union soldiers, their widows and children, the subjects of partisan controversy, for such rights are more secure when protected by all the people, and are endangered only when thrown into the political arena by demagogues. We will stand by and maintain their rights to honors, to pensions, and equal bounties, not as partisans, but because it is our pleasure and duty as citizens.

12. That the jurisdiction of the Federal courts in civil causes has been so extended as to become burdensome to the people by increasing expenses and

compelling them to try their causes at places remote from their homes.

13. We approve the bill which recently passed the House of Representatives, prohibiting members of Congress and all officers and employés of the United States from contributing money to influence elections.

14. We are opposed to the assumption by Congress of the debts of the District of Columbia, which were contracted by the late corrupt "Ring," and we believe the Government should pay her equal and just proportion for local improvements, the same as other owners of property, and no more.

15. That the people of Indiana recognize with pride and pleasure the eminent public service of the Hon. Thomas A. Hendricks; that in all public trusts he has been faithful to duty, and in his public and private life pure and without blemish. We therefore declare that he is our unanimous choice for the presidency of the United States.

16. That the delegates to the Democratic National Convention this day appointed are hereby instructed to cast the vote of this State in said convention as a unit in such manner as the majority of the delegates may determine.

17. That we are opposed to the payment of any part of the rebel debt, or any payment whatever for emancipated slaves, or the property of rebels destroyed in war.

On the 2d of August the Republican candidate for Governor sent the following letter to the chairman of the State Central Committee withdrawing from the canvass:

LAFAYETTE, IND., August 2, 1876.

DEAR SIR: Feeling satisfied, after a full consultation with yourself and other friends in different parts of the State, that I shall not receive the united support of the Republican party so essential to success in the approaching election, I hereby tender you my declination as a candidate for Governor. With the best wishes for the success of the cause, I am yours truly,

GODLOVE S. ORTH.

To Colonel G. W. FRIEDLEY, Chairman of the Republican State Central Committee.

The committee was called together on the 11th of August, and filled the vacancy on the ticket with the name of Benjamin Harrison.

The Independent or "Greenback" party had put a ticket in the field early in the season, but held a second convention on the 17th of August to fill vacancies. Resolutions were adopted, indorsing the platform of the Independent State and national parties, denouncing the act of 1873, by which the silver dollar was dropped from our list of coins, and demanding its return, claiming that its full coinage should be encouraged to enable the Government to pay its coin obligations in silver, as it has a right to do under the original contract; that all values should be taxed equally, including Government bonds and greenbacks; that the Independents have no faith in the professions of reform which come, on the one hand, from the corporation thief and railroad wrecker representing the old Tammany régime of New York, and, on the other hand, from the organization which in national convention has indorsed the entire Administration of President Grant, not even excepting its stealings; and that no confidence can be placed in the old political parties which have been steeped in corruption and complicated with dishonesty.

The candidates for the principal State offices were Anson Wolcott for Governor, Richard Gregg for Lieutenant-Governor, Allen W. Monroe for Secretary of State, Uriah Coulson for Auditor, J. Q. A. Newsom for Treasurer, and William A. Tipton for Attorney-General. On the 4th of October, only six days before the election, Mr. Wolcott suddenly withdrew. He gave his reasons at some length in a letter in which he stated that most of the Democrats in the Independent movement were secretly supporting the regular party candidates, and he did not consider it fair to the Republican party of the State to keep up the division. The closing paragraph of his letter briefly restated the grounds of his action in these words: "My sole reason for the course I have chosen to pursue is the fact that very few leading Greenback men of Democratic antecedents are in the Independent movement, and there are comparatively few Democrats of any degree but what continue with their leaders and remain in the Democratic party. To persist in the Independent movement, in the face of such facts, will not advance the Greenback cause, and will defeat the Republican party. Such is my view of the situation. By this view I am governed. Were the people moving from both the old parties in anything like equal numbers and in equal good faith to the Independent party, the case would be wholly changed. Such is my view of the situation, and by this view I am governed."

The State Central Committee of the Independent party promptly filled the vacancy by nominating — Harrington as their candidate for Governor.

The political canvass was fraught throughout with unusual excitement, and was watched with eager interest all over the country, owing to the fact that the parties were nearly matched in the contest, and the result of the State election was regarded as having an important bearing on the national contest in November. The following letter, published in August, shows something of the spirit and character of the campaign:

GRAND HOTEL, INDIANAPOLIS, August 1, 1876.

DEAR SIR: I have just finished a tour of six counties in Indiana, and feeling that any reliable information from this State will interest you, I write:

In the first place the canvass is well conducted. The people are enthusiastic and determined, and the old war spirit is thoroughly aroused; and if it were not for one thing we could rest certain of victory in October. There is an Independent party in this State, confined, it is true, to a few counties, but formidable, and it will defeat General Harrison. There is but one way to overcome this movement. The leaders of the Independents are poor, needy, and in debt. They must be lectured. Let documents be placed in their hands that they may be convinced of their folly. A bloody-shirt campaign, with money, and Indiana is safe; a financial campaign and no money, and we are beaten.

The National Committee has done nothing for Indiana. Alone they are fighting their battles and bravely, but unless the National Committee wakes up and does its duty to you, to the party, and to the country, defeat is certain in October. I never in all

my life felt so certain I was doing my duty as in this contest, and my desire for success, my dear sir, is my only excuse for writing you. Your friend,

J. KILPATRICK.

To R. B. HAYES, Governor, etc.

At the State election, held on the 10th of October, the whole number of votes cast for Governor was 444,457, of which Williams received 213,164, Harrison 208,080, and Harrington 13,213; plurality of Williams over Harrison, 5,084.

At the presidential election, on the 7th of November, there were 431,070 votes cast, 213,526 being for the Democratic candidates, 208,011 for the Republican, and 5,533 for the "Greenback" ticket; Tilden and Hendricks over Hayes and Wheeler, 5,515. Of thirteen members of Congress chosen, nine were Republicans and four Democrats, while throughout the State the Democrats had a plurality of 7,727 in the congressional vote. The Legislature of 1877 consists of 25 Democrats, 24 Republicans, and one Independent, in the Senate, and 54 Republicans and 46 Democrats in the House. This places the Republicans in a minority by two votes in the Senate, and in a majority by eight in the House; on a joint ballot they have a majority by six votes.

The Democrats held a convention at Indianapolis on the 8th of January, 1877, to consider the disputed result of the presidential election. Addresses were made by Judge David S. Gooding, Hon. George W. Julian, Hon. B. W. Hanna, Hon. D. W. Voorhees, and others. The sentiments of the occasion were expressed in condensed form in a series of resolutions. In these, confidence was expressed that Tilden and Hendricks were fairly entitled to a majority of the electoral votes, as well as a large majority of the votes of the people of the country. A protest was made against accepting the "notoriously false judgment" of the Returning Board of Louisiana "as conclusive evidence of the elective will" of the people of that State. The action of the Returning Boards of Florida and Louisiana was reviewed and pointedly condemned, and the following declarations were made:

That it is the imperative duty of Congress to provide by law a plan for counting the electoral vote, which by its reasonableness and justice will commend itself to the judgment of the people and command their acquiescence in the result of the count, and that this should be done at the earliest day consistent with due deliberation, to the end that the disquiet which now pervades the people may be allayed.

That, according to the plain meaning of the Constitution, and according to all past political usage, the power of counting the vote resides in the two Houses of Congress.

That we denounce the proposition that the President of the Senate has the power, not only to open, but to count the vote, as an innovation which the sentiment of the people will not tolerate. If such power shall be assumed, and its exercise attempted, we call upon the two Houses of Congress to take prompt and effectual measures for the assertion of their constitutional prerogative in that regard.

That, if Congress shall provide by law a just plan

for counting the electoral vote, one which will be fair not only in the present emergency, but for all future elections as well, we pledge our acquiescence in the result, whatever it may be.

That, if the Senate shall claim that its presiding officer, like the Returning Boards of Florida and Louisiana, has the absolute power to designate the President and Vice-President, we call upon the House of Representatives to exert all its constitutional powers to defeat the usurpation, and we pledge it our support with all the resources which a people whose fundamental liberties are threatened can constitutionally command.

James D. Williams, the present Governor of Indiana, is a farmer, with a unique reputation for simplicity and sturdy honesty. He was born in Pickaway County, Ohio, in 1808, but emigrated to Knox County, Ind., with his parents when a mere boy. He had moderate opportunities for education, and has spent his life in farm-labor. His farm, on White River, in Harrison township, contains 3,000 acres, in a state of high cultivation. He has earned the *sobriquet* of "Blue Jeans," from his persistent habit of wearing that plain material on all occasions, public and private. He has served several times in the Legislature of the State, was the Democratic candidate for United States Senator in 1872, and in 1874 was elected a Representative in Congress. He is a strenuous advocate of economy and honesty in administration in the State and nation.

The United States Circuit Court rendered a decision in Indiana during the year to the effect that an Illinois insurance company, doing business in the State, without compliance with the insurance law, could nevertheless enforce its contracts. It appears that the company had an agent in the State who received applications for insurance, and forwarded them to Freeport, Ill., where the policies were made out and sent directly to the applicants. The company became insolvent, and the assignee sought to enforce the payment of premium notes, which was resisted on the ground that the company had not complied with the law, and had no right to do business in the State of Indiana. The court held that the contract was an Illinois contract, to which the laws of Indiana did not apply, and, being valid in the place where it was made, was enforceable like any other by the comity of States. The case has been carried to the Supreme Court of the United States, and there are several hundred suits in the State depending on the final decision.

IOWA. The leading interest of the State of Iowa is agriculture. The crops of the past year have shown a general falling off from the product of 1875. The area planted with corn was about 4,285,000 acres, and the product thirty-five bushels to the acre, or 150,000,000 in all. The price at Des Moines in December was forty cents per bushel. The area sown with wheat was 2,894,954 acres, against 3,244,954 in 1875, and the product was 17,369,724 bushels, a decrease of over 25,000,000 bushels. Grasshoppers and other insects, and un-

favorable climatic influences, caused very heavy losses to this crop. There was also a short crop of oats, owing to rust and a wet season. The product was about twenty bushels per acre from 1,000,000 acres. The rye-crop was injured by bad weather, and reached the aggregate of 360,000 bushels, or about 70,000 less than in 1875. The yield of barley decreased twelve per cent. About 90,000 acres were planted with potatoes, and the yield was 8,000,000 bushels. The hay-crop amounted to 1,500,000 tons.

SEAL OF THE STATE OF IOWA.

The sixteenth General Assembly of Iowa began its session at Des Moines on the 10th of January, and continued it fully sixty-seven days. On the second day Samuel J. Kirkwood was inaugurated Governor of the State, and a few days later was chosen United States Senator for the term of six years, beginning March 4, 1877. Mr. Kirkwood was born in Harford County, Md., in 1815, and attended school in Washington, D. C., in his youth. From the age of fourteen to twenty-one he was an apothecary's clerk, but on coming of age emigrated to Richmond County, Ohio, where he studied law, and attained considerable success in its practice. He was a delegate to the Constitutional Convention of Ohio in 1851, and a member of its Committee on the Judiciary. In 1852 he went to Iowa, and settled in Johnson County, where he engaged in the business of farming and milling. He was elected to the State Senate in 1856, and in 1859 was chosen Governor of the State as the candidate of the Republican party. He held the office four years, and became known as the "War Governor" of Iowa. In raising and equipping forty-eight regiments for the Union service, he managed so prudently and efficiently that a debt of only \$300,000 was incurred. In 1866 he was chosen to the United States Senate, to fill an unexpired term, but two years later was defeated as a candidate for the full term, ex-Governor Harlan being chosen. Latterly he has lived at Iowa City, actively engaged in private business. He was elected Governor in 1875 for the third time.

There was little legislation of importance during the session, and the subjects which occupied the largest share of attention were finally left where they were found. Vigorous efforts were made to secure a repeal of the railroad law of 1874. Its opponents maintained that it was crippling the railroads of the State and damaging the material interests of the people, and declared that it had already forced several companies into bankruptcy. On the other hand, it was shown that the gross receipts of railroads had increased under the law, and that new lines had been constructed, and it was contended that the bankruptcy of certain companies had been due to bad management, and would have occurred if the law had not existed. Two different bills were introduced, making important modifications in the law, but after protracted discussion they were both defeated. The only action taken in reference to the matter was the passage of an "amnesty act," in favor of companies which should file a bond to comply with the law in future. With regard to the working of the present law and the advisability of repealing it, a majority of the Senate committee, to which the matter was referred, reported as follows:

We have examined into the workings of said law as far as it has been complied with, and are satisfied our people have been benefited by it, the interest of the State advanced, and can find many reasons why said law should be retained upon our statute-books.

While some of the railroads have complied with the law, others have refused to obey it and are fighting it step by step through the courts to the highest judicial tribunal in the land; the courts below have affirmed the constitutionality of its provisions and we anticipate a similar decision from the United States Supreme Court. This we regard as one great point gained in favor of the law. We find the law has reduced rates largely; has wiped out the unjust discriminations and extortions that existed throughout the State prior to its passage; it has opened up markets within the State for our products, facilitated the interchange of commodities at home, fostered the building up of manufactories at different points, aided the development of our agricultural resources, and is operating largely in favor of Iowa and Iowa people. Not a petition for repeal from our constituents has reached us, and we believe our people are content with the law and desire to have it thoroughly tested.

The railroads of the State claim that the law reduced their rates on freight largely, but, as far as your committee is aware, do not ask amendments; they desire the unconditional repeal of the law as far as freight rates are concerned, opposing any and all legislation, and asking to be "let alone" unrestricted.

If the railroads desire amendments made to the law now in force, removing restrictions that should not exist, or in regard to rights which they claim have been infringed upon by past legislation, they are respectfully requested to make known to your committee their grievances, in order that justice may be done and wrongs remedied.

A bill to repeal the act abolishing capital punishment passed the House, but was defeated in the Senate by one vote. The amendment of the constitution proposed by the previous Legislature, striking the word "male"

from the suffrage clause, was adopted by the House, but defeated in the Senate by a close vote. One of the circuit judges having decided that women were not eligible as county superintendents of schools, an act drafted by the Superintendent of Public Instruction, making them eligible to all offices connected with public schools and legalizing their past acts in such capacity, was promptly passed by both Houses with very slight opposition. Another subject which occupied considerable attention, but upon which nothing was done, was that of regulating the sale of intoxicating liquors. Attempts were made on the one hand to bring beer and wine under the operation of the prohibitory law, and to have dram-shops made public nuisances, and on the other to have the principle of local option engrafted upon the existing law. The former failed in the Senate and the latter in the House. A report of a minority of the committee on the suppression of intemperance favored the passage of a license law for the following reasons:

1. Because the present Maine liquor law has failed to accomplish the end for which it was enacted, and this conclusion is found in the fact that liquor is sold in nearly every village, town, and city in the State, and in the further fact that the records of our courts show that intemperance, and consequently crime, has increased rather than diminished.

2. Because secret drinking is encouraged by it, and this is the worst of drinking. It converts drug-stores into dram-shops, and makes otherwise good and respectable men hypocrites, sneaks, and liars, in the purchase of liquors.

3. It cripples the power of the State to suppress nuisances and to check intemperance by paying a premium for black-mailing and placing the dealers who are desirous of keeping orderly houses at the mercy of drunken rowdies and infamous scoundrels.

4. Because it induces men to be dishonest by encouraging lying and false swearing, and engenders bad faith among the people by making debts for the sale of liquors uncollectable, thereby giving a license to swindlers.

5. Because it encourages bad and irresponsible men to engage in the traffic of liquor, and tends to drive out of the business men who would keep orderly houses and who would, if not subjected to black-mailing spies, themselves aid in the suppression of intemperance.

6. Because it presents the strange anomaly in legislation of taxation without protection, and because of the further anomaly of holding the dealer responsible instead of the real offender.

7. It makes a farce of our laws by its unjust, unwise, and impracticable provisions.

8. Because it checks the growth and prosperity of our State by discouraging immigration, by discouraging the establishing of distilleries, and sending from our State millions of dollars annually for the purchase of liquors, which are consumed herein, by taking from the State a large revenue which would be derived from licenses, and thereby lighten the burden of taxation.

9. Because it is in contravention to the provisions of the Constitution and the spirit of legislation, which guarantees to every citizen freedom and protection with taxation.

The question of a national financial policy was discussed in both branches. The following resolutions were adopted in the House by a vote of 57 to 27:

Resolved, That gold is the recognized standard value and medium of exchange of the world.

Resolved, The no value is a law unto itself as to a standard of value unless it does business outside of its own boundaries and thus proscribes itself from business intercourse with the rest of the world.

Resolved, That we favor a uniform currency with gold, hence we favor wise, steady, and continuous steps toward the resumption of specie payments in order that the proper currency of our country may be made as good as gold as soon as it can wisely be done, thus placing our paper circulation on a par in this country with the recognized money of the world, and thereby supplying our people with a more convenient circulating medium than gold, which shall be at the same time its equivalent value.

Resolved, That whenever it shall appear that the act of 1875, known as the "resumption act," shall become subversive of the interests of the people, we demand its repeal, or such modification thereof as will avert any portending harm to the interests of the people, and accomplish the purposes thus desired.

A resolution in favor of the immediate repeal of the resumption act was indefinitely postponed in the Senate by a vote of 31 to 13.

The Democrats of the State held a convention at Des Moines on the 17th of May, for the purpose of choosing delegates to the National Convention of the party. No other business was transacted, but the following platform was adopted:

The Democracy of Iowa in convention assembled, while pledging earnest support to the declaration of principles that will be given to the country by the St. Louis Convention, declare as follows their views upon some of the vital questions now before the republic for discussion and adjustment:

That in view of the weakness of its administration of justice, and the corruption which reeks in every part of the public service, disgracing us at home and degrading us abroad, there is given evidence of the unfitness of the party in power longer to bear the responsibilities of government.

Resolved, That we demand and will enforce honesty and reform in the government, and demand of our National Convention such unmistakably earnest pledges of uprightness and decency in the administration of the country as shall command the confidence of its purest and most patriotic men, and the selection of standard-bearers whose lives, private and official, are a guarantee to the country of their ability to carry forward the great work of retrenchment and reform made immediately necessary by the corruptions and crimes of the Republican party.

Resolved, That inasmuch as gold is the recognized standard of values throughout the world, and furnishes the basis for general trade and commerce, we favor an early return to specie payment, because it will place the business interests of this country on a sure and satisfactory basis, and secure us from the uncertainties attending the existence of two moneyed mediums of unequal values; at the same time we believe that a forced and sudden resumption of specie payment, such as is contemplated by the so-called "Sherman resumption act of 1875," will cause wide-spread disaster and ruin to our business interests, has had and is now having a blighting effect upon all industry, and, being one of the many financial blunders of the Republican party, should be at once repealed.

The Republican State Convention was held at Des Moines on the 31st of May, and not only appointed delegates to the National Convention, but nominated candidates for presidential electors and State officers. There was no Gov-

error or Lieutenant-Governor to be elected, and the State ticket agreed upon was as follows: For Secretary of State, Josiah T. Young, of Monroe; Auditor of State, Buren R. Sherman, of Benton; Treasurer of State, George W. Bemis, of Buchanan; Register of State Land-Office, David Secor, of Winnebago; Attorney-General, John F. McJunkin, of Washington; Judges of Supreme Court, William H. SeEVERS, of Mahaska, and James H. Rothrock, of Cedar; Superintendent of Public Instruction, Carl W. von Coelln. The candidates for Judges of the Supreme Court were already on the bench, having been appointed by Governor Kirkwood in February to the vacancies caused respectively by the resignation of Chief-Justice Cole, and the increase of the number of Judges. The following platform was adopted:

The Republicans of Iowa, in convention assembled, hereby declare the following platform of principles:

1. We are for maintaining the unity of the nation sacred and inviolate, for the just and equal rights of all men, for peace, harmony, and brotherhood throughout the nation; for men of unsullied honesty and purity of character for public trusts, and for the swift pursuit and unsparring punishment of all dishonest officials, high or low.

2. That we are in favor of, and that we demand, rigid economy in the administration of government affairs, both State and national.

3. That we favor the early attainment of a currency convertible with coin, and therefore advocate the gradual resumption of specie payment by continuous and steady steps in that direction.

4. That we demand that all railway and other corporations shall be held in fair and just subjection to the law-making power.

5. That we stand by free education, our public-school system, the taxation of all for its support, and no diversion of the school-fund from the public schools.

6. That we cordially invite immigration from all civilized countries, guaranteeing to the immigrant the same political privileges and social and religious freedom we ourselves enjoy, and favoring a free and unsectarian system of common schools for their children with ours.

7. That the Democratic party now, as during the perilous years that tried men's souls, while the Union was struggling with the serpent of secession, yet acknowledges the old-time hateful and fateful traditions that have constrained it to signalize the restoration of the Democratic party to power in the Lower House of Congress by the election of an officer of ex-Confederates, whose motto is "Union soldiers to the rear, Confederates to the front;" that during the six months past that party in the House has demonstrated its hostility to the best sentiments of the people of the Union, no less than its traditional affection for the adherents of the cause that was overcome at Appomattox; that it has been both false and imbecile in its management of the affairs committed to its charge, and has forfeited whatever of popular confidence may have been reposed on it by the accident of party mutations.

8. That in James G. Blaine we recognize a pure Republican and patriot, and one well worthy to be chosen as the standard-bearer of the national Republican party in the coming campaign.

The Democrats made their nominations at a convention held at Des Moines on the 30th of August. The following were the candidates

TRUSS BRIDGE OVER THE MISSISSIPPI BETWEEN DAVENPORT (IOWA) AND ROCK ISLAND (ILLINOIS).

for State officers: Secretary of State, John H. Stubenrauch, of Marion County; Auditor, William Groneweg, of Pottawattomie; Treasurer, Wesley Jones, of Burlington; Register of Land-Office, N. C. Ridenour, of Page; Attorney-General, J. C. Cook, of Jasper; Judges of the Supreme Court, Walter I. Hayes, of Scott, and William Graham, of Dubuque. No candidate was named for Superintendent of Public Instruction, but it was left to the State Central Committee to fill the vacancy

on the ticket. The following resolutions were adopted:

Resolved, by the Liberal Democratic party of the State of Iowa in convention assembled, That we adopt as our platform of principles the resolutions and declarations of the National Convention at St. Louis, and earnestly approve the sentiments of the eminent statesmen of the party, Hon. Samuel J. Tilden and Thomas A. Hendricks, so ably presented in their letters of acceptance of their nomination at said convention.

Resolved, That the Democracy of Iowa, appreci-

ating the necessity for retrenchment that has been forced upon the country by extravagant Republican administrations, an important policy of which has been to steadily increase the salaries of public officers, are earnestly in favor of such a reduction in the salaries of all officers within the State as will fairly correspond with the financial condition of our people.

The election took place on the 7th of November, and resulted in the success of the Republican ticket. The total vote cast for Secretary of State was 284,286, of which J. T. Young received 172,171, and J. H. Stubenrauch 112,115; majority for the former, 60,056. The total vote cast for members of Congress throughout the State was 292,429, of which 168,289 were received by Republican candidates, 118,356 by Democrats, 5,466 by Greenback candidates, and 818 were scattering. Republicans were elected in all the nine districts. The total vote for presidential electors was 292,453; of these 171,327 were for the Hayes and Wheeler ticket, 112,099 for Tilden and Hendricks, 9,001 for Cooper and Cary, and 26 for the Anti-Secret Society candidates. The plurality of Hayes over Tilden was 59,228, majority over all 50,201.

A decision was rendered by the Supreme Court of the State in December, declaring women to be eligible to the office of county superintendent of schools. A woman had received a majority of the votes in Warren County; but the opposing candidate, a man, had contested the election on the ground of ineligibility. The Circuit Court of the county decided in favor of the contestant, and, the case being taken to the Supreme Court on appeal, the judgment was reversed. This decision was based on the absence of any prohibition in the constitution, and the passage of the following act by the last Legislature:

SECTION 1. No person shall be deemed ineligible by reason of sex to any school-office in the State of Iowa.

SEC. 2. No person who may have been or shall be elected or appointed to the office of county superintendent of common schools or school director in the State of Iowa shall be deprived of office by reason of sex.

The court said:

If the law be constitutional, the defendant is now eligible to hold said office whether she was so when elected or not.

The General Assembly cannot make good retroactively acts which it had previously no power to permit, but may do so in cases where the power to so do previously existed. (Cooley on Constitutional Limitations, 381.)

There being no constitutional prohibition, the General Assembly could have conferred the right on woman to hold offices of this character, and consequently by a retrospective law confirm or make good an election by the people which was held in the absence of a positive law authorizing it. In other words, a retrospective law may cure or legalize any act which the General Assembly could, as an original question, have authorized.

An Industrial Exposition was held at Des Moines, opening on the 5th of October, and continuing nearly two months. The associa-

tion by which it was managed was formed in September, 1875. A building 132 feet square, three stories high, and surmounted by a dome 140 feet high, was erected at a cost of \$75,000. The exhibition was quite successful, and included products of agricultural and mechanical industry, works of art, and objects of curiosity and value. It was intended to present as completely as practicable a view of the resources and industrial achievements of the State.

On the night of the 4th of July a terrific storm of wind and rain prevailed over several counties of the State, destroying a large number of buildings, damaging crops, and causing considerable loss of life. The little village of Rockdale, built in a ravine about two miles from Dubuque, and having about fifty inhabitants, was entirely swept away, and more than forty of the people were drowned. There were several lives lost in Madison and Warren Counties. The damage to property in the latter was estimated at \$300,000. Houses and barns were destroyed, large fields of corn ruined, and orchards and timber-land injured. The exact loss to life and property was not ascertained.

ITALY, a kingdom of Southern Europe. King, Victor Emanuel II., born March 14, 1820; succeeded to the throne of Sardinia, on the abdication of his father, March 23, 1849; proclaimed King of Italy by vote of an Italian Parliament, March 17, 1861; married, April 12, 1842, to the Archduchess Adelaide of Austria; widower January 20, 1855; married again, in morganatic marriage, to Rosina, Countess of Miraflore.—Children of the King: 1. Heir-apparent, Humbert, Prince of Piedmont, born March 14, 1844; married, April 22, 1868, to Princess Margaretta of Genoa; offspring of the union is a son, Victor Emanuel, Prince of Naples, born November 11, 1869. 2. Amadeo, Duke of Aosta, born May 30, 1845; King of Spain from December 4, 1870, to February 11, 1873; married, May 30, 1867, to Princess Maria della Cisterna, died in 1876; offspring of the union, three sons: Emanuel, Duke of Apulia, born 1869; Victor, Duke of Turin, born 1870; Louis, born 1873. 3. Clotilde, born 1843, wife of Prince Napoleon Bonaparte. 4. Maria Pia, born 1847, wife of King Luiz of Portugal.

A new ministry was formed in 1876, composed of the following members: A. Depretis, President of the Council of Ministers and Minister of Finances; Baron J. Nicotera, Minister of the Interior; L. A. Melegari, Minister of Foreign Affairs; P. S. Mancini, Minister of Justice and Worship; Lieutenant-General L. Mezzacapo, Minister of War; B. Brin, Minister of the Navy; M. Coppino, Minister of Public Instruction; J. Zanardelli, Minister of Public Works; S. Majorana-Calatabiano, Minister of Agriculture and Commerce.

The following table gives the area* of the

* By sentence of a court of arbitration, May 17, 1875, six square miles formerly belonging to the Swiss canton of Ticino were added to Piedmont.

	Receipts, 1875.	Expenditures, 1875.	Debt at the Expiration of 1875.
	Lira.	Lira.	Lira.
Communities	881,981,218	838,287,495	585,109,778
Provinces	83,223,095	87,983,689	54,401,890

The strength of the Italian army, on July 1, 1875, was as follows:

MEN.	Officers.	Under Arms (Peace Footing).	Men on Furlough.	Total (War Footing).
Standing army	13,694	204,255	905,171	409,426
Reserve	1,016	14,786	166,409	181,190
Provincial militia	2,610	277,265	277,265
Officers of the reserve	1,516
Total	18,836	219,041	648,845	867,856

The navy consisted, on September 1, 1875, of the following classes of vessels:

NAVY.	Vessels.	Guns.	Tons.	Horse-power.

Total	118,446	12,653,830	117,015	11,976,143

The organization called the Italian National Church is a body which has taken its rise from the action of the clergy who have been dissatisfied with the action of the Roman Curia, and have cultivated the national ideas. It originated in Naples, in the *Società Emancipatrice, e di Mutuo Soccorso, del Sacerdozio Italiano*, which was founded in 1862. It has for its organ the *Emancipatore Cattolico*, a journal published at Naples. Recently the organization has been reconstituted for all Italy. Canonico Trabucco had been chosen to be its

bishop, but he died before he was consecrated Luigi Prota-Giurleo has since been chosen bishop, at a general election at which 10,250 votes were cast. Of these, 1,657 votes were cast at Naples, 904 at Trani, 392 at Rome, 276 at Sorrento, 130 at Messina, 126 at Reggio, 63 at Syracuse, and the remainder at other places.

The sessions of the Italian Parliament were opened January 6th by King Victor Emanuel with an address, in which he referred to the negotiations which had been undertaken by the Government for the purchase of the peninsular railroads; to the generally prosperous condition of the country; to the progress and efficiency of the army and navy, of which he spoke with pride; to the existence of friendly relations with foreign states; to the recent visits of the Emperors of Germany and Austria; and to the condition of affairs in the East. On the last subject he said: "I have deemed it expedient to participate in the negotiations between the great powers, with the object of aiding in the reestablishment of tranquillity in the East, and assuring the welfare of the Christian population. The Sultan received the proposals favorably." Signor Biancheri was elected President of the Chamber of Deputies, defeating Signor Depretis, the candidate of the Left. On the 16th of March Signor Minghetti presented the financial statement of the Government, showing that the deficit in 1875 had been only 28,000,000 lire, and that the estimates promised a surplus for 1876 of 10,000,000, and for 1877 of 15,000,000. This showing of brilliant results in financial management could not, however, save the administration from the assault which had been planned upon it by the Opposition. A coalition had been formed by the Tuscans, the Centre, and the Left, under the lead of Peruzzi, for the overthrow of the cabinet, and it brought its forces into play March 18th, during a discussion upon the grist-tax. Signor Morana had offered a motion unfavorable to the Government, to which Minister-President Minghetti said that, if the ministry had to retire from office, it would, in doing so, leave the country tranquil, in excellent relations with foreign powers, and with its finances restored. He moved that the question be adjourned. This motion was lost by a vote of 181 to 242. At the next sitting of the Chambers, March 20th, Signor Minghetti announced that the ministry had resigned. It was generally considered that the question of the grist-tax was only nominally the occasion of the fall of the Minghetti ministry, as the coalition against them was really based upon opposition to their scheme for the purchase of the railways. A new ministry was formed, with Signor Depretis at its head. It was selected from the Radical and Progressive party, and was composed of members five of whom were from the northern districts and four from the southern districts, while the centre of the country was not represented in

it. Signor Depretis, Minister-President and Minister of Finance, had held the financial portfolio under Ricasoli, and had been a member of Parliament steadily since 1848. Signor Coppino, Minister of Public Instruction, held the same office under Ratazzi in 1867. Signor Mancini, Minister of Justice, was one of the most distinguished Italian advocates. Signor Melegari, Minister of Foreign Affairs, had been long in the service of the Government. He was in his youth an intimate friend of Mazzini, and had been Ratazzi's collaborator on several occasions. Signor Mezzacapo, Minister of War, came to office from the command of the army corps at Florence. Signor Majorana, Minister of Agriculture, was Professor of Political Economy in the University of Catania. Signor Brin, Minister of the Marine, had been director of naval construction for several years.

Signor Nicotera, Minister of the Interior, was one of the defenders of Rome in 1849. When he first entered Parliament, in 1860, he expressed the most extreme radicalism in his views; since then his political principles had been much modified, and he was regarded at the time of his appointment as a sincere supporter of the constitutional monarchy. Signor Zanardelli, Minister of Public Works, was a distinguished advocate, was attached to the extreme parliamentary Left, and was the only member of the new cabinet holding with that wing. The programme of the new ministry was announced by Signor Depretis to the Chambers, March 29th. It promised a reform of the electoral laws, so as to give real freedom; the restoration of the independence of the magistracy; the codification of the laws; a bill to establish compulsory education; and on com-

ALESSANDRIA.

mercial questions a policy favorable to free trade. With respect to the Church, the Government would be neither aggressive nor hostile, but would "hold aloof from any idea of conciliation." The foreign policy of the preceding ministry would be continued, and no change was proposed with regard to the army and navy. Measures would be introduced relative to the railway convention, aiming at the separation of the Italian and Austrian systems, and the purchase of the Upper Italian lines. The cabinet, however, were opposed to the working of the railways by the Government, except temporarily. The great improvement in the financial condition of the country was admitted, but the forced currency, it was suggested, still existed, and presented a danger upon the removal of which the ministry would concentrate its attention. At the last sitting

of the Chamber of Deputies previous to its recess, Signor Biancheri, the president, offered his resignation. The ministers stated that they had full confidence in the president, and hoped that his resignation would not be accepted. The Chamber unanimously refused to accept it. March 29th the Chamber adjourned till the 25th of April, in order to enable the new ministry to examine the bills which had been introduced by their predecessors.

On the appointment of the new ministry, the prefects of several cities, including those of Rome, Milan, Turin, Palermo, and Naples, resigned their offices, because they objected to serving under the party of the Left. All the members of the ministry were reelected to the Chamber of Deputies from their respective constituencies, without receiving serious oppo-

sition. Signori Depretis and Nicotera issued circulars to their local subordinates, recommending vigorous firmness in the application of the laws relating to the collection of taxes. On the resumption of the sittings of the Chambers, April 25th, attention was directed to the consideration of the negotiations relative to the railroads. The ministry announced that they would adhere to the principle that the state must not undertake the management of the whole network of the Italian railways. The committee chosen by the Chamber to take charge of the subject showed a majority of only two out of nine members in favor of the plans of the Government. It was decided that the plans concerning the Upper Italian roads should be treated separately from those relating to the Roman and southern roads. A commission, with Signor Cossenti at its head, was appointed to go to Paris and Vienna and negotiate with the house of Rothschild for a reduction in the price which had been agreed upon at Basel for the purchase of the railways. It

succeeded in obtaining a very large reduction, and also arranged that the Austrian southern road should continue the management of the Italian lines for two years longer. On the 17th of June the proposition which had been introduced by the former ministry for the purchase of the railways was withdrawn, and in its stead was substituted a new one, combining certain features of the contracts which had been made at Vienna with the one which had been made at Paris by the Cossenti commission with Baron Rothschild as the representative of the Austrian southern road. This bill, having been first opposed in detail, was adopted as a whole in the Chamber of Deputies, by a vote of 344 to 35. It was likewise adopted in the Senate, June 29th, by a vote of 113 to 5.

The next important measure discussed was the one for the establishment of so-called free ports, or of a system of bonded warehouses, at a number of the principal ports of the country. It was advocated by Signor Depretis in the Senate, as involving a portion of the

CAMPAGNA OF ROME.

ministerial programme to such an extent that, if it were rejected, the Government would have to consult as to the course they should pursue. In the vote in the Senate concerning this bill, a very singular complication occurred. On the first division the yeas and nays were equal, and the question was pronounced decided in the negative. An irregularity was, however, discovered in the balloting, and the validity of the vote was disputed. Another vote was taken, and there was again a tie. On the third vote, a majority of one was given for the yeas, but before the vote was declared another senator came in and recorded his vote in the negative, causing a tie for the third time. The bill was passed, July 26th, by a vote of 114 to 102, and became a law.

In August some of the ministers visited their parliamentary constituencies, and spoke concerning the policy of the Government. At Catania, Signor Majorana, Minister of Agriculture, said the ministry were considering the

way in which martial law could be soonest discontinued; the question of the tax on spir-its would receive a speedy solution. Free principles would be guarded in the conclusion of the trade treaties. At Caserta, Signor Nicotera, Minister of the Interior, said that the ministry would carry out the reforms to which it was pledged, with the help of those who loved their fatherland, and could stand above parties. The country needed financial and administrative, rather than political, reforms. The election law needed a few alterations in respect to the registry, but universal suffrage would, in his opinion, be dangerous to freedom. In conclusion, he said: "Whoever loves Italian unity must also love the monarchy; one could hardly find in history a ruler who was a more steady friend of freedom than Victor Emanuel." Signor Depretis spoke at a banquet given to him, repelling a charge that the ministry entertained a purpose to form a party for themselves. He excused the changes which had been made in local officers, and

mentioned as objects to be considered at the next session of the Parliament the regulation of the financial laws, judicial bills, railroad enterprises, and the trade conventions.

The Chamber of Deputies was dissolved October 7th. The members of both parties entered actively into the canvass for the new elections which were appointed to be held early in November. The ministerial members repeated the declarations of the principles which had been announced by the ministry in their official record and their addresses. Signor Sella, late Minister of Finance, and leader of the Conservative Opposition, in a speech which he made at a banquet at Cossato, dwelt upon the services which had been rendered to the country by his party, and described the progress which had been made by Italy during recent years. Since September 20, 1870, he believed there had been no longer any danger in the Left attaining to power, and he pointed out that since that party had come into office it had greatly moderated its line of conduct. He considered that the Moderate party ought to remain in opposition, watchful over the preservation of the great results that had been achieved. If, at the approaching general election, he should be again returned to Parliament, he would support all real reforms, without being influenced by the spirit of party, but would at the same time oppose any change which he regarded as dangerous to the institutions of the country. He coincided with the views of Signor Depretis respecting the renewal of the treaties of commerce, and the avoidance of protectionist principles. In the matter of the papal guarantees, he was opposed to the Government abandoning the right of exequatur and the appointment to benefices. He urged that the construction of new railways should be made dependent upon the balancing of the budget, and spoke in favor of measures for educating and improving the condition of the masses. Signor Minghetti, late Minister-President, also assured his hearers at Legnano that he would support the reforms of the present Government. The elections resulted in a grand victory for the Progressive or Ministerial party, who returned 421 deputies, to 87 returned for the Conservatives, and found themselves in possession of the largest working majority ever known. The new Parliament was opened November 20th, with a speech from the King. The address began with a reference to the improved financial condition of the country, and the now visible prospect of reaching a state of financial equilibrium. The desirability of modifying and more equitably distributing the imports was spoken of, as well as the necessity of keeping up the strength of the army and navy, and continuing the railroad enterprises which had been undertaken. The perfectly amicable relations maintained with all foreign states justified the hint that those counsels of moderation would prevail in which the Government

had given most efficacious concurrence. Further, the King said: "Faithful to all the undertakings she has assumed, Italy will never forget that in taking her place among the great powers she has accepted a mission of progress and civilization." Penal and commercial codes were spoken of as to be presented, which would "crown the great work of legislative unification." One problem was to be faced, hitherto unattempted. "The liberty conceded to the Church in our kingdom," said the King, "is far greater than it enjoys in any other Catholic country; but it cannot be applied in a manner to offend against public liberty, or to infringe on national sovereignty." The Government would present for examination provisions which were necessary to give efficacy to the reservations and the conditions indicated in the law which sanctioned the ecclesiastical franchises. Other subjects mentioned in the speech, on which propositions would be presented, were the revision of the commercial treaties, the working of the railways, maritime postal communications, the restoration of the navy, the completion of the organization of the army, the construction of defensive works, the extension of the electoral franchise, the completed organization of public schools, and the maintenance of the obligation of military education. The ministry soon after the opening of Parliament presented several bills, among which were the provisional budget for 1877, a new penal code, new regulations concerning the responsibilities of officers, and propositions relating to the privileges of curates in the exercise of their office. On the 19th of December the House of Deputies approved the estimates for the War Department for 1877, which called for the amount of 212,500,000 lire. The committee charged with the revision of the penal code unanimously voted in favor of the abolition of capital punishment. December 22d the Chamber was prorogued till the 21st of January.

The Italian Government participated in all the conferences held by the great powers during the year on the Eastern question. Its policy has been steadily and moderately anti-Turkish. It was one of the first among the great powers to give its support to the so-called Andrassy note. In the latter part of August the Government withdrew the greater part of its fleet from the Eastern Mediterranean, leaving only a few station-ships in those waters. Shortly after this the public interest in the condition of the Christian subjects of Turkey rose to a high pitch, and indignation over the outrages alleged to have been committed by the Turks found expression in large and enthusiastic public meetings. At one of these meetings held at Naples, about the middle of September, the following dispatch was adopted, to be sent to Mr. Gladstone, of England: "The citizens of Naples, assembled to manifest their sentiments in favor of the Christian populations of Turkey, remember

the efficacious aid obtained through the words and works of Mr. Gladstone against the tyranny of the Bourbons, and send him their grateful thanks for the faithful manner in which he represented Italian public opinion at the Blackheath meeting." On the 2d of October an interview was held at Turin between the King, with members of the cabinet, and an envoy from Vienna, with reference to a proposition which was said to have been made by Russia for that country, Germany, and Italy, to form a combination against the Turkish Empire. Austria and England wished to dissuade Italy from such a step. Signor Melegari is said to have expressed himself as averse to Italy's compromising herself with any power, and to have proposed an alliance of all the great powers to induce the contending parties to lay down their arms, after which a congress should be held to establish the political au-

tonomy of Bosnia, the Herzegovina, and Bulgaria. About the middle of October, Signor Depretis, in a speech at Stradella, made the following expression on the foreign policy of Italy: "Nobody can wish me to launch into the very grave questions which now hold civilization in anxious suspense; but nobody can ignore the recent proofs that the mercy, the justice, the irrepressible indignation of the human conscience against barbarian outrages can impose themselves, like a moral law and a moral necessity, even on the traditions of diplomatists, and on the coldest calculations of self-centred politicians." Early in December the British plenipotentiary, the Marquis of Salisbury, stopped at Rome on his way to Constantinople, and held conferences with the Minister of Foreign Affairs, the King, and the crown-prince. Of these conferences it is reported only that Signor Melegari, the Minister of Foreign Affairs, said that Italy desired to remain at peace with all the powers, especially with England, and to see a military occupation of Turkish territory avoided as long as it was possible. On the 18th of December Signori Miceli and Petrucci in the Chamber of Deputies asked the Government for information respecting its attitude on the Eastern question. Signor Depretis, Minister-President, replied, assuming that the greatest reserve in expression was for the present necessary, but adding that when the diplomatic documents on the Eastern ques-

tion were published, it would be found that Italy had not been less prudent or less wise than the other powers. He must confine himself now to stating that the Italian Government could not abandon the treaty of Paris, in virtue of which it had taken part with the great powers in all the questions which had been raised, and continued: "The Government

THE MODERN CAPITOL AT ROME.

cannot be unfaithful to the political principles to which it owes its origin; but in the present circumstances our conduct is naturally guided by our need for peace and by our diplomatic relations, while, at the same time, we do not ignore the duties of humanity and civilization, or omit to make every effort to obtain all possible amelioration of the condition of the Christian subjects of Turkey." The minister further expressed his opinion that Italy's mission should be one of conciliation, and he hoped it would lead to a satisfactory result.

On New-Year's-day Garibaldi sent the King as a New-Year's present a fine young goat from Caprera. In return the King sent him a mosaic table, and bronze statuettes of Franklin and Washington. In February the friendship between Garibaldi and the Government was interrupted by reason of some unfavorable action of the Government in reference to his project for the improvement of the Tiber. A speech which Garibaldi afterward made at the dedication of a monument was so violent that the papers which published it were seized. Upon the appointment of the new ministry, however, with whose party Garibaldi is most closely allied in sympathy, he wrote to Signor Depretis, saying that he would, since the King, by calling the Left to power, had given so plain a mark of his regard for constitutional views, no longer entertain scruples about accepting the gift of one hundred thousand lire which had been offered him by the King and the na-

tion; yet he would not use it for his own personal benefit, but with it would cooperate in the works for the improvement of the Tiber.

The relations of the Italian Government with the papal court have continued to be marked by occasional collisions, although the violence of the hostility that once prevailed seems to be gradually subsiding. In January ministerial decrees were issued ordering the examination of the management of benevolent institutions, as well as of seminaries giving instruction in violation of the law. The episcopal seminary at Como was closed in consequence of the refusal of its management to admit a Government inspector. March 16th, the Minister of Public Instruction ordered the Sapienza, or Pontifical University in the Palazzo Altempo at Rome, to be closed, for conferring diplomas contrary to the law. A meeting of the O'Connell League was held at Bologna, February 18th and 19th, at which measures were discussed for securing the freedom of Roman Catholic teaching. A letter was read from the Pope, approving the object. In August a circular was addressed

September, but received so much opposition from the populace that the police, fearing that disturbances might arise, closed its sitting temporarily. In order to carry out the law for closing the cloisters, the Government ordered that all novices found in such institutions should return to their families. In October large numbers of Spanish pilgrims visited Rome. In his reception of the cardinals on Christmas-eve, the Pope spoke of the repressive measures of the Government, which he characterized as unjust, expressed a hope that the past history of the Italian clergy would serve as a guide for their future conduct, recommended union in order to oppose the revolution which endeavored to destroy the Church, and predicted the final triumph of the Church.

Hitherto, foreigners in Italy have been entirely exempt from direct taxation, both on incomes and on buildings. It had been apprehended, however, that they would at some time be called upon to pay a share of municipal taxes. The Municipal Council in Florence, in March, decided that foreigners should be held free even of the town taxes (on family, carriages, and servants), with the exception of those who pursued a trade or profession in the city, or made it their definite residence.

The Medical Academy of Rome, at their meeting in June, discussed the health of that city. Drs. Lanzi and Terrigi read papers embodying the results of minute analyses of air and other sanitary conditions in the central and suburban quarters of the city, and maintaining that Rome during spring and winter ranked with the healthiest of Italian cities, and was not only innocuous, but positively beneficial to invalids. The centre of the city remained healthy in summer and autumn, though the suburban quarters exposed to the Campagna were then decidedly insalubrious. The Roman climate, they said, was steadily improving, as the vineyards were built over and drainage was extended.

The Marquis of Montegazza was detected in February in forging the name of the King as a guarantee to bills of exchange. He made a full confession. Having obtained access to the King's apartments, he had, on coming thence, informed a royal aide-de-camp that he had been instructed to raise money for the King. He produced a written guarantee bearing the King's forged signature, and said that it was necessary to have the signature attested. The aide-de-camp, having seen the marquis coming from the King's apartments, gave the required attestation. The marquis, having been convicted of the forgeries, was sentenced to an imprisonment of eighteen years.

The capture of the Sicilian brigand Sajera, June 24th, confirmed the suspicion which had been long entertained by the Government that the brigands of this island were aided by men of higher rank than themselves. Sajera, who was betrayed by an informer, was seized, sitting at a table, with wines and cigars, in a farm-

MONT CENIS RAILWAY.

by the Minister of the Interior to the prefects, prohibiting religious processions outside of the churches, with an exceptional provision, however, that the prefects might authorize a procession if a request for it was made to them, by the clergy concerned in it, a fortnight beforehand. These measures were opposed by the clergy, and protested against by the Pope. A Roman Catholic Congress met at Bologna in

house near Girgenti, along with five companions, of whom two proved to be the Cavalieri Trainiti, and another the Baronetto Celauro, men mixing in the best society of the island. In the fall Mr. Forster Rose was captured by the brigand Leone, near the railway-station at Lercara. A ransom of 50,000 lire was refused, and Mr. Rose was carried off. The Minister of the Interior sent a peremptory order to the Prefect of Palermo that unless Mr. Rose was restored to his friends, and Leone and his band were taken within eight days, all the officers

of the mounted police throughout that district would be degraded. After eighteen days of captivity, Mr. Rose was released, on payment of 60,000 lire as a ransom.

The richest of the Italian millionaires, the Duke de Galliera, died the last week in November, leaving a fortune estimated at £8,000,000, or \$40,000,000. He had recently made the municipality of Genoa a present of £800,000, or \$4,000,000, for public works, and was contemplating other improvements when he died.

J

JANES, EDMUND STONE, an American clergyman, died in New York, September 18th. He was born in Sheffield, Mass., April 27, 1807. His early life was mostly spent in Salisbury, Conn. From 1824 to 1830 he was employed in teaching, and occupied his leisure in the study of the law, intending to follow that profession; but he entered the ministry of the Methodist Episcopal Church, and in 1830 joined the Philadelphia Conference. From this time he devoted himself to the study of theology, and during the intervals of immediate pastoral labor he also read extensively in medicine. In May, 1840, he was appointed financial secretary of the American Bible Society, and remained in this office until 1844, when he was elected bishop. During the thirty years of his episcopal labors Bishop Janes had been intrusted with some of the most grave and delicate duties connected with the affairs of the Methodist Church, among which may be mentioned his appointment as delegate to the British Wesleyan Conference in 1864, and the supervision and inspection of the Scandinavian, German, and Swiss missions in Europe from 1864 to 1868. In 1865 he visited England as delegate of the American Bible Society to the British and Foreign Bible Society; and he also attended the French Wesleyan Conference at Paris, and the Irish Conference at Cork. At Bremen he delivered before a large meeting an address on the death of President Lincoln, which was widely circulated in Northern Europe, and had an important effect on public sentiment there at a critical period. His residence had long been in New York City.

JAPAN,* an empire in Eastern Asia. The appellation by which the Emperor is generally known in foreign countries is the ancient title of Mikado, or the venerable. Present Mikado, Mutsu Hito, born at Yedo, September 22, 1852; succeeded his father, Komei Tenno, 1867; married December 28, 1868, to Princess Haruko, born April 17, 1850, daughter of Prince Itohidgo. The first child of the Emperor was born in 1873, but died soon after. There is no regular law of succession, and the throne gener-

ally devolves not on the son of the Mikado, but on the eldest or the most distinguished member of the house. It is only necessary that the new Mikado belong to one of the four royal families: Katzura, Arisugawa, Fushimi, or Kannin.

By a treaty concluded with Russia May 7, 1875, Japan ceded to Russia its share of the island of Saghalien, and received in turn the Kurile Islands, heretofore belonging to Russia. The empire now consists of the Japanese Islands, the island of Yezo, the Kuriles, and the Liu-Kiu (Loo-Choo) Islands. The area of the empire is now 157,447.59 square miles, and the population, according to a census begun in 1873 and finished in December, 1875, 83,300,675, an increase over the previous census taken in 1872 of 189,850. Deducting from the total population that of the island of Saghalien, which has since been annexed to Russia (excepting 625, who, in consequence of the annexation, emigrated), the actual population of Japan is 83,299,014. According to a French paper published in Japan, the *Echo du Japon*, the population in 1875 consisted of 31 members of the imperial family, 2,829 Kasoku (noblemen), 1,548,568 Samurai, 848,881 Sotsu Samurai or Samurai of the second rank, 3,380 Djishis or Samurai of the third rank, 207,669 priests, 76,119 former Shinto priests, 9,326 priestesses, 81,106,514 citizens, and 2,358 inhabitants of Saghalien. For administrative purposes, the main portion of the empire, the Japanese Islands, was in 1871 divided into three *fus* (Tokio, Kioto, Ozaka) and seventy-two *kens*. The population of the several *fus* and *kens*, according to the census of 1875, had not yet been published by the end of 1876. According to the preceding census of 1872, the population of the *fus* and *kens* was as follows:

DIVISIONS.		Males.	Females.	Total.
of the Empire	Tokio.....	892,057	887,804	779,861
	Kioto.....	288,898	288,886	567,884
	Ozaka.....	264,791	266,094	550,885
	72 Kens.....	15,709,788	15,228,000	30,942,788
Total Japanese Islands		16,650,084	16,170,884	32,820,868

The government of Japan has been reorganized on a basis somewhat resembling the con-

* See ANNUAL CYCLOPEDIA of 1875 for latest statistics of imports, exports, and movement of shipping.

stitutional monarchies of Europe. The Mikado carries on the administration through the *dai jo kwan*, or supreme executive, consisting of the premier and the "left" and "right" junior prime-ministers; the *sa in*, or left chamber of the Council of State, consisting of seven high councilors; and the *u in*, or right chamber of the Council of State, consisting of all the ministers and vice-ministers who are heads of departments, nine in number. At the head of the local administration of the *fus* and *kens* is a prefect, whose powers and attributes are far more extensive than those of any similar functionaries in Europe. Sentences involving banishment or death can, however, not be carried into execution by them until they have been confirmed by the Minister of Justice.

The budget for the financial year 1875 to 1876, ratified by the Imperial Council December 22, 1875, was as follows (value expressed in yens, 1 yen = \$1):

REVENUE.	
1. Land-tax	51,506,967
2. Alcoholic liquors	1,618,068
3. Post-Office and stamps	1,676,835
4. Customs duties	1,744,887
5. Income-tax	2,376,095
6. Tax on ships, railroad-cars, carriages, hunting, tobacco, etc.	1,080,689
7. Tribute of the Liu-Kiu Islands	50,744
8. Revenue from public works: railroads, telegraphs, mines, silk-manufactures, etc.	1,841,753
9. Mint	675,240
10. From public lands	128,455
11. Tax on public buildings	1,696,454
12. Sale of public property	511,331
13. From sums due to the Government	8,087,728
14. Miscellaneous receipts	401,655
Total	68,568,266
EXPENDITURE.	
1. Public debt	4,345,655
2. Pensions and indemnification of the deposed princes	17,806,866
3. State government	24,922,816
4. Provincial government	4,800,000
5. Police department	1,600,000
6. For the Shinto temples	230,000
7. Ambassadors and consuls	515,000
8. Support of public buildings, canals, etc.	1,870,000
9. For the case of mobilization	5,000,000
10. Miscellaneous receipts	3,420,169
Total	68,498,506

The principal items among the expenditures for the several departments of the state government were as follows:

War	6,960,000
Navy	2,700,000
Public Works	4,750,000
Public Instruction	1,700,000
Justice	1,250,000
Civil list	950,000
Colonization	1,799,716
Interior	2,800,000

The public debt at the close of 1875 was reported to be as follows:

Home debt	39,004,849
Foreign debt	14,480,913
Paper-money	94,808,819
Total	148,298,580

The following countries were in 1876 represented in Japan by diplomatic agents: the

United States of America, Belgium, Denmark, Germany, France, Great Britain, Italy, Netherlands, Austro-Hungary, Peru, Portugal, Russia, Sweden and Norway, Switzerland, Spain.

An imperial edict of December 28, 1872, made liability to military service universal, but, in deference to national traditions and prejudices, numerous reasons for release from military service and ransom were admitted. For an entire ransom the sum of \$270 has to be paid. In 1875 a new law was passed for the reorganization of the army, which will hereafter consist of three parts: 1. The Yobigoon, or standing army, in which every citizen, after attaining the twentieth year, must serve for three years; 2. The Kobigoon, or reserve, in which the soldiers discharged from the standing army serve for four years; 3. Konumin-goon, a Landwehr, united with a kind of national guard. All subjects, from the fourteenth to the fortieth year of age, belong to this class, which, however, is called upon only when an enemy is in the country, and the Kobigoon has been enrolled in the active army. For the present the army contains about 85,380 men, of whom 30,000 belong to the infantry. The empire is divided into six military districts: Tokio, Ozaka, Kiushiu (with the seat in Kumamoto), Nagoya, Hiroshima, and that of the Northeast, with the seat in Shendai. The navy numbered twenty-one vessels, among which were two iron-clad corvettes, with an aggregate of sixty guns. It was manned by 3,873 men, among whom there were 273 officers. The aggregate length of the railroads in operation is 105 kilometres. There are three lines, Tokio & Yokohama, Hiogo & Ozaka, and Ozaka & Kioto. The six lines of electric telegraph have an aggregate length of 2,832 kilometres. The number of post-offices in 1874 was 3,244, and the number of letters forwarded 17,095,842.

The scheme of the present system of education was promulgated in 1872. According to this the empire is divided into eight educational divisions, in each of which there is a university, or *dai gakko*, with thirty-two middle schools, colleges, or gymnasia, and 210 grammar-schools or academies. In all these schools foreign languages and the sciences are to be taught. The vernacular schools will number about 54,000, or about one for every six hundred of the population. According to the latest statistics, there are 30,000 public schools in operation, with nearly 2,000,000 pupils, and 45,000 teachers. There are also seven normal schools, the principal one being in Tokio. The universities and technical schools are under the direct control of the central Government, while the public vernacular schools are under the care of the local or ken authorities. Each of the seventy-two kens has a bureau of inspection, while examiners and supervisors are regularly sent out from Tokio for the express purpose of keeping up and improving the standard of education. In addition to the schools under the department of education (Mom Bu Sho), nearly

every government department has its special and technical schools. In elementary instruction, the Kindergarten system and object-teaching have been successfully introduced. In the middle schools, the studies are wholly in English, or some other elected foreign language, the text-books being those used in America or Europe, while the course of studies common to American high-schools or academies is gone through with. In the *dai gakko*, or university, the full standard of which it is expected to reach in the future, the students are actually carried through the curriculum of the average American college, excepting in Latin and Greek, the place of these being filled by English and Chinese. At present there is but one university in Japan, the Kai Sei Gakko, in Tokio, which has a corps of about twenty American and English instructors. An "Outline History of Japanese Education," prepared by the Japanese Department of Education, was published in New York in 1876.

The Mikado made the following address in connection with the announcement of the new military law :

During our ancient monarchy, when my ancestors solely ruled the empire of Japan, there was no distinction between the army and the citizens; every one was a soldier. This honor ought to be revived. If the middle ages, steeped in despotism, have created a military caste, and separated the army from the population to serve the interests of some, I cannot permit such an abuse of power to exist, and I must employ all my power to destroy it. The feudal system of government, that I have overturned in commencing the era Meiji, has bestowed on the country, during its existence of one thousand years, unjust and arbitrary laws, that it is my duty to progressively abolish. The ancient recruiting for the army is among others one of those laws completely opposed to the feelings of my Government, with the spirit of the age and the modes of European countries, and requires a change of which the detail is contained in the following words: For the future I wish the army to be the entire country. Communicate my wish to the officers of the existing army, to the soldiers, and to the country, for I desire every one to accept my ideas on the subject.

The law is said to have met with general approval.

An embassy, consisting of his Excellency Woozeno Kajionuri, the Japanese minister in London, and two secretaries, visited Spain and Portugal early in the summer, with the object of delivering dispatches from the Emperor of Japan to the Kings of those countries. The dispatches set forth the desire on the part of Japan to cultivate friendly relations with Spain and Portugal, which were considered of special importance in consequence of the proximity to Japan of the colonies of those countries in the East. The embassy was cordially received both at Madrid and Lisbon. At Madrid the minister was nominated Knight of the Grand Cross of the Order of Isabel la Catolica, and received the insignia as the gift of the King. At Lisbon, in his address, the ambassador alluded to the fact that the Portuguese were the first Europeans to visit Japan. His Excel-

lency was here created Knight of the Grand Cross of the Order of the Conception. The countries embraced in this mission had not been visited by the embassy of Iwa-Kura in 1873, as they had not sufficient time to permit their doing so. With the present mission, the formal entry of Japan into diplomatic relations with all the courts of Europe was completed.

The unfriendly attitude which Corea had assumed toward Japan is said to have been induced by the disapproval of the Government of the former country of the new policy of Japan in entering into relations of friendship and intercourse with European countries. An embassy was sent from Japan to Corea to exact satisfaction for the firing upon the Japanese man-of-war *Unyokuan* by Corean soldiers, and settle all the differences between the two countries. It was entirely successful, and concluded a treaty of peace February 27th, which provided for a full restoration of intercourse between the two countries, and which it is hoped may prove the beginning of a change which will eventually open Corea to the world.

JAPANESE BATH.

Much delicacy and firmness were required of the Japanese envoys to gain their end. The fleet with the embassy arrived at Fusan, the old Japanese station in the south of Corea, January 15th, and on the 23d sailed for the mouth of the river on which the capital of Corea, Séoul, is situated. On the 10th of February the envoy and his suite landed in Kokwa, and took up their quarters in the principal town of the island, Kokwa, or Kanfa, under an escort of detachments of sailors and marines from the vessels of the fleet. With very little delay they were visited by two officers appointed to receive them, Ji Shinken and In-jisho, the former of whom was announced as holding the highest rank in Corea. These officers represented that they had full power to treat with their visitors upon all subjects.

After social interchanges in the evening, the subject of a treaty was taken up the next day, February 11th. It was discussed for three days, when the Koreans requested that an interval of ten days be given them, in order that they might refer the subject to the King. This was granted by the Japanese on condition that there should be no further conferences, and at the expiration of the term the treaty should be returned signed and approved by the King. At the expiration of the ten days the Korean officers returned, saying that they were unable to fulfill the conditions to which they had pledged themselves. The Japanese refused to receive the excuses of the Koreans, and declared that nothing but a positive promise to produce the treaty, signed and ratified, should induce them to remain a day longer on the shore. The Koreans showing a disposition to evade these conditions, the Japanese abandoned their quarters and went aboard their ships, leaving only two subordinate officers on the shore in charge of their baggage. The Koreans now entreated the envoys to return, assuring them that no further cause of reasonable complaint should arise. Upon these representations the negotiations were renewed. It was now explained by the Koreans that the main obstacle to a prompt conclusion of the treaty was the requirement by the Japanese that the actual signature of the King of Korea should be affixed to it as a guarantee of fidelity in its execution. This, they protested, was impossible; such a thing had never been done, or even heard of, in Korea: the monarch never attached his name to anything, and to ask him to sign the treaty with his own hand would be an act of temerity they could never venture upon. The Japanese were inflexible. They declared that, if this condition were not complied with, they would go at once, and would not give another opportunity for a renewal of the negotiations. Two days afterward, February 27th, the treaty was brought back to the embassy duly signed and attested by the autograph signature of the King. The embassy started homeward February 28th, and on the 5th of March had an audience with the Mikado, when the treaty was submitted to his Majesty. The treaty consists of twelve articles. It recognizes Korea as an independent country, treating on a footing of complete equality with Japan; declares that this equality shall be steadfastly observed in future transactions between the two countries, and that neither nation shall interfere with the affairs of the other. It provides that within fifteen months from the ratification of the treaty the Japanese Government shall send ambassadors to the capital of Korea to adjust the relations of the two kingdoms to each other; that these ambassadors may remain at the Korean capital as long as they will, or return at their pleasure to Japan; that the Korean Government may likewise send ambassadors to Japan, who shall have the option to remain there, or return home, according to

their pleasure. It abolishes the former payment of an annual tribute from Korea to Japan, and engages the Korean Government to establish trade with the Japanese, and open to them two ports, within about twenty months from the time of making the treaty. At these ports, Japanese subjects shall be permitted to hire houses or land on which to build. It stipulates that any Japanese ship which is delayed on its voyage, or to which any disaster happens on the coast of Korea, may enter a port of that land, to buy needed provisions, or to make necessary repairs; that while the shipmaster is required to pay for all that he takes, the local officers and the inhabitants shall render him and his crew all possible help; and, in case of a shipwreck on either the Japanese or the Korean coast, the shipwrecked persons of either country may demand any assistance and any care, and the local officers of the district shall assure them full hospitality, and be bound to send them back to their country, or hand them over to the nearest officer of their country. Since the Korean waters are very dangerous on account of the numerous islands and rocks with which they abound, the Japanese receive permission by the terms of the treaty to take surveys in the places where they have not been made, and to construct hydrographic charts showing the course of the currents and the depth of the waters, for the better safety of the shipping of both countries. It was also arranged that the Japanese Government may establish consular agents in the opened ports of Korea; that while the access of Japanese to the interior of the Korean country would be permitted to a certain extent, the Japanese Government would see that needless and untimely intrusions were prevented, and would hold travelers in due restraint until unimpeded intercourse should be found practicable; that cases of fraud or neglect to pay debts in which both Japanese and Koreans are involved should be investigated and rectified by officers of the nationality to which the delinquents belong; that crimes committed by Japanese against Korean subjects should be adjudged by officers of their own Government; and that officers should be appointed by the two governments to meet at Kokwa (or Kanfa) within six months to settle the necessary rules and regulations for the control of the commercial transactions between the two countries. A report was current at St. Petersburg in March, shortly after the conclusion of the treaty, that war had broken out between Japan and Korea, but it was without foundation, and promptly received an official contradiction. In the conference between the representatives of the two powers who negotiated the treaty, it was agreed that a Japanese vessel should be furnished to take a Korean embassy to Japan. Accordingly, a steamer sailed for this purpose from Yokohama to the Korean port of Fusan, May 3d. Returning, it brought an embassy of between seventy and eighty persons from Korea to Yokohama. Thence the

embassy were taken to Tokio, where they were received by the imperial court with due ceremony, and excited great interest among the populace. A few weeks afterward the ex-minister, Minamoto, was appointed ambassador to Corea, and went to his mission with a suitable retinue of secretaries and *attachés*.

The provisions of the treaty between Russia and Japan for the exchange of the Kurile Islands, formerly belonging to Russia, for the southern half of Saghalien, formerly belonging to Japan, have been executed, and the territories have been finally transferred. Among the provisions of the treaty were stipulations that the aborigines of the respective territories who did not emigrate, and also Russians remaining in the Kurile Islands and Japanese remaining in Southern Saghalien, should have full rights of property, and should enjoy complete religious liberty, in the respective territories; Japanese, however, were prohibited from remaining permanently in Russian territory, and Russians from remaining permanently in Japanese territory, without changing their nationality; and aborigines were allowed a period of three years to elect the nationality to which they would belong. Under these provisions, at the beginning of April 840 natives of Saghalien had removed to Japanese territory, and 580 inhabitants of the Kurile Islands had gone to Russian territory. On the 1st of July it appeared that Japan had been the gainer to a considerable degree by the exchange of subjects, since nearly all the Russian Ainos of the Kurile Islands had elected to remain in their fishing-villages, while only forty Japanese families had remained in Saghalien. The result was not, however, of any great disadvantage to Russia, as, it being the intention of the Government to make of the Kurile Islands a grand depot for the deportation of offenders against her laws, it was to Russian interest to receive the territory as free as possible from inhabitants and incumbrances.

The Japanese Government has during the year carried into effect a measure for capitalizing and extinguishing the hereditary and life pensions of the *Kadzoker* and *Shidzoker*, or nobles and gentry. The rights which were compromised by this measure arose in 1868, when the Government dispossessed the landed classes of their domains, and assumed the properties, with all the responsibilities attaching to them. For compensation to the former proprietors the Government agreed to pay them one-tenth of their former annual revenues, and relieved them from the duty and responsibility of maintaining those armies of retainers which under the old feudal system had been a very heavy burden upon them. This arrangement was an advantageous one for the daimios, for, although the income afforded them by it was much smaller than they had previously enjoyed, their expenses were reduced by the abolition of their feudal courts and responsibilities in still greater proportion. But the

Government found the obligation of paying out so large a proportion of its revenues for the support of the daimios more than it could conveniently bear, in the embarrassed condition of its finances. The measure for capitalization was enacted for the purpose of extinguishing all of these rights for fixed sums, to be paid within a few years. Under it the incomes to be extinguished are arranged in a regular scale, from the largest down to the smallest, and the number of years' purchase is proportioned inversely to the amount of income to be extinguished. Incomes of 70,000 yens, or dollars, and upward, will be extinguished in five years' purchase; those of from 70,000 yens to 1,000 yens, in from five years' to seven and a half years' purchase; those of from 1,000 yens to 25 yens, in from seven and one-half years' to fourteen years' purchase. Bonds for the total principal—that is, for the yearly income, multiplied by the number of years of purchase—will be given by the Government, and life-

JAPANESE BONZES.

pensions will be added to the hereditary incomes, but amortized in the same manner as they are amortized. Interest will meanwhile be allowed at rates varying from five to seven per cent. per annum, according to the amount of the total sum, the lower rate being applicable to larger sums, and the higher rate to smaller sums. Until permission is given to do so, it is forbidden to mortgage, pledge, or sell these Government obligations. It is estimated that the measure will effect an immediate saving to the country of from 8,000,000 to 10,000,000 yens annually, or about one-sixth of the whole revenue. Of course, the measure was greatly to the financial advantage of the Government, and it was received with great favor by the press and by the people generally. It was, however, a very unprofitable one for

the nobles, who were compelled by it to give up the rights which they had acquired under the contracts for the transfer of their estates for what was of much less value to them. Europeans regarded it in the light of a breach of faith, but admitted the weight of the excuse set up by the Government, that it was a case of necessity, for the country had to be relieved from a burden of taxation far heavier than it was able to bear.

Several insurrections broke out in the latter part of the year, most of which were provoked mainly by opposition of the nobles to the measures for the commutation of their incomes. The most formidable of these was one which took place at Higo, in the island of Kiu-shiu, on the 25th of October. It was led by Mayebara, who had been a prominent and valuable adherent of the imperial cause at the time of the revolution by which the Tycoons were dethroned. He was grieved because he thought the services which he had rendered to the imperial cause had not been sufficiently appreciated and rewarded. He was joined by many whose loyalty had been alienated by the measure of capitalization, and by others who were discontented at the course of the Government in breaking away from the old customs and traditions of the country, and adopting Western ways. The garrison at Kumamoto was surprised, and a large number of the men composing it were killed. At Yamaguchi the number of men in arms against the Government was reported to be as high as three thousand. Several engagements took place in the different kens of the southwest, in some of which the rebels achieved a few temporary successes. The rising was to have been general through many widely-separated kens, but the plans were not well carried out, and the Government was efficient in action, and promptly suppressed it by the 6th of November, and captured Mayebara and other leaders. Mayebara and some of his colleagues were beheaded, others of the leaders were condemned to hard labor, others were deprived of their rank, and many of the rank and file were acquitted.

Laws imposing rather close restrictions on the native press have gone into operation during the year, and have been enforced with many prosecutions, and in some cases with fines and imprisonments. Among the provisions of these laws was one that no foreigner should be permitted to publish a paper in the Japanese language. In accordance with this rule, the British minister, at the demand of the Government, interfered to stop the publication of a Japanese paper by an Englishman. Notwithstanding the inconveniences occasioned by this law, the publication of newspapers has been actively pursued, and the journals have exercised a fair degree of freedom and vigor in expressing the sentiments of their conductors. During the year ending in June, 1876, seventy-six new newspapers and magazines appeared in the empire, of which fifty-five were started at Tokio.

On the 2d of June the Mikado started from the capital on a tour through the northern provinces of the empire, which until recently had been under the rule of the daimios. He was accompanied by several cabinet officers, and a personal suite numbering 136 persons. During the Mikado's absence the business of the state at the capital was left to be managed by the prime-minister Santcho—an event which was unprecedented in Japanese history. The imperial party was accompanied by correspondents of the Japanese papers, who reported that the Mikado was everywhere received by the rural population with profound reverence, and that the people showed no diminution of loyalty, notwithstanding the strange ideas and customs which had been introduced into the capital from abroad. At the villages which the party visited it is said the school-children were drawn up in lines for the Emperor to pass between them, the local authorities believing that they could offer to his Majesty no more agreeable spectacle, and no clearer proof of progress, than an exhibition of their schools. The Mikado was absent on his tour seven weeks, and returned to the capital on the 21st of July.

Shortly before the departure of the Mikado it was resolved in the ministerial council to appropriate from the imperial treasury a quarter of a million dollars for the restoration of the temple of Mondseki, the headquarters of Buddhism, which had been burned down four years before. This act, together with an appropriation which was made for the support of the service in the Buddhist temples, and of the Buddhist priests, was regarded as showing that the Government had given up the plan which it had adopted several years before for repressing the Buddhist religion and elevating the Shinto religion into an exclusive state church.

The Government has adopted Sunday as a holiday, or day of rest, for all persons employed in its offices. Otherwise its attitude toward Christianity and Christians does not seem to have materially changed. It seeks Europeans to fill important civil stations, employs European teachers in its schools, and allows them to introduce Christian usages there; it permits Japanese who have been converted to Christianity to hold office, and continue in office, and apparently attaches no disqualification to them on account of their change of religion; it grants sites and building-materials to the Christian missionaries wishing to establish village schools, and observes in its acts and intercourse a policy quite courteous, if not friendly, toward Christianity. Yet the edicts against Christianity have never been abolished, and the missionaries, as well as all Europeans, are held rigidly to the observance of the conditions under which their presence is allowed, and are not permitted to go beyond the territorial bounds which have been prescribed for them.

Certain aspects of affairs in China, such as the hostile feeling shown by the Chinese tow-

ard all Europeans, especially those of the Anglo-Saxon race, the critical condition of the relations between the Chinese and English Governments, and the unsettled condition of affairs in the western provinces of China, had a prejudicial effect on the foreign commercial interests of Yokohama, as several trading firms there had connections in China. A further increase took place during the summer in the price of goods for export, and a fall in the prices of cotton and Manchester goods, of which large quantities had accumulated at this city. The bankers were also embarrassed by the change in the price of the dollar, and had recourse to speculations as a means of improving their business. Among their speculations was the negotiation of a loan to the Chinese for the equipment of a new army to be sent against the Dunganians and Kashgarians. On the other hand, the rise in the price of silk in Europe proved a source of great advantage to the native trade, and excited an extraordinary activity in the market. At the close of November, 12,200 bales of silk had been exported

during the year, against 1,500 bales exported during the same period in 1875, and 2,200 bales in 1874. The silk was worth at this time \$980, against \$485 in 1875, and \$550 in 1874. The producers, however, failed to realize a part of the benefit of the rise, through the circumstance that they received in payment for their silk Mexican dollars at a rate far above their value in relation to the market price of silver in the Western markets. The culture of silk and preparation of silken goods, sheep-husbandry, and the production of modern fabrics, have received increased attention. A stimulus was given to the trade in rice by the report of famine in Northern China. With a view to increase the production of tea for foreign markets, the Department of Public Works dispatched a commission of schooled young men to Assam, to study the methods of culture practised there. A resolution adopted by the assembly of officers and deputies in 1875 for building highways has been approved by the Government as a law. This will lead to the introduction of vehicles and draft-animals. To

HAKODADI

facilitate this object the Government has decided to establish a stud, and has taken measures to procure draft-horses and stallions from America.

The report of the railroad shows that it was used in 1875 by 1,081,248 persons, a very large use when the short extent of the line open to traffic is considered. A new line of railroad has been opened from Ozaka to Mukomuchi, a place about five miles from Kioto, and five miles more of the line from Mukomuchi to Kioto were under way. The Japanese Post-Office, it is reported, has now 4,500 post-offices under its charge. The money-order system, introduced in 1875, was followed by post-office savings-banks in 1876. One of the features of the Japanese registered letter system is that for an extra rate of six cents a letter will be sent directly to the person for whom it is intended as soon as it arrives at the office to which it is addressed.

The Toksinna coal-mine, near Nagasaki, was

yielding in May an average of 700 tons daily. Decrees have been issued by the Government forbidding swords to be worn by private citizens, and changing the penalty of death formerly inflicted for the robbery of sums of more than \$250, with violence, to one of imprisonment for life with hard labor.

An exhibit of the work of Protestant missionaries in Japan has been made, which shows that in November, 1875, the total number of foreign Protestant missionaries in the empire was eighty-two, and the number of native helpers was thirty-three. Ninety stations were occupied, in which the gospel was preached with an average weekly attendance of 4,000 hearers, of whom 1,020 were baptized converts. Fourteen thousand new cases of disease or disability were treated annually at sixteen medical stations in different parts of the empire. There were reported twenty mission-schools, with more than 500 scholars, of whom forty were students for the ministry; and ten

Sunday-schools, with an average attendance of about sixty pupils each, making in all about 600 scholars. The National Bible Society of Scotland, the British and Foreign Bible Society, the American Bible Society, and the American Baptist Missionary Society, were all engaged in the work of translating and printing the Scriptures. Parts of the Old Testament had been translated, but as yet only select portions, instead of complete books. Many of the Psalms were in use, but there was no translation of them entire. Several thousand copies of the Scriptures in Chinese had been circulated, besides many tracts and other religious publications. A weekly Christian newspaper, in the Japanese character, published by the missionaries of the American Board, had a circulation of 11,000 copies.

The missionaries of the Russo-Greek Church claim that there are 8,000 Orthodox Christians in Japan. They report that their schools for both sexes are increasing in number, alike of schools and of scholars, and that they are attended by heathen as well as Christian children. A lithographic establishment is in operation at Tokio under the charge of Father Nicholas, where small books have been published in language suited to the comprehension of the common people, and preparation has been made for printing other books.

JEWS. The annual convention of the *Board of Delegates of American Israelites* was held in Philadelphia, May 20th. The Hon. P. J. Joachimsen presided. Nineteen congregations and societies were represented. Letters were read from Sir Moses Montefiore, of England, and M. Crémieux, of France, in response to invitations to attend the meeting. The Executive Committee gave, in their report, a brief history of the work of the board. Since its organization, in 1859, it had constituted the medium of communication between the Israelites of the United States and of other countries. Acting harmoniously and in co-operation with the "Alliance Israélite Universelle" and the "Board of Deputies of British Jews," its activity had been exemplified in every movement for the elevation and benefit of the Jews of the Old World. During the past seventeen years the board had pressed measures for the enfranchisement of Jewish people in countries where they were still held in bondage. Kindly messages of brotherhood and sympathy had been conveyed by it to the Israelites of the Danubian Principalities, of Morocco, Persia, and Russia. Through it the help of American Hebrews had been extended to their suffering co-religionists in Palestine, Roumania, Morocco, Tunisia, Persia, Asia Minor, Italy, and the provinces of East Prussia and West Russia. It had been instrumental in modifying the policy of the Swiss Republic as exemplified in the case of a proposed article in a treaty denying to Jews equal rights with other sojourners. It had borne a part in every movement for the rescue of the Hebrew peo-

ple from the results of prejudice abroad; and had even found occasions to protect them in their rights and privileges in the United States, as in the case of proposed measures—national, State, and municipal—the tendency of which might be to make a discrimination against them. "The representative character of the board," said the report, "has been cordially recognized not alone by like organizations among the Israelites of Europe, but uniformly by the Government of the United States, which has never failed to pay respectful attention to the official proceedings and requests of the Executive Committee when occasion demanded correspondence with the President, the departments, or Congress. The appointment of a Jewish chaplain in 1862, at the direct suggestion of the committee, the prompt action upon the obnoxious military order in the same year, the appointment of Mr. Peixotto as consul at Bucharest, the negotiation of the Swiss treaty, the correspondence as to Palestine, Morocco, Roumania, Russia, and other countries, the cordial reception by the Senate and House of Representatives of the memorials submitted by the board at the outset of the agitation for the Christian constitutional amendment, are successive instances of the influential position awarded to the board by the Government."

With the coöperation of the Commissioners of Emigration at New York, the board had been able to provide for hundreds of Jewish immigrants, and promote their gradual absorption into the mass of the American people, while it had actually prevented pauperism. The accounts of the board showed that balances stood on hand, in favor of the general fund, of \$602.46; and in favor of the trust-fund, of \$457.11. The sum of \$250 had been transmitted for the use of the Agricultural School at Jaffa, Palestine; \$100 for the hospital at Jerusalem, \$50 for the hospital at Tiberias, and \$500 had been transmitted to B. F. Peixotto, consul of the United States at Bucharest, toward reimbursing him for outlays for the benefit of the Roumanian Israelites. Two Roumanians had been assisted to return to their homes. An address had been transmitted to Sir Moses Montefiore expressive of the sentiments of American Israelites, a suitable reply to which had been received. The Hebrew Free-School Association was recommended to the cordial and liberal support of the Jewish community. The *American Jewish Publication Society*, organized four years before by the direct action of the board, was represented as prospering. Its publications for the past year had met the approval of scholars, and were exercising a decided influence upon the rising generation. A special report was made upon the condition and needs of the Jews of Palestine. It was computed that there were now in Jerusalem about 18,000 Jews, who formed fifteen congregations, each one an independent organization. They had, according to Sir Mo-

ses Montefiore, several building societies and mechanics, 449 pupils in the Talmud Torah (wholly Hebrew) schools, 54 pupils in Doresh Zion, where Arabic and Latin were taught, and 40 pupils in the E. V. Lamels Institution, where Arabic and Spanish were taught in addition to the Hebrew studies. In the Rothschild Institute for Girls were 119 pupils; and 123 girls were taught in other girls' schools the ordinary "Jerusalem" primary branches. Twenty-five private schools were also mentioned as in successful operation. Sir Moses Montefiore asked that the people of Jerusalem be aided in becoming the owners of land, and in building up a new part of the city of Jerusalem with buildings having the modern improvements, representing that they had abundance of skill and laborers willing to work. The report approved this proposition, the accomplishment of which, however, must be left to the Montefiore Testimonial Committee of London. Independent of this enterprise, the report recommended, and the board approved the recommendation, that moneys collected in the United States should be, in the first instance, for the following specific purposes: 1. To the support of modern elementary schools, in conjunction with and through the agencies of the Alliance Universelle or the Vienna Alliance; 2. An amount sufficient for the support of the Hospital and Orphan Asylum; 3. A remittance for the relief of poor widows recommended to the United States consul by the Haham-Bashi; 4. A minimum for indiscriminate charity among the very poor, who are over twenty-one years of age, are unmarried, and have a trade, but are without employment. The advisability of encouraging emigration to the United States was also suggested. The board further resolved that "the Executive Committee be requested to communicate with the Board of Deputies of London, the Alliance Israélite Universelle, and the Berlin Committee for the Jerusalem Orphan Asylum, in order to agree upon a plan of joint action for the material elevation and the moral and intellectual improvement of the Israelites of Palestine; and that contributions for the benefit of the Jews of Palestine and for the support of charitable institutions therein be suspended, and the amount appropriated for the Montefiore Memorial Fund be withheld until the Executive Committee shall render a report as to the best means of achieving the objects contemplated." The disposition of the board, as shown in the discussions on these measures, was, while acting in harmony with the English and French societies, to limit the contributions of American Israelites to such objects only as promised the moral and intellectual advancement of the Jews of Palestine.

The congregations in the large cities were recommended to form boards of ministers, who should have power to examine the credentials and qualifications of candidates for the position of minister, reader, teacher, or other re-

ligious office. Congregations in cities where no such board is formed were invited to authorize the boards in Philadelphia, New York, or other cities, to act as an advisory body in the cases of such candidates.

The *Union of American Hebrew Congregations* was organized at Cincinnati, Ohio, in July, 1873, for the purpose of establishing a Union Hebrew College. At this, its first meeting, it was resolved to solicit the coöperation of sister Hebrew congregations throughout the United States in carrying out more fully the designs contemplated. This resolution was responded to by congregations in various parts of the United States. At the second convention of the Union, which was held at Cleveland, Ohio, in 1874, seventy-one congregations were represented. The establishment of a college was resolved upon, to be located at Cincinnati, Ohio, and an edition of Leeser's Bible was ordered printed, to be sold at one dollar a copy. At the third convention, which was held at Buffalo, N. Y., in July, 1875, it was resolved to open the preparatory class of the college on the 12th of the ensuing October. This design was successfully carried into effect. In 1876 the Union represented eighty-two congregations in twenty-one States. The convention for 1876 was held in Washington, D. C., July 11th. At this meeting the following action was taken in reference to the establishment of a seminary for Hebrew girls:

Resolved, That we recognize the public-school system of the United States as the bulwark of American liberty, and that we deprecate any attempt to introduce sectarianism, in any form, in the management of the schools; we fondly hope that the light burning in the temple of popular education may never be extinguished; but we consider that, after our daughters have graduated in the public schools, their higher education should be provided for by Jewish female seminaries. This subject is worthy of the earnest consideration of all Israelites, and is one of the greatest wants of our age. There can be no plausible reason why the Jewish Church should stand alone among all others without a seminary devoted to the higher education of its daughters. Your committee, however, while recognizing this as among the most prominent suggestions contained in the president's report, are of opinion that the subject cannot presently receive that attention from this Union to which it is entitled, nor until the college is firmly established and provided for, and that, so far as this Union is concerned, it cannot presently do more than express its high appreciation of the necessity of the foundation of a Hebrew female seminary, wherein the daughters of Israel shall receive their higher secular education, gilded with sublime principles, and entertained with the noble teachings of the Jewish faith. We entertain the fond hope that the day is not far distant when our daughters shall no longer be compelled to seek their highest education in institutions where sectarianism foreign to their own creed is the channel through which such education is imparted.

The convention took action on the best means of improving Sabbath-schools, and awakening a greater interest in them; in regard to measures for promoting a stricter and more general observance of the Sabbath, and in regard to supplying smaller congrega-

tions occasionally with a minister. Mannheim's Hebrew Grammar was recommended as a suitable text-book for Sabbath-schools, the general use of which would effect conformity in instruction. A committee was appointed to inquire into the feasibility of establishing an agricultural college in some Western State, for the special purpose of introducing agricultural pursuits among the Israelites of the United States. A committee was appointed to cooperate with the Board of Delegates of American Israelites in collecting statistics concerning the Hebrews in America. The efforts of the American-Jewish Publication Society to spread the knowledge of Hebrew literature were approved.

The delegates of fifteen congregations of Israelites of New York, Baltimore, Md., Chicago, Ill., Philadelphia, Pa., Brooklyn, N. Y., Newark, N. J., and Wilkesbarre, Pa., met during the summer in the city of New York, to form an organization for the foundation and maintenance of a Jewish institution of learning, and the perpetuation and propagation of Jewish ideas. Mr. Lewis May was chosen president. A plan of union was agreed upon. Resolutions were adopted recognizing it as the duty of every congregation and every sincere Israelite to contribute toward the support and maintenance of an institution for the support and propagation of Jewish science and literature. The establishment of a *Hebrew Theological Seminary Association* was determined upon, the object of which should be to encourage and foster the study and knowledge of the Hebrew language "through congregational and general free schools, and such other institutions as may be determined by the authority to be created." The scope of the institution was defined in another resolution to the effect that the highest department of it "should consist of the endowment of a chair or chairs in connection with an institution where the general sciences are taught, or, if feasible in the future, of an independent theological school with the necessary chairs of instruction, in which instruction shall be given in the higher branches of Hebrew science; such department to be, in the strict sense of the term, a theological seminary." It was agreed that as soon as the congregations should have signified their adhesion to the plan of union of the Association, and the scheme for establishing the theological seminary, the Seminary Association should be incorporated and organized. A committee was appointed to lay the subject before all the Jewish congregations in the United States.

The Board of Relief of the *United Hebrew Charities* reported that their receipts for the year ending May 1, 1876, had been \$42,495.95, and their expenditures \$39,075.71.

The twelfth annual meeting of the *Hebrew Free-School Association* of New York City was held December 3d. The report stated that the Association had on its rolls the names

of 580 members and three life-members. The total receipts for the year had been \$6,146.28, and the total expenditures \$6,156.57. The Association was indebted upward of \$1,000, against which it had assets valued at \$15,400. Four afternoon and evening schools were in operation, and were attended by 439 boys and 141 girls, in all 580 scholars, of from six to thirteen years of age. The branches taught were Hebrew spelling and reading, translation of prayers and of part of the Pentateuch, Biblical history, religion, and the first rudiments in grammar.

The annual meeting of the *Hebrew Home for the Aged* of New York City was held December 3d. The report stated that the institution was free from debt, and that its available assets had been increased to \$23,214.29. The receipts for the year ending December 1st had been \$21,084.25. The institution had been removed during the year from its old building to one of larger capacity. This with other unusual outlays had caused an increase of expenditure, bringing the whole amount up to \$18,492.24, which had been promptly met. Relief had been afforded in 255 cases of confinement. The number of new admissions to the Home had been 21, and the average number of inmates had been upward of 70 for every day of the year.

The first semi-annual report of the *Universal Israelitish Alliance* for 1876 showed that the income of the Alliance for the preceding six months had amounted to 90,378 francs, and that its expenditures had been 81,145 francs. Gifts to the amount of 86,460 francs were held by the Alliance, in addition to a gift of 1,000,000 francs made by Baron Hirsch, which was administered separately, its income being devoted exclusively to the Jews of Turkey. The agricultural school at Jaffa, Syria, had forty pupils and four orphans under special guardianship. The teaching staff had been increased, and the school had received marks of public favor. The receipts of the school for the year had been 21,500 francs, and the ordinary expenditure in its behalf 81,800 francs. Extraordinary expenditures had been incurred for fresh plantation, drainage, the erection of additional buildings, etc., to the amount of 17,000 francs. The preparatory school established at Paris was attended by sixteen pupils. Instruction in Arabic had been added for those who intended to become teachers in the East. The Alliance had four schools at Constantinople, which were superintended by the local alliance. The schools in Morocco were conducted with activity; that at Mogadore had had to contend against embarrassments. The school at Widin had received a visit from the Bulgarian bishop, who had left a gift for the poor pupils. The report gave a view of the condition of the Jews in various countries. Of the Jews in Turkey there were 700 families in Bosnia and ten families in the Herzegovina. They had not as yet had to suffer any acts of violence.

In Roumania oppression continued to be exercised against the Jews, under color of the laws against vagabonds and strangers. A slow amelioration of the position of the Jews in Russia was perceptible. Under the operation of the new military law, the Israelites were endeavoring, by the promotion of education, to secure to themselves the advantages held out to recruits of superior culture; and, under it, a Jewish soldier had been promoted to the grade of officer by the Emperor himself. At Tunia, the general population continued to exhibit great hostility to the Jews, despite the benevolence of the Bey. At Morocco, the Sultan personally continued to evince his friendly sentiments toward the Jewish people. Nevertheless, crimes against them were not rare, and individual governors would sometimes revive tyrannical enactments, but without the sanction of the Emperor. The Alliance was in friendly communication with other Jewish organizations throughout the world. Its effects were seconded by the Anglo-Jewish Association, the British Board of Deputies, the Viennese Alliance, the Central Consistory of France, and the Board of Delegates of American Israelites in the United States. The latter body aided, in particular, the school at Jaffa.

An *International Jewish Conference*, called by the Anglo-Jewish Association, met at Paris, December 11th, for the purpose of considering the condition of the Israelites in the Danubian Principalities, and what measures could be taken to secure to them equal rights with Christian and Mohammedan residents. The call for the convention specified for its objects more definitely, "to secure for the Jews, in the provinces affected by the disturbances in Turkey, the same full enjoyment of civil, political, and religious rights, as is claimed for the other non-Mussulman subjects of the Porte; and to embody the expression of their claims in a joint memorial, bearing the signatures of representatives of all the Jewish bodies represented at the conference." It was also provided in the call that the case of Roumania, as well as of Servia, should be included in the deliberations of the conference. About seventy delegates attended the meeting, representing Jewish societies and institutions in Austria, Belgium, England, Germany, Italy, and America, as well as the Alliance Israélite Universelle. M. Crémieux, of the Alliance, was chosen president. Baron Henry de Worms, of the Anglo-Jewish Association; M. Isidor, Grand Rabbi of France; M. Astruc, Grand Rabbi of Belgium; Dr. Kristetter, of Berlin, and Mr. William Seligman, of New York, were chosen vice-presidents. Mr. Leven, of the Alliance; the Rev. A. Lowy, of the Anglo-Jewish Association, and Herr Bernhard Singer, of Vienna, were chosen secretaries. The chief question discussed was as to whether it was advisable to address the memorial, which it was proposed to make, to the Conference of the Great Powers which was about to meet in Constantinople,

or to forward it to the several governments which would be represented at the conference. It was finally decided that the memorial should be sent to the conference, and that, in addition to this, the delegates should apply to their several governments to induce them to recommend the favorable reception of the memorial. The memorial was then prepared, approved, and signed by every member of the conference. Baron de Worms was commissioned personally to deliver it to the Conference of the Great Powers at Constantinople. The conference closed with a banquet, given on the evening of the 14th of December, on which occasion M. Crémieux presided, and addresses were delivered by Baron de Worms; Messrs. William Seligman and Arthur L. Levy, of New York; Baron Todros, of Padua; Dr. Landsberg, of Liegnitz; Grand-Rabbi Astruc, of Brussels; M. Dreyfoos Neumann, of Basel; Dr. Singer, of Vienna; Dr. Frank, of Cologne; Grand-Rabbis Isidor and Kahn, and Mr. Albert Cohn, in the Italian, German, English, Hebrew, and French languages. M. Crémieux, in the course of his address, said that there were represented at the meeting three nations he especially welcomed—America, England, and Germany. "America!" he said—"how admirable is the outlook there for us—for us Israelites! See them in the midst of her cities, too numerous to count, participating in the immense growth of that great nation, which France helped to sustain in her early days, with her taking the first step for liberty! See the state of the Jews in America, how tranquil; how they enjoy all the rights of mankind in common with their fellow-citizens, without exception! A beautiful example for us, who first on the Continent of Europe proclaimed liberty of conscience—the grand and divine right of man! Here, too, without distinction of faith, we enjoy the great and beautiful titles of citizen and patriot." He then spoke kindly of England and Germany: "Berlin, considered as the capital of the German Empire, is for France a sad recollection; but regarded as the home of Israelites, who enjoy every right, and show themselves worthy of their possession, is quite another and a friendly city. How can we think of political hatred, of the enmity of peoples, when we have the love of God to unite us?" The memorial of the conference was granted a favorable hearing at the Conference of the Great Powers at Constantinople.

A deputation from the Anglo-Jewish Association waited on Lord Derby, at the Foreign Office in London, December 27th, to present to him the memorial, as the International Conference at Paris had directed should be done. The deputation was introduced by Baron de Worms, who was followed in short addresses by Mr. Sergeant Simon, M. P., and Mr. Goldsmid, M. P. Baron de Worms invited attention to the case of Roumania, saying that—

It might, perhaps, appear that a question such as that was foreign to the general questions of the conference, inasmuch as Roumania was not necessarily included in its deliberations. The council, however, deemed they had a right to ask for it to be included, from the fact that Roumania acquired her independence in 1858, at the termination of the Crimean War; but in the Treaty of Paris, in clause 28, which gave the constitution to Roumania, there was no special mention of the Jews. In the convention of 1858 there was a clause (46) which said that all Christians should enjoy absolute liberty of conscience, civil and religious and political liberty, in Roumania; but the Jews were not mentioned by name. It was assumed, unfortunately in error, that Roumania would not make any exception against the Jews, but would extend that liberty to the Jews as well as the Christians; but this had not been the case, as had been seen by the persecutions which had taken place during a long series of years, and to which his lordship alluded so eloquently in the House of Commons in 1868.

Equally harsh had been the treatment of the Jews in Servia, which province came more directly under the consideration of the conference at Constantinople. Lord Derby assured the deputation that—

The policy of England in the future, as in the past, would be one favorable to the removal of all distinctions between the holders of different religious faiths, and that the influence of that country would be exerted to prevent the recurrence of the persecution to which Jews had been exposed in Servia and in Roumania. He would not offer any opinion upon the memorial in detail, but he should be happy to forward it to the embassy at Constantinople for such action as might seem possible upon it, and as it would be thought fit there to take. The question of Roumania and Servia on the one hand, and the question of the Turkish provinces on the other, stood upon different foundations. With regard to anything that might be done for the internal administration of Turkey, he should certainly not be prepared to concur in any measures of administrative reform which were not intended to apply equally to all non-Mussulman subjects. With regard to Servia and Roumania, the position of semi-independence which they had acquired made direct action upon them a matter of greater difficulty. The Government, however, would see what was to be done in that respect, and he would advise the deputation to appeal constantly and on all fitting occasions to the general public opinion of the world.

An effort has been made to estimate the actual number of Israelites in the world, and the relative numbers of them in different countries; but such an estimate can give only an imperfect approximation to the real number, for the reason that in many countries even of Europe no religious census is taken, and, further, that it must in any case leave entirely out of account the number of those who may have descended from the lost tribes. Computations made from the most recent documents, dating from 1870 to 1875, indicate the total number of Jews, known to be such, on the earth, to be not less than 7,868,447, or, in round numbers, 8,000,000. Of these, about 5,500,000 are in Europe, of whom three-fifths are in the empires of Russia, Austro-Hungary, and Germany (in Russia, including Poland, 2,760,000; in Austria and Hungary, 1,876,000; in Germany, 512,000).

Three hundred and fifty thousand are assigned to Turkey in Europe, 250,000 to Roumania, and in other countries of Europe the number ranges from 68,000 in the Netherlands to 25 in Norway. It is calculated that Asia contains about 800,000 Jews, of whom 500,000 are in Yemen and other parts of Arabia; Africa a little more than 1,000,000, of whom 340,000 are in Morocco, 80,000 in Algeria, 160,000 in Tripoli, 150,000 in Tunisia, and perhaps 250,000 in Abyssinia; America 514,000, of whom 500,000 live in the United States; and Oceania about 7,000. The highest proportion of Jewish to the whole population is reached in Warsaw and the neighboring provinces, where the ratio is 170 Jews to 1,000 inhabitants.

JOHN, FRANZ, Freiherr von, an Austrian general, born November 20, 1815; died May 25, 1876. He was educated at the military academy in Wiener-Neustadt, from which he graduated in 1835. He distinguished himself at the revolution in Milan, in 1848, and at the battles of Custozza, Volta, Gravello, and Novara, and also took part in the expedition against Tuscany and the Romagna. He was appointed chief of the general staff of the Second Army in Verona in 1859, major-general in 1861, and upon the outbreak of the Italian War, in 1866, was placed at the head of the general staff of the Army of the South. This office he filled with great ability, contributing materially to the victory at Custozza, for which he was created lieutenant-field-marshal on June 25, 1866, and on July 10th was appointed chief of the general staff of all the Austrian forces operating in Italy. On September 6, 1866, he was intrusted with the administration of the ministry of war, and at the same time was appointed chief of the quartermaster-general's staff for the whole Austrian army, and was shortly afterward definitely appointed Minister of War, which position he retained until 1868. He was then appointed commanding general in Gratz, where he remained until 1874, when he again entered the ministry of war as chief of the general staff. He was created Freiherr (baron) in 1857, and a life-member of the Herreuhaus in 1867.

JOHNSON, REVERDY, an American statesman, died at Annapolis, Md., February 10, 1876. He had been the guest of Governor Carroll at the Executive mansion, and was dining with a number of friends. Soon after dinner he was found dead in the yard by a servant. Mr. Johnson was born in Annapolis, May 21, 1796. He was educated at St. John's College in that city, and at the age of seventeen began to study law in Prince George's County in the office of his father, who was chief-justice of the judicial district of which that county was a part. In 1815 he was admitted to the bar, and in 1817 removed to Baltimore. He had devoted much of his time to the arguing of cases before the United States Supreme Court. In conjunction with Mr. Thomas Harris he reported the decisions of the Maryland Court of Appeals

known as "Harris's and Johnson's Reports" (7 vols., 1820-'27). In 1821 he was elected a State Senator for four years, and in 1825 re-elected. In 1845 he was chosen a United States Senator, which office he resigned in 1849 on being appointed by President Taylor Attorney-General of the United States. On the secession of Mr. Fillmore, after the death of President Taylor, Mr. Johnson resigned that office, and resumed in Baltimore the practice of the law. In 1861 he was a member of the convention in Washington which tried to prevent the outbreak of the civil war. In 1862 he was again elected to the United States Senate, and was a member from 1863 to 1868. Throughout the war he supported the national

cause, and sustained the leading measures of the Administration. When peace was restored he urged the readmission of the Southern States without delay. He voted for the first reconstruction bill, and supported that measure when it was vetoed by President Johnson. He voted against the second bill. In June, 1868, he was appointed by President Johnson to succeed Mr. Adams as minister to England, where he negotiated the "Johnson-Clarendon" treaty for the settlement of the Alabama claims, which was rejected by the Senate. He was recalled in 1869. In 1872 he supported Horace Greeley for President. Mr. Johnson was considered one of the ablest constitutional lawyers of the country.

K

KANSAS. The State of Kansas contains 13,432,242 acres of land assessed for taxes, with an aggregate assessed value of \$76,666,855.83, or an average of \$4.18 per acre. The most valuable land is that of Wyandotte County, assessed at \$9.50 per acre. The whole number of town and city lots subject to taxation is 291,571, with an assessed value of \$17,919,147.86. The assessed value of personal property is \$33,048,801.38. The number of miles of railroad is 2,129.41, with a total assessed value of \$16,197,515. The total value of all property as assessed for taxes is \$133,832,316.35; showing an increase of \$19,595,737.88 in one year.

The bonded debt of the State on the 1st of December was \$1,235,975, having been decreased \$149,800 during the year. There was a sinking-fund of \$122,305.67, leaving unprovided for \$1,113,669.33, of which \$610,925 belonged to the permanent school-fund. The receipts of the State Treasury for the last fiscal year were \$1,345,832.26; disbursements, \$1,099,716.24, leaving a surplus on hand of \$246,117.04.

The school property of the State is valued at \$4,600,259, and consists of 3,881 school-houses, valued at \$4,167,948; furniture to the value of \$367,552; apparatus worth \$55,115, and libraries valued at 9,954. The total amount received from all sources for the support of public schools during the last school year was \$1,373,233.08; amount expended, \$1,165,638.80, leaving a balance, July 31st, of \$218,592.61. The number of teachers employed was 5,576, of whom 2,402 were males, and 3,174 females. The average wages paid to teachers was \$33.66 per month for males, and \$27.03 for females. The average attendance at the public schools was 89,896; total number on the rolls, 147,124; number of children of school age in the State, 212,977.

The State penitentiary on the 30th of November contained 406 inmates. During the year 250 convicts were let out to contractors

at 45 cents per day, and fifty at 50 cents per day. The remainder were employed by the State.

The annual session of the Legislature of the State began at Topeka on the 11th of January, and closed on the 4th of March. Very little of the legislation was of general importance or interest. The tax laws were revised and codified into a single act, the principal change in the provisions being a restoration of the fifty per cent. penalty for non-payment by a specified date. The school laws were also revised and consolidated into a single act. There were several amendments, the most important of

STATE SEAL OF KANSAS.

which does away with all distinctions based on color. Several acts were passed authorizing different counties, cities, and towns, to fund their indebtedness. An apportionment act was passed designating the 40 senatorial and 123 representative districts of the State. A bill providing for a reversion and codification of all the statutes was defeated in the Senate. Other measures that failed were one prohibiting the sale of intoxicating liquors, and one abolishing capital punishment. The total ap-

propriations of the session amounted to \$457,477.18.

The first political convention of the year was held at Lawrence, for the purpose of appointing delegates to the National Prohibition Convention. The following were the resolutions adopted:

The Temperance people of the State of Kansas, believing that the time has again arrived to present a State ticket composed of persons who are honest, temperate, and capable, hereby unite in the following declaration of principles:

1. The legal prohibition of the manufacture, importation, and sale, as a beverage, of all intoxicating liquors.

2. An economical administration of all departments of the Government.

3. Political reform, by selecting for office none but honest and capable temperance men.

4. The fostering and improvement of our system of common schools.

5. The speedy and exemplary punishment of all public officers guilty of embezzlement, the misappropriation of public funds, or neglect or refusal to perform sworn duties.

6. We hereby pledge ourselves to a cordial cooperation with the great national Prohibition party in the carrying out of such principles and measures as may be deemed just and right, which shall be adopted at the approaching convention to be held at Cleveland, Ohio, May 17, 1876.

But we are firmly opposed to all forms of repudiation, either State, national, or municipal; to the appropriation of the public funds for the advancement of private enterprises; and to the further appropriation of the public domain for the building of railroads.

A preference was expressed for the Hon. James G. Blaine, of Maine, as the candidate for President.

The Democrats held their convention for selecting delegates to the National Convention of the party, at Topeka, on the 18th of May. The sentiments of the gathering were expressed by the following declarations, which were adopted after considerable discussion, by a vote of 182 to 104:

Deeming it not inappropriate, upon the era of the approaching Democratic National Convention, that the Democracy of Kansas should define its position upon the financial questions of the day, we do hereby resolve—

1. That we are opposed to all banks of issue, whether chartered by Congress or the State Legislatures, and we desire that banking on the part of corporations or private individuals shall be confined by law exclusively to exchange, discount, and deposit.

2. We demand that the act of Congress creating the national banking system be repealed; that the notes of the national banks be withdrawn from circulation, and in lieu thereof the paper of the Government of the United States be substituted.

3. That as Congress has the sole power to coin money, and to regulate the value thereof, it should also have the sole power to provide a paper currency for the people.

4. That such paper currency be made a legal tender in the payment of debts, public and private, and that the same be receivable for all demands on the Government, including duties on imports.

5. That we regard the act of Congress, requiring resumption of specie payments in 1879, the retirement of legal tenders, and the substitution of the inferior currency of the national currency in its stead, as a fraud and an outrage, and we demand that the

Democratic House of Representatives in Congress immediately pass a bill for its unconditional repeal, and that the responsibility for the continuance of that infamous measure on the statute-book be thrown on the Senate and President.

6. That Thomas A. Hendricks, of Indiana, is the first choice of the Democrats of the State of Kansas for President of the United States, and that our delegates to the National Convention be, and they are hereby, instructed to support no man for President or Vice-President who does not fully indorse our financial resolutions.

The Republican Convention to appoint delegates to the national nominating body at Cincinnati was held at Topeka on the 24th of May, and the following resolutions were adopted:

Resolved, That we reaffirm our devotion to the Republican party which originally rescued Kansas to freedom, and the nation itself from dissolution. We recognize in the Democratic party that same old organization whose relentless hostility to the great doctrines of republican liberty, whose championship of human slavery, and whose treachery to the nation's honor and life in her hour of trial and danger, have repeatedly demonstrated its unfitness to be intrusted with the grave responsibilities of administering the Government.

Resolved, That this convention recognize the distinguished ability and the eminent public services of the Hon. James G. Blaine, of Maine, late Speaker of the House of Representatives, and declare him the first choice of the people of Kansas for the office of President of the United States.

The Republican Convention for the nomination of candidates for State officers met at Topeka on the 16th of August. It occupied two days, and seven ballots were taken before a Governor was nominated. The ticket finally agreed upon presented: For Governor, George T. Anthony; for Lieutenant-Governor, M. J. Salter; for Secretary of State, T. H. Cavanaugh; for Auditor, P. I. Bonebrake; for Attorney-General, Willard Davis; for Treasurer, John Francis; for Superintendent of Public Instruction, Allen B. Lemmon; for Justice of the Supreme Court, David J. Brewer.

The resolutions reported by the committee were recommitted after discussion, and the platform as finally adopted was as follows:

The representatives of the Republican party of Kansas, in convention assembled, renew the pledge of their devotion to that grand political organization under whose auspices so many triumphs have been secured, and which, in war and in peace, has faithfully battled for those cardinal principles which distinguish free governments. As a further pledge of the fidelity of the Republicans of Kansas, it is hereby—

1. *Resolved*, That the platform of principles laid down by the National Convention at Cincinnati meets with our hearty and enthusiastic indorsement, and it is our earnest belief that in their practical application to the affairs of government lies the surest hope of substantial reform, a faithful discharge of honorable obligations, and a steadfast adherence to the fundamental doctrines established by the results of the war, and the vital legislation incident thereto.

2. *Resolved*, That in Rutherford B. Hayes and William A. Wheeler, our candidates for President and Vice-President of the United States, we recognize statesmen of tried experience, commanding ability, and spotless integrity; their letters of acceptance commend them to all sincere lovers of re-

form, and pledge to such reformatory work a faith which has never yet been violated or impugned.

3. *Resolved*, That we should regard with apprehension the return of the Democratic party to power, as a practical surrender of that ascendancy of liberty which was secured by so much blood and treasure, and a welcome to the control of the government of the malign influences which for four years sought its overthrow in the field.

4. *Resolved*, That in the administration of both the national and State governments we are in favor of the most rigid economy and the strictest accountability, and that, in view of the depression of the times, it is peculiarly incumbent upon us to husband our resources, and to postpone such public enterprises of a costly character as are not absolutely essential to our immediate wants, to a season of renewed prosperity.

5. *Resolved*, That in George T. Anthony, our nominee for Governor, we recognize a man of preëminent fitness for the station—earnest, capable, and of unquestioned integrity; tried in positions of trust, no just reproach has ever reached him; and we rely upon his vigor and eloquence for a substantial increase to our assured overwhelming majority. His associates on the ticket are men whom the Republicans will delight to honor, and by whom their several trusts will be faithfully administered.

6. *Resolved*, That we invite the coöperation of all men, whether called "Liberal" or "Independent," to whom "reform" is something more than an empty name, offering them the guarantee of candidates, national and State, whose character and history are an unqualified assurance that under their guidance every vital reform will be advanced by their efforts and influence.

The Democratic nominating convention was held at Topeka, August 23d. John Martin was nominated for Governor, and the rest of the ticket was made up by a coalition with that of the Greenback party. The Lieutenant-Governor, Treasurer, Auditor, and Superintendent of Public Instruction, were taken from the Greenback nominations, and the other candidates were Democrats. The full ticket was: Governor, John Martin; Lieutenant-Governor, J. A. Beales; Secretary of State, S. M. Palmer; Auditor, H. E. Sheldon; Treasurer, Amos McLouth; Attorney-General, W. J. McConnell; Superintendent of Public Instruction, Thomas Bartlett; Judge of the Supreme Court, James Humphrey. The platform adopted by the convention was as follows:

Resolved, That we heartily approve and indorse the declaration of principles, policies, and purposes, made by the National Democratic Convention at St. Louis, as interpreted by the letters of acceptance of the candidates nominated by that convention.

Resolved, That in the nomination of Samuel J. Tilden for President and Thomas A. Hendricks for Vice-President of the United States the Democratic National Convention has placed before the electors of this country the names of two men whose proved private and public career is an assurance to the people that if elected economy, purity, ability, and statesmanship, will characterize their Administration—an assurance that the highest offices in the nation are public trusts and not private perquisites.

Resolved, That in support of the candidates, on the basis of the St. Louis platform, we will cordially coöperate with all men who desire a change and reform in the administration of the political affairs of the nation.

Resolved, That we invite to coöperate with us in the election of the ticket this day nominated all

good citizens of this State who desire that capacity, industry, and honesty shall supplant ignorance, idleness, and dishonesty in the management of our State affairs, and ask the aid of all good citizens for the protection of the honor of our State, stained, as it has been, by the speculation and corruption of many of the officers, and to the end that the taxes drawn from the toiling masses of our people shall be applied to the purposes for which they are collected, and not filched from the Treasury to enrich the thieves who have been intrusted with their care.

Resolved, That we believe it to be to the best interests of this nation, and consistent with its honor, and fair to its creditors, that the standard silver dollar, as it was prior to the act of 1873, should be coined and made as heretofore a legal tender for all debts.

The Greenback candidates not taken up by the Democrats were: J. K. Hudson, Governor; W. M. Allison, Secretary of State; J. D. Brunsbaugh, Attorney-General. The ticket of the Prohibitionists consisted of: Paulson, for Governor; W. Fairchild, Lieutenant-Governor; William Crosby, Secretary of State; P. I. Bonebrake, Auditor (same as Republican); John Francis, Treasurer (same as Republican); A. M. F. Randolph, Attorney-General; Cyrus W. Harvey, Superintendent of Public Instruction.

The election on the 7th of November resulted in the choice of the Republican nominees. The total vote for presidential electors was 124,057, of which 78,522 were for the Republican candidates, 37,902 for the Democrats, 7,770 for the Greenback ticket, and 138 were scattering. The plurality of the Hayes and Wheeler ticket over that of Tilden and Hendricks was 40,620; majority over all, 32,817. The total vote for Governor was 121,727, of which Anthony had 69,073, Martin, 46,204, Hudson 6,020, Paulson 893, scattering 87. Anthony's plurality over Martin was 22,869; majority over all, 16,410. Three Republican members of Congress were elected. The Legislature chosen at the same time consists of 37 Republicans and 3 Democrats in the Senate, and 108 Republicans and 18 Democrats and "Opposition" in the House. Two amendments to the constitution were ratified. One of these provided that no money should be drawn from the Treasury, except in pursuance of a specific appropriation made by law, and no appropriation should be for a longer period than two years. The other fixed the term of county officers at two years, except county commissioners, whose term of office is to be three years. The vote on the former was 94,845 to 17,681, on the latter 92,054 to 1,985.

The decision of the Supreme Court of the United States in the Osage Land case was rendered on the 10th of April, in favor of the settlers. The lands in question had been granted by Congress to the Leavenworth, Lawrence & Galveston, and the Missouri, Kansas & Texas Railroad Companies, and patents were issued for a considerable portion of them. They had at the same time been in large part taken up and occupied by settlers. Suit was

brought in the name of the United States and on behalf of the settlers to set aside the patents to the railroad companies. The decision of the Circuit Court was in favor of the rights of the settlers, and this was confirmed by the Supreme Court.

KASHGAR. *See* TURKISTAN.

KAYE, Sir JOHN WILLIAM, a British statesman and historian, born in 1814; died July 24, 1876. He served for some time in Bengal as a lieutenant of artillery on the East India Company's establishment, and, returning to England in 1845, he devoted himself to literature. In 1856 he entered the Home Civil Service of the East India Company. When the Government of India was transferred to the crown, he was appointed secretary to the Political and Secret Department of the India Office, which position he held for nineteen years, retiring to private life in October, 1874. He was liberally provided for in his declining years by the Council of India. He was a fellow of the Royal Society, and a knight commander of the Star of India. Among his works are: "The History of the War in Afghanistan," "History of the Administration of the East India Company" (1858), "The Life and Correspondence of Lord Metcalfe" (1854), "History of the Sepoy War in India, in 1857-'58," "Christianity in India" (1859), and the "Essays of an Optimist" (1870). He also contributed to periodical literature, and was the founder of the *Calcutta Review*, of which he edited the earlier numbers, and contributed a large number of the articles.

KENTUCKY. The session of the Legislature of Kentucky, which began in December, 1875, was extended, by joint resolution, twenty days beyond the regular limit of sixty days, and did not come to a close until the 20th of March. There were, in all, 1,087 acts and 54 joint resolutions passed; but the great mass of the legislation was of a special or private character, and the number of general laws of interest or importance was very small. A large number of enactments related to local courts, fixing their jurisdiction, and the time and place of holding terms. Among the acts worthy of special mention was one establishing a Bureau of Agriculture, Horticulture, and Statistics. It provides for a commissioner to be appointed by the Governor for a term of two years, with a salary of \$2,000 per annum, whose duty it shall be to gather information and statistics upon agriculture, horticulture, and other industrial interests, and encourage and assist the formation of associations to promote such interests. He is required to make an annual report, "giving a general review of the agricultural, horticultural, mineral, and industrial resources of the entire State, with brief notices of each county." An act was also passed continuing the geological survey of the State for two years, and providing for its expense. An act for the propagation and protection of food-fishes in the waters of the State provided for

the appointment of ten commissioners, one for each congressional district, to take the necessary measures for stocking the ponds and rivers with fish. A general act was passed to incorporate persons who may become purchasers of any railroad sold under the decree of a court. There was also an act passed to regulate the sale of leaf-tobacco, aimed especially at the prevention of fraudulent weight. Two or three acts had reference to the State penitentiary, but no provision was made for such an extension of the accommodations for convicts as was needed. The sum of \$25,000 was appropriated for the construction of new cells. A bill authorizing the lease of convict labor to contractors outside the prison passed the House of Representatives, but there was strong opposition to it, on the ground that it would bring prison-labor into competition with free labor, and it was finally defeated. Another act provided for a deduction from the term of confinement of prisoners equivalent to five days in each month during which there should be no complaint of misconduct. The several acts organizing and regulating lunatic asylums were revised and consolidated into one. Acts were also passed making appropriations for repairs and improvements in the lunatic asylums of the State. Another act of the session authorized county courts to establish work-houses for the confinement of persons adjudged guilty of misdemeanors. Among the other acts passed was one reducing the legal rate of interest from ten to eight per cent., and one fixing the rate of taxation at forty cents on the hundred dollars, a reduction of five cents. An act to incorporate the town of Newville was vetoed by Governor McCreary, because it provided for a vote by ballot in that town, whereas the constitution of the State declares that "in all elections by the people" voting shall be *viva voce*. An act providing for a registration of voters in the city of Louisville was also vetoed. The Governor's main objection to it was that it made different requirements for voters in the city of Louisville from those applicable in the rest of the State, while the constitution declared that "all elections shall be free and equal."

He appeared also to be opposed to the principle of the act. In stating his objections he used the following expressions:

It is not possible for elections to be free and unobstructed when a voter is denied the right of suffrage, simply because he was necessarily absent from his precinct, or sick, the only day in which he could have his name registered. Neither is it possible for elections to be equal in any proper sense of the term, when the law so discriminates among the electors as to require a different kind or a higher degree of evidence to establish the qualifications of one than it requires to establish the qualifications of another. . . .

Liberty-loving people should be careful how they tear away the right of suffrage even from the friendless and defenseless immigrant, for if this be accomplished the time will soon approach when the poor but honest sons of toil will be disfranchised also

and by degrees constitutional rights will be manacled and crushed by the powerful and the arrogant.

Kentucky has had three constitutions. Each of them declares that "all elections shall be free and equal." We are now in the eighty-fourth year of the existence of the Commonwealth, and throughout all this time the privilege of free suffrage has been supported in all the cities, towns, districts, and counties of our entire State alike, by uniform laws regulating elections. So far as I am informed, there is not a State in this Union where registration of voters is required in a part of the State, and not authorized in other parts of the same State.

Among the joint resolutions of the session was one favoring Government aid to the Texas Pacific Railroad, and others expressing regret at the death of John C. Breckinridge and ex-Governor Thomas E. Bramlette. The resolutions referring to General Breckinridge were as follows:

Whereas, The death of John C. Breckinridge has been officially announced to this body: therefore be it

Resolved by the General Assembly of the Commonwealth of Kentucky, That the nation has lost a distinguished citizen; the State a wise counselor and trusted servant; society a shining and brilliant member.

The great loss a community sustains in the death of a man so illustrious and beloved cannot be measured with words. We leave the impartial judgment of history to place him among the actors of his time as his talents and his services may entitle him; feeling no apprehension that posterity will depreciate or under-estimate the exalted virtues we knew him to possess.

We can only extend to our people our sympathy for the loss we have sustained in common, and to his family expressions of condolence for their bereavement, which not even time can fully assuage.

That these resolutions be spread upon the journals

of the Senate and House of Representatives, and that a copy be engrossed and forwarded to the family of the deceased.

That, as an additional mark of respect to the memory of the deceased, this body do now adjourn.

There was no election for State offices this year. The Republicans held a convention at Louisville on the 18th of May, for the purpose of choosing delegates to the National Convention at Cincinnati, and nominating candidates for presidential electors. The platform adopted was as follows:

The Republicans of Kentucky reaffirm their adhesion to the principles and the organization of the Republican party of the United States, endeared as it is by the sacrifices of war and the blessings of an assured Union of States based upon universal liberty.

We make the following declaration of principles:

1. The fulfillment in letter and spirit of every promise which the nation has made to the brave soldiers and sailors who saved the Union against rebellion.

2. Thorough retrenchment and the most rigid economy in all departments of the public service.

3. Such reform in the civil service as will prevent the prostitution of public station to selfish ends, and make honesty and capacity indispensable qualifications for all offices.

4. Honest men in office, who have the courage to fight corruption wherever it exists, and to bring to punishment all who betray official trusts.

5. Repudiation is a national crime.

6. The payment of the public indebtedness according to both the letter and the spirit of the contract.

7. A speedy return to the money of the Constitution, gold and silver, and such paper only as can be converted into coin at the option of the holder.

8. Opposition to any postponement of the return to specie payments beyond the time now fixed by law.

VIADUCT BRIDGE AT LOUISVILLE.

9. Reduction of taxation as rapidly as the public faith will permit.

10. The common school is an indispensable part of republican institutions, and opposition should be made to all schemes which tend to place it under other than popular control. One of the highest duties of the State is to give all of its children an opportunity at the public expense to acquire the rudiments of knowledge.

11. Equal rights before the law of all citizens, without regard to race or color, and full and equal protection in the exercise of those rights.

The deeds of the Republican party make one of the brightest chapters in the country's history, and we honor the names of its leaders in war and peace. As Kentucky gave Abraham Lincoln to his country and to mankind, for the great work now done by him, she now presents Benjamin H. Bristol to complete the correction of the ills ever incident to war. His past conduct in office is an earnest of his future course. He has been true to Republican principles in war and peace, ever manly, calm, and courageous, and ever faithful in the discharge of duty.

His persistent and successful warfare against corruption deserves the thanks of all friends of honest government. In thus presenting and commending our fellow-citizen to the Republican National Convention, we are not unmindful of the distinguished services and worth of other Republicans. Believing the continuance of the Republican party in power to be essential to the best interests of the whole country, we confidently trust that the convention will present as candidates men whose allegiance to principle and character have been tried and who have moral courage to enforce the law; for with such candidates we can surely triumph, and thus save the country from the disastrous results which would follow the return of the Democratic party to power.

Resolved, That a debt of gratitude is due to U. S. Grant for his distinguished services in behalf of the country, and we especially commend the vigor and promptitude with which public offenders have been brought to trial and punishment under the present Republican Administration. The sentiment, "Let no guilty man escape," meets the hearty approval of the Republicans of Kentucky.

The Democratic Convention for the appointment of delegates to the national nominating body, and the selection of candidates for electors, was held at Louisville on the 25th of May. The following declarations were adopted by acclamation:

1. The Democracy of Kentucky, in State Convention assembled, hereby declare that the Government of the United States is one of delegated powers alone. Its authority is defined and limited by the Constitution; and all powers not granted to it by that instrument or prohibited to the States are reserved to the States or the people.

2. That the Democratic party is the party of the Constitution, the party of reform, and the party of economy, and, if intrusted with the administration of the Federal Government, will hold it to be a present and pressing duty to restore full and perfect equality among the States, arrest the aggressive usurpations of centralized power, reestablish the moral character of the Government, and eliminate crime as a common characteristic of political life.

3. That the present deplorable condition of the morals and business interests of the country is the result of a corrupt and partisan Administration, and that reform is absolutely necessary for the relief of the people and the preservation of the Government, and that this can only be done by a change of the Administration.

4. That, in view of the present distressed condition of the country, we declare that we favor the immediate and unconditional repeal by the Congress of the act of January 14, 1875, commonly known as the resumption act. But in order that our opinions on a subject of such grave importance may not be misunderstood, we also declare that, regarding gold and silver as the true basis for a currency, specie payments should be resumed at the earliest time at which it can be done without detriment to the commercial and industrial interests of the people.

5. That we demand that labor shall be relieved from the oppressive burdens of a protective tariff by the adoption of a tariff for revenue only.

6. That the delegation from this State to the St. Louis Convention is hereby directed to cast its vote as a unit on all questions coming before the convention, and, having full confidence in the ability and patriotism of our delegates, we leave them uninstructed, and pledge the Democracy of Kentucky to support the nominees selected by the convention.

The Prohibitionists held a State Convention at Louisville on the 27th of July, nominated candidates for electors, and adopted a declaration of the well-known principles of their organization.

An election for county and other local officers took place on the 7th of August, but members of Congress and presidential electors were voted for on the 7th of November. The total vote for electors was 259,614, of which those on the Tilden and Hendricks ticket received 159,696; Hayes and Wheeler, 97,156; Cooper and Cary, 1,944; Smith and Stewart, 818. The plurality of Tilden over Hayes was 62,540; majority over all, 59,778. The ten Congressmen chosen were all Democrats.

A convention of the Democrats of the State was held at Louisville on the 18th of January, 1877, to consider the state of the country and give expression to their sentiments regarding the disputed result of the presidential election. It was the largest political convention ever held in the State, and included most of the

prominent Democrats from all the counties. Many speeches were made, but the general sentiment of the occasion was freely expressed in the following resolutions:

BLIND FISH, MAMMOTH CAVE.

Resolved, That we reaffirm our ancient faith in republican institutions, our devotion to the Union of the States, the doctrine that the Federal Government is strictly one of delegated powers, and that each State has the right to regulate its own domestic concerns.

Resolved, That it is our firm conviction that Samuel J. Tilden and Thomas A. Hendricks, at the late election for President and Vice-President, received not only a large majority of the popular vote, but also a large majority of the electoral vote, and that liberty and the Constitution demand that they shall be placed in the offices to which the voice of the people has called them.

Resolved, That a count of the electoral votes by the President of the Senate, without the concurrence and direction of both Houses of Congress, would be in violation of the Constitution, contrary to usage, revolutionary in character, and an act of usurpation to which the people will not submit.

Resolved, That we will sustain our Senators and Representatives in Congress in the maintenance of their constitutional powers and the fearless discharge of their duty, unawed by attempted usurpations by the Senate or menace of military power by the President.

Resolved, That an appeal to arms is the last desperate remedy of a free people in danger of being enslaved, but may become a necessary remedy in resistance to destructive usurpations and military despotism. We urge upon our Senators and Representatives the exhaustion of all peaceful means, consistent with honor and with the Constitution, for averting the perils with which our institutions are threatened, before leaving the people to the dire alternative of submitting to tyranny or fighting for freedom.

Resolved, That every State in the Union is the equal of every other State, and Kentucky does now, as heretofore, protest against the claim that certain States may be treated by the Federal Government differently from the treatment accorded other States. She avows that this is a Union of equal States, and that outrages committed upon any State are outrages upon, and full of danger to, all the States. She denounces the use of military force in upholding illegal governments in Louisiana and South Carolina with the same warmth and indignation with which she would resent the seizure of her Capitol as a barracks and the inspection of the certificates of her legislators by a corporal of the guard.

Resolved, That we unite with the Democracy of Ohio in the request that the National Committee call a National Convention; and, in response to the action of the Democracy of Indiana, the chairman of this convention is directed to appoint a committee on Federal relations, to consist of nine members, to whom power is given to select delegates to represent Kentucky in any convention that may be called, and to take such other steps as the exigencies of the times may require.

Resolved, That we look with apprehension upon the resort to unusual tribunals for the settlement of the questions now in issue; and we believe that the firm exercise of its constitutional powers by the House of Representatives will result in the proper adjustment of the troubles now threatening the country.

General Green Clay Smith, the Prohibitory candidate for President of the United States in 1876, is a native of Kentucky, and a resident of Frankfort. He was born July 2, 1830, and graduated at the Transylvania University, at the age of nineteen. He continued at the institution three years longer, as a student of law, and for some time practised in that profession. He served in the Mexican War, and at the beginning of the civil contest in 1861 commanded the Fourth Kentucky Cavalry. In 1862 he was commissioned as a brigadier-general, and subsequently promoted to major-general. He was elected a Representative to the Thirty-eighth Congress in 1863, and in 1864 was a delegate to the Baltimore Convention. He was reelected to the Thirty-ninth Congress, and in 1866 was appointed by President Johnson Governor of Montana Territory. Since that time he has become a Baptist preacher, and a prominent lecturer on temperance.

KERR, MICHAEL C., died at Alum Springs, Va., August 20, 1876. He was born near Titusville, Pa., March 15, 1827. Having obtained a moderate education, he studied law, and about 1852 removed to New Albany, Ind. In 1854 he became city solicitor, and in 1855 was elected prosecuting attorney of Floyd County. He was elected to the Legislature in 1856, served two years, and in 1862 became reporter to the Supreme Court, in which capacity he published five volumes of reports. In 1864 he was elected a Democratic Representative in Congress, where he served on the Committees on Private Land Claims, and on Accounts. He was reelected in 1866, 1868, and 1870, and served on the Committees on Elections, Roads and Canals, Civil Service, Judiciary, Ways and Means, etc. In 1872 he was defeated as a candidate for Congressman at large by Godlove S. Orth. In 1874 Mr. Kerr was again elected to Congress. At the beginning of the session in December, 1875, he was chosen Speaker, which position he held at the time of his death.

KHOKAN. *See* TURKISTAN.

KINDLER, ALBERT, a German painter, born in 1833; died April 4, 1876. He pursued his artistic studies at the Academy of Munich, and in 1856 went to Düsseldorf, where he became a pupil of the celebrated artist Prof. Rudolf Jordan. He made several journeys through

Upper Bavaria, the Tyrol, and through Spain. In 1859 he painted his first large picture, the "Wedding Procession on the Rhine," which became widely known throughout Germany by means of a good engraving. Among his other large works are the "Gemeinderaths-sitzung" (Session of the City Council), "Going to the Dance," and the "Brautexamen" (Examination of the Bride). But he was chiefly known by his clever little *genre* pictures, for which he found the subjects in his travels.

KINGSLEY, HENRY, a British journalist and novelist, brother of Rev. Charles Kingsley, born in 1830; died May 24, 1876. He was educated at King's College, London, and Worcester College, Oxford, which he left in 1858, when he went to Australia, returning in 1858. He contributed to the *North British* and *Fortnightly Reviews*, and to *Fraser's* and *Macmillan's Magazines*. In 1870 he laid aside, for a time, his novels, and assumed the editorship of the *Daily Review*, the organ of the Free-Church party in Edinburgh. Being unable to get a suitable war correspondent, he went himself to France, in 1870, and was the first Englishman in Sedan. He retired from the editorship after having held it for eighteen months, and again took to his old work of novelist. His best-known works are: "Recollections of Geoffrey Hamlyn" (1859), "Ravenshoe" (1861), "Austin Elliot" (1863), "The Hillyars and the Burtons: A Story of Two Families" (1865), "Leighton Court: A Country-House Story" (1866), "Mademoiselle Mathilde" (in the *Gentleman's Magazine*), "Stretton," "Hetty" (1871), "Old Margaret" (2 vols., 1871), "Hornby Mills" (2 vols., 1872), "Valentine: A French Boy's Story of Sedan" (2 vols., 1872), and "Reginald Hetherage" (3 vols., 1874).

KLEIN, JULIUS LEOPOLD, a German dramatist and literary historian, born in 1804; died August 8, 1876. He was born of Jewish parents in Hungary, who gave him a good education. After passing through the gymnasium at Pesth, he studied law and medicine at the University of Vienna, after which he acted for a time as tutor in several prominent families, during which time he entered the Catholic Church. He then went to Berlin, where he continued his studies, and afterward devoted himself entirely to literary pursuits. His dramas, which at first met with little success, are much in the style of Shakespeare, of whom he was an ardent admirer. Among his best-known works are the dramas "Maria von Medici," "Luines," "Richelieu," "Maria," "König Albrecht," "Strafford," "Zenobia," and "Heliodora," and the comedies "Die Herzogin" and "Voltaire." Among his works on the history of literature the most important are: "Geschichte des Dramas" (3 vols., 1865-'66), of which the first two volumes treat of the Greek and Roman drama, and the third of the non-European drama; "Geschichte des italienischen Dramas" (4 vols., 1866-'69);

"Geschichte des spanischen Dramas" (5 vols., 1869-'75); and "Geschichte des englischen Dramas," of which the first volume appeared shortly before his death.

KÖOHLI, HERMANN, a German scholar, born August 5, 1815; died December 8, 1876. He studied in the University of Leipsic, and then taught at the Realschule in Meiningen, and afterward at the Kreuzschule in Dresden. Having taken part in the revolutionary movements of 1848, he was forced to flee to Belgium, from where he went to Zürich in 1850. Here he displayed great activity in various branches. Besides editing a large number of the Greek classics, he took an active part in the administration of the university, and in organizing the schools of that canton. In 1864 he accepted a call to the University of Heidelberg, where he remained up to his death.

KRELING, Dr. AUGUST VON, a German painter and sculptor, born May 28, 1819; died April

28, 1876. He studied sculpture under Schwantaler, in Munich, and afterward painting under Cornelius. When Cornelius left Munich he went to Italy, where he studied the paintings of Paul Veronese. In 1858 he was appointed Director of the Art Industrial School in Nuremberg, which rapidly prospered under his able supervision. Among his important works are the restoration and decoration of the Old Castle at Nuremberg, and a statue of Heinrich Posthumus in Gera. His largest and most important work, however, was the large fountain in Cincinnati, which is considered one of the finest in the world. Among his paintings the best known is "Erwin von Steinbach." He also published an illustrated edition of Goethe's "Faust," and, together with W. von Kaulbach, the "Dürer Album." He was an excellent teacher, being highly esteemed by his pupils. He married, in 1858, a daughter of Kaulbach.

L

LANE, EDWARD WILLIAM, a British Orientalist, born at Hereford, September 17, 1801; died in August, 1876. Having studied in Cambridge, he went to Egypt, in 1825, where he remained three years, and in exploring the country for archæological purposes advanced as far as the second cataract of the Nile. During this stay he acquired such an extraordinary knowledge and fluency in the use of the Arabic language, that he could converse with the people like a native, and thus gained an insight into the customs of the country and the people, which, at that time, had been but little touched by European influences. The fruit of this journey was a description of Egypt, the people, and the monuments of the country, with one hundred special sketches. Owing to the cost of the reproduction of these sketches, this work was never published. But it caused the Society for the Diffusion of Useful Knowledge to send him again to Egypt, with the order to prepare a work on the condition of Egypt at that time. This second trip lasted from 1833 to 1835, and in 1836 he published his work on the "Manners and Customs of the Modern Egyptians," which went through five editions. In the years 1838 to 1840 he completed the translation of the "Arabian Nights," this being the first accurate translation of this work into a European language. In 1842 he went to Egypt for a third time, and remained there until 1849. This journey was made at the expense of the Duke of Northumberland, and had for its object the preparation of an Arabic-English lexicon. On this work he was engaged for thirty-five years, up to his death. The first volume appeared in 1863, and has been followed by five more, while for the seventh and eight volumes he left the manuscript all ready.

LARIVIÈRE, PIERRE CHARLES, a celebrated French painter, born September 18, 1798; died March 18, 1876. He received his first lessons in painting from his father, but in his fifteenth year entered the studio of Paulin Guérin, and afterward those of Girodet and the Baron Gros. In 1818 he entered the School of Fine Arts, and successively obtained distinguished medals and prizes. Some of the best known of his works, executed between the years 1824 and 1869, are "The Prisoner in the Capitol visited by his Family," "The Plague in Rome under Nicholas V.," "Two Monks in Meditation," several portraits of distinguished marshals, admirals, and statesmen, and studies of heads; the battles of Ascalon, of Mons-en-Puelle, and of Cocherel; the "Raising of the Siege of Malta," and the "Siege of Dunkirk." Most of his subjects were exhibited in the *Salons* from 1834 to 1847. He obtained two of the highest medals in 1831 and 1855, and the decoration of the Legion of Honor in 1836.

LASSEN, CHRISTIAN, a celebrated Orientalist, born in Bergen, Norway, in 1800; died in Bonn, Germany, May 9, 1876. He studied philology in the Universities of Christiania, Heidelberg, and Bonn, studying Sanskrit at Bonn under August Wilhelm von Schlegel. The years 1823 to 1825 he passed in London and Paris, and at both places devoted himself assiduously to the study of philology. In Paris he studied the Pali language with Burnouf, with whom he published, in 1826, "Essai sur le Pali." Having returned to Bonn he became, in 1827, *Privatdocent* in the university, extraordinary professor in 1830, and ordinary professor in 1840. In this position he remained some years, until a chronic disease of the eye compelled him to retire. He was a member of

twenty-six academies and learned societies, and was regarded as the real founder of Indian archæology as a science. Among his numerous works the following are the most important: With August Wilhelm von Schlegel, his former teacher, he published a collection of fables, entitled "Hitopadesa" (1829-'31). Alone he published Jaysdeva's "Gitagovinda" (1837), "Gymnoisophista, sive Indicæ Philosophiæ Documenta" (1837), and an "Anthologia Sanscrita," with a glossary, (1837). The "Institutiones Linguae Paetricæ" are of considerable importance, while the "Indische Alterthumskunde" (1844-'62) is generally regarded as his principal work, laying the foundation of this science. Among his other important works are: "Zur Geschichte der griechischen und indo-scythischen Könige in Baktrien, Kabul und Indien" (1838), "Die altpersischen Keilschriften" (1836), and "Beiträge zur Deutung der Eugubinschen Tafeln" (1838). Among his essays for journals the most important is "Ueber die lykischen Inschriften und die alten Sprachen Kleinasiens" (in vol. x. of *Zeitschrift der deutschen morgenländischen Gesellschaft*). He also contributed a number of essays to *Indische Bibliothek*, *Rheinisches Museum*, and the journals of the societies of which he was a member.

LAURENTIE, PIERRE SÉBASTIEN, a French author and journalist, born January 21, 1793; died February 9, 1876. Having completed his collegiate education, he devoted his attention to the study of political economy, history, and philosophy. He was a college professor in 1814. He went to Paris in 1810 and sought an opportunity to develop his opinions through the public press, having previously made a profession of royalism. He connected himself with the public press, and founded the *Quotidiennes* and other Paris newspapers of that day. During his connection with the press he incurred a prosecution at law, in which he was defended by the eminent advocate M. Berryer. From this period he was almost constantly before the public, until the year 1859. He possessed a fertile genius, and great energy in literary labor. His published works are quite voluminous. They were brought out at intervals from the year 1822 to 1863, and earned for their author an enviable reputation in the world of letters. Among them are: "Études Littéraires et Morales sur les Historiens Latins," "De la Justice au Dix-neuvième Siècle," "Histoire des Ducs d'Orléans," "Histoire de France par Époques," "Histoire de l'Empire Romain," "Rome," etc.

LEMAÎTRE, FRÉDÉRIK, one of the best and most popular actors of the nineteenth century, born in Havre, in July, 1798; died January 26, 1876. His father and mother being themselves renowned comedians, he was destined to follow the same family profession. After having thoroughly studied classical literature, he learned declamation at the Conservatoire of Paris, where the celebrated Lafoy, discovering

in him the material for a great artist, devoted to him particular attention. He made his first appearance at the Odéon; but, in spite of Talma's warm sympathies, he was refused a place among the staff of this theatre, and was forced to play at other theatres till 1826, when he was engaged for the Odéon, and played in "Narcisse" and "Théramène." At the end of the year he appeared at the Porte Saint-Martin, where he at once achieved a prominent reputation with "Trente Ans, ou la Vie d'un Joueur." Not willing to attach himself for a long period to any particular theatre, he wandered from place to place during his whole artistic life. "Les Comédiens" and "Peblo," at the Ambigu, and "La Maréchale d'Acree" and "Le Moine," at the Odéon, filled the years 1830 and 1831. In 1832 he created his immortal character of *Robert Macaire*, in the play of that name, and of which he was the author, associated with Autier and St.-Amand. In 1834 Alexandre Dumas and Victor Hugo added to his already immense celebrity with "Richard d'Arlington" and "Lucrezia Borgia." In 1835 he made a tour in England, where he obtained quite a triumph. He then returned to Paris and created *Kean*, in the drama of that name by Alexandre Dumas. When the success of that play was exhausted he opened the new theatre of La Renaissance, of which he made the fortune by his grand impersonification of Victor Hugo's *Ruy Blas*. After a few reappearances at the Ambigu and Porte Saint-Martin he made his *début*, in 1842, at the Comédie Française, in "Othello," as well as in "Brunehaut et Frédégonde," a classical tragedy. He here met a complete failure, the peculiarly warm and accidental nature of his talent being quite unfit for the severe and rather cold lines of ancient repertory. He created "Don Cæsar de Bazan," and at the Porte Saint-Martin received a triumphal ovation, which soon threatened to degenerate into an *émoué* against the police. Troops and reinforcements of *sergents-de-ville* were summoned, the audience was dispersed, and it was three days before the production of "Don Cæsar" again took place. In 1845 he returned to London, where his "Robert Macaire" made him almost as popular among the cockneys as he already was in Paris. On his return to Paris he performed one of his best rôles in "La Dame de St.-Tropez." Afterward, Balzac having adapted for the stage, expressly for him, his "Dernière Incarnation de Vautrain," Lemaitre appeared in the character of *Vautrain* at the Porte Saint-Martin, but the malicious artist, in close concert with Balzac, had so admirably "made up his face" that when he first appeared there was but one exclamation from the pit to the upper galleries, among the 3,000 persons present: "*Louis Philippe! C'est la poire à Fifi!*" This was an unparalleled triumph in the art of grimace, but the play was suppressed on the very next day. On the 23d of February, 1848, he was playing

at the same theatre "Le Chiffonnier de Paris," a drama of strong socialist tendencies, and written by Félix Pyat, when the news reached the side-scene of the unexpected slaughter that was going on between the troops and the mob on the boulevards. The crowded audience, confident of the harmonious settlement of the reform movement which had culminated by the retreat of Guizot, were far from suspecting anything of the kind, when, between the second and third acts, the curtain rose and Lemaitre, half dressed, pale with emotion, holding a gun in his hand, rushed on the front of the stage and in a striking attitude exclaimed: "Citizens, what are you doing here? Don't you know that your brothers are shedding their blood for the sake of public liberties? Why, you stupid people, do you remain here to look at my faces and listen to my nonsense? Come on with me; come at once outside and let us play a citizen-like part in the great drama, the epilogue of which must be the apotheosis of the people!" And the great actor, in his costume of rag-picker, ran to the barricades, behind which he stood with the populace till Louis Philippe fled from the Tuileries. Many pieces were subsequently produced by the indefatigable artist, who impressed upon each of the plays the seal of his powerful originality. After several years of absolute retirement from the stage consequent upon the tragic death of his only son, Charles Lemaitre, who, while delirious with fever, threw himself out of the window of his apartment, Lemaitre reappeared on the theatre of his greatest triumphs, La Porte Saint-Martin, in 1868, at the age of seventy years. He reproduced several of his most popular plays, and although his voice was so weak that he could hardly be heard from the orchestra, yet the magnificent expression of his mobile physiognomy and the commanding authority of his gestures were such as to render his acting more attractive than that of any other artist. The Emperor Napoleon III. had conferred upon him the decoration of the Legion of Honor, besides an annual pension out of the public treasury. This proved to be his only resource in the decline of his life, for, like his illustrious predecessor, Kean (one of his best characters), Frédéric Lemaitre combined to an equal degree the features of modern Bohemianism. He was equally eminent as a public reader, having read with great success numerous poems from the "Châtiments" of Victor Hugo.

LETELLIER-VALAZÉ, CHARLES ROMAIN, a French general and senator, born April 18, 1812. He took part in the Crimean and the Italian Wars, and was sent to Mexico. He returned after the defeat of General Lorencez at Puebla, and lost favor with the Emperor, because he had called the latter's attention to the inevitable results of this undertaking. At the beginning of the war of 1870, he obtained a brigade in General Frossard's corps, and in October of the same year was created general

of division. He was elected to the National Assembly from Seine-Inférieure, in 1873, and in 1875 was elected a life-senator by the National Assembly, the forty-seventh, by 348 votes.

LEWIS, JOHN FREDERICK, a British artist, born July 14, 1805; died August 18, 1876. After having attracted considerable attention by his studies of wild animals, which he engraved, he devoted himself to foreign travel, and to portraying the modes of life of the semi-civilized nations of the South and East. He visited Spain, and made a series of drawings of the Alhambra during a residence of some months within its walls. He returned to England in 1851, after thirteen years' absence in Italy, Greece, Turkey, and Egypt, and exhibited several pictures of scenes and incidents in those countries. During his stay on the Continent he employed much of his time in studying the works of the great masters, and in 1853 his sixty-four copies, in water-colors, of some of the most famous pictures of the Venetian and Spanish schools were purchased by the Scottish Academy. In 1855 he again devoted himself to oil-painting, and in that and the following year exhibited his "Armenian Lady, Cairo," and a "Frank Encampment, Desert of Sinai," the latter in water-colors. In 1855 he was elected President of the Water-Color Society, but resigned his office in 1858. In July, 1859, he was elected Associate of the Royal Academy, and R. A. in 1865.

LICK, JAMES, an American philanthropist, died in San Francisco, Cal., October 1, 1876. He was born at Fredericksburg, Lebanon County, Pa., August 25, 1796. He was engaged in commercial pursuits in South America from 1821 to 1847, when he went to California, invested largely in real estate, and employed his means in other enterprises which resulted in the accumulation of a large fortune. In 1874 he assigned \$2,000,000 from his estate to trustees for various public and philanthropic purposes. In 1875 a revised deed was made. Besides large sums to be given to various charities, he directed that \$150,000 be paid for the establishment and maintenance of free public baths in San Francisco; \$700,000 for procuring for the University of California "a telescope of greater power than any yet made;" \$100,000 for statuary for the new City Hall of San Francisco; \$80,000 for a monument to Francis Scott Key, the author of "The Star-Spangled Banner;" and \$540,000 to found and endow the California School of Mechanic Arts in San Francisco. The total value of the trust-fund is estimated at about \$5,000,000.

LISGAR, JOHN YOUNG, baron, a British statesman, born April 31, 1807; died October 10, 1876. He was educated at Corpus Christi College, Oxford, of which he was a gentleman commoner, and where he took his bachelor's degree in 1829. He was called to the bar at Lincoln's Inn in 1834, but never practised. In 1831 he was elected to the House of Commons

from the county of Cavan, as a Conservative, but during his parliamentary career was an adherent of Sir Robert Peel, by whom he was appointed a Lord of the Treasury in 1841. In 1844 he was appointed Secretary of the Treasury, which position he held until the retirement of Sir Robert Peel. He was Chief Secretary for Ireland from 1852 to 1855, and Lord High Commissioner of the Ionian Islands from 1855 to 1859. In 1861 he was appointed Governor of New South Wales, and, returning to England in 1867, was soon after nominated Governor-General of Canada, which position he held until 1872. He was the oldest son of Sir William Young, Bart., and succeeded his father in the baronetcy in 1848; was sworn of the Privy Council in 1852, nominated a G. C. M. G. in 1855, and a G. C. B. in 1868; and was raised to the peerage, as Baron Lisgar, in 1870.

LITERATURE AND LITERARY PROGRESS IN 1876. Another year of unalleviated depression in all branches of commerce and industry has had its natural effect upon the book-trade. Production has been limited, and, so far as activity in the supply of literature depends upon the popular demand, it must be expected to be somewhat narrowly restricted until readers have more ability to purchase. And yet the sale of costly and valuable works, cyclopædias, and works of research, is so extensive as to be an encouraging indication of the taste and liberality of large numbers. The preoccupation of the public mind with the celebration of the national Centenary, and with the issues of a presidential election, must have tended to withdraw attention from general literature, while creating a special demand for certain classes of books, a few of permanent and many of transient interest. The Centennial commemoration has not only directed the eyes of all other nations to this country, but it has stimulated a patriotic interest in our own national history; the great events in our annals, and the principles that they expressed, have been brought freshly to the consciousness of the people. And while fewer original works of high character have appeared, there has been a marked and beneficial activity in the production and circulation of the writings of standard authors in popular editions.

HISTORY.—Among the more important works suggested by the Centennial commemoration is a new "Popular History of the United States," under the joint authorship of Mr. William Cullen Bryant and Mr. Sydney Howard Gay (Scribner), of which one volume has been published. Any literary undertaking for which Mr. Bryant makes himself responsible is sure of a favorable reception from the public. There is some reason to doubt whether the work has not been begun upon so large a scale as to make its bulk inconsistent with the popular character suggested by the title, but that it will be in other respects worthy of the prestige with which it

comes out may be looked for without misgiving. A new and thoroughly revised edition of Mr. Bancroft's "History of the United States" (Little, Brown & Co., Boston) has been opportunely issued. This "Centennial Edition," by the omission of the foot-notes, is brought within six portable volumes. The historical scholar will of course desire to know by what authorities the historian supports his statements, and for this purpose the larger editions are indispensable, but for popular reading this cabinet edition leaves nothing to be desired. And, though some of Mr. Bancroft's conclusions have been challenged, great respect is due to the results of forty years' investigation, pursued with unequalled advantages, embodied in a narrative everywhere warm with the spirit of patriotism. Another work called forth by the national commemoration, or rather a collection of essays, bears the title "The First Century of the Republic." The papers of which the volume is made up appeared in *Harper's Magazine*, and are by Profs. T. D. Woolsey, F. A. P. Barnard, Francis A. Walker, T. Sterry Hunt, W. G. Sumner, and Edward Atkinson, Hon. D. A. Wells, E. P. Whipple, Esq., Charles L. Brace, Esq., and others, each treating a topic for the effective handling of which his qualifications are well known, the whole forming a very interesting and instructive comparison between the state of our country a hundred years ago and at the present time. The several religious denominations have taken the occasion to record their progress during the century past. "Methodism and the Centennial of American Independence: or, The Loyal and Liberal Services of the Methodist Episcopal Church during the First Century of the History of the United States," by Rev. E. M. Wood, Ph. D.; "A Hundred Years of Methodism," by Bishop Matthew Simpson (Nelson & Phillips); "The Baptists and the National Centenary," edited by Lemuel Moss, D. D., President of the Indiana State University, and contributed to by several leading scholars and writers in the denomination (Baptist Publication Society); and "Centennial Historical Discourses delivered in the City of Philadelphia, June, 1876, by appointment of the General Assembly of the Presbyterian Church," by the Rev. Drs. A. T. McGill, S. M. Hopkins, S. J. Wilson, E. P. Humphrey, and E. D. Morris (Presbyterian Board of Publication), are examples of a species of literature in which are preserved features of the national history that should not be neglected. Among other works bearing upon the national history may be mentioned the following:

Centenary History. A Hundred Years of American Independence. (A. S. Barnes & Co.)

A Paragraph History of the American Revolution. By Edward Abbott.—Revolutionary Times; Sketches of our Country, its People and their Ways, One Hundred Years Ago. By Edward Abbott. (Roberts, Boston.)

American Progress. A National Handbook. Edited by E. O. Haven, D. D., LL. D.

The Domestic History of the American Revolution. By F. Elliot. (Lippincott.)

As to Roger Williams and his Banishment from the Massachusetts Plantation. With a Few Words concerning the Baptists, the Quakers, and Religious Liberty. A Monograph. By Henry Martyn Dexter, D. D., etc. (Congregational Publication Society.)

March 17, 1876. Celebration of the Centennial Anniversary of the Evacuation of Boston by the British Army, March 17, 1776. Reception of the Washington Medal. Oration delivered in Music Hall, and a Chronicle of the Siege of Boston. By George E. Ellis. (Williams, Boston.)

An Historical Account of the Old State-House of Pennsylvania, now known as the Hall of Independence. By Frank M. Etting. With numerous Heliotypes and Woodcuts. (Osgood, Boston.)

Concise History of the American People, from the Discovery of the Continent to 1876. By Jacob Harris Patton, A. M. (Ford.)

Political and Constitutional History of the United States. By Dr. H. Van Holst. Translated by John J. Lalor and Alfred B. Mason. (Callaghan.)

Our Country and Government for One Hundred Years—Statistical, Political, and Biographical. Including Declarations, Constitutions, Conventions, Election Returns, Annual Expenditures and Indebtedness, and numerous other Statistics. By Frank C. Bliss. (F. C. Bliss & Co.)

The History of Pennsylvania, from the Earliest Discovery to the Present Time. By William Mason Cornell, D. D., LL. D. (Quaker City Publication Company.)

America discovered by the Welsh in 1170 A. D. By Rev. Benjamin F. Bowen. (Lippincott.)

A History of New Hampshire, from its First Discovery to the Year 1830. By Edwin D. Sanborn, LL. D. (J. B. Clarke, Manchester, N. H.)

The History of Massachusetts, from the Landing of the Pilgrims to the Present Time. By George Lowell Austin. (Estes & Lauriat, Boston.)

The Annals of Kansas. By Daniel W. Wilder. (G. W. Martin, Topeka.)

The Journal of Claude Blanchard, Commissary of the French Auxiliary Army sent to the United States during the American Revolution. Translated from a French Manuscript by William Duane, and edited by Thomas Balch. (Munsell, Albany.)

Pioneers in the Settlement of America; from Florida in 1510 to California in 1849. By William A. Crafts. (Walker, Boston.)

The Century of Independence; embracing a Collection from Official Sources of the most Important Documents and Statistics connected with the Political History of America. Also a Chronological Record, etc. (Union Book Concern.)

The Declaration of Independence, and the Effects of it. An Oration delivered before the Citizens of New York at the Celebration of the Centennial Anniversary, July 4, 1876. By Richard S. Storrs, D. D., LL. D. (Randolph.)

Notes on the Settlement and Indian Wars of the Western Parts of Virginia and Pennsylvania, from 1763 to 1783 inclusive; together with a View of the State of Society and Manners of the First Settlers of the Western Country. By Joseph Doddridge. With a Memoir of the Author by his Daughter. Edited by Alfred Williams. (Munsell.)

Our Western Border One Hundred Years ago. By Charles McKnight. (J. C. McCurdy & Co., Philadelphia.)

The Centennial History of the United States, embracing the Whole Period, from the Earliest Discoveries to the Present Time. Including a Full Description of the Opening Ceremonies of the Grand International Exhibition, May 10, 1876. By C. B. Taylor. (World Publishing Company.)

Centennial History of the Public School System of California. By John Swett. (Bancroft, San Francisco.)

Scheyichbe and the Strand; or, Early Days along the Delaware. With an Account of Present Events at Sea Grove. To which is appended a Geological Description of the Shore of New Jersey. By Edward S. Wheeler. (Lippincott.)

The Illustrated History of the Centennial Exhibition, Philadelphia, 1876. By Thomas Bentley. (H. W. Kelley, Philadelphia.)

Battles of the American Revolution. Historical and Military Criticism, and Topographical Illustration. By Henry B. Carrington, LL. D., U. S. A. (Barnes.)

The Great Republic. From the Discovery of America to the Centennial, July 4, 1876. The History of the Great Republic, considered from a Christian Standpoint. By Jesse T. Peck, D. D., LL. D., one of the Bishops of the M. E. Church. (Nelson & Phillips.)

To the history of our civil war no more valuable contribution has been recently made than the "History of the Army of the Cumberland," by Thomas B. Van Horne (Clarke, Cincinnati). Chaplain Van Horne was the depository of the papers of the late General Thomas, and enjoyed his confidence. His work has less interest to the general reader, from the fact that it is so carefully restricted to an account of the operations carried on by the army corps under General Thomas as to give an inadequate notion of the campaigns in which it took part. But, taken in connection with other works, it yields much historical material for that more authentic history of those great events which can be written only when the record is more completely made up. A memorable piece of literary, philosophical, and religious history is embodied in the Rev. O. B. Frothingham's "Transcendentalism in America" (Putnam's). A local history of more than ordinary value is in part published, Mrs. Martha J. Lamb's "History of the City of New York" (Barnes), and, as far as it has appeared, fulfills the expectations that had been formed of its character as a work of extended and well-directed research. Other historical works, general and local, or upon special topics, deserve mention:

Reminiscences of the Texan Republic. By Ashbel Smith. (E. N. Cushing, Houston, Texas.)

Historical Studies. By Eugene Lawrence. (Harpers.)

Confederate View of the Treatment of Prisoners. Compiled from Official Sources. By the Rev. J. William Jones, D. D., Secretary of the Southern Historical Society. (Ellyson, Richmond.)

A History of Pittsfield, Berkshire County, Mass., from the Year 1800 to the Year 1876. By J. E. A. Smith. By authority of the Town. (C. W. Bryant & Co., Springfield.)

History of the City of Troy (N. Y.), from the Expulsion of the Mohegan Indians, in 1628, to 1876. By A. J. Weise, A. M. To which are appended Histories of Lansingburg, Waterford, Cohoes, West Troy, and Green Island, from their Settlement to the Present Time. (W. H. Young, Troy.)

The Southern Side; or, Andersonville Prison. Compiled from Official Documents in the Hands of R. Randolph Stevenson, M. D., formerly Surgeon C. S. A. (Turnbull Brothers, Baltimore.)

History of Liberty. By John F. Aiken. (Barnes.)

Judaism at Rome. By Frederick Huidkoper. (Miller.)

Centennial History of Erie County, N. Y. By

Crisfield Johnson. (Published by the author, Aurora, N. Y.)

Historical Sketch of the Town of Pawtucket, R. I., from 1636 to 1876. By Rev. Massena Goodrich. (Nickerson, Sibley & Co., Pawtucket.)

The Fleets of the World. The Galley Period. By Foxhall A. Parker, Commodore U. S. A. (Van Nostrand.)

A Century of Gospel-Work: a History of the Growth of Evangelical Religion in the United States; containing Full Descriptions of the Great Revivals of the Century, etc. By Rev. W. F. P. Noble. (Watts, Philadelphia.)

A History of the Eastern Diocese. By Calvin R. Boehlder. In Three Volumes. Vol. I. (Claremont [N. H.] Manufacturing Co.)

A Review of the Political Conflict in America, from the Commencement of the Antislavery Agitation to the Close of Reconstruction; comprising also a *Resumé* of the Career of Thaddeus Stevens. Being a Survey of the Struggle of Parties, which destroyed the Republic and virtually monarchised its Government. By Alexander Harris. (T. H. Pollock.)

History of Chicago. What I remember of Early Chicago. By William Bross, ex-Lieutenant-Governor of Illinois. (Jansen, McClurg & Co., Chicago.)

A Popular History of the Catholic Church in the United States. By John O'Kane Murray, B. S. (Sadlier.)

The First Half-Century of Dartmouth College. Being Historical Collections and Personal Reminiscences. By Nathan Crosby, of the Class of 1820. (J. B. Parker, Hanover, N. H.)

Early History of Springfield. By Judge Henry Morris. Being an Address on the Two-Hundredth Anniversary of the Burning of the Town by the Indians. (F. W. Morris, Springfield, Mass.)

A Manual of Universal Church History. By Rev. John Alzog, D. D. Translated and brought down to the Present Time, by F. J. Pabisoh, D. D., LL. D., and Rev. Thomas S. Byrne. In Three Volumes. Vol. III. (Clarke, Cincinnati.)

The Indian Saint; or, Buddha and Buddhism. A Sketch, Historical and Critical. By Charles D. B. Miles. (Miller.)

A Comprehensive History of Methodism. By James Porter, D. D. (Hitchcock & Walden.)

History of the Philadelphia Brigade: Sixty-ninth, Seventy-first, Seventy-second, and One Hundred and Sixth Regiments, Pennsylvania Volunteers. By Charles H. Banes. (Lippincott.)

The Arabs and the Turks. Their Origin and History, their Religion, their Imperial Greatness in the Past, and their Condition at the Present Time. By Edson L. Clark. (Congregational Publication Society.)

Genealogical History of the Town of Reading, Mass., including the Present Towns of Wakefield, Reading, and North Reading. With Chronological and Historical Sketches from 1639 to 1874. By Hon. Lilley Eaton. (Lockwood, Brooks & Co., Boston.)

BIOGRAPHY.—Seldom has a work appeared that commanded more general attention, at home and abroad, or that on the whole better rewards the public curiosity, than the "Life, Letters, and Journals of George Ticknor" (Osgood), a man who was fortunate in the acquaintance of a large number of eminent persons in Europe, and had enough substance of character to be in no danger of being lost or dwarfed in the crowd of celebrities around him. A work that has long needed to be done is at last very well done, in "The Life of Alexander Hamilton," by John T. Morse

Jr. (Little, Brown & Co., Boston). The fame of Hamilton is one of the treasures of the republic, and it was more than time that he should be known to the present generation otherwise than as exhibited by his rivals and detractors. A remarkable career is sketched in the "Life of the Rev. Eliphalet Nott, D. D., LL. D.," by C. Van Santvoord, D. D., and Taylor Lewis, LL. D. Dr. Nott gained a national reputation as a pulpit orator, especially by his eloquent eulogy on Hamilton in 1805, subsequently distinguished himself for nearly half a century as an educator at the head of Union College, and almost survived the civil war. A biography of historical value and interest is the "Life of William Samuel Johnson," by Rev. E. E. Beardsley (Hurd & Houghton). The "Life of Israel Putnam," by Increase N. Tarbox (Lockwood, Brooks & Co., Boston), is not so much a narrative of the life of the subject as an argument to prove that he commanded at Bunker Hill. There is room for a work that shall eliminate the real life from the legendary story of Putnam. The "Memoirs of Charles G. Finney, by Himself" (Barnes), and the "Life and Letters of the Rev. John McClintock, D. D., LL. D.," by the Rev. Dr. G. R. Crooks, are works of permanent worth in religious biography.

Life and Letters of James Henley Thornwell, D. D., LL. D. By B. M. Palmer, D. D., LL. D. (Whittet & Shepperson, Richmond, Va.)

Biographical Annals of the Civil Government of the United States during the First Century of its Existence. From Original and Official Sources. By Charles Lanman. (Anglim, Washington.)

Life of General Thomas J. Jackson. By S. N. Randolph. (Lippincott.)

The Life of James W. Grimes, Governor of Iowa, 1854-'58, a Senator of the United States, 1859-'69. By William Salter. (D. Appleton & Co.)

The Life of Rev. Daniel Witt, D. D., of Prince Edward County, Virginia. By Rev. J. B. Jeter, D. D. (Ellyson, Richmond.)

The Clapp Memorial. Record of the Clapp Family in America. Containing Sketches of the Original Six Emigrants, and a Genealogy of their Descendants bearing the Name, etc. Ebenezer Clapp, Compiler. (D. Clapp & Son, Boston.)

The Life of Benjamin Franklin. By J. S. C. Abbott. (Dodd, Mead & Co.)

Brief Biographies of European Public Men. Edited by Thomas Wentworth Higginson. Vol. IV. German Political Leaders. By Herbert Tuttle. (Putnam.)

The Bench and Bar of the South. By H. S. Foote (Soule.)

The Life and Public Services of Governor Rutherford B. Hayes. By Colonel Russell H. Conwell. With a Sketch of the Life of Hon. W. A. Wheeler. (Russell.)

The Life of (John) Conrad Weiser, the German Pioneer, Patriot, and Patron of Two Races. By C. Z. Weiser, D. D. (D. Miller, Reading, Pa.)

Life of Rubens. By George H. Calvert. (Lee & Shepard.)

The Life and Public Services of Samuel J. Tilden. By T. P. Cook. (D. Appleton & Co.)

Memoir of Lieutenant-Colonel Tench Tilghman, Secretary and Aide to Washington. Together with an Appendix containing Revolutionary Journals and Letters hitherto unpublished. (Munsell.)

Life, Letters, and Addresses of Dr. L. L. Pinker-

ton. By John Shackelford, Jr. (Chase & Hall, Cincinnati.)

Reminiscences of Levi Coffin, the reputed President of the Underground Railroad. (Western Tract Society.)

Memoir of Dr. Samuel Gridley Howe. By Julia Ward Howe. With other Memorial Tributes. (Perkins Institution for the Blind, Boston.)

A Sketch of the Life, Character, and Public Services of Thomas Jefferson. With some Account of the Aid he rendered in establishing our Independence and Government. By Rev. Thomas J. Davis. (Claxton.)

Edgar Allan Poe. A Memorial Volume. By Sara Sigourney Rice. (Turnbull, Baltimore.)

Life of General Custer. By F. Whittaker. (Sheldon.)

Memorials of Horatio Balch Hackett, D. D. Edited by Prof. George H. Whittemore. (E. Darrow, Rochester.)

Sketch of the Life and Character of Rutherford B. Hayes. By William D. Howells. (Hurd & Houghton.)

SCIENCE AND PHILOSOPHY.—The condition of our national finances, and other political problems demanding solution, have set in motion many pens. Among the publications on the currency question, particular mention should be made of "Paper-Money Inflation in France: How it Came, what it Brought, and how it Ended," by President Andrew D. White, of Cornell University (D. Appleton & Co.)—a good instance of "philosophy taught by example." A popular presentation of the same subject by means of an ingenious fiction is "Robinson Crusoe's Money," by David A. Wells (Harpers). An elementary treatise to the same general purpose, and well adapted thereto, is "An Alphabet in Finance," by Graham McAdam (Putnams). Other works, presenting different sides and aspects of the same subject are embraced in the following list:

The National Currency and the Money Problem. By Amasa Walker, LL. D. (A. S. Barnes & Co.)

Immediate Preparation and Open Resumption. An Open Letter to the President of the United States. By Robert Treat Paine. (Williams, Boston.)

The Legal-Tender Acts considered in Relation to their Constitutionality and their Political Economy. By Samuel Spear. (Baker, Voorhis & Co.)

Speeches, Addresses, and Letters on Industrial and Financial Questions. By William D. Kelley, M. C. (H. C. Baird, Philadelphia.)

Bi-Metallic Money. The Necessity and Function of Silver in the Currency. By Henry Cornusetti. (J. S. Homans.)

The Question of Resumption of Specie Payments stated and explained. By J. W. Shuckers. (Campbell, Philadelphia.)

The Money Question. By William A. Berkey. (Published by the Author, Grand Rapids, Mich.)

The Money and Finance of the French Revolution: Assignats and Mandats. A True History. Including an Examination of Dr. Andrew D. White's "Paper-Money Inflation in France." By Stephen D. Delleys. (H. C. Baird.)

Gold and Debt. An American Handbook of Finance, with over 80 Tables and Diagrams, illustrative of the Following Subjects: The Dollar and other Units; Paper Money in the United States and Europe; Gold in the United States and Europe; Suspension of Specie Payments, etc., etc. Also a Digest of the Monetary Laws of the United States. By W. L. Fawcett. (Griggs, Chicago.)

Other political and economical topics have

engaged public attention to some extent. Mr. Charles Nordhoff's work on "The Cotton States in the Spring and Summer of 1875" (D. Appleton & Co.), though by no means abstract in form and method, has in it no small amount of sound political philosophy. Several political questions are treated from a standpoint of radical reform in "The Protection of Majorities; or, Considerations relating to Electoral Reform," etc., by Josiah P. Quincy (Roberts). One of Mr. Quincy's topics is discussed from an opposite point of view by Mr. Hamilton Andrews Hill in his paper on "The Exemption of Church Property from Taxation" (Williams, Boston). The larger subject of "Religion and the State" is ably investigated by the Rev. Dr. Samuel T. Spear (Dodd, Mead & Co.). A question that has at times threatened to become an active element in party politics is the subject of earnest discussion in "The Chinese Problem," by Prof. L. T. Townsend (Lee & Shepard, Boston). The relations of capital and labor are the subject of three noticeable books: "Talks about Labor," by J. N. Larned (D. Appleton & Co.); "The Wages Question: a Treatise on Wages and the Wages Class," by Francis A. Walker (Holt); and "Working People and their Employers," by Washington Gladden (Lockwood, Brooks & Co., Boston). In this connection mention is suitable of Prof. J. L. Dimon's oration on "The Alienation of the Educated Classes from Politics" (S. S. Rider, Providence).

In the departments of speculative philosophy, there is not much to notice. An acute piece of dialectics, pursued with admirable spirit, is presented in the volume entitled "Faith and Modern Thought," by Prof. R. B. Welch, with an introduction by Prof. Taylor Lewis (Putnams). "The Philosophy of Religion; or, The Rational Grounds of Religious Belief," by President John Bascom, of the University of Wisconsin (Putnams), is the work of a vigorous and enterprising thinker, who never comes before the public without something worth attending to, but whose works, one cannot help thinking, would be the better if they came in less rapid succession. The same publishers issue "Principles of Psychology," by Prof. Henry N. Day, and "The True Order of Studies," by Dr. Thomas Hill, ex-President of Harvard College. "Similarities of Physical and Religious Knowledge," by Rev. James Thompson Bixby (D. Appleton & Co.), is an original and profound discussion. Another work in which the relations of physical to metaphysical science and to theology are thoughtfully and wisely considered is "Darwiniana: Essays and Reviews pertaining to Darwinism," by Asa Gray, professor in Harvard University (D. Appleton & Co.). "The Development Hypothesis: Is it sufficient?" by President James McCosh, D. D., LL. D., of Princeton College (Carters), brings together papers heretofore published, with some new matter.

The Physical Basis of Immortality. By Antoinette Brown Blackwell. (Putnams.)

Life History of Animals. By A. S. Packard, Jr. (Holt.)

Half-Hours with Insects. By the same. (Estes & Lauriat, Boston.)

Analytical Processes; or, The Primary Principle of Philosophy. By Rev. William I. Gill. (Authors' Publishing Company.)

Chemistry. Theoretical, Practical, and Analytical, as applied to the Arts and Manufactures. By Writers of Eminence. (Lippincott.) In parts.

A History of Ancient and Modern Philosophy. By Joseph Haven, D. D. (Sheldon.)

Duty contemplated as Due-ty. That which is due. By Myron A. Munson, M. A. (Williams, Boston.)

The Religious Sentiment. Its Source and Aim. A Contribution to the Science and Philosophy of Religion. By D. G. Brinton. (Holt.)

The Analysis of Plants. By Mark W. Harrington. (Sheehan & Co., Ann Arbor, Mich.)

The Cosmic God. A Fundamental Philosophy in Popular Lectures. By Isaac M. Wise. (Westermann.)

Annual Record of Science and Industry for 1875. Edited by Spencer F. Baird, with the Assistance of Eminent Men of Science. (Harpers.)

Spiritualism, and Allied Causes and Conditions of Nervous Derangement. By William A. Hammond, M. D. (Putnams.)

A Botanical Handbook of Common Local, English, Botanical, and Pharmacopœical Names, arranged in Alphabetical Order, of most of the Crude Vegetable Drugs, etc., in Common Use. (J. Campbell, Boston.)

The Modern Genesis: being an Inquiry into the Credibility of the Nebular Theory of the Origin of Planetary Bodies, the Structure of the Solar System, and of General Cosmical History. By Rev. W. B. Slaughter. (Nelson & Phillips.)

A Manual of the Vertebrates of the Northern United States, including the District east of the Mississippi River and north of North Carolina and Tennessee, exclusive of Marine Species. By David Starr Jordan, M. S., M. D. (Jansen, McClurg & Co., Chicago.)

The Ultimate Generalization. An Effort in the Philosophy of Science. (C. P. Somerby.)

From Dawn to Sunrise: A Review, Historical and Philosophical, of the Religious Ideas of Mankind. By Mrs. J. Gregory Smith. (Lovell, Adam & Co.)

The Science and Art of Education. A Lecture. By Joseph Payne. (E. Steiger.)

Tables, Distribution, and Variations of the Atmospheric Temperature in the United States. By Charles A. Schott. (Van Nostrand.)

The Solar Theory of Myths. By Prof. John De Witt Warner. (Munsell.)

The Ethics of Benedict de Spinoza. From the Latin. With an Introductory Sketch of his Life and Writings. (Van Nostrand.)

The Phenomena of Spiritualism scientifically explained and exposed. By Rev. Asa Mahan, D. D. (Barnes.)

Chemia Coartata; or, The Key to Modern Chemistry. By A. H. Kollmyer. (Lindsay & Blakiston, Philadelphia.)

Archology; or, The Science of Government. By S. V. Blakeslee. (Roman, San Francisco.)

Outlines of Lectures on the History of Philosophy. By John J. Elmendorff, S. T. D. (Putnams.)

Life-History of Our Planet. By William D. Gunning. Illustrated by Mary Gunning. (Keen, Cook & Co., Chicago.)

The Wild-Flowers of America. Illustrations by Isaac Sprague. Text by Prof. George L. Goodale, Harvard University. (Hurd & Houghton.)

The Problem of Problems. By C. Braden. (Chase & Hall, Cincinnati.)

The Land-Birds and Game-Birds of New England. With Descriptions of the Birds, their Nests and Eggs, their Habits and Notes. By H. D. Minot. (Estes & Lauriat, Boston.)

THEOLOGY AND RELIGION.—In quantity, the publications in this department do not fall short of an average supply. But there are fewer than usual of works claiming notice on account of marked originality and power. Dr. Philip Schaff, with his corps of learned scholars and divines, has continued and nearly completed the issue of Dr. Lange's "Commentary on the Bible," translated from the German, with large additions (Scribners), making it an exegetical library. Prof. Frederick Gardiner, D. D., of the Berkeley Divinity School, Middletown, Conn., has put forth a new "Harmony of the Four Gospels, in Greek, according to the Text of Tischendorf," with a collation of the *Textus Receptus*, and of the most important critical texts, and an appendix on the "Principles of Textual Criticism" (W. F. Draper, Andover, Mass.). The appendix is published separately. Dr. Gardiner has an established reputation as a biblical critic, which this publication will sustain and extend. Dr. Henry Cowles, of Oberlin College, Ohio, continues his series of popular but not superficial commentaries, by the issue of a volume on "The Gospel and Epistles of John" (D. Appleton & Co.). A republication of Theodore Parker's "Discourse on Matters pertaining to Religion," with an introduction by O. B. Frothingham and a biographical sketch by Hannah E. Stevenson (Putnams), is an attempt of doubtful promise to revive interest in a half-forgotten controversy, the parties to which, on each side, have since changed their positions. "The Ministry of the Word: Yale Lectures on Preaching," by W. M. Taylor, D. D. (Randolph), and "Lectures on the History of Preaching," by Prof. J. A. Broadus, D. D., LL. D., of the Southern Baptist Theological Seminary (Sheldon), each, in a different way, shows how much freshness can be given to a hackneyed topic by an independent and scholarly treatment. Two posthumous volumes will receive, as they deserve, a welcome from the lovers of sound and sober thought, and of manly feeling, in the discussion of the weightiest themes: "Reason, Faith, and Duty," sermons by James Walker, D. D., LL. D., late President of Harvard College (Roberts), and "Christ in the Life," sermons and poems, by Edmund H. Sears, D. D. (Lockwood, Brooks & Co.). A volume of sermons by the venerable Orville Dewey, D. D., entitled "The Two Great Commandments" (Miller) shows his mental vigor to be unabated. Without further particularization, we subjoin the following titles:

Being a Christian. What it means, and how to begin. By Washington Gladden. (Congregational Publication Society.)

The Acts of the Apostles, with Notes, Comments, Maps, and Illustrations. By Rev. Lyman Abbott. (Barnes.)

- The Result of the Brooklyn Advisory Council of 1876. With the Letters of Dr. Leonard Bacon, Prof. Timothy Dwight, etc., etc. (Barnes.)
- An Address on Congregationalism, as affected by the Declarations of the Advisory Council of February, 1876. By Richard S. Storrs, D. D. (Barnes.)
- This Our Life. By Charles H. Anthony, A. M. With an Introduction by John P. Newman, D. D. (Munsell.)
- Meditations on the Essence of Christianity. By R. Laird Collier, D. D. (Roberts, Boston.)
- Lectures. The Rise of the Romish Church, its Results in Europe and its Designs upon the Institutions of America. By the Rev. J. B. Helwig, A. M. With an Introduction by the Hon. William Lawrence, LL. D. (U. B. Publishing House.)
- The Christian Year: a Sketch of its Origin, of the Church-Year as a Whole, and the Different Conceptions of it, and Usages in the Greek, Roman, Lutheran, and Anglican Churches, and of the Advantages to be derived from its observances, with Historical Tables. By Edward T. Horn. (Lutheran Book-store.)
- Missionary Life among the Villages in India. By Rev. T. J. Scott, D. D., Twelve Years Missionary of the Methodist Episcopal Church in India. (Hitchcock & Walden.)
- Prayer, and its Remarkable Answers. By William W. Patton, D. D. (Goodman, Chicago.)
- The Prayer-Gauge Debate. By Prof. Tyndall, Francis Galton, and Others, against Dr. Littledale, President McCosh, the Duke of Argyll, Canon Liddon, and the *Spectator*. (Congregational Publication Society.)
- Truths for the People. By W. S. Plumer, D. D. (American Tract Society.)
- Christian Coöperation in Actual Life; or, United Brethren in Christ. By John Vinton Potts. (United Brethren Publication House.)
- Supposed Miracles. By Rev. J. M. Buckley. (Hurd & Houghton.)
- The Gospel-Life of Jesus Christ. By L. A. Davis. (Lothrop.)
- The Book called Job. From the Hebrew. With Foot-Notes. By Oliver S. Halsted, ex-Chancellor of New Jersey. (Published by Author, Lyon's Farms, N. J.)
- Report of the Bonn Conferences, held in August, 1875. Translated by Rev. Samuel Buel, D. D. (Whittaker.)
- The Gate of the Temple; or, Prayers for Children. By Rev. W. W. Newton. (Whittaker.)
- Miscellanies. Old and New. By John Cotton Smith, D. D. (Whittaker.)
- Beliefs of the Unbelievers, and Other Discourses. By O. B. Frothingham. (Putnams.)
- A Bible Word-Book. A Glossary of Scripture Terms which have changed their Meaning, or are no longer in General Use. By William Swinton. (Harpers.)
- A Treatise on the Meaning of the Derivations of the Greek Root BA. By the Rev. Hiram Carlton. (Williams, Boston.)
- Notes on James, Peter, John, and Jude. By Albert Barnes. Revised edition. (Harpers.)
- In the Vineyard. By E. F. Burr, D. D. (Crowell.)
- Hopes of the Human Race, here and hereafter. By F. P. Cobbe. (Miller.)
- Outlines of the Religion and Philosophy of Swedenborg. By Theophilus Parsons. (Roberts.)
- The Mariner's Progress; or, Captain Christian's Voyage on the Good Ship "Glad Tidings" to the Promised Land. By Duncan Macgregor. (Carters.)
- Glad Tidings. Addresses, etc., by D. L. Moody, at the Hippodrome, New York, February-April, 1876. Compiled, with Revisions and Additions, from Reports of the *New York Tribune*. (E. B. Treat.)
- Rays of the Sun of Righteousness. By Richard Newton, D. D. (Carters.)
- Truths for To-day. Second Series. By David Swing. (Jansen, McClurg & Co., Chicago.)
- Sermons, by the Late Rev. Luther Keene, of Franklin, Mass. With an Introduction by Rev. S. E. Herrick. (Congregational Publication Society.)
- Christian Baptism: Its Subjects and Mode. By S. M. Merrill, D. D., Bishop of the M. E. Church. (Hitchcock & Walden.)
- Woman's Work in the Church. By Mrs. Martha Tyler Gale. (Congregational Publication Society.)
- The Resurrection, from a Modern Standpoint. A Gift-Book for the Bereaved. By Rev. A. C. Rose. (Nelson & Phillips.)
- The Historical Jesus of Nazareth. By M. Schleisinger, Rabbi, etc. (Somerville.)
- Thirty Discussions, Bible-Stories, and Lectures. By D. M. Bennett. (Bennett.)
- Is "Eternal" Punishment endless? Answered by a Restatement of the Original Scripture Doctrine. By an Orthodox Minister of the Gospel. (Lockwood, Brooks & Co., Boston.)
- Bible-Lands illustrated. By H. C. Fish, D. D. (American Publishing Company.)
- The Doctrine of Prayer: Its Utility and its Relation to Providence. By P. H. Mell, D. D., LL. D. (Sheldon.)
- Convent-Life; or, Should Protestant Children be educated in Roman Catholic Schools? (T. Whittaker.)
- Sprinkling, the True Mode of Baptism. By Rev. E. Greenwald, D. D. The True Church: Its Way of Justification, and the Holy Communion. By the same author. (Lutheran Book-store.)
- A Living Faith. By George S. Merriam. (Lockwood, Brooks & Co., Boston.)
- Vesper Service. An Order of Evening Worship especially arranged for Universalist Churches. By Prof. J. A. Seitz. (Miller.)
- Acquaintance with God; or, Salvation and Character. By Rev. E. A. Wyman, Ph. D. With an Introduction by Rev. James Upham, D. D. (Bryan & Co., Springfield, Mass.)
- A Liturgy for the New Church. (Lippincott.)
- Saturday Evening; or, Thoughts on the Progress of the Plan of Redemption. By Right Rev. B. B. Smith, D. D. (Whittaker.)
- Our Children. By William G. Hayward, D. D. (Nelson & Phillips.)
- Sermons and Essays. By Francis T. Washburn. With Extracts from a Memorial Pamphlet. (Geo. H. Ellis, Boston.)
- Notes on the Gospel of Luke, Explanatory and Practical. By George W. Clark, D. D. (American Baptist Publication Society.)
- The Jewish Temple. Its Typical and Spiritual Meaning. By George Rogers. (F. H. Revele, Chicago.)
- The Remedial System: or, Man and his Redeemer. By Dr. Hiram Christopher. (Transylvania Printing and Publishing Company.)
- The Chronology of Bible History, and how to remember it. By Rev. C. Munger, A. M. (Nelson & Phillips.)
- The Christian Faith. An Exposition of the Apostles' Creed. By the Rev. George M. Baker. (M. Taylor, Buffalo, N. Y.)
- Knowledge and Faith, and other Discourses. By Octaviana Brooks Frothingham. (Putnams.)
- The True Man, and Other Practical Sermons. By Rev. Samuel S. Mitchell, D. D. (Carters.)
- The Judgment of Jerusalem. By W. Patton. (Carters.)
- Selections from the Talmud. Translated by H. Polans. (Claxton, Philadelphia.)
- Medieval and Modern Saints and Miracles. Not *ab uno e Societate Jaru*. (Harpers.)
- Jehovah-Jesus. The Oneness of God. The True Trinity. By Robert D. Weeks. (Dodd, Mead & Co.)
- Ministerial Education and Training in the Meth-

odist Episcopal Church. By D. P. Kidder, D. D. (W. F. Draper, Andover, Mass.)

Lectures on the Gospels, for the Sundays and Chief Festivals of the Church Year. By Joseph A. Seiss, D. D. (Lutheran Book-store.)

Gospel Themes. A Volume of Sermons. By Rev. Charles G. Finney, Late President of Oberlin College. Edited by Rev. Henry Cowles, D. D. (Goodrich, Oberlin.)

Light on the Cloud; or, Hints of Comfort for Hours of Sorrow. By M. J. Savage. (Lockwood, Brooks & Co., Boston.)

The Religion of Evolution. By M. J. Savage. (Lockwood, Brooks & Co., Boston.)

Luther and the Swiss. A Lecture. By Gerhard Uhlhorn, D. D. Translated by G. F. Krobek, D. D. (Lutheran Book-store.)

Fifty Years with the Sabbath-Schools. By Rev. Asa Ballard. (Lockwood, Brooks & Co.)

Orthodoxy and Revivalism. By J. T. Sunderland. (Miller.)

Sermons on the Parables. By the Late William Davidson, D. D. (Western Tract Society.)

"Graybeard's" Lay Sermons. Being a Summary of the Great Doctrines of Holy Scripture as interpreted and illustrated by the Scriptures themselves. By John Franklin Graff. (Lippincott.)

A Young Man's Difficulties with his Bible. By Rev. D. W. Faunce. (Sheldon.)

Why Four Gospels? or, The Gospel for all the World. A Manual designed to aid Christians in the Study of the Scriptures, and to a Better Understanding of the Gospels. By D. S. Gregory, D. D. (Sheldon.)

The Fire and the Hammer; or, Revivals, and how to promote them. By Rev. Orson Parker.

Octavius Brooks Frothingham, and the New Faith. By Edmund C. Stedman. (Putnam.)

The Meaning and Power of Baptism. By Rev. J. G. D. Stearns. (Tibbals.)

Footsteps of the Master. By Harriet Beecher Stowe. (Ford.)

Soul-Thirst, and Other Sermons. By Francis Washburn. (Tibbals.)

The Teachings of Providence; or, New Lessons on Old Subjects. By Rev. J. B. Gross. (Lippincott.)

The King's Ferry-boat. By John N. Norton, D. D. (Whittaker.)

How to see Jesus. By James William Kimball. (Lockwood, Brooks & Co.)

Christ the Teacher of Men. By A. W. Pitzer, author of "Eoos Deus-Homo." (Lippincott.)

The Fulness of Blessing. By Sarah F. Smiley. (A. D. F. Randolph.)

Lessons of Faith and Life. Discourses by Rev. E. H. Chapin, D. D. (Miller.)

Milestones in our Life's Journey. By Rev. Samuel Osgood, D. D., LL. D. (Dalton.)

Peter the Apostle. By the Rev. William M. Taylor, D. D. (Harpers.)

From Bethlehem to Calvary. By Faith Latimer. (Nelson & Phillips.)

The Psalter a Witness to the Divine Origin of the Bible. By Talbot W. Chambers, D. D. The Vedder Lectures for 1876. (Randolph.)

The Land and the Life. Sketches and Studies in Palestine. By Rev. Albert Zabriskie Gray. (Randolph.)

The Faith of our Fathers. Being a Plain Exposition and Vindication of the Church founded by our Lord Jesus Christ. By the Rt. Rev. James Gibbons, D. D., Bishop of Richmond, etc. (J. Murphy & Co., Baltimore.)

Under Canvas; or, Tent-Worship in Summer Months. By William B. Mucklow. (Atlantic Publishing and Engraving Company.)

The Doctrine of the Higher Christian Life compared with the Holy Scriptures. By Alvah Hovey, D. D., President of the Newton Theological Institution. (Young, Boston.)

Sermons to the Clergy. By Gail Hamilton. (Gill, Boston.)

GEOGRAPHY, TRAVEL, AND EXPLORATION.—To the literature of travel a few remarkable additions have been made. "The Mikado's Empire," by W. Elliot Griffis, A. M. (Harpers), might, with almost equal if not greater propriety, have been placed among histories, as half the work is made up of a sketch of Japanese history, including a particularly full account of the recent revolution. The remainder of the volume records the author's observations in different parts of the empire. His position as a professor in the Imperial University, and his uniformly friendly relations with the Government, gave him every opportunity for acquiring authentic information. It has been suggested by some critics that he relied somewhat too implicitly on the information he received from Japanese officials, and that the view of the empire presented in his book is more rose-colored in consequence than the reality. But prejudice in favor of an Asiatic government is so uncommon in observers from Europe and America that it may be fair to set off Japanese against European prepossession, and to conclude that something is to be learned from combining the views on both sides. Mr. Griffis has certainly made a volume of extraordinary interest, notwithstanding the drawback of a too rhetorical style. Mr. Eugene Schuyler's "Turkistan: Notes of a Journey in 1873 in the Russian Province of Turkistan, the Khanates of Khokan and Bokhara," etc. (Scribner), did not need the advertisement it gained from the author's report of Turkish outrages in Bulgaria. His thorough command of the Russian language, and the favor and encouragement he received from Russian officers, civil and military, gave him every opportunity for observation in regions from which European, and especially English, visitors have been pretty strictly excluded. Much of the information he has gathered is therefore absolutely new, and things before dimly known are set in clearer light, and made intelligible. Light is thrown upon the character, the strength, and weakness of the Russian occupation of Central Asia, and the policy which led to it and rules in it. The narratives and descriptions are graphic, but simple and unpretending in style, making the work as entertaining as it is informing. In his "Through and Through the Tropics," Mr. Frank Vincent, Jr., has condensed the observations made in "Thirty Thousand Miles of Travel in Oceania, Australia, and India" (Harpers) into a volume of very moderate dimensions, which at once suggests necessary superficiality. But Mr. Vincent is an experienced traveler, and understands well the art of selection. Out of the mass of things seen, he has a quick eye for what will best bear telling and will tell in his composition. He is thus an entertaining companion wherever he goes. Dr. Henry M.

Field, in his letters describing his tour "From the Lakes of Killarney to the Golden Horn" (Scribner), has gone over beaten ground, but is never trite in his observations, partly because it is to himself beaten ground. He is spared the temptation which besets an inexperienced traveler to regard whatever is new to himself as information equally striking to the public. One of the charms of the volume is found in the necessary comparison between recent and earlier views. Mr. Charles Dudley Warner's two books, "My Winter on the Nile, among the Mummies and Moslems" (American Publishing Co.), and "In the Levant" (Osgood), narrate his Oriental experiences with his usual keen-sightedness and his peculiar humor. Perhaps, as is apt to be the case with most reputed "humorists," he is sometimes unnecessarily haunted with the consciousness that he is expected to be funny, and is accordingly tempted to be unseasonably so. But in general he does not offend in this way, making his company, when visiting scenes hallowed by the veneration of all Christian ages, less of a trial to one's sensibilities than that of some of his mirthful predecessors. "Sights and Insights," by Mrs. A. D. T. Whitney (Osgood), is a new "sentimental journey" over the familiar scenes of a European tour. The "insights" tend to the visionary, and give to the book a character difficult to describe except by its effects. The mystic element in Mrs. Whitney's fictitious writings neither offends nor perplexes the reader, because the characters are the creatures of her imagination, and the supposed events that occur are by her plastic skill harmonized with the inwoven sentiment. It is all of a piece. But the same sort of visionary suggestion, when connected with the material facts and distinct outlines of every-day travel, affects one with a feeling of incongruity. In spite of this drawback, however, it is a book that will be read with more than ordinary pleasure. "Starboard and Port," by the Rev. George H. Hepworth (Harpers), is an entertaining account of a yacht-voyage along the coast from New York to Nova Scotia. As yachting is only a form of recreation, a book about a yacht-voyage is nothing if not entertaining, and Mr. Hepworth's book fulfills this primary condition, at the same time that the author's smile is at times a thoughtful smile, and the silences of the sea invite to occasional meditation. "Seashore and Prairie," by Mary P. Thacher (Osgood), is a series of detached sketches of scenery and of life of considerable literary merit.

North-Pole Voyages: Embracing Sketches of the Important Facts and Incidents in the Latest Efforts to reach the North Pole. By the Rev. Z. A. Mudge. (Nelson and Phillips.)

A Summer in Europe. By Mary H. Wills. (Lippincott, Philadelphia.)

A Nile Journey. By T. G. Appleton. (Roberts Brothers, Boston.)

The North Star and the Southern Cross: Being the Personal Experiences, Impressions, and Obser-

vations of Margaretha Weppner in a Two Years' Journey around the World. 2 volumes. (Published by the author.)

Two Years in California. By Mary Cone. (Griggs.)

The Marvellous Country; or, Three Years in Arizona and New Mexico. By Samuel Woodworth Cozens. (Lee & Shepard.)

Papers on Florida, giving a General View of Every Portion of the State, its Climate, Resources, Society, etc. By T. C. Rigby, M. D. (Mendenhall, Cincinnati.)

The Falls of Niagara and Scenes around them. By J. W. Ferrée, A. M. (Barnes.)

The Lord's Land. By Henry B. Ridgaway. (Nelson and Phillips.)

The Australian Hand-Book. Full Details concerning Immigration to the Australian Colonies, etc., a History and Descriptive Account of Australia, etc. (N. Y. News Co.)

The Orient and its People. By Mrs. I. L. Hauser, Seven Years a Missionary in Northern India. (I. L. Hauser & Co., Milwaukee, Wis.)

Some Observations on the Civilization of the Western Barbarians, particularly of the English, made during a Residence of Some Years in those Parts. By Ah-Chin-Le, Mandarin of the First Class, Member of the Enlightened and Exalted Callao. Translated from the Chinese into English by John Yester Smythe, Esq., of Shanghai, and now first published out of China and in other than Chinese. (Lee & Shepard.)

Dottings round the Circle. By Benjamin Robbins Curtis. (Osgood.)

The Golden State and its Resources. By John J. Powell.—Nevada, the Land of Silver. By John J. Powell. (Bacon, San Francisco.)

Six Weeks in Norway. By Edward L. Anderson. (E. Clarke & Co., Cincinnati.)

POETRY.—The Muses have not favored us of late with any considerable amount of verse that betrays "the vision and the faculty divine." Mr. Lowell's "Three Memorial Poems" (Osgood) are indeed a noble contribution to the literature of our country, with whose annals they are associated—is it too much to expect?—imperishably. With these is linked Mr. Bayard Taylor's "National Ode," of which an illustrated (Gill) and a fac-simile (Osgood) edition have been issued. Mr. Taylor has shown the versatility of his gifts by the republication in a collected edition of the "Diversions of the Echo Club" (Osgood), in which the styles of various poets are skillfully imitated after the precedent of "The Rejected Addresses." A sad interest attaches to the "Twenty Poems" of Robert K. Weeks (Holt), who died while his volume was in the press, disappointing the promise discernible in his work. "A Book of Poems," by John W. Chadwick, collects pieces which, in more fugitive forms of publication, have won the regard of readers—some of them "spiritual songs" of no little power. "The Poems of George D. Prentice," now first collected and edited, with a biographical sketch, by John James Piatt (Clarke, Cincinnati), revives the public interest in a writer whose fame was becoming a faint tradition. Mr. Prentice was chiefly known by his facility in a species of newspaper pleasantries now become, if not obsolete, at least of less estimation than it was a genera-

tion ago. But he had also "the accomplishment of verse," in which he expressed gracefully and with the glow of natural feeling sentiments appropriate to the domestic affections and common sympathies of mankind, but without striking to great depths of thought or sensibility. "Deirdrè" (Roberts) was brought before the public with the promise (or threat) of absolute and resolute anonymity (if such a word may be pardoned); but it received praise so loud that the author could not keep his secret. When it became known that it was by Dr. Joyce, author of some previously published but not specially successful works, people began to spy faults and failings to a surprising amount. A dispassionate judgment will hardly go with either extreme. It is a poem of much merit in conception and power in execution, but by no means to be ranked in the highest walk of genius in this age of mediocrity. Miss Harriet W. Preston's previous translations from the Provençal disposed the public to welcome as it deserves her volume on "Troubadours and Trouvères, New and Old" (Roberts). Mr. Charles G. Leland's "Pidgin-English Sing-song" (Lippincott) is a feat successfully performed, but, except as a trial of ingenuity, of not much value.

A Vision of the Arch of Truth. An Allegory, and Additional Poems. By John Foster Knickerbocker. (W. H. Young.)

Hawthorn-Blossoms. Poems. By Emily Thornton Charles. (Lippincott.)

One Summer's Dream. An Idyl of the Vineyard, and Other Poems. By E. Norman Gunnison. (H. Young, York, Pa.)

Centennial and Other Poems. By K. Harrington. (Lippincott.)

Major John André. An Historical Drama in Five Acts. By P. Leo Haid, O. S. B., etc. (Murphy.)

Clarel. A Poem and Pilgrimage in the Holy Land. By Herman Melville. (Putnam.)

A Nation's Birth, and Other National Poems. By George H. Calvert. (Lee & Shepard.)

Verses from the Harvard Advocate. (Hurd & Houghton.)

Morning Songs of American Freedom. By C. F. Orne. (Williams, Boston.)

The Epic of Hades. By Lewis Morris. (Lippincott.)

Song of America, and Minor Lyrics. By V. Voldo. (Hanscom & Co.)

The Fallen, and Other Poems. By James B. Kenyon (author and publisher, Utica, N. Y.)

The Declaration of Independence. A Poem commemorating the One Hundredth Anniversary of the National Birthday. By Joseph H. Martin. (Claxton, Philadelphia.)

Poems. By Sidney Lanier. (Lippincott.)

Flower and Thorn. Later Poems. By Thomas Bailey Aldrich. (Osgood.)

That New World, and Other Poems. By Mrs. S. M. B. Piatt. (Osgood.)

Napoleon and Josephine. A Tragedy in a Prologue and Five Acts. By R. S. Dement. (Legal News Co.)

The Politician, and Other Poems. By H. R. H. (Claxton, Philadelphia.)

Sappho. A Tragedy in Five Acts. By Franz Grillparzer. Translated by Ellen Frothingham. (Roberts.)

Goethe's West-Easterly Divan. Translated, with Introduction and Notes, by John Weiss. (Roberts.)

King Saul: A Tragedy. By Byron A. Brooks. (Nelson & Phillips.)

Poems, Devotional and Occasional. By Benjamin Dionysius Hill, C. S. P. (Catholic Publication Society.)

Colony Ballads. An Attempt to represent something of the Spirit and Circumstances attending the Separation of the British Colonies of Middle North America from their Mother-Country. By George L. Raymond. (Hurd & Houghton.)

ART.—Of works on the fine arts, including music and engravings, the number is not large, but a gradually growing interest and intelligent appreciation are indicated. The country is becoming every year richer in the possession of objects of art, the presence of which makes possible a degree of art-culture that formerly was unattainable on this side the Atlantic; and agencies for making them available are multiplying.

American Engravers and their Works. By W. S. Baker. (Gebbie.)

A Dictionary of Musical Information. Containing also a Vocabulary of Musical Terms, and a List of Modern Musical Works published in the United States. By John W. Moore. (Ditson.)

Charcoal-Drawing. Translated from the French of Auguste Allongé, by S. D. W. With an Introduction by C. C. Perkins, Esq. (Hurd & Houghton.)

Centennial Portfolio. A Souvenir of the International Exhibition at Philadelphia. Comprising Lithographic Views of Fifty of its Principal Buildings, with Letter-press Descriptions. By Thompson Westcott.

Theory of Music. A Practical Guide to the Study of Thorough-Bass, Harmony, and Composition. By W. E. Palmer. (Church, Cincinnati.)

Schools and Masters of Painting. With an Appendix on the Principal Galleries of Europe. By A. G. Edcliffe. (D. Appleton & Co.)

The Theory of Color in its Relation to Art and Art Industry. By Dr. Wilhelm von Bezold. Translated from the German by S. R. Koehler. With an Introduction by Edward C. Pickering, Professor in the Massachusetts Institute of Technology. Authorized American edition, revised and enlarged by the Author. (Prang, Boston.)

Marine and Landscape Painting in Oil. [Art Manual Series.] (J. Haney & Co.)

Sorrento and Inlaid Work, for Amateurs. By Arthur Hope. (J. Wilkinson, Chicago.)

Gems of the Dresden Gallery. Comprising the most Famous and Popular Works in the Dresden Collection, reproduced in Heliotype from the Best Engravings. With Notices of the Works and the Artists. (Osgood.)

Gallery of Great Artists. A Series of Portraits engraved on Steel by Eminent Engravers, reproduced in Heliotype. With Biographical and Descriptive Letter-press. (Osgood.)

Gems of the Gray Collection. A Series of Twenty-four Engravings, reproduced in Heliotype from the Originals in the Gray Collection of Engravings, Harvard University. With full Historical and Descriptive Letter-press. (Osgood.)

The Titian Gallery. A Series of Twenty-four of the most Renowned Works of Titian, reproduced in Heliotype. With a Sketch of the Life and Works of the Author. (Osgood.)

ESSAYS AND CRITICISM.—A second series of Mr. Lowell's "Among my Books" (Osgood), was a welcome addition to many people's choice books. The essays contained in this volume are not indeed such as will add to his reputation. They are of unequal value, yet portions of them are equal to the author's best. The

essay on Wordsworth, trite as the theme is, must be regarded as the most discriminating and just criticism the great Lakist has received for years. That on Dante is a noble compound of fine criticism with fine trains of original thought struck out by the way. Mr. John Fiske is the ablest disciple of Herbert Spencer—if indeed he be not worthy to stand beside him—on this side of the Atlantic. "The Unseen World, and Other Essays" (Osgood), represent him not in his strongest, but rather in his recreative seasons. Mr. S. S. Cox has not been very successful in divining "Why we Laugh," but in his volume thus entitled (Harpers) he has set forth a good deal of food for laughter. It is especially rich in congressional wit and humor, which is not of a very high quality in respect of refinement, but is sufficiently amusing. A few other volumes of considerable merit are among the following:

Essays: Historical, Literary, Educational. By William Chauncey Fowler, LL. D. (Case, Lockwood & Brainard Co., Hartford, Conn.)

The Hearth-Stone. Thoughts upon Home Life in our Cities. By Samuel Osgood, D. D., LL. D. (Dutton.)

Memories of Familiar Books. By William B. Reed, LL. D. With a Memoir of the Author. Edited by Manton Marble. (Hale.)

Words, their Use and Abuse. By William Matthews, LL. D. (Griggs, Chicago.)

The Warfare of Science. By Andrew Dickson White, LL. D. (D. Appleton & Co.)

Two Chancellors: Prince Gortschakoff and Prince Bismarck. By Julian Klaczko. Translated by Frank P. Ward. (Hurd & Houghton.)

A Study of Hawthorne. By George Parsons Lathrop. (Osgood.)

Every-day Topics. A Book of Briefs. By J. G. Holland. (Scribner.)

Luther as a Hymnist. By Rev. Bernhard Pick. (Lutheran Book-store.)

The Morals of Trade. Two Lectures. By R. Heber Newton. (T. Whittaker.)

Wit, Humor, and Shakespeare. By John Weiss. (Roberts Brothers.)

FICTION. — No work of the first order has appeared in the department of prose fiction. Mr. H. E. Scudder came out in a first venture, "The Dwellers in Five-Sisters Court" (Hurd & Houghton), a tale of New England, mainly of Boston life—of life, however, in a side eddy rather than in the main current. The story has less than might have been expected of the crudeness incident to a first attempt. There is some good character-drawing, with a slight tendency to exaggeration, and the plot is very well managed. Mr. Scudder has won a degree of success that may well encourage him to further efforts. "Mercy Philbrick's Choice" (Roberts), was published as the first of a "No-Name Series," which, as the appellation denoted, was to be in the strictest sense anonymous. The plot is not happy, and the feeling that pervades the story is sad, and rather dreary. While in certain respects it is faithful to the reality of New England country-life, a more joyless character is ascribed to it than is found save in exceptional circumstances. Some of the char-

acters are finely drawn, and the faulty plan is nearly redeemed by the felicity of details. One gets an impression that the unknown author is capable of something better than this. The Rev. Edward Everett Hale, in his "Philip Nolan's Friends" (Scribner), has chosen a good field for his peculiar gifts as a story-teller, in Louisiana and Texas just before Louisiana was ceded to the United States. He indulges to the full his historic airs and affectations of official authenticity, by which he so cleverly threw dust into the eyes of the public in his "Man without a Country." This time, his preface intimates, the *real* Philip Nolan is to be indemnified for what his name suffered in being applied to a fictitious personage. But the limits between history and fiction, not being indicated for us by the author, are left in uncertainty; and the historical information, for which some critics praise the book as being richly furnished with, waits for identification. Meanwhile, as a fiction simply, it is very pleasing and effective. The authors of "The Wide Wide World," etc., come before the public with a story in the same vein, "Wych Hazel," and with a continuation of it, entitled "The Gold of Chickaree" (Putnams). There is the same combination of an improbable and somewhat unreasonable plot, with many striking beauties in detail. The first volume is animated in its action, with abundance of lively and piquant conversation; the second is more languid in its movement. Both will have the sympathy of such as are glad to recognize in a tale a controlling but not obtrusive moral purpose. The heroine of Miss Alcott's "Rose in Bloom," a sequel to "Eight Cousins," having blossomed into young-ladyhood, demands promotion from the department of juvenile literature to that of mature fiction. The author shows the better qualities of her books for children in this higher style of work, and we trust this is an earnest of more in the same kind. Rev. A. S. Roe's new story, "Near to Nature's Heart" (Dodd, Mead & Co.), has a flavor of the Centennial year, being a tale of the Revolution, its scene chiefly in the Highlands of the Hudson, Washington's figure appearing on the scene very opportunely in one or two instances; and while the main action of the Revolutionary drama is not entered on, some of the by-play is effectively introduced, and a vivid picture is given of the strangely mixed condition of things in that part of New York. The religious and moral purpose of the book, nowhere made obtrusive, is not permitted to be lost sight of by the reader for any long time. The trifle entitled "Helen's Babies" (Loring, Boston), "took" immensely with the public. It pleased everybody, and everybody, of course, was right. It is a delicious story, thoroughly amusing, and true to child-life. At the same time there is quite as much knowledge of adult human nature in both sexes shown by the way the older friends of the babies behave as of the younger sort;

and the skill with which the babies' blunders serve to bring the older people out of difficulties makes the plot of the story a genuine triumph of art. "The Land of the Sky; or, Adventures in Mountain By-ways," by Christian Reid (D. Appleton & Co.), pleasantly mingles description of a romantic region, adventures of a party journeying through the mountainous sections of North Carolina, and a cleverly-managed fiction.

Micheline. By Madame Eugène Bersier. Translated by Mrs. Carey Brock. (Dutton.)

Drifted Asunder. By A. M. Douglas. (Gill.)

Sweet Bells Jangled. A Dramatic Love-Tale. By Clara Oakley Hall. (American News Company.)

Carter Quarterman. By W. M. Baker. (Harpers.)

First Families of the Sierras. By Joaquin Miller. The One Fair Woman. By the same. (Carlton.)

The Water-Waif. A Story of the Revolution, founded on incidents connected with the Battle of Trenton. By Elizabeth S. Bladen. (Claxton, Philadelphia.)

Maud Mansfield. By Mrs. Francis Hamilton Hood. (J. W. Burke & Co., Macon, Ga.)

Shadowed Perils. By M. A. Avery. (Authors' Publishing Company.)

A Family Secret. By Fanny Andrews. (Lippincott.)

Achsah. A New England Life-Study. By Rev. Peter Pennot. (Lee & Shepard.)

Free, yet forging their Own Chains. By C. M. Cornwall.

Leah Mordecai. By Mrs. Belle Kendrick Abbott. (Baker, Pratt & Co.)

Chiushingura. A Japanese Romance. Translated by Frederic V. Dickens. With Notes, and an Appendix containing a Metrical Version of The Ballad of Tagasaki, and Thirty Full-page Illustrations, by Japanese Artists. (Putnams.)

The Fortunes of Miss Follen. By Mrs. Goodwin-Talcott. (D. Appleton & Co.)

Theophilus and Others. By Mary Mapes Dodge. (Scribner.)

New England Life. A Century of Gossip; or, The Real and the Seeming. By Willard G. Nash. (Keen, Cooke & Co., Chicago.)

Women's Secrets; or, How to be Beautiful. By Lou Capesadell. (Authors' Publishing Company.)

Life's Promise to Pay. By Miss Clara Conway. (Lippincott.)

Gentlefolks and Others. By Julia Duhring. (Lippincott.)

Heavy Yokes. A Romance of Southern Life. By Miss J. R. Haderman. (Gill, Boston.)

Patriot and Tory: One Hundred Years ago. A Tale of the Revolution. By Julia McNair Wright. (Jones Brothers, Cincinnati.)

Peter and Polly; or, Home-Life in New England a Hundred Years ago. By Marian Douglas. (Osgood.)

Nobody Cares. By Crona Temple. (Lothrop.)

Fire and Flame. From the German of Levin Schücking. Translated by Eva M. Johnson. (D. Appleton & Co.)

At the Councillor's; or, A Nameless History. From the German of E. Marlitt, by Mrs. A. L. Wister. (Lippincott.)

"Twixt Hammer and Anvil. By Frank Lee Benedict. (Carlton.)

Elsie's Motherhood. A Sequel to Elsie's Womanhood. By Martha (Farquharson) Finley. (Dodd, Mead & Co.)

My Little Love. By "Marion Harland." (Carlton.)

The Home at Greylock. By Mrs. E. Prentiss. (Randolph.)

Lady Ernestine; or, The Absent Lord of Rocheforte. By Mrs. Catharine A. Warfield. (Peterson, Philadelphia.)

Living Too Fast; or, The Confessions of a Bank Officer. By "Oliver Optic." (Lee & Shepard.)

Elbow-Room. A Novel without a Plot. By Max Adeler. (Stoddart, Philadelphia.)

Tales from Two Hemispheres. By Hjalmar Hjorth Boyesen. (Osgood.)

The Barton Experiment. By the Author of "Helen's Babies." (Putnams.)

His Young Wife. By Julie P. Smith. (Carlton.)

Viking Tales of the North. Translated from the Icelandic by E. B. Anderson and Jón Bjarnasen.

Also Tegnér's Frithiofs Saga, translated by George Stephens. (Griggs, Chicago.)

Frithiofs Saga. A Norse Romance. By Esaias Tegnér. Translated from the Swedish by Thomas E. A. Holcomb and Martha A. Lyon Holcomb. (Griggs, Chicago.)

The Centennial Frog, and Other Stories. (Claxton, Philadelphia.)

Is That All? [No-Name Series.] (Roberts.)

Courtship in 1720 and 1860. A Romance. By Hawley Smart. [Star Series.] (Lippincott.)

JUVENILE BOOKS.—The improvement in the quality of books for the young, which we have had the satisfaction of noticing heretofore, is continued. Perhaps there was not during the past year so large a number of the best class of juvenile publications as appeared in the year preceding, but the standard was very well maintained. Of the old favorites, Miss Alcott lends her pen to the temperance reform in her story of "Silver Pitchers," which, with other stories (Roberts), makes a volume of very pleasant reading. Three of her stories—"Kitty's Class-Day," "Aunt Kipp," "Psyche's Art" (Loring), form a small collection. "Susan Coolidge" provides choice reading "For Summer Afternoons" (Roberts). Of books from Centennial suggestion we have "The Boys of '76: a History of the Battles of the Revolution," by Charles Carlton Coffin (Harpers)—Mr. Coffin was a popular correspondent during the civil war; "Young Folks' Centennial Rhymes," by Will Carlton (Harpers), who has an excellent knack at rhyming, with humorous, touching, and stirring effect; and "The Story of Our Country," by Mrs. L. B. Monroe (Lockwood, Brooks & Co., Boston). A book with a truly descriptive title is "All the Way Round; or, What a Boy Saw and Heard on His Way Round the World: a Book for Young People, and Older Ones with Young Hearts" (D. Appleton & Co.). Bayard Taylor's "Boys of Other Countries" purveys in his attractive way for his young readers from the ample store of his foreign recollections. "Captain Sam; or, The Boy-Scout of 1814," by George Cary Eggleston (Putnams), cannot fail to please the boys of 1876-'77. "Bits of Talk in Verse and Prose for Young Folks," by H. H. (Roberts), is so good that all who read it will wish there was more of it. "Once upon a Time: Stories for Children of the Ancient Gods and Heroes," by Mary E. Cragie (Putnams), makes excellent use of materials gathered from the classic mythology.

"The Boy-Emigrants," by Noah Brooks (Scribner), gives young readers a vivid representation of the hardships, perils, and varied adventures, connected with the overland emigration to California in the days when there was no railway to the Pacific. "Long-Look House: a Book for Boys and Girls," by Edward Abbott, shows that the author has an hereditary aptitude in writing for young readers. "A Happy Summer," by S. Annie Frost (American Tract Society), has the matter-of-fact-ness of real life, with the interest of a well-conceived fiction, and, with its fair page and silhouette illustrations, may well "serve for profit and delight." We cannot say anything less, and could say nothing better, of the book entitled "We Boys: Written by One of Us, for the Amusement of Pas and Mas in General, and Aunt Lovisa in Particular" (Roberts), than that it will not disappoint the expectations raised by its quaint and suggestive title.

Three Girls. By Mrs. M. F. Butts. (Congregational Publication Society.)

Things Common and Uncommon. By Mary Dwi-nell Chellis. (Congregational Publication Society.)

The Lost Found. By Agnes Giberne. (Lothrop.)

Stories of Success. Edited by S. F. Smith. (Lothrop.)

Frank Wilder; or, The Golden Rule. By Catharine M. Trowbridge. (Congregational Publication Society.)

Little Jack's Four Lessons. By the Author of "Sunday all the Week," etc. (Carters.)

Little Rosy's Pets. By the Author of "Little Rosy's Travels." (Congregational Publication Society.)

Walter Neal's Example. By Rev. Theron Brown. (D. Lothrop & Co.)

School is Out. By D. C. Colesworthy. (Barry & Colesworthy, Boston.)

Sunny Days Abroad; or, The Old World Seen with Young Eyes. (T. Whittaker.)

The Acolyte; or, A Christian Scholar. A Story for Catholic Youth. (Cunningham, Philadelphia.)

Almost a Woman. By S. Annie Frost. (American Tract Society.)

Young Rick. By J. A. Eastman. Part 2. (D. Lothrop & Co., Boston.)

Four Girls at Chau-auquus. By "Pansy." (D. Lothrop & Co.)

The Wentworths. By Susan Cooper Pindar. (Lothrop.)

The Cooking Club of Tu-Whit Hollow. By Ella Farman. (Lothrop.)

Three Girls of the Revolution. By Lucy Ellen Guernsey. (Sunday-School Union.)

Washington and Seventy-six. By Lucy E. and Clara F. Guernsey. (Sunday-School Union.)

The Prattler. A Picture and Story Book for Boys and Girls. By Uncle Herbert. (Lippincott.)

All for the Best; or, The Old Peppermint-Man. By T. S. Arthur. (Miller.)

Rags and Tatters: A Story for Boys and Girls. By Stella Austin. (Dutton.)

Snowed Up; or, The Sportsman's Club in the Mountains. By Harry Castlemon. (Porter & Coates, Philadelphia.)

What Tommy Did. By Emily Huntingdon Miller. (Griggs, Chicago.)

May Stanhope and Her Friends. By Mrs. Margaret E. Sangster. (American Tract Society.)

Under Shelter. By Annette Lucille Noble. (American Tract Society.)

Teddie and His Friends. By Emilie Forster. (Dodd, Mead & Co.)

Little Miss Fancy. By Teresa Oakey Hall. (Dodd, Mead & Co.)

Stories of Vinegar Hill. By the Author of "Ella Montgomery's Book-Snelt," etc. 3 vols. (Carters.)

Amongst Machines. By the Author of "The Young Mechanic." (Putnams.)

Nelly Kinnaird's Kingdom. By Amanda M. Douglas. (Lee & Shepard.)

The Village School. By the Author of "Child-Nature." And Other Poems, by Well-known Writers.

A Book for Boys and Girls from Seven to Seventy. (Lippincott.)

Vine and Olive; or, Young America in Spain and Portugal. By Oliver Optic. ["Young America Abroad" series.] (Lee & Shepard.)

Shifting for Himself. By Horatio Alger, Jr. ["Brave and Bold" series.] (Loring.)

Frank Nelson in the Forecastle; or, The Sportsman's Club among the Whalers. By Harry Castlemon. ["Frank Nelson" series.] (Porter & Coates, Philadelphia.)

The Young Trail-Hunters; or, The Wild Riders of the Plains. By Samuel Woodworth Cozzens. (Lee & Shepard.)

Snip and Whip, and Some Other Boys. By Elizabeth A. Davis. (Lee & Shepard.)

An Average Boy's Vacation. By Mary S. Deering. ["Forest City" series.] (Dresser, McLellan & Co., Portland, Me.)

Ocean Gardens and Palaces; or, The Tent on the Beach. By Rev. Sidney Dyer, Ph. D. (American Baptist Publication Society.)

Mrs. Hurd's Niece. By Ella Farman. (D. Lothrop & Co.)

Roddy's Ideal. By Helen Kendrick Johnson. (Putnams.)

Johannykin and the Goblins. By Charles G. Leland. (Macmillan & Co.)

Flaxie Frizzle. By Sophie May. (Lee & Shepard.)

Grandmamma's Letters from Japan. By Mrs. Mary Pruyn. (J. H. Earle, Boston.)

The Randolphs. By "Pansy." (D. Lothrop & Co., Boston.)

The House with Spectacles. By Leora Bettison Robinson. (Putnams.)

A Trip to Music-Land. A Fairy Tale forming an Allegorical and Pictorial Exposition of the Elements of Music. By Emma L. Shedlock. (Lippincott.)

Winwood Cliff; or, Oscar, the Sailor's Son. By Daniel Wise, D. D. (Lee & Shepard.)

The Children's Paradise. By Mrs. Catharine B. Zerega. (Putnams.)

Long Ago. A Year of Child-Life. By Ellis Gray. (Lockwood, Brooks & Co.)

Fleda and the Voice, with Other Stories. By Mary A. Lathbury. ["Aunt May."] (Nelson & Phillips.)

Classics from Babyland. By C. D. Bates. (Lothrop.)

Janet and her Friends. (D. Appleton & Co.)

Torn and Mended. By W. M. F. Round. (Lothrop.)

The Mission of Black Rifle; or, On the Trail. By Elijah Kellogg. ["Forest Glen" series.] (Lee & Shepard.)

Vanquished Victors; or, Sketches of Distinguished Men who overcame the Obstacles in their Way of Fame, but failed to gain that Self-Mastery which is the greatest and grandest of all Conquests. By Daniel Wise, D. D. (Nelson & Phillips.)

TEXT-BOOKS.—The demand for school-books is not always proportioned to the actual needs of the schools. But while there are ways known to publishers for introducing, as it is called, sets of books, the principle of the survival of the fittest cannot in the long-run be evaded. One direction in which improvement

is making is in the study of our own language and literature. Such a book as Mr. Hudson's "Text-Book of Prose" (Ginn, Boston), which aims to make a reading-book a means of cultivating literary taste, and thoroughly inbuing the mind with the spirit of great authors, is a move forward—though it should be judged that the selection of authors, in this case, is too restricted. Mr. William J. Rolfe's selection from the poems of Gray, and his edition of Shakespeare's "Richard the Second," with notes (Harpers), making his authors a study in language as well as in style, is an example of a method of teaching that may be made as pleasant as it is profitable. A similar method is applied by Dr. Joseph Alden, President of the New York State Normal College, in his "Studies in Bryant" (D. Appleton & Co.). The venerable poet, who enjoys in his lifetime the honors of a classic, furnishes an introduction. For similar purposes Milton's "Masque of Comus" has been edited, with notes and grammatical exercises, by Homer B. Sprague, M. A. (Schermerhorn). In the same connection may be mentioned "Representative Names in English Literature," by H. H. Morgan (D. Appleton & Co.), and "First Steps in English Literature," by Arthur Gilman (Barnes). "Outlines of the Art of Expression," by Prof. J. H. Gilmore (Ginn), is a manual that may serve as an introduction not only to rhetoric but to logic, and as a *præcis* for applying and testing grammatical knowledge. To the same general purpose is "Illustrated Lessons in our Language; or, How to Speak and Write correctly—designed to teach English Grammar without its Technicalities," by G. P. Quackenbos (D. Appleton & Co.). Among text-books in physical science, the publication of the second part of Prof. Edward C. Pickering's "Elements of Physical Manipulation" (Hurd & Houghton) completes a work deserving of the highest commendation. Two additional volumes have appeared of "Christian Greek and Latin Writers," edited by professors in Lafayette College (Harpers)—selections from Athenagoras and Tertullian. As authors to be read in connection with or as supplementary to a classical course, these selections are appropriate, and the editing deserves all praise. But if these and other Christian authors are to be substituted for the classic authors as instruments for the study of the Greek and Latin languages, we cannot but think it an error. Among classical text-books may be mentioned with commendation "A Homeric Dictionary, from the German of Dr. Georg Autenrieth," translated, with additions, by R. B. Keep (Harpers); "Elements of Latin Grammar, in Connection with a Systematic and Progressive Latin Reader," by Gustavus Fischer, LL. D. (Schermerhorn); Prof. William A. Stevens's "Select Orations of Lysias," with introduction and notes (Griggs, Chicago); ex-President Champlin's "Selections from Tacitus, prepared with Notes, Introduction, and a Col-

lection of his Aphorisms, for College and Private Use" (Allyn, Boston); "Selections from the Satires of Juvenal, to which is added the First Satire of Persius, with Notes," by Thomas Chase, M. A. (Eldridge, Philadelphia); and "A Series of First Lessons in Greek, adapted to Goodwin's Greek Grammar," by John Williams White, A. M. (Ginn). Also the following, in ancient and modern languages:

A Sanscrit Handbook, for the Fireside. By Elihu Burritt. (Brown & Gross, Hartford, Conn.)

Rational Method, following Nature Step by Step, to learn how to Read, Hear, Speak and Write French. By Claude Marcel. (D. Appleton & Co.)

An Elementary Guide to Writing in Latin. By J. H. Allen and J. B. Greenough. (Ginn Brothers.)

A Latin Grammar for Beginners. By S. Z. Ammon. (Holt.)

Ahn's Complete Method of the German Language. By D. P. Henn. (Steiger.)

Goethe, Ausgewählte Prosa. [German Classics for American Students.] Edited by J. M. Hart. (Putnam's.)

A Short Latin Grammar. Part I. The Declensions. By Edward Roth, A. M. (Claxton, Philadelphia.)

A Complete Dictionary to Cæsar's Gallic War. With Idioms and Hints for Translation. By Albert Creak, M. A. (Barnes.)

The Medea of Euripides. With Notes and an Introduction. By Frederick D. Allen, Ph. D. (Ginn.)

German without Grammar or Dictionary. By Dr. Zur Brücke. (Griggs, Chicago.)

Grammar of the Biblical Chaldaic Language and the Talmud Bible Idioms. By S. D. Luzzatto. Translated from the Italian by T. S. Goldammer, D. P. (Wiley.)

We add a few on a variety of subjects:

The Science of Ethics. An Elementary System of Theoretical and Practical Morality. By Henry N. Day. (Putnam's.)

Illustrated School History of the World. By J. D. Quackenbos, A. M., M. D. (D. Appleton & Co.)

A Treatise on the Theory and Solution of Algebraic Equations. By John Macnie, M. A. (Barnes.)

How to write Letters. A Manual of Epistolary Art. By J. Willis Westlake, A. M. (Sower, Potts & Co., Philadelphia.)

Buckley's Short History of Natural Science. (D. Appleton & Co.)

Steele's Fourteen Weeks' Course in Zoölogy. (Barnes.)

Nordhoff's Politics for Young America. School Edition. (Harpers.)

Elements of Geometry. With Exercises for Students, and an Introduction to Modern Geometry. By A. Schuyler, L. B. T. (Wilson, Hinkle & Co., Cincinnati.)

Handbook of the Terrestrial Globe. By Ellen E. Fitz. (Ginn, Boston.)

A Manual of Arithmetic. A Handbook for Teachers. By E. A. White, A. M. (Wilson, Hinkle & Co., Cincinnati.)

Comparative Zoölogy, Structural and Systematic. By James Orton, A. M. (Harpers.)

Open Letters to Primary Teachers, with Hints for Intermediate Class Teachers. By Mrs. W. F. Crafts. (Nelson & Phillips.)

The Science of Arithmetic, for High Schools, Normal Schools, Preparatory Departments to Colleges, and Academies. By Edward Olney. (Sheldon & Co.)

Higher Arithmetic. By Prof. E. Brooks. (Sower, Potts & Co., Philadelphia.)

Practical Botany, Structural and Systematic. By August Koehler, M. D. (Holt.)

- Common-Sense; or, First Steps in Political Economy. By M. R. Levenson, D. Ph. (Authors' Publishing Company.)
- History of the United States, prepared especially for Schools. By John Clark Ridpath, A. M., etc. (Jones, Bros. & Co., Cincinnati.)
- History of Rome, from the Earliest Times to 476 A. D. Compiled by K. F. Pennell, Professor in Phillips Exeter Academy. (Allyn, Boston.)
- Studies in Articulation. A Study and Drill Book in the Alphabetic Elements of the English Language. By James H. Hoose, A. M., Ph. D. (C. W. Bardeen, Syracuse, N. Y.)
- Illustrated Bible History of the Old and New Testaments, for the Use of Catholic Schools. By Dr. I. Schuster. From the fifty-eighth German edition, by Mrs. J. Sadlier. (W. H. Sadlier.)
- The Universal Metric System. Prepared especially for Candidates for Schools of Science, Engineers, and Others. By Alfred Colin, M. E. (D. Appleton & Co.)
- Introduction to the Study of Chemical Philosophy. The Principles of Theoretical and Systematic Chemistry. By William A. Tilden. (D. Appleton & Co.)
- Algebra, Self-Taught. By W. P. Higgs, M. A. (Spon.)
- Analytical Mechanics. By Prof. De Volson Wood. (J. Wiley.)
- Manual of Geometry and Conic Sections. By William G. Peck, LL. D. (Barnes.)
- A New System of English Etymology, consisting of a Pupil's Manual and a Teacher's Class-Book. By William Smeaton. (Scribner.)
- Minnesota: Its Geography, History, and Resources. A Text-Book for Schools. With a Manual of Methods in General Geography, for the Use of Teachers. By Eugenia A. Wheeler. (D. D. Merrill, St. Paul, Minn.)
- The Normal Higher Arithmetic. By Edward Brooks, A. M. (Sower, Potts & Co.)
- Dictionary of the French and English Languages. With more than 15,000 New Words, Meanings, etc. By Ferdinand E. A. Gasc. (Holt.)
- A Drill-Book in Vocal Culture and Gesture. By Rev. Prof. E. P. Thwing, of the Brooklyn Lay College. (Barnes.)
- How to Sing; or, The Voice, and How to Use it. By W. H. Daniell. (Wells.)
- American Handbook of Industrial Drawing, for Schools and Home Instruction. With a Complete Explanation of the Use of Instruments as applied to Architectural and Mechanical Drawing. By C. A. Emery. (M. Bradley & Co., Springfield, Mass.)
- Complete Method for the Violin. By Julius Eichberg. (White, Smith & Co., Boston.)
- The Elements of Plane Trigonometry. By H. N. Wheeler, A. M. (Ginn & Heath.)
- The Art of Projection: A Manual of Experimentation, in Physics, Chemistry, and Natural History, with Porte-Lumière and Magic Lantern. By Prof. A. E. Dolbear, of Tufts College. (Lee & Shepard.)
- USEFUL ARTS.**—From the wide range of applied science and invention, and of trained skill—from the culinary art to steam-engines and railway engineering—is gathered an almost bewildering variety. We submit it without attempting sub-classification:
- Safety-Valves. By Richard H. Buell, C. E. (Van Nostrand.)
- How to build Ships. An Essay upon the Weakness of Large Iron Ships, with Recommendations for making them Strong. By Captain S. P. Griffin. (Van Nostrand.)
- Graphical Statics. 2 vols. By A. J. Du Bois. (Wiley.)
- Building-Stones in the United States. By Q. A. Gillmore. (Van Nostrand.)
- Practical Instruction in the Art of Wood-Engraving. Also a History of the Art, from its Origin to the Present Time. By William A. Emerson. (Williams.)
- The Lectorian System of Hand-Railing. Elucidating the Whole Subject by Fifteen Plates, with Letter-press and Notes. By William Forbes. (Randolph & English, Richmond, Va.)
- A Practical Treatise on the Construction of Roads, Streets, and Pavements. By General Q. A. Gillmore. (Van Nostrand.)
- Modern American Homesteads, illustrated by Forty-six Plates, including Descriptions, Specifications, and Cost. By Daniel T. Atwood. (Bicknell.)
- Ladies' Fancy-Work. Hints and Helps to Home Tastes and Recreations. By Mrs. C. S. Jones and Henry T. Williams. 357 Illustrations. (H. T. Williams.)
- Railroad Appliances. A Description of Details of Railway Construction subsequent to the Completion of the Earthworks and Structures. Including a Short Notice of Railway Rolling Stock. By John Wolfe Barry. (D. Appleton & Co.)
- Orchids. A Description of Species and Varieties. Prefaced by Chapters on the Culture, Propagation, and Hybridization of Orchids, etc.; the whole forming a Complete Manual of Orchid-Culture. By Edward Sprague Rand, Jr. (Hurd & Houghton.)
- The Sanitary Drainage of Houses and Towns. By George E. Waring, Jr. With Diagrams. (Hurd & Houghton.)
- The Poultry Yard and Market; or, Practical Treatise on Galline Culture. By A. Corbett. (Judd.)
- Villas and Cottages; or, Homes for All. Plans, Elevations, and Views. Designed by William M. Woollett. (Bicknell.)
- The Fruits and Fruit-Trees of America. By A. J. Downing. Second Revision and Correction, with Large Additions, including the Appendices of 1872 and 1876, and containing many New Varieties by Charles Downing. (Wiley.)
- Guide to Honiton Lace-Making. Compiled from the Best European Authorities. (J. H. Symonds, Boston.)
- Narrow-Gauge Railways in America. (H. Fleming, Philadelphia.)
- Practical Treatise on the Construction of Iron Highway Bridges; together with a Short Essay upon the Application of the Principles of the Lever to a Ready Analysis of the Strains upon the more Customary Forms of Beams and Trusses. By Alfred P. Boller, M. A. (Wiley.)
- A Brief Treatise on United States Patents, for Inventors and Patentees. By Henry Howson. (Porter & Coates.)
- Treatise on the Mechanical Theory of Heat and its Applications to the Steam-Engine, etc. By R. S. McCullough. (Van Nostrand.)
- National Cookery-Book. Compiled from Original Receipts for the Women's Centennial Committees of the International Exhibition of 1876. (Women's Centennial Executive Committee.)
- A New Treatise on Steam Engineering, Physical Properties of Permanent Gases, and of Different Kinds of Permanent Gases. By John W. Nystrom, C. E. (Lippincott.)
- The Complete Practical Machinist. Embracing Lathe-Work, Vice-Work, Drills and Drilling, Taps and Dies, Hardening and Tempering, the Use of Tools, etc. By Joshua Rose. (H. C. Baird & Co., Philadelphia.)
- The American Iron-Trade in 1876, Politically, Historically, and Statistically considered. By James M. Swank. (American Iron and Steel Association.)
- Forest-Culture, and Eucalyptus-Trees. By Elwood Cooper. (Cuberry & Co., San Francisco.)
- The Thornery System of Grape-Culture. From the French. By M. Du Breuil. (Judd.)
- The Silk Industry in America. A History prepared for the Centennial Exposition, by L. P. Brockett, M. D. (Van Nostrand.)

Handbook of Grape-Culture. By T. Hart Hyatt. (Bancroft, San Francisco.)

A Practical Treatise on the Teeth of Wheels, with the Theory and Use of Robinson's Odontograph. By S. W. Robinson, Professor in Illinois Industrial University. (Van Nostrand.)

On Continuous Bridges. By M. Merriman. (Van Nostrand.)

The Complete American Trapper. By W. H. Gibson. (Miller.)

Common-Sense in the Kitchen. By Mrs. W. A. Henderson. (World Publication Company.)

A Text-Book to the Practice of the Art or Craft of the Plumber. (Van Nostrand.)

American Dairying. A Manual for Butter and Cheese Makers. By L. B. Arnold, A. M. (Rural Home Publication Company.)

The Farm-Yard Club of Gotham. An Account of the Farms and Families of that Famous Town. By George B. Loring. (Lockwood, Brooks & Co.)

Notes on Assaying and Assay Schemes. By Prof. Pierre de Puyater Ricketts, Columbia College School of Mines. (Wiley.)

Rural Hydraulics. A Practical Treatise on Rural Household Water Supply. Giving a Full Description of Springs and Wells, of Pumps and Hydraulic Ram; with Instructions in Cistern-Building, Laying of Pipes, etc. By W. W. Grier. (Baird, Philadelphia.)

The Compendium of Sheet Metal Work. By A. O. Kittredge. (Baird.)

Potato-Pests. Being an Illustrated Account of the Colorado Potato-Beetle, and the other Insect Foes of the Potato in North America. With Suggestions for their Repression, and Methods for their Destruction. By Charles V. Riley, M. A., Ph. D., State Entomologist of Missouri. (Orange Judd Co.)

Hops; their Cultivation, Commerce, and Uses in Various Countries. A Manual of Reference for the Grower, Dealer, and Brewer. By P. L. Simmonds. (Spon.)

LAW.—The number of lawyers who have felt that they owe a debt to their profession is considerable, as the ensuing list of titles will show:

Rights, Remedies, and Liabilities of Landlord and Tenant. By David McAdam. (Diossy & Co.)

Digest of the Decisions of the Several Courts of the State of New York, from the Earliest Period to the Month of May, 1875. By Frederick C. Brightley. (Banks & Brothers.)

Practice and Pleading in Personal Actions in the Courts of Massachusetts. By H. F. Buswell and C. H. Walcott. (G. B. Reed, Boston.)

The Law of Homesteads and Exemptions. By John H. Smyth. (Sumner, Whitney & Co., San Francisco.)

The Law of Receivers. By J. L. High. (Callaghan.)

Remedies and Remedial Rights, by the Civil Action, according to the Reformed American Procedure. By John Norton Pomeroy, LL. D. (Little, Brown & Co., Boston.)

A Commentary on the Law of Agency and Agents. By Francis Wharton, LL. D. (Kay, Philadelphia.)

A Key to Story's Equity Jurisprudence. By R. S. Guernsey. (Diossy.)

The Law of Costs, as settled in the State of New York, and adapted to the State of Ohio. By Frank M. Parsons. (Cockcroft.)

A Treatise on Questions of Law and Fact, Instructions to Juries, and Bills of Exceptions. By J. C. Wells. (Cockcroft.)

The Law relating to General Voluntary Assignments for the Benefit of Creditors, as provided for in the Statute of 1860, as amended. With Notes of Decisions and Practical Forms. By Granville P. Hawes. (Baker, Voorhis & Co.)

A Manual of the Law of Real-Estate Brokers. By William E. Lynch. (Diossy.)

The Statutes of New York, with the Decisions thereon, relating to Limited Partnership. Together with the Statute relating to Compromises by Partners and Joint Debtors, and to Partnership and Signs, and the Requisite Forms. (Baker, Voorhis & Co.)

A Treatise on Negotiable Instruments. By Hon. John W. Daniel. 2 vols. (Baker, Voorhis & Co.)

A Treatise on the Law of Taxation, including the Law of Local Assessments. By Thomas M. Cooley, LL. D. (Callaghan & Co., Chicago.)

Leading and Select Cases on the Disabilities incident to Infancy, Coverture, Idiocy, etc. With Notes by M. D. Ewell, Esq. (Little, Brown & Co.)

A Series of Essays on Legal Topics. By James Parsons, Esq. (Rees, Welsh & Co., Philadelphia.)

A Treatise on the Law of Manufacturing Corporations in the State of New York. By John F. Baker. (Diossy.)

The Law of Religious Corporations. By S. Hurst.

The Law and Practice of Insolvent Assignments in the State of New York, with Forms. By William S. Keiley. (Banks.)

The Law of Adoption in the United States, and especially in Massachusetts. By William H. Whitmore, A. M. (Munsell.)

The Code of Remedial Justice. Edited and annotated by Montgomery H. Throop. (Weed, Parsons & Co., Albany.)

Notes on Elementary Law. By William C. Robinson, Professor in Yale College. (Hoggson & Robinson, New Haven.)

A Treatise on the Law of Personal Property. By James Schouler. Volume II. Embracing Original Acquisition, Gift, Sale, and Bailment. (Little, Brown & Co., Boston.)

Political and Constitutional Law of the United States of America. By William O. Bateman. (G. I. Jones & Co., St. Louis.)

The Law of Damages. By George W. Field. (Mills & Co., Des Moines, Iowa.)

Mitford's (Lord Redesdale's) Treatise on the Pleadings in Suits in the Courts of Chancery, with the Notes of G. Jeremie and Josiah W. Smith. Supplemented by an Introduction, Dissertations on Parties to Suits in Equity, Pleadings in Suits in Equity, Practice in Suits in Equity, with Forms of Procedure in Equity, and Notes, and the Practice in Suits in Equity of the United States Courts. By Samuel Tyler, LL. D. (Baker, Voorhis & Co.)

Supplement to Biddle's Treatise on the Law and Practice of Supplementary Proceedings. Adapted for Use in all the States and Territories. By John F. Baker. (Diossy & Co.)

The Law of Municipal Bonds. By John F. Dillon, Judge of the Eighth Judicial Circuit (Mo.). (G. I. Jones & Co., St. Louis.)

A Treatise on the Law of Evidence. By Simon Greenleaf. Thirteenth edition. Edited and revised by John Wilder May. 3 vols. (Little, Brown & Co.)

The Electoral Votes of 1876: Who should count them, what should be counted, and the Remedy for the Wrong Count. By David Dudley Field. (D. Appleton & Co.)

The Presidential Counts. A Complete Official Record of the Proceedings of Congress at the Counting of the Electoral Votes in all the Elections of President and Vice-President of the United States; together with all Congressional Legislation incident thereto, or Proposed Legislation upon that Subject. With an Analytical Introduction. (D. Appleton & Co.)

MEDICINE.—Medical authorship has been less prolific than legal, but, as the following list indicates, has been by no means neglected:

Hay-Fever; or, Summer Catarrh, Its Nature and Treatment. Based on Original Researches and Ob-

servations, and containing Statistics and Details of Several Hundred Cases. By George M. Beard, A. M., M. D., etc. (Harpers.)

A Manual of Percussion and Auscultation; of the Physical Diagnosis of Diseases of the Lungs and Heart, and of Thoracic Aneurism. By Austin Flint, M. D., etc. (H. C. Lea, Philadelphia.)

The Farmer's Veterinary Adviser. A Guide to the Prevention and Treatment of Disease in Domestic Animals. By James Law, Professor in Cornell University. (Published by the author.)

Ipecacuanha. Studies, chiefly Clinical, on the Non-Emetic Use of Ipecacuanha. With a Contribution to the Therapeutics of Cholera. By Alfred A. Woodhull, M. D. (Lippincott.)

On Tracheotomy in the Diseases of the Larynx and Trachea. By W. P. Thornton, M. D.

A Contribution to the Treatment of Uterine Versions and Flexions. By Ephraim Cutter, A. M., M. D. Second edition. Entirely rewritten. (J. Campbell, Boston.)

The Anatomy of the Head. With Six Lithographic Plates representing Frozen Sections of the Head. By Thomas Dwight, M. D. (Hurd & Houghton.)

The Principal Health Resorts of Europe and Africa for Treatment of Chronic Diseases. By Thomas Moore Madden, M. D. (Lindsay & Blakiston.)

Compendium of Histology. Twenty-four Lectures. By Heinrich Frey. Translated by George R. Cutter, M. D. (Putnams.)

The Encyclopædia of Pure Materia Medica. A Record of the Positive Effects of Drugs upon the Healthy Human Organism. Edited by Timothy F. Allen, A. M., M. D., Professor in the New York Homoeopathic Medical College. Volume IV. (Boerike & Tafel.)

Extra-Uterine Pregnancy: Its Causes, Species, Pathological Anatomy, Clinical History, etc. By John S. Parry, M. D. (H. C. Lea, Philadelphia.)

Legal Chemistry. A Guide to the Detection of Poisons, Examination of Stains, etc., etc., as applied to Chemical Jurisprudence. Translated, with Additions, from the French of A. Naquet, Professor to the Faculty of Medicine in Paris, by J. P. Battershale, Nat. Sc. D. With a Preface by C. F. Chandler, Ph. D., M. D., LL. D. (Van Nostrand.)

Theory of Medical Science. The Doctrine of an Inherent Power in Medicine a Fallacy, etc. By William R. Dunham, M. D. (J. Campbell, Boston.)

The Pathology and Treatment of Childbed. A Treatise for Physicians and Students. By F. Winkel, Professor and Director of the Gynecological Clinic in the University of Rostock. From the second German edition, by James Read Chadwick, M. D. (Lea, Philadelphia.)

Therapeutics of Tuberculosis or Pulmonary Consumption. By William H. Burt, M. D. (Boerike & Tafel.)

Lectures on Orthopedic Surgery and Diseases of the Joints. By Lewis A. Sayre, M. D. (D. Appleton & Co.)

Atlas of Skin-Diseases. By Louis A. Duhring, M. D. (Lippincott.)

Surgical Cases, with Illustrations. By Charles B. Brigham, M. D., Harvard. (Williams, Boston.)

Lectures on the Physical Diagnosis of Diseases of the Heart. By Arthur Ernest Sansom, M. D. (Lindsay & Blakiston.)

A Practical Treatise on Diseases of the Eye. By R. Brudenell Carter. Edited, with Test-Types and Additions, by John Green, M. D. (Lea, Philadelphia.)

A Practical Treatise on Materia Medica and Therapeutics. By Roberts Bartholow, M. A., M. D., Professor in the Medical College of Ohio. (D. Appleton & Co.)

A Century of American Medicine. By Edward H. Clarke, M. D., Late Professor in Harvard University, and others. (H. C. Lea, Philadelphia.)

The Treatment of the Insane. By Dr. Nathan Allen, Lowell, Mass. (Munsell.)

Ophthalmic Therapeutics. By Timothy F. Allen, M. D., and George S. Norton, M. D. (Boerike & Tafel.)

Contributions to Reparative Surgery. Showing its Application to the Treatment of Deformities produced by Destructive Disease or Injury: Congenital Defects from Arrest or Excess of Development; and Cicatricial Contractions from Burns. By Gurdon Buck, M. D. (D. Appleton & Co.)

A Treatise on Diseases of the Skin. By S. Lilienthal, M. D. (Boerike & Tafel.)

Therapeutics of Diphtheritis. A Compilation and Critical Review of the German and American Homoeopathic Literature. By F. G. Oehme, M. D. (Boerike & Tafel.)

A Series of American Clinical Lectures. Edited by E. C. Seguin, M. D. (D. Appleton & Co.)

Mothers and Daughters. Studies for the Conservation of the Health of Girls. By Tullio Suzzara Verdi, A. M., M. D. (Ford.)

Pharmacological Dictionary. A Lexicon of Pharmaceutical Terminology. Containing all the Terms of the Pharmacopœia of the United States and Germany, in English, German, and Latin, with all Popular, Dialectic, or Provincial German Names of Drugs, Herbs, Medicines, . . . for the Use of Druggists, Physicians, Chemists and the German-American Public. By Dr. Robert Karl Beer. (Beer & Sadlier, Baltimore.)

Self-Cure of Love of Liquor and the Opium-Habit. Being a Full and Practical Guide to the Best, Surest, and Safest Means of Self-Treatment. To which are added some Notes on the Abuse of Chloral, Ether, and other Drugs. (J. Haney & Co.)

The Electric Bath. Its Medical Uses, Effects, and Appliances. By George M. Schweig, M. D. (Putnams.)

MISCELLANEOUS.—“The American Cyclopædia” (D. Appleton & Co.), referred to last year as approaching completion, has been issued in full, and has found a demand that is remarkable in comparison with the general condition of the trade, and in consideration of the extent and cost of the work. A “General Index to the Annual Cyclopædia” will prove an acceptable manual to those who possess sets of this work. “A Dictionary of Works relating to America, from its Discovery to the Present Time,” by Joseph Sabin, publishing in parts, bids fair to be in value and completeness a unique piece of bibliography. Another sort of dictionary, the sale of which would be large if it were purchased by all the versifiers whose printed productions show their need of it, is a “Vocabulary of English Rhymes,” by the Rev. Samuel W. Barnum (D. Appleton & Co.), noticeable as the first work of the kind that has appeared since the publication of “Walker's Rhyming Dictionary,” more than three-quarters of a century ago, upon which it is an improvement.

Among compilations, a remarkable series has been commenced by Mr. Longfellow, under the title “Poems of Places”—a selection of poems suggested by or referring to localities in the British Isles and other countries. It is proposed to make a poetical guide-book for a journey around the world. The plan, if fully carried out, will not indeed add any laurels to Mr. Longfellow's crown, but will make him the benefactor of many, whose perception and enjoyment of the beauties of poetry will be

aided by his cultured and matured taste. The success of Mr. R. H. Stoddard's "Brio-à-brac Series" of abridged personal memoirs has led to a second undertaking of the same sort, under the name of the "Sans-Souci Series" (Scribner). A praiseworthy attempt to revive an interest in the classic authors of Queen Anne's time is Mr. J. Habberton's "Select British Essayists" (Putnam). A more questionable piece of ingenuity is the project of a series of "Condensed Classics" (Holt), in which the novels of Scott, Dickens, and other popular writers, are to be abridged, to adapt them to the prevalent habit of hasty reading. That one who has any real appreciation of what is admirable in a great work of imagination could endure an abridgment of it seems to us impossible, and as for the people who read without that appreciation, merely to enjoy the excitement of a good story, it is of very little consequence whether or not they read Scott.

Mr. William D. Howells has broken ground in a new (for him) species of literature, of which, however, his novel, "Private Theatricals," suggested the possibility, in his delightful farce, "The Parlor Car" (Osgood). A work that will have a warm welcome from "all whom it may concern"—and they are many—is "Student-Life at Harvard" (Lookwood, Brooks & Co.). Without particular notice of others, we subjoin the following titles:

The Adventures of Tom Sawyer. By "Mark Twain." (American Publishing Company.)

Reports of the Commissioners of the United States to the International Exhibition held at Vienna in 1873. Edited by Robert H. Thurston, A. M. 4 vols. (Van Nostrand.)

Centennial Temperance Volume. A Memorial of the International Temperance Conference held in Philadelphia, in June, 1876. With the specially prepared Essays, Addresses of Foreign Delegates, a Full History of the General Cause of Temperance for the Century, etc., etc. (National Temperance Society.)

Camp-Life in Florida. A Handbook for Sportsmen and Settlers. Compiled by Charles Hallock. (*Forest and Stream* Publishing Company.)

The Cambridge of 1776. Done by Divers Eminent Hands. (Lookwood, Brooks & Co., Boston.)

A Paying Investment. By Anna E. Dickinson. (Osgood.)

The Problem of Health. How to solve it. By Reuben Greene, M. D. (Russell, Boston.)

Shakespeare and the Bible. By James Rees. (Claxton, Philadelphia.)

Pocket Manual of Rules of Order for Deliberative Assemblies. By Major Henry M. Robert, Corps of Engineers U. S. A. (Griggs, Chicago.)

Temperance and Education; or, The Relation of the Social Drinking Customs to the Educational Interests of the Nation. By Mark Hopkins, D. D. (National Temperance Society.)

Bad Habits of Good Society. By G. A. Baker, Jr. (Patterson.)

Autobiography of a Crystal. By C. G. Dunn. (Lippincott.)

Eminent Orators of France. (Lippincott.)

A Manual on the Culture of Small Fruits. By E. P. Roe (author and publisher.)

Suggestions for the Sick-Room. Compiled by an American Woman. (Randolph.)

Poetry for Home and School. Edited by Anna C. Brackett and Ida M. Eliot. (Putnam.)

Woman and the Law. By Russell H. Conwell.

See-Weed and what we Seed. My Vacation at Long Branch and Saratoga. By "John Paul" [Charles H. Webb]. (Carleton.)

Newspaper Poets; or, Waifs and their Authors. By Alphonso H. Hopkins. (Rural Home Publishing Company.)

A Centennial Commissioner in Europe. By John W. Forney. (Lippincott.)

Dyspepsia and its Kindred Diseases. By Dr. W. W. Hall. (Belford, Montreal.)

Peace Principles exemplified in the Early History of Pennsylvania. By Samuel M. Janney. (Friends' Book Association.)

The Pleasures of Angling. By George Dawson. (Sheldon & Co.)

The Pacific Tourist. By H. T. Williams (author and publisher.)

Josh Billings. His Works complete. With One Hundred Illustrations, by Thomas Nast and others. A Biographical Introduction. (Carleton.)

A Comic History of the United States. By Livingston Hopkins.

Roadside Poems for Summer Travelers. Edited by Lucy Laroon. (Osgood.)

The *Forest and Stream* Handbook for Riflemen. Giving Forms for Organization of Rifle Associations, etc. By Major George O. Starr. (J. B. Ford & Co.)

How to get Rich in California. A History of the Progress and Present Condition of the Gold and Silver Mining, and other Industrial Interests of the Great Pacific State, etc. (McMorris & Sons, Philadelphia.)

Hail Columbia. Historical, Comical, and Centennial. By Walter F. Brown. (W. F. Brown, Providence.)

Our Behavior. A Manual of Etiquette and Dress of the Best American Society. By Mrs. E. B. Duffey. (Stoddard, Philadelphia.)

Money of All Nations equalized, and Currency Rates of Sterling Exchange. By D. William Diggs. (D. W. Diggs.)

Guarding the Mails; or, Secret Service in the Post-Office Department. By P. H. Woodward, Chief Special Agent under Postmaster-General Jewell. (Dustin, Gilman & Co., Hartford.)

Gems of Prose and Poetry. The Fruits of Leisure Hours, original and selected. From the Manuscripts of James K. Aiken. (Miller.)

Oakum-Pickings. A Miscellaneous Collection of Stories, Essays, and Paragraphs contributed from Time to Time to the Telegraphic and General Press, under the *Nom de Plume* of "John Oakum." (W. J. Johnson.)

The Father's Story of Charlie Ross, the Kidnapped Child. By Christian K. Ross. (J. E. Potter & Co., Philadelphia.)

Hours of Amusement. By W. T. G. Weaver. (Cushing, Houston, Texas.)

A Century of Nursing. By A. H. Woolsey. (Putnam.)

A New Library of Poetry and Song. Edited by William Cullen Bryant. In parts. (Ford.)

Humors of Ventriloquism. With Hints for Learning this Amusing Art. (J. Haney & Co.)

Lights and Shades in San Francisco. By B. E. Lloyd. (Bancroft & Co., San Francisco.)

Home Harmonies. By Mark M. Pomeroy. (Carleton.)

Lion-Jack; or, How Menageries are Made. By P. T. Barnum. (Carleton.)

Two Men of Sandy Bar. A Play. By "Bret Harte." (Osgood.)

Churchyard Literature. A Choice Collection of American Epitaphs, with Remarks on Monumental Inscriptions and the Obsequies of Various Nations. By John R. Kippax. (Griggs, Chicago.)

A Manual of Parliamentary Practice. Rules for conducting Business in Deliberative Bodies. By P. H. Mell, D. D., LL. D. (Sheldon.)

The Centennial Gazetteer of the United States. By A. von Steinwehr, A. M. (McCurdy, Philadelphia.)

The Century: Its Fruits and its Festival. A History and Description of the Centennial Exhibition. By Edward C. Bruce. (Lippincott.)

Caxton's Book. Poems, Sketches, etc., by the Late W. H. Rhodes [Caxton]. (Bancroft, San Francisco.)

Treasury of Wisdom, Wit, and Humor, Odd Comparisons and Proverbs. Authors, 981; Subjects, 1,898; Quotations, 10,299. Compiled and arranged by Adam Woolver. (Claxton, Philadelphia.)

A French View of the Grand International Exposition of 1876. By L. Simonin. Translated by Samuel H. Needles. (Claxton.)

Ghost-Land. By E. H. Britten. (Williams, Boston.)

A Classification and Subject-Index for cataloguing and arranging the Books and Pamphlets in a Library. By Melvil Dewey. (Ginn & Heath, Boston.)

The Early and Later History of Petroleum. With Authentic Facts in regard to its Development in Western Pennsylvania, etc. By J. T. Henry. (Baird.)

A Manual for Visitors of the Poor. By John W. Kramer, M. D. (D. Appleton & Co.)

K. K. K. Sketches. Humorous and Didactic. Treating the more Important Events of the Ku-klux-Klan Movement in the South. With a Discussion of the Causes which gave rise to it, and the Social and Political Issues emanating from it. By James Melville Beard. (Claxton, Philadelphia.)

Not a Day without a Line. Original and Selected Lines in Prose and Poetry, for Fireside Contemplation.

REPUBLICATIONS. — The English-speaking world is rapidly becoming, for literary and scientific purposes, one community. Books adapted to popular circulation published in one country are at once reproduced in others, and not a few of those which, from the nature of their topics or their necessary costliness, are addressed to more limited circles of readers, also gain a wide diffusion. It is to be regretted that our defective copyright system makes this literary exchange a practical wrong to English authors—a wrong which is avenged by the discouragement of our own authors. Our Government endeavors (mistakenly) to protect American manufactures, but discriminates against American literature. A reference to the literature "consumed" in this country over and above the home product properly supplements the preceding review.

The departments of science, religion, and fiction, are those most numerously represented in the list of reprints. In science, the continued issue and undiminished popular appreciation of the "International Scientific Series" (D. Appleton & Co.) deserve mention. To this have been added Lommel's "Nature of Light," Van Beneden's "Animal Parasites and Mesemata," Bernstein's "Five Senses of Man," and Blaserna's "Theory of Sound." To the same publishers American readers are indebted for editions of Darwin's "Variations of Animals under Domestication" and "Climbing Plants," St. George Mivart's "Lessons from Nature" and "Contemporary Evolution," Hartley's "Air and its Relations to Life," Dr. B. W.

Richardson's "Diseases of Modern Life," and Miss Arabella B. Buckley's "Short History of the Natural Sciences." Other noticeable productions of this class, or related with it, are Rau's "Early Man in Europe" (Harpers); Dr. J. D. Macdonald's "Microscopical Examination of Drinking Water" (Lindsay & Blakiston); Prof. David Ferrier on "The Functions of the Brain" (Putnams); "Modern Materialism: Its Attitude toward Theology," by James Martineau (Putnams); "The Chaldean Account of Genesis," by George Smith (Scribner); "Discoveries of Ephesus," by J. T. Wood (Osgood); Smith and Cheatham's "Dictionary of Christian Antiquities" (J. B. Burr Publishing Company, Hartford), and a fourth volume of Max Müller's "Chips from a German Workshop" (Scribner).

Of religious works the number is considerable, but, confining ourselves to such as are of general interest, we note the republication of several series of lectures: Jackson's Bampton Lectures, on "The Doctrine of Retribution" (Randolph); Straffen's Hulsean Lectures, on "Sin, as set forth in Holy Scripture" (Dutton); three series of the Congregational Lectures: Rev. R. W. Dale's, on "The Atonement" (Randolph); Dr. Mellor's, on "Priesthood," and Dr. Reynolds's, on "John the Baptist" (Barnes); and the Christian Evidence Society's Lectures, on "The Credentials of Christianity," with a preface by the Earl of Harrowby (Whittaker). The issue of what is known in England as the "Speaker's Commentary," under the title of "The Bible Commentary" (Scribner), has been carried forward to the end of the Old Testament. To these may be added Norris's "Rudiments of Theology" (Dutton); "The Bridge of History over the Gulf of Time, a Popular View of the Historical Evidences of Christianity," by Thomas Cooper (Whittaker); "The Religious Demands of the Age: a Preface to the Works of Theodore Parker," by Frances Power Cobbe (H. B. Fuller); "Endeavors after the Christian Life," by James Martineau (American Unitarian Association); "Mystic London," by Rev. Charles Maurice Davies (Lovell); "The Battle and Burden of Life," by the Rev. J. Baldwin Brown (Whittaker); "The Vision of God, and Other Sermons," by Henry Allon, D. D. (Barnes); and "The Discipline of Drink: an Historical Inquiry into the Principles and Practice of the Catholic Church regarding the Use, Abuse, and Disuse of Alcoholic Drinks, especially in England, Ireland, and Scotland, from the Sixth to the Sixteenth Century," by Rev. T. E. Bridgett (Kelly, Piet & Co., Baltimore).

In fiction there are certain authors whose fame is world-wide. Editions of the works of "George Eliot," of William Black, and R. D. Blackmore, are a matter of course; scarcely less so, of Thomas Hardy, Wilkie Collins, Mrs. Oliphant, Mrs. Dinah and Mrs. Georgiana M. Craik, Miss Yonge, and others. Besides the

authors named, our novel-readers have absorbed tales by Mrs. Alexander, Miss Braddon, Rhoda Broughton, Robert Buchanan, Beatrice May Butts, H. M. Oadell, Mrs. Annie Edwards, Juliana Horatia Ewing, B. L. Fargeon, May Agnes Fleming, R. E. Francillon, C. C. Fraser-Tytler, P. G. Hamerton, Mary Cecil Hay, Ellise Hopkins, Mrs. Linn Linton, Lord Lytton (a posthumously published fragment), Justin McCarthy, George Macdonald, F. Marryat, Susan Morley, James Payn, F. W. Robertson, John Saunders, Anthony Trollope, Edmund Yates, and several anonymous fictions.

In history and biography, we have received "Lord Macaulay's Life and Letters" (Harpers); "History of the United States," by John A. Doyle, with a statistical map by Francis A. Walker (Holt); C. K. Paul's "William Godwin, his Friends and Contemporaries" (Roberts); Rev. G. W. Cox's "General History of Greece" (D. Appleton & Co.); "King and Commonwealth: a History of the Great Rebellion," by B. Meriton Cordery and J. S. Philpotts (Coates); "Memoir of Norman Macleod, D. D." (Scribner); "Memoir and Correspondence of Caroline Herschel" (D. Appleton & Co.); "Life of Marie Antoinette, Queen of France," by Charles Duke Yonge (Harpers); the volumes, for the most part admirably compiled, of a series entitled "Epochs of History," "Epochs of Ancient and of Modern History" (Scribner), and the compact and lucid History Primers (D. Appleton & Co.); "Fifty Years of My Life," by the Earl of Albemarle (Holt); the seventh and concluding volume of D'Aubignè's "History of the Reformation in the Time of Calvin" (Carter); "Village Communities in the East and West," and other essays, by Sir Henry Sumner Maine (Holt); "Life," etc., of Benjamin Robert Haydon (Gill); "History of French Literature," by Henri Van Laun (Putnams); History of English Thought in the Eighteenth Century, by Leslie Stephen (Putnams); "Brief History of Painters of All Schools," by Louis Viardot and others (Lippincott); H. R. Fox Bourne's "Life of John Locke" (Harpers).

Of books of travel, poetry, art, and general literature, may be mentioned "Etching and Etchers," and "Round My House in Peace and War-Time," by Philip Gilbert Hamerton (Roberts); "The Orphan of Pimlico, and Other Sketches, Fragments, and Drawings," by Thackeray (Lippincott); "Songs of Religion and Life," by J. S. Blackie (Scribner); "The Habitations of Man in All Ages," by Eugène Viollet-le-Duc, translated by B. Bucknall (Osgood); "The Sylvan Year," and "The Unknown River," by Hamerton (Roberts); "Stray Studies from England and Italy," by John Richard Green (Harpers); new edition, revised to date, of Chambers's "Cyclopædia of English Literature, edited by R. Chambers and R. Carruthers, Volume I. (Lippincott); Gladstone's "Homeric Synchronism" (Harpers); "Philosophy of Law: being Notes

of Lectures delivered during Twenty-three Years in the Inner-Temple Hall," by Herbert Broom, LL. D. (Baker, Voorhis & Co.); Lord Dufferin's "Letters from High Latitudes, a Yacht Voyage to Iceland," etc. (Lovell); "Essays in Literary Criticism," by Richard Holt Hutton (Coates); "The Comedy of the Noctes Ambrosianæ," selected by John Skelton (Lovell); "Speeches of Lord Erskine," with memoir, etc., four volumes (Callaghan); Tennyson's "Harold" (Osgood), and Morris's "Story of Sigard" (Roberts); "Animals Painted by Themselves," adapted from the French of Balzac, Louis Baude, and others, with upward of 200 illustrations from Grandville, edited by James Thompson, F. R. G. S. (Lippincott); the instructive and entertaining series entitled "The Library of Wonders" (Scribner); and the supplementary series of "Ancient Classics for English Readers" (Lippincott).

LITERATURE, CONTINENTAL, IN 1876. The activity in Continental literature in 1876 will be seen by the following extracts from the correspondence of the London *Athenæum*:

BELGIUM.—French literature in Belgium has been abundant during the past year. It has been especially rich in works of fiction.

In poetry we have had several works which show good powers of versification, among which the most worthy of mention are "Les Vingt-quatre Coups de Sonnet," by Th. Hannon; "Pechers Nouveaux," by Adolphe Muny, an officer in the Belgian army; and "Les Talismans de Stamboul," a Serbian legend, by Ed. de Linge.

Two works in French philology have been published this year, by Auguste Scheler, the royal librarian—"La Mort de Gormand," a unique fragment of a hitherto unknown *chanson de geste*, discovered in the Royal Library at Brussels, and "Les Trouvères Belges du 12^{ème} au 14^{ème} Siècle." Scheler has, in this latter work, comprised songs of love, *jeux-parties*, pastorals, ditties, and fables, by Quenes de Bethune, by Henry III., Duke of Brabant, by Gilbert de Berneville, by Mathieu de Gand, and by other troubadours who are less known.

In the literature of the fine arts, the past year has seen the publication of the tenth and last volume of Alfred Michiel's brilliant "Histoire de la Peinture Flamande," a work altogether worthy of its subject, in spite of certain imperfections which critics have pointed out, while, at the same time, rendering ample justice to the great qualities and merits of the work.

The history of music has been by no means neglected. The discourse of the musical composer, F. A. Gevaert, upon the origin, the progress, and the necessity of *conservatoires* of music, deserves to be specially mentioned; as also does the work in four volumes by E. G. J. Gregoir, entitled "Documents relatifs à l'Art Musical et aux Artistes Musiciens."

The history of the sixteenth century, which

is emphatically the heroic epoch of the Low Countries, is more and more studied every year. We may name, as examples of this, "Histoire des Troubles Religieux de Valenciennes" (1560-1567), by Ch. Paillard; "Troubles Religieux du XVI^m Siècle dans la Flandre Maritime," by E. de Coussemaker; also the excellent collection of "Documents du XVI^m Siècle tirés des Archives d'Ypres," collected and annotated by J. L. A. Diegerick. H. Helbig has published a curious "Mémoire concernant les Négociations de la France relatives à la Neutralité du Pays de Liège en 1630."

The contemporary history of Belgium has been treated by the indefatigable Théod. Juste, in his "Notices Biographiques sur quelques Fondateurs de la Monarchie Belge." He gives a rapid sketch of the life and labors of Raikem, Claes, Hipp. Vilain XIV., Ant. Barthélemy, and Heunequin. Odilon Périer, in his monograph "Dirk Donker Curtius," has retraced the labors of a Netherlands Minister of State, who, in 1830, vainly endeavored to persuade the King, William I., to make the concessions necessary to appease the insurrection of Belgium, and by so doing to maintain the integrity of the Low Countries. In 1848 he materially aided to obtain for Holland its liberal constitution.

The question of the extension and of the transformation of the maritime undertakings on the seaboard has been ably treated by A. L. Cambrelin, in his "Étude sur les Ports de Mer Belges;" also by A. de Maere-Limnander, in his book "Du Port de Heyst et du Canal Maritime de Gand, avec Embranchement sur Bruges." P. Bortier has dealt with the same subject in his small work "Le Littoral de la Flandre au IX^m et au XIX^m Siècle." In this he traces back the history of the changes that have taken place in the coast-line from the period of the Romans up to the present day; he indicates at the same time to Government several methods by which the encroachments of the sea may be stopped. We may also point out an "Essai sur l'Industrie et le Commerce Belge, Français et Étranger," by H. Houtain; and also the "Mines et Métallurgie à l'Exposition Universelle de Vienne," by A. Habets. The letters of M. G. de Molinari, upon the United States, are as true as photography, and the work of an economist who is at the same time one of the best writers and keenest intellects which Belgium possesses. In "Notes et Souvenirs," Louis Hymans relates his literary life in so interesting a fashion that the first edition was disposed of in a week.

In the domain of the material sciences, besides some special treatises which do not come within the limits of this article, we must not omit to notice an excellent work by J. C. Houzeau, "L'Étude de la Nature, ses Charmes et ses Dangers." This work celebrates in a vivid and striking manner the spirit of research into Nature which is one of the glories of the human race.

Prof. F. Laurent has again enriched jurisprudence by three more volumes of his excellent work, "Principes de Droit Civil," a noble monument of legal erudition. Prof. J. J. Thonissen has studied the jurisprudence of ancient Athens, and he has produced a work of great authority on the subject in "Le Droit Pénal de la République Athénienne," which is preceded by an *étude* on the criminal law of legendary Greece.

The publications arising out of the three-hundredth anniversary of the Pacification of Ghent form a natural transition from French to Flemish works.

It is well known that, during the religious wars of the Low Countries, the Catholics and Protestants came to a reconciliation between themselves at Ghent in 1576. By a solemn treaty they united against the Spaniards, and suspended the barbarous laws of Philip II. and the Duke of Alva against heretics. The memory of this great event has this year been celebrated by *grand fêtes*; it has also given rise to a passionate polemical discussion throughout the whole of the French and Flemish press. Many works written for the occasion have been published. Among others, we may mention "Les Actes Diplomatiques de la Pacification de Gand," by Léon Verhaeghe, a secretary of embassy—he has studied with impartiality the events of the sixteenth century, and he comments on the principal treaties concluded at that epoch between the Catholics and the Protestants of the Low Countries; "La Pacification de Gand et le Sac d'Anvers en 1576," by Théodore Juste—this work betrays great haste, and lacks all force and color. "Discours contenant le vray Entendement de la Pacification de Gand" is a reprint of 110 copies only, of a pamphlet published in 1579, which maintains that liberty of conscience is the only means by which the religious troubles can be stopped in the Low Countries. The last we will name is "Album van den historischen Stoet der Pacificatie van Gent;" this work, adorned with eleven engravings, is accompanied by a French translation; it is by Paul Fredericq.

Two new works of poetry have appeared this year—the first, "Zomerkrans" ("Crown of Summer"), by K. Bogaerd, who, from being a common workman, has risen to be a distinguished literary man; the other is "Lenteliederen" ("Songs of Spring"), by Theophil Coopman, a young poet of the brightest promise, but who ought to seek more than he does after originality.

Romance forms this year the most considerable portion of Flemish literature. Hendrik Conscience is the creator and father of the Flemish novel; he is also the most popular author in all Flanders. His books are read by all, and the most ignorant peasant has learned to honor his name. This year Conscience has written an historical romance, "Gerechtigheid van Hertog Karel" ("The Justice of the Duke

Charles"). It is taken from the history of Duke Charles the Bold. Two reprints also are deserving of mention—the "Volledige Werken" ("Complete Works") of Eugeen Zetternam, one of the most fertile and original of the Flemish writers; also the second edition of "Ernest Staas," the witty and bright romance of Tony (Anton Bergmann), which reminds us of the delightful narratives of Toepfer and of the "Camera Obscura" of Nicolaas Beets.

The most original book of the past year has been the second series of the novels, "Nieuwe Novellen," by Rosalie and Virginie Loveling. These two sisters occupy a very high place among Flemish poets and prose-writers. Death deprived us of the elder sister, Rosalie, in 1875. Her three latest novels were published along with three others by her sister. This last volume of prose adds to their reputation, which was already well established in Holland and Belgium. The stories are remarkable for their good taste, delicacy, an admirable faculty for observation, and a vein of pure and refined thought. The little narrative, "Po en Paoletto," by Rosalie, is a gem.

БОHEMIA.—Besides the great scientific works of which an account was given last year, and which have been continued, there are novelties to mention. Among technical publications, Horovský's book, "O dobbý vání Kamennehó uhli," which fills two stout octavo volumes, not counting 143 plates, occupies a prominent place, and is not only fitted to supply a want deeply felt by Bohemians engaged in coal-mines, but, as the similar treatises of Combe, Hedley, and Tonneau are, for the most part, already antiquated, a desire has been expressed to make it known through translations to the mining engineers of other countries. A not less important work is the treatise on Geology of Prof. Krejci, of the Polytechnic School of Prague. The author takes an active part in the gigantic labors of the commission for the scientific investigation of Bohemia, and has repeatedly made extensive journeys to places of geological interest, and is fully acquainted with the literature of his subject. While treating of geology in general, he has given special information regarding the countries where the Czech language prevails, Bohemia, Moravia, Silesia, and North Hungary. About the Silurian system in Central Bohemia, the little known Carpathian range, etc., much is re-ordered, and the high importance of Bohemia in a geognostic point of view is made fully evident.

In philosophy and education may be mentioned Durdík's "Rozpravy Filosofické" ("Philosophical Essays"), and Zoubek's further contribution to the edition of the works of Comenius, "Komenského Drobnější Spisy" (Comenius's "Minor Works"). J. Amos Comenius, the great pedagogue of the seventeenth century, the recognized reformer of the schools of Europe, was not unknown in Eng-

land. He was repeatedly invited by Parliament to improve the schools, and as Huss anticipated Luther's movement by a hundred years, so Comenius preceded the German reformers of education by a century. As a writer Comenius belongs to our classics, and, besides his Latin works, composed a good deal in Bohemian.

In philology have been produced Geitler's "Lithuanische Studien," and the same scholar's contribution to the comparative grammar of the Slavonic tongues, under the title "O Slovanský ohhmenech na U" ("On the Slavonic roots in U"). A rival to the great dictionary of Jungmann has appeared in the work of Kott, "Grammatico-Phraseological Dictionary of the Bohemian Language," which is intended to contain the whole resources of the language. M. Ionás, editor of the *Slavia* of Racine, has brought out a "Bohemian and English Dictionary," intended only for practical use, but of interest as an American production, and a sign of life on the part of the Bohemian emigrants to the United States. A larger work, and one of a more ambitious character, is Prof. V. E. Mourek's "Dictionary of the English and Bohemian Languages."

Of the great history of Palacký, which at his death, in May, 1876, had got as far as 1526, a new edition has been brought out, which is styled a popular edition, but hardly answers to its title, for it is a great deal too dear, costing \$15. In general history I may mention Sembera's "Dějiny národu Klassických" ("The History of the Classical Nations"); in travels, "Za Oceánem," a lively account of a tour in America by T. Stolba.

Poetry flourishes as well as could be expected under the circumstances.

On the whole, journals and schoolbooks still constitute the chief products of Bohemian literature. To form a decisive judgment on our efforts will be only possible at a future time.

DENMARK.—To begin this short review of Danish literature of the past year with dramatic productions, I may mention a play by F. Holst, "In the Age of Transition," performed on our national stage. It gives evidence of keen observation of the human mind; perhaps its greatest merit lies in the many psychologically striking remarks in the dialogue, and in the comprehensive gallery of characters represented; there, however, is a lack of unity in the action that weakens the effect of the play.

Of collections of poetry I may mention N. Bøgh's "Poems," upon the whole easy-flowing and unpretending, but without any great originality; and "Softened Melodies," by H. Drachmann, illustrated by himself.

Drachmann in the past year has also appeared as a novel-writer; in "A Supernumerary One" he has published his first larger tale. In reading this book one gets the impression that the author has not made quite clear to himself what he really intended to give. The

central theme of the book is the development of two young men, about at the close of their teens. Such a book as this would be a more valuable representative of Danish novel-writing to English readers than Scharling's comparatively insignificant "Nicolai's Marriage." We, besides, this year have had collections of smaller stories by Carit Etlar, Erik Bøgh, Bergsøe, Tolderlund, Budde, Thyregod, and Schandorph.

In history I may mention "Six Lectures on the Antiquity of the North," by our veteran historian, Fr. Barford; "The external Political History of Denmark during the Time from the Peace of Lübeck till the Peace of Prague (1629-1635)," forming the first volume of a larger work, by Fridericia; a book by A. Thorsøe, on the renowned Swedish historian, "Erik Gustaf Geijer's Lectures on 'The History of Man,' with especial Regard to their Place in the Course of Historical Development."

In philosophy, Höfding, who has before now contributed to that branch of study, has this year published an able work, "Human Ethics," in which he maintains a natural development of ethical ideas, these being law-bound links in the whole existing world of phenomena. The book is written in clear and plain language, free from all technical terms. The author in his views has been influenced by the modern English philosophers, on whom, a couple of years ago, he published a book.

Among other works of different kinds may be noted the completion of the edition of Höyen's writings; a new volume of Arentzen's "Baggesen and Ehlerschlæger;" the conclusion of the seventh volume of the history of "The Danish Stage," by Th. Overskou, after the author's death, in 1873, edited by E. Collin; a philosophical work by T. Paulsen; "The Old and New Society," by Fr. Krebs.

FRANCE.—In one of my letters recently, I mentioned the saying of an old academician who, when he was visited by a candidate for the Academy, whose books he had never read, remarked in a haughty tone: "*Depuis vingt ans, monsieur, je ne lis plus; je relis.*" France—which is not at all academic, and laughs at the Academy, except when two men of ability, such as M. Boissier and M. Legouvé, make it smile pleasantly—France is in some degree following the method of the old pedant. She reads more than she reads, and the literature put before the public is always, if not that which it deserves, at least that which it asks for and pays for; the caterers for the libraries reprint more old books than they publish new ones.

People were much astonished and almost frightened when, fifteen or twenty years ago, the Hachettes began the publication in octavo of "Les Grands Ecrivains de la France." The friends of these honorable and learned publishers asked, not without some show of reason, where the public was to be found who would buy these handsome volumes, the texts of which were edited so carefully and printed

with such perfection. The fact is, that at that very time the chief bookseller in Marseilles said to me in confidence, "*Monsieur, je tends à peine un Molière par an, à l'époque des étrennes.*" It would seem, therefore, that our tastes have happily changed for the better since then, for the first volumes of the Hachette collection are not to be had. The Molière is easily to be got, for the third volume of it appeared in 1876, but if you want the Malherbe, or the Corneille, or Madame de Sévigné, you must wait for the death of some one of the bibliophiles who possess them.

The prodigious success of an enterprise which at the outset seemed Quixotic has not failed to excite competition. Some men of taste, first and foremost of whom should be mentioned M. Jouaust, a scholar of most refined taste, have set themselves to reprint the classics and the semi-classics, the great masters and the little masters of the national literature. In 1876, M. Jouaust has launched the first of the intended eight volumes of his Molière in octavo, with most lovely designs from Leloir, engraved by Flameng. He has produced, at the same time, the first three volumes of a beautiful Rabelais, the second and third of the "Colloquies" of Erasmus, with the vignettes of Hans Holbein, the "Contes" of Perrault, illustrated by Lalauze, without counting interesting curiosities, such as the reproduction of three of Molière's comedies, "Sicilien," "Tartuffe," and "M. de Pourceaugnac," after the original editions, and a little classical library, which already includes all Boileau, the dramas of Regnard, the "Satire Ménippée," the first volume of Paul Louis Courier, Hamilton's "Memoirs of Grammont," and the "Grandeur et Décadence des Romains," the masterpiece of Montesquieu.

French publishers do not content themselves with reprinting old books; they re-engage old engravings of the sixteenth, seventeenth, and eighteenth centuries. M. A. Lévy, a man possessed of knowledge and taste, does scarcely anything else. After having recommenced the work of Du Cercean on the "Chief Buildings of France," the etchings of Rembrandt, and many other collections which had become very rare, he has just reproduced in colors the very interesting gallery of costumes of the Revolution which belongs to M. Victorien Sardou. All is illustration in this volume except a pretty preface by M. Jules Claretie, the youngest and most fertile of our polygraphs. Three quarto pages comprise the entire letterpress, after which it is the burin that speaks.

The taste for books well made—I mean carefully corrected, printed in handsome types, and on *papier de Hollande*—has become so keen among the bourgeoisie that they pay no heed to price. A simple octavo issuing from the presses of Jouaust or Clay is sold for thirty francs, or even for fifty, without the public finding anything to complain of in it.

But it is time to speak of original works

written by our contemporaries, and which the general public fights for with meritorious zeal. If the smaller bookshops of Paris and the provinces are doing but a bad trade, it is not so with the business of the great publishers. That is in the heyday of prosperity; and, since people like figures, I shall give you two: In the course of 1876 the chief publishers in Paris, MM. Hachette, have turned over 15,000,000 francs; and the greatest house for ready-made garments, the Belle Jardinière, turned over 32,000,000—facts that prove that the French, superficial people as they are styled, are beginning to care for the inner man as well as the outer.

The house of Hachette, founded by a professor dismissed under the Restoration, is an educational firm. Its honorable and lamented head took as his device, "*Sic quoque docebo*," "I shall teach all the same." He kept his word. But not content with offering to the pupils of our schools editions of Greek and Latin authors, printed with an accuracy unknown before his time, he presently aimed at higher game, and worked for grown-up people without abandoning the young. By the side of the school editions of ancient authors, the firm publish learned editions which England and Germany may perhaps rival. But passing over the lexicons and thesauri of Alexandre and Quicherat, one has seen appear in quick succession the "Dictionnaire d'Histoire et de Géographie" of Bouillet, and his "Dictionnaire des Sciences, des Lettres, et des Arts;" "Le Dictionnaire Géographique de la France," by Adolphe Joanne; "Le Dictionnaire Historique de la France," by Ludovic Lalanne; the Littré, that incomparable monument of national philology; and the "Dictionnaire des Contemporains," incessantly revised and revised again by Vapereau. Now we have the "Dictionnaire des Antiquités Grecques et Romaines," a treasure of archaeology, collected and classified by MM. Daremberg and Saglio. Each part, illustrated with one hundred and fifty to two hundred woodcuts, costs five or six months of work, and the book is still at the letter B. Here, again, is the first part of the "Dictionary of Botany," edited by learned M. Ballou, and a whole host of contributors. The work will be completed in I do not know how many years. It will be illustrated with 10,000 cuts, and carry light into the most minute recesses of the vegetable world. Finally, there is another Vapereau, of which the third part is just out. This is the "Dictionnaire Universel des Littératures," a repository very rich in documents about authors, books, periodicals, and plays, of all times and all countries. The manuscript of this enormous book is finished.

M. Édouard Charton, forty-three years ago, founded the *Magasin Pittoresque*, the oldest established of our illustrated papers; he it is who for seventeen years past has conducted for MM. Hachette the *Tour du Monde*, a fine large publication, at least in France unique of its kind.

Our tutors taught us to look upon geography as a cold and mummified subject: in the *Tour du Monde* is presented to us a living geography.

History, which the MM. Hachette have always made to keep pace with geography, has never failed to sustain the reputation of their house. After finishing the "Histoire de France," as related by M. Guizot to his little children, Madame C. de Witt, armed with the paternal note-books, begins a "History of England" that is equally favorably received by our children.

M. Hetzel, after sundry enterprises and varied fortunes, is at present concentrating all his resources and devoting all his talent to a work which may be summarily entitled "Education and Recreation," his principal fellow-workers being M. Jules Verne, M. Jean Macé, M. Eugène Muller, and M. Stahl, who, *entre nous*, is none other than M. Hetzel himself. The estimable author-publisher, whom the Académie Française has often crowned, this year gives us "Les Histoires de Mon Parnain," written in his own amiable, clear style; "Le Jardin d'Acclimatation," by M. Grimard; "La Morale en Action par l'Histoire," one of the best works of honest, simple Eugène Muller; "Le Petit Roi," by M. Blandy; the translation of Mayne Reid's "Young Voyagers;" and "Michel Strogoff," M. Jules Verne's last work. Add to these eight or ten elegant little books, extremely well illustrated, which swell the library of Mdlle. Lili and her cousin Lucien, and you have the list of the productions of the Librairie de l'Éducation et de la Récréation, which reserves all its efforts for the month of December.

At the establishment of Michel Lévy's brother and successor, a crowd of writers have passed, one after the other—writers of every class, serious and light, among whom some are first-rate. "Les Actes et Paroles" by Victor Hugo, vol. ii., "Après l'Exil;" "Les Dialogues Philosophiques," by Ernest Renan; the correspondence of M. Doudan, have, from the first, found a place in the library of every one fond of letters. Amid the numerous novels edited by M. Calman Lévy, from day to day, we must put aside "Étienne Moret" and "Le Piano de Jeanne," two charming works by Francisque Sarcey; "Mon Oncle Barbasson," by M. Mario Uchard, a fantastic and frequently absurd tale, which is redeemed, however, by the drawing of a most original character, and a very happy opening; and the "Nouveaux Récits Galiciens" by Sacher-Masoch, translated by M. Bentzon. MM. Erckmann-Chatrian have added another to their already long list of popular novels, called "Maître Gaspard Fix," which appeared at M. Hetzel's, like their former productions. M. Plon has issued "Les Deux Femmes du Major," the fourth volume of the "Ménages Militaires," by Madame Claire de Chandeneux, which is not entirely devoid of merit. But, above all, I must congratulate

M. Hetzel upon having to do with Madame Henri Gréville. The authoress of "Dosis," of "L'Expiation de Savéli," and some ten other volumes which are about to appear consecutively—for they are already completed—is a lady of about thirty, rather under the middle height, very lively, and overflowing with good-humor.

Speaking of M. Plon, I may say that he is at the head of one of the most active and varied businesses in Paris. He publishes, at one and the same time, novels, almanacs (fancy over twenty almanacs!), memoirs, the travels of the Marquis de Compiègne and of Viscount Melchior de Vogué, the "Souvenirs of the Levant Station," by the Vice-Admiral Jurien de la Gravière, two highly-interesting volumes, and some magnificent publications in which literature and art join hands—as, for instance, "Amsterdam and Venice," by M. Henry Havard. The author of the "Voyage aux Villes Mortes du Zuyderzee," and the "Frontières Menacées," is exiled for the same errors as M. Elisée Reclus.

The author of that splendid book, the "Ornement Polychrome," M. Racinet, has undertaken to carry this new publication through. It will contain 500 plates, of which 300 are in colors, gold and silver, and 200 in cameo. The first number, which appeared in the autumn of last year, is above all praise. I say nothing of the letter-press, for the historical essay which is intended to precede it is still in the press, and the pictures are only accompanied by explanatory notes of laconic brevity.

Those books which appeal to the eyes, and leave to the spectator the pleasure of commenting upon them himself, are beginning to be appreciated in France. Thus, M. Goupil, the famous publisher of engravings and photographs, has set to work to bring out the annual *Salons* in large volumes of photogravure, without any other text than a sonnet to each picture. Besides, the sonnets, written by M. Dézamy, are excellent in point of style, and most agreeable; but does it not seem rather like the world being turned upside down, that in this library of pictures, instead of the engraving illustrating the text, the text should be made to illustrate the engraving with a few lines of prose or verse?

Works on art abound. Never has been written so much about art, for art, and about everything connected with art; while M. Charles Blanc has collected in one very handsome volume the quintessence of all that he has published in his lifetime upon the artists of his day.

The "Public Works of France," studied and described by the ablest of engineers, will form five volumes, of ten parts each, and will be finished at the end of 1877, to be sold at the trifling price of 600 francs. As I remarked before, we no longer consider the expense. The "Grand Dictionnaire Universel," of the nineteenth century—at length complete—is

being sold at 579 francs, in paper covers. It is a gigantic encyclopædia, in fifteen volumes, that it is impossible to do without when one has not got it, and which one does not know where to put when one has it.

History, philosophy, and science, compose a vast domain belonging to M. Germer Bailliére. His happy lot it has been to publish this year the "Synthèse Chimique," by Berthelot—one of those books that honor not only the author and publisher, but which do credit to the country and to the age. M. Fuchs's work on volcanoes, that of M. Vogel on photography, and M. Luys's treatise on the brain, have come to enrich the International Scientific Library.

The same publisher produces every two months a *Revue Philosophique*, conducted by M. Ch. Ribot, and every quarter the *Revue Historique*, conducted by MM. Monod and Fagniez; and we are looking forward to the *Revue Géographique* M. Ludovic Drapeyron has promised us for a New-Year's gift.

Religious and political polemics seem to have found refuge with a *débutant* in book-selling, M. Decaux. In one year this young and enterprising publisher has effected great things, and obtained a series of considerable successes: "La Vraie Marie Antoinette," by George Avenel; "Le Prince de Bismarck," by M. Antonin Proust; "Les Fédérés Blancs," by M. Édouard Siebecker; "Cinq Ans après," "Alsace et la Lorraine après l'Annexion," by M. Jules Claretie; "Les Prisonniers du 2 Décembre," by M. Hippolyte Baboux; "L'Histoire Populaire du Consulat, de l'Empire, et des Cent Jours," by M. Hippolyte Magen.

GERMANY.—The epics of 1876—the year which has witnessed the performance at Baireuth of Wagner's "Nibelungen-Festspiel"—go back to the old German and Norse times, which, thanks to W. Jordan, R. Wagner, and G. Freytag, are again the fashion, as they were after the War of Liberation.

The dramatic literature of the year has been of little importance, and it has been quite thrown into the shade by the proceedings at Baireuth. With the performance of the Nibelungenring, if we are to believe the followers of Wagner, begins a new era, not for music only, but also for the drama. The first sketch of Wagner's libretto dates from 1851; the complete text was published as early as 1862. But the "Art-work of the Future" can only be criticised as a vehicle for the common working of all the arts when it has been bodily placed on the boards. That the old Norse saga of the Nibelungen Treasure and Siegfried the Dragon-slayer contains a strong dramatic element has been shown by the numerous dramatic versions it has given rise to: for instance, those of Raupach and Hebbel. But this dramatic element rests essentially upon the mighty *ethical* pathos that the saga contains—a pathos inferior in greatness to that of none of the ancient sagas, while it in terror surpasses them.

The Roman tragedies of Wilbrant, especially his "Nero," have found a successor in the tragedy of the same name by Martin Greif. The author of "Mirza Schaffy," as his tragedy "Kaiser Paul" was for intelligible reasons refused by the Court Theatre, has tried his luck with a harmless drama, "Alexander in Corinth," an imitation of an old English original. The fashionable rage for the North is so prevalent in Germany that the German dramatists are driven off the field by Björnson and Ibsen.

Of novels properly so called, "Die Ideale unserer Zeit," by Sacher-Masoch; "Ein Kampf um Rom," by Felix Dahn; "Aspasia," by R. Hamerling; and "Sturmfut," by F. Spielhagen, are the most notable. G. Freytag's "Ahnen," which in former years has regularly added annually a branch to the parent stem, has halted this year; another volume, "Marcus Koenig," is announced. Sacher-Masoch made himself a reputation all over Germany by his "Don Juan von Kolomea;" but also, unfortunately, he wrote the "Venus im Pelz," and his new novel has more of the latter than the former about it.

The novels of Dahn, the learned Germanist, and Hamerling, the philosophical epic poet, belong to the class of tales in which, as in Eber's "Aegyptische Königstochter," archæological erudition, or, as in Wieland's "Aristippos," Greek metaphysics plays almost as great a rôle as the imagination. Dahn's book is an historically correct picture of the struggles between Byzantium and the Ostrogoths for the dominion of Italy, which are grouped round an imaginary hero, "the last of the Romans," Cethegus. Veterans, like Gutzkow, Auerbach, Storm, appear again upon the scene. The collected works of the first named are in course of publication: a new tale, "Die Serapionsbrüder," is advertised. After many "national-liberal" aberrations, Auerbach returns to his own field—a field he had better have never quitted—in his new "Schwarzwälder Dorfgeschichten," which would be still prettier if he had not written the old ones. That minute painter of the human heart, Theodor Storm, has added a new and lovely leaf to his laurels, in the tale "Aquis Submersus." Another great success is the "Bozena" of the Baroness Marie Ebner-Eschen, known through her "Erzählungen," published last year by Cotta. The "Novellen aus Oesterreich" of Ferdinand von Saar have, with one exception, appeared before; but they are real gems.

Unquestionably the greatest success among books of travel is Payer's account of the Austrian Arctic Expedition. No less than 50,000 copies are said to have been sold. Wilhelm Lang's "Transalpinische Studien," though full of information, and Heinrich Noes's "Gasteiner Novellen," excellent in their way, must content themselves with a more modest success.

Two exiles of the year of revolution have

written a narrative of their experiences in foreign parts. C. Hillebrand, who sought an asylum in England, declares that England is Americanizing. Fr. Knapp, who went to the States, warns his emigration-loving countrymen that America is not Germanizing.

Among the historical publications of the year, not including the publications of numerous academies and historical associations which have only a value as "sources," the "Byzantinische Geschichte" of the late Gfrörer deserves an honorable place. It has been edited by his friend J. B. Weiss. Max Duncker has issued "Denkwürdigkeiten" of the time of Frederick the Great and Frederick William III., from the last of which it appears that the French, between 1806 and 1818, extorted from the diminished kingdom of Prussia, which counted little over 2,000 square miles (German), two milliards of francs in money and money's-worth. Wilhelm Oncken has thrown new light upon the relations between Prussia and Austria in the Wars of Liberation, 1813-'15—light chiefly derived from the hitherto unused state archives of Vienna, and much more favorable than former accounts to the Austrian court. Upon the recent history of the two great German powers two valuable works have seen the light: in the one, Ferdinand Fischer describes, more in the spirit of a publicist than an historian, the state of Prussia at the close of the first half of this century. The writer is an ardent patriot, but he is fully alive to the misgovernment of the clerical conservative Reaction. The Austrian Freiherr von Helfert took a prominent part in most of the events which he details in the fourth volume of this history of the recent fortunes of the Austrian monarchy, and he has had excellent materials to work upon; but he is a great deal too lengthy.

Biography, the history of literature, and that of art, have received rich accessions. A new volume has come out of the valuable "Denkwürdigkeiten" of the former Prussian minister, Theodor von Schön, the friend and fellow-laborer of Freiherr von Stein in the restoration of Prussia after the Peace of Tilsit. The paper-basket of Varnhagen appears to be inexhaustible; but it is to be hoped that the nineteenth volume of his "Ausgewählte Schriften" will be really and truly the last. The son of Friedrich von Hurter, once the President of the Protestant canton of Schaffhausen, afterward a "vert" and Imperial Historiographer at Vienna, has begun issuing out his father's biography, which promises to give much interesting information on the efforts of the Ultramontane party in Switzerland and Austria. The homely autobiography of the Tyrolese painter, Karl Blaas, has been edited by A. Wolf, to whom biographical literature is already indebted for valuable contributions; among others for the discovery of a charmingly naïve autobiography of the sixteenth century—that of Lukas Geizkofler, of the Augsburg family of that name.

To turn to encyclopædias: the "Allgemeine Deutsche Biographie," edited by Liliencron and Wegele, and the "Deutsche Plutarch," which Gottschall edits, and which possesses several hundreds of distinguished contributors, continue to appear. Wurzbach's "Biographisches Lexicon des Oesterreichischen Kaiserstaats" has this year reached the letter S, and the thirty-second volume. It is a truly gigantic undertaking for one man.

To the history of literature belong the profound commentary on "Faust"—how many commentaries are there?—which that able writer on æsthetics, Vischer, has produced—a work not very intelligible to any but the initiated. As masterpieces of elegant and learned oratory should be mentioned the academical speeches and addresses which the historian of Greece, Ernst Curtius, has collected under the title of "Alterthum und Gegenwart."

At last, but not least, comes philosophy. In the ten years after Hegel's death sadly fallen, philosophy has lately taken a new start. But in this department, too, the race of great original thinkers is gone, and we are busy celebrating their centenaries: in 1862 Fichte's, in 1870 Hegel's, in 1875 Schelling's, and in this year Herbart's—the founder of a school of philosophical realism in Germany, which of all the German schools is most akin to the English—in psychology to Locke, in morals to Clarke. During the predominance of the Schelling-Hegel philosophy, Herbart long stood alone; but since the fall of the Hegelian school, and the growing study of the empirical sciences, the Königsberg professor has enjoyed an ever-increasing number of adherents. The most important philosophical productions of the year come from the Herbartians: Volkmann's "Psychologie," a work as exact as it is learned; and the second edition of Lazarus's "Leben der Seele," one of the most able and thorough treatises on psychological questions that exist. Lazarus also, in company with Steinthal, ranks among the main promoters of a new science that owes its origin to Herbart—the "Völkerpsychologie," which, like Comte's "Sociologie," recognizes the natural laws in the spiritual life of the "Volkseele." The last word, of course, is taken in a somewhat different sense from that in which Ed. Reich employs it in his *bizarre* "Studien über die Volkseele." Lazarus attributes to the "people," as a collective whole, a soul only in a "figurative," Reich, on the contrary, in a "literal" sense. Besides, the former takes the word "soul" in a spiritual, the latter, on the contrary, in a material sense, and recommends for the improvement of the "souls" of the people the "Crossing of the Races." In his judgment of the different "Volkseeelen" the writer is very impartial in regard to his own countrymen, the Germans, or rather he is very partial against them. He puts them, so far as national character goes, below the French and the German-Austrians—who, however, be-

longed to Germany till within the last ten years—even below the "noble Czechs and Hungarians." For "crossing" with the German, he recommends the "chivalrous Polish race."

Upon the whole, philosophy shows a decided leaning toward empiricism. The starting of a new journal for *Empirische Philosophie*, and E. Dühring's newest "Philosophie der Wirklichkeit," are proofs of this. But, while the philosophers descend from metaphysics to experience, certain followers of the natural sciences seem inclined to set out on metaphysical quests.

HOLLAND.—In my review of last year I mentioned a work that was then on the eve of publication—Schimmel's "Sinjeur Semeyna," an historical novel, in three volumes. The great expectations formed by critics and readers have not been disappointed; the book has proved a splendid success. Schimmel's genius has made the glorious times of William III., De Ruyter, and Tromp live again, the days when Louis XIV. had penetrated into this country as far as Utrecht, and the banner of the Bourbons was flying from the cathedral, where mass was once more said. As in his other novels—"Mary Hollis," for instance, which has been honored by an English translation—we must admire the author's deep knowledge of the times, his historical characters, and psychology.

M. Vosmaer, the chief art-critic, of whose French work on Rembrandt a second and enlarged edition is going through the press, has issued a new collection of his essays and shorter poems under the title of "Birds of Different Feathers," the first "flights" of which appeared some time ago. Especially the humor of M. Vosmaer's earlier essays, slightly tinged with melancholy as they are, reminds us of Hawthorne. A conspicuous feature in our novelistic literature of the year was the completion of P. van Limburg Brouwer's collected works of fiction. This author, who died long since, was professor at Leyden, and one of our best classical scholars.

Some volumes of lyrical poems have appeared in the course of 1876, which contain fair promise for the future. Those of Holda, a pseudonym, and De Rop, prove that the poetic vein that runs through the works of the old and modern painters still contains ore of the purest quality.

An event which may prove propitious to the stage is the leasing of the Amsterdam and Hague Theatre to a company of gentlemen, who intend to influence the actors and the repertory. The literary fertility of this small country makes it impossible even to give the titles of the most important publications relating to the stage and its history, theology, and philosophy, history, Oriental and classical languages and literature, geography and travels, local history and topography, and art.

HUNGARY.—In philology, the learned acad-

emician and professor, Budenz, has produced, in one volume, a grammar of the Mokscha and Erza-Mordvin languages, and effected a unification of these two dialects, which have been hitherto separately treated by Finn-Ugrian philologists, such as Ahlqvist ("Versuch einer mokscha - mordwinischen Grammatik, nebst Texten und Wörterverzeichnis," St. Petersburg, 1861) and Wiedemann ("Grammatik der erza - mordwinischen Sprache, nebst einem kleinen mordwinisch-deutschen und deutsch-mordwinischen Wörterbuch," St. Petersburg, 1865).

In connection with philology, I may mention M. Paul Hunfalvi's "Ethnography of Hungary," which treats of the origin of the Magyar race, as well as the early history of the non-Magyar population of the country, such as the Germans, Slavonians, Roumanians, Armenians, Gypsies, and Jews, the latter in their quality of integral parts of the crown of St. Stephen, a proceeding which deserves approbation, since the ethnological conditions of these last-named nationalities have been already amply treated by Rössler, Häufle, Miklosich, and Czoernig.

Dramatic literature can boast of two eminent products: "Milton," by Maurice Jókai, a work defective in dramatic construction, but thoroughly poetic; and "Ishkariot," a Biblical tragedy, by the young Anthony Várady. A lofty and poetic mind pervades the dramatic poem, "The Day of Judgment" ("Az ítélet napja"), by Baron Ivor Kaas. The greater part of the products of dramatic literature are composed to supply daily demand.

Fiction is represented only by our genius, Maurice Jókai. To him we are indebted for "The Comedians of Life" ("Az élet komédiásai"), a social novel, "The Lunatic of Debreczen" ("A debreczeni lunátikus"), an interesting and humorous tale, and "To the North Pole" ("Egész az északi pólusig"), a fantastic novel in the style of Jules Verne.

Essays on literary history are mostly published in periodicals. As separate volumes, we find "The Ballads of Arany" ("Arany balladái"), expounded by Augustus Greguss; "History of our Literature, 1711-72" ("Irodalmuk története, 1711-72"), written with great care by Joseph Szinnyi, junior; and "The Two Kisfaludy" ("A két Kisfaludy"), by Thomas Szana, of which the latter describes two interesting individuals in Hungarian literature, viz., Alexander Kisfaludy, one of the most eminent representatives of erotic poetry, and Charles Kisfaludy, the founder of Hungarian comedy. The valuable work of Francis Toldy, "A Manual to Hungarian Poetry" ("A magyar költészet kézikönyve"), is only a second and enlarged edition of the original book.

Turning to history, I may begin with the publications of the Academy, which, edited by a special committee, mostly refer to the investigation of our original resources. That committee, presided over by Bishop Horváth, the eminent historiographer of this country, enjoys an

annual subsidy of 50,000 florins from the Government, and unites our best scholars on the field of historical resources. The publications called "Monumenta Hungariæ Historica" consist of two different groups, those relating to parliamentary matters, and the "Acta Extera." In the past year came out the following noteworthy work: "Diplomatic Monuments of the Time of the Anjou Dynasty," by Prof. Gustavus Wenzel, extending from 1870-1426; "Diplomatic Monuments from the Time of our Great King Mathias Corvinus," edited by Iván Nagy and Baron Albertus Nyáry, comprising the time between 1458-70. As particularly interesting, I have to mention "The Correspondence of Nicolaus Oláh," published by Bishop Arnold Ipolyi, a book which throws an essential light upon one of the most interesting periods of Hungarian history. Nicolaus Oláh was a private secretary of Queen Maria, the wife of our unfortunate King Ludovic II., who fell at the disastrous battle of Mohács. Queen Maria having been obliged to emigrate after the Turkish occupation of Hungary, her secretary, N. Oláh, followed her, with a noble attachment, to the Netherlands, and the correspondence which he kept up, from that country, with his friends in Hungary, is rich in details concerning the diplomatic transactions of those times between Charles V., Ferdinand I., and Clement VII. We get from these letters an insight into the great panic which Europe experienced with regard to the Turks; but, at the same time, we see how mutual rivalry and total ignorance of facts stood in the way of an energetic and combined defense. Bishop Ipolyi's book, comprising 621 letters in Latin, fully deserves the attention of foreign scholars.

This year the congress for prehistoric archaeology and ethnology held its eighth meeting, at Buda-Pesth. England was represented by Messrs. Franks, Evans, and Grote; France, Sweden, Denmark, Italy, Belgium, Germany, Holland, and the different provinces of ancient Poland, sent their most distinguished *savants* to our capital; Vienna, Russia proper, and Roumania, were absent. The principal feature of the congress was a noble exhibition of the most important prehistoric remains found in Hungary, which gave a correct idea of the different types of Hungarian finds.

ITALY.—Guasti, of Prato, near Florence, has recently published the forty-sixth and forty-seventh portions of the monumental "Storia dell' Arte Cristiana nei primi otto secoli della Chiesa," by Father Raffaele Garrucci, of the Company of Jesus. These two portions complete the third folio volume, which treats of miniatures and painted glass. The fourth volume is now commencing, which will describe the mosaics. This work is now about half finished, and all those persons who are engaged in the history of art ought to express the desire that it may be carried on to the end; they should also give it their best encouragement.

Some of Father Garrucci's opinions may be disputed, and some of his interpretations may seem somewhat arbitrary; and it would have been as well had the illustrations been strict fac-similes, and not undergone any arrangement whatever; but this fault is not for a moment to be weighed against the immense archæological erudition of Father Garrucci, the great importance of some of the illustrations, which are now for the first time given to the world in his book, and the subtle ingenuity of some of his remarks; above all, there is the very solid and important fact that never, until now, has so rich or so interesting a collection of materials been brought together to illustrate Christian art from the earliest ages of the Church. This work, to which all the great libraries of Europe have subscribed, will, when complete, contain one hundred parts in folio, and the price will be five hundred francs.

From Naples we have received the first part of another archæological work, "Le Rovine di Pompej;" the illustrations are drawn and engraved by Giuseppe Solari and Eugenio Leone. This work, when finished, will contain upward of a thousand woodcuts, distributed through sixty sheets of letter-press. The present specimen-number does not give promise of much learning; but it is, at all events, well illustrated, the objects are carefully described, and the book will be suitable to general readers, on account of the cuts and of the extreme, almost elementary, clearness of the explanations.

Two excellent archæological monographs, in quarto, have recently appeared: one of them, "I Sigilli Antichi Romani raccolti e pubblicati da Vittorio Poggi," with eleven pages of illustration; the other, "Le Antiche Lapidi di Bergamo descritte ed illustrate dal Canonico Giovanni Finazzi." Both of them are works of solid erudition and conscientious labor.

In this place I must especially mention the last volume in quarto of the "Documenti di Storia Italiana," published by the Historical Commission of Tuscany, Umbria, and the Marches. I must not omit the first volume in quarto of the "Biblioteca Historica Italiana," published in an elegant form by the Lombard Historical Society. It has an instructive preface, written by A. Cerruti; and it also contains chronicles and historical monographs.

Last year I announced the first volume of the "Storia della Diplomazia della Corte di Savoia," by Domenico Carutti. This eminent historian, who is a member of the Council of State at Rome, has now lately given to the world the second volume of the work. This volume treats of the events of 1601-'68, that is to say, the stormy period for the House of Savoy during the reigns of Charles Emanuel I., of Victor Amadeus I., and of Madama Reale. Sgr. Carutti always goes for his materials to trustworthy sources, and turns to the best account the dispatches of ambassadors.

Almost at the same time that Sgr. Bianchi is introducing us, through his most inestimable

work, to the treasures of the Piedmontese archives, two archivists of Venice, Sgr. F. Toderini, and Sgr. Bartolomeo Cecchetti, the present excellent keeper of the Venetian Archives, have given to the world an account of the archives under their care, in a volume which is worthy of all commendation. It is entitled "L'Archivio di Stato in Venezia nel Decennio 1866-'76." It gives evidence of the immense interest possessed by the mass of historical papers which are kept in Venice, and it also bears witness to the care and pains that have been bestowed upon them since the deliverance of Venice from the Austrian yoke.

It is thus that Sgr. Domenico Berti, deputy to Parliament, and also Professor of History of Philosophy at the University of Rome, has at last given to the world, *for the first time*, an exact and complete copy of the "Processo Originale di Galileo Galilei," with an excellent commentary upon the same. Certain orthodox critics, who have not seen the work, have precipitately declared that the announcement of this book is merely an Italian hoax. The same author, some months previously, published a perfect model of an historical monograph, under the title of "Copernico e le Vicende del Sistema Copernicano in Italia nella seconda metà del Secolo XVI^{mo} e nella prima del XVII^{mo}." Thus the two grand characters of Copernicus and of Galileo are both faithfully delineated in these eloquent and masterly histories by the same writer.

Among the best works of history that have appeared in the course of the present year is the first volume of a very important work, by Prof. Bartolomeo Malfatti. It is entitled "Imperatori e Papi ai Tempi della Signoria dei Franchi in Italia." Immense labor has been bestowed upon this first volume; it is written in the highest style of criticism, and every page bears the impress of impartiality. I must also mention the recent numbers of the always attractive "Cronistoria dell'Indipendenza Italiana," by our aged but still indefatigable and illustrious historian, Cesare Cantù; and the eighth edition of Sgr. Amari's celebrated work, entitled "La Guerra del Vespro Siciliano," with many important additions and corrections, which may now be considered as final.

All that can be said on the whole of Italian publications is, that the book-trade in Italy seems to be growing more and more brisk, owing to several circumstances, which may be briefly summed up as follows: first, the general awakening of Italy; secondly, the number of publishers, which is always on the increase; thirdly, the public becomes more eager after new works; fourthly, there are authors who are content to receive a nominal price for their work, sometimes they are content to receive nothing at all, and sometimes they even gladly pay the expense of publication, for the sole pleasure of seeing their book well got up, and brought out by a good publisher. It is seldom,

indeed, that a publisher is to be found who, like Maisner, of Milan, is inclined to make an outlay of 20,000 francs on one large volume in quarto, with illustrations, containing the learned narrative by Prof. Enrico Giglioli of his great scientific voyage round the world in the *Magenta*. The work deserves to take its place among the best standard works of travel. It has been edited with the utmost care. The ethnological introduction which Prof. Paolo Mantegazza has prefixed increases the value of this book, which may be pronounced to be the most important work that has appeared this year.

Although it would be difficult to point out, amid this mass of books, a single one that could be called a work of first-class originality and merit, yet I can conscientiously aver that none of these publications can be styled commonplace: each one has its own characteristics, and has its own individual merits. Thus, among the novels, there are several in which there is much to appreciate and to admire.

In dramatic and in lyric poetry Italian authors have not been idle during 1876. The year has given us our earliest printed copies of several dramas by authors who just now are enjoying popularity.

Political excitement has more or less subsided; accordingly our poets have recently enjoyed more favor than has been bestowed on them for some years past. Italy's former love of art has revived, and has partly expressed itself in the care shown by the editors of several poetical collections.

NORWAY.—The present year has not been rich in literary productions. In belles-lettres there is nothing deserving mention. Turning to historical literature, I may mention that the edition of the many and important historical and philological essays of the late Prof. P. A. Munch, by Dr. Gustav Storm, has been recently finished with the publication of the fourth volume.

In theology merit to be named the Rev. E. F. B. Horn's book "On Atonement and Justification," and the Rev. A. O. Bang's learned essay "On the Historical Reality of the Resurrection of Christ." The first of these works has provoked several protests from the strictly orthodox party, as it in several respects clashes with the old Lutheran dogmas, but his views have been defended by the author himself, not without talent, and have also found approval in the eyes of several authorities.

In law, Prof. Aschehoug continues his important work, "Norges offentlige Ret" ("On the Norwegian Constitution and Government"), and Prof. Ingstad has written an essay on the study of Roman law, in which he also treats of the present state of that study in England.

Axel Blytt has produced a learned essay (in the English language) "On the Immigration of the Norwegian Flora," which, as it deserves, has attracted much attention in foreign

countries; Dr. A. S. Guldberg, a work "On the Theory of Determinants;" C. de Sene (in German), a treatise, "Windrosen des stidlichen Norwegens." The last work is printed as a programme of the university.

The renowned mathematician, Prof. O. J. Broch, has made a most important contribution to the knowledge of his native country in his new book, entitled "The Kingdom of Norway and the Norwegian People." This work, which also appears in French translation, has been provoked by the Exhibition at Brussels.

PORTUGAL.—In ten months we have had ninety translations. The "Vida Infernal" of Gaborian side by side with the "Cartas a um Sceptico" of Balmes; the "Historia e Milagres da Virgem de Lourdes" of Lasserre in front of the "Historia dos Coitadinhos Celebres" of H. Kock. Here are the two currents of the new literature, which are still the illustrations of our manners and customs. On one side the Ultramontane school publishes the "Syllabus Justificado" and the "Egreja Triumfante" of Maupier, multiplies the number of catechisms and prayer-books, issues new editions of the works of the old mystic authors; on the other side, a literary party, without name and without character, translates immoral romances, and makes detestable verses full of profanity and caricatures of the most sacred things.

Of original works I cannot cite many. The "Douro Illustrado," by the Viscount de Villa Maior, is considered by competent authorities as up to the mark of the author's capacity: he is known by his studies and writings respecting viniculture; but the present is more a treatise on curiosities and statistics than a work of science. Prof. A. A. d'Aguiar, who was the Portuguese Commissioner to the Exhibition of Wines in London, has already published part of his lectures on agriculture. They created for him adversaries and heart-burnings. This was to be expected, for Senhor d'Aguiar is a man distinguished for science, conscientiousness, and honesty, and, moreover, speaks what he thinks. His lectures, which made so great an impression when spoken, lose nothing of their expressiveness in a printed form.

In the section of belles-lettres, the reaction against the extravagance of the French style begins to operate; the romances of Julio-Diniz serve for an example. Pedro Ivo, Bento Moreno, two *noms de plume*, figure on the title-pages of notable books. The first, who was already known by his "Contos," has now published "O Sello da Roda," and Bento Moreno has issued the "Comedia do Campo," pictures of manners, scenes in the Minho, small unaffected stories, admirably, nay, adorably narrated.

A. Sarmiento has also published the "Contos do Soalheiro," an estimable work, in which is found a rich collection of proverbs, adages, idiotisms, and popular Portuguese phrases, as

well as a description of the customs and superstitions of our people.

Dona Maria Amalia Vaz de Carvalho, the authoress of the "Vozes do Ermo," is already known among us not only as a poetess of distinction, but also as a prose-writer of eminence. There is not one of the Portuguese ladies who aspire to literary honors able to compete with her. The "Vozes do Ermo" is the only book of verses which I consider I ought to particularize.

I desist from mentioning some agreeable books of travels, as well as some pleasing poems of small importance.

In dramatic literature, excepting the drama, "Os Lazaristas," of A. Ennes, there has not appeared anything worthy of notice. This drama is not only a work of propaganda against the Jesuits, but must be rated, when we set aside a few slight blemishes, a true production of art.

Theophilo Braga, a workman of untiring industry, has issued the "Anthologia Portuguesa," the "Manual da Litteratura Portuguesa," the "Grammatica Comparada da Lingua Portuguesa," and also published the "Cancioneiro do Vaticano." All these works are commendable.

SPAIN.—A tendency is to be observed in Spain to foster the study of science by establishing it on a more solid foundation, and one more in accordance with modern ideas. This has continued in the present year almost to a greater extent than in former ones. The establishment of new literary centres and scientific periodicals, the foreign books which are continually translated, and the excellent literary reviews which appear, show us that the Spanish public is becoming anxious to learn and favor studies of all kinds.

For many years French books have been the only channel through which foreign ideas and scientific impulses have entered Spain. There is a great change at the present time. A large number of books are translated directly from German and English, most of them of a scientific kind; and they meet with a ready sale, which would not have been the case twenty years ago. Among them may be mentioned Mackeldy's "Studies of Roman Law," Mommsen's "History of Rome," Draper's "Science and Religion," besides works of Hegel, Kant, and the Greek philosophers, which have been translated and greatly commented upon lately. One of the reasons which have contributed to make these studies popular in Spain is, that the best Spanish literary journals publish a special foreign correspondence direct from the European literary centres. These facts clearly prove that the Spanish public is becoming more alive to the advantages of private enterprise; there is, undoubtedly, progress, though, if compared with the modern life of other nations, the result is poor. Literary writings are scanty, and the country is going through one of those periods which generally come before a renaissance,

as has been the case in Germany and Italy; unfortunately, however, in Spain the southern character predominates in a great degree, and destroys most part of the other advantages. One instance of this is furnished by the debates held at the Ateneo of Madrid, a neutral ground on which celebrities of every school meet to discuss every kind of subject. The debates of this year have been held on important social problems, and also to discuss whether it would be advisable to have the protection of the Government for certain literary productions. The orators have enchanted their audiences by their eloquence, without, however, convincing them; for the ideas which they support in religion, philosophy, and social science, possess so eclectic a tendency that it is not easy for half a dozen individuals to agree in a concrete solution.

Such is the general aspect of the intellectual life of 1866. The books which have appeared during the year have been few, and none of any great importance.

SWEDEN.—The prosperity, which in a material point of view has been the result of abundant harvests and progress in all the departments of commerce and industry, has naturally exercised a beneficial influence on the book-market. The number of original works is, however, not very large; translations, on the other hand, are more numerous. The latter, with a few exceptions, must here be omitted.

To turn to philosophy, there has been published the first installment of a selection of S. Grubbe's works. Grubbe was Professor of Philosophy at the University of Upsala, and as a stylist he ranks among our greatest authors. This work is published by A. Nybloms, who, in "Den filosofiska Forskningen i Sverige från slutet af adertonde århundradet" ("Philosophical Researches in Sweden from the end of the Eighteenth Century"), and other books, has proved himself not only a learned inquirer, but a master of the art of writing in a clear and popular style. Another volume of great interest is G. Bring's "Immanuel Kants Förhållande till den filosofiska Teologien" ("I. Kant's Relation to Philosophic Theology").

The researches in Swedish history have not produced any great results this year.

The interest taken in fine arts and their history has been increasing, especially since the opening of the new National Museum, simultaneously with the great exhibition of productions of art and industry in Stockholm, 1866. In consequence, the time seems to have arrived for producing an art-journal—an idea that was realized two years ago. L. Dietrichson is the editor; contributions have been furnished by Prof. Nyblom, Ljunggren, and others, and the artistic part of the work has been provided for by engaging the services of distinguished etchers, Unger, Klaus, Lowenstam. Dr. Fr. Sander has this year completed a work relating to its valuable collection of pictures, under the title of "Nationalmuseum,

bidrag till tafe galleriets historia" ("The National Museum, Contributions to the History of the Picture Gallery"), based on careful researches. The productions of the modern pictorial art of the North are represented by "Nordiska målarens taflor" ("Pictures by Northern Painters"), with an explanatory text; and the exhibition of the works of Egron Lundgren (the painter in water-colors so highly esteemed in England), which had the honor of numbering the Queen of England among its exhibitors, together with our present exhibition of industrial productions of art—proofs that the fine arts are cultivated in Sweden.

The Swedish literature has this year been enriched with a most valuable collection of poems, written by C. D. af Wirsén. These songs, pervaded as they are by a mournful tone, through which, however, glimmers forth a manly trust that is based on Christian principles, carry the reader into a poetical atmosphere, which reminds him of that which surrounds B. E. Malmström's best productions.

Russia.—The literature of Russia for the year seems barren. The continuation of what is so far a really great novel, still unfinished, Count Leo Tolstói's "Anna Karenina," is all Russia can boast of. What is, perhaps, the greatest production of the year has not yet succeeded in satisfying the censorship, and is still retained in the printing-office, the important work of Prince Vasilitchkof, "Land Tenure and Agriculture." Turgeneff appears in one short tale only, "The Watch," in which he shows all his old pathos. Moved by the Bulgarian horrors, he sent to one of the Russian newspapers a short poem—a vision of a game of croquet at Windsor—which, in its half-dozen stanzas, gave a more impressive picture than any Russian poem which has appeared for years. Fortunately his pen has not been idle, and a new novel, longer than most of his former works, "Nov," is now in course of publication. Dostoiefsky has devoted all his force, not to works of art or to realistic novels, but to his serial, "The Journal of an Author," half autobiographical and half critical, on society and politics. The poems and dramas of the late Count Alexis Tolstói have been collected and published; Stchedrin (Soltykof) has given us some new satirical sketches, "Conservative Talk;" and Pypin has begun a series of studies on the history of Russian literature, which are already good and promise to be better. Beyond this we find nothing but the productions of third-rate writers—a play or two, some slight though graceful verses, and a few novels, occasionally of merit. Such things are published and are read because the Russian reading public is growing larger, and must, somehow, be satisfied. To supplement the deficiency of native talent, now, as once before in Russian literary history, translations of the best contemporary authors are in vogue, and are becoming more and more the staple of some of the magazines.

In poetry the event of the year has been the republication of the poems and dramas of Count Alexis Tolstói. This edition, while containing many things that were scattered through the pages of periodicals, is not complete, in the sense that it does not contain some poems which the censorship would forbid from their political satire, and some which were never intended for publication, but only for the amusement of friends, being caricatures of men of the time, or full of Rabelaisian humor.

The strong point with the Russian literature of 1876, as for many years of late, is in history and historical material. Of the latter, three journals deserve a special mention for their general as well as their historical interest, the memoirs of Michael Garnofsky, of Madame Passek, and of Baron Rosen. Garnofsky was an artillery colonel, who was for many years the overseer of the houses, villas, and glass-works, of Prince Potemkin in St. Petersburg; and during the frequent absences of the prince from the capital had charge of all his affairs, not only those of property, but of various commissions, and business at the court and with people in near relations to the Empress Catherine, as also with various ministries and departments of the Government. Potemkin considered him as his right hand, all houses in St. Petersburg were open to him, and he was on intimate terms with many of the leading men of the epoch. They are written in a clear and business-like but lively style, and extend from 1786 to 1790. "The Recollections of Madame Passek," of which a small portion had already been printed, begins with the accession of the Empress Catherine II., and extends to 1812. The recollections concern rather the writer herself and her immediate acquaintances than political affairs in general, although they are full of valuable references. The publication of the memoirs of Baron Rosen is a new proof of the great interest which the present generation takes in all that concerns the Decembrists, that band of noble and enthusiastic young men who endeavored to prevent Nicholas from ascending the throne in 1825, and to force upon Russia a free government. Another interesting contribution to historical literature, for it covers and attempts to decide many knotty points, is "The French in Moscow in 1812," by D. N. Popof. The writer has carefully studied the whole literature of the subject, and many diaries and papers which have never been published, and gives us full materials to judge for ourselves how and why Moscow was burned.

Among other historical publications should be noted the "Relations of Russia with the European Powers before the War of 1815," by A. Popof; the second and third volumes of the new edition of the "Complete Collection of Russian Laws," etc., which extend to 1723; the fifteenth, sixteenth, and seventeenth volumes of the "Collection of the Russian Histori-

cal Society;" the second and third volumes of the "Russian Historical Library;" the eighth and ninth volumes of the "Archives of Prince Vorontzof;" the "History of Tver," by Borzakofsky; the "Embassy to England in 1600 of Gregory Mikulin;" the "Historical Value of Russian Brigand Songs," by N. Aristof; the fifth volume of F. Bienemann's "Briefe und Urkunden zur Geschichte Livlands," from 1558 to 1562; and Johann Renner's "Livländische Historien."

From history to politics the transition is easy. The chief works in this division are, the third volume of Prof. Marten's "Collection of Russian Treaties and Conventions," which includes the treaties with Austria from 1808 to 1815; the second volume of Prof. Gradovsky's "German Constitution;" "Sketch of the History and Dogmas of International Law," by A. N. Stoyanof; and J. Kensler's "Communal Property and Emancipation."

In geographical and scientific literature there is not much to speak of.

The profound work of J. R. Aspelin, on "Finnio-Ugric Archæology," deserves special mention, although published in Finnish. As it is profusely illustrated, it may be useful even to those ignorant of that language.

LITERATURE, ENGLISH. The extent to which the best literature of England and America is interchanged has been referred to in the article LITERATURE AND LITERARY PROGRESS, with a notice of some of the principal English works republished in the United States. In the present article, consequently, mention is chiefly made of books not yet reproduced in American editions. And among these, the mass of compiled and ephemeral publications call for no particular notice. It is true that there is some risk in this rather wholesale and summary judgment, and it may prove to have been presumptuous in respect of some authors thus passed by, but the purpose of these reviews is not so much criticism as the record of contemporary estimates of literature, to note what books did in fact make an impression on the public, rather than to express our judgment as to what books ought to have been honored with the public approval.

POETRY.—In the higher order of creative literary art, England had not much to show during the last year. The laureate put forth another tragedy. "Harold," regarded as a poem, will not discredit Mr. Tennyson, though it can add nothing to his fame; as a drama, while free from some of the faults of his "Queen Mary," it is equally deficient in dramatic vitality. Mr. Browning gave us a volume with the enigmatic title "Pacchiarotto, and how he worked in Distemper, and Other Poems." The leading piece is meant as "a fable for critics," but the critics for whom it is meant are less likely to wince under his satire than to point to the poem as a confirmatory instance of what they have alleged against the poet. Mr. Browning must be content to sing

for the initiated, and, if his "fit audience" proves to be also very "few," to put up with it as "the best his circumstance allows." The chief poetical sensation of the year was the discovery by Mr. Swinburne and the republication of "Joseph and his Brethren," a drama by Charles Wells, published forty years ago, neglected and forgotten, but pronounced by Mr. Swinburne to be worthy of comparison with the plays of Shakespeare. What adds to the surprising features of the case is the fact that the author whose work thus failed to gain public attention is still living to enjoy his late-blossoming reputation, a reputation which will not come up to the height of Mr. Swinburne's praise, but will make some amends for his previous total failure. The usual quota of minor poetry has appeared, but nothing that will excite more than a limited and temporary interest. Perhaps next to the case of Mr. Wells and his drama in interest is the identification of what had been supposed to be genuine old ballads as the work of an eccentric clergyman lately deceased, the Rev. Robert Stephen Hawker. One of his ballads deceived so keen-sighted a judge as Lord Macaulay. The name of Mr. Hawker has been brought before the public in an unpleasant way by a biography in which his memory is by no means honored, but which the public have reason to consider as more discreditable to the author than to the subject.

NOVELS.—In the department of prose fiction, the best is disappointing. Nobody but George Eliot could have written "Daniel Deronda," but it has not raised nor even sustained her great reputation. Mr. William Black's "Mad-cap Violet" is scarcely inferior to *his* best. As in his previous novels, the plot is open to exception, and some of his characters seem to approach the extreme of human possibility, if they do not overstep the modesty of Nature. But with whatever drawbacks, the power of his genius is incontestable. Mr. R. D. Blackmore's "Cripps the Carrier" is not a production that can add anything to the credit of the author of "Lorna Doone" and of "Alice Lorraine," however superior to the average novel. "The Hand of Ethelberta," by Mr. Thomas Hardy, comes nearer to doing justice to his recognized position among literary artists. Mr. Justin McCarthy's tale, "Dear Lady Disdain," is well conceived and worked out with his usual firmness of hand. "The Dilemma," by Colonel Chesney, author of "The Battle of Dorking," besides its high merits as a fiction, presents striking pictures of the Sepoy mutiny in India. "The Atonement of Leam Dundas," by Mrs. Linn Linton, takes a very high place among sensational novels, in fact, almost rises into a higher realm of fiction. Mrs. Oliphant's last two novels, "The Curate in Charge," and "Phoebe Junior, a Last Chronicle of Carlingford," are in her best style, which is a very good style indeed. "Thomas Wingfold, Curate," by Dr. George Macdonald, in a very

different style, is an advance in respect to artistic power upon his previous productions. "Rose Turquand," by Ellice Hopkins, and "The Master of Riverswood," by Mrs. Arthur Lewis, are productions of much promise, assuming them to be by new writers. A considerable list might be made out of fictions that attain to a respectable mediocrity of merit, and to something more than that in single features, but to what end?

HISTORY AND BIOGRAPHY.—The completion of Mr. E. A. Freeman's "History of the Norman Conquest of England" is a matter of congratulation. Mr. Freeman is not a master of narration or of description. He is not what is termed an eloquent historian. But for clear *exposition*, placing the reader in the points of view from which he can best see the subject in all its parts, he stands in the first rank, and his work, we believe, is a permanent addition to the masterpieces of English literature. Prof. George Rawlinson has published his "Seventh Great Oriental Monarchy: History of the Sassanians," continuing, with undiminished grasp of learning and critical sagacity, to embody the results of recent Oriental investigations. The series is completed, bringing Oriental history down to the era from which modern history dates. Dean Stanley's third series of "Lectures on the History of the Jewish Church" expounds a portion of the Jewish annals, the dryness of which, as commonly treated, makes it by no means attractive to any but very inquisitive investigators. But nothing can resist the magic of Dean Stanley's enthusiasm. Whatever he touches turns up an interesting side, or is made to appear interesting by virtue of some association or suggestion caught by his fertile mind and brought into relation with it. His mild and conciliatory attitude of mind toward all forms of doctrine, and hospitality to new ideas, are also exhibited, if possible, more than in his previous productions. Part I. of a "History of the Moslems, from the Ninth to the Nineteenth Century," by Henry H. Howorth, is the beginning of an important work. "Islam under the Arabs," by Major R. D. Osborn, deals with an interesting topic that needed elucidation. "The Ecclesiastical History of Ireland," by W. D. Killen, D. D., treats the subject from a Presbyterian point of view. Mr. Leslie Stephen's "History of English Thought in the Eighteenth Century" is a philosophical review rather than a history of events. It is the fruit of earnest study by one who is himself an advanced thinker. "The English Bible; an External and Critical History of the Various English Translations of the Scriptures," etc., by the late Dr. John Eadie, can hardly be said to add to what has been before published on the subject. It is a convenient compilation of the known facts, with some considerations in favor of the revision of the authorized version.

Several biographical works of historical value have appeared. The "Life of William Earl of

Shelburne," in three volumes, has been completed. "Political and Military Episodes from the Life and Correspondence of the Rt. Hon. John Burgoyne," by E. B. Fonblanque, will enlarge the ideas of those whose only knowledge of the subject is, that he surrendered at Saratoga. The "Memoir of Earl Spencer," better known as Lord Althorp, the leader of the House of Commons by which the Reform Bill of 1832 was passed, is interesting as a biography, and valuable as a memorial of an important political epoch. The "Life of Lord Palmerston," by the Hon. Evelyn Ashley, throws light on a more recent period of political history. "Syria and Egypt under the Last Five Sultans of Turkey" are exhibited in a striking light in the "Experiences during Fifty Years of Mr. Consul-General Barker," by his son.

Of works in Literary and General Biography the most important during the year was the "Life and Letters of Lord Macaulay," by G. O. Trevelyan, which, if a cordial reception by the public can guarantee fame, promises to be a permanent addition to English literature. Of great and varied but painful interest is the "Memoirs of Robert William Haydon." Mr. John Forster's "Life of Swift," of which great expectations were authorized by the first volume, is left a fragment by the lamented death of the author. "William Whewell: an Account of his Writings, with Selections from his Scientific and Literary Correspondence," by I. Todhunter, commemorates a man who held a great place in the public view, and who in point of ability and acquirements was worthy of his position. Other works in this department of writing are: "Life and Opinions of Heinrich Heine," by William Stigand; "Life of Michelangelo," by Charles Heath Wilson; and "Forty Years' Recollections of Life, Literature, and Public Affairs," by Charles Mackey.

TRAVEL AND EXPLORATION.—The number of valuable and entertaining books of travel, exploration, and description, issued during the year, was unusually large. Of Oriental travel, we have "Notes of an Indian Journey," by M. E. Grant Duff, M. P.; "The Indian Alps, and how we crossed them," by "A Lady Pioneer;" "The Karens of the Golden Chersonese," by Lieutenant-Colonel A. R. McMahon; "Our Trip to Burmah, with Notes on that Country," by Surgeon-General Charles Alexander Gordon; "From the Hebrides to the Himalayas," by Miss Constance F. Gordon Cumming; "Mandelay to Momiën: a Narrative of the two Expeditions to Western China in 1868 and 1875," by John Anderson, M. D.; "The Journey of Augustus Raymond Margary, from Shanghai to Bhamo and back to Mayre," with a biographical preface and concluding chapter by Sir Rutherford Alcock; "The Roof of the World: a Journey over the High Plateau of Tibet to the Russian Frontier, and the Oxus Sources on Panmir," by Lieutenant-Colonel T. E. Gordon; "A Ride to Khiva: Travels and Adventures in Central Asia," by Frederick

Burnaby; "The Shores of Lake Aral," by Major Herbert Wood, R. E.; "Clouds in the East: Travels and Adventures on the Perso-Turkoman Frontier," by Valentine Baker; and "The Crimea and Transcaucasia," by J. Buchan Telfer, R. N. Of Oceanic explorations we notice "Pearls of the Pacific," by J. W. Boddam-Whethan; "The South Pacific," by Rev. W. Wyatt Gill; "Discoveries and Surveys in New Guinea and the D'Entrecasteaux Islands," by Captain J. Moseby; and "Yachting in the Arctic Seas," by James Lamont. Coming nearer home: "Rambles and Studies in Greece," by J. P. Mahaffy; "Historical and Architectural Sketches, chiefly Italian," by E. A. Freeman; "The Balearic Islands," by Charles T. Bidwell; "Holidays in the Tyrol," by Walter White; "The Great Divide: Travels on the Upper Yellowstone," by the Earl of Dunraven; "German Home Life;" "Dutch Guiana," by W. G. Palgrave; and among circumnavigators, "Over the Sea and Far Away: Narrative of Wanderings round the World," by T. W. Hinchliff, President of the Alpine Club, are noticeable.

In Science and Philosophy, the most striking work that has appeared is Mr. A. R. Wallace's "Geographical Distribution of Animals;" an "Introduction to Animal Morphology," by Alexander Macalister; Lord Amberly's "Analysis of Religious Belief," a work of personal interest rather than of philosophical value; two other posthumous books: "Fragments on Ethical Subjects," by the late George Grote; "Thoughts on Art, Philosophy, and Religion, from the Unpublished Papers of Sydney Dobell;" Darwin's "Movements and Habits of Climbing Plants;" Prof. E. R. Lancaster's "History of Creation;" not to mention the numerous compilations intended to popularize science. Of original works in theological science the number is small. Dr. F. J. A. Hort's "Two Dissertations: 1. On ΜΟΝΟΓΕΝΗΣ ΓΕΩΣ in Scripture and Tradition. 2. On the Constantinopolitan Creed and other Eastern Creeds;" an essay in reply to "Supernatural Religion," entitled "The Gospels in the Second Century," by W. Sanday; a piece of recondite Biblical investigation, "The Missing Fragment of the Latin Translation of the Fourth Book of Esdras," by R. L. Bensley; Principal Tulloch on "The Christian Doctrine of Sin;" the Bampton Lectures of Bishop Alexander, on "The Witness of the Psalms to Christ and Christianity;" and the remarkable "University Sermons of Rev. J. B. Mozley, D. D., are among the chief.

MISCELLANEOUS.—Of classical essays, Mr. Gladstone's "Homeric Synchronism," and

Prof. Jebb's "Attic Orators," deserve particular notice; as well as Mr. Leslie Stephen's second series of "Hours in a Library;" Mr. J. Ormsby's "Stray Papers," and Mr. Alexander Schmidt's "Shakespeare Lexicon; a Complete Dictionary of all the English Words, Phrases, and Constructions, in the Works of the Poet." A revised edition of "Chambers's Encyclopædia" has been published; and the ninth edition of the "Encyclopædia Britannica" is in process of publication.

LOCOMOTIVE, COMPRESSED-AIR. In boring a tunnel of any considerable length, removal of the rubbish has hitherto been found one of the most difficult parts of the work. The use of steam is out of the question, as it prevents effectual ventilation; while the employment of horses or mules to draw the trucks on which the *débris* is piled is attended with great expense, and the need of an extra supply of fresh air in the gallery. In the excavation of St. Gothard Tunnel, now going on, machines moved by compressed air have been recently introduced for dragging the trucks, and have proved a marked success. It is well known that compressed air is used to work the perforating machines for boring the tunnel; then, by the employment of compressed-air locomotives, ventilation of the galleries is secured, as these machines allow only pure air to escape; such motors are also more powerful than horses, and effect more rapidly the clearing away of the *débris*.

The first attempt to use compressed air for this purpose was made with two ordinary locomotives, one at each side of the tunnel; the boilers, in which, of course, there was no water, being filled with condensed air under a pressure of four atmospheres. This air played the part usually done by steam, passed into slide-valves, entered the cylinders alternately on each face of the pistons, which it set in motion, and then escaped into the atmosphere.

FIG. 1.

It is easily seen that, if compressed air were to be employed, it would be indispensable to have a very considerable quantity of it; the boiler of a locomotive, sufficient when it is worked by means of steam constantly produced under the action of heat, was too small to contain the quantity of air required for use without

being frequently filled. This led to adding to each locomotive a special reservoir for compressed air, which, mounted on trucks of its own, became a kind of tender, the air in the reservoir being conveyed by a tube to the distributing apparatus of the cylinders. The locomotive then worked as before, except that compressed air came from the reservoir instead of

from the boiler. Two locomotives were thus worked economically for about two years, in spite of the awkwardness of the long reservoirs that accompanied them. At departure the pressure in the reservoir was about seven kilogrammes per square centimetre; the locomotive having drawn a train of twelve loaded wagons along a course of about 600 metres,

FIG. 2.—COMPRESSED-AIR LOCOMOTIVE USED AT THE ST. GOTTHARD TUNNEL WORKS.

the pressure was found to fall to four and a half kilogrammes; the train then returned empty to the point of departure, the final pressure being two and a half kilogrammes. But by this arrangement it was found to be impossible to suitably regulate the pressure of the air between the reservoir and the distribut-

ing apparatus: to get over this difficulty M. Ribourt, the engineer of the tunnel, devised an arrangement which allows the compressed air to flow at a fixed pressure, whatever the pressure in the reservoir. The air in escaping from the reservoir enters a cylinder *B* (Fig. 1), over a certain extent of the walls of which

are openings $m m$, that communicate with another cylinder C , which surrounds it to the same extent, and which is connected with the slide-valve by which the air is distributed, or, more generally, with the space in which this air is to be utilized. On one side moves a piston E , which shuts the cylinder and hinders the escape of the air. This piston carries externally a shaft F , which supports externally a spiral spring H , the force of which is regulated by means of a screw. Internally it is connected by another shaft L with a second piston N , which bears a cylinder M , movable in the interior of the principal pump, and forming thus a sort of internal sheath. This sheath presents openings $n n$, which may coincide exactly with those already referred to, and in that case the air passes without difficulty from the reservoir at the point where it is to be employed. But if the sheath is displaced, the openings no longer correspond, there is resistance to the passage, and consequently diminution of the quantity of air which flows out, and hence lowering of pressure in the exterior cylinder. By making the position of the sheath to vary continuously we may make the pressure of exit constant, notwithstanding the continuous variation at entry. But the apparatus is automatic. In fact, the part of the cylinder B' comprised between the bottom and the piston N communicates by openings pp (which are never covered with the escape-tube of the gas), in such a manner that upon its posterior face the piston N receives the pressure of the air at the moment when it flows, a pressure which it is sought to render constant. The piston E receives on its anterior face the action of the spring which can be regulated at pleasure. As to the other faces of the two pistons, they are subjected to equal actions proceeding from the pressure of the air at its entry, actions which thus counteract each other; so that the forces which determine the position of the movable system are, on the one hand, the tension of the spring, a constant and determined force, and, on the other hand, the pressure of the flowing air; and thus equilibrium cannot occur unless the two forces are equal. If the air should flow in too great a quantity, the pressure increases on the posterior face of the piston N , the spring is overcome, and the movable system advances a little toward the left; but then the orifices are partly covered and the flow diminishes. If the pressure then becomes too weak at the exit, the spring in its turn prevails, pushes the sheath toward the right, uncovers the orifices, and consequently a greater quantity of air may enter.

The machines which are now used at the St. Gotthard Tunnel, genuine compressed-air locomotives, are furnished with M. Ribourt's apparatus. They consist of the following parts: A sheet-iron reservoir to contain the compressed air is mounted on a framework quite like that of steam-locomotives (Fig. 2), and

carrying glasses, cylinders, distributing apparatus, etc. The tube for receiving the air carries, within reach of the driver, the automatic valve of M. Ribourt. The screw being easily regulated, the air can with certainty be made to issue from the apparatus at a determined pressure. This air then passes into a small reservoir (about one-third metre cube), intended to deaden the shocks, which are always produced when the machine is set going or stopped. Lastly, this small reservoir communicates with the cylinders, and the air which reaches them acts in the same manner as steam in ordinary locomotives.

LONSDALE, HENRY LOWTHER, Earl of, born March 27, 1818; died August 15, 1876. He was educated at Westminster School and Trinity College, Cambridge, at which university he graduated M. A. in 1835. In 1841 he entered the army as cornet in the First Life-Guards, and retired from the service in 1854. He was Lord-Lieutenant and Custos Rotulorum of Cumberland and Westmoreland, and represented West Cumberland in the House of Commons from 1847 till his accession to the peerage in 1872. Lord Lonsdale was a keen sportsman, keeping a select racing-stud, like his predecessor, and for several years was master of the Cottesmore hounds. He was succeeded by his oldest son, St. George Henry, Viscount Lowther, born October 4, 1855.

LORQUET, LOUIS MICHAEL POLEMON, a Haytian general, born December 5, 1825; died in April, 1876, in defense of the government of President Domingue. His father was a colonel in the army. After leaving school, Lorquet entered the ranks of the regiment, and soon after became secretary to General Inginac. After the Revolution of 1843, when President Boyer fled to Jamaica, young Lorquet attended him, and remained with him till 1845, when he returned to Hayti. He was appointed chief-clerk in the custom-house, but was removed by General Soulouque, and went to reside at Gonaives. In 1849, when Soulouque was proclaimed Emperor, under the title of Faustin I., through the influence of the Duke de Saint-Louis du Sud, Lorquet was appointed judge at Gonaives. On March 28, 1854, he was commissioned public prosecutor for Gonaives. In December, 1858, when the imperial throne was shaken, and Jeffrard became President, he appointed Lorquet Chief-Justice, Minister of Instruction, and temporary commander of the republican forces. On the 11th of November, 1865, he was made General of the Army, and in 1866 was aide-de-camp of Salnave. Lorquet returned to Hayti from exile in Jamaica on the 8th of May, 1868, and took part in the Salnave revolution. On the 13th of May, 1871, he was appointed military commander of the capital city of Port-au-Prince, by President Nissage Saget, which position he filled for several years. He was decorated with the Spanish Order of Isabel la Católica.

LOUGH, JOHN GRAHAM, a British sculptor, born about 1805; died April 9, 1876. In early life he was a ploughboy in Northumberland, where accidentally his artistic taste became known to a neighboring gentleman, who assisted him to obtain a suitable education. He came up to London, made the Elgin Marbles in the British Museum his study, and became an exhibitor at the Royal Academy in 1826. In the following year he produced a statue of Milo, which, together with a companion-statue, "Samson," was purchased by the Duke of Wellington. He afterward spent four years in Rome. In 1845 he executed the statue of Prince Albert, for Lloyd's. He was also commissioned in the first instance to execute the lions for the Nelson Monument in Trafalgar Square.

LOUISIANA. The regular session of the Louisiana Legislature began on the 8d of January, and came to a close on the 2d of March. Lieutenant-Governor Antoine presided in the Senate, and Mr. Estilette was Speaker of the House. On the 11th of January a motion was made, in the House, to proceed to the election of a United States Senator. A protest was made by several Republican members, on the ground that P. B. S. Pinchback had been duly elected in 1878, and no vacancy existed. A vote was, nevertheless, taken, most of the Republicans refusing to take part in the election, and J. B. Eustis received 61 votes out of the 63 cast. He was subsequently chosen Senator in joint convention of the two Houses, and a petition was sent to the Senate of the United States by three Republican members of the Legislature, praying that Mr. Eustis be admitted to a seat in that body, and setting forth their reasons for participating in the election. Chief among these was that the seat had been virtually refused to Mr. Pinchback, and a vacancy existed, which it was for the interest of the State to have filled.

The legislation of the session was not so important for what was done as for what was attempted by the House and defeated by the Senate. Several important measures looking to a reduction of expenses and a reform of abuses originated in the lower branch and failed to pass the upper. The most important subject discussed was the regulation of elections. A strong effort was made in the House to replace the old election law with a new one. A bill for the purpose was reported, with the following descriptive title:

An act to provide for the time, manner, and place of holding elections in this State; to provide for the appointment of commissioners of election, and directing the mode of counting and of compiling the votes, and making the returns of the election, and directing the promulgating of the results of elections; to provide penalties for intimidation and violence at the polls, and other attempts to prevent a fair, free, and peaceable election; to provide proceedings for contest for office, and to repeal all other laws inconsistent with this act.

It was very stringent in its provisions, but

proposed to do away with the Returning Board contrivance, and impose upon the Secretary of State the duty of consolidating the returns received from the clerks of the district courts and make an official report of the vote to the Governor, who should proclaim the result. This act passed the House, and a counter-movement was made in the Senate, through another election bill, making some changes in the law, but retaining the Returning Board feature, three of the members of the Board to be elected by the Senate and two by the House of Representatives. Neither House would agree to the bill passed by the other, and a conference committee failed to devise any measure acceptable to both, so that no change was made in the existing law.

STATE SEAL OF LOUISIANA.

Among the acts passed during the session was one apportioning the representation in the Legislature among the various districts of the State, and one submitting several amendments to the constitution. The first amendment limits the expenses of the General Assembly to \$175,000 per year, and fixes the salary of the members of the Legislature at \$5 a day, and their mileage at twenty cents a mile; the second provides that all bills must be signed by the Governor five days after their reception by him during the session, or become laws; and that all bills not signed by him twenty days after the session shall become laws; the third abolishes the parish judges, and confers their jurisdiction on the district judges; the fourth reduces the salary of the Governor from \$8,000 to \$6,000 a year; the fifth prohibits the taking of any fees by the Auditor of State, State Treasurer, Attorney-General of the State, or any district attorney.

A joint resolution was adopted asking government aid for the Texas Pacific Railroad.

Judge Jacob Hawkins, of the Superior District Court of the parish of Orleans, was removed from office by an address of the two Houses directing the Governor to make the removal, for incompetency and arbitrary conduct. The committee reporting the address

based their action on twenty-eight allegations, showing unfitness for the position.

A report was made about the middle of February by the House committee appointed at the extra session of 1875, to examine into the accounts of the Auditor and Treasurer. In this it was stated that at different times in 1874 and 1875 sums amounting in the aggregate to \$198,417.31 had been drawn from the interest-fund without warrant. These were mostly advances for police expenses, and were restored to the fund, so that the State suffered no loss. The committee declared that Antoine Dubuclet, the Treasurer, was less guilty in the violations of law that had been committed than "William Pitt Kellogg, the originator of the whole scheme—than Jacob Hawkins, the Judge of the Superior District Court of Orleans, who used his influence to encourage the nefarious deed—than Henry C. Dibble, the then acting Attorney-General, who advised the unlawful act, when he should have guarded the interests of the State—less guilty than J. H. Oglesby, the Fiscal Agent of the Metropolitan Board of Police, and president of the bank, the depository of the State funds, who lent his official aid to a diversion of funds, of which he was the keeper under the law, and, as it will appear, received a pecuniary compensation of \$6,696.67, for interest and commission on a loan made out of State funds by the State Treasurer." The report closed with a recommendation that Governor Kellogg and Treasurer Dubuclet be impeached, that Assistant Attorney-General H. C. Dibble be "addressed out of office," and that criminal proceedings be instituted against Alfred Shaw and J. H. Oglesby.

On the 25th of February a resolution was adopted in the House, providing for the appointment of a committee of seven, "to examine and ascertain charges against W. P. Kellogg, and, if there are any, to so report, with a view to impeachment." The committee was immediately appointed. A majority reported on the 27th that Governor Kellogg had been "guilty of many and divers high crimes and misdemeanors in office against the laws, the constitution, and the people of the State of Louisiana," subsequent to the 14th of April, 1875, at which time it had been agreed by the "Wheeler compromise" that he should not be disturbed for any previous official misconduct. The principal offense charged was procuring a withdrawal from the Treasury of money set apart for the payment of interest, and using it for other purposes. The report concluded with a resolution impeaching William P. Kellogg, "acting Governor of the State of Louisiana," for high crimes and misdemeanors, and directing the appointment of a committee of five to prepare articles of impeachment. A minority of the committee of seven, consisting of two members, submitted a report protesting against the action of the majority in reporting resolutions of impeachment, without examining

into the charges or taking any evidence, or even allowing the Governor to appear in person or by counsel before the committee. The majority report was adopted on the 28th by a vote of 61 to 45, and a committee was at once appointed to prepare articles of impeachment, and to notify the Senate of the proceedings. Notice was given to the Senate the same evening, and that body immediately resolved itself into a High Court of Impeachment, Chief-Justice Ludeling presiding. A resolution was adopted, by a vote of 28 to 9, notifying the House that the Senate was ready to proceed with the trial, and would allow until 7 p. m., it being then after six, for the preparation and presentation of charges. None being made before that hour, an order was adopted, by a vote of 25 to 9, dismissing the impeachment, and declaring that such action amounted to an acquittal. The reasons given were: "Because the committee appointed to investigate Governor Kellogg refused to give him the right of appearing at their deliberations; that they furnished no list of witnesses; that the impeachment was prompted by revolutionary and partisan purposes; that it was in violation of the Wheeler compromise; that it is known to the Senate that Governor Kellogg's official acts were not unlawful; that the House had adjourned before a notification could be given that the Senate was ready to proceed to trial, and that such adjournment was for the purpose of obstructing the trial, and preventing the Senate from proceeding with it; and, finally, that the impeachment articles contained no specific charges."

The following protest was made by several Senators, but the Senate, by a vote of 21 to 13, refused to allow it to be read or entered upon the minutes:

That not an hour was given to the House of Representatives to prepare specified articles of impeachment. That the managers of the House of Representatives were not recognized by the court. That every motion to close the doors and deliberate upon the important questions submitted was voted down. That the order of acquittal has been declared without giving the prosecution an opportunity to be heard, without any evidence adduced, without any deliberation or discussion, and is calculated to encourage the commission of high crimes and misdemeanors by public officials, and by this unauthorized impunity from trial offers a premium to public offenders.

The Chief-Justice then formally declared Kellogg acquitted, and the court adjourned *sine die*. Notwithstanding this action, the committee of the House prepared fourteen articles of impeachment, and submitted them on the 1st of March, when they were adopted by the House. On the 2d of March, the last day of the session, the committee made a report, reciting the facts and circumstances of the case, and submitting the following resolutions, which, with the report itself, were adopted by a vote of 54 to 37:

Resolved by the House of Representatives, That the Senate, by its partisan and arbitrary conduct, has

deprived the people of the State of an opportunity of bringing to trial the Chief Magistrate of the State, charged with high crimes and misdemeanors, and with criminal neglect and violation of his official duty.

Resolved, That the members of the Senate, having formed and expressed their opinion that the said accused is entirely innocent, are disqualified from now sitting in judgment on the trial of the impeachment, and that this House can proceed no further in the premises, and are powerless to resent this flagrant outrage upon right, justice, and decency, and can only refer the matter to the people of the State for their consideration.

The same day Governor Kellogg sent a message to the House, replying to the several charges contained in the fourteen articles of impeachment, and concluding as follows:

In these fourteen frivolous accusations are concentrated all charges of wrong-doing which a majority of the House of Representatives, actuated by the strongest feelings of partisan enmity, have been able to concoct against me after fifty-nine days' session, innumerable investigations, and the utmost scrutiny

of the records of the State, even by going behind the barrier of the Wheeler adjustment.

Only one other accusation has been made against me, namely, that in a time of revolution, of great public exigency, I sanctioned a temporary diversion of the State funds, which could not and did not result in the loss of a dollar to the State, and took this course solely in the public interest, and to protect the property of the city.

If the Senate had not already acquitted me of high crimes and misdemeanors, the accusations passed at this late hour would have formed in themselves a complete assertion of my official rectitude. Added to this, I refer to the notoriously and often-repeated propositions made by Democratic members of the Legislature, and others authorized to speak for them, that if I would secure the passage by the Senate of the House election bill, and certain other laws to further the partisan ends of my accusers, no effort would be made to impeach me.

I submit that these facts of themselves fully justify me in asserting that my accusers did not and do not believe me to have been guilty of high crimes and misdemeanors against the State.

The delegates of the Democratic party of

NEW ORLEANS.

the State to the National Convention at St. Louis were appointed at the convention held in New Orleans, on the 5th of January. (For the platform and other proceedings, see ANNUAL CYCLOPEDIA, 1875.) The State Central Committee, which was chosen at the same time, had a meeting on the 10th of February, and issued an address to the people. The following extract illustrates the spirit with which the canvass was opened:

The time for decisive action has arrived. The issues are few in number, and simple in their character. The course is plain and straightforward. There must be an honest government in Louisiana—a State the fairest among all her sisters—or Louisiana, burdened with debt, exhausted by taxation, and suffering from the supremacy of ignorance over intelligence, will become a colony for convicts and the home of depravity. The people, for whom this committee speaks, are resolved, in this centennial of their liberties, to test the relative strength of intelligence and ignorance. They will use no violence,

but all the means in their power will be employed to defeat the further rule of the vicious and ignorant in this State. Happily, the people are united in advocating these demands, and this committee, as their organ, promises an earnest canvass to secure their rights. What remains to be done, is the perfection of the Democratic Conservative organization in all parishes of the State where action has not been taken.

The following resolution was also adopted by the committee:

Whereas, It is apparent that the radical party in the State of Louisiana, despairing of success by fair means, have resolved to pursue the same policy by which in the past they have been enabled, against the wishes and voice of a majority of the people, to secure possession of the government of the State, and by the aid of Federal bayonets to retain the possession thus fraudulently and violently obtained; and—

Whereas, It is evident that they have determined at every cost to perpetuate the Returning Board, which has heretofore done so much to render futile

our victories at the ballot-box, and to destroy the liberties of the people: therefore, be it

Resolved, That the Central Executive Committee of the Democratic Conservative party of the State of Louisiana earnestly urges upon the Democratic and Conservative members of the Legislature to exhaust every means in their power to prevent such an outrage upon the people of the State as the passage of an election bill containing any provision establishing a Returning Board with unlimited power, or with any power which will enable them to defeat the will of the people as expressed at the ballot-box.

The Republican Convention for the nomination of delegates to the National Convention at Cincinnati was held at New Orleans on the 30th and 31st of May. W. P. Kellogg, P. B. S. Pinchback, S. B. Packard, and W. G. Brown, were the delegates at large. The platform, after alluding to the achievements of the Republican party, and pledging coöperation in support of its principles, submitted the following measures of national policy:

1. The nomination of a candidate for the presidency whose personal character will afford a guarantee of an honest, able, economical, and effective administration of the national Government upon Republican principles.

2. A system of Federal finance which will insure the collection of the revenues, punish all official or other frauds upon the Treasury, and bring about a steady, speedy, and permanent return to the payment of specie into and out of the Treasury in all Federal transactions.

3. A system of revenue, taxation, and assessment which, while it shall provide ample means to meet the public expenditures and obligations, shall assume the protection of certain national interests against the destructive competition of foreign productions, especially insisting that the capital and labor employed in the production of the national staples of sugar and rice should be included among any articles entitled to such protection.

4. The just apportionment of Federal appropriations for national works of internal improvement. Taking into account the immense advances received by our more fortunate sister States during the period when Democratic domination denied to the Southern States their just share of the common fund, such a measure of equalization would justify national aid to a Southwestern Pacific Railroad and branches, to the protection by levees of the capital and labor employed in the culture of cotton, sugar, and rice, and to the effectual navigation of the Mississippi River, its principal tributaries, and its outlet.

Resolutions were also adopted declaring that the delegates to the National Convention should be left untrammelled in their action, expressing approval of the Administration of President Grant, and declaring the Hon. O. P. Morton was "entitled to the warm gratitude of the Republicans of all the Southern States, and especially of Louisiana." Opposition was declared to the Hawaiian treaty, and the following was also among the resolutions adopted:

Resolved, That the assassination of many hundreds of prominent Union men in the South on account of their political principles, the massacre of thousands of inoffensive colored citizens, the relegation of nearly all the Southern States to the control of the disloyal elements whose treason brought about the war, and the election of a national Congress largely composed of ex-leaders of the Confederate army, indicate grave national dangers, which demand the

enactment of such additional laws, and the enforcement of such a policy, as shall secure to every citizen of the United States, in fact as well as in name, the inalienable rights of life, liberty, and the pursuit of happiness, irrespective of his political views, and irrespective of race, color, or previous condition of servitude.

The Republican Convention for the nomination of candidates for State offices began at New Orleans on Tuesday, June 27th. There were two prominent factions, and a permanent organization was not effected until the following Saturday, when P. B. S. Pinchback was chosen president. On the same day a platform was adopted, consisting of the following statements, and a reaffirmation of the principles declared at the previous convention:

1. The Republican party of Louisiana, in convention assembled, reaffirm the tenets and principles of the national Republican party as declared from time to time, and especially as enunciated in the platform adopted at the National Convention held at Cincinnati, June 14, 1876. We particularly commend and indorse the declaration that the United States of America is a nation and not a league, and that upon the nation devolves the duty of protecting the citizens of the United States in all their rights, at home and abroad; thus maintaining fully the Constitution of the United States and the amendments thereto.

2. We hail the nomination of Governor Rutherford B. Hayes with pleasure and pride, believing that in his elevation to the presidency the country will secure an Administration which will maintain the rights of all classes of citizens of the republic, and which will administer the government economically and execute the laws faithfully. We are not less gratified at the nomination for Vice-President of William A. Wheeler, whose reputation as a Republican and character as a statesman are national. In our ticket we see a guarantee of success. We indorse and ratify it.

3. The Republican party of Louisiana are in full accord with the national Republican party upon all financial questions as declared in the Cincinnati platform; and we believe that during the Administration of President Hayes a resumption of specie payment can be effected through a return to general commercial and productive prosperity throughout the Union.

Two more days were occupied in making nominations and agreeing upon a State Central Committee. The ticket for State officers finally accepted was: For Governor, S. B. Packard; for Lieutenant-Governor, C. C. Antoine; for Secretary of State, Emile Honoré; for Auditor, George B. Johnson; for Attorney-General, W. H. Hunt; for Superintendent of Education, W. G. Brown. The candidates for presidential electors were: J. H. Burch, William P. Kellogg, at large; and L. A. Sheldon, Peter Joseph, Morris Marks, A. B. Levissée, O. H. Brewster, and Oscar Joffron, from the districts. P. B. S. Pinchback was made chairman of the State Central Committee.

The Democratic nominating convention was held at Baton Rouge, beginning on the 24th of July, and continuing four days. The report of the Committee on Credentials was not made until the third day, and then organization was promptly effected, and the following platform adopted:

We, the representatives of the Democratic Conservative party of the State of Louisiana, in convention assembled, do hereby declare administrative and political reform to be the paramount issue in the coming general election, and we earnestly appeal to our fellow-citizens, of every former political association of white and colored, to zealously cooperate with us in our pronounced effort to effect such reform.

We arraign the radical party of Louisiana for marked and frequent violations of the letter and spirit of the Constitution; for the assumption of illicit powers for the benefit of party, and to the great injury and almost total ruin of the State; for fomenting dissensions between the races and deliberately exciting strife and turmoil, thereby cruelly sacrificing the lives of colored and white citizens, with the intent of procuring unwarranted and unconstitutional interference in our State affairs.

We denounce the usurpative and bad government which Louisiana has suffered for the last four years, a usurpation under which officers elected by the people have been displaced, the government arbitrarily overthrown by Federal power, the Legislature invaded and dispersed by bayonets in time of profound peace; and such violent and unlawful interference adds but another to the long list of crimes for which the Republican party should be held to account in November next.

We hereby proclaim that it is our desire and fixed purpose under any and every provocation to have a fair and peaceable election; but we demand and will insist that there shall be no violence or intimidation exercised toward such of our colored fellow-citizens as may wish to cooperate with us for the redemption of the State from misrule.

We fully recognize the binding effect of the three recent articles of amendment to the Constitution of the United States, and accept the same as a final settlement of the controversies that engendered civil war, and we pledge ourselves to protect every citizen in the exercise of the rights acquired and guaranteed by said amendments, whatever be his race, color, or previous condition.

We hereby pledge our party to the satisfaction of all the legal obligations issued by the State of Louisiana; to the most strenuous efforts in the direction of reform and an economical administration of the government, and especially to the abolition of all unnecessary public officers; to the reduction of the fees and salaries of offices; to the standard of a fair remuneration and the consequent reduction of taxation to the lowest possible limit commensurate with the necessary expenses of the government and the preservation of the public faith, and to the curtailment of the dangerously-large patronage of the chief Executive of the State.

We declare ourselves in favor of the passage of the Texas Pacific Railroad bill, now pending before Congress, and recommend our members of Congress to advocate its passage at an early date.

We advocate the fostering of the public schools for the benefit of all the educatable children of the State, and that equal advantage be given to all children, colored as well as white.

We cordially approve of and indorse the platform of the national Democratic party, recently assembled in convention at St. Louis, and feel inspired with the hope of a better government in the future; but the great question of reform is brought before the people of the whole country by a great national party, and we pledge ourselves to use our utmost efforts to secure the success of those great exponents of national reform, Samuel J. Tilden and Thomas A. Hendricks.

On the fourth day the nominations were made, the State ticket being as follows: For Governor, Francis T. Nicholls, of Assumption; for Lieutenant-Governor, Louis A. Wiltz, of

Orleans; for Attorney-General, H. N. Ogden, of Orleans; for Secretary of State, William A. Strong, of Winn; for Auditor, Allen Jumel, of Iberville; for Superintendent of Public Education, Robert M. Lusher, of Orleans. The candidates for electors were: John McEnery and R. C. Wickliffe, at large, and Louis St. Martin, Felix P. Poché, Alcibiade De Blanc, W. A. Seay, R. G. Cobb, and K. A. Cross, from the districts.

The political canvass, though attended with considerable excitement, was generally free from disorder and exhibitions of violence. There had been some political trouble early in the year in the parishes of East Baton Rouge and East Feliciana, but it was of a purely local character, pertaining to alleged misconduct in parish offices. In East Feliciana a mass-meeting was held in January, in which both white and colored citizens took part, and resolutions were adopted declaring that great good had been done in "ridding the parish of malicious, ignorant, and corrupt officers," and pledging support to all "fair-minded, competent officers in the maintenance of peace, law, and good order." The "malicious, ignorant, and corrupt officers" alluded to appear to have been driven out of the parish by organizations called "regulators." In East Baton Rouge, in March, the sheriff, the parish judge, and tax-collector, were called upon to resign, and a petition was addressed to Governor Kellogg asking him to accept their resignations. The proceedings were taken in a public meeting, in which colored citizens took part. Governor Kellogg wrote to the District Attorney, under date of March 28th, calling his attention to combinations of lawless persons to displace the civil authorities of the parish, and requesting him to institute proceedings against those concerned in the "recent unlawful disturbances in the city of Baton Rouge." The District Attorney replied that he knew of no combination of lawless persons; that the action of citizens had been taken in public meeting, and was characterized by calmness and deprecation of violence; and that the officials had been induced to resign peaceably and without the violation of any law.

Early in May two men were shot by a masked assassin at Coushatta, and on the 17th of June there was a riot at Port Hudson, in which shots were fired, but these occurrences appear to have had no political significance. There was a slight outbreak of race antagonism at Monroe, and through the surrounding country, about the last of August. There was a gathering of armed negroes and threats of burning the town, but finally the negroes were induced to disperse, and there was no serious disorder.

Generally throughout the political canvass the Conservatives pursued the policy of endeavoring to prevent any compromise of their claims through violence and disorder, and of securing the cooperation, so far as possible, of colored citizens. Negro voters were in many places

enrolled in the same clubs with Conservative whites, for the purpose, it was alleged, of protecting them from intimidation by colored Republicans. In other cases they formed Conservative clubs of their own. Colored speakers took part in the canvass on the Democratic side, and the antagonism to the existing State government seemed to extend among all classes. An address to the colored citizens of the State from one of their own number, named Joseph A. Craig, dated September 14th, urged them, in the interest of peace and good government, and for the sake of their own welfare, to vote for the Democratic candidates. In reply to a letter from a colored Conservative club of New Orleans, Mr. Nicholls, Democratic candidate for Governor, under date of September 20th, said:

You may rest fully and thoroughly assured that your faith and belief are well founded when you say you are satisfied that the ticket nominated at Baton Rouge "gives to the colored people throughout the State the assurance that if elected their rights will be amply protected and a new era enacted in the State administration."

My remarks at Baton Rouge, made to the convention which nominated me, were not only the expression of my individual convictions, both of right and policy, but the enunciation of the plainest principles of official duty which will have to guide me in the event of my election.

The laws should be general in their operation, and any law attempted to be passed directed against a class or race of the community would meet my most determined opposition. No such attempt, however, will be made; for, independently of the constitutional barriers which would stand in the way, the Democratic and Conservative sentiment of the whole State is united against such action.

To disregard and go back upon the pledges which I have given on this subject would be to disgrace me before the country; I shall certainly not place myself in such a position.

The national canvass was made entirely subordinate to that of the State, and occupied little attention. Before the election in November, there appeared scarcely any indication of political disturbance. There were some arrests in the parishes of Orleans and West Feliciana for alleged attempts at intimidation of colored voters and for false registration, but no outbreaks of violence preceded, attended, or followed them. The election itself passed off with a peace and quiet altogether unusual in the State.

It was some days before there was any definite knowledge as to the result of the election, the process of making the returns being very slow; but it very soon appeared that a majority of the votes actually cast were for the Democratic candidates. Nevertheless, on the 11th of November, Governor Kellogg sent a very confident dispatch to the North claiming that there was no doubt of a Republican victory. He declared that the parishes of East and West Feliciana, East Baton Rouge, Morehouse, and Ouachita, had been "overrun and intimidated by armed bands of the White League before and on the day of the election." He said that these parishes were strongly Re-

publican, and that the vote claimed there by the Democrats was "procured by intimidation, violence, and assassination, and the proof of this is overwhelming and perfectly conclusive." The vote, he thought, would be close, "counting the vote in the five bulldozed parishes as the Democrats claim it; not counting these parishes, while the Republicans will be deprived of a legitimate majority of nearly 4,000, in no contingency can the Democrats have carried the State." Many letters were made public, written by colored men in different localities, denying charges of violence and intimidation, while other statements were made alleging that many were prevented from voting as they wished.

There was from the first apprehension on both sides that there would not be a fair count of the votes, and a declaration of the result in accordance with the actual will of the people. President Grant on the 10th of November had General Augur instructed to be vigilant with the forces at his command "to preserve peace and good order, and to see that the proper and legal Board of Canvassers are unmolested in the performance of their duties. Should there be any grounds of suspicion of fraudulent count on either side," he added, "it should be reported and denounced at once. No man worthy of the office of President should be willing to hold it if counted in or placed there by fraud. Either party can afford to be disappointed in the result. The country cannot afford to have the result tainted by the suspicion of illegal or false returns." He also requested several gentlemen prominently connected with the Republican party to proceed to New Orleans to witness the canvass of the vote by the Returning Board. These gentlemen were John Sherman, of Ohio; E. W. Stoughton, of New York; J. H. Van Alen, of New York; Eugene Hale, of Maine; J. A. Garfield, of Ohio; Cortlandt Parker, of New Jersey; Wm. D. Kelley, of Pennsylvania; Sidney Clark, of Kansas; and J. C. Wilson, of Kansas. Several others were associated with them in New Orleans, where they arrived on the 12th, among whom were Stanley Matthews, of Ohio; John A. Kasson, of Iowa; William Cumbback, of Indiana; Edward F. Noyes, of Ohio; Lew Wallace, of Indiana, and several more. At the request of the chairman of the National Democratic Committee, several gentlemen also went out to New Orleans in the interest of the Democratic party. They arrived there on the 13th, and included John M. Palmer, Lyman Trumbull, and William R. Morrison, of Illinois; Samuel J. Randall, A. G. Curtin, and William Bigler, of Pennsylvania; J. E. McDonald and George W. Julian, of Indiana; Henry Watterson and J. W. Stevenson, of Kentucky; Oswald Ottendorfer, of New York; J. B. Stallo, of Ohio; Lewis F. Bogy and J. B. Brodhead, of Missouri; John Lee Carroll, of Maryland, and others. This committee of Democrats, on the 14th of No-

member, addressed a formal request to the visiting Republicans, that "in view of the unhappy controversies which have heretofore arisen from the action of the Returning Board of the State where its action could not in any count change the result of a presidential election, and in view of the desire of all good men that effect should be given to the will of the majority as lawfully expressed, they would meet and confer with them [the Democrats] personally or through committees, as may be deemed most wise, in order that such influence as we possess may be exerted in behalf of such a canvass of the votes actually cast as by its fairness and impartiality shall command the respect and acquiescence of the American people of all parties."

A reply of considerable length was made on the 16th, in which the Republicans heartily concurred in the "earnest desire for a perfectly honest and just declaration of the results of the recent election;" but stated that they knew of no reason to doubt that such a declaration would be made, and did not see the "propriety or utility of a conference." They were there as private citizens, with no power to modify the laws of the State or control its officers, and were unwilling to interfere. They quoted the law of the State as to the powers of the Returning Board, and argued that it was not desirable to interfere with the judicial functions of that body, or to reduce their action to a mere clerical count of the votes as cast. To this reply the Democrats made a rejoinder, expressing their regret that their efforts at a conference were not met in the spirit in which they were made, disclaiming any desire to interfere with the legal performance of the duties of the Returning Board, and declaring that their only wish was that the joint influence of the visiting committees might be used to secure a perfectly fair count.

The law provided that the returning officers "for all elections in the State" should consist of five persons, "to be elected by the Senate from all political parties." Their powers were defined in the following section of the act of 1874:

SECTION 3. That in such canvass and compilation the returning officers shall observe the following order: They shall compile first the statements from all polls or voting-places at which there shall have been a fair, free, and peaceable registration and election. Whenever, from any poll or voting-place, there shall be received the statement of any Supervisor of Registration or Commissioner of Election, in form as required by section 26 of this act, on affidavit of three or more citizens, of any riot, tumult, acts of violence, intimidation, armed disturbance, bribery, or corrupt influences which prevented or tended to prevent a fair, free, and peaceable vote of all qualified electors entitled to vote at such poll or voting-place, such returning officers shall not canvass, count, or compile the statements of votes from such poll or voting-place until the statements from all other polls or voting-places shall have been canvassed and compiled. The returning officers shall then proceed to investigate the statements of riot, tumult, acts of violence, intimidation, armed

disturbance, bribery, or corrupt influences at any such poll or voting-place; and if, from the evidence of such statement, they shall be convinced that such riot, tumult, acts of violence, intimidation, armed disturbance, bribery, or corrupt influences did not materially interfere with the purity and freedom of the election at such poll or voting-place, or did not prevent a sufficient number of qualified voters thereat from registering or voting to materially change the result of the election, then, and not otherwise, said returning officers shall canvass and compile the vote of such polling-place with those previously canvassed and compiled; but, if the said returning officers shall not be fully satisfied thereof, it shall be their duty to examine further testimony in regard thereto, and to this end they shall have power to send for persons and papers. If after such examination the said returning officers shall be convinced that said riot, tumult, acts of violence, intimidation, armed disturbance, bribery, or corrupt influences did materially interfere with the purity and freedom of the election at such poll or voting-place, or did prevent a sufficient number of the qualified electors thereat from registering and voting to materially change the result of the election, then the said returning officers shall not canvass or compile the statement of the votes of such poll or voting-place, but shall exclude it from their returns: *Provided*, That any person interested in said election, by reason of being a candidate for office, shall be allowed a hearing before said returning officers upon making application within the time allowed for the forwarding of the returns of said election.

Section 26, referred to, is as follows:

SEC. 26. That in any parish, precinct, ward, city, or town, in which during the time of registration or revision of registration, or on any day of election, there shall be any riot, tumult, acts of violence, intimidation and disturbance, bribery or corrupt influences at any place within said parish, or at or near any poll or voting-place, or place of registration, or revision of registration, which riot, tumult, acts of violence, intimidation and disturbance, bribery or corrupt influences, shall prevent, or tend to prevent, a fair, free, peaceable, and full vote of all the qualified electors of said parish, precinct, ward, city, or town, it shall be the duty of the Commissioners of Election, if such riot, tumult, acts of violence, intimidation and disturbance, bribery, or corrupt influences occur on the day of election, or of the supervision of registration of the parish, if they occur during the time of registration or revision of registration, to make in duplicate, and under oath, a clear and full statement of all the facts relating thereto, and of the effect produced by such riot, tumult, acts of violence, intimidation and disturbance, bribery or corrupt influences in preventing a fair, free, and peaceable and full registration or election, and of the number of qualified electors deterred by such riots, tumult, acts of violence, intimidation and disturbance, bribery or corrupt influences from registering or voting, which statement shall also be corroborated under oath by three respectable citizens, qualified electors of the parish. When such statement is made by a Commissioner of Election or a Supervisor of Registration, he shall forward it in duplicate to the Supervisor of Registration of the parish (if in the city of New Orleans to the Secretary of State), one copy of which, if made to the Supervisor of Registration, shall be forwarded by him to the returning officers provided for by section 2 of this act, when he makes the returns of election in his parish. His copy of said statement shall be so annexed to his returns of elections by paste, wax, or some adhesive substance, that the same can be kept together, and the other copy the Supervisor of Registration shall deliver to the Clerk of the Court of his parish for the use of the District Attorney.

The Returning Board, which was chosen in 1873, consisted of J. Madison Wells, United States Naval Officer at the port of New Orleans; T. C. Anderson, who had been a candidate for the State Senate in the canvass; L. M. Kenner, and G. Casanave, colored; and Oscar Arroyo, who was the only Democratic member. The returning officers were required to meet within ten days after the close of the election and compile the returns, and were authorized to fill any vacancy in their own number. Immediately after the election Mr. Arroyo resigned, and the chairman of the Democratic State Central Committee, on the 10th of November, appealed to Governor Kellogg to cause the Returning Board to be remodeled and so constituted that no one would hesitate to accept its decision as final. He said that the law contemplated a fair representation of the political parties, and claimed that there should be at least two Democratic members, and that one-half the clerks should be Democrats. No answer was given to this communication by the Governor; and on the 16th a copy of it was sent to the returning officers themselves, with resolutions of the Democratic State Central Committee, claiming as a matter of right that the "Democratic Conservative party" be represented in the board by two members and a fair proportion of the clerks. No reply being received, a formal request was made on the following day that Dr. Hugh Kennedy be chosen to fill the vacancy caused by the resignation of Mr. Arroyo. No attention was paid to this; and it was renewed on the 21st, and again on the 22d, without effect.

The four members of the Returning Board had met in New Orleans on the 16th, taken the oath of office, and organized by choosing Mr. Wells chairman. The Republican State Central Committee had designated H. C. War-moth, Alfred Bourges, Henry Demas, A. J. Dumont, M. A. Southworth, and P. B. S. Pinchback, to conduct the case of the Republican candidates; and Colonel F. C. Zacharie, Fergus Fuselier, William R. Whittaker, and others, acted as counsel on behalf of the Democrats, Colonel Zacharie being also chairman of a Democratic Committee on Returns and Elections. The first session of the Returning Board, after organization was effected, was on the 18th. A preamble and resolution were adopted expressing satisfaction that "distinguished gentlemen of national reputation from other States, some at the request of the President of the United States, and some at the request of the National Executive Committee of the Democratic party," were in the city to witness the proceedings of the board, and inviting five from each of the two bodies named to be present at the meetings. The same day a protest and plea were received from the Democratic counsel, objecting that the law under which the board was acting was unconstitutional, because it placed it in the power of a self-perpetuating body to determine the gov-

ernment of the State, and conferred judicial powers outside of the judiciary; that, even if the law were constitutional, the board was not properly constituted, having only four members, and all of one political party; that in any case it had no jurisdiction over the canvass of votes for presidential electors; and, finally, that two of the Republican candidates for electors were ineligible. On the 20th the rules of the board were adopted. By these it was provided that the returns, regarding which there was no contest, should be canvassed first; that in the contested cases all motions and arguments should be in writing; and that the board might go into secret session in considering motions, arguments, and propositions. The rules relating to evidence were as follows:

8. When any candidate, or his attorney, or other person authorized to do so, shall present a witness before the returning officers, he shall present interrogatories to be propounded to such witness, which he shall have previously submitted to his opponent, to be crossed at least twenty-four hours, unless such time be named or the cross-interrogatories put before the expiration of that time. In the examination of witnesses the returning officers may interrogate witness beyond the interrogatories when they think it necessary, but neither the candidates nor their attorneys shall examine the witnesses before the returning officers except as above provided.

9. No *ex-parte* affidavits or statements shall be received in evidence except as a basis to show that such fraud, intimidation, or other illegal practice, had at some poll, requires investigation; but the returns and affidavits authorized by law made by officers of election, or in verification of statements as required by law, shall be received in evidence as *prima facie*.

10. That the evidence for each contested poll in any parish, when concluded, shall be laid aside until all the evidence is in from all the contested polls in the several parishes where there may be contests, and after the evidence is all in the returning officers will decide the several contests in secret session; the parties or their attorneys to be allowed to submit briefs or written arguments up to the time fixed for the returning officers going into secret session, after which no additional argument to be received unless by special consent.

An amendment proposed by one of the counsel, that all proceedings be in open session, was rejected. The protest of Democratic counsel already mentioned was then overruled, the following conclusions being announced:

To the first objection, that the act creating the board has the effect of "creating a government not republican in form or character," it seems to us to be a political question that can only be decided by the Congress of the United States.

To the second objection, that this board is vested with judicial power, which is in violation of the constitution: This board is not a court, but a commission appointed by the Legislature with special and limited powers—it has no jurisdiction to decide constitutional questions, such as are presented in this protest. If this board be an unconstitutional body, the courts having jurisdiction to pass on this question are open to any person having the right to contest it.

To the third objection, that this board is not legally constituted: The act creating this board provides for the original organization, and it was originally organized as the law directed; all political parties at that time organized or recognized were

represented on the board; at that time there was no party known as the Democratic Conservative party; there was no provision in the law for a reorganization of the board; so it could not have been contemplated that the board should be changed to suit shifting political organizations that might subsequently be made.

To the fourth objection, that this board should not canvass or count the votes for presidential electors, as there is no law giving this board jurisdiction: The law creating this board says: "Section 2. That this board shall be the returning officers for all elections held in the State." This seems to us to cover that for the presidential electors so clearly that there is no room for doubt; the objection as to whether the "electors" are State or Federal officers is not material.

To the fifth objection, that this board cannot canvass or count the votes cast for Brewster or Levissee as candidate for presidential electors, for the reason that on the day of the election they were holders of offices of trust or profit of the United States, and were consequently ineligible to the position of electors: This point will be reserved until the evidence shall be produced, merely suggesting that we have doubts as to whether this board can question the eligibility of candidates, our powers being confined to the canvass or compilation of the vote.

The canvass of returns was then begun, in spite of protests against the board proceeding before the vacancy had been filled. On the 21st there were several new protests filed. Henry M. Spofford, counsel for the Democratic candidate for Secretary of State, protested against the rules of the board forbidding him to be present to inspect and object to returns, and against the "executive sessions." A protest was made, on behalf of the United States Supervisors, against being excluded from the sessions of the board, and claiming the right to witness all the proceedings. The Democratic committee entered two protests, one against the rules excluding them from the sessions of the board, and against the proceedings going on with the vacancy unfilled; and the other against counting ballots from the parishes of Iberville, West Baton Rouge, Iberia, and St. Martin, for all the Republican candidates for electors, where they bore only the names of W. P. Kellogg, J. Henri Burch, and Oscar Joffrion. Other protests, of a similar character to the latter, were filed, it appearing that in other parishes also ballots had been cast bearing the names of only a part of the candidates. The protests were simply placed on file, while the work of compiling the returns went on. On the 22d several new protests were filed. On the 23d a motion was made in writing by Democratic counsel, setting forth that various returns had not yet been filed with the Returning Board, but were still in the possession of supervisors, who had been in the city of New Orleans for some days. Affidavits were submitted in support of these statements, and it was moved that the supervisors be ordered to bring in these missing returns. The same day a communication was received from the chairman of the Democratic Executive Committee, renewing the request for the appointment of Dr. Hugh Kennedy to the vacancy on the board. On the 25th there was farther dis-

ussion regarding missing returns. It was stated that those of Franklin Parish had been lying in an express-office ten days, and others were at different places in the city of New Orleans.

The canvass of the uncontested parishes was finally completed on the 27th, and those were taken up in which there were protests against the counting of the votes from one or more precincts or polling-places on account of irregularity, intimidation, or fraud. Testimony was taken and arguments heard until December 2d, when the Returning Board went into secret session to complete the work of canvassing the returns. The result was promulgated on the morning of December 6th. It announced the vote for presidential electors to be as follows:

W. P. Kellogg.....	75,185
J. H. Burch.....	75,127
Peter Joseph.....	74,014
L. A. Sheldon.....	74,027
Morris Marks.....	74,418
A. B. Levissee.....	74,008
O. H. Brewster.....	74,017
Oscar Joffrion.....	74,786
John McEnery.....	70,508
B. C. Wickliffe.....	70,509
L. St. Martin.....	70,553
F. Poché.....	70,385
A. De Blanc.....	70,580
W. A. Seay.....	70,525
E. G. Cobb.....	70,428
K. A. Cross.....	70,566

A certificate was signed by the four returning officers, declaring that Kellogg, Burch, Joseph, Sheldon, Marks, Levissee, Brewster, and Joffrion, were "duly and lawfully elected." S. B. Packard was declared to have been "duly and lawfully elected" Governor, and C. C. Antoine Lieutenant-Governor. The vote for Governor was given as 74,624 for Packard, and 71,195 for Nicholls; for Lieutenant-Governor, Antoine 74,669, and Wiltz 71,093. In like manner the election of the other Republican candidates for State officers was certified to. The persons declared elected to Congress were R. L. Gibson and E. J. Ellis, Democrats, and C. B. Darrall, G. L. Smith, J. E. Leonard, and Charles E. Nash, Republicans. The Legislature, according to the announcement of the Returning Board, consisted of 19 Republicans and 17 Democrats in the Senate, and 71 Republicans, 48 Democrats, and 8 Independents, in the House.

On the 5th of December John McEnery, signing himself "Governor of Louisiana," certified that he had, "in presence of Horatio N. Ogden, Attorney-General of the State of Louisiana, and of the Hon. A. L. Tissot, Judge of the Second District Court in and for the parish of Orleans in said State, examined duplicate original election returns of the general election, held in this State on the 7th day of November, A. D. 1876, and that the foregoing statement contains the true vote cast and counted at the various precincts in the State at said election for candidates for presidential electors." He also certified that John McEnery, Robert C. Wickliffe, Louis St. Martin, Felix P. Poché, Alcibiade De Blanc, W. A. Seay, R. G.

Cobb, and K. A. Cross, were "duly elected and appointed" presidential electors. The foregoing statement referred to gave the following as the vote for the different candidates:

Mc Enery	88,793
Wickliffe	88,859
St. Martin	88,850
Foché	88,474
De Blanc	88,638
Seay	83,312
Cobb	88,590
Cross	88,608
Kellogg	77,174
Burch	77,162
Joseph	74,913
Sheldon	74,902
Marks	75,240
Levisée	75,395
Brewster	75,479
Joffion	75,618

The Democratic Committee on Returns certified to the same result, as obtained by the compilation made from "sworn duplicates and certified copies of the original statements of votes filed in the clerk's offices of the district courts, as required by law." It also added the vote for Governor and Lieutenant-Governor, giving 84,487 to Nicholls, and 76,477 to Packard; 84,242 to Wiltz, and 76,471 to Antoine. In announcing the result in an address to the people, the chairman of the Democratic Central Committee said:

This victory is all the more to be appreciated because of the difficulties under which it was achieved. The entire registration and election machinery was in the hands of the Republican party. The Government, State and Federal, under Kellogg, Packard, Pitkin, Casey, and others, exerted their combined influence, patronage, and power, against our efforts to overthrow corruption and misrule. Our citizens were arrested and dragged from their homes on the most frivolous and shallow pretenses, and the Federal soldiery were distributed in every quarter of the State. Not content with this, an effort was made to disfranchise, through the United States commissioners, in violation of the constitution, a large portion of the white voters of the city of New Orleans, which was partially effected.

In the country parishes polls were opened at remote places without previous announcement, and in many instances were not opened at the places designated by the Supervisor of Registration, in clear violation of law.

Notwithstanding all this, and much more could be charged, the citizens of this great Commonwealth, white and colored, arose alike against the corrupt party in power, and cast their ballots in favor of honesty and reform.

The election throughout the State was peaceful and quiet. No outbreak occurred anywhere.

Our opponents, seeing the magnitude of our majority, started the bold and frivolous charge of intimidation as a pretext for throwing out a number of parishes where the most peaceful elections were held. Affidavits with cross-marks were manufactured in the custom-house.

We have fully met all these charges with abundant and conclusive proof, and we have exposed the grossest frauds on the part of the Republican party.

Your forbearance and toleration have been great under the wrongs and provocations sustained by you. We ask you to bear still longer.

It cannot be that, with the overwhelming majority in your favor, you can be deprived of the results of your victory, save by the grossest and most glaring injustice, such as will startle and disgust the honest sentiment of the whole country, without reference to political parties.

We have won a fair and complete victory, and it will not be torn from us by trickery and fraud. The voice of 84,000 people expressed fairly and openly at the ballot-box cannot be stifled by any process that will not bear on its face a wicked and shameless fraud, which the good men of all parties must condemn and undo.

Messrs. Palmer, Trumbull, and others, of the Democratic visiting committee, in an appeal to the people of the United States, after comparing the vote as it appeared on the face of the returns with that announced by the Returning Board, made the following statements:

In view, however, of the returns, and the law and the facts which should control the Returning Board, with which we have made ourselves familiar, we have no hesitation in saying that the result shown by the votes actually cast cannot be changed without a palpable abuse of the letter and spirit of the law governing the Returning Board, and a manifest perversion of the facts before it. Irregularities have been committed in some instances by officers conducting elections and making returns, but they are about as much on one side as the other; and as to intimidation, violence, or other illegal acts preventing a free and fair election, there is evidence on both sides, but not of such a character as to affect the general result. In most instances the acts of violence proceeded from mere lawlessness, as in the case of Henry and Eliza Pinkston, and had no connection with politics. It is a significant fact that in the parishes where it is alleged that voters were kept from the polls by intimidation the total vote was as large as at any time heretofore. An honest and fair canvass of the returns, even under the Louisiana law, cannot materially reduce Tilden's majority as shown on the face of the returns.

The Returning Board in reaching its result counted about 2,500 ballots bearing the names of only three electors as for the entire eight, and threw out various polls, including all those of East Feliciana and Grant Parishes.

The following statement shows the changes made, with the exception of those caused by throwing out a few disputed votes from several polls, amounting in all to 612:

PARISHES	VOTE PROMULGATED.		VOTE RETURNED.	
	Rep.	Dem.	Rep.	Dem.

Orleans.....	14,068	24,062	15,080	25,097

This statement is based on the vote for Governor. The promulgation of the result of the election made by the Democratic committee gave majorities ranging from 6,000 to 8,000 for all the Conservative candidates for State offices. It announced R. L. Gibson, E. J. Ellis, J. B. Elan, and F. W. Robertson, Democrats, and C. B. Darrall and J. E. Leonard, Republicans, as elected to Congress.

On the 6th of December, after the promulgation of the result of the canvass of the vote, Mr. Nicholls issued an appeal to the people of the State, commending them for their orderly conduct, and the peaceable spirit they had shown, and urging them to refrain from violence, and "hold every feeling, passion, and resentment, subordinate to the great work of redemption." He added: "That redemption, I feel thoroughly assured, is near at hand, for the heart of the American people is now moving in your behalf, and in that of free government and constitutional right."

Among the appeals and addresses issued, during the uncertainty of the count, was one dated New Orleans, November 30th, and signed by Hugh Miller Thompson, rector of Trinity Church, G. Raymond, V. G., administrator of the archdiocese, Ant. J. Jourdan, S. J., pastor of the Immaculate Conception Church, B. M. Palmer, pastor of the First Presbyterian Church, J. K. Gutheirn, rabbi of the Temple Sinai, and several presidents of banks and insurance companies, and other prominent business-men.* It was addressed to "our fellow-citizens of the United States," and set forth the evil results of bad government in Louisiana, and the means that had been used to prevent the people from getting rid of it. The following statements were included in the address:

1. It is our deliberate conviction that Louisiana is as loyal to the Union as any State within it.
2. The people of Louisiana accept in good faith the status in which the war left the colored people.
3. They desire that the white and colored people should live together in peace and harmony. That only, they are convinced, is the way to prosperity. The white people of the State have no wish to abridge a single right which the law gives to their colored fellow-citizens.
4. They believe that the late canvass and election were conducted as peaceably in Louisiana as in any sister State.
5. They know that large numbers of colored voters changed their political associations under the governing conviction that the interests of the black man and white in Louisiana are identical; that the burdens of misgovernment must fall on all classes, and finally most heavily on the laboring classes; and especially were they moved to such change by the embezzlement by those in power of the public funds appropriated to the education of their children.
6. They believe with the people of the whole State that a large majority of the honest votes cast were in favor of the so-called Democratic Conservative candidates.
7. While the people of Louisiana are glad to receive among them the officers and soldiers of the United States army for all constitutional purposes of defense, they deprecate the impression produced on their fellow-citizens, and the great injury done to the business interests of Louisiana, and especially

to those of this city, by the military proclamation and the sending hither of troops and generals, as if there were in some contingency danger of an outbreak; for whatever be the issue in the present crisis the people of Louisiana will not seek to change it but by peaceful and lawful means. It is no longer their question alone, but that of the whole country. Into the settlement of the question should come no mistake or misapprehension about their action or purposes. The question now for the State and nation is in the hands of an organization self-perpetuating, a close corporation, absolutely superior to the laws of this State; an organization already convicted of fraud in previous State canvasses, which is irresponsible to law and public opinion here; an organization used for the vilest purposes of usurpation and misgovernment hitherto unknown in Louisiana. It is for our fellow-citizens of other States who have allowed, we doubt not, with honest though mistaken intentions, such an organization, subversive of all republican government, to be fastened upon Louisiana in her distress, who are therefore responsible for it, and who now find it holding the peace and prosperity of the whole country in its hands, to bring to bear upon it such moral force as will, if possible, secure its honest action in this grave crisis. But in bringing such moral force to bear, we appeal to our fellow-citizens throughout the country to free themselves from any notion that in the crushed, misgoverned, and suffering State of Louisiana there is any purpose, save to calmly bear and patiently wait the issue under the law and the Constitution.

On the 6th of December the persons who had been returned as presidential electors, and had received certificates of election from Governor Kellogg, met in the Executive chamber in the State-House to cast their votes. Messrs. Brewster and Levisée, who were ineligible at the time of the election on account of holding Federal offices, had resigned their positions, and were now chosen by the other electors to fill what were deemed vacancies in the college. Their votes were then cast for Rutherford B. Hayes for President, and William A. Wheeler for Vice-President. Mr. Levisée, in giving his vote, said: "I have been offered to-day \$100,000 to give my vote for Samuel J. Tilden, but I consider the right to vote for Rutherford B. Hayes worth more than that." On the same day the persons who had been Democratic candidates for electors, had received a majority of the votes cast, and held the certificates of election signed by McEnery, met in the chamber of the House of Representatives, and cast their votes for Tilden and Hendricks.

The Republicans who had been in New Orleans at the request of the President to witness the action of the Returning Board submitted a report, dated December 6th, which was presented to Congress by the President. It made an elaborate defense of the character of the returning officers, and justified the law under which they acted, and the discretion which they exercised, on the ground that outrages and acts of violence in past years and during the canvass had produced intimidation of colored voters and prevented a fair election. Of the final action of the Returning Board this report said:

It is a tribunal from which there can be no appeal,

and in view of the possible consequences of its adjudication, we have closely observed its proceedings, and have carefully weighed the force of a large mass of the testimony upon which that adjudication has been reached. Members of the board, acting under oath, were bound by the law, if convinced by the testimony that riot, tumults, acts of violence, or armed disturbance did materially interfere with the purity and freedom of election, at any poll or voting-place, or did materially change the result of the election thereat, to reject the votes thus cast and exclude them from their final return.

Of the effect of such testimony the board was the sole and final judge, and if in reaching a conclusion it exercised good faith and was guided by an honest desire to do justice, its determination should be respected even if upon light proof a different conclusion might have been reached by other tribunals or persons. To guard the purity of the ballot, to protect the citizen in the free and peaceful exercise of his right to vote, to secure him against violence, and especially murder, when he attempts to perform this duty, should be the desire of all men and the aim of every representative government.

If political success shall be attained by such violent and terrible means as were resorted to in many parishes in Louisiana, complaint should not be made if the votes thus obtained are denounced by judicial tribunals and all honest men as illegal and void.

The report was signed by John Sherman, Ohio; E. W. Stoughton, New York; J. H. Van Alen, New York; Eugene Hale, Maine; J. A. Garfield, Ohio; Cortland Parker, New Jersey; W. D. Kelley, Pennsylvania; Sidney Clark, Kansas; J. C. Wilson, Kansas.

The Democratic witnesses made their report on the same date, to Abram S. Hewitt, chairman of the Democratic National Committee. It took the ground that the returning officers were unworthy of confidence; that they had violated the law in refusing to fill the vacancy, and in their whole manner of conducting the canvass of contested returns; that they had accepted as proof of fraud and intimidation in distant parishes affidavits manufactured in New Orleans; that their action had been partisan and one-sided from first to last, and that the result announced was a fraud upon the people of the State. Its conclusions were briefly expressed in this statement: "With the law and such facts before us as have been disclosed by the action of the Returning Board, we do not hesitate to declare that its proceedings as witnessed by us were partial and unfair, and that the result it has announced is arbitrary, illegal, and entitled to no respect whatever."

The signers of the report were John M. Palmer, Lyman Trumbull, William Bigler, George B. Smith, George W. Julian, and P. H. Watson.

The Returning Board itself issued an address to the country on the 12th of December. It was as follows:

The Returning Board of the State of Louisiana claim, first, that under the provisions of the law they are returning officers of all elections held in said State; that there are in law and in fact no returns of any election held in said State until first examined, canvassed, and compiled by them; that statements furnished by the Commissioners of Election

are simply statements of votes purported to have been cast, and that, until the fairness and legality of voting at that poll or precinct have been passed upon by the returning officers, no validity attaches to any such statement.

In strict compliance with the laws of the United States and of this State, the returning officers of the State of Louisiana have proceeded to examine, canvass, and compile, a statement of votes purported to have been cast in this State, at a general election for President and Vice-President of the United States, held on the 7th day of last November. The votes purported to have been cast in the parishes of Grant and East Feliciana have been ignored entirely in the official canvass.

In Grant Parish not one form of law was observed; there were no legal supervisors or Commissioners of Election, and the vote taken was as informal as votes taken on a railroad-train.

In East Feliciana the returning officers were unable to find one poll at which, from the evidence before them, they could certify that a full, free, and fair election was had.

In the parish of East Baton Rouge the returning officers canvassed and compiled the votes of three polls, situated in the city of Baton Rouge, where there was military protection afforded; also three other polls, situated immediately on the river, where there was comparative immunity from intimidation. Evidence as to intimidation by murder, hanging, whipping, and other outrages as affecting the vote at other polls, was so conclusive that the returning officers unanimously rejected the votes stated to have been cast at those polls. In the adjoining parish of West Feliciana six polls were rejected on similar conclusive evidence. In the parish of Ouachita eight polls were rejected; while in the city of Monroe, the parish-seat of that parish, the statements of votes cast were accepted because voters there were measurably protected from violence by the presence of United States troops. The United States Deputy Marshal in charge of the ballot-box at one of the rejected polls was shot, and throughout the whole parish there prevailed a systematic intimidation, murder, and violence, toward one class of voters, white as well as black, of such character as to have scarcely a parallel in the history of this State. In the adjoining parish of Morehouse the statement of the votes reported to be cast in six polls was also rejected on similar evidence. Polls were also rejected in the parishes of De Soto, Bossier, Franklin, Claiborne, and Calcasieu, upon clear evidence of fraud, not rebutted by evidence before the returning officers.

J. MADISON WELLS,
THOMAS C. ANDERSON,
G. CASENAVE,
LOUIS M. KENNER.

Soon after the meeting of the Federal Congress in December a special committee was appointed by each House to make an investigation of the election in Louisiana. The committee of the House of Representatives arrived in New Orleans and held its first session on the 12th of December. In reply to a subpoena *duces tecum*, the returning officers made a protest against this attempt of a committee of the House of Representatives of the United States to invade the rights of the State by demanding possession of their archives with a view to review the action of her tribunals without any legal or constitutional right. They declined to give up their records, but offered to allow them to be copied for the committee. The committee of the Senate arrived and began operations on the 18th. Both the House and Senate committees were divided into several

sub-committees, to conduct different branches of the inquiry. Numerous witnesses were examined in New Orleans and in the various localities where facts were to be ascertained, and many affidavits and other papers were received. The investigations were continued into the month of January, 1877, and the reports were made to Congress late in the session.

On the 1st day of January, 1877, the date for the meeting of the Legislature, the State-House was occupied by armed police and militia, and barricaded, by order of Governor Kellogg. No persons were admitted to the legislative halls except those having certificates of election from the Returning Board. The Democrats refused to enter and take part in the organization and proceedings of the two Houses, and, withdrawing, met at St. Patrick's Hall. Here all those were admitted who were declared by the Democratic committee to have been duly elected. The body which occupied the State-House consisted of 19 Senators and 68 Representatives. Of the former 8 held over and 11 had certificates of election from the returning officers. All the Representatives had Returning Board certificates. The St. Patrick's Hall Assembly consisted of 21 Senators and 62 Representatives. Of the Senators 9 held over, 8 were declared elected by the Returning Board, and 4 claimed to have been elected, but held their certificates from the Democratic Committee on Returns. Of the Representatives 40 were returned as elected by the official board, and 22 had no certificates from that body. By the constitution the Legislature is made to consist of 86 Senators and 120 Representatives.

In the Returning Board Legislature C. C. Antoine presided over the Senate, and Michael Hahn was chosen Speaker of the House. In the St. Patrick's Hall body Louis A. Wiltz was President of the Senate, and Louis Bush Speaker of the House. Each body claimed to be the legal Legislature of the State, and to have a quorum of members lawfully chosen, and each protested against the existence of the other, and proceeded with the business of the session. On the 2d of January the Republican Legislature, in joint assembly, received from the Secretary of State the returns of the election, as compiled by the Returning Board, and declared the election of Packard and Antoine. On the same day in joint assembly of the Democratic Legislature all the parish returns were read, and Nicholls and Wiltz were declared elected. Subsequently an act was passed making the Lieutenant-Governor, Speaker of the House, and three Senators to be elected by the Senate from different political parties, a Board of Canvassers to canvass and compile the vote for other officers. This board organized and performed the duty assigned to it, declaring the result of the election as it appeared on the face of the returns.

On the 8th of January Packard and Antoine

were formally inaugurated as Governor and Lieutenant-Governor at the State-House, and Nicholls and Wiltz were inaugurated at St. Patrick's Hall. The Democrats established new courts and new offices, and the complete machinery of government was set up under Nicholls. Collision was prevented partly by the presence of United States troops, under General Augur, and partly by the forbearance of both parties, who were disposed to await the determination at Washington of the electoral vote of the State, and the recognition of the result of the election. Packard called upon the Federal Government to recognize his claims and protect him against domestic violence, but orders were given to General Augur to confine himself to the preservation of the peace.

General Francis T. Nicholls was born in Ascension Parish, in 1834, and belongs to one of the most prominent families in the State. He received a military education, and graduated at the West Point Academy in 1855. He served as a lieutenant of artillery in the regular army for one year, a part of the time in the Seminole War in Florida, the residue on outpost duty in California. In 1856 he resigned his commission, and began the practice of law in Assumption Parish. At the breaking out of the civil war he entered the Confederate service as captain in the Eighth Louisiana Regiment. He advanced rapidly in promotion until he attained the rank of brigadier-general. He lost an arm in Virginia while serving under "Stonewall" Jackson, and at the battle of Chancellorsville received a wound that necessitated the amputation of his left leg. Though incapacitated for active service, he remained on duty in the army until the close of the war. He then resumed the practice of his profession in Assumption Parish, and has held a high position at the bar.

The case of J. C. Moncure against Antoine Dubuclet, contesting the election of the latter to the office of State Treasurer in 1874, was decided by the Supreme Court in May. A majority of the judges took the ground that the action of the Returning Board was conclusive in declaring Dubuclet elected, although he did not receive a majority of the votes cast, those of De Soto, Grant, and Winn Parishes, having been thrown out. Judge Taliaferro, in rendering the decision, said:

The act creating the Returning Board provides that the returns of elections thus made and promulgated shall be *prima-facie* evidence in all courts of justice, and before all civil officers, until set aside after a contest according to law. The contest, then, which involves the rebuttal of the *prima-facie* evidence of the correctness of the returns of the Returning Board, and the reopening of the investigation of the election returns in order to determine which of two opposing candidates is entitled to a given office, is a contest to be made according to law. If the law-maker has omitted to enact the law under which proceedings in such cases are to be conducted, it is *casus omissus*, which the courts cannot supply. In civil government rights are enforced by rules and

methods, having the authority of law, and they can be legally enforced in no other way. The high behests of the organic law are not always self-enforcing; the manner in which its commands are to be obeyed is often left to be provided by the legislative branch of the Government. To this branch of the State government the organic law delegates the power to prescribe rules and principles by which its provisions are to be made practically useful, and especially so when the organic law is silent on the subject.

Judges Wylly and Morgan dissented, the former submitting an opinion, in which he declared:

The doctrine that the Board of State Canvassers, or the Returning Board, is vested with the power contended for by defendant, and that its action cannot be revised by the courts, however arbitrary and fraudulent it may be, is a doctrine that is not supported by act 93, of the acts of 1872, the law organizing said Returning Board; nor is it authorized by any law of this State. On the contrary, the law creating the Returning Board, and providing for the canvass of the vote after an election, declares that the returns of elections thus made and promulgated shall be *prima-facie* evidence in all courts of justice and before all civil officers, until set aside after a contest according to law, of the right of any person named therein to hold and exercise the office to which he shall by such a return be declared elected.

In my opinion the petition declares a cause of action, and the canvass of the Returning Board is not beyond the reach of judicial inquiry. It is the election by the people and not the certificate of the Returning Board that gives a right to an office. I think the case should be remanded, to be tried on the merits.

A successful exhibition of the products and industries of the State was held under the auspices of the Louisiana Mechanics' and Agricultural Fair Association, at New Orleans, beginning on the 26th of February. The opening address was delivered by the Hon. Thomas A. Hendricks, of Indiana.

An Immigration Convention, composed of delegates from several Southern and Western States, was held in the Chamber of Commerce, New Orleans, on the 1st and 2d of March. A standing committee was appointed to devise the best means to facilitate immigration, and to establish a Bureau of Immigration in New Orleans.

LUTHERANS. In the table on next page are given the statistics of the several bodies constituting the Evangelical Lutheran Church in North America, as they appear in the *Church Almanac* (General Council, published at the Lutheran Book-store, Philadelphia) for 1877:

Kurtz's *Lutheran Almanac* (General Synod, Baltimore) classes the German Synod of Iowa and the Norwegian-Danish Augustan Synod among the independent synods, and gives the following footings and totals: General Council, 10 synods, 548 ministers, 1,093 churches, 156,896 communicants; Synodical Conference, 7 synods, 1,002 ministers, 1,596 churches, 251,877 communicants; General Synod, South, 5 synods, 92 ministers, 160 churches, 12,764 communicants; General Synod, North, 24 synods, 790 ministers, 1,226 churches, 118,571 communicants; Independent Synods, 12, with 25

unattached churches, 17 unattached ministers, and 1,600 unattached members—in all, 363 ministers, 747 churches, 65,795 communicants: total, 58 synods, 2,795 ministers, 4,822 churches, and 600,358 communicants.

Brobat's *Lutherische Kalender* (General Council, Allentown, Pa.), gives: General Council, 689 ministers, 1,338 congregations, 194,151 communicants; Synodical Conference, 1,034 ministers, 1,751 congregations, 264,935 communicants; General Synod, South, 92 ministers, 167 congregations, 12,750 communicants; General Synod, North, 741 ministers, 1,214 congregations, 110,866 communicants; ten Independent Synods (including the Iowa Synod) with 848 ministers, 694 congregations, 59,102 communicants; pastors not attached to any synod, 37: total, 2,782 ministers, 4,974 congregations, 629,204 communicants.

The discrepancies in the different tables arise chiefly from the lack of uniformity in keeping the records of the churches and synods, which, in respect to the numbers of communicants, is a very serious evil. In several synods, and in many churches in other synods, the custom is to enumerate, as the number of persons who have communicated, the whole number of instances in which the communion has been administered to individuals, without taking into account the number of times the same person may have taken the communion within the year. The actual number of communicants can only be estimated, never ascertained, from such a report. The number of ministers is taken from official records, or from other lists of ministers. Synods which are in process of attaching themselves to some general body, but have not yet consummated the union, may be counted as belonging to that body, or as independent, as is the case with two synods claimed by the General Council.

The *Church Almanac* gives the following list of theological seminaries: *Of the General Council*: Theological Seminary at Philadelphia, founded 1864, five instructors, 60 students; Theological Department of Augustana College, Paxton, Ill., founded 1868, three instructors, 17 students; Wartburg Seminary, Mendota, Ill., two instructors, 31 students; Practical Theological Seminary, Marshall, Wis., founded 1876, one instructor, 7 students. *Of the General Synod, North*: Theological Seminary at Gettysburg, Pa., founded in 1825, three instructors, 32 students; Hartwick Seminary, Hartwick, N. Y., founded 1816, one instructor, 5 students; Theological Department of Wittenberg College, Springfield, Ohio, founded 1845, two instructors, 22 students; Missionary Institute, Selinsgrove, Pa., founded 1859, one instructor, 10 students. *Of the Synodical Conference*: Theological Department of Concordia Seminary, St. Louis, Mo., founded 1840, four instructors, 85 students; Practical Department, Springfield, Ill., founded 1846, three instructors, 23 students; Norwegian Lutheran Seminary,

Madison, Wis., founded 1876, two instructors, 19 students; Theological Department,

Capital University, Columbus, Ohio, founded 1880, two instructors, 23 students. *Of the General Synod, South:* Theological Seminary at Salem, Va., founded 1830, at Lexington, S. C., one instructor, 7 students. *Of the North Carolina Synod:* Theological Department of

* The adding up of the above figures does not give this total, but we leave it unchanged, as we do not know whether the *Church Almanac* has made a mistake in adding, or misprinted any of the figures.

North Carolina College, Mount Pleasant, N. C., founded 1872, two instructors, 5 students. *Of the Conference of the Norwegian-Danish Evangelical Lutheran Church*: Augsburg Seminary, Minneapolis, Minn., four instructors.

The *Church Almanac* and Kurtz's *Almanac* each gives lists of eighteen Lutheran colleges; Brobst's *Kalender* gives nineteen; the *Church Almanac* gives fourteen classical schools; Brobst's *Kalender* gives sixteen, and Kurtz's *Almanac* twenty-five academies; Brobst's *Kalender* gives eleven high-schools for girls. The principal teachers' seminary of the Lutherans is at Addison, Ill.

The General Council has an Executive Committee of Home Missions, located at Pittsburgh, Pa.; an Executive Committee of Foreign Missions at Reading, Pa.; and a Board of Church Extension at Philadelphia, Pa. The General Synod has a Board of Home Missions at York, Pa.; a German Board of Home Missions at Baltimore, Md.; a Board of Foreign Missions in New York City; and a Board of Church Extension at York, Pa.

Kurtz's *Almanac* gives lists of seventeen Orphans' Homes, or schools under synodical control, or otherwise connected with the Church; one Home for the Infirm (Scandinavian), at San Francisco; one Asylum for Aged Persons, at Burlington, Iowa; two Infirmeries, and a Lutheran Hospital, at St. Louis; six Immigrant Missions (of the General Council, General Synod and Missouri Synod, German and Scandinavian Missions), at New York City, and one similar mission in Baltimore, Md. The list of Lutheran periodicals includes, according to Kurtz's *Almanac*, twenty-two in the English, thirty in the German, seven in the Norwegian, five in the Swedish, and one in the Danish languages. Of these, eleven are weekly, nine semi-monthly, thirty-five monthly, three quarterly, and five yearly publications.

The *General Council* of the Evangelical Lutheran Church met at Bethlehem, Pa., October 11th. The Ministerium of Pennsylvania, the Ministerium of New York, the Pittsburgh Synod, the District Synod of Ohio, the Synod of Michigan and other States, the Swedish Augustana Synod, the Synod of Canada, the Indiana Synod, and the Holston Synod, were represented by forty-three clerical and thirty-three lay delegates; and the Iowa Synod, having the privilege of debate but not of a vote, was represented by Rev. S. Fritschel. The Synod of Texas and the Norwegian-Danish Augustana Synod were not represented. The Rev. C. P. Krauth, D. D., LL. D., was chosen President of the Synod. The attention of the body was directed chiefly to the discussion of the meaning and intent of the regulation on pulpit fellowship and communion which had been adopted at previous sessions of the General Council, and which was known to the church as "The Galesburg Rule." The General Council, at its session held at Akron, Ohio, in 1872, had adopted the following rule:

1. The rule is: Lutheran pulpits are for Lutheran ministers only; Lutheran altars are for Lutheran communicants only.

2. The exceptions to the rule belong to the sphere of privilege, not of right.

3. The determination of these exceptions is to be made in consonance with these principles by the conscientious judgment of pastors as the cases arise.

At a subsequent session of the General Council, which was held at Galesburg, Ill., in 1875, the first clause of this rule was amended by the insertion of the words, "Which accords with the Word of God and the confessions of our church," so as to read: "The rule, which accords with the Word of God and the confessions of our church, is," etc. (as above). At the same time a statement was made by the President of the Council, and accepted by that body, by consent, that the rule, as amended, simply made explicit what was implied before, and declared whence it was got, and that no change was made by the amendment in the meaning of the action of the Council at Akron in regard to the exceptions. A division of opinion afterward arose in the district synods adhering to the Council concerning the full scope and bearing of the new rule. The Swedish Augustana Synod, the New York Ministerium, the Synod of Michigan, the Iowa and the Danish Augustana Synods, favored an exclusive interpretation, desiring that the rule should be held obligatory. The Ministerium of Pennsylvania, the Pittsburgh Synod, the Holston Synod, the District Synod of Ohio, and the Synod of Indiana, favored an "œcumenical" interpretation, holding that the rule should be considered advisory, and that the clauses referring to exceptions should have equal force with the rest. No special expressions were received from the synods of Canada and Texas. The action of the synods was referred to a special committee, upon the report of whom the Council, after a full debate, adopted a resolution declaring that "the true purport and effect of the action at Galesburg was to add to the declaration at Akron a statement of the source of the rule, and that in all other respects that declaration, in all its parts, remains untouched." Afterward, the President of the General Council (the Rev. Dr. Krauth) was requested to prepare a series of theses on the subject of "Pulpit and Altar Fellowship," as presented in the Galesburg Declaration, which, it was further provided, should be published in the several languages of the Council not less than three months prior to its next convention; "it being understood," the resolution reads, "that the discussion of the theses was to be in the way of study and enlightenment on the subject, and not for further legislation."

A constitution for congregations was discussed, and adopted in part. The definition of doctrinal position prescribed for the congregation forming the first section of the first article of this paper was adopted in 1872, and is as follows:

This congregation receives and adheres to the canonical books of the Old and New Testaments, as the revealed Word of God and the only rule of faith and life, and to the Confessions of the Evangelical Lutheran Church, especially the unaltered Augsburg Confession and Luther's Small Catechism, as a correct and faithful exposition of the Divine Word, to which rules and confessions all instructions in the church, the schools, and family, shall be conformed, and by which all questions shall be decided; and with which all books of worship and instruction in the congregation shall accord.

Of the articles adopted at the present convention, the second section of the first article provides that the congregation shall be in union with a synod of the Evangelical Lutheran Church, whose doctrinal basis is in accordance with that elsewhere laid down in the constitution, especially in the article first quoted. Article II., section 1, declares that "the congregation shall consist of the pastor or pastors, and other members of the Church of Christ, who have been baptized and admitted to the Lord's Supper, and who unite themselves as one communion under this constitution by accepting the same and conforming to the duties it enjoins; and also such baptized members of their household as have not yet reached the years of separate responsibility, and are subject by God's ordinance to their control as parents or guardians." The second section of the same article provides that "all those members, so far as their years and spiritual fitness allow, have a right to the means of grace provided for in the congregation, and to the faithful observance toward them of the duties which pastors, officers, and other members of the church, owe one to another." The third section makes it "the duty of all members of the congregations to be steadfast in the baptismal covenant, and, if they be parents or guardians, early to bring the children under their care within the same, presenting them for holy baptism, to bring them up in the nurture and admonition of the Lord, and to urge their attendance upon the catechetical instruction of the pastor, and their preparation for the rites of confirmation and the Lord's Supper. As they grow in years, they are to grow in the knowledge and grace of God, diligently to study holy Scripture, and use devout books which accord with it, to seek the light and aid of the Holy Spirit, and all other needful gifts, by fervent prayer, to examine themselves, to receive the Lord's Supper faithfully, and, if possible, whenever it is celebrated, and regularly to use the ordinances of public, family, and private devotion," etc.

Article III., section 1, declares that "every male member of the congregation, not under church censure, twenty-one years of age, who, as he conscientiously judges God has prospered him, regularly contributes in accordance with its plans of local support and general beneficence, shall be entitled to take active part in all its meetings and to vote at all its elections." The second section of the same article provides for the holding and calling of congrega-

tional meetings, the transaction of business in the same, and for the powers of such meetings.

The consideration of section 1 of article IV., which declares that "the permanent and ordinary offices of the congregation shall be the pastorate and diaconate," was postponed. The second section of the same article was adopted, as follows: "The chief offices of the Christian congregation are named in the New Testament: pastors or shepherds, bishops, presbyters, or elders, and all they that have the rule in the Lord, all which names designate one and the same class of officers, whose dignity, rights, and general duties, are under divine appointment the same, and are inalienable and unchangeable."

A committee appointed by the General Council of 1874, to consider the testimony borne by the General Council against "secret and unchurchly societies," and to suggest a method for accomplishing works of benevolence and mercy, made a report, which pointed to the local congregations as affording the best media through which such works should be performed. Upon their report a resolution was adopted, directing the earnest attention of pastors and churches to the claims "of the suffering members of our Lord's body," and recommending that the diaconate of the congregations be so reorganized as to number and division of work "that it may be said of our churches, as of the first churches of the saints, that there are none among us who lack." A report was adopted upon the condition of the Lutheran churches in Germany, protesting against interference by the state in their ecclesiastical affairs.

The Rev. J. B. Riemensnyder was received as a delegate from the Southern General Synod.

The receipts for *Home Missions* during the year were reported to have been \$3,142.97, leaving, after the payment of debts of \$1,050, \$2,092.97 clear receipts. Including the amount contributed by the Swedish Augustana Synod, and expended by it in the general mission-work, the total receipts for the year had been between \$4,000 and \$5,000. To this should be added what had been done for home missions by the several synods apart from the General Committee.

The report of the *Board of Foreign Missions* contained several letters from the missionaries in India. The board regarded the enlarging of the mission as an imperative necessity, and spoke of the need of more liberal contributions.

The report of the *New York Immigrant Mission* represented that the institution was in debt, and badly needed money. It stated also that the proper interest had not been taken in the work of the mission by the Church at large.

The report of the trustees of the *Emigrant Home Association*—an institution the object of which is to secure the protection and welfare

of the immigrants, and guard them against swindlers—reported that its work during the year had been one-third greater than that of the previous year.

The fifth convention of the *Synodical Conference* met at St. Paul, Minn., July 19th. The Rev. H. A. Preuss was elected president. The discussion of the theses on church-fellowship, which has been kept up from year to year, was continued. The tenth thesis was adopted as follows: "Such contradiction (between the confession and practice) exists also, when a Lutheran synod, or any association of synods, tolerates the serving by any of its pastors, though they call themselves Lutherans, of congregations which are in fact Union congregations." The consideration of the eleventh thesis was postponed till the next meeting. As proposed for adoption this thesis declares that "it is furthermore in conflict with the confession, when an ecclesiastical body is content that its pastors should not have a regular but only a temporary call from their congregations, or when it even promotes this disorder by the system of granting licenses."

A resolution was unanimously passed, recommending "the formation of synods within State boundaries, composed of all the members of conferences speaking the same language in each State." The carrying out of this resolution would require a change to be made, in order to meet its terms, in the control of the institutions of the various synods. For this purpose the following action was also taken:

1. The Synodical Conference advises that the present synods should dissolve the institutions for the education of ministers now existing in their midst, to erect a General Seminary, and to place the same under the control of the Synodical Conference.
2. The Synodical Conference advises to place the School-Teachers' Seminary, already existing, under the same control.
3. Until the dissolution of the large synodical bodies has taken place, the different synods of States are to have their own choice, whether they wish to be admitted into any one, and if so, into which one of the existing large bodies they wish to be admitted.
4. The matter of collegiate education is to be left in the hands of the several State Synods.
5. The Conference advises that with the general German Seminary a similar one be combined for those speaking the English language.
6. The Norwegian Lutheran Synod is to be invited to combine its seminary with those mentioned, or to make such use of these as it may deem proper.

The Conference resolved to observe the 99th day of May, 1877, as the tercentennial anniversary of the adoption of the Formula Concordia, the last of the Lutheran symbolical books. It recommended that the event be appropriately celebrated by all the congregations connected with the Conference. Prof. C. F. W. Walther was requested to publish the first part of the Formula, with an historical introduction and explanatory notes, for general distribution.

The *Board of Home Missions* of the General Synod reported that their receipts for the year

ending June 1, 1876, had been \$10,479.25, and their total disbursements had been \$12,932.48. Forty-three missions had been under their care during the year. Of these, two missions had been abandoned by the missionaries without the knowledge of the board, one had been discontinued, and three had become self-sustaining, leaving thirty-seven missions still under care. These missions contained fifty congregations, 2,988 members, 44 Sunday-schools, 4,702 scholars in the same, 47 houses of worship, and seven parsonages. They had paid and contributed for their own expenses and the enterprises of the Church \$45,405.77. The board was in debt \$2,453.23.

The Treasurer of the *Board of Church Extension* of the General Synod reported that his receipts for the year ending June 1, 1876, had been \$9,308.88, and his expenditure \$9,380.94.

A convention in behalf of the *Foreign Missions* of the General Synod met in Harrisburg, Pa., August 30th. Ten district synods were represented. The immediate object of the convention was to consider the condition and needs of the African mission, for which extraordinary expenses and a debt of \$10,000 had been incurred. The Rev. W. De Baum, D. D., presided. The convention was addressed by the Rev. A. C. Wedekind, Secretary of the Board of Foreign Missions, the Rev. J. A. Clutz, of Baltimore, Md., the Rev. Messrs. Day and Collins, missionaries to Africa, and the Rev. J. Ritter, a former missionary to Africa. The convention approved of the expenditures for the African mission as wise and necessary, declared that the Church ought cheerfully to undertake to raise the money called for, and recommended that practical measures be taken to obtain it.

The following is a summary of the work of the mission of the General Synod in India: Number of ordained American missionaries, four; of native pastors, three; of evangelists, two; of catechists, two; of teachers of subdivisions, 27; of Bible and tract colporteurs, four; of school-teachers (vernacular), 16; of pupils, 195; of members, including children, December 31, 1875, 2,835; of communicants, 1,254; of persons baptized in 1875, 375; of persons baptized since the beginning of the mission, 3,669; of school or prayer houses, 83; of villages in which Christians reside, 105. The mission sustained also one Anglo-vernacular high-school, with six teachers and 127 pupils.

LYTTELTON, GEORGE WILLIAM, baron, born March 31, 1817; died April 20, 1876. He was educated at Trinity College, Cambridge, where he graduated with high honors. He filled the position of Secretary of State for the Colonies for a brief period in 1846. From 1861 to 1863 he acted as a member of the royal commission appointed to inquire into the management of the public schools. At the time of his death he was Lord-Lieutenant of Worcestershire and Chief Commissioner of Endowed Schools. He was also a knight-commander of

the Order of St. Michael and St. George, and a Fellow of the Royal Society. In educational matters he always took a deep interest, and devoted considerable time to their investigation. At the distribution of prizes awarded by the University of Oxford at the local examination by the Birmingham and midland districts, in November, 1875, Lord Lyttelton offi-

ciated, and referred, in a well-considered address, to the importance of the movement with which the University Examination Society had to deal. Colonial questions always proved of interest to him, and for the revival of the active powers of convocation, and the extension of the church episcopate, he was a strenuous advocate.

M

MAINE. The public debt of the State of Maine at the close of the year was \$5,920,400, consisting of \$1,508,000 in registered and \$4,412,400 in coupon bonds. To offset this there was \$791,298.81 in the sinking-fund, leaving the net debt \$5,129,107, which was \$148,681 less than at the beginning of the year. The amount of bonds actually redeemed during the year was \$29,000, which matured on the 1st of March. On the 1st of February, 1877, bonds mature to the amount of \$46,500. The receipts of the Treasury for the year consisted of \$1,810,605.49 derived from revenue, and \$377,098.84 cash on hand January 1st. The expenditures were \$1,293,277.06, leaving a surplus in the Treasury December 31st of \$394,422.27. Of the revenue of the year \$899,405.51 was raised by direct taxation, \$53,541.76 by taxation of railroads, \$12,972.85 by tax on insurance companies, and \$278,985.38 by tax on deposits in savings-banks.

The Maine Central and certain other railroad companies have persisted in their refusal to pay the tax assessed against them. Early in the year a temporary injunction against the State Treasurer was obtained from the United States Circuit Court in behalf of the Maine Central, and a hearing was appointed for the April term; but by arrangement with the Attorney-General a suspension of proceedings was obtained, in order that the validity of the tax might first be tested in the State courts. The case was brought before the Supreme Court, where it was argued in July, but no decision had been rendered at the end of the year. The taxes due and not paid amount to \$147,000. Twenty miles of new railroad was built during the year—eight miles by the Piscataquis Company, in extension of its line from Abbot to Blanchard; and twelve miles by the Aroostook River Company, from Fort Fairfield to Caribou.

The receipts of the Land-Office for the year ending November 30th were \$42,399.77. Conveyances of 22,804.38 acres of land were made to actual settlers, and 13,054.69 were contracted to settlers. Of the State lands remaining, 127,665.97 acres are in possession of settlers, to be conveyed to them when certain required conditions have been fulfilled, and 26,773.39 acres are unsold. Islands on the coast aggregating 668 acres were sold at auction for \$1,109.15. The colony of New Sweden, in

Aroostook County, is in a thriving condition. Fifty-two of the Swedish settlers have become naturalized citizens, good school-houses have been built, and four schools are taught in the settlement.

There are sixty savings-banks in the State—four having become insolvent since August, 1875, and no new ones having been established. The amount of deposits on the 6th of November was \$27,818,764.70, a decrease during the year of \$4,264,549.58, including \$1,029,965.95 placed in the hands of receivers. The number of depositors was 90,621, a decrease of 10,705; average deposit of each, \$306.

During the year ending April 1st the sum of \$1,058,497 was expended in support of public schools, of which \$875,852 was contributed by the State. Eighty-six new school-houses were built, at a cost of \$164,399.

SEAL OF THE STATE OF MAINE.

The Industrial School for Girls, at Hallowell, was supported during the year at a cost of \$6,765.40. The number of pupils was 82.

The number of convicts in the State-prison at the end of the year was 171, an increase of 23 since 1875. The expense of supporting the institution was \$29,778.49, while the profits of its labor amounted to \$19,659.33, leaving a deficiency of \$10,114.16. The number of persons confined in the thirteen county-jails at the close of the year was 815; the total cost for arrest and conviction was \$38,000, for support \$58,900, making the expense on account

of criminals for counties and State, including the deficiency in the State-prison account, \$107,014.16. With regard to the effect of the abolition of capital punishment, it is to be noted that no indictment for an offense hitherto called capital was found in the State during the year. A man was, however, arrested for the murder of three persons at Bucksport in October, and is likely to be indicted.

The regular annual session of the Legislature began on the 5th of January, and came to an adjournment on the 26th of February. General acts were passed providing for the organization of corporations for business purposes, for the organization of savings-banks and trust and loan companies, and for the organization of railroad companies. The new town of Kossuth was incorporated, in Washington County, and the name of the town of Dalton was changed to Ashland. The most important act of the session was one abolishing capital punishment for the crime of murder.

A railway convention was held at Augusta

on the 30th of March, and participated in by delegates from Canada. It was called in the interest of a projected line of railway from Quebec through the valleys of the Chaudière and Kennebec Rivers, *via* Augusta, to the Atlantic coast at Wiscasset. The entire distance is 225 miles, of which 90 miles is in the Province of Quebec. This is to be traversed by the Levis & Kennebec Railway, which is about half completed. Of the 135 miles in Maine, about 80 miles is now traversed by railroad.

The delegates at large to the National Republican Convention were selected by the Republican members of the Legislature at the close of the session. These and all those chosen in the congressional district conventions were pledged to support James G. Blaine as the candidate for President of the United States.

The Democratic State Convention, which was held at Bangor on the 13th of June, selected the delegates at large to the National Convention at St. Louis, chose a Central Commit-

BATES COLLEGE, LEWISTON.

tee, and nominated John C. Talbot, of East Machias, for the office of Governor. The following resolutions were adopted, as expressing the political sentiments of the convention:

Resolved, That, reaffirming the principles asserted in the resolutions adopted by the late Democratic State Convention, we submit as the present great issue of governmental reform, which shall abolish sinecures, reestablish reform salaries for all public officers, introduce economy in the public service, strike down every abuse of power, and, by an honest administration of public affairs, shall lighten the public burden, and restore peace, contentment, and national prosperity.

Resolved, That the Democratic House of Representatives in Congress deserve the thanks of the nation for what they have already done in the great work of unearthing and dragging to light the corruption that pervades and permeates the Administration. We say to them, Go forward in your patriotic labors in the cause of honesty and reform.

Resolved, That we are opposed to any inflation of our national currency, and that gold and silver form the only money system.

Resolved, That, in accordance with the sentiment

of the Democracy of Maine, this convention declares Samuel J. Tilden, the able, zealous, enterprising, and successful reform Governor of the Empire State, to be its first choice for President, and recommends his nomination by the National Democratic Convention as eminently fit and proper.

Resolved, That it is the sentiment of this convention that the rules adopted by our late National Democratic Convention requiring two-thirds of the delegates to concur in making its nominations, being at variance with the well-established Democratic principle of majority control, should be abandoned.

The Republican State Convention was held at Bangor, June 22d, and General Selden Connor was renominated for Governor. The following resolutions were adopted:

Resolved, That this convention accepts the resolutions of the recent National Convention at Cincinnati, as a correct statement of the principles of the Republican party, and hereby pledges the Republicans of Maine to use all honorable means to carry the resolutions into effect in the future acts and policy of the Government.

Resolved, That the Republicans of Maine give their emphatic approval to the nomination of Rutherford B. Hayes for the presidency, and of William A. Wheeler, of New York, for the vice-presidency, and will spare no honorable efforts to give them a rousing majority in November.

Resolved, That this convention offers its sincere thanks to the Republicans of various States of the Union who gave their enthusiastic support to Hon. James G. Blaine in the recent National Convention in Cincinnati, and thus attest his commanding abilities, and his value to the Union as a statesman.

Resolved, That we reaffirm the principles heretofore enunciated by our State Conventions in reference to prohibition and the development of the resources of the State.

Resolved, That Governor Selden Connor is entitled to the earnest thanks of his fellow-citizens for the ability, firmness, and fidelity with which he has performed his official duties since his occupancy of the Executive chair, and that the Republicans of Maine hereby express their determination to elect him in September by a largely-increased majority.

The State election took place on the 11th of September. The whole number of votes cast for Governor was 136,828, of which Selden Connor received 75,867; John C. Talbot, 60,423; Almon Gage, "Greenback" candidate, 520; and 13 were scattering. Connor's plurality over Talbot was 15,444; his majority over all, 14,911. Republicans were elected to Congress in all of the five congressional districts. In the Fourth District, where there was a division among the Republicans, the vote was as follows: Llewellyn Powers, regular Republican, 12,866; Lyndon Oak, independent Republican, 11,968; and J. P. Donworth, Democrat, 10,069. In the Second District 550 votes were cast for a "Greenback" candidate. At the presidential election in November the whole number of votes cast was 116,786. Of these the Republican candidates received 66,300; the Democratic, 40,823; and the "Greenback" ticket, 663; Republican plurality over Democratic vote, 16,477; majority over all, 15,814.

The appointment of Senator Lot M. Morrill as Secretary of the Treasury of the United States, in the latter part of June, caused a vacancy in the senatorial representation of the State for the term ending March 4, 1877. The Legislature not being in session, the Governor appointed James G. Blaine to the place. On the meeting of the Legislature in January, 1877, Mr. Blaine was promptly chosen, not only for the remainder of the unexpired term, but for the full term ending March 4, 1883.

MAJOR, Rev. JOHN RICHARDSON, D. D., a British clergyman, teacher, and author, born in 1797; died March 7, 1876. He was educated at Reading School and Trinity College, Cambridge, where he graduated B. A. in 1819. In 1830 he was appointed head-master of the Grammar-School at King's College, London, which position he resigned in 1866. He was for a time Vicar of Warbling, Sussex, and in 1871 was appointed Vicar of Arrington, Cambridgeshire. He was the author of a "Latin Grammar and Exercises," "Latin Reader,"

"Hints for Latin Composition," "Initia Græca," "Initia Homerica," and "Guide to the Reading of the Greek Tragedians." He also edited five of the plays of Euripides, Stephens's "Greek Thesaurus," the lexicons of Scapula, Schrevelius, Parkhurst, and others, and in 1870 published "The Gospel of St. Mark in the Original Greek," with a digest of notes from various commentaries.

MALDEN, HENRY, a British scholar, born in 1800; died July 4, 1876. He was educated at Trinity College, Cambridge, where he was elected to a Craven scholarship with his friend Lord Macaulay, with whom he was also one of the earliest contributors to the *Quarterly Magazine*, established by Charles Knight. He was elected to a fellowship in his college in 1824, and in 1831 was appointed Professor of Greek in the University of London, now University College, which position he held up to his death. He was the author of "Origin of Universities and Academical Degrees" (1836). He also contributed a number of valuable papers to the "Proceedings and Transactions" of the Philological Society, the *Philological Museum*, and to the *Classical Museum*, edited by Dr. L. Schmitz from 1848 to 1850.

MARTINEAU, HARRIET, an English authoress, born June 12, 1802; died June 27, 1876. She was the daughter of a manufacturer in Norwich, and received an excellent education, taking part in the studies of her brother James, afterward Unitarian minister in Liverpool. She made her first literary effort when but nineteen years old, and in this followed at first only her inclination; but, owing to serious pecuniary losses in her family, she was compelled to rely upon her pen for a living. The peculiar feature of her numerous works was her advocacy of social reforms, in which she based herself on her thorough knowledge. Her works, "Illustrations of Political Economy" (9 vols., 1832-'34) and "Poor-Laws and Paupers" (1834), have a decided practical tendency and a scientific basis. In 1836 she undertook a trip to America, as the results of which she published "Society in America" (3 vols., 1837) and "Retrospect of Western Travel" (3 vols., 1838). Among her other works are: the novels "Deerbrook" (1839) and "The Hour and the Man" (1840); the "Forest and Game-Law Tales" (3 vols., 1846); "Life in the Sick-Room; or, Essay by an Invalid" (1844); and "Traditions of Palestine" (1831). "Eastern Life, Present and Past" (8 vols., 1848) is the result of a journey to Egypt, Arabia, and Palestine, undertaken for the sake of her health. Her "History of England during the Thirty Years' Peace" (2 vols., 1859) is a work of considerable excellence, which is also the case with her "Positive Philosophy" (2 vols., 1858), in which she attempted to popularize the views of Comte in England. Together with Atkinson she published "Letters on the Laws of Man's Nature and Development" (1851), and "Letters from Ireland,"

which first appeared in the *Daily News*. Her smaller works and contributions to periodicals she published under the title of "Health, Husbandry, and Handicraft" (1861). She wrote an autobiography, which was not published until after her death, and an American edition of which appeared in Boston in 1877.

MARYLAND. Ex-Governor William A. Graham, of North Carolina, one of the arbitrators chosen under the act of 1874 to determine the boundary-line between Maryland and Virginia, having died in 1875, a new act was passed at the legislative session of this year, naming Jeremiah S. Black, of Pennsylvania; James B. Beck, of Kentucky; and Charles J. Jenkins, of Georgia, as arbitrators for this purpose, any two of them to have a decisive voice. Their report was made in January, 1877, Messrs. Black and Jenkins concurring in an award, and Mr. Beck dissenting from their conclusions. The reasons were stated at length on both sides for the conclusions reached. The award of a majority of the arbitrators, which both States have bound themselves in advance to accept, is as follows:

SEAL OF THE STATE OF MARYLAND.

And now, to wit, January 16, Anno Domini 1877, the undersigned, being a majority of the arbitrators to whom the States of Virginia and Maryland, by acts of their respective Legislatures, submitted the controversies concerning their territorial limits, with authority to ascertain and determine the true line of boundary between them, having heard the allegations of the said States and examined the proofs on both sides, do find, declare, award, ascertain, and determine that the true line of boundary between the said States, so far as they are continuous with one another, is as follows, to wit: Beginning at the point on the Potomac River where the line between Virginia and West Virginia strikes the said river at low-water mark, and thence following the meanderings of said river by the low-water mark to Smith's Point, at or near the mouth of the Potomac, in latitude $37^{\circ} 53' 08''$ and longitude $76^{\circ} 18' 46''$; thence crossing the waters of the Chesapeake Bay by a line running north $65^{\circ} 30'$ east, about nine and a half nautical miles to a point on the western shore of Smith's Island, at the north end of Sassafras Hammock, in latitude $37^{\circ} 57' 13''$, longitude $76^{\circ} 02' 52''$; thence across Smith's Island south $88^{\circ} 30'$ east 5,620 yards, to the centre of Horse Hammock, on the eastern shore of Smith's Island, in latitude 37°

$57' 08''$, longitude $75^{\circ} 59' 20''$; thence south $79^{\circ} 30'$ east 4,880 yards, to a point marked "A" on an accompanying map, in the middle of Tangier Sound, in latitude $37^{\circ} 56' 42''$, longitude $75^{\circ} 56' 23''$, said point bearing from Jane's Island light south 54° west, and distant from that light 3,560 yards; thence south $10^{\circ} 30'$ west 4,740 yards, by a line dividing the waters of Tangier Sound, to a point where it intersects the straight line from Smith's Point to Watkins's Point, said point of intersection being in latitude $37^{\circ} 54' 21''$, longitude $75^{\circ} 56' 55''$, bearing from Jane's Island light south 29° west, and from Horse Hammock south $34^{\circ} 30'$ east. This point of intersection is marked "B" on an accompanying map. Thence north $85^{\circ} 15'$ east 6,720 yards along the line above mentioned, which runs from Smith's Point to Watkins's Point, until it reaches the latter spot, namely, Watkins's Point, which is in latitude $37^{\circ} 54' 38''$, longitude $75^{\circ} 52' 44''$. From Watkins's Point the boundary-line runs due east 7,880 yards, to a point where it meets a line running through the middle of Pocomoke Sound, which is marked "C" on an accompanying map, and is in latitude $37^{\circ} 54' 38''$, longitude $75^{\circ} 47' 50''$; thence by a line dividing the waters of Pocomoke Sound, north $47^{\circ} 10'$ east 5,220 yards, to a point in said sound marked "D" on an accompanying map, in latitude $37^{\circ} 56' 25''$, longitude $75^{\circ} 25' 26''$; thence following the middle of the Pocomoke River by a line of irregular curves, as laid down on an accompanying map, until it intersects the westward protraction of the boundary-line marked by Scarborough and Calvert, May 28, 1668, at a point in the middle of the Pocomoke River, and in latitude $37^{\circ} 59' 37''$, longitude $75^{\circ} 37' 04''$; thence by the Scarborough and Calvert line, which runs $5^{\circ} 45'$ north of east, to the Atlantic Ocean.

The latitudes, longitudes, courses, and distances here given have been measured upon the coast-chart No. 33 of the United States Coast Survey (sheet No. 8, Chesapeake Bay), which is herewith filed as part of this award and explanatory thereof. The original charter-line is marked upon the said map and shaded in blue. The present line of boundary, as ascertained and determined, is also marked and shaded in red, while the yellow indicates the line referred to in the compact of 1785 between Smith's Point and Watkins's Point. In further explanation of this award, the arbitrators deem it proper to add that—

1. The measurements being taken and places fixed according to the Coast Survey, we have come as near to perfect mathematical accuracy as in the nature of things is possible. But in case of any inaccuracy in the described course or length of a line, or in the latitude or longitude of a place, the natural objects called for must govern.

2. The middle thread of Pocomoke River is equidistant as nearly as may be between the two shores without considering arms, inlets, creeks, or affluents as parts of the river, but measuring the shore-lines from headland to headland.

3. The low-water mark on the Potomac, to which Virginia has a right in the soil, is to be measured by the same rule; that is to say, from low-water mark at one headland to low-water mark at another, without following indentations, bays, creeks, inlets, or affluent rivers.

4. Virginia is entitled not only to full dominion over the soil to low-water mark on the south shore of the Potomac, but has a right to such use of the river beyond the line of low-water mark as may be necessary to the full enjoyment of her riparian ownership, without impeding the navigation or otherwise interfering with the proper use of it by Maryland, agreeably to the compact of 1785.

In testimony whereof we have herunto set our hands the day and year above written.

J. S. BLACK, of Pennsylvania.
CHARLES J. JENKINS, of Georgia.

A. W. GRAHAM, Secretary.

The principles upon which the award was made are briefly stated thus:

1. So far as the original charter boundary has been uniformly observed and the occupancy of both has conformed thereto, it must be recognized as the boundary still.

2. Wherever one State has gone over the charter-line and taken territory which originally belonged to the other and kept it, without let or hinderance, for more than twenty years, the boundary must now be so run as to include such territory within the State that has it.

3. Where any contract or agreement has changed the charter-line at a particular place so as to make a new division of the territory, such agreement is binding if it has been followed by a corresponding occupancy.

4. But no agreement to transfer territory or change boundaries can count for anything now if the actual possession was never changed. Continued occupancy of the granting State for centuries is conclusive proof that the agreement was extinguished and the parties remitted to their original rights.

5. The waters are divided by the charter-line where that line has been undisturbed by the subsequent acts of the parties, but where acquisitions have been made by one from the other of territory bounded by bays and rivers, such acquisitions extend constructively to the middle of the water.

The principal point upon which Mr. Beck disagreed with his colleagues was as to the location of the Watkins's Point of Lord Baltimore's charter.

The biennial session of the Legislature began on the 5th of January, and continued until the 3d of April. Among the acts passed was one providing for the general valuation and assessment of all property subject to taxation. It divides the counties and cities of the State into assessment districts, and gives to the Governor, with the advice and consent of the Senate, authority to appoint assessors for each district, and Boards of Control and Review for the several counties and the city of Baltimore. Appeals from the action of the assessors and Boards of Control and Review can be made to the county commissioners and to the Appeal Tax Court in the city of Baltimore, and thence appeals may be made to the Court of Appeals. The general supervision of the conduct of assessors and Boards of Review is given to the State Controller. All shares of stock and bonds of corporations owned by citizens of the State, whether such corporations are located

UNITED STATES NAVAL ACADEMY, ANNAPOLIS.

in the State or elsewhere, are made subject to taxation, as also the securities of other States and countries, and all investments in private securities, "except mortgages upon property in this State and the mortgage debts respectively secured thereon."

A new corporation act was also passed providing for the creation and regulation of incorporated companies. It defines the powers and privileges of railroad companies, and makes all necessary provision for the organization and operation without a special charter. A special act was, however, passed incorporating the National Railroad Company, the object of which was to "connect Washington with

or near Brookville by the most feasible and direct railroad communication practicable."

Several acts were passed relating to the conduct of elections in the city of Baltimore. One of these provided for a thorough revision of the registration lists and the removal of the names of deceased persons and those fraudulently registered. Another took the control of elections from the board of police and vested it in a board of supervisors to be appointed by the Governor. Another act provided that a census of legal voters should be taken and the city divided into election precincts of not more than 600 voters each.

Among the other acts passed was one abolishing the system of police magistrates in Bal-

timore, reducing the number of justices, and giving the Governor power to appoint them for the city at large instead of by wards; one laying a tax on the property of railroads; one prohibiting the employment of children under sixteen years of age in any factory more than ten hours a day; one providing for the inspection of mines and the security of miners; and one repealing the law which prevented grocers and others than druggists from selling patent medicines.

Two investigations were ordered, one into the management of the Chesapeake & Ohio Canal, and the other into the last election of Governor. The former resulted in the vindication of the canal management from all charges, and the latter in the withdrawal of Mr. Harris, the contestant for the office of Governor, before the inquiry was completed.

An extra session of the Senate was held in the latter part of April, for the purpose of confirming appointments of assessors and Boards of Control and Review under the new assessment law, but occupied only two days.

The public debt of the State at the close of the last fiscal year, September 30th, was \$10,730,525.46, of which \$5,014,333.35 consisted of sterling bonds, with interest payable in coin in London. The reduction of the debt for the year amounted to \$677,088.88. The State has productive investments amounting to \$4,329,105.89, and unproductive investments to the amount of \$29,287,041.76. The receipts of the Treasury for the year amounted to \$3,078,241.95, including a balance of \$1,088,111.83 brought over from the previous year. The receipts from ordinary sources were \$1,838,158.53, the sum of \$185,050.25 having been raised by the hospital loan, and \$66,924.84 having been received from the United States on account of war claims. The tax levy of the year was \$740,218.87, of which \$429,112.41 was for public schools, and \$311,106.46 for interest, these being the only purposes for which a tax levy is made. The total valuation on which taxes were levied was \$429,112,418. The total disbursements of the year were \$2,676,810.66, of which \$388,564.22 was in redemption of bonds; \$34,469.08 for the completion of the Normal School; \$20,156.62 for rebuilding the State tobacco-warehouses, destroyed by fire; \$135,193.30 for the Maryland Hospital for the Insane; \$15,000 for the Centennial Exposition; \$68,956.63 for sundry special appropriations; and \$1,916,300.47 for the ordinary expenses of the government. The balance in the Treasury, at the end of the year, was \$453,838.68, including \$28,995.47 credited to the school-fund, and \$28,408.87 credited to the sinking-fund. The proceeds of the tax levy for public schools were \$565,512.11, of which \$452,387.11 was distributed to white schools, \$100,000 to colored schools, and \$13,125 to the State Normal School.

The commerce of the city of Baltimore for the first half of the year showed a decided increase over that of the corresponding portion

of the preceding year. The total value of exports for six months was \$18,613,144, against \$14,170,514 in 1875. The largest amount, \$9,865,793, in value, was sent to England; the next, \$3,868,344, to Germany; the next, \$1,681,120, to Holland and Belgium; and \$1,292,776 to Brazil. The largest single item in the export trade of the city was corn, of which 11,987,906 bushels were shipped, an increase of 7,221,000 bushels over the first half of 1875, and over 5,000,000 more than during that entire year. The other important commodities exported were, petroleum, 17,849,598 gallons; bacon, 3,113,838 lbs.; lard, 5,696,118 lbs.; oil-cake, 6,249,294 lbs.; staves, 1,338,694 in number; lumber, 1,825,157 feet; wheat, 473,807 bushels; flour, 215,578 barrels; tallow, 681,176 lbs.; and tobacco, 28,929 hogsheads in leaf, 2,976 hogsheads of stems, 2,201 cases in various forms, and 873,549 lbs. manufactured.

There was no State election in Maryland this year, but the political parties held conventions for the appointment of delegates to the National Conventions, and for the nomination of electors of President and Vice-President. The Republicans met at Frederick, on the 4th of May, and accomplished both these purposes. Resolutions were adopted expressing gratitude that all investigations had failed to touch the honor and integrity of President Grant, whose Administration had been wise, patriotic, and prudent in the reduction of the public debt, and the adoption of measures looking to an early resumption of specie payments. They pledged the vote of Maryland to James G. Blaine as a candidate for President, and commended B. H. Bristow for his efforts to expose and prevent corruption. The delegates were directed to vote for Mr. Blaine as long as there was a reasonable hope for his nomination.

The Democrats appointed their delegates to the National Convention on May 31st, and nominated candidates for electors on the 13th of September. On the former occasion, a majority of the committee on resolutions reported that they would submit no declarations of principles, but merely a request that capable, honest, and efficient men be sent to the National Convention. One member of the committee, however, submitted a minority report, which was adopted, declaring that offices are created for the public good, and not as a reward for political services and spoils, and for the victors; that the traditions of the Democratic party recognize coin as the only money warranted by the Constitution, and favor a speedy return to specie payments, believing that the industries of the country and the interests of the whole people demand a fixed and not a fluctuating standard of value; and that the delegates to the St. Louis Convention be left unpledged and free in their judgment and discretion as to the selection of a candidate for President and Vice-President. At the September convention of the Democrats the following was adopted as the platform of the party:

We, the delegates of the Democratic Conservative party of Maryland, in State Convention assembled, do hereby indorse the platform adopted at St. Louis June 28, 1876, and the candidates nominated by the delegates of the Democratic party of the United States then assembled in convention, to wit: For President, Samuel J. Tilden, of New York; for Vice-President, Thomas A. Hendricks, of Indiana; and we do hereby appeal to our fellow-citizens of every former political connection to unite with us in an earnest effort to elect them, and thus give effect to their pledges of immediate reform in the administration of the Federal Government—reform in the currency; reform in the revenue; reform in expenditure; reform in taxation; reform in the civil service; reforms in all grades of the public service, and in every department of the Government: therefore, be it

Resolved, That the national honor and the public credit should be sustained, and resumption of specie payments be established, without unnecessary or artificial contraction, and without disturbing the industry, trade, and commerce of the country.

Resolved, That the revenue of the country should be so adjusted that the largest revenue should be

obtained from the lowest taxation, in lieu of the present system, which taxes the largest possible number of articles at the highest possible rates.

Resolved, That the public expenditure should be reduced to \$100,000,000 annually, exclusive of interest on the public debt, and that the present House of Representatives deserves the gratitude of the people for its successful efforts in this direction.

Resolved, That honesty, capacity, and fidelity, be constituted the indispensable tests and qualifications for the civil service, and that the present House of Representatives deserves the gratitude of the people for its successful efforts to expose the dishonesty, incapacity, and infidelity, of those now in possession of the Federal Government.

Resolved, That the Constitution of the United States, with its amendments, universally accepted as a final settlement of the controversies which engendered civil war, is the supreme law of the land, and commands our absolute obedience.

Resolved, That the Constitution of the United States establishes the supremacy of the civil over the military powers, and that the order of Secretary Cameron, and the instructions of Attorney-General Taft, recently issued in reference to the interference

BALTIMORE, FROM FEDERAL HILL.

of the military in elections, are flagrant perversions of law, and assumptions of power which deserve the indignant denunciation of all honorable men. "A free people should hold no middle term with tyranny, oppression, and usurpation."

Resolved, That the Democratic party at all times proclaims the right of free speech, and heartily denounces all attempts at violence, riot, or interference intended or calculated to abridge this sacred right of the people.

Resolved, That the Constitution of the United States secures perfect equality to all citizens, of whatever race or color, before the law, and that while we abhor and detest the tyranny, oppression, and usurpation, of the present Republican Administration, we pledge our best efforts to guarantee to every citizen all his rights of person and property, without regard to race or color.

Resolved, That the Constitution of the United States secures the entire separation of church and state in the interest of civil and religious freedom; therefore, we pledge ourselves to oppose any appro-

priation of the school-fund to sectarian institutions, or any legislation which permits any sectarian interference with the public schools established by the State for the education of the people.

Resolved, That the Democratic party in the legislation of this State has demonstrated its willingness and ability to extend to every rank, station, and condition of society equal political, civil, and individual rights, by extending to all a free and unobstructed ballot, and by providing the means of education from a common fund for the advancement of every one, without respect to race or color, which is the surest guarantee of their fairness and justice to the whole people of the State.

At the election on the 7th of November there were 163,793 votes cast for presidential electors. Of these the Democratic candidates received 91,779; Republican, 71,980; "Greenback," 83; and Prohibition, 1. The Democratic majority was 19,765. The six members

of Congress chosen at the same time were all Democrats. The total vote in the city of Baltimore was 54,289, and the Democratic majority 16,129.

On the 22d of February, Daniel C. Gilman was installed as President of the Johns Hopkins University, in Baltimore. This institution had been founded by a board of trustees, appointed by the late Johns Hopkins, to carry into effect the purposes of a munificent bequest of \$3,500,000. They were left untrammelled by conditions and restrictions, and their plans contemplate the establishment of a well-equipped university, which shall include not only an academic department, but special schools of science, medicine, and jurisprudence. Several chairs of instruction have been filled, and courses of lectures established. For the temporary accommodation of the institution, buildings have been leased in the heart of the city of Baltimore; but the permanent site is at Clifton, where it is proposed to construct simple but substantial edifices adapted in the best manner to the purposes for which they are intended. At the beginning of the academic year 1876-'77, Prof. Huxley, of England, delivered an address before the university on the "Higher Education," and during the year courses of lectures were given by eminent scholars from different parts of the country.

An important decision, involving the responsibility of national banks for securities placed in their keeping, was rendered by the Court of Appeals in the latter part of February. A Baltimore firm had in 1866 deposited bonds, valued at \$28,500, with the Third National Bank of that city, as collateral security for payment of all obligations then existing, or thereafter to be incurred, with the understanding that the officers of the bank had the right to sell the bonds in satisfaction of such obligations. The firm was a regular customer of the bank, obtaining discounts, borrowing money, and sometimes overdrawing its deposit account. In 1872 the bonds were stolen from the vaults of the bank by burglars, at a time when nothing was due from the firm. Suit was brought to recover their value. At a trial before the Superior Court of Baltimore, in 1873, the jury failed to agree. A second trial in Howard County, in September, 1874, resulted in a verdict for the plaintiff for the full amount claimed. An appeal was taken to the Court of Appeals, which decided against the bank, confirming the judgment of the court below.

Another interesting case was decided by the Court of Appeals in June. A citizen of Virginia was, prior to 1861, the holder of \$8,000 of the coupon bonds of the Chesapeake & Ohio Canal Company. Being assigned to duty in the Southwest, in the early part of the war, he left them in custody of his wife. At the time of the evacuation of Petersburg, in 1865, she, being fearful that the bonds would be stolen from her, caused them to be buried,

sealed up in glass jars. They were discovered and stolen, and no trace of them could afterward be found. The Circuit Court of Baltimore City decreed that the company should issue to the former owner of these bonds certificates of indebtedness in lieu of them, and should pay them at maturity, with interest thereon semi-annually, upon his giving security to indemnify the company against loss in the event of the production of the original bonds in the hands of *bona-fide* holders. This decree was affirmed by the Court of Appeals.

MASSACHUSETTS. The total amount of taxable property in the State of Massachusetts is \$2,123,099,579.09. This includes \$1,262,141,092 of real estate, as assessed May 1st; \$537,708,263.86 personal estate, including national-bank shares, as assessed May 1st; \$243,340,642.75 deposits in savings-banks, October 1st; and \$79,909,580.48 corporate property, other than real estate and machinery. The aggregate shows a falling off of \$70,809,505.11 from the amount in 1875.

The amount and character of the public debt of the State, and the changes of the year, are shown in the following statement:

Amount outstanding January 1, 1876.....	\$32,994,464	
Negotiated during the year:		
Worcester Hospital loan.....	\$350,000	
Danvers Hospital loan.....	450,000	
Harbor improvement loan.....	800,000	
		1,100,000
Total.....		\$34,994,464
Paid during the year:		
Union Fund loan of 1861 (final).....		1,434,000
Aggregate funded debt, January 1, 1877.....		\$33,550,464
Classified as follows:		
Railroad loans.....	\$17,768,996	
War loans.....	11,068,183	
Ordinary loans.....	4,713,289	
Net reduction of debt in 1876.....		\$334,000

The loans which mature during the year 1877 are the Norwich & Worcester Railroad loan of \$400,000, a portion of the Union Fund loan amounting to \$400,000, and the last installment of \$50,000 of the Northampton Lunatic Hospital loan. The redemption of these is fully provided for by sinking-funds and otherwise.

The following is a statement of the receipts and expenditures of the Treasury for the year:

Cash on hand January 1, 1876.....	\$5,206,946 71
Transactions during the year:	
Receipts on account of revenue.....	\$6,400,746 78
Receipts on account of funds.....	4,785,075 83
	11,185,523 16
Total.....	\$16,492,771 51
Payments from revenue.....	\$6,101,496 64
Payments on account of funds..	6,761,011 98
	12,862,448 57
Cash on hand at the close of the year.....	\$3,630,323 24

The estimated revenue for the year 1877 is \$4,008,241; estimated expenditure, \$4,771,800. The amount to be raised by State tax to cover the deficiency, and provide for the wants of the Treasury in anticipation of the revenues of 1878, is fixed at \$1,400,000. This is a reduction of about \$1,000,000 from the average of fifteen years.

The railroad system of the State now consists of 1,837 miles of main track and branches, 761 miles of siding, and 626 miles of double track, and represents a total permanent investment of \$110,000,000. There is a mile of railroad to every 4.28 square miles of territory and 900 inhabitants. The net income from the capital invested was 5.6 per cent. for the year. The total earnings were 4.85 per cent. less than in 1875, and 11 per cent. less than in 1873. The railroad commissioners have prepared a uniform system of keeping accounts for all the corporations of the State. The Hoosac Tunnel and the connecting road are at last substantially completed. The total cost of the work is as follows:

Scrip issued to the Troy & Greenfield Railroad Company before possession was taken by the State.....	\$970,680 00
Amount since paid to January 1, 1876, including interest on scrip, less rents, materials sold, etc.....	14,128,230 61
Net payments in 1876.....	2,106,169 12
Total net cost paid to January 1, 1877.....	\$17,200,079 73

There was also due and not paid on the contracts \$121,939.84, making the total cost \$17,322,019.57. The tunnel has been arched with brick. The total length is 25,081 feet, and 20,000,000 bricks have been used in arching. Timber shields have been erected in the central shaft as a protection against falling rocks. It has been found that not the slightest difficulty arises from lack of ventilation. The tunnel line has been during the year under the control of the Governor and Council, who employ a manager and subordinates to carry on its business.

The amount of insurance upon property in the State is \$800,000,000, of which \$450,000,000 is held by home companies, and \$350,000,000 by companies from other States and countries. The annual cash premiums amount to about \$7,000,000, and the amount paid for losses from fire has for three years averaged 45 per cent. of the gross premiums. There are 137 companies from other States and countries doing business in the State, representing a capital of \$50,000,000. The cash capital of home companies is \$8,324,200.

The total amount deposited in savings-banks during the year ending October 31st was \$248,340,732.66, or \$5,491,769.45 more than in the preceding year. The total amount of new deposits was \$49,776,771.03, while \$52,120,524.02 was withdrawn, showing an excess of \$2,343,752.94 of withdrawals over new deposits.

The number of corporations making returns under the general law was 784; total capital, \$148,880,985; total assets, \$244,130,775; total liabilities, including capital paid in, debts, reserves, etc., \$243,814,781.

The militia of the State has been reorganized, and now consists of 850 commissioned officers and 3,412 enlisted men. The organization includes four regiments of eight companies each, three battalions of six companies, two battalions of four companies, and one battalion of

two companies, all infantry; one battalion of two companies and one unattached company of cavalry; and one battalion of two companies and one unattached company of artillery. The expenses of the military department were reduced from \$363,630.90 in 1875 to \$165,718.08 in 1876, a decrease of \$197,912.82.

The public-school fund of the State amounts to \$2,066,866.43. The income from this, distributed among the various cities and towns for the year 1875-'76, was \$83,350.99. The total amount expended throughout the State for educational purposes was nearly \$6,000,000, or \$19.68 for each child between the ages of five and fifteen. The number of children of all ages in the public schools during the year was 305,776. The rate of taxation for school purposes varies in different localities from half a mill to seven and a quarter mills to the dollar, the average being three and a third mills.

SEAL OF THE STATE OF MASSACHUSETTS.

There are 87 penal establishments in the State, including the State-prison, State Workhouse, Houses of Industry, Boston House of Correction, and the county jails. The total number of commitments during the year was 22,550, including 16,700 different persons. The number in confinement on the 1st of October was 4,345. The total aggregate expenditure for these establishments was \$617,577. The number of convicts in the State-prison at Charlestown on the 30th of September was 744, an increase for the year of 55. The income of the prison was \$66,147.22; expenses, \$121,624.37—showing a deficit of \$55,477.15.

The prison for women at Sherborn is to be completed about June, 1877. It will cost \$300,000 for construction, and accommodate 500 inmates. The number of women in the penal institutions of the State on the 1st of October was 821, of whom 81 were in county jails, 231 in houses of correction, 385 in the Boston City Prison, and 174 in the State Workhouse.

The amount already expended on the construction of the new Lunatic Asylum at Danvers is \$1,373,554.97, and it is probable that

the entire cost will be about \$1,800,000. It will accommodate about 500 patients when completed.

The following table shows in concise shape the statistics of the charitable institutions under State management:

INSTITUTIONS.	Average No. of Inmates.	Valuation of Property	Receipts of Year.	Disbursements of Year.
Lunatic Hospital, Worcester	500	\$1,651,710 34	\$428,981 65	\$390,665 16
Lunatic Hospital, Taunton	643	415,268 29	140,286 50	138,675 44
Lunatic Hospital, Northampton	474	874,288 88	100,619 04	95,449 67
Almshouse, Tewksbury	915	872,565 71	98,838 66	98,838 66
Workhouse, Bridgewater	427	218,829 70	47,598 51	47,478 83
Primary School, Monson	515	190,897 42	42,694 11	47,681 03
Reform School, Westborough	848	216,170 03	128,325 63	124,698 94
Industrial School, Lancaster	121	94,154 00	86,917 64	80,649 94
Total	3,968	\$3,523,834 81	\$1,014,849 74	\$971,827 20

Besides these, the following institutions and charities received aid from the State: Massachusetts School for Idiomatic and Feeble-minded Youth, 74 inmates; Massachusetts Charitable Eye and Ear Infirmary, 8,022 patients in the course of the year; Massachusetts Infant Asylum, 48 inmates; Temporary Asylum for Discharged Female Prisoners, 33 inmates; Agencies for Discharged Prisoners; and Disabled Soldiers' Employment Bureau. These are under private management, and maintained in part by private contributions.

The Clarke Institution for Deaf-Mutes at Northampton had 61 different pupils during the year ending September 1st. The receipts and expenditures of the year amounted to \$35,250.09.

The Perkins Institution for the Blind, at South Boston, had 155 inmates October 1st. The receipts for the year were \$64,325.54; expenditures, \$81,036.32.

The annual session of the Legislature began on the 5th of January, and continued till April 28th, occupying 115 days. Two hundred and forty-seven acts and fifty-seven joint resolutions received the approval of the Governor. Two acts were vetoed by the Governor. The President of the Senate was Dr. George B. Loring, of Salem; and the Speaker of the House of Representatives, John D. Long, of Hingham. Most of the legislation of the session was unimportant. Among the acts worthy of mention was one relating to savings-banks. This provides that no person shall be an officer of more than one institution of the kind at the same time. It requires the trustees to hold a meeting at least once in three months to receive the report of the treasurer, and cause a statement to be made showing the condition of the corporation as it appears upon its books. The payment of interest is prohibited upon sums greater than \$1,600 received from any one depositor, unless such depositor shall be a religious or charitable corporation. Investments are restricted to the following classes of securities: 1. Mortgages on real estate situated in the State, in amount not exceeding sixty per cent. of its valuation, and not more than seventy per cent. of the deposits being at any time so invested; 2. The public funds of the New England States, the State of New

York, and the United States, the bonds or notes of any city, county, or town of the State, or the cities of any New England State, and the notes of any citizen of the State, with a pledge of any of these securities at not more than their par value; 3. The first-mortgage bonds of any dividend-paying railroad of the State, not including street-railways, or notes secured by pledge of such bonds at not more than eighty per cent. of their par value; 4. The stock of banks located in the State, or notes secured by a pledge of such stock at not more than eighty per cent. of its par value, provided that no savings-bank shall hold more than one-fourth of the stock of any other banking association, or have more than ten per cent. of its deposits, or more than \$100,000 invested in such stock; 5. Personal securities of citizens of the State, who shall have at least two sureties in each case, provided such loans shall not exceed one-third of the moneys held by the savings-bank or extend over a longer time than one year; and, 6. Ten per cent. of the deposits, but not exceeding \$200,000, may be invested in a site and buildings for its own business. Neither the corporation itself nor any of its officers can borrow of the funds intrusted to it, and no brokerage or commission can be received for negotiating loans. At the time of making each semi-annual dividend not less than one-eighth nor more than one-fourth of one per cent. of the whole amount of the deposits shall be reserved from the profits to constitute a guarantee fund against all losses, until such fund shall amount to five per cent. of the deposits. The income above reasonable expenses and the requirements of the guarantee fund are to be divided among the depositors, but no ordinary dividend can exceed two and a half per cent. for six months, and no dividend can be declared unless the net profits for six months amount to two per cent. of the deposits, except with the written approval of the Commissioners of Savings-Banks. Extra dividends may be made from any accumulated surplus once in three years if it amounts to one per cent. of the profits. No dividend or interest can be paid until authorized by the trustees after an examination showing that the amount to be paid has actually accrued from the net profits of the business. The

treasurer of every savings-bank is required to make a report annually to the commissioners, giving information in detail of its condition and business. Such institutions are also made liable to examination by committees of the Legislature. This act was approved April 27th.

Among the acts of incorporation of the session was one for a "Family Bank." This is a somewhat peculiar institution, combining the purposes of a savings-institution and a life-insurance company. A capital of \$500,000 in shares of \$50 was authorized, semi-annual dividends being restricted to four per cent. All transactions are to be on a "gold basis," no paper or promissory currency being received or paid except at its market value in gold coin. Investments are to be regulated, so far as practicable, by the provisions of the savings-bank act. Policies of life-insurance are issued, but never to extend beyond the age of seventy-five, and always to have a surrender value payable at the end of each and every policy year, ascertained by the "combined experience-table of mortality" at its "legal reserve or net value" at the date of surrender, with four per cent. interest, "less a surrender charge of six per cent. of the present value of the future insurance to be done under the policy if continued." Premiums are to be paid yearly, and their "three elements" kept distinct on the books, viz.: the margin for expenses and excess of loss; the normal cost of the bank's risk; and the "self-insurance deposit," all pre-calculated by the "combined experience" table, with interest at four per cent. Deposits may be made independently of the life-insurance policies, as in ordinary savings-banks. The proceeds of surrender charges are to be credited to a distinct fund to be held in addition to the legal reserve of four per cent. The control of the corporation is vested in the shareholders, but no one person can have more than thirty votes. A dividend not exceeding eight per cent. may be declared yearly out of any surplus that remains after providing for all liabilities, including those of policies; but any profit to the stock over that of its own investment must come from the insurance done by the bank, and not from the interest of the self-insurance fund or independent deposits. Any remaining surplus after the declaration of dividends is to be distributed among the policy-holders according as their premiums and self-insurance deposits have contributed to produce it. Interest on independent deposits is paid as in ordinary savings-banks. The author of this scheme is Elizur Wright.

An act was passed for the relief of the Eastern Railroad Company and the securing of its debts and liabilities, which authorized the company to mortgage all its property to three trustees to be appointed by a Justice of the Supreme Court, and to issue certificates of indebtedness to be exchanged for its existing debts and obligations. These certificates of

indebtedness are to be payable in gold on the 1st of September, 1906, and for the first three years from September 1, 1876, bear interest at the rate of three and a half per cent., for the succeeding three years at the rate of four and a half per cent., and thereafter at the rate of six per cent. in gold. All claims are to be adjusted by the three trustees, with the right on the part of the claimants to have commissioners appointed by the Supreme Court to determine the same; appeal may be made from these commissioners to the courts for the purpose of having the claims determined by a jury. When claims have been adjusted, certificates of indebtedness shall be issued for the amount, to take the place of all other evidences of debt. The stockholders and certificate-holders are to hold separate meetings, but at the same time and place, the former choosing three and the latter six of the nine directors of the corporation. When the amount of the certificates of indebtedness shall have been reduced to \$10,000,000, the power of the holders of the certificates to choose directors shall cease. Any sale of property by the corporation must have the assent of the trustees, and the proceeds may be used for discharging incumbrances on the remaining property. After the expiration of six years, or after liens, mortgages, and incumbrances, shall have been discharged, if at an earlier date, all the proceeds of the sales of property and the annual net earnings of the road are to be paid into a sinking-fund in the hands of the trustees, for the redemption or purchase of certificates of indebtedness, at a rate not exceeding par, until their amount is reduced to \$10,000,000, after which the sinking-fund shall be accumulated and invested to secure the payment of the certificates at maturity. The possession and control of the road are to remain in the corporation until there shall be default in the payment of interest or principal of the certificates of indebtedness, and, in case that occurs, the trustees may take possession. If the default continues for two years, the foreclosure shall be complete, the property vested in the trustees, and all equity of redemption barred. The certificate-holders may then organize themselves into a corporation and exchange their certificates of indebtedness for certificates of stock in the new company.

Three separate acts were passed relating to elections. One of these declares that any person voting or attempting to vote upon any other name than his own, or giving more than one ballot at one time, shall be punished by imprisonment in the House of Correction not less than three months or more than one year, and also provides for the punishment by fine and imprisonment of any person convicted of bribery at an election. Another provides for the preservation of ballots until a disputed election is determined, and their destruction then takes place, and gives to the boards of aldermen in cities authority to examine the re-

turns in case of a disputed election in any ward, and to decide the questions raised, and amend the returns if they find occasion for doing so. The third act relating to elections requires a list of voters to be made out in cities, including all those qualified electors who have been assessed for the year and who have paid their tax of the preceding year, and providing that those who change their residences from one ward to another after the 1st of May shall vote where assessed.

An act was passed for the better protection of life in buildings occupied for public purposes in the city of Boston. This provided for an inspection of such buildings, and gave the inspector authority to require such changes to be made as shall give security against fire and other dangers.

Among the less important acts of the session was one fixing the compensation of members

of the Legislature at \$650 for each session, that of the presiding officers being double the amount; one prohibiting the employment of children under ten years of age in manufacturing, mechanical, and mercantile establishments, and those under fourteen unless attending school at least twenty weeks during the preceding year; one for the suppression of exhibitions of fighting of birds, dogs, and other animals; one to incorporate the new town of Merrimac from a portion of Amesbury; one authorizing the seizure, destruction, or sale, of intoxicating liquors kept for sale contrary to law; one regulating the execution of capital sentences and giving the court authority to fix the time and issue the warrant for execution; and one conferring the veto-power on the mayors of cities.

An amendment to the constitution of the State was proposed by joint resolution of the

VIEW OF BOSTON FROM THE HARBOR.

two Houses, annulling so much of Article II., chapter 6, as relates to persons holding the office of president, professor, or instructor, in Harvard College. The provision referred to prohibits such persons from serving in either branch of the Legislature. The amendment, before taking effect, must receive the approval of the next Legislature, and be ratified by a vote of the people.

Two acts were vetoed by the Governor. One of these was an act confirming the marriage of James Parton and Ellen Willis Eldredge. These persons, when married at Newburyport, held the relations of step-father and step-daughter, and marriage in such cases is prohibited by the laws of the State. The Governor's objection to the bill confirming the marriage was that it was not within the con-

stitutional power of the Legislature to exempt individuals from the operation of a general law. The other act vetoed was an act to regulate the sale of intoxicating liquors. The Governor did not approve of some of the changes which it made in the existing license system, and especially one which removed the condition that holders of licenses should not keep an open bar, and that they should also hold licenses as inn-holders or common victualers.

The political canvass was opened by a convention of Republicans in Boston on the 26th of April, to appoint four delegates at large to the National Convention of the party. The Hon. John E. Sanford presided, and urged a high stand against corruption and extravagance, and in favor of purity and reform. The delegates chosen were E. Rockwood Hoar, Richard

H. Dana, Jr., John M. Forbes, and Paul A. Chadbourne. Resolutions favoring the nomination of B. H. Bristow, and others favoring James G. Blaine, as the candidate for President, were voted down, and the following was unanimously adopted :

Resolved, That this convention leaves the delegates of Massachusetts to the Republican National Convention unpledged and uninstructed in respect of individual candidates for President and Vice-President of the United States ; but expects and requires them each and all to work and vote for those candidates, and those only, whose character and career give unquestionable assurance to the whole country that they will be faithful and zealous to maintain the equal rights of all citizens under the Constitution ; to bring about the resumption of specie payment at a day not later than that already fixed by law, and to effect a thorough and radical reform in the civil service, to the end that the administration of public affairs may be characterized by efficiency, economy, and purity.

The delegates at large to the Democratic National Convention were chosen at the regular State Convention in 1875. The first convention of the year, held for the purpose of making nominations for State officers, was that of the Prohibitionists, which took place in Boston, July 6th. The following ticket was agreed upon : For Governor, John I. Baker, of Beverly ; Lieutenant-Governor, D. C. Eddy, of Boston ; Secretary of State, Henry B. Peirce, of Abington ; Treasurer, H. H. Faxon, of Quincy ; Auditor, Julius L. Clarke, of Newton ; Attorney-General, Thomas L. Wakefield, of Dedham. An address to the people was issued, setting forth the familiar principles and purposes of the party, and the following was adopted as the platform :

1. *Resolved*, That assembled as American citizens for the discharge of important political obligations in this month and year, so fragrant with patriotic and precious memories, it becomes our first duty to reverently acknowledge Him who is the God of nations as well as of individuals, and whose help has been our strength in the years that are past, and is our hope for the years that are to come.

2. *Resolved*, That as obedience is the most acceptable offering of gratitude, this Centennial year should inaugurate a higher and purer political life in the nation and in the State ; and that to this end Christian men everywhere should "vote more nearly as they pray."

3. *Resolved*, That the dram-shop, with all its modifications and disguises, its training-schools and its recruiting-stations, is the foe of civilization, periling every interest of humanity, and antagonizing every uplifting agency, and can have no use or worthy treatment but extermination.

4. *Resolved*, That without disparagement of the national issues presented by the two great political parties, it is a mere truism to say that they either present in matters of State policy no issues whatever, or issues that are utterly trivial in competition with the momentous one of the attitude of the Commonwealth toward the dram-shop.

5. *Resolved*, That although Governor Rice in his inaugural declared in reference to the present license law that "after somewhat diligent inquiry" he had "not been able to obtain full and reliable information respecting its operation and probable effectiveness," and did not apparently obtain, as the session of the Legislature advanced, that "further information from different parts of the State" for which he was

looking as giving him "occasion to communicate again with the Legislature on this subject," yet the Commonwealth cannot safely await the slow process of his Excellency's enlightenment on this subject, since the history of license is a record of more than two hundred years of continuous and confessed failure, and because, as Judge Sprague declared with reference to the liquor-traffic, more than thirty years ago, "The morality of no people can be maintained above the morality of their laws," it has added to this failure the disgrace and disaster of debasing the public sentiment and deadening the public conscience.

6. *Resolved*, That in the Hon. John I. Baker, our candidate for Governor, we present a long-trying friend of our cause, at once a man of the people and a public servant of varied experience and marked ability. Of his colleagues it is enough to say that they are all faithful and true, and worthy to stand by his side.

7. *Resolved*, That while we give to the heroic men who are striving to throw off the chain of intemperance our tenderest sympathy, we owe them what is better, the Christian duty of removing temptation from their path.

8. *Resolved*, That we call on the good people of our Commonwealth, disdaining the idle banners of mere party names in face of a peril so great and a disgrace so deep as a license law inflicts upon us, to protest against its longer tolerance by withholding their votes from those who support it. Words are weak, but votes are strong. Nine thousand independent votes last year startled the politician. Nineteen thousand this year will reverse the policy of the State.

9. *Resolved*, That the Prohibitionists of Massachusetts are now organized not for a campaign merely, but for the war, and we do not purpose to quit the field until we win, or some other party inscribes our principles upon its banner, and gives it into the hands of trustworthy men for support.

10. *Resolved*, That as intemperance is the enemy of the home, it deals its heaviest blows at the heart of woman ; that we therefore invite her earnest prayers and efficient work in behalf of our cause, and we look forward with eager hope for that day to usher in which we pledge all the power we possess when sex shall be no longer one of the conditions of suffrage, and she may be permitted to use the ballot, as she surely will, for her own protection and for the protection of society against the cruel wrongs of the liquor-traffic.

Messrs. Peirce, Clarke, Faxon, and Wakefield declined the nominations tendered to them, because they were opposed to dividing the strength of the Republican party, to which they belonged. The vacancies on the ticket were filled by the Executive Committee, D. B. Gurney, of South Abington, accepting the nomination for Secretary of State ; D. N. Skillings, of Manchester, that of Treasurer ; J. H. Orne, of Marblehead, that of Auditor ; and Orrin T. Gray, of Boston, that of Attorney-General.

The Republican State Convention was held at Worcester, on the 5th of September. Alexander H. Rice was renominated for Governor ; for Lieutenant-Governor, H. G. Knight ; Secretary of State, Henry B. Peirce ; Auditor, Julius L. Clarke ; Treasurer, Charles Endicott ; Attorney-General, Charles R. Train. All the candidates were the incumbents of the offices for which they were named. The platform adopted was as follows :

The Republican party of Massachusetts ratifies the action of the National Convention at Cincinnati, and pledges its united and earnest support to Rutherford

B. Hayes and William A. Wheeler, in the full confidence that they are statesmen "whose character and career give unquestionable assurance to the whole country that they will be faithful and zealous to maintain the equal rights of all citizens under the law, to bring about the resumption of specie payments at a date not later than already fixed by law, and to effect a thorough and radical reform in the civil service."

We are in favor of a prompt return to specie payments and of taking no backward step. We hold that the act of Congress, fixing a date for resumption, is a help and not a hinderance to that end.

We are in favor of putting the civil service on the ground of merit and fitness, and of lifting it above the instability of political fluctuations. We will sustain the President in retaining and selecting with independence and in the spirit of the Constitution the agents of his Administration.

FANEUIL HALL, BOSTON.

We are in favor of a policy toward the States lately in rebellion which shall make the nationality of the United States so distinctly and universally felt that national citizenship shall be to every human being protection in life, liberty, the pursuit of happiness, and the expression of opinion; which shall encourage the education of the people, and which with a firm but wise hand shall restore the South to the blessings of peace and to the enjoyment by all alike of liberty under the law.

The retiring President of the United States is entitled to the gratitude of the country for his achievements in its military service, for the firmness with which, as its Chief Magistrate, he has so often maintained the national honor and credit; and for the good sense with which, upholding the prerogative of his office against the encroachments of a Democratic House of Representatives, he has reminded that branch of the Government of the propriety of confining its attention to its legitimate functions.

The Democratic party has nothing in its record or attitude to command confidence. Having no settled principles or policy, it has inaugurated no reform and has added nothing to the beneficence of government. It truckled to the demands of the slave-power during its supremacy, and cannot be safely entrusted with the fate of the freedmen in whose emancipation it had no sympathy. It bitterly and persistently resisted the adoption of those amendments to the Constitution which have made it the great charter of right, and its profession of acquiescence in them is a change of policy and not of heart. Remembering that, in defiance of good faith, it wantonly repealed the Mis-

souri Compromise at the bidding of the South, and reopened in 1854 the issues it had solemnly declared were settled forever by the Compromise of 1850, we have no faith in its pretended acceptance of any measures essential to the security of freedom and the peace of the republic. It made haste to renew its alliance with those who would have destroyed the republic, and is repeating the perilous experiment of a sectional organization in the South, founded on antagonism of race and color. Its supremacy would again illustrate the system, which it was guilty of inaugurating, of making the civil service a reward for the persistency of partisanship. It is guilty of duplicity in its financial policy, and offers to the prosperity of the country nothing except the prospect of such an interruption in the work of reconstruction, and such an unsettled and hopeless financial policy, as would deprive business and labor of that stability which is the first condition of their revival. Its national candidates, one of them an inflationist, and the other guilty of compromising his convictions to conciliate a class whose heresies he knows would lead to financial chaos, are also the disciples of that ultra school which before the war admitted the right of a State to secede, and since the war denies the power of the nation to protect the lives and rights of its citizens.

We reiterate the declaration of a year ago that the Republican party of Massachusetts will support no man for office whose personal character is not an absolute guarantee of fidelity to every public trust. And while we stand pledged to civil-service reform, a return to a specie basis and the equal rights of all American citizens, we demand as a matter of consistency the nomination of only those candidates who will be true to the fulfillment of that pledge.

While the present depression of business and trade is not wholly controllable by political agencies, we recognize the necessity and pledge the endeavor of every means for their revival—especially the necessity of a wise and not pretentious economy in all national, State, and municipal expenditures. And to this end it is the duty of every congressional, legislative, and ward district to select for its Representatives wise men, who will cooperate in the reduction of expenses, the simplification of taxation, and the prudent husbandry of the public moneys.

We see with gratification in the community a popular moral movement, independent of politics, and earnest in the cause of personal reformation. And we are in favor of such legislation in this Commonwealth as will promote all causes of education, reform, temperance, labor, and equal rights of American citizens irrespective of sex. We frankly differ as to methods, but we believe that these will be best left, subject to constitutional limitations, to the Legislature which is fresh from the people and familiar with their will.

In view of the prudent and intelligent administration of the government of this Commonwealth during the current year, we commend, with entire confidence, to the suffrages of the people, the Hon. Alexander H. Rice as again our candidate for Governor, and with him the other nominees of this convention.

An effort to secure the adoption of a resolution in favor of woman suffrage failed. A State Central Committee, consisting of one member from each senatorial district, was appointed.

The Democratic Convention was held at Worcester, on the day following that of the Republicans, September 6th. Much interest was excited by a preliminary contest between those who favored the nomination of William Gaston for Governor, and those who urged a "new departure" by nominating Charles Francis Adams. The advocates of Mr. Adams

prevailed, and in the convention Mr. Gaston withdrew his name. The ticket was as follows: For Governor, Charles Francis Adams, of Quincy; Lieutenant-Governor, William R. Plunkett, of Pittsfield; Secretary of State, Edwin H. Lothrop, of Springfield; Auditor, John E. Fitzgerald, of Boston; Treasurer, Weston Howland, of Fairhaven; Attorney-General, Richard Olney, of Boston.

The following platform was adopted:

The Democrats of Massachusetts and their compatriots hail with satisfaction the auspicious action of the recent national council at St. Louis. Its declaration of principles, together with the letters of acceptance of its nominees, composes an harmonious and beneficent body of political doctrine which, wisely applied, by the statesmen happily chosen for that great trust, to the existing critical condition of the country, would speedily result in a reinvigoration of our enfeebled industries, a purgation of the corruptions that dishonor the public service, financial soundness and good government, with tranquillity and well-regulated liberty in all parts of the Union. The national honor and credit demand exact justice to all creditors of the Government, the pensioner, the laborer, and the bondholder, and the payment in coin of the debt represented by legal-tender notes, held by the people at large, equally with the bonded debt held by capitalists. After eleven years' experience of Republican neglect and incapacity to formulate and carry out a financial policy for the resumption of specie payments, the people of the country should intrust to the party that never in the history of its power gave sanction to the dishonest system of an inconvertible paper currency the accomplishment of this vital need of our commerce.

To the national House of Representatives the gratitude of the country is especially due for its courageous and largely successful efforts, in spite of the implacable hostility of an improvident Administration and its supporters, to reduce the expenses of Government to a scale adjusted to the economic necessities of a period of unexampled industrial distress, and the requirements of republican simplicity and frugality. Also, for its resolute inquests into official maladministration, whereby gross corruptions have been exposed to popular execration, unfaithful officers expelled in disgrace from the exalted places of authority they defiled, and the honest sentiment of the country aroused to a knowledge of evils and the imperative need of reform. The action of the Democratic House, in the measures that met its sanction, conclusively refutes the absurd charges of a malevolent opposition, and that the Democratic party entertains any feeling or purpose disloyal to the national spirit or to the integrity of the republic, or to the letter or spirit of the Federal Constitution in any of its parts.

We rejoice in the social order, rapidly-reviving prosperity, and established cordial relations between the races, which have followed as the result of the restoration of Democratic control of affairs in the several lately disturbed States. Wherever honest government has gone, violence, disorders, and race-conflicts, have disappeared, and the theatre of outrages upon public order and private right that shock the humane sense and blot our institutions is confined to those narrow limits of the South where Republican misrule still obtains and the ruffian elements of society are left free from the restraints of law enforced by competent authority.

That we hold the position so well expressed by the late Governor Andrew in his valedictory address in 1846: "There ought now to be a *vigorous prosecution of the peace*—just as vigorous as our recent prosecution of the war. We ought to extend our hands with cordial good-will to meet the proffered hands of the South; demanding no attitude of humiliation from any, inflicting no acts of humiliation upon any; re-

specting the feelings of the conquered, notwithstanding the question of right and wrong between the parties belligerent. In this hour of triumph, honor and religion alike forbid one act, one word, of vengeance or resentment. Patriotism and Christianity unite the arguments of earthly welfare and the motive of heavenly inspiration to persuade us to put off all jealousy and all fear, and to move forward as citizens and as men in the work of social and economic reorganization, each one doing with his might whatever his hand findeth to do."

That among the misdeeds of the Republican party not the least conspicuous is the mismanagement of the Freedmen's Savings and Trust Company, chartered by a Republican Congress, without sufficient safeguards to protect the interests of its depositors, which has resulted in the robbery of many thousands of confiding freedmen, and that it is therefore the duty of Congress to take all legal measures to secure to the sufferers full indemnity for their losses.

That the prostration of the industries of this State, the depression in its trade and commerce, are the natural results of the maladministration and misgovernment of the Republican party, and the continuance of that party in power will increase the present deplorable waste of the invested capital of this State, spread the poverty now threatening our laboring-classes, and bring misery, ruin, and ill-health to the hearths of those careful artisans who have heretofore been able to bear up against the hard times under which this State now suffers.

STATE HOUSE, BOSTON.

We view with indignation the supineness of the party in power in neglecting to take measures against the causes of the decline of our commerce and manufactures. We look in vain in the platform of that party for the indications of any comprehensive policy of statesmanship for the emergency. And we see nothing in the qualifications of those nominated by them to national and State leadership that indicates any relief from the consequences of the feeble statesmanship, careless, do-nothing policy, and ring-control, which now paralyze the energies of the country.

That amid the depression of all business among us there is an imperative demand for a reduction of State, county, and municipal expenses in this Commonwealth; the cutting down of salaries to a more reasonable relation to the general profit of industry among the tax-paying citizens, the dispensing with unnecessary offices, the abolishing of sinecures, the suppression of all unnecessary appropriations, and the return from extravagance to simplicity and economy. We view with alarm the rapid increase at

the same time of public taxation and public indebtedness, and desire to awaken the honest instincts of our citizens to limit and restrain the growing evils.

That it is the right and duty of the Commonwealth to protect its industrial interests from the oppression of any system which deprives the laborer of the legitimate fruits of his toil, or of the means of the proper development of his physical and mental powers.

That the elective franchise is a right the exercise of which should not be abridged by the payment of any money price as a condition.

That we pledge our united support to the candidates this day nominated, and we invite all citizens who deplore the present evils to join with us in their support.

That, in presenting to the people of this Commonwealth Charles Francis Adams as candidate for Governor, we make the principles of our platform a reality in practice. The public services and private virtues of this illustrious citizen need no recital here, and we believe his election will but subscribe the interests of the Democratic party in Massachusetts.

Mr. Adams accepted the nomination for Governor in the following letter:

The Hon. W. W. Warren, President Convention of Delegates, &c.

PHILADELPHIA, September 12, 1876.

DEAR SIR: Your letter informing me of my nomination by a convention of voters of Massachusetts opposed to the present administration of national and State affairs, held at Worcester on the 6th inst., has been forwarded to me at this place.

Fully appreciating the honor conferred upon me by the manner as well as the substance of the call so unanimously made upon me, I cannot in principle do otherwise than obey. I never in my life have solicited an office, but when summoned to it I have never dared to refuse. The time for service on my part is fast passing away, but my interest in the prosperity and the honor of the country will cease only with my life. Convinced as I am that the policy of the ruling party will not tend to the eradication of the great evil that prevails, the tendency to corruption in official station; neither will it promote the restoration of internal peace and harmony, a vital object in my opinion to the complete restoration of the country: I can only say that whatever service I may be able to render to the attainment of these ends, however feeble it may be, is entirely at your command.

With great respect,

CHARLES FRANCIS ADAMS.

Mr. Lothrop declined the nomination for Secretary of State, and the name of Weston Howland was substituted on the ticket by the State Central Committee.

A Woman-Suffrage Convention was held in Boston, on the 12th of September, and accepted the ticket of the Prohibitionists. The following address to the people was issued:

The woman-suffragists of Massachusetts, in delegate convention assembled, respectfully submit to the people of the Commonwealth the reasons which compel them for the first time to make independent nominations for State officers.

For many years they have appealed to both the great political parties of the State to rectify the injustice which taxes and governs women without their consent, and which subjects them to cruel legal disabilities as wives, mothers, and widows. But their appeals have been disregarded. The Republican party of Massachusetts, after repeatedly indorsing woman-suffrage in its platform and repudiating it in the Legislature, has just refused to invite Republican women to take part in the nomination of their candidates, and has framed a platform which they declare

has a double meaning on the suffrage issues. The Democratic party of the State has refused to take any action on the subject. The Prohibitory party of the State, on the contrary, has invited women to take part in its primary meetings, with an equal voice and vote in the nomination of candidates and the transaction of business. It has made the establishment of woman-suffrage one of its avowed objects, and has nominated candidates all of whom are suffragists.

State governments have jurisdiction over matters with which the national Government has no concern. We maintain that State officers should be elected upon State issues, independent of national politics. And, whereas woman-suffrage is purely a question of State policy, it is the duty of the woman-suffragists of Massachusetts so to cast their ballots next November as to represent their principles in the choice of State officers.

Believing that "governments are just only when they rest on the consent of the governed," and that the establishment of a truly representative government is vastly more important than the success of Rice or Adams, we commend the nominees of this Woman-Suffrage State Convention to the suffrages of the people, irrespective of party, as the candidates who represent impartial suffrage and equal rights to all.

Resolutions were also adopted as follows;

Whereas, Neither the Republican nor Democratic party cares for the cause of woman-suffrage; whereas, the Republican party, through the chairman of its convention Committee on Resolutions, the Hon. John D. Long, has made the declaration that its resolutions for woman-suffrage meant nothing; and, whereas, the Prohibitory party, national and State, has adopted woman-suffrage as one of its cardinal principles:

Resolved, That we send hearty greeting to the Prohibitionists.

Resolved, That we hereby urge our friends to vote for that long-tried friend of woman-suffrage, the Hon. John I. Baker, for Governor of Massachusetts, and for the other nominees of this convention.

Resolved, That we pledge ourselves as suffragists to vote for no person for Senator or Representative to the General Court who is not fully committed to the suffrage-movement, and that the State Central Committee be instructed to take measures to enable suffragists to carry out the resolution at the polls.

The ticket of the Prohibitionists was also taken up by the Labor-Reformers and the "Greenback party." The latter nominated candidates for presidential electors at a thinly-attended convention in Boston, October 11th.

The election took place on the 7th of November. The total vote for presidential electors was 259,619, of which 150,063 were for the Hayes and Wheeler ticket, 108,777 for Tilden and Hendricks, and 779 scattering: Republican majority, 41,286. The vote for Governor was 256,904, of which Mr. Rice received 137,665, Mr. Adams 106,850, Mr. Baker 12,274, and 115 were scattering. The plurality of Rice over Adams was 30,815; majority over all others, 18,426. The largest Republican vote was 142,210 for Treasurer, and Endicott's majority over Skillings was 27,751. Of the Executive Council chosen, seven were Republicans and one Democrat. Thirteen Representatives to Congress were chosen, all being Republicans except Leopold Morse in the Fourth District. In the Seventh District there were three candidates: Benjamin F. Butler, who

had the regular Republican nomination; John K. Tarbox, Democrat; and E. R. Hoar, who was supported as an Independent candidate by the Republicans opposed to Butler. The vote stood 12,100 for Butler, 9,879 for Tarbox, and 1,955 for Hoar. The Legislature of 1877, chosen at the same time, consists of 33 Republicans in the Senate and 178 in the House, and 7 Democrats in the Senate and 62 in the House, making the Republican majority 26 in the Senate, 116 in the House, and 142 on joint ballot.

MECHANICAL IMPROVEMENTS AND INVENTIONS. The chief problem which enlists the ingenuity of mechanicians at present relates rather to the economy of fuel and its more complete utilization in the steam-engine than to the construction and the adjustment of parts of our motors. Still important improvements in governors and prime movers have lately been introduced; while the fallacy of the rotary engine is coming to be understood, and the question of superheated steam, the question of safety-compartment boilers, and the matter of boiler material, are undergoing liberal and full experimentation. The long experiment made by the Government upon the ship *Gallatin* on the relative merits of simple and compound engines for sea-going purposes have reasonably demonstrated the superiority of the latter. The subject of the utilization of the force of falling water, its application at a distance, and its storage, is not neglected. It is calculated that in the best-constructed furnaces 80 or 85 per cent. of the mechanical effect of the combustion is wasted; and the economization of this enormous loss is the burning question of the age in mechanics. Its solution lies, it is thought, in the intermediation of some further chemical process, or perhaps in the supplementation or substitution of another force-evolving chemical transformation, perhaps in the ready generation and successful domination of electrical force. In the first connection hopes are entertained of the new Lowe water-gas process, which can demonstrably be applied to the generation of heat with a vast saving over the coal-furnace, but only with the evolution of a terribly subtle and deadly gas-poison. Of electrical motors several different forms have been developed, and there is promise of the cheap generation of electricity on a large scale: the mechanical generation of magneto-electricity is the method which most engages the attention of experimentalists. The possibility of conserving and transporting mechanical force by means of compressed air and otherwise is being utilized in various novel ways. In telegraphy the grand invention of the age is the duplex system, described in the last volume. A still more wonderful invention, sound-telegraphy, will vastly increase the utility of the telegraph for rapid correspondence. In railroad-engineering the urgent need of a safety-coupling has impressed itself upon the public mind. A safety-coupling of Belgian invention finds

much approval in England. The American air and automatic brakes of Westinghouse are acquiring full recognition. A new system of automatic telegraphical signaling invented by one of our citizens has been extensively introduced upon our roads, and is heralded as a triumph of ingenuity and utility.

In the founderies of *Terre Noire la Voulte* and *Bessèges*, in France, a process is in use for the conversion of cast-iron, containing phosphoric impurities, into steel. Cast-iron, containing not over .04 per cent. of phosphorus, is smelted in a furnace, of the *Martin-Siemens* construction usually, and refined by metallic oxides, scoria, or salts. When carbon has been eliminated down to an insignificant quantity, 1 to 2½ per cent. of ferro-manganese, containing 50 per cent. or over of manganese, is added. Ferro-silicium may be employed also. The metal obtained by this simple and cheap process contains 1 to 4 per cent. of phosphorus, and some traces of carbon and manganese, and is adapted to most of the uses to which steel is put.

Prof. *Reuleaux*, the director of the *Gewerbe-Academie* of Berlin, and late commissioner to the Centennial Exhibition, has given great attention to theoretical mechanics, and has contributed important considerations for the understanding of the principles of mechanical motions. He shows that the original elements of mechanisms always go in pairs, bodies allowing each other at the same instant one single motion. These pairs of elements are of two orders, the simpler order, like the screw and nut, hook and eye, etc., in which, when one element is fixed, all the points in the other traverse paths of similar geometrical form, and the higher order, in which the points have different but regular and mathematically determinable paths, which often form curves of great beauty. A mechanism is formed of links, or bodies, generally rigid, containing elements of different pairs linked together. The absolute motion obtained in the mechanism depends upon the particular link which is stationary for the time being. The principles of the direct-acting engine, the oscillating engine, the quick-return action, and others, are demonstrated to be the same, and the different forms of the rotary engine are shown to be only modifications of the direct-acting engine, with a considerable loss of force. Prof. *Reuleaux* has formed a collection of some thousand models for the illustration of the principles of mechanics. His apparatus shows how, according to the theorem of *Poinsot*, the relative motion of two bodies may be exemplified by the rolling of two curves upon each other: their point of contact is the momentary centre of the motion, and all the points of each curve are the momentary centres of the motion of corresponding points in the other curve. A number of experimental models, designed by Prof. *Reuleaux*, demonstrate how advantageously fluids, when inclosed in proper vessels,

might be employed in mechanics. He shows that a column of fluid, with valves, is perfectly analogous to a ratchet-gear.

Among the many methods devised of late for propelling street-cars by other power than that of horses, the invention of M. Mékariski, which was put into practical use this last year in Paris, deserves special notice. The motive power is compressed air, which must be supplied from reservoirs at the end of the line, filled by expansive condensing engines, which work compressing pumps with a power of compressing air to a pressure of 25 or 30 atmospheres. The air is heated as used by passing through a column of hot water, which, when injected into the heater, has a temperature of 170° to 180° C., and thus becomes saturated with steam at a high temperature: 70 or 80 litres of water are sufficient for 1,500 litres of air. As the pressure in the reservoirs is not constant in degree, a special apparatus regulates the supply to the cylinders. The mingled air and steam passes from the heater through a clack valve, which closes over the discharge vent, and which is kept open by a certain degree of pressure upon a piston connected with it; and by the discharge the pressure upon the piston is reversed, and a force is exerted upon the valve which tends to close it. The pressure upon the piston is equal to the pressure of the compressed air in the regulator; and the pressure of the air and steam in the cylinders is thus regulated automatically to a certain point. It is, furthermore, regulated by a small plunger, which the driver works with a hand-wheel. The running-gear is similar to that of a locomotive-engine. Air saturated with steam is highly expansive, and allows of a long run with a small quantity of air: about 11 cubic feet of compressed air per mile, at the pressure of 25 atmospheres, has been found sufficient. The steam does not exhaust, but, condensing in the cylinders, restores to the air its latent heat. After each course the reservoirs, of which there are several, situated under the floor of the car and connected by copper pipes, are pumped full of compressed air, and the water in the heater is reheated by steam conducted through a flexible hose. The management of this tram-car is much more perfect than that of a horse-car; the speed may be increased or slackened, the car stopped or reversed, almost instantly, at the will of the driver.

Steam tram-cars upon the model of the ones which were first introduced by the Merryweathers, of London, have been in use in Paris for some time. Their construction is light, and their working safe and economical; but the escape of smoke and steam would be a serious objection in most cities. An engine invented by Mr. Hughes, in England, is noiseless, and the steam is condensed into a tank, which can be emptied after each completed course.

Another new method for driving street-cars has been invented by M. L. Rousseau, of Brus-

sels. The motive agent is compressed water, whose elasticity, by the aid of an hydraulic capstan, or the numerous similar apparatus, or any other mechanism which is employed to convert hydraulic pressure into motion, is brought to bear on the running-gear of the cars. The water under pressure is supplied by a powerful engine to a reservoir connected with a pipe, which is laid under the track for its entire length, with taps at intervals for supplying the cars with the compressed water. The still greater elasticity of air is utilized in connection with the compressed water. Connecting with the cylinders containing the water, either directly or through a piston, is a receiver containing air, which, when the cylinders are charged, has a pressure of 20 to 30 atmospheres. It is the water which comes in contact with the machinery of the car.

The automatic railway-signal, invented by David Rousseau, has been in use for some time on the New York Central road, and has recently been adopted by other railroads in this country. The weight of a train when passing a signal-station is made to act upon an electrical closing-key placed under one of the rails. By a telegraph-wire and an electro-mechanical signal-apparatus the signal at the last station passed is set at "danger;" and upon passing the next station this is restored to "clear," and the next one moved to "danger." Upon single-track lines the system can be applied to blocking ahead as well as in the rear.

George Westinghouse, Jr., inventor of the well-known air-brake which bears his name, has recently developed an instrument by which the speed of a railroad-train at any moment is accurately indicated, and also the diminutions and fluctuations of speed, so that, when experimenting with railroad-brakes, diagrams can be made showing the exact effect of the brake for each instant. The principle of this speed-indicator consists in controlling by the action of centrifugal force the escape of water under pressure. The higher the rate of speed, the greater the pressure exerted upon an escape-valve by certain revolving weights; and the greater the pressure upon the valve, the greater the pressure upon the surface of the chamber by the water detained. This pressure is minutely indicated by a pressure-gauge. This principle is entirely novel in its application, and, although very simple, much study and ingenuity were required to perfect the instrument.

A process of manufacturing car-wheels by twisting a long flat plate of metal about one of its ends upon a mandril, then heating it in a furnace and welding it under pressure, has been patented by Herr Krupp, the Prussian engineer. The skelp is grooved below with a rib above, and is wide at both ends which make the hub and rim of the wheel. The product, apart from the facility of its manufacture, is superior to other sorts of wheels in having the fibres of the metal arranged in the di-

rection of the periphery, instead of radially or tangentially.

A rink of artificial ice for summer skating has been provided by a Mr. Gangee, in England, and has found much favor. The *glaciarium*, as it is called, differs from the other contrivances of its kind principally in the use of glycerine and water as a refrigerating medium instead of brine, which is destructive to metallic surfaces. Iron pipes of rectangular section are imbedded in a concrete bottom, with their upper surface only exposed. The water to be congealed is contained in this concrete trough, and is about two inches deep. The glycerine and water, which remains fluid at a temperature below zero, after passing through the refrigerator is pumped up into a tank from which it flows steadily through the iron pipes and into the refrigerator again. But, before entering the main refrigerator, its temperature is reduced by letting it flow through a worm surrounded by the powdered ice swept from the rink mixed with salt. The refrigerator is an ether-machine, in which a steam-power air-pump exhausts the ether from the refrigerating chamber and forces it into a condenser. The ether is brought into proximity with the glycerine mixture in a copper box with round holes passing through it; the box is surrounded by a wooden tank through which the glycerine mixture is constantly flowing. The ether, as well as the congealing mixture, is in constant motion, passing from the refrigerator into the condenser and back again in a steady flow.

The Lowe water-gas process, in which the difficulties that attended former efforts to obtain illuminating gas by the decomposition of water were sufficiently overcome to give practical value to this method, was first put into successful operation at Phoenixville, Pa., about three years since. Works were built at Utica in 1874, which were afterward destroyed by fire. This year a still larger establishment has gone into operation at Manayunk, near Philadelphia, and others are opening in several large towns of the Northern States and Canada. The Manayunk works produce about 150,000 feet of twenty-candle gas daily, though their capacity is more than double that quantity. The works occupy only a tenth of the space that is required in coal-gas manufacture. The plant consists of three generators ten feet six inches in height, with an internal diameter of forty inches; six superheaters, three to superheat the steam and three to fix the gas, each fifteen feet high with thirty-four inches internal diameter, and condensers, purifiers, etc. The labor of seven men only is employed for the present production, three in the night and four by day. The cost of the gas is, considering its superior quality, something like one-half that of the gas manufactured by the old process. About three gallons of petroleum are consumed in the production of 1,000 cubic feet. The process is very much quicker than the old one. This method

of acquiring a combustible gas, by the action of burning carbon upon superheated steam, easily and cheaply, now sufficiently tested, opens up great possibilities of economical heat as well as light in the future. The problem of the saving of the 80 or 85 per cent. of heat-effect, now wasted in the combustion of fuel in the most perfect heat-generators, seems approaching its solution.

The process of toughening glass consists in cooling it rapidly by plunging it in a bath of grease, after it has been shaped, annealed, and reheated to redness. The effect is to cause a different primary arrangement of the molecular particles; toughened glass is less dense than ordinary glass, and when broken does not present sharp edges. To be successfully toughened it must be reduced to a malleable and pasty consistency, but will lose its shape if too soft. The more rapidly the cooling takes place, the more perfectly the glass is toughened: but too low a temperature will cause the glass to break. The temperature at which the toughening can take place varies according to the composition of the material, and the size and thickness of the article. Crystal made of six parts of sand to two of potash and soda and one of red lead succeeds the best. The temperature of the bath for crystal, in which pure grease is used, may be from 60° to 120° centigrade. For glass grease mixed with oil is used, and the hardening is produced at a temperature of 150° to 300° C. The process described is the one of M. de la Bastie. The other process resembles it in all important particulars. Many improvements have been introduced lately.

Julius Blüthner, of Leipsic, whose piano-forte factory is one of the largest and completest in Europe, has made a study of the technical application of the important principles of acoustics recently discovered, preëminently through the investigations of Helmholtz. He has succeeded in making these scientific discoveries practically available in an instrument which he manufactures under the name of the *aliquot* piano. Among all the important improvements introduced within the last twelve years in the manufacture of this most valuable musical instrument, this of Herr Blüthner will, beyond dispute, take the foremost rank. As the name implies, the aliquot piano renders the quality called timbre in tone, whose nature has been explained by Helmholtz's analysis of musical sounds. The harmonious upper notes detected by Helmholtz, and the so-called combination-tones, into which the lower octave enters, are emphasized in this instrument by the simultaneous vibration, by a mechanical attachment, of their appropriate strings. To successfully accomplish this object, it was necessary to entirely change the construction of the instrument, to change the pedal-arrangement, and to employ seventy-two more strings for pianos of the ordinary size. The difficulties have been so successfully overcome that the new instrument is as easy to tune as the others,

and the action is remarkably easy and elastic. The tone of the instrument is of wonderful quality, as well as its delicious *decrecendo* and remarkable sonority.

Another valuable improvement in the piano has been introduced by Friedrich Ehrbar, of Vienna, by which the player can prolong any note or notes that he pleases, while the other notes struck die away as usual. By this arrangement pieces written for the organ or orchestra can be rendered upon the piano much truer than has been hitherto possible.

A Prussian engineer, G. Hambruch, of Berlin, has been engaged for a couple of years in perfecting a machine for ready-printing, which is superior in some respects to anything invented hitherto in this line. This machine impresses the letters upon a plastic substance, from which stereotype plates can immediately be taken. The formerly invented type-setting machines, amid many imperfections, afforded but a slight saving of time and labor over the manual method of composition. The advantages claimed for this new process are: That any number of different alphabets can be used; that the lines can be made of any length and the pages of any size; that 40,000 characters can be made by it in a day of ten hours; that an electrotype plate can be cast without any intermediate operation; that the considerable fixed capital employed in providing movable type, and the expense of their wear and tear, are reduced to a minimum; that the skill required to work the machine can be acquired in a few days; that different kinds of letters can be employed without trouble in the same work; that the machine takes up less room than a printer's case. With all these perfections, Herr Hambruch's system, as far as he has elaborated it, has one serious defect: it will not allow of corrections and emendations.

An electric pen, invented by Edison, an American, and successfully used in England and this country, consists of a style from whose point a fine needle, connected with a tiny electro-magnetic apparatus attached to the top of the pen, darts back and forth at the rate of 2,000 strokes a minute. When this instrument is carried over the paper in writing, a tracing of fine perforated lines is made. The writing is as easy as though it were a quill-pen. The copy is then employed like a stencil-plate, and any number of copies can be taken by imposing the perforated sheet successively upon other sheets of paper, and passing a roller covered with printer's ink over its surface.

A smoke-consumer invented in England does away with the elaborate apparatus heretofore used. The plan is to bore two holes above the fire-door of the boiler for two pipes going one-third or one-half the way across the top of the furnace. A jet of steam is conducted into these by a small pipe from the boiler. Two strong currents of air, rarefied by the steam, are thus created, which, being driven into the midst of the flame and smoke in the

furnace, precipitate the carbon sufficiently to prevent the issue of offensive clouds of smoke.

A fireman's dress, which enables its wearer to enter a burning building and remain in the hottest fire, has recently attracted considerable attention. It consists of an inner vest of rubber, an outer one of leather, and a metallic helmet. A hose-pipe, attached to the back of the outer garment, divides into two pipes, one which leads up to the top of the helmet and discharges an abundant fine spray downward over the dress, and the other runs under the fireman's arm and ends in a nozzle, which he can turn upon the fire. A small pipe within the hose connects with the inner space between the two garments and conducts compressed air, which serves for respiration, and distends the outer garment and keeps it away from the body. The exhausted air escapes through the small eye-holes of the helmet, driving the smoke and flame away from the eyes, and enabling the fireman to see clearly before him.

A novel fire-extinguishing apparatus has been introduced into the *New York Tribune* Building by a Louisville company. A water-tank hung on pivots so as to be instantaneously invertible upon the raising of a latch-rod, having a connection in every room of the building, is placed in the sub-cellar. The water contains subcarbonate of soda, and in the tank is a jar of sulphuric acid. When the tank is inverted the chemicals combine, producing carbonic acid, and the water is forced out at a pressure of 150 pounds to the square inch. It requires 20 seconds only to raise the water from the sub-cellar to the top of the building, where it is projected with tremendous force from the nozzle of a large hose.

A useful aid to the navigator has been invented by Lieutenant Grandin, of the French Navy. It is an indicator of all the movements of the steering-wheel. An attachment connected with the wheel guides a pencil, which makes a mark upon a ruled roll of paper upon a bobbin which unwinds by clockwork. When the pencil follows the central line on the paper, the ship is on her true course; and when the mark deviates from this line, the helmsman must turn the wheel so as to bring the pencil back to the centre. Not only is the remissness or unskillfulness of the steersman recorded by this instrument, but it serves also as an indicator of the right course, and enables him to bring the vessel about in the right course when she deviates. The machine also keeps a permanent record of the course sailed, and of the direction of the wind, since the corrections made by the helmsman will be most of them owing to the veering of the ship in the wind.

An instrument for deep-sea soundings has been invented by naval Lieutenant Hopfgarten and engineer Arzberger, of Vienna, which sinks to the bottom, registers the depth, and returns to the surface bringing a specimen of the bottom, without being attached to a line. It con-

sists of a kind of aneroid barometer, being a metallic case with compressible sides, which retain the impression of the strongest hydrostatic pressure imparted to them. It descends in a plumb-line course, by means of a weight attached, which disengages itself the instant the bottom is struck, and a float brings it to the surface again. The registration is very exact, being made through the instrumentality of a hydraulic press.

An instrument called the bathometer, which records fine variations of gravitation, is reported to indicate the varying depths of the ocean, in the course of a vessel, with approximate correctness. Dr. Siemens, the well-known English engineer, is the inventor. It consists of a steel tube slightly distended at the extremities, with a movable bottom of thin, flexible steel, and filled with mercury. The outward pressure of the column of mercury upon the diaphragm is compensated for by a spring, which is coiled about the tube. Any increase of pressure on the outside of the tube causes the spring to yield, and the disk at the bottom to rise and lift the column of mercury. A diminution of pressure, on the other hand, allows the mercury by its weight to push the spring outward and sink in the tube. The mercury at the top of the tube rises into a slight mound, or sinks into a hollow, in exactly the same proportion as the disk is contracted or expanded.

The Pattinson process for extracting silver from lead, when not more than three ounces of silver is contained in a ton, by allowing the lead to cool and crystallize in a large vessel, and removing the crystals, has been improved by the Messrs. Cookson, of Howdon, England. The molten metal is agitated by an injected jet of steam, while cold water, poured over the surface, facilitates the crystallization. The melted metal is made to run from one pan into another so as to save labor. The same method can be used in refining hard lead. The cost is only about one-sixth of that by the old method. The wear and tear of the machinery, however, are considerably greater.

A couple of instruments, shown at a *soirée* of the Royal Society by Mr. W. F. Stanley, are contrived to register exactly the average barometric and thermometric changes. They are called the chrono-barometer and chrono-thermometer, and consist of a combination of those instruments with a clock. A clock-movement is fitted with a mercurial barometer or thermometer as a pendulum. The rising and sinking of the mercury alter the centre of gravity, and consequently the rapidity of the stroke. The dial-plate is the same as in an ordinary timepiece. The variations of time, therefore, for a given period are in exact proportion to the mean atmospheric or thermometric changes in the same period.

M. Charles Chamond, of Paris, has succeeded in perfecting an invention made some seven or eight years back for generating electricity

by heat, so that it is now possible to produce electricity cheaply and on a large scale. The principal improvement made in the process is a method of casting the metallic thermo-electric bars in hot moulds, thus preventing the formation of microscopic fissures, which occur in all materials cast in cold moulds, and a method of fastening the metallic plate in the part of the bar exposed to the heat. In the old apparatus the plate became gradually oxidized from contact with the bar of metal or crystallized mineral, and thus became a resistant to the passage of the electrical waves, and the bars also became useless, after a while, from the oxidation which penetrated the minute cracks. The bars are arranged in the new machines usually in a circle. A certain number of elements are superposed, forming a cylinder, the interior of which is to be heated: they are isolated by the interposition of mica or amianthus. Within the pile is a tube of fire-clay, with perforations at intervals. The heating is by means of a Bunsen burner with coal-gas for fuel; but M. Chamond has perfected an arrangement by which coke may be employed for fuel in cases when gas is not available. The bars are also heated by the radiation of the fire-clay tube which remains at a red heat, and by contact with the flame as it rises. Each bar is provided with pole-plates, which are fastened in different positions according to whether it is desired to develop a tension or a quantity current, and according to the degree of tension or the quantity to be produced.

A magneto-electric machine, recently invented by M. Alfred Niaudet Bréguet, is constructed as follows: Twelve coils of wire, similar to those used in the Gramme machine, are inserted in the periphery of a wheel, revolving on an horizontal axis between the poles of two fixed magnets. The coils are connected together, and are thus analogous to the elements of a galvanic battery. According to Lenz's law, each coil in half its revolution is traversed by a direct current, and in its other semi-revolution by an inverse current. Two metallic springs placed in contact with copper strips leading from each pair of coils act as current-collectors. The apparatus may be compared to two batteries of six elements united, in which the elements are connected together for tension. This machine produces a perfectly continuous current.

Experimenters in France and Germany have been occupied of late with the notion of utilizing the heat of the sun as a motive force. M. A. Mouchot constructed an apparatus at Tours which, by ordinary spring weather, raised steam of 80 pounds' pressure within three-quarters of an hour, in a five-gallon boiler, in which the water had an original temperature of 20° C.: the temperature in 40 minutes was 121° C., and afterward it rapidly rose to 158°, and the steam pressure to 75 pounds. At noon of the same day a pressure of 75 pounds was reached in 15 min-

utes, with only 4 gallons of water in the boiler. The apparatus consisted of a mirror so curved as to have a linear focus, a blackened boiler, and a glass envelope about the whole, admitting the rays of light, but preventing the return of the heat-rays. It is not pretended that the effect is powerful enough to originate sufficient mechanical power for practical purposes in the temperate zone, but the inventor is firmly persuaded that in hot climates a motor might be constructed which could be impelled by the direct action of the solar heat.

The practical employment of the electric light in the illumination of large factories has been introduced in France, and is constantly growing in favor. Even on the score of cheapness, where a large space is to be illuminated, this method seems to have the advantage over the other kinds of artificial light. But it has other points of superiority, more important than that of economy: the mechanics can perform their labors by this light as rapidly and easily as in daylight, which no other illumination allows; the danger of fire is entirely avoided; no blackening of the walls and ceilings takes place; and the property possessed by the magnetic light of reflecting the true colors of objects gives it a specially important advantage in some manufacturing processes. The electro-magnetic apparatus of Gramme is employed for generating the light; and a regulator manufactured by Serrin is the one generally used. The carbonic substance used for the production of the voltaic currents is the plumbago-like incrustations which form in gas-retorts. Several such instruments can be put up in a few hours' time; and in two or three days a laborer can learn how to manage the lamps and the machine. No part of the machine can become deranged. Most establishments possess the motive power needed to operate the generating machine; a motive power of 200 kilometres is required to start the operation. Calculations of the cost of the electro-magnetic light prove that a light equal to that of 400 carcel-lamps of ordinary size (equal to the light of 7 times the number of stearine candles, or to that of an equal number of ordinary gas-burners) can be produced at an expense of about 16 cents per hour, while the same degree of illumination could not be furnished by gas, according to Paris prices, at less than 14 times that cost. When only 100 gas-burners are used in a factory the expense is $3\frac{1}{2}$ times greater than that of electric lights of 4 times the illuminating power; while the apparatus required for gas-lighting is much more costly than that needed for this process. The carbonic substance employed in generating this light will probably be more cheaply produced in a short time, or will give place to some cheaper substitute. Before the beginning of this year only two such apparatus were in operation, one in the foundry of Ducommun & Co. in Mulhouse, and one in Gramme's workshop in Paris. Within the last

year the machine has been erected in many extensive factories in France, Russia, Spain, England, Austria, Italy, and in South America. This light is employed in the station of the Northern Railroad at Paris; and upon ships in the French, Russian, and Austrian marine; and one of them was used on the *Polaris* in the late Polar Expedition. In the foundry at Mulhouse a room, 56 by 28 metres, is lighted by 4 Serrin lamps, so well that no shadows are cast, and in every spot of the interior one can see to read as easily as by daylight. This establishment has used this process for two years; the outlay of capital was 12,000 francs, and the expense of illumination 3 francs per hour, including interest. In the weaving-establishment of Pouyer-Quertier, at L'Île-Dieu, in France, a room having a surface to be illuminated of 600 square metres, in which 140 looms are operated, is lighted by 4 of Gramme's machines with 100 burners and 8 lamps, so adjusted that the light comes from below, and is reflected from the ceiling, and the sources are concealed from the operatives. In the Sautter-Lemonnier factory of light-house lamps, at Paris, 3 Gramme machines are employed in the mounting-shop and copper smithy, with 100 burners and 3 lamps. The lamps are constructed upon three different systems: that of Serrin, that of Carré, and that of Duboscq; the one of Serrin's construction is found to be the most reliable and efficient. The surface to be lighted is 1,200 square metres. A large number of machines of different uses are scattered about the room, but by means of cross-lights all interfering shadows are avoided. The light is quite sufficient for all the different mechanical operations here carried on. In the harbor at Salmaize boats carrying beets for the sugar-factory are unloaded in the evening by the employment of the magnetic light as well as by day.

A Russian man of science, M. Jablonskoff, has made an invention by which the electric light can be distributed, and a single current may be divided among several electric burners, though separated from each other by considerable distances. The light produced is greater in volume than by the old method, and the regulators, which have been the most expensive and least durable part of the apparatus, are done away with entirely. His process is to inclose two pencils of carbon, parallel to each other and adjusted at the right distance apart, so that when inverted the current passes from the end of one to the end of the other, in a single cylinder of clay, powdered stone, or the like. Any number of these may be connected with a single battery. As the combustion goes on, the envelope is also consumed, adding to the light. The pencils always remain parallel, and at the same distance apart, so that the use of a regulator is dispensed with.

An American electrician, Mr. W. E. Sawyer, has invented a method of telegraphy by which

a fac-simile reproduction of a letter written at one end of the wire is obtained at the other end, and that in much less time than it takes to transmit a message by the Morse system. A company called the United States Postal Telegraph Company has been organized in New York, for the purpose of putting into practice this important invention. The operation is very simple. The sender writes his dispatch upon ordinary white paper, which, when it is pressed against a metallic plate between two rollers, transfers a copy to the plate. The lines of writing are composed of a non-conducting substance, while the plate is an electrical conductor. An instrument carries metallic points on revolving arms across the plate, and whenever the point passes over a line of writing the electrical connection is broken, and the instrument at the other end makes a dot upon a chemically-prepared piece of paper. At the same time that the points move across the surface the plate is moving horizontally with a slow motion, so that the entire surface is gone over. The receiving-instrument is run in an opposite direction to that of the transmitting one, so that the copy will not be in reverse. The same instruments are used for both sending and receiving dispatches. The time that it takes depends not on the amount of the writing, but upon the size of the copy; in ordinary handwriting about a hundred words a minute can be transmitted. The impression taken by the receiving-instrument is ready for immediate delivery. The message appears traced in dark-blue dotted lines upon white paper. The same system is used in the Signal Service to transmit the weather-maps by telegraphy. The ink which is used on a manuscript to be copied telegraphically is mixed with a little glycerine; ordinary paper is employed. Before the ink is dry some powdered shellac, which is the best non-conductor of electricity, is sprinkled upon it. The plate which receives the writing is a piece of hot zinc, an excellent electrical conductor. The plate of zinc is bent about a cylinder, in the latest instruments, which revolves, while the metallic point that conveys the electrical current is held to its surface by a spring. The paper which receives the message is wound about a similar cylinder, and contains a chemical substance, which decomposes and changes color the moment the point pressed against the zinc cylinder comes to a line of writing. It is necessary that both cylinders should make their revolutions in exactly the same time; and this is accomplished by means of a magnet at the receiving-station, connected with the cylinder at the other end by electricity, which hastens or slackens the motion of its cylinder at every movement of the other.

MEINICKE, KARL EDUARD, an eminent German geographer, born August 31, 1803; died August 25, 1876. He received an appointment on the gymnasium of Prenzlau in 1825, and in 1852 became director of it. His principal

works are: "Das Festland Australien" (3 vols., 1837), "Die Südseevölker und das Christenthum" (1844), "Versuch einer Geschichte der europäischen Colonien in Westindien" (1831), "Beiträge zur Ethnographie Asiens" (1837), "Lehrbuch der Geographie" (second edition, 1845), a "Leitfaden der Geographie" (third edition, 1860) for the lower classes of the gymnasium, and "Die Inseln des Stillen Oceans" (Part I., "Melanesien und Neuseeland," 1875; Part II., "Polynesien und Mikronesien," 1876). He was also the author of the chapter on Australia in Stein's "Handbuch der Geographie" (seventh edition, 1854).

MELLIN, HENRIK, a Swedish novelist and writer, born in Revolax, Finland, April 23, 1803; died August 2, 1876. Having lost both his parents at an early age, he came in his twelfth year to Sweden, into the house of the poet Franzén. He entered the University of Upsala in 1821, and, having graduated, was ordained as a priest in 1829. From this time on he lived in Stockholm until 1851, in which year he went to Norre-Wram, in Schonen, remaining there up to his death. His first literary attempt was the novel "Blommen på Kinnekulle" (third edition, 1831). Among his other early works are the novels "Anna Reibnitz" (second edition, 1833) and "Sivard Kruses Bröllopp" (second edition, 1868), by which he immediately became one of the most popular authors of Sweden. The subject for his larger romances he has taken chiefly from Swedish history. Among them are: "Johannes Fjällmann" (1831-'33), "Flickoma i Askersund" (1832), "Gustaf Brahe" (1832), "Helena Wrede" (1834), "Pawo Nissinen" (second edition, 1838), and "Jacob Casimir de la Gardie" (1849). Among his other numerous novels, the best known are: "Den gamla Grefvinnan," "Den unga Grefvinnan," "Kolarflickan," "Oejungfrun," "Naema," "Prinsessan af Angola," "Fröknarna," "Kolmårds Boerna," and others. A number of these novels are found in his annual publication, *Winterblommor*, which he published in the years 1831 to 1845. A complete edition of his novels appeared in 1866. Among his historical works are: "Kriegen och Statshvälfningerna i våra Dagar" (1849), "Trettioåriga Kriget" (1847-'49), "Oscar I.'s historia" (1844), "Den skandinaviska Nordens historia" (2 vols., 1850-'53), "Fäderlandets historia" (fourth edition, 1852), "Sveriges store män," "Sveriges märkvärdigaste Fruntimmer," and others. These works were exceedingly popular, not so much on account of any particular historical value, but for their popular and clear style.

MERRY, DON FRANCISCO, a Spanish naval officer, born November 6, 1793; died in November, 1876. His father was a resident merchant, of Irish descent, and his mother a lady of noble Andalusian extraction. He entered the British Navy as midshipman, and was present in the Stork frigate at the siege of San

Sebastian, in 1813, for which service he afterward received the naval war-medal. In the Spanish Navy, which he subsequently joined, he rose to the rank of post-captain, and during the revolutionary troubles of 1820-'23 was remarkable for his conservative and royalist opinions. When Ferdinand VII. was arrested by the Cortes and thrown into prison at Cadiz, Don Francisco Merry proposed to run in his ship and carry the King off in triumph to Gibraltar; but the intention became known, through some oversight or folly on the part of the King himself, and Don Francisco, who had gone to Seville to make certain arrangements with reference to the affair, was astounded to read in the revolutionary official journal the entire details of the plot, together with his own name as that of the prime mover. He managed to rejoin his ship in disguise, and when the King reentered Madrid Don Francisco was, on the occasion, created a Knight Commander of the Royal Order of Charles III.

METALS. Resonant Alloys.—Prof. Benjamin Silliman, of Yale College, has devised a method for imparting resonance to pewter, white-metal, britannia, and similar alloys. As now manufactured these alloys are notoriously deficient in resonance, giving when struck only a dull, leaden sound. Whatever degree of resonance or ring the ingots or casts of the alloys may possess is entirely destroyed by the mechanical processes of rolling or lamination, of spinning and striking up, by which means the products of this industry are chiefly brought into the desired forms during their manufacture. Many attempts have been made to impart this desirable quality of resonance to such wares by changing the proportion of their ingredients, and otherwise, but hitherto without success. The new process consists in submitting the manufactured wares to the action of a regulated and well-determined temperature, just short of the melting-point of the alloy, for a brief but measured time. By this simple process all vessels of whatever form or dimension, and all other articles of the class of metallic alloys named, are endowed with the resonance so justly esteemed, but hitherto wanting in these wares.

In applying the invention, a bath or vessel is provided of capacity sufficient to accommodate the largest articles to be treated. It may be made of copper or iron, as may be most convenient, and must be provided with an easily-regulated source of heat, such as is found in a good gas-furnace. This bath may be filled with either paraffin or a heavy mineral oil, freed in manufacture from all the lighter oils of low boiling-point, and capable of withstanding a temperature of at least 500° Fahr. without boiling. The temperature of this bath must be raised to about 220° Cent., or 428° Fahr., and then more gradually to about 230° Cent., or 446° Fahr.—that is, just below the average melting-point of britannia-metal.

In every case it is essential that the expert using this invention should determine, by the thermometer, the exact melting-point of his own alloy, and also its temperature of solidification. These two points being experimentally determined, the bath should be kept within, say, 10° Fahr. of the melting-point of the alloy, and the articles to be treated immersed therein for a brief time, which will vary with their size and weight. For small and rather thin pieces fifteen to thirty seconds is a sufficient time. For larger articles of greater weight, like urns, soup-tureens, etc., the time may be safely extended to a minute or more. Articles thus treated lose part of the density imparted by the mechanical pressure of rolling, etc., but do not become porous like the cast articles. They also acquire a sensibly increased stiffness or temper, enabling them the better to stand rough usage.

New Iron-Making Process.—A new process, the invention of Mr. G. Lowthian Bell, having for its object the production of malleable from pig iron, has been brought to public notice during the past year. The process is carried on in the Bessemer converter, or Martin-Siemens furnace, and consists mainly in taking iron from the converter or the furnace, adding spiegeleisen, and placing it in a puddling-furnace, whence it issues puddled iron. The process is also specially intended to facilitate the working of iron in rotary puddling-furnaces. Crude iron by preference from the blast-furnace is submitted directly to the action of a current of air, by means of the Bessemer converter. The extent to which this operation has to be carried will depend on the quantity of silicon contained in the pig-iron. When this amounts to from 1½ to 2 per cent. five minutes' exposure to a blast of 15 to 20 pounds on the square inch will suffice.

When the metal has been sufficiently blown it is run direct into the rotary puddling-furnace, and puddled. Instead of stopping the blowing operation while the iron contains sufficient carbon for puddling, the blowing may be carried further, and the carbon afterward replaced by adding spiegeleisen or other pure cast-iron rich in carbon.

It often happens that the relative quantities of silicon and phosphorus in pig-iron are such that before the former can be sufficiently oxidized, the carbon it contains is burned off to an extent which interferes with the subsequent operation of puddling. In such a case the iron in the puddling-furnace "comes to nature" before the phosphorus is properly acidified and removed by the oxide of iron always present. When, therefore, it is desired to obtain malleable iron as free as possible from phosphorus it is found useful to prevent the too rapid expulsion of the carbon by blowing into the converter along with the blast carbonaceous matter, such as ground coke, charcoal, or other similar substances; or, as already explained, the carbon may after blowing be replaced by

adding spiegeleisen or other pure cast-iron rich in carbon. On the other hand, where malleable iron of a hard character is required the blast is continued until more or less of the carbon of the pig-iron is expelled, by which means the metal retains more or less phosphorus, which imparts to it the property of hardness, or cold shortness, as it is termed.

Improved Method of welding Copper.—In welding copper the formation of an infusible oxide has hitherto proved one of the worst obstacles to the success of the operation. To surmount this a writer in the *English Mechanic* describes a process by means of which this refractory oxide is converted into a readily-fusible compound, that disappears in the form of slag. Phosphate of soda and ammonia (microcosmic salt) was first tried, and found to answer perfectly; but, being costly, a powder consisting of one part of phosphate of soda and two parts of boracic acid was substituted, with equally satisfactory results. Practical directions for welding copper are given as follows:

This welding-powder should be strewed on the surface of the copper at a red heat; the pieces should then be heated up to a full cherry-red or yellow heat, and brought immediately under the hammer, when they may be as readily welded as iron itself. For instance, it is possible to weld together a small rod of copper which has been broken; the ends should be beveled, laid on one another, seized by a pair of tongs, and placed together with the latter in the fire and heated; the welding-powder should then be strewed on the ends, which, after a further heating, may be welded so soundly as to bend and stretch as if they had never been broken.

It is necessary to carefully observe two things in the course of the operation: 1. The greatest care must be taken that no charcoal or other solid carbon comes in contact with the points to be welded, as otherwise phosphide of copper would be formed, which would cover the surface of the copper and effectually prevent a weld. In this case it is only by careful treatment in an oxidizing fire and plentiful application of the welding-powder that the copper can again be welded. It is, therefore, advisable to heat the copper in flame, as, for instance, a gas-flame. 2. As copper is a much softer metal than iron, it is much softer at the required heat than the latter at its welding-heat, and the parts welded cannot offer any great resistance to the blows of the hammer. They must, therefore, be so shaped as to be enabled to resist such blows as well as may be, and it is also well to use a wooden hammer, which does not exercise so great a force on account of its lightness.

Manganese-Bronze.—Phosphor-bronze is now largely used instead of brass and white-metal for the bearings of heavy machinery. The value of the phosphorus in this alloy consists mainly in its strong affinity for oxygen, whereby it cleanses the metals from the oxides, which otherwise would prevent the perfect combination of the copper and tin. An analogous alloy, with manganese taking the place of the phosphorus, has been invented by P. M. Parsons. This alloy is known as "manganese-bronze," and is formed by incorporating manganese with the various bronze mixtures, with the object of removing any oxide existing in the metal, by reason of the strong affini-

ty of manganese for oxygen. The action of the manganese in the alloy is visible in the texture of the metal, a fracture of which, instead of having a coarse, granular appearance, is as closely and finely grained as the best qualities of steel, while the strength and tenacity of the alloy are greatly increased, as is shown by the results of tests made at the Woolwich Arsenal. These results were as follows:

NO.	TONS PER SQ. INCH.		Ratio of Elastic to Ultimate per cent.	Elongation per cent.
	Yielding.	Breaking.		
1.....	14.0	24.3	57.6	8.25
1a.....	12.6	29.0	43.4	31.80
2.....	14.0	22.1	68.3	5.50
2a.....	18.2	28.8	45.8	35.25
3.....	16.8	23.6	71.1	3.80
3a.....	12.0	30.3	39.6	20.75

Nos. 1, 2, and 3, were cast in iron moulds, and Nos. 1a, 2a, and 3a, were forged from the same castings. No. 3 had slight flaws in it. The hardness increases as the numbers rise, No. 3 being about as hard as our bronze coinage. The sectional area of the test-pieces was .533 square inch, and their length 2 inches.

From this it appears that the first sample showed an ultimate strength equal to good wrought-iron, while it is greatly superior to the best gun-metal, for which sixteen tons per square inch, with an elastic limit of seven tons, are very high strengths. The effect of forging this metal is also very striking, raising as it does the strength to such high limits, and practically giving a new and most valuable metal to the world.

The various applications of this new metal involve many points of interest. Thus it would evidently be of great service as a material for screw-propellers, instead of the gun-metal and brass now used to support the shaft. It might be advantageously employed in the axle-boxes and boiler-tubes of locomotives; in hydraulic-press cylinders and pressure-pumps of all kinds; in bearings or bolts wherever iron and steel cannot be used on account of the corrosion caused by salt-water; but its possible adaptation for the armor-plates of ships-of-war will perhaps attract to this new metal most attention. Supposing the preliminary difficulties in the way of preparing the armor-plates to have been removed, and that we have a plate of the quality marked 2a in the above table, its resisting power will be at least twice that of wrought-iron. Besides, when struck by a projectile, the manganese-bronze plate would not fly in pieces, neither would it crack or split. In order to get through the plate the projectile must fight its way inch by inch. Says a writer in an English technical journal:

Weight for weight, manganese-bronze would probably cost 50 per cent. more than the present rolled-iron plates. But if the resisting power be double that of iron the bronze plates might be half the thickness, in which case we should have the same efficiency, with a reduction of 25 per cent. in the cost of the plate, and a diminution of one-half

in the weight to be carried. If the bronze plate were two-thirds the thickness of the iron plate, the coat would be equivalent, while the resisting power would be greatly in favor of the bronze. If we chose to carry the same weight of bronze that is now sustained in the shape of iron, we should—in accordance with the present hypothesis—double the resisting power of the armor. The great dynamic force of the projectile may interfere with the accuracy of our deductions, although this would seem to be met by the quality of toughness to which we have referred, and the perfect homogeneity of the metal, as illustrated by its symmetrical contraction in diameter when elongated under the breaking-strain.

Assaying Chrome-Iron Ore.—Prof. W. Dittmar's new method of assaying chrome-iron ore differs from other methods chiefly in the mode of disintegration, which in his process is founded upon two facts hitherto unnoticed, viz.: 1. The fact that powdered chrome-ore is easily dissolved, not only, as is known, by fused borax, but also by a ready-made flux obtained by fusing together borax with an excess of alkaline carbonate; and that—2. The mixture thus formed, when kept in a state of fusion in contact with air, readily absorbs oxygen, with conversion of the whole of the chromium into alkaline chromate. The process is as follows:

Two parts of borax-glass are fused together with three parts of the mixture NaKCO_3 in a platinum crucible, until the eliminated carbonic acid is completely expelled, the mass poured into a large platinum basin, allowed to cool, and bottled up for use. To disintegrate an ore, fuse one-half gramme of it with five to six grammes of the flux in a covered crucible over a Bunsen's lamp, and maintain a dull-red heat for about five minutes. Now open the crucible, lay it slantingly on the triangle, and, while maintaining the highest temperature attainable with a Bunsen's lamp, stir up the mixture with a platinum wire until the ore is completely dissolved. This being accomplished, continue heating the fused mass in presence of air for about half to three-quarters of an hour. Then allow to cool, digest the fused mass in water until it is completely disintegrated, heat on a water-bath with addition of a few drops of alcohol (to reduce any manganate that may be present), and, after having evaporated away the alcohol, filter and wash the residue with hot water. The filtrate contains the whole of the chromium as chromate, which is most conveniently determined by an inversion of the well-known process of Penny for the determination of ferrous iron. The form in which the author prefers to execute this titration is to dissolve a known weight of metallic iron in hot dilute sulphuric acid, to cool down the solution as rapidly as possible, to add the previously acidified chromate, and then to titrate back with a standard solution of bichromate of potash.

Prof. Dittmar has applied this process a good many times, and always found it to disintegrate the ore completely in one operation; and when applied repeatedly to identical samples, he found it to give perfectly constant results. He never saw two analyses of the same ore to differ from each other by more than 0.3 in the percentage of oxide of chromium. He has satisfied himself by special experiments that none of the chromium, which is once dissolved, remains unoxidized (i. e., is obtained as chromite instead of chromate), and that the insoluble basic borates obtained in treating the fused mass with water, when dissolved in dilute sulphuric acid, yield a solution which is free from chromium. But this solution invariably contains something else, which, as Prof. Dittmar never saw his crucibles visibly attacked through the fusion-process, he did not

expect to find, namely, a very appreciable quantity of platonic salt. It is on account of this constituent that it is not admissible to simplify the process by dissolving the whole of the fluid mass, *en bloc*, in dilute acid, and applying the titration-process to this solution.

Gallium.—The new metal *gallium*, discovered by Lecoq de Boisbaudran in a blende from Pierrefitte, was first isolated during the past year by its discoverer, and its physical properties determined. Having obtained about ten centigrammes of gallium in the metallic state, M. de Boisbaudran found that the pure metal melts at about the temperature of 29.5°C .; hence it is liquefied when held in the fingers. When once solidified it is hard and resistant, even at temperatures only a little below its melting-point. Melted gallium adheres readily to glass, forming a fine mirror, whiter than that produced by mercury. When heated to bright redness in presence of air, gallium is only oxidized very superficially, and is not volatilized. In the cold it is not sensibly attacked by nitric acid, but with the aid of heat it dissolves, emitting red fumes. The specific gravity of gallium is 4.7 at the temperature of 16°C ., water at the same temperature being 1. A communication from M. de Boisbaudran to the Paris Academy of Sciences contains the following record of observations on liquid gallium:

1. A very small globule, exposed to the open air for more than three weeks, lost neither its liquidity nor its metallic lustre.
2. The metal is deposited upon a negative electrode of platinum as a dead, whitish-gray coating formed of numerous minute globules. It dissolves in the cold in dilute hydrochloric acid with brisk disengagement of hydrogen.
3. The hydrochloric solution of the metal yields a fine spectrum of gallium; along with the zinc-rays more feebly. The latter are less marked than with the solid gallium from the ammoniacal solution.
4. The residue from the limited evaporation of the hydrochloric solution of the liquid metal is neither colored by iodide of potassium, nor by ammonia, nor by hydrosulphate of ammonia. The dry residue from the evaporation was nevertheless sufficient to be distinctly visible. Mercury, therefore, is not present.
5. Liquid gallium, deposited by electrolysis upon a small piece of platinum, was heated to redness, or almost to redness. It adhered and doubtless became alloyed with the platinum, and resisted the action of hydrochloric acid, but it was attacked by weak *agua regia* along with a little of the platinum; the solution showed the rays of gallium. A slight whitish pellicle, insoluble in *agua regia*, was detached from the platinum; this was, perhaps, oxide of gallium rendered insoluble by ignition.

It is the author's opinion that pure gallium is liquid, and that its solidity is caused by the presence of relatively inconsiderable quantities of foreign metals.

The spark-spectrum of gallium gives the two bright lines of wave-length 417 and 403.1; its flame-spectrum only the 417 line, and that faintly.

In a later communication to the same Academy, M. de Boisbaudran thus describes his process of extracting gallium:

The ore, according to its nature, is dissolved in *aqua regia*, hydrochloric or sulphuric acid. The cold liquid is treated with plates of zinc and filtered, when the escape of hydrogen is still considerable. The liquid is then heated with a large excess of zinc. The gelatinous deposit is washed, and redissolved in hydrochloric acid. The new liquid is heated with an excess of zinc, and a second gelatinous precipitate is obtained. Into the hydrochloric solution of this second precipitate formed by zinc a current of sulphureted hydrogen is passed, the liquid is filtered, the excess of sulphureted hydrogen driven off, and it is fractionated with carbonate of soda, ceasing when the ray *Gaa* 417 ceases to be visible with the hydrochloric solution of the precipitate. The oxides of sub-salts are taken up with sulphuric acid; the solution is carefully evaporated until white sulphuric-acid vapors are no longer, or but slightly, given off. It is let cool, and stirred with water, which dissolves the mass after the lapse of a time varying from some hours to a couple of days. The solution of the sulphate almost neutral is diluted with much water, and raised to a boil. The sub-salt of gallium is separated by filtration while hot. This basic salt is dissolved in a little sulphuric acid, and the liquid is mixed with a slight excess of caustic potassa, so as not (?) to dissolve the gallium, but to leave the iron. It is filtered, and the oxide of gallium is precipitated by a prolonged current of carbonic acid. This oxide is redissolved in a minimum of sulphuric acid; a slight excess of acetate of ammonia, feebly acid, is added, and it is then treated with sulphureted hydrogen. Under these conditions the gallium is not precipitated. The acetic liquid is filtered, diluted with water, and raised to a boil. The bulk of the gallium is precipitated and filtered while hot. The mother-liquor, concentrated, and boiled with *aqua regia* in order to destroy ammoniacal salts, is added to the other gallium residues. The precipitate formed on heating the acetic liquid is redissolved in sulphuric acid, a slight excess of caustic potassa is added, and it is then filtered. The potassic solution is electrolyzed. The gallium is easily detached from the sheet of platinum on pressing it between the fingers under warm water. The metal is then immersed for about half an hour in nitric acid at about 60° or 70°, quite free from chlorine, and diluted with an equal volume of water. After washing it may be regarded as pure.

METEOROLOGICAL OBSERVATIONS, INTERNATIONAL. At the Meteorological Congress, held in Vienna in 1873, a proposition was adopted recommending that one complete meteorological observation, at least, be taken simultaneously at as many stations as possible in all countries, and that such records be regularly exchanged between the different national bureaus. The United States Signal-Service Office now interchanges weather-reports with Algeria, Austria, Belgium, Great Britain and her colonies, Denmark, France, Germany, Italy, Netherlands, Norway, Portugal, Russia, Spain, Sweden, Switzerland, Turkey, Greece, Hawaii, and Japan. They are thus capable of constructing weather-charts, which exhibit the conditions of the air and clouds, the direction and force of the winds, and the thermometrical readings over the greater part of the land-surface of the northern hemisphere at a given hour of the day. Such maps and bulletins, giving the same results, have been published this year for the first time. It amounts to an extension of our Signal Service over half the globe. The data furnished

in the reports embrace observations of the atmospheric pressure, temperature, wind, rain-fall, or melted snow, humidity of the air, etc. The hour at which the daily observations are taken is 7.35 A. M. Washington mean time (48 min. P. M. Greenwich time, 53 min. P. M. Paris time). The international observations afford, therefore, the completest materials for the study of that heretofore vague and imperfect science, meteorology. The international exchanges comprise reports from 246 several stations in the eastern and 151 in the western hemisphere. The same class of observations are now regularly taken at the United States naval stations and upon vessels-of-war, and, if other navies will cooperate, synoptic charts of pregnant scientific value may be made of the whole earth's surface. Apart from their scientific importance, the international observations are, as far as they can be communicated by telegraph, of great immediate practical value to agriculture and navigation in all nations.

METHODISTS. I. METHODIST EPISCOPAL CHURCH.—The following is a summary of the statistics of the Methodist Episcopal Church as they are officially given in the "Minutes" of the Annual Conference, published in December, 1876:

CONFERENCES.	Travelling Preachers.	Members.	Probationers.	Total.
Alabama.....	40	4,851	497	4,788
Arkansas.....	89	4,148	666	4,816
Baltimore.....	198	29,838	4,057	33,440

These returns show an increase of 12,768 members and 28,964 probationers. Of the 11,205 traveling preachers reported, 1,158 were on trial, 8,223 in full connection, 701 supernumerary (without appointment), and 1,123 superannuated. The number of local preachers is given as 12,491; number of children baptized during the year, 55,968; of adults baptized, 79,193; number of Sunday-schools, 19,346½; of officers and teachers in the same, 204,964; of Sunday-school scholars, 1,426,946; number of churches, 15,174½; probable value of the same, \$70,886,671; number of parsonages, 5,180½; probable value of the same, \$9,419,510. The following is a statement of the amount of "conference collections," or contributions of the churches for general schemes of benevolence: For conference claimants, \$133,816.58; for the Missionary Society (from churches \$349,425.43, from Sunday-schools \$162,321.07), \$512,157.27; for the Woman's Foreign Missionary Society, \$62,356.08; for church extension, \$58,709.84; for the Tract Society, \$15,672.21; for the Sunday-School Union, 16,050.95; for the Freedmen's Aid Society, \$33,993.12; for education, \$25,860.78; for the American Bible Society, \$12,149.09.

The eleventh anniversary of the *Board of Church Extension* of the Methodist Episcopal Church was held at Wilmington, Del., November 23d, Bishop Simpson presiding. The consolidated report of the corresponding secretary and treasurer showed that the receipts of the board for the ten months of the year 1876, ending October 31st, had been: Balance from the previous year, \$4,016.64; receipts, on general account, \$58,392.51; on loan-fund account, \$27,107.18; total receipts, \$89,516.28. The disbursements had been: on general account, \$57,558.60; on loan-fund account, \$15,750, leaving a balance in the treasury of \$16,207.08.

The anniversary of the *Freedmen's Aid Society* of the Methodist Episcopal Church was held at Pittsburg, Pa., December 10th and 11th. The financial statement for the thirteen months ending July 1, 1876, showed that the total receipts of the Society during that period had been \$58,204.75, and the disbursements had been \$58,031.54. The amount of indebtedness against the Society was \$18,000. The total disbursements during nine years had been \$582,006.90. Sixty teachers had been supported in the field during the year, and more than 3,000 pupils had been taught in the schools, a majority of whom were preparing to preach or to teach. It was estimated that 40,000 children had been taught during the year by persons who had been instructed in the schools of the Society. The Society had aided in the establishment and support of the following institutions: Central Tennessee College, Nashville, Tenn.; Shaw University, Holly Springs, Miss.; Claflin University and Baker Institute, Orangeburg, S. C.; Clark University and Theological Seminary, Atlanta, Ga.; New Orleans University and Thomson Biblical Institute, New Orleans, La.; Wiley University, Marshall, Tex.; Haven Normal School, Waynesboro, Ga.; Rust Biblical and Normal Institute, Huntsville, Ala.; La Tèche Seminary, Baldwin, La.; Bennett Seminary, Greensboro, N. C.; Cookman Institute, Jacksonville, Fla.; Centenary Biblical Institute, Baltimore, Md.; Orphans' Home, Baldwin, La. It had also aided in the support of many common schools. Its school-property in the South was estimated to be worth more than \$200,000, and was considered to constitute a permanent investment for its important work. All of its principal schools had been chartered, and furnished with sufficient grounds and suitable buildings.

The annual meeting of the *General Missionary Committee* of the Methodist Episcopal Church was held in New York City, beginning November 15th. The treasurer reported that the total receipts of the Society from November 1, 1875, to October 31, 1876, had been \$594,188.88, or \$68,297.51 less than the receipts for the previous year. The total liabilities of the Society on the 1st day of November, 1876, were \$262,355.56, showing an increase of \$76,792.72 in indebtedness during the year.

In consequence of the growing indebtedness and the stringency of the times, a considerable reduction was made in the estimates for 1877, from the amount which had been appropriated for 1876. Appropriations for the ensuing year were made as follows. The amounts allotted to foreign countries include additional appropriations for the expense of exchange calculated at twenty per cent. of the amount actually to be expended in maintaining the work:

I. FOREIGN MISSIONS:	
1. Africa (Liberia).....	\$7,000
2. South America ^a	9,000
3. China (three missions, with centres at Fochow, Kiukiang, and Peking).....	89,900
4. Germany and Switzerland.....	24,000
5. Scandinavia.....	45,600
6. India.....	66,000
7. Bulgaria.....	9,600
8. Italy.....	19,200
9. Mexico.....	29,200
10. Japan.....	18,000
Total.....	\$254,900
II. MISSIONS IN UNITED STATES TERRITORIES ADMINISTERED AS FOREIGN MISSIONS:	
Arizona and New Mexico.....	8,000
III. DOMESTIC MISSIONS:	
1. Welsh missions (Northern New York).....	100
2. Scandinavian missions.....	12,820
3. German missions.....	81,100
4. Chinese missions (in California).....	8,500
5. American Indians.....	3,080
6. English-speaking.....	189,600
Total.....	\$194,700
IV. MISCELLANEOUS:	
1. Contingent fund.....	25,000
2. Incidental expenses.....	25,000
3. Office expenses.....	14,000
4. For disseminating missionary information.....	2,000
Total.....	\$66,000
V. FOR THE LIQUIDATION OF THE DEBT.....	125,000
Total of appropriations.....	\$650,000

The amount to be raised was apportioned among the several conferences in the ratio of their ability to contribute, in excess of the amount of the appropriations being estimated at \$668,000.

The following is a summary of the reports of the condition of the mission-fields:-

MISSIONS.	American Missionaries.	Assistant Missionaries, Native and Local Preachers.	Members.	Probationers.
Africa.....	25	54	9,900	944
South America.....	5	4	307	145
Eastern China.....	5	86	1,255	587
Western China.....	5	9	98	37
Northern China.....	5	14	89	41
Germany and Switzerland.....	3	90	7,990	2,264
Denmark.....	1	17	561	127
Norway.....	1	111	2,185	618
Sweden.....	1	119	4,186	1,527
North India.....	21	475	1,281	757
South India.....	22	44	50	447
Bulgaria.....	3	16	774	169
Italy.....	3	24	43	80
Japan.....	3	28	126	890
Mexico.....	3	28	126	890
Total.....	116	1,095	22,119	7,846

The Woman's Foreign Missionary Society had also 1 missionary in Africa, 2 missionaries in

^a The English church in Buenos Ayres is self-supporting.

South America, 8 missionaries connected with the three missions in China, 8 in India, 2 in Japan, 8 in Mexico; in all, 24 missionaries. The total number of native preachers was 246, distributed as follows: In China, 81; in Germany and Switzerland, 51; in Denmark, 7; in Norway, 20; in Sweden, 52; in India, 4; in Bulgaria, 4; in Italy, 15; in Mexico, 12. Number of local preachers and teachers, 782. Total number of churches, 204; probable value of the same, \$1,240,574; number of parsonages, 101; probable value of the same, \$120,819. Amount of collections for missions obtained in the mission-fields, \$5,655.45; amount of other benevolent contributions by the mission-stations, \$61,729.58. Number of Sunday-schools, 715; of scholars in the same, 33,216; of day-schools, 247; of scholars in the same, 9,158.

Missions in the Territories.—In Arizona, 8 missionaries, 46 members, 1 local preacher, 1 church; in New Mexico, 6 missionaries, 178 members, 28 probationers, 6 local preachers, 5 churches, 5 parsonages: total, 9 missionaries, 219 members, 28 probationers, 7 local preachers, 6 churches with \$15,500, 5 parsonages, 15 Sunday-schools with 344 scholars, 5 day-schools with 156 scholars; missionary and benevolent collections, \$94.65.

DOMESTIC MISSIONS TO FOREIGN POPULATIONS IN THE UNITED STATES.

MISSIONS.	Missionaries.	Members.	Probationers.	Local Preachers.
Welsh.....	1	60	6	8
German.....	198	44,465	6,466	568
Scandinavian.....	70	5,190	646	68
Chinese.....	1	88	10	2
American Indian.....	11	604	244	6
Total.....	281	50,447	7,872	643

Number of churches, 836; probable value of the same, \$2,861,662; number of parsonages, 387; probable value of the same, \$480,350; amount of contributions to missions, \$28,301.

SUMMARY OF MISSIONARIES.

Foreign missionaries and assistants.....	207
Native preachers.....	246
Local preachers, exhorters, and teachers.....	782
Missionaries and assistants in the Territories.....	16
Missionaries to foreign populations in the United States.....	2-1
Domestic missionaries.....	2,268

Total number of missionaries..... 3,790

The printing-house of the Methodist Episcopal Mission in India was established at Bareilly in 1860, and was removed to Lucknow in 1866. Four presses are employed in printing publications in the English, Urdu, and Hindi languages. The catalogue of books in the vernacular languages contains about one hundred titles of works, of which more than half are in lithographed Urdu, and the remainder in Hindi and Roman Urdu. A weekly paper, the *Christian Star*, is published in Roman Urdu; a fortnightly paper, the *Sun*, in lithographed Urdu; and a weekly paper of general news

for general circulation, the *Lucknow Witness*, in English. The establishment publishes "Lesson Leaves" for Sunday-school classes, in English, Hindi, and Urdu; and a Sunday-school paper, the *Children's Friend*, in both the vernaculars. The number of pages of Christian literature published from this establishment in 1875 was 3,969,000, and it was estimated that at least 20,000,000 pages had been issued in ten years.

The Board of Church Extension reported to the General Conference that their total net receipts from their organization had been: on general account, \$709,541.33; on the loan-fund (to be used only by loans), \$250,432; total, \$959,973.33. The total expenses of administration had been \$113,255.91.

The Sunday-School Union made report to the General Conference: 19,106 schools, 206,613 officers and teachers, and 1,398,781 scholars, showing a large increase in all departments. The circulation of the periodicals was: *Sunday-School Journal*, 60,000 copies; *Picture-Lesson Paper*, 119,000 copies; *Berean Lesson Leaf*, 1,200,000 copies; *Sunday-School Advocate*, 337,000 copies; *Lesson Compend*, 8,000 copies. During four years there had been issued under the auspices of the Sunday-school department a total of 2,530,246 bound volumes.

The report of the Book Concern in New York, made to the General Conference, showed that its capital stock had increased from \$794,175.17 in June, 1872, to \$1,013,687.29 in June, 1875, making the amount of the profits of three years of business \$219,512.12. The accounts for 1876 were not yet made up. The sales of the Concern for the four years ending November 30, 1875, amounted to \$3,215,612.57. During the same period, the Concern had paid: on the salaries of bishops, \$134,600; on the salaries of editors, \$65,669.91; on the account of the book-agents, \$36,000; on the account of assistant editors, \$30,311; on General Conference appropriations, \$15,576.50. Seventy-eight books had been published on the general catalogue, 178 Sunday-school books, and 426 tracts. Connected with the Book Concern at New York are depositories at Boston, Buffalo, Pittsburg, and San Francisco.

The agents of the Western Book Concern (at Cincinnati) reported to the General Conference that their total assets were \$986,749.16, and their total liabilities \$486,463.48, showing the Concern to possess a net capital on the 30th of November, 1875, of \$500,285.73, against \$422,599.68. The aggregate sales of books and periodicals during the four years had amounted to \$2,830,096.67. A question was raised in the General Conference as to the financial soundness of the Concern. The case was carefully examined by a committee appointed especially for the purpose, and the Concern was found to have an ample margin of available property after providing for all of its obligations.

The meeting of the General Executive Com-

mittee of the Woman's Foreign Missionary Society was held in Washington, D. C., May 10th. It was reported that the amount of collections in the several branches during the year had been \$76,787.72. There were now 1,952 auxiliary societies, with 50,000 annual and 1,746 permanent members.

The seventeenth *Delegated General Conference* of the Methodist Episcopal Church met in Baltimore, Md., May 1st. The sessions were presided over by the twelve bishops sitting in alternation. The bishops presented their quadrennial address, which reviewed the progress of the Church during the four years since the last preceding General Conference. Five new annual conferences had been formed. One of the bishops, Bishop Harris, had visited the missions in Japan, China, India, Turkey, Italy, Switzerland, Germany, Denmark, Sweden, and Norway, making the tour of the globe in his journey. The missions in Europe had been visited by two other bishops in 1873 and 1875, thus receiving direct episcopal supervision during three of the four years. Two episcopal visits had been made to Mexico, and one to the missions in South America. Circumstances had prevented a visitation of the churches in Liberia. New charters had been procured for the Missionary, Sunday-School and Tract, and Church Extension Societies. A commission had been appointed to prepare a code of ecclesiastical jurisprudence and procedure. A legal adviser for the Board of Church Extension had been appointed in each State and Territory. A large growth was reported in the leading interests of the Church. In pursuance of a resolution of the preceding General Conference, the bishops also presented a commemorative address, appropriate to the celebration of the Centennial year of American Independence. It urged the churches to carry out the recommendations of the General Conference relative to the observance of the year by procuring contributions and gifts for the advancement of education. The conference repeated the recommendation.

A movement was made toward calling an Ecumenical Council of Methodism. Resolutions were adopted on this subject, providing that the bishops "appoint a commission of nine persons, consisting of two of their own number, four other ministers, and three laymen, who shall take this whole subject into consideration, correspond with the different Methodist bodies in this country, and in every other country, and endeavor to arrange for a General Council of Methodism, at such time and place as may be judged most advisable, to consider topics relating to the position, work, and responsibility of Methodism for the world's evangelization." This commission was empowered to represent and speak for the Methodist Episcopal Church in the United States, and was directed to make a full report of its proceedings to the General Conference of 1880.

Fraternal delegates were received from the

General Conference of the Methodist Episcopal Church South, for the first time since the separation of the two churches in 1844. The establishment of fraternal relations between these two churches had been the subject of long and painful effort. The circumstances of the separation were originally unpleasant: differences upon the slavery question prevented reconciliation while slavery existed, and the events of the civil war and the remembrance of them afterward have operated to make the division wider. The first successful step toward fraternity was made by the Northern General Conference of 1872. It appointed a delegation to visit the General Conference of the Church South, in 1874. This delegation made a happy impression on that body, and were received with unexpected favor. The Southern General Conference appointed a delegation to visit the present body. It included the Rev. Dr. Lovick Pierce, the oldest minister of the Church South, and an active participant in the discussions which accompanied the separation; the Rev. James A. Duncan, D. D., President of Randolph-Macon College, and L. C. Garland, LL. D., Chancellor of the Vanderbilt University. Dr. Pierce was represented by letter. Drs. Duncan and Garland attended in person, and addressed the conference. In order to remove all obstacles to formal fraternity between the two churches, a commission consisting of three ministers and two laymen was appointed to meet a similar commission, already appointed in behalf of the Church South, to adjust all existing differences. Besides the customary delegations from other Methodist Churches in the United States, Canada, and Great Britain, fraternal delegates were received from the African Methodist Episcopal Church, and an address from the Colored Methodist Episcopal Church. A fraternal delegate was ordered sent to the Wesleyan Methodist Church in America, which had not heretofore been in correspondence with the General Conference; and a commission of six ministers and six laymen was appointed for the purpose of conferring with other Methodist Churches concerning questions of fraternity and union. Numerous propositions were made to the General Conference relative to changes in the character of the office of presiding elder, particularly seeking to limit the number of presiding elders, and to provide for their election by the annual conferences, instead of being appointed by the bishops, as had always been the rule. The conference refused to recommend a change of the discipline so as to allow of the election of presiding elders. It, however, provided for taking the sense of the Church through the annual conferences upon a proposition to give the annual conferences authority to determine how many presiding elders' districts should be formed, "provided no conference should have less than two nor more than eight" districts, nor any district more than sixty charges.

A resolution was adopted declaring that the conference considered the introduction of lay delegation into the several annual conferences as a question of very great importance, and that the interest it had awakened entitled it to serious consideration; and directing the appointment of a committee of five ministers and five laymen to consider the propriety of it, and, if they deem it expedient, report a plan.

The committee appointed in pursuance of the order of the previous General Conference to prepare a code of ecclesiastical jurisprudence and procedure, had completed their work and presented their report. The conference found it impossible to complete the consideration of it satisfactorily this session, and ordered it referred to another commission to consider it, and report it or some other code to the next General Conference. Provision was made contingently for the division of conferences into two or more conferences, embracing, in whole or in part, the same territory, so as to include the white and colored members in separate conferences, whenever such division should be requested by a majority of the white members and also a majority of the colored members of any annual conference. But it was declared that such division should not be made where the general desire of the conference is against it, where it is not clearly seen that the state of the work would be improved by it, or where the interests and usefulness of even a minority might be damaged or imperiled by it. The Georgia and Alabama Conferences, having requested it, were divided in accordance with this action.

A change in the basis of representation in the General Conference was proposed to the Annual Conferences, so as to permit it to be constituted of one delegate for every ninety-nine ministers, instead of one for every forty-five, as now, and two lay delegates from each Annual Conference.

The bishops were authorized to organize the Foochow Conference in China; the North India Conference, and the South India Conference, out of the India Conference; the Conference of Sweden, the Conference of Norway, and a conference in India. Provision was made for two visitations by the bishops during the ensuing quadrennium to the missions in Europe, India, Japan, and China. A visit by one of the bishops to Liberia during the next four years was also recommended, with a view partly to the extension of the missions into the interior.

A revision of the hymn-book was ordered. The Board of Education were instructed to give special attention to the educational wants of the people of the South. The amount apportioned to each pastoral charge to be raised for the support of the bishops was made a *pro rata* claim with that of the stationed preachers and presiding elders. Resolutions were adopted approving the course of the Centennial Commissioners in closing the exhibi-

tion at Philadelphia on Sundays, and deprecating any change in their decision; also resolutions protesting against the concession by the commissioners of the right to sell intoxicating drinks on the Centennial grounds. A resolution was adopted in favor of legal prohibition of the sale of intoxicating drinks, and advising abstinence from the use of tobacco.

II. METHODIST EPISCOPAL CHURCH, SOUTH.—This Church has had a vigorous growth since the end of the civil war. It has exhibited energy in the establishment and maintenance of

foreign missions, and in building up institutions of learning. Vanderbilt University, at Nashville, Tenn., to which the late Cornelius Vanderbilt, of New York, gave \$1,000,000, is among the most liberally endowed colleges in the South. The colored members of the Church, who in 1869 numbered 19,686, have been transferred, by agreement, to the Colored Methodist Episcopal Church. The following are the statistics of the Methodist Episcopal Church, South, as published officially in August, 1876:

CONFERENCES.	Traveling Preachers.	Local Preachers.	White Members.	Colored Members.	Indian Members.	Total Preachers and Members.
1. Baltimore	173	108	25,165	99	25,545
2. Virginia	166	189	48,183	218	48,765
3. West Virginia	59	138	12,991	24	13,208
4. Holston	161	294	85,087	140	176	85,568
5. North Carolina	146	221	58,750	421	59,592
6. South Carolina	149	186	40,382	421	41,109
7. North Georgia	170	425	58,520	68	59,204
8. South Georgia	109	221	29,204	29,628
9. Florida	51	97	8,705	20	8,831
10. Alabama	120	210	28,975	64	29,279
11. North Alabama	119	822	81,680	16	82,145

China Mission	6	101	107
Mexican Mission	68	83
Brazilian Mission	83	83
Bishops	3	3
Total in 1875	3,271	5,462	715,951	2,088	4,895	731,361
Total in 1874	3,224	5,366	696,764	2,688	4,497	712,765
Increase	47	106	19,187	18,596
Decrease	580	162

The number of superannuated preachers was given at 259; number of infants baptized, 22,603; number of adults baptized, 88,908; number of Sunday-schools, 7,573; number of teachers in the same, 49,797; number of Sunday-school scholars, 346,759; total amount of collections for conference claimants, \$64,326.18; total amount of collections for missions, \$120,128.31.

The annual meeting of the Board of Missions of the Methodist Episcopal Church South was held at Nashville, Tenn., May 4th and 5th. The reports of the secretaries showed considerable advance in the collections for missions, and in the general condition of the cause.

The amount of assessments on conferences

for contributions for the support of the missions during the ensuing year were fixed at \$100,000. Appropriations to the different missionary fields were made as follows: To the Chinese mission, \$8,650; to the border Mexican mission, \$6,040; to the mission in the city of Mexico, \$10,578.48; to the Indian Mission Conference, \$10,000; to the German Mission Conference, \$4,500; to work within the bounds of the conferences, \$26,200; for contingent and miscellaneous expenses, \$8,000: total, \$78,968.48.

It was understood that one of the bishops would visit China during the next spring.

The condition of the mission-fields is shown in the following table:

MISSIONS.	Number of Missionaries.	Native Helpers.	Members.	S. S. Scholars.	Money expended.
China.....	8	10	101	67	\$7,500
City of Mexico.....	1	3	83	60	7,800

Grand total.....	377	18	44,505	20,131	\$112,575 19

The commissioners appointed by the General Conference of the Methodist Episcopal Church, and by the General Conference of the Methodist Episcopal Church South, to remove all obstacles to formal fraternity, and to adjust all existing differences between the two churches, met at Cape May, N. J., August 16, 1876. All of the members of both Boards of Commissioners were present, as follows: M. D'C. Crawford, Enoch L. Fancher, Erasmus Q. Fuller, Clinton B. Fisk, John P. Newman, Commissioners of the Methodist Episcopal Church; and Edward H. Myers, Robert K. Hargrove, Thomas M. Finney, David Clopton, Robert B. Vance, Commissioners of the Methodist Episcopal Church South. The result of their deliberations, and the conclusions to which they arrived, were given to the public in the form of an open address to the bishops, ministers, and members of the two churches, the material points of which are as follows:

After a written communication from the Commissioners of the Methodist Episcopal Church South was received and answered by the Commissioners of the Methodist Episcopal Church, both boards met in joint session, the labors of which were continued during seven days.

We have had a full and free conference and interchange of views respecting the important matters that claimed our united consideration.

If any in the churches entertained the fear, previous to our meeting, that we could not attain complete harmony of sentiment touching the momentous questions to be determined, they will be rejoiced to learn that, having given due attention to all questions involved in the proper construction of a platform of complete fraternity between the two great branches of Episcopal Methodism in the United States, we have arrived at the settlement of every matter affecting, as we suppose, the principles of a lasting and cordial adjustment.

We have the satisfaction to declare that our aspirations for harmony of views on vital points have been realized. By divine guidance, as we trust, we have been able, after a frank interchange of views, and prayerful endeavor, to harmonize all differences, and to arrive at the desired consummation of a unanimous agreement of complete fraternity. We believe that no principle of honor on either side has been invaded. We struck the key-note of brotherly love till it sounded high and clear, and so have been enabled to reach the elements of perfect harmony. No divergence of sentiment mars the complete unanimity of the joint commission touching the essential principles of fraternization.

At the beginning of our consultations one great question seemed to overshadow all others. It concerns the relation of the two churches to each other and to Episcopal Methodism. To this important

matter our most earnest thought and prayerful deliberation were first directed, and the result attained occasioned the interchange of rejoicing congratulations between the members of the joint commission.

We adopted without a dissentient voice the following declaration and basis of fraternity:

As to the status of the Methodist Episcopal Church, and of the Methodist Episcopal Church South, and their coordinate relation as legitimate branches of Episcopal Methodism, each of said churches is a legitimate branch of Episcopal Methodism in the United States, having a common origin in the Methodist Episcopal Church organized in 1784; and since the organization of the Methodist Episcopal Church South was consummated in 1845, by the voluntary exercise of the right of the Southern Annual Conferences, ministers, and members, to adhere to that communion, it has been an evangelical church, reared on Scriptural foundations, and her ministers and members, with those of the Methodist Episcopal Church, have constituted one Methodist family, though in distinct ecclesiastical connections.

It was next incumbent on us to consider the question concerning conflicting claims to church property, and some special cases that could not conveniently be referred to the operation of a general rule.

There were two principal questions to be considered with regard to the church property in dispute between local societies of the two churches:

1. As to the legal ownership of said property.
2. As to whether it will consist with strict equity or promote Christian harmony, or the cause of religion, to dispossess those societies now using church property which was originally intended for their use and occupancy, and of which they have acquired possession, though they may have lost legal title to it by their transfer from the one church to the other.

We have considered the papers in all cases that have been brought to our notice. These arose from the following States: Virginia, West Virginia, Maryland, Tennessee, Louisiana, North Carolina, and South Carolina. In respect to some of these cases we have given particular directions; but for all other cases the Joint Commission unanimously adopted the following

RULES FOR THE ADJUSTMENT OF ADVERSE CLAIMS TO CHURCH PROPERTY.

RULE 1. In cases not adjudicated by the Joint Commission, any society of either church, constituted according to its discipline, now occupying the church property, shall remain in possession thereof; provided, that where there is now, in the same place, a society of more members attached to the other church, and which has hitherto claimed the use of the property, the latter shall be entitled to possession.

RULE 2. Forasmuch as we have no power to annul decisions respecting church property made by the State courts, the Joint Commission ordain in respect thereof:

- (1.) In cases where such a decision has been made, or in which there exists an agreement, the same shall be carried out in good faith.

(2.) In communities where there are two societies, one belonging to the Methodist Episcopal Church, and the other to the Methodist Episcopal Church South, which have adversely claimed the church property, it is recommended that, without delay, they amicably compose their differences irrespective of the strict legal title, and settle according to Christian principles the equities of the particular case, and, so far as practicable, according to the principle of the foregoing rule.

But if such settlement cannot be speedily made, then the question shall be referred for equitable decision to three arbitrators, one to be chosen by each claimant from their respective societies, and the two thus chosen shall select a third person not connected with either of the said churches; and the decision of any two of them shall be final.

(3.) In communities in which there is but one society, Rule 1 shall be faithfully observed in the interest of peace and fraternity.

RULE 3. Whenever necessary to carry the foregoing rules into effect, the legal title to the church property shall be accordingly transferred.

RULE 4. These rules shall take effect immediately.

In order to further promote the peaceful results contemplated by this Joint Commission, and to remove as far as may be all occasion, and especially to forestall all further occasion for hostility between the two churches, we recommend to members of both, as a wise rule of settlement where property is in contest, and one or both are weak, that they compose their differences by uniting in the same communion; and in all cases, that the ministers and members recognize each other, in all relations of fraternity, and as possessed of ecclesiastical rights and privileges of equal dignity and validity. They should each receive from the other ministers and members in good standing with the same alacrity and credit as if coming from their own church, and, without interference with each other's institutions or missions, they should nevertheless cooperate in all Christian enterprises.

It is not to be supposed in respect of some matters of mere opinion that all ministers and members in either church will be in accord; but we trust and believe that a spirit of fellowship and mutual regard will pervade the reconciled ranks of the entire ministry and membership of both churches. We believe, also, that their allegiance to the cause of the great Master will triumph over all variation of personal sentiments, and will so exalt the claims of brotherly affection that from this auspicious hour a new epoch in Methodism will begin its brighter history, so that we shall know no unfraternal Methodism in the United States, or even in this wide world. To all we commend the wise counsels given in 1820 to missionaries and members of the Methodist Episcopal Church and of the Wesleyan Connection in the Canadas by Bishop McKendree and the Wesleyan committee—namely: "Feel that you are one with your brethren, embarked in the same great cause, and eminently of the same religious family, and if any warm spirits rise up and trouble you, remember that you are to act on the principles now sanctioned and avowed by the two connections, and not upon local prejudices."

III. METHODIST PROTESTANT CHURCH.—The Maryland Annual Conference of the Methodist Protestant Church of 1876 invited the other conferences of that Church to join with it in a call for a convention of the Church to meet in Baltimore, Md., on the second Friday in May, 1877, to consider certain amendments to the constitution of the Church suggested by it. On the 21st of December, twenty annual conferences had voted upon the call, of which sixteen conferences voted in favor of the con-

vention and four conferences against it. All the conferences voting in the negative, however, complied with the call to the extent of electing full delegations to the convention. More than the requisite number of conferences having united in the call, the convention has been definitely appointed.

IV. AFRICAN METHODIST EPISCOPAL CHURCH.—The *Christian Recorder*, the official newspaper of that Church, gave in March, 1876, the following summary of the statistics of the African Methodist Episcopal Church in the United States: Conferences, 25; church-schools, 2; publishing-house, 1; paper, 1; bishops, 6; preachers, 1,334; local preachers, 2,664; exhorters, 2,158; members, 172,292; probationers, 28,889; churches, 1,642; estimated value of the same, \$3,129,196; parsonages, 134; estimated value of the same (partial), \$34,885; Sunday-schools, 1,974; superintendents, 1,646; teachers, 6,625; scholars, 98,008; volumes in Sunday-school libraries, 135,691; contingent money for 1875, \$2,902.28; dollar-money, \$21,789.98; presiding elder's support, \$283,072.38; Sunday-school money, \$16,537.11; missionary-money, \$3,748.97; church-building, \$149,364.59; traveling expenses, \$7,368.43; total members, probationers, and preachers, 206,730; total of moneys raised for the year, \$507,395.55.

The sixteenth *General Conference* of the African Methodist Episcopal Church met at Atlanta, Ga., May 1st. The six bishops of the Church presided in alternation. The quadrennial episcopal address began with a mention of the death of the senior bishop, the Rev. William Paul Quinn, which had occurred since the adjournment of the previous General Conference. It spoke of the increase in the number of young men who were preparing for the ministry, several of whom were supported by the Church at Wilberforce University, and one at Oberlin. The Wilberforce University, at Xenia, Ohio, had done a good work, and in that respect, the bishops said, if the institution were now closed, its history would be recorded a success. But the institution was laboring under financial embarrassment, from which it depended upon the members of the African, not of other churches, to relieve it. Attention was also called by the bishops to the following other institutions of the Church: Payne Institute, Cokesbury, S. C.; Campbell Institute, Hagerstown, Md.; the school at Baton Rouge, La.; the school at Austin, Texas; and Brown's University in Florida. The management of the Book Concern during the quadrennium had been wise. Its debts were nearly canceled, and its character and business were greatly improved. The *Christian Recorder*, the newspaper of the Church, had been enlarged and improved, and was prepared entirely by colored men. The management of the financial department of the Church had been attended with great success. A Parent Home Missionary Society had been organized thirty two years before, and auxiliaries formed,

but as yet nothing had been accomplished by them. A Mite Missionary Society, composed of women of the Church, as yet scarcely in its third year, had commanded great attention and promised much success.

The financial secretary reported that his receipts for the four years ending in April, 1876, had been \$95,553.93, and his expenditures during the same period \$94,472.02, leaving a balance on hand of \$1,081.91.

A delegation was received from the British Methodist Episcopal Church in Canada, also an organization of colored people. It presented a fraternal letter, in which the Church was represented as being in a prosperous condition, financially and spiritually. The Ontario and Nova Scotia Conferences reported increase in the number of itinerant ministers. An extensive revival of religion had visited the churches in Bermuda. The Rev. Willis Nazrey, the bishop of this Church, had died at Shelburne, N. S., August 22, 1875. A General Conference met at Hamilton, Ont., November 12, 1875, over which Bishop Wayman, of the African Methodist Episcopal Church, presided, and chose the Rev. Richard Randolph Disney as bishop to succeed Bishop Nazrey.

A department was instituted, to be called the Bureau of Education, to have charge of educational work. It will consist of the bench of bishops, the commissioner, and the financial secretary. Collections in the churches were provided for to advance the work of the bureau. The policy of supplying the schools with teachers of the African race, when competent ones can be found, was favored.

Several important changes were made in the government and discipline of the Church.

The Annual Conference of the *Independent Methodist Episcopal Church*, held at Detroit, Mich., in September, 1875, authorized its bishop, the Rev. A. R. Green, to meet the General Conference of the African Methodist Episcopal Church, to be held in 1876, "and then and there sign whatever might be requested for the union and consolidation" of the two churches. Bishop Green was represented by proxy at the African General Conference, and that body adopted a measure for the reception of the ministers and members of the Independent Methodist Episcopal Church in the African Church, with the same relations as they held in their own body. It also, by revoking so much of the treaty with the British Methodist Episcopal Church as prohibited the African Church from extending its Christian efforts into any part of the world, opened the way for the admission of all the Independent Churches in Canada and the United States. The sixteenth Annual Conference of the Independent Church met at Colchester, Ont., July 29th. A resolution ratifying the action of the bishop for union and consolidation with the African Methodist Episcopal Church was adopted by a large majority. The churches of this denomination are at

Washington, D. C.; Detroit, Lansing, Grand Haven, Mich.; Mason, Fond du Lac, and Fox Lake, Wis.; Windsor, Chatham, Dover, and Colchester, Ont.

V. AFRICAN METHODIST EPISCOPAL ZION CHURCH.—The fifteenth session of the General Conference of the African Methodist Episcopal Zion Church was held in Louisville, Ky., beginning June 21st. About two hundred delegates were present. The bishops presented a quadrennial address, in which they represented the connection as enjoying peace and quiet; spoke of the importance of establishing their Book Concern, and related the difficulties they had met in reference to that undertaking during the preceding four years; and urged the establishment of a connectional journal.

The features in the proceedings of the conference of most general interest were those relative to the reception of fraternal delegates from other Methodist churches. The Rev. Dr. Seaton and the Rev. J. N. Asbury addressed the conference in behalf of the African Methodist Episcopal Church. The conference in return adopted a resolution reciprocating the sentiments of peace and good-will, of brotherly kindness expressed by them, and pledged its "best wishes and faithful prayers" for the sister church which they represented.

Bishop Lane and Elder Ridley spoke as representatives of the Colored Methodist Episcopal Church in America, giving prominence in their addresses to the subject of a union of the two churches. The conference adopted a resolution reciprocating cordially the Christian love and brotherly feeling expressed by them, rejoicing in the feeling which prompted them and their church to seek a closer union with the "members of the same household of faith."

A commission was appointed on union with the Colored Methodist Episcopal Church, to equal in number the commission appointed by that body, and to have power to arrange a plan of organic union with the Colored Methodist Episcopal Church, and submit such plan to the present General Conference, if possible, or to a convention to be called by it. The Committee on the Episcopacy made a report suggesting that the question of ordaining bishops for life be presented to the quarterly and annual conferences, and to the people generally on or before January 1, 1878; that if necessary, a convention be called to meet in Washington City on the second Wednesday in May, 1878, to be composed of two ministerial delegates and one lay delegate from each annual conference district, and to be empowered to select nine ministers who shall constitute a presbytery to confer the third ordination. The object of this measure is, in case the union is made, to place the bishops of the Zion Church, who are now chosen for four years, on a parity with those of the Colored Church, who are chosen and ordained for life. Bishops J. J. Clinton, S. T. Jones, J. J. Moore, and J. W. Hood, were reelected bishops for another term

of four years; William H. Hillery, J. P. Thompson, and Thomas H. Lomax, were elected new bishops. Bishop Hood reported that, in accordance with the directions of the General Conference of 1872, he had compiled the "Book of Discipline." Bishop Olinton had compiled a "Guide to the Discipline," for which Bishop Moore had furnished the history of the Zion Connection, and Bishop Hood the history of the episcopacy. Both works were accepted and ordered published. The conference ordered a church newspaper organ to be established, to be called *Our National Progress and Zion Church Advocate*; also, a Sunday-school paper was approved. The conference decided to assist in the erection of a monument to Bishop Allen, the founder of the African Methodist Episcopal Church, which the members of that Church have undertaken. Action was taken favorable to the support of the two institutions of learning, the Rush University, Fayetteville, N. C., and Zion's Hill Collegiate Institute, near West Middletown, Pa.

VI. METHODIST CHURCH OF CANADA.—The *Central Board of Missions* of the Methodist Church of Canada met at St. John, N. B., Oc-

tober 10th. The fifty-second annual report of the Missionary Board of Canada was presented. It showed that the income of the board for the year ending June 30, 1876, had been \$162,639, an excess of \$3,962 over the expenditures for the same period. The report showed that there were in British Columbia five Indian missions and four missionaries; in the Northwest Territory, eight missions, five missionaries, one native assistant; in Manitoba, five missions, four missionaries, one Indian assistant; in Ontario and Quebec, twenty-five missions, twenty-eight missionaries, six Indian assistants, six supplies; in Japan, three mission stations. The board had also six German and eight French mission stations in Canada, with seven missionaries each. The total number of paid agents of the board was 515. The number of domestic mission stations throughout Canada was 389, with 383 missionaries, and 36,473 members.

VII. WESLEYAN METHODIST CONNECTION.—The following is a general view of the statistics of the Wesleyan Conference of Great Britain and the conferences affiliated with it, as given in the "Minutes of Conference" for 1876:

CONFERENCES.	Members.	On Trial.	Ministers.	On Trial.	Superannuated.
I. British Conference:					
Great Britain.....	372,988	88,228	1,884	248	286
Ireland and Irish missions.....	20,406	822	184	27	26
Foreign missions.....	73,028	10,048	278*	141*	14*
II. French Conference.....	1,808	145	25†	5†	5†
III. Australasian Conferences.....	52,692	8, 86	811	58	27
Totals.....	525,941	52,494	2,127	469	309

N. B.—In this table the number of ministers and members in connection with the Conferences of Canada and Eastern British America—now combined in the Conference of the Wesleyan Methodist Church in the Dominion of Canada—are not given.

The condition of the trust-funds and benevolent enterprises of the Connection is represented in the reports of the annual meetings of the Committees of Review, which were held the week preceding the meeting of the conference, beginning Friday, July 21st. The report of the Kingswood and Woodhouse Grove Schools showed a satisfactory working for the first year of the scheme by which they had been placed under one management—129 boys had attended at Kingswood, and 181 boys at Woodhouse Grove. The report of the Education Committee on the *day-schools* showed that there had been a decrease of six schools, with 390 scholars. The total number of schools was now 884, with 178,379 scholars. The total income of the schools had been £176,871, and the total expenditure £181,858. Four schools had been transferred to the school boards, and twenty-four schools had been closed. The committee expressed regret for the decrease of schools, and hoped that the number would be in the future fully maintained. The number of *Sunday-schools* was 5,990; number of teachers and officers in the same, 113,508; number of Sunday-school scholars, 725,312. The increase from the previous year was 97 schools, 2,500 teachers, and

25,102 scholars. Of the schools, 1,859 were in connection with the Wesleyan Sunday-school Union, 880 more than were so connected the previous year. Four hundred children were reported in the various branches of the Children's Home. Two hundred and fifty children had already been sent under the auspices of this institution to Canada. The Committee on the Theological Institutions reported that 140 students had attended the three colleges. About £11,000 were invested as a reserved fund for an additional college in the midland counties. In the Chapel Committee report was made that 136 new chapels and 98 enlargements had been authorized, at a total cost of £353,112, to provide 26,210 additional sittings; and 271 new buildings had been completed, at a cost of £345,595, of which £247,487 had been raised by subscription. Debts had been discharged to the amount of £40,390, and to a total amount in twenty-two years of £1,117,477. Five hundred and eight loans were now in operation. The Committee on the Extension of Methodism in Great Britain reported that £9,140 had been promised to the fund during

* Exclusive of missionaries in Ireland.

† The French ministers who are employed in the Channel Islands district are not included in these returns.

the year, making a total of £33,154 5s. 7d., promised it since its establishment in 1874. Four large chapels and two temporary erections had been assisted during the year through the Metropolitan Chapel Fund. The report of the Home Mission Committee represented that the missionary labors in the various districts had been attended with success.

It was reported, in the Lord's-Day Committee, that in a canvass organized in different parts of England by the Central Sunday-Closing Association of Manchester, to ascertain the state of public opinion in reference to the forced closing of public-houses on Sunday, 476,766 votes had been given in favor of and 68,847 votes against closing.

A report was presented to the conference from the Leys School, Cambridge. It was opened in the spring of 1875, with fifteen pupils. The number had steadily increased during the year, and between seventy and eighty pupils were expected at the beginning of the next term. The objects of the founders of the school were to take advantage of the facilities offered by a university town for obtaining teaching of the highest class, to promote university education in the Methodist Connection, and at the same time provide a sound and real training for boys intended for mercantile pursuits, carry out the main principles of public-school discipline, and lay the foundation of Scriptural knowledge and Christian principle.

The anniversary of the Wesleyan Home Missions was held May 2d. Mr. William Newburn presided. The treasurer reported that the income for the year had been £36,379 10s. 7d., and that the expenditure had fallen short of that sum. The debt had been reduced by £1,384 8s. 5d., and now stood at £8,423 15s. 7d.

The annual meeting of the Wesleyan Missionary Society was held in London, May 1st. Mr. Alexander McArthur, M. P., presided. The treasurer reported that the home receipts of the Society for the year had been £187,000 13s. 7d., and the foreign receipts (from the Australasian Conference and Mission Districts) £22,105 11s. 9d., making a total of £159,106 5s. 4d. The following general summary was presented of the missions under the immediate direction of the Wesleyan Missionary Committee and British Conference in Europe, India, China, South and West Africa, and the West Indies :

Central or principal stations called circuits.....	303
Chapels and other preaching-places in connection with the above-mentioned central or principal stations as far as ascertained.....	2,195
Ministers and assistant missionaries, including supernumeraries.....	360
Other paid agents, as catechists, interpreters, day-school teachers, etc.....	1,448
Unpaid agents, as Sabbath-school teachers, etc.....	6,533
Full and accredited church-members.....	78,059
On trial for church-membership.....	10,045
Scholars, deducting for those who attended both the day and Sabbath schools.....	72,428
Printing-establishments.....	3

The Society had in Ireland 85 ministers, 3,566

members, 1,770 scholars; in France (including a part of Switzerland), 37 ministers, 1,989 members, 3,005 scholars, under the care of the French Conference; in Italy, 2 English and 21 Italian ministers, 1,149 members, 866 scholars; in Spain and Portugal, 8 ministers and an agent in Minorca, 246 members (including those at Gibraltar), 1,096 scholars; in Germany, 2 English and 18 German ministers, 2,344 members, 2,371 scholars; in all the Continental missions, 83 missionaries, 5,728 members, 7,388 scholars. In other continents there were reported: in India and Ceylon, 89 missionaries, of whom 52 were natives; in China, 12 missionaries, including one native, with 3,816 Indian and Chinese members, and 18,787 scholars; in South Africa, 94 missionaries, of whom 16 were natives, 15,858 members, and 16,932 scholars; in West Africa, 25 missionaries, of whom 17 were natives, 10,849 members, 8,091 scholars; in the West Indies, 91 missionaries, 48,637 members, 28,202 scholars. Complete returns had not been received from the Australasian churches and missions. The most recent returns of the purely mission work in Polynesia at the last meeting, held at Sydney (in February, 1876), gave 80 missionaries, of whom 68 were natives, 26,889 members, 58,475 scholars, exclusive of the Chinese mission at Victoria. The Society had small establishments for educational purposes in other countries.

A new mission of this Society was started in 1875 in the islands of New Ireland and New Britain, under the direction of the Rev. George Brown, who took with him ten native catechists, with their wives, from the Feejee Islands. The mission was reinforced during 1876 by eleven other native Feejee catechists and their wives. It is supported by the Polynesian churches.

The Wesleyan Conference held its one hundred and thirty-third session at Nottingham, beginning July 26th. The Rev. Alexander MacAulay was chosen president. The most important subject that engaged attention was that of giving to the laity of the Church a representation in the deliberations of the conference. The question had been submitted to the advice of counsel by a committee appointed by the preceding conference whether such representation could be given without violation of the constitution of the conference, and without detriment to the legality of its organization, and the opinion had been given by the counsel that it could. The subject had been referred by the conference of 1875 to the district meetings to obtain the expression of their views upon it, and afterward to a mixed committee of ministers and laymen, formed for the purpose of receiving and comparing the expressions of the district meetings, and embodying their suggestions in a measure suitably shaped for the action of the conference. The mixed committee met June 6th and adopted resolutions declaring that in their opinion the

time had arrived "when a comprehensive plan should be devised for some direct and adequate representation of the laity in the transaction of the business of the conference, in consistency with the recognized principles of our economy and the provisions of the poll-deed. . . . That any plan devised for the direct and adequate representation of the laity in the transaction of the business of the conference should provide for the admission of laymen into conference during the time when the matters shall be dealt with and decided which are hereafter declared to be within the province of laymen conjointly with ministers."

The conference carefully discussed the report of the committee, and embodied its conclusions in a resolution, adopted by a vote of 369 to 49, which declared "that lay representatives shall be admitted into and take part in the proceedings of the conference during the time when such matters shall be considered and decided as shall be hereinafter declared to be within the province of ministers and laymen acting conjointly; but that the details of the proposed scheme be referred to the district meetings when the laymen are present, and subsequently to a mixed committee to be appointed by this conference, that shall present a report to the conference of 1877 for final settlement."

A minute was adopted to be entered upon the conference journal, which provided "that as soon as practicable the conference will admit laymen to take part in its proceedings, when the matters shall be considered and decided which are classed in the report of the mixed committee under the following heads:

"1. Committees of Privilege and Exigency. 2. Missions (foreign). 3. Schools—Kingswood and Woodhouse Grove, Clapton, Southport. 4. Chapel Affairs. 5. The Children's Fund. 6. Home Mission and Contingent Fund. 7. Worn-out Ministers' and Ministers' Widows' Auxiliary Fund. 8. Theological Institution. 9. Education. 10. Higher Education. 11. Religious Observance of the Lord's-day. 12. Extension of Methodism in Great Britain. 13. Temperance. 14. District Sustentation Funds. 15. Proposed alterations and divisions of districts and circuits against which there is any appeal. All pastoral matters are reserved to the Ministerial Conference."

The recommendations of the mixed committee were ordered to be referred to the district meetings of the September following, when the lay members should be present, for consideration in a special session. The most important of them provide: that "the conference, when considering such matters as are declared to be within the province of ministers and laymen acting conjointly, shall consist of the president, 220 ministers, and 220 lay representatives; but that all ministers of ten years' standing, permitted by the district meetings to attend the conference, shall be entitled to attend the meetings of the conference during

the time last mentioned, and to take part in the discussion, but not to vote;" that the "laymen shall be admitted into the conference, for the transaction of the business before stated at such time or times as the conference for the year preceding shall have determined; that no new law on any subject within the province of the conference when composed of ministers only, proposed during any annual session of the conference, shall come into force until it shall have been submitted to the district meetings when ministers only are present, and until their reports, if any, shall have been considered, and such laws confirmed by the next annual session of the conference when so composed; and that no new law within the province of the conference when composed of both ministers and lay representatives, proposed during any annual session of the conference, shall come into force until it shall have been submitted to the district meetings when laymen are present, and until their reports, if any, shall have been considered, and such law confirmed by the next annual session of conference when so composed;" that the consideration of all questions coming from the district meetings shall be referred to either phase of the conference, according to the subject-matter, or, in case of doubt, as the president shall decide; that the ministerial members of the conference when laymen are present shall consist of the president and members of the legal hundred, and, in especial, exceptional cases, ministerial representatives appointed by the previous conference, when ministers only are present; that a layman, to be eligible to the conference, must have been a member of five years' continuous standing at the time of his nomination, and shall be also a holder of office in the Society; that one-fourth of the lay representatives shall from time to time be elected by the conference, when composed of ministers and laymen. And, further, "each circuit shall be represented in the district meeting by two members of the quarterly meeting, of whom at least one shall be a circuit steward. From the list of persons so nominated, the district meetings, as so constituted, shall elect the allocated number of representatives by the combined votes of ministers and laymen."

A declaration was made and recorded that "the conference records its judgment that the extension of the influence and cooperation of the laity is not in any way inconsistent with the integrity and efficiency of the pastoral office, the inviolability of the connectional principle, the authority of the district committees, or any of the essential principles of Wesleyan Methodism."

The question of the best means of assisting local preachers in preparation for their work had been submitted by the previous conference to a special committee. They had consulted with the district meetings upon the subject. Upon the report of the committee, the confer-

ence ordered: that in future no candidate should be fully admitted as a local preacher until he had read the standard sermons of Mr. Wesley, and his "Notes on the New Testament," and until he had passed a satisfactory examination in the definitions and Scripture proofs of the leading doctrines of Christianity as therein explained, and that before any candidate is fully admitted as a local preacher he should be twelve months on probation. A committee was ordered appointed to prepare a course of study for the guidance of local preachers on probation.

A letter of fraternal greeting was ordered sent to the General Conference of the Methodist (Protestant) Church in the United States.

VIII. PRIMITIVE METHODIST CONNECTION.—The following is a summary of the report of the statistics of this body, as they were made to the conference of 1876: Number of members in the Society, 176,836; of ministers, 1,080; of local preachers, 15,805; of class-leaders, 10,334; of connectional chapels, 4,038; of other preaching-places, 2,435; of Sunday-schools, 3,760; of teachers in the same, 53,949; of Sunday-school scholars, 334,991; of day-schools, 28; of teachers in the same, 57; of scholars in the same, 2,666. An increase in the number of members was shown larger than any increase which had been reported since 1860. The day-schools of the connection decrease in numbers from year to year, as they are absorbed in the schools of the several school boards.

The following statistics of chapels were reported to the conference: Number of chapels, 3,915; cost of the same, £1,750,274; debt upon them, £696,346; value of the chapels, £1,831,416; total year's income of trust estates, £216,291; total outgo, £201,885; total number of sittings, 763,927; total number of hearers at the principal services, 476,909. One hundred and thirty-eight of the churches included in the table had been built during the year, at a cost of £113,183. The total income of the general chapel-fund had been £1,114.

The fifty-seventh *Annual Conference* of the Primitive Methodist Connection met at Newcastle-on-Tyne, June 7th. The Rev. J. Dickenson was elected president. A six years' course of study was recommended for young ministers, four years of which should be obligatory and during the period of probation, and two years optional. A new basis of representation in the conference was adopted. It provides that representation shall be according to numbers, in the ratio, for the home and colonial stations, of three delegates to the conference for every three thousand members, fractional parts of three thousand not to be counted. It was provided for the home-mission stations that they should send nine delegates to the conference. The Committee on Ministerial Training, appointed by the previous conference, reported, recommending the establish-

ment of a Theological Institution at Manchester. A site had been selected, to be leased perpetually, and subscriptions of £2,047 had been given and promised for the building for the institution. The plans contemplated a building to cost £5,000. A committee was appointed to proceed with the undertaking, as the state of the funds might warrant. A petition was unanimously voted to the House of Commons in favor of the universal establishment of school boards, and against certain features of Lord Sandon's elementary educational bill, which were characterized as favoring denominational schools, as tending to pauperize the lower section of the working-classes, and to lower the standard of education in teachers.

IX. METHODIST NEW CONNECTION.—The following is a summary of the statistical report of this body for 1876, presented to the Annual Conference in June: Number of chapels, 447; of societies, 425; of circuit preachers, 159; of local preachers, 1,134; of members, 24,163; of probationers, 2,927; of Sunday-schools, 420; of teachers in the same, 10,490; of scholars in the same, 73,263.

The eightieth *Annual Conference* of the Methodist New Connection met at Dewsbury, June 12th. The Rev. Charles D. Ward, of Halifax, was chosen president. A plan was agreed to for reuniting the Home and the Foreign and Colonial Missions funds. A petition was adopted for presentation to the House of Commons, asking that body to give its sanction to the Permissive Prohibitory Liquor bill, or in some other way to intrust the inhabitants of those districts in which a large majority desire to be freed from the evils occasioned by intemperance with the power of restricting or preventing the issue of licenses for the sale of intoxicating liquors. A petition to the House of Commons was also adopted against the Education bill, which was then before Parliament. The petition objected to the bill because—1. It made no provision for the establishment of an unsectarian elementary school in every locality, and, in case compulsion were exercised, children of all denominations would be forced to attend sectarian schools; 2. It made it possible, by a certain one of its provisions, for the managers of sectarian schools to have the entire control of the education of many districts placed in their hands; 3. By the general operation of the bill, should it become law, schools which are kept in existence for sectarian purposes will be strengthened and supported out of the public funds, and the establishment of board schools, directly under the control of the rate-payers, will be materially obstructed, and in many parts of the country entirely prevented. The conference, therefore, prayed the House not to pass this measure in its present form, nor, indeed, any measure which will favor sectarianism at the expense of national and undenominational education, or which will hand over additional funds,

whether from the national Treasury or local rates, to irresponsible management.

X. INDEPENDENT METHODIST CONFERENCE.—The seventy-first Annual Conference of the Independent Methodists of England met at Oldham, in June. The statistical reports showed that there were connected with the conference 72 chapels, 17 other preaching-places, 8,726 members, 235 preachers, 80 schools, 1,281 teachers, and 10,967 scholars. An increase during the year of 80 members was shown.

XI. UNITED METHODIST FREE CHURCHES.—The statistical reports of the United Methodist Free Churches for 1876 showed that the total number of members was 64,322, and that the net increase in numbers had been 2,184.

The nineteenth Annual Meeting of the United Methodist Free Churches' *Home and Foreign Missions* was held in London, April 24th. Mr. William Butler presided. The total income of the Society for the year had been £16,542, just double the year's income of ten years before. A fund of £10,000, which it had been resolved by the last Annual Assembly of the churches to raise in five years, was making satisfactory progress. On the foreign mission stations there were now 53 missionaries, 6,273 church-members, 163 chapels and preaching-rooms, 5,740 Sunday-scholars, and 2,375 day-scholars. The total statistics of the missions (home and foreign) gave 328 ministers, 68,652 church-members, 1,658 chapels and preaching-rooms, 170,718 Sunday-scholars, and 11,554 day-scholars.

The twentieth *Annual Assembly* of the United Methodist Free Churches met at Sheffield, July 26th. The body consisted of 228 representatives, of whom 135 were ministers and 93 were laymen. The Rev. Thomas Booth was chosen president. A scheme was adopted for the prosecution of mission-work in London. It was decided that efforts be continued for raising a special fund for this purpose, and that the assembly make in aid of it an annual grant out of the mission-fund, not to exceed in amount the sum raised by voluntary contributions. A London mission committee was appointed, and provision was made for the appointment to one of the London Mission stations, and his maintenance, of a minister who should be a member of this committee, and act as its secretary.

XII. WESLEYAN REFORM UNION.—The following is a summary of the statistics of the Wesleyan Reform Union for 1876: Number of chapels and preaching-places, 223; of ministers, 19; of preachers, 521; of preachers on trial, 77; of leaders, 453; of members, 7,820; of members on trial, 388; of Sunday-schools, 174; of teachers in the same, 2,903; of Sunday-school scholars, 17,706; of day-schools, 4; of scholars in the same, 528.

The twenty-eighth *Annual Conference* of the Wesleyan Reform Union met at Bradford, August 15th. Mr. S. H. Burrows, of Sheffield, was chosen president. A resolution was adopt-

ed, regretting the enormous consumption of alcoholic drinks in the land, and the poverty and crime resulting therefrom, urging the churches, by precept and example, to promote the practice of temperance.

XIII. BIBLE CHRISTIANS.—The following is a summary of the statistics of the Connection of Bible Christians for 1876: Number of itinerant preachers, 284; of local preachers, 1,828; of chapels, 896; of full members, 28,945; of members on trial, 1,252; Sunday-school teachers, 9,642; Sunday-school scholars, 51,658. A net increase of 2,246 members was declared. The income of the year for missions had been £8,300. The profits of the Book-Room for the year had been £532.

XIV. PRIMITIVE CHURCH METHODISTS.—The Primitive Church Methodist Society is a new organization, which held its fourth conference in 1876. It acknowledges subordination to the Episcopal Church in Ireland. Among the textbooks which it requires to be read by its candidates for the ministry are Wesley's "Sermons," Wesley's "Appeal," the "Larger Minutes," Watson's "Theological Institutes," the Greek Testament (gospels), Wesley's "Philosophy of Christian Perfection," The Right Rev. Lord Bishop of Kilmore, Elphin, and Armagh, was president of the conference. Eighteen clergymen of the Episcopal Church of Ireland were connected with the conference, and there were four preachers on trial. Eleven stations were occupied by the Society. The number in the Society was 952. One hundred members had been added during the year.

XV. IRISH METHODIST UNION.—The Committees on Union of the Irish Wesleyan Conference, and of the Primitive Wesleyan Methodist Conference, met in Dublin, September 20th, for consultation. Twenty ministers and three lay members were present. The terms of union were freely and fully discussed.

MEXICO (ESTADOS UNIDOS DE MÉJICO), an independent federal republic of North America, lying between latitude 15° and 32° 27' north, and longitude 86° 34' and 117° west. Its boundaries are: On the north, the United States of America; on the east, the Gulf of Mexico, the Caribbean Sea, and Balize, or British Honduras; on the south, the Republic of Guatemala; and on the south and west, the Pacific Ocean. It lies between two great oceans, has a northern frontier of 1,400 and a southern of 345 miles, and a seaboard of 6,086 miles, 1,877 of which are on the Gulf of Mexico and the Caribbean Sea, and 4,408 on the Pacific, including 2,040 washed by the Gulf of California.

The boundary question with Guatemala still remains unsettled, nor has any further progress been made in the negotiations during the past year.

The republic is divided into twenty-seven States, one Federal District, and one Territory, which, with their areas, population (in 1871), and capitals, are as follows:

STATES.	Area in Sq. Miles.	Population.	Capitals.
Agua Calientes...	2,216	89,715	Agua Calientes.
Campeachy.....	26,068	80,866	Campeachy.
Chiapas.....	16,769	198,967	Chiapas.
Chihuahua.....	105,295	160,668	Chihuahua.
Coahuila.....	61,050	98,897	Saltillo.
Colima.....	2,998	65,837	Colima.
Durango.....	42,648	190,846	Durango.
Guajuato.....	11,180	729,988	Guajuato.
Guerrero.....	24,226	828,069	Guerrero.
Hidalgo.....	8,480	404,207	Pachuca.
Jalisco.....	48,967	966,689	Guadalajara.
Mexico.....	9,598	668,557	Toluca.
Michoacan.....	21,609	618,240	Morelia.
Morelos.....	1,898	150,884	Cuernavaca.
Nuevo Leon.....	14,968	178,872	Monterrey.
Oajaca.....	27,380	662,468	Oajaca.
Puebla.....	9,568	697,788	Puebla.
Queretaro.....	8,439	171,666	Queretaro.
San Luis Potosi.....	28,889	525,110	San Luis Potosi.
Sinaloa.....	25,927	168,081	Culiacan.
Sonora.....	61,023	109,888	Ureca.
Tabasco.....	12,716	58,707	San Juan Bautista.
Tamulipas.....	28,659	140,000	Guadalupe Victoria.
Tlaxcala.....	1,498	121,668	Tlaxcala.
Vera Cruz.....	27,488	504,950	Jalapa.
Yucatan.....	82,668	422,865	Merida.
Zacatecas.....	26,555	397,945	Zacatecas.
Federal District.....	85	815,996	Mexico.
Lower California (Territory).....	50,088	22,195	La Paz.
Total.....	761,640	9,276,079	

A more recent but evidently inaccurate table, though published in Mexico (1876), with a semi-official character, gives the entire population at 8,748,000, made up as follows:

Pure whites.....	2,881,000
Pure-blooded natives.....	1,750,000
Hybrids.....	4,662,000*

The population of the principal towns is approximately as in the annexed table:

TOWNS.	Population.	TOWNS.	Population.
Mexico.....	250,000	Guajuato.....	68,000
Nuevo Leon.....	100,000	Morelia.....	37,000
Guadalajara.....	71,000	San Luis Potosi.....	34,000
Puebla.....	67,000	Zacatecas.....	31,000

The Mexican Government is desirous of increasing the population of the country by immigration, for the encouragement of which the following decree was issued in May, 1876:

Sebastian Lerdo de Tejada, constitutional President of the United States of Mexico, to the inhabitants thereof. Know—

That Congress has issued the following decree:

Congress resolves:

ARTICLE I. That, pending the enactment of a law for the determination and regulation of all matters concerning colonization, the Executive is hereby authorized to enforce this law, either by direct action or by contract with private organizations, upon the following bases:

1. To grant to each organization a subsidy for each family arriving in the republic; an advance of not over 50 per cent. of said subsidy at a reasonable percentage of interest; lands suitable for colonization after measurement, survey, and valuation, at a moderate price, payable by installments; a premium for each family of immigrants; exemption from duties to every vessel bringing ten or more families; a premium for each Mexican family that shall settle in an immigrant colony; and a premium for each Mexican family settling in a frontier colony.

2. To require of said organizations a sufficient guarantee for the fulfillment of their contracts, stating the cause of forfeiture and of fine; a security that the colonists shall enjoy,

in as far as may depend upon the contractors, the privileges granted by this law.

3. To grant to the settlers Mexican naturalization and citizenship in the proper cases; the amount of traveling expenses in advance; means of living for one year after they have settled, and farming implements, and building-materials for their dwellings; the right to a determinate tract of land for tillage, and building, at a low price, payable in convenient annual installments, commencing from the second year after settlement; exemption from military service and all kinds of imposts, and some municipal taxes; exemption from all kinds of import and inland duties on such articles as farming and workshop implements and tools, machines, chattels, building-materials, household furniture, and beasts of burden and breeding-animals; exemption, personal and not transferable, from export duties, on their crops, and free letter-postage, through the ministerial department of foreign affairs or by means of special postage-stamps, to their native country or former residence; premiums and special protection for the production of new culture or industry.

4. To demand of the settlers the fulfillment of their contracts, in accordance with the common laws of the country.

5. To appoint and send out the examining committees authorized by section 26 of the present budget, to select the lands suitable for colonization, with the due requisites for measurement, marking boundaries, valuation, and description.

6. To see that any person occupying a tract of public land, according to the requirements indicated in No. 5, shall have one-third of said land or the value thereof, provided said person be duly authorized.

7. This power of authorization shall belong exclusively to the Executive, who shall not deny the same to any State applying for it, for lands within its boundaries. The authorization granted as above, to States or to private citizens, shall be null and void in case the operations therein stipulated shall not have been commenced within three months after the date of said authorization.

8. To secure, if deemed expedient, by purchase or by contract, in accordance with terms of No. 6, lands belonging to private citizens and adapted for colonization.

9. To settle upon lands the property of private citizens, at the request of the owners, immigrants already under contract with the Executive.

10. Said colonies shall be considered as such, and shall enjoy the privileges herein enumerated, for a period of ten years, at the expiration of which period said privileges shall cease.

ART. II. The Executive is also hereby authorized to appropriate, in the course of the next fiscal year, the sum of \$250,000 for the defrayal of the expenses prescribed by this law, including those of surveying commissions.

JULIO ZARATE, Presiding Representative.
ANTONIO GÓMEZ, Secretary Representative.
J. N. VILLADA, Secretary Representative.

LEGISLATIVE PALACE, MEXICO, May 1876.

I, therefore, order the above law to be printed, published, circulated, and complied with.

SEBASTIAN LERDO DE TEJADA, etc., etc.
EXECUTIVE PALACE, MEXICO, May 31, 1876.

The President of the Republic is General Porfirio Diaz; the Chief-Justice of the Supreme Court (virtually the Vice-President of the Republic), Señor Antonio Vallarta; the Minister of the Interior (*ministro de gobernacion*) is Licentiate Protasio Tagle, late Imperialist, now moderately Ultramontane; Minister of Foreign Affairs, Licentiate Ignacio Vallarta, late Governor of the State of Jalisco; Minister of Finance,* Dr. José M. Mata, late Deputy to the Constituent Assembly, and former minister to Washington (1858-'61); Minister of War, Licentiate and General Pedro Ogazon, formerly Governor of Jalisco, and member of the Supreme Court; Minister of Justice, Public Worship, and Public Instruction, Licentiate Ignacio Ramirez, formerly intrusted with the same portfolio under Juarez (1861), member of the

* Reference should be made to the statistics concerning population, etc., on page 531 of the ANNUAL CYCLOPEDIA for 1874.

* Licentiate Justo Benitez, for a long time private secretary to General Diaz, was first appointed to this portfolio, but resigned it to take the direction of the political affairs of the country.

Supreme Court, and favorably known in the literary world by the pseudonym of "El Ni-gromante;" Minister of Public Works, General Vicente Riva Palacio, grandson of Guerrero, soldier, poet, and man of letters.

Each State in the republic has its separate government, the legislative power being exercised by an Assembly styled the State Congress, and the Executive by a Governor (*gobernador constitucional*). The Governors of the several States, etc., were as follows in 1875:

STATES.	Governors.

Lower California (Ter.).....	" " F. Miranda y Castro.

The Archbishop of Mexico is Monseñor P. A. de Labastida (1863); of Michoacan, Dr. Arciga; of Guadalajara, Dr. P. Loza (1870).

The Mexican minister plenipotentiary to the United States is Señor Don Ignacio Mariscal; and the Mexican consul-general at New York, Dr. Juan N. Navarro. The United States minister plenipotentiary to Mexico is John W. Foster; and the United States consul-general at the capital, Dr. Julius A. Skilton.

Of the revenue, which has been in a disordered condition for many years, nearly two-thirds are derived from the customs department and analogous imposts. The total amount of the revenue and expenditure for the year ending June 30, 1875, is exhibited in the following tables:

REVENUE.

Customs receipts and harbor dues.....	\$11,567,582
Taxes.....	2,805,691
Stamp-duty.....	2,581,290
Sale of Government lands.....	862,565
Post-Office and Mint.....	926,154
Sundries.....	518,825
Total.....	\$18,707,087

EXPENDITURE.

Legislative.....	\$1,107,789
Executive.....	" "
Supreme Court, Circuit Courts, District Courts..	815,810
Ministry of the Interior.....	1,997,845
" Foreign Affairs.....	208,760
" Justice, etc.....	912,895
" Finance.....	4,219,868
" War and Navy.....	10,691,967
" Public Works.....	5,496,858
Total.....	\$24,949,775

The subjoined table shows the amount and branches of the revenue for the year 1875-'76:

General customs receipts.....	\$10,217,645
Custom-house of Mexico.....	1,232,744
Stamped paper.....	2,435,895
Direct contributions.....	581,148
National property.....	812,648
Mint.....	942,054
Public instruction.....	78,579
Post-Office.....	549,820
Sundries.....	7,566,716
Total.....	\$23,507,671

The expenditure for the same year was estimated as follows:

Legislative.....	\$1,074,169
Executive.....	48,173
Supreme Court (Judiciary).....	823,225
Ministry of the Interior.....	1,968,496
" Foreign Affairs.....	209,460
" Justice, etc.....	910,588
" Finance.....	4,179,071
" War and Navy.....	10,554,747
" Public Works.....	5,623,253
Total.....	\$24,901,522

The total amount of the national debt—home and foreign—of Mexico was estimated at \$395,500,000 in 1876. But no official returns have been made since 1865.

In the article MEXICO, in the ANNUAL CYCLOPEDIA for 1874, will be found minute details relative to the national debt and the army of the republic.

The following remarks on the subject of education, chiefly derived from an official report prepared by Señor José Diaz Covarrubias, assistant secretary in the ministry of Public Instruction, etc., and published in 1876, may be regarded as supplementary to those contained in our volume for 1874.

Primary schools are distributed throughout the country as follows:

STATES.	No. of Schools.	STATES.	No. of Schools.
Aguas Calientes.....	66	Puebla.....	1,098
Campeachy.....	73	Querétaro.....	51
Coahuila.....	115	San Luis Potosi.....	253
Colima.....	48	Sinaloa.....	2-1
Chiapas.....	100	Sonora.....	129
Durango.....	150	Tabasco.....	5
Guanajuato.....	498	Tamaulipas.....	61
Guerrero.....	455	Tlaxcala.....	202
Hidalgo.....	479	Vera Cruz.....	509
Jalisco.....	714	Yucatan.....	154
Mexico.....	721	Zacatecas.....	8-2
Michoacan.....	288	Federal District.....	854
Morelos.....	200	Lower California (Ter'y).....	5
Nuevo Leon.....	278		
Oajaca.....	427	Total.....	6,108

Of these schools, 5,567 are for boys alone; 1,594 for girls; 548 for both sexes; 124 for men; 21 for women; and 249 without any special programme. The yearly expenses for primary instruction amount to \$2,784,168.

Primary instruction in the Federal District comprises reading, penmanship, elementary grammar, arithmetic, metric system, drawing, geography, ethics, and hygiene. The girls are taught, besides these branches, others exclusively pertaining to their sex.

Primary and secondary as well as professional education is earnestly promoted by the Government. The order of studies, exami-

nations, and conferring of professional titles or degrees, are regulated by special laws; the following being the degrees conferred by the state: school-teachers, doctor of medicine, professor of pharmacy, professor of veterinary surgery, professor of agriculture, and other titles in the various engineering branches.

There are 54 professional and secondary schools under official control, 12 of which are established in the capital. The students attending these schools number 9,337, there being besides 3,800 who receive instruction in establishments attached to religious institutions. The annual outlay for secondary instruction amounts to \$1,100,000.

In the National Preparatory School, established in the city of Mexico, students are educated in all the branches required for any of the professions, such as mathematics, physics, astronomy, chemistry, geography, history, natural history, logic, rhetoric, grammar, moral sciences, Greek, Latin, English, French, German, and Italian. There are laboratories of physics, chemistry, and natural history. The attendance in 1874 was 602.

Other schools in the capital for the secondary or advanced branches are: the "School of Arts and Trades," for men; "Reform School," for boys; "Law School," "Medical School," "School of Engineering," "School of Fine Arts," "School of Agriculture," "Commercial School," "Military School," "Deaf and Dumb Asylum," "Blind Asylum," "Secondary or Intermediate School," for girls; "Colegio La Paz," also for girls; and the "Conservatory of Music and Declamation." Señor Covarrubias enumerates 40 public libraries in the entire republic, three of which are in the capital, and contain an aggregate of 236,000 volumes; and mentions museums of antiquities, natural history, and fine arts, in the capital, Campeachy, Oajaca, Mérida, Puebla, and Guadalajara.

Before dismissing the subject of education it may not be improper to introduce here a few

remarks concerning the cultivation of the fine arts in Mexico. The principal art-school in the republic is the Academy of San Carlos, in the capital, where it was founded by the third king of Spain of that name. It is one of the most noteworthy institutions in the country, as well for its magnificent collection of paintings, engravings, and specimens of the sculptor's art, as for the thorough and systematic course of instruction given therein, and at a cost so moderate as to place it within the reach of all who desire to avail themselves of such advantages. It has always enjoyed the spirited and substantial support of the Government, and the progress attained in the establishment has so far been commensurate with its privileges.

The teaching body comprises the director, eighteen professors, and several assistants; and the number of pupils, in 1874, was 453.

Photography has attained a high degree of perfection in Mexico, assuredly owing, in part at least, to the eminently favorable sky of that region.

According to an official publication, bearing date of August, 1875, the Mexican army was then composed as follows:

	Officers.	Men.
Horse.....	297	4,843
Foot.....	765	14,642
Artillery.....	183	1,815
Coast-guards.....	22	71
Invalids.....	19	203
Total.....	1,241	21,186

No official statistical tables of the commerce of Mexico have been published since those for 1873. Active trade exists between the republic and Great Britain, Germany, France, the United States, Spain, Belgium, Italy, Cuba, Colombia, Guatemala, Nicaragua, and Ecuador.

The following table exhibits the various commodities imported in 1873, the invoice and market values thereof, and the duties collected thereon:

COMMODITIES.	Invoice Value.	Market Value.	Duties.
Cotton.....	\$7,311,646 08	\$10,581,970 15	\$4,734,340 87
Groceries.....	8,437,525 43	5,191,788 62	2,102,500 30
Free of duty.....	2,411,598 73	3,354,259 77
Mercury.....	1,356,600 81	2,164,014 56	768,908 87
Miscellaneous.....	1,434,216 56	2,035,609 68	1,055,928 05
Linen and bemp.....	998,362 76	1,452,978 28	564,125 89
Woolens.....	1,038,044 81	1,427,867 58	644,496 77
Mixtures.....	998,881 81	1,417,427 61	605,146 49
Silks.....	419,017 10	588,911 32	267,404 71
Earthen and glass wares.....	844,936 45	577,510 82	206,547 87
Drugs.....	178,859 82	300,069 05	131,011 88
Total.....	\$19,919,613 81	\$29,062,406 94	\$10,989,819 64

It should, however, be borne in mind that smuggling is so prevalent in Mexico that, in order to have an approximate idea of the real value of all the imports, it would be necessary to double the figures of the various items of the first and second columns of the foregoing table.

If we are to rely upon official returns, the

total value of the exports for the same year amounted to \$31,691,150.84, divided into two classes, as follows:

Minerals, metals, etc.....	\$25,373,678 73
Agricultural and industrial products..	6,317,477 06
Total.....	\$31,691,150 84

Among the first class are the following:

ARTICLES.	Value.
Silver coin.....	\$22,602,498 88
Solid silver.....	1,512,616 94
Gold coin.....	640,270 97
Solid gold.....	288,578 21
Ores and mineral earths.....	222,354 00
Silver amalgam.....	89,351 78
Lead.....	80,581 00
Copper.....	17,187 94

Among the second class are:

ARTICLES.	Value.
Skins.....	\$1,546,599 48
Henequen (Sisal hemp).....	1,049,202 53
Timber and precious woods.....	1,042,536 81
Coffee.....	592,912 56
Vanilla.....	414,088 40
Cochineal.....	274,699 80
Cattle.....	209,000 00
Tobacco.....	182,924 75
Orchilla (Roscella tintorea).....	128,450 09
Pearls.....	109,900 00
India-rubber.....	98,052 83
Sarsaparilla.....	90,862 16
Wool.....	88,685 72
Indigo.....	80,229 87
Jalap.....	77,517 40
Cocoanuts.....	46,000 00

The following table shows the value of the exports from Mexico to Great Britain during the eight years from 1868 to 1875, inclusive:

YEARS.	Value.
1868.....	\$1,738,320
1869.....	1,752,550
1870.....	1,499,065
1871.....	1,986,670
1872.....	2,217,620
1873.....	2,497,660
1874.....	2,733,325
1875.....	3,609,335

The value of the imports from Great Britain during the same eight years is shown by the subjoined table:

YEARS.	Value.
1868.....	\$4,242,940
1869.....	3,158,620
1870.....	4,054,410
1871.....	5,245,965
1872.....	4,215,980
1873.....	5,975,620
1874.....	5,628,065
1875.....	4,424,505

The first of these two tabular statements shows a steady increase in the value of the imports, equivalent to doubling in the course of the eight years; while the second shows the imports to have fluctuated from four and a quarter millions to nearly six millions, and then returned at the end of the period to almost the precise value which marks the beginning.

Mahogany, dye-woods, and cochineal, of the value of \$2,154,110, \$264,100, and \$194,745, respectively, were the commodities most largely exported to Great Britain in 1875.

Now, by the table of exports it appears that the single item of metals and mineral products represents about four-fifths of the total value officially reported; and it is not too much to assume that the same articles bear the same proportion to the real total. Here, then, lies the explanation of the limited extent of Mexican foreign commerce as compared to the vast capabilities of the country, and the explanation, too, of the fact that the name of Mexico in other parts of the world is almost exclusively associated with the idea of silver mines and silver coin. Indeed, how could this be

otherwise? Of thirty-one millions' worth of exports, mining products stand for twenty-five millions; while all the other exports—cochineal, indigo and other dye-stuffs, coffee, vanilla-beans, hides, timber, cabinet-wood, and two varieties of hemp (Sisal from Yucatan, ixtle from Tamaulipas), etc.—amount in the aggregate to but six millions! So long as this condition of things continues to exist, Mexico cannot hope to establish a vigorous and independent trade with foreign nations. Nor does this fact escape the attention of native economists. In a noteworthy article published on the subject of "The Silver Crisis," on March 24, 1876, at the city of Mexico, occurs an observation, alike remarkable for its accuracy and the gravity of its purport: "The vital energy of the country is seriously impaired; every one knows that the mines are the main support of the commercial movement between Mexico and foreign ports, since our agricultural and industrial exports are inadequate to counterbalance the value of the commodities brought to our shores." The writer then adds: "Hence the time is now easily foreseen when it may become necessary to suspend operations in all, save a few exceptionally productive mines, the yield being insufficient to defray the expense of working them. On the introduction of the American trade-dollar, which competes with our eagle, the concurrence of monetary contracts made in Europe, and the discovery of prodigiously rich mines in the far West of the United States, determined a marked depreciation in silver. As the immediate result of this crisis, the Mexican dollar loses its value, bullion becomes depreciated, exchange on Europe tends to advance in a formidable degree, mercantile transactions are hampered, the price of gold rises rapidly, exports decrease, imports are enhanced in price, many houses will be forced to stop, and foreign commodities will become unusually scarce.

"If Mexico would avert the threatening danger, her manufacturers should take warning in time, and hasten to adopt, at any cost, such improvements and perfected appliances as shall enable them to ameliorate the quality of their products; agriculture should be encouraged; immigration, so often promised, but in vain, should be promoted by Congress; and capitalists should turn their attention from silver to other mining interests less subject to depreciation—such as gold, platinum, quick-silver, copper, iron, lead, and coal."

The advice here offered was no less sincere than it is sound; for the proprietor and editor-in-chief of the very journal from which we translate, M. A. Bablot, has since visited New York, and established extensive relations for the introduction into Mexico of every species of American apparatus for the realization of the plans proposed. For the efficient conduct of such an enterprise he had a favorable opportunity of preparing, while acting as com-

missioner from the Mexican Government to the Centennial Exhibition at Philadelphia.

At this exhibition, among the manufactures exhibited by Mexicans may be mentioned: Chemicals in considerable variety, but for the most part unknown to commerce; dye-stuffs; essences, perfumery, etc.; earthenware, including an admirable collection of vases after the Aztec, Egyptian, and Chinese styles; glassware, furniture, etc. Some very good specimens of woollens were displayed, as also cotton fabrics, both of which are manufactured in sufficient quantities to meet the entire demand for home consumption. Owing to the peculiar formation of the country, Mexico is almost destitute of navigable rivers; but that very peculiarity renders the countless streams eminently available for power, and there are numbers of factories, some of which are very extensive, es-

tablished in various parts of the republic. There is a silk-factory in Puebla, and sericulture is steadily increasing in the States of Oajaca, Guerrero, Michoacan, and Colima. This is not an entirely new industry for the Mexicans: Miguel Hidalgo, the first hero of Mexican independence, instructed the people of Guanajuato, at the beginning of the present century, in the art of rearing the silkworm and cultivating the mulberry-tree.

In the department of agriculture little, if any, progress has been made in the republic since the arrival of the early Spanish colonists; tillage is performed regularly, but in the most laborious manner, and with the rudest appliances, save in a very few instances, where modern implements have been introduced.

One of the chief cultivated products is maize, which thrives in all parts of the country, yield-

PLAZA DE ARMAS, CITY OF MEXICO.

ing quite frequently three, and at times even four, crops annually. Wheat gives an increase of about sixty-fold, and rice some forty-six-fold; but all these are only produced in proportion to the demand for home consumption.

To the cultivation of the export staples more attention has been paid within the past few years. These commodities, as already observed, are tobacco, coffee, sugar, and the *henequen* plant (*Agave Americana*), from which Sisal-hemp is prepared.

Tobacco is regarded as one of the most important agricultural products of Mexico; it is grown in Vera Cruz, Ohiapas, Puebla, Jalisco, Colima, and Yucatan; but the finest is that of Vera Cruz, where both climate and soil are similar to those of Cuba, and the labor is mainly performed by Cuban immigrants. The

tobacco exported in 1873 was of the value of \$132,984.75.

Coffee, though a comparatively new article of export for Mexico, none having been sent out of the republic—and, indeed, very little grown—before 1869, is now taking the precedence among the staples shipped to foreign countries, especially from the State of Vera Cruz. This commodity, likely to become so intimately connected with the future commercial prosperity of Mexico, has recently been made the subject of a special study by Mr. John W. Foster, United States minister to that country, who says:

It may be an unknown fact to many Americans that, at our very doors, in Mexico, our neighboring republic, there exists the agricultural capacity to produce all the coffee that can be consumed in the United States, and of a quality equal to the best

grown in any country. Mexico, it is true, is exporting very little coffee, and scarcely figures in the coffee-producing countries, but its capacity and adaptability for its production have been tested by more than fifty years of successful cultivation.

The culture of the sugar-cane is largely carried on in the States of Vera Cruz, Jalisco, Morelos, Yucatan, and Puebla, and in general under favorable circumstances, the processes and implements in use being in most cases identical with those of the best-conducted Cuban plantations. In some of these last the annual yield amounts to 2,500,000 pounds of sugar, and some 1,500,000 pounds of molasses. Until 1875 the whole of the sugar manufactured in the republic was required for home consumption. Some very good samples were exhibited at Philadelphia.

The great staple of Yucatan, *henequen*, is a species of *Agave*, the strong, white, lustrous fibres of which are said to be superior to any other material for ropes and cordage of every species, and especially for ships' cables, owing to their slowness to yield to the effects of moisture.

The following extract from a report recently published in Mérida, the capital of Yucatan, and from an official report of 1876, will serve to give an idea of the importance of the henequen industry :

During the year from July, 1875, to June, 1876, Yucatan produced 32,000,000 pounds of henequen fibre, the larger part of which (say 18,000,000 pounds) was exported in the shape of hemp to New York, London, and New Orleans, and the rest was sent manufactured to Cuba and the Mexican ports.

Taking $1\frac{1}{2}$ pound of fibre as the average yearly production of each henequen plant, there would be at the present time more than 18,000,000 plants under cultivation—keeping in operation over 420 scraping-wheels, moved by 229 steam-engines with a total of 1,733 horse-power, and 30 wheels moved by animal power.

Each scraping-wheel cleans daily, on an average, 300 pounds of fibre; so the 450 wheels now established work but 163 days in the year.

Taking 230 as the number of working-days in the year, these 450 wheels could clean 38,000,000 pounds of fibre; and, as a two-horse power can easily move one scraping-wheel, it is obvious that there is already in Yucatan motive power sufficient to work 866 wheels, which, during 280 days a year, would clean 72,000,000 pounds of fibre.

To reach this great increase of production, and to take advantage of all the steam-power already available in the State, Yucatan would require to have some 58,000,000 plants, or about three times the quantity at present under cultivation.

From the figures given below, it will be seen that the production of henequen has doubled in the course of four years; and the immense number of plants set during the last year warrants the assumption that this progressive increase will not stop, and that, with the addition of 400 scrapers to the machinery now in use, Yucatan will export 44,000,000 pounds of fibre in 1880, and 72,000,000 pounds in 1883.

Comparing the number of plants under elaboration with those which must be already under culture to increase the product of fibre to

72,000,000 pounds in 1883, and taking into consideration the system generally followed of planting 72 plants in each *mecate* (of 376 square *varas*, or 484 square yards), there are 250,000 *mecates* under elaboration, and 550,000 under culture.

The capital invested in the henequen industry may be estimated as follows :

250,000 <i>mecates</i> under elaboration, at \$5 each.....	\$1,250,000
550,000 <i>mecates</i> under culture, at \$3.50.....	1,925,000
Machinery.....	600,000
Buildings.....	458,000
Workmen's wages.....	600,000
Lands.....	114,000
Rolling and live stock, etc.....	200,000
Total.....	\$5,147,000

The annual expenditure in the culture and elaboration at present is as follows :

Cleaning of 800,000 <i>mecates</i> , at $12\frac{1}{2}$ cents.....	\$100,000
Elaboration of 23,000,000 pounds of fibre (the product of 250,000 <i>mecates</i>), at $1\frac{1}{2}$ cent per pound....	345,000
Incident expenses.....	50,000
Total.....	\$495,000

This total, divided by 22,000,000 pounds, gives \$0.0193 per pound, or $48\frac{1}{2}$ cents per *arroba* of 25 pounds.

If, then, the *arroba* of henequen were sold at 50 cents, it would only cover the expenses of cultivation and elaboration; if at $62\frac{1}{2}$ cents, it would leave an annual profit of $2\frac{1}{2}$ per cent. on the capital invested; if at 75 cents, a profit of 7 per cent.; at $87\frac{1}{2}$ cents, a profit of $9\frac{1}{2}$ per cent.

Statements of the shipping movements at the various Mexican ports, and general railway statistics, will be found in the volumes of the ANNUAL CYCLOPEDIA for 1874 and 1875.

The following are extracts from the address delivered by President Lerdo at the opening of the second session of the eighth Congress of the United States of Mexico, on April 1, 1876 :

In internal affairs, there is to be lamented the fact that the *public peace in certain localities has been disturbed*. This occurred just when it was possible to assure the public that the bands existing in Michoacán for a year past were destroyed to such an extent that the events in other places have not been sufficient up to the present time to revive them.

With some exceptions, the same persons who have already taken part in various other disturbances of the public order figure among the revolutionists. Neither laws of amnesty for past acts, nor the full enjoyment of social rights and guarantees, nor even the kindness with which they have frequently been treated, have been sufficient to restrain them from seeking to place themselves above the laws.

The Government has not only a strict duty to perform in combating the rebellion under all circumstances, but it has also a firm conviction that the time has passed in which those who appealed to the force of arms could prevail, a conviction in favor of respecting the laws being now general, as also the good disposition of the laboring and respectable citizens, who know how to appreciate the benefits of peace obtained through the enjoyment of a just liberty. With the efficient aid of the representatives of the people and the cooperation of the State authorities, it will be possible in a short time to repress the recent disturbances, as has been lately

done in certain places, by the discipline, the valor, and loyalty of the national army, which has given so many proofs of its republican virtues.

The Executive has demonstrated his desire to use as little as possible the power which Congress thought proper to concede to him. In regard to supplying men for the army, far from its increase, he resolved upon its diminution, and had commenced to carry it into effect when the insurrection of the Sierra of Oaxaca occurred, which was developed from incidental causes. In respect to public expenses, notwithstanding their considerable increase in order to combat the revolutionists of Michoacan during one year, by means of strict economy the idea of new contributions was not entertained until circumstances made the imposition of a tax inevitable, which it was sought to make just in its basis and in the manner of collecting it.

The words italicized in the foregoing address embody the first official announcement to Congress of the commencement of the revolution which was to terminate in the overthrow of Señor Lerdo's Administration.

During the greater part of 1875 the State of Michoacan had been kept in unceasing turmoil by armed bands of self-styled revolutionists, who, in the name of religion, offered open opposition to the established Government. For the suppression of these movements, President Lerdo petitioned Congress in May of the same year for powers extraordinary, which were then granted, and afterward extended. The opposition organs, however, protested against the granting of the powers extraordinary, alleging that the real end to which they were to be applied was the securing a favorable issue at the congressional elections to take place in June and July (1875). The elections resulting in a Government triumph, that circumstance was proclaimed by the opposition party as confirmatory of their charges.

Toward the end of the year General Escobedo was sent to the troubled State, with forces which would have enabled him soon to suppress the revolts and restore perfect order and peace, had not events of a graver character transpired elsewhere to necessitate his being recalled. Late in January, 1876, the journals of the capital published a revolutionary programme, which had been proclaimed on the 17th of that month, at Tuxtepec, a small mountain-town of the State of Oajaca. This *plan* proclaimed the Constitution of 1857, with all its amendments, thus showing that its authors were not in league with the Church revolutionists of Michoacan. It repudiated the authority of President Lerdo, his ministers, the judges of

the Supreme Court, and especially the members of the then existing Congress, all of whom having been returned at the June and July elections in 1875; provided for the organization of a provisional government, and stated the general-in-chief of the regenerating armies to be Porfirio Diaz, who was at that time in Brownsville, Texas. General Porfirio Diaz, it will be remembered, had been a candidate for the presidency against Juarez in 1867, and again against Juarez and Lerdo in 1871. This time he received a plurality of the popular vote, but Congress deciding in favor of Juarez, Diaz appealed to arms, and was at the head of a revolution at the time of the death of the former, in July, 1872. Señor Lerdo, as Chief-Justice of the Supreme Court, then succeeded to the presidency, *ad interim*, issued a general amnesty, and convoked Congress. The revolutionists laid down their arms at once, and Congress ordered a presidential election, which,

THE CATHEDRAL, CITY OF MEXICO.

Diaz offering no opposition, resulted in favor of Lerdo.

Shortly after the *plan* of Tuxtepec another was published, bearing the signature of General Porfirio Diaz, and proclaimed by General Donato Guerra, one of those chiefs who had distinguished themselves in the Revolution of 1871-'72. In this *plan*, similar in all other respects to that of Tuxtepec, was omitted the article assigning the command-in-chief of the revolutionary forces to General Diaz. Several other chiefs proclaimed *plans* in rapid succession, all of whom assigned as the reason for commencing the revolution before the presidential elections had begun that Lerdo was determined to resort to fraud and official pressure to secure his reelection, and by armed force render opposition hopeless.

The *plan* of Tuxtepec was seconded by all the mountain-towns of the State of Oajaca. The rebels raised an army, marched into the

lowlands, and captured the capital of the State with little trouble. Here their number was increased by the addition of three hundred Federal troops and six hundred National Guards, who, after being defeated, joined them. The Governor and a few of his officers made their escape, but only succeeded in taking with them a very small force. The Federal Government immediately ordered General Ignacio Alatorre, one of the ablest of Mexican officers, to Oajaca; martial law was declared, and the constitutional Governor appointed a civil and military commander.

By the middle of March the States of Sonora, Jalisco, Aguas Calientes, Zacatecas, Durango, Guanajuato, Michoacan, Mexico, Puebla, Tlaxcala, Oajaca, and the Church revolutionists of Michoacan, had signified assent to the *plan*; and martial law had been proclaimed in Oajaca, Jalisco, Michoacan, and Tlaxcala.

The principal alleged causes of dissatisfaction with the Lerdo Administration were:

Official interference with the Federal, State, and municipal elections.

The reelection of Lerdo, as resulting from the interference alluded to.

Repeated extraordinary contributions and loans upon real and personal property.

To remedy which alleged grievances, the *plan* of Tuxtepec proposed the following reforms:

1. Free suffrage, and absolute non-interference in the elections, on the part of the Government or of any of its subordinate officers.
2. No reelection of any public functionary under any circumstances.
3. No extraordinary contributions or loans to the Government.

It should here be observed that, the amount appropriated for war expenses in 1876 (\$11,000,000) having proved too small, the President called a meeting of the principal capitalists of the capital and requested a loan of \$500,000; this being refused, Señor Lerdo determined to levy a special tax of one per cent. on all capital exceeding \$25,000, and on all property valued at more than \$25,000, and one-half per cent. on property and capital less than \$25,000 and more than \$5,000. The decree was issued on the 6th of March, and included the whole republic. Here was a new departure and a bold one. Heretofore revenues had been raised by taxes on capital, rents, incomes, imports, and exports, but real estate had always been exempt. No Government had hitherto dared to tax the *haciendas* and lands of the large proprietors.

The method prescribed by the Mexican Constitution for electing the President of the Republic is, in general, similar to that followed in the United States, save that at the time of counting the vote a committee of five members is appointed from the national Congress to scrutinize the returns.

The presidential elections took place then, as usual, in July, and the Congressional Com-

mittee, having completed its labors, made its report to Congress to the effect that Lerdo had received 7,536 of the 8,288 votes cast in the republic, and was in consequence elected as constitutional President for the period to end on November 30, 1880.

Meantime, General Diaz, who had taken the field early in the year, and gained several advantages over the Federal troops up to the time of the proclamation of Lerdo's reelection, pushed on thenceforward determinately toward the capital, and achieved a decisive victory over the Government troops commanded by Antillon, near Huamantla. Soon afterward, on November 26th, Lerdo, accompanied by his cabinet and an escort of cavalry, evacuated the capital, and, after a short stay in Guerrero, gained the seaport of Sihuatanejo, and proceeded thence in a coasting-vessel to Acapulco, to meet the Panama steamer soon to call there on its way southward from San Francisco.

Before President Lerdo evacuated the city of Mexico, however, Señor Iglesias, up to that time Chief Justice of the Supreme Court, *pronounced*, issuing at Salamanca, State of Guanajuato, a *manifiesto*, under date of October 28, 1876, to the effect that, in truth, there had been no legal election for President in the republic, and consequently that, in accordance with the provisions of the Constitution, he, being *ex-officio* Vice-President, should be installed in place of Lerdo, whose period of office had expired, and who, not having been constitutionally reelected, should retire.

On the same day as his *manifiesto*, Iglesias put forth a *plan*, the more prominent points of reform proposed in which are as follows:

Non-reelection of the President for the period immediately following that of his incumbency in office.

Complete liberty in the next elections, with the express understanding that neither Iglesias nor any of his cabinet officers would be candidates.

Equalization of the revenues, estimates, and outlays of public funds, throughout the country.

Reorganization of the National Guard, and also of the regular army.

A profound respect for individual guarantees, and the acknowledged rights of man.

Special inviolability of the liberty of the press, and the suppression of subsidized newspapers.

Enforcement of the laws of personal protection under the Constitution.

Obedience to the decrees of judicial tribunals; and also the complete independence of the judicial power.

Development of the Department of Public Instruction, especially the section of elementary education, on the principles of free schools and obligatory attendance.

The development of interior improvements, especially building new lines of railroads.

Faithful observance of treaties existing with foreign nations.

For a time after Iglesias had issued his *manifiesto* and declared hostilities against the Government, Diaz feigned submission to the self-styled *de jure* President; but, after the downfall and flight of Lerdo, he turned his arms against the originator of the *plan* of Salaman-

ca, and forced him too to seek refuge in flight from the country.

DIÁZ (PORFIRIO), a Mexican soldier and statesman, President of the Mexican Republic, was born on September 15, 1830, in Oajaca, in the Institute of Science and Arts of which city he completed his education. He studied law rather as a brilliant accessory to his other acquirements than with the idea of attaining distinction in the forum.

In 1847 he joined the National Guard and was elected sub-lieutenant, and after the Guadalupe Hidalgo peace treaty he became lieutenant, and studied military science under Comandant Uréa until 1852, when he was made captain of artillery. After the triumph of the party that called Santa Anna to the dictatorship, Díaz, in a fit of discouragement, quitted the army, to devote his attention to the study and practice of jurisprudence.

At the outbreak of the revolution provoked by the *plan* of Ayutla in 1855, he again issued from retirement to the command of a battalion, and the post of political chief of the district of Ixtlan, in Oajaca, where he distinguished himself by his zeal as a patriot, and his consummate skill in organizing troops, spite of innumerable difficulties. Such were the persevering energy and indomitable courage displayed by him in the succeeding encounters with the reactionary troops, that early in May, 1860, he had achieved the complete pacification of the rebellious State of Oajaca, having been successively promoted to the rank of lieutenant-colonel and colonel.

The following year he was elected deputy to Congress; he was, however, present at the May session only; for in June he again took the field, joining the division led by General Gonzalez Ortega against the reactionary chieftain Márquez, the *Panther of the South*, and obtaining over the latter such a splendid victory as to elicit the admiration of his superior, who petitioned Government for the rank of general for Díaz.

But new and yet brighter laurels awaited the youthful general in the trying period of the intervention. At the head of a band of warriors from Oajaca he was the first to oppose the arms of the invader, and aided in deciding the victory of May 5, 1862. Shortly afterward he was appointed Governor and military commandant of the State of Vera Cruz, but was before long, at his own earnest entreaty, transferred to the army of operations.

Next proceeding to the capital, he successively declined the command of the garrison and the portfolio of war tendered to him by President Juárez; but, after the flight of the Government, he was constrained to accept the command-in-chief of the army, though on condition that he should be relieved after a short period, he apprehending that his youthfulness might give rise to embarrassing jealousies.

Leaving the Government installed at San Luis Potosí, he marched southward, and, in November, 1863, invested with full power for the administration and defense of the eastern States, took up his position between Puebla and Oajaca, the centre of his future operations. During the remainder of the period of intervention, he constituted the main stay of the republican cause, through an uninterrupted series of difficulties and hardships; and, with

MARATLÁN.

an effective force that never exceeded 5,000, including all arms, composed of troops for the most part ill-armed and ill-munitioned, and with insufficient means of support, he stemmed and turned the tide of invasion. Besieged in Oajaca, he was forced to capitulate in February, 1865; retained a prisoner in Puebla, he escaped in the following September; after the lapse of another twelvemonth, he again led the army of the East, now barely 900 strong, to victory at Miahuatlan, routing a thoroughly-equipped army of double that number; he recaptured Puebla on April 2, 1867, and continued his triumph until the surrender of the capital to the patriot forces, June 21st of the same year.

After the final reconstruction of the republic throughout the country, Díaz, modestly declining (for the second time) the post of Minister of War, and other proffered honors, withdrew, another Cincinnatus, to the peaceful and tranquil retirement of his estate (la Noria) in Oajaca.

In the election of October, 1867, Diaz was an unsuccessful candidate against Juarez for the presidency of the republic; and in the revolutions which successively marked the five years immediately following, he and his partisans were the chief actors. It was during that interval that Diaz paid a short visit to the United States. He again came forward as candidate against Juarez in 1871, but with no better fortune than before. After the death of the Indian President, Diaz offered no opposition to the candidacy of Lerdo; nor did any warlike movement on his part intervene between that time and the publication, in 1876, of the *plan* of Tuxtepec, and the beginning of the revolution which ended in the flight of Lerdo and Iglesias from the republic, and assumption of the supreme power by General Porfirio Diaz.

MICHIGAN. The following is a summary exhibit of the financial transactions of the

The equalization of assessments of property which takes place every five years, was made by the State Board of Equalization this year with the following result:

STATE SEAL OF MICHIGAN.

State Treasury during the fiscal twelve months closing on September 30, 1876:

Gross receipts into State Treasury.....	\$1,744,406 29	
Balance in Treasury October 1, 1875.....	1,229,106 50	
Total for period.....	\$2,973,512 79	
Gross expenditures during same time.....	1,908,507 49	
Balance September 30, 1876.....	\$1,064,005 30	
Decrease of balance during year.....	\$165,101 20	
As stated above, the gross Treasury receipts were.....	\$1,744,406 29	
This covers the price of State swamp-land expended in the construction of swamp-land State roads, being not cash.....	84,445 67	
Leaving for net cash receipts during the period.....	\$1,709,960 62	
Of cash there was received as net revenue.....	\$581,560 68	
And from refunding and reimbursements.....	80,585 80	562,145 98
Leaving for net cash receipts from legitimate sources of revenue.....	\$1,147,814 69	
The net cash revenue receipts were:		
From direct taxes.....	\$475,588 85	
From specific taxes.....	527,565 59	
From trust-funds.....	72,775 15	\$1,075,924 59
Miscellaneous.....	71,890 10	
Total ordinary revenue receipts.....	\$1,147,814 69

The following is the valuation of the several State institutions:

University.....	\$488,500
Agricultural College.....	252,800
Normal School.....	62,700
State Public School.....	153,880
Institution for Deaf, Dumb, and Blind.....	488,000
Michigan Insane Asylum.....	1,405,280
Eastern Insane Asylum.....	230,000
Reform School.....	245,340
House of Correction at Ionia.....	111,000
State-prison.....	589,000
Total.....	\$3,910,500

The State bonded debt was reduced during the year \$53,000, and during the four preceding years \$351,142.81. Of this amount \$389,142.81 were matured bonds, and \$462,000 bonds not matured, which were taken up in advance on payment of a premium of \$6,043.45. The cash remaining in the Treasury applicable to the payment of the bonded debt was \$485,168.82. Deducting this from the existing bonded debt leaves \$906,980.99. The trust-fund debt of the State is as follows:

Primary-school fund.....	\$2,259,382 01
Five per cent. primary-school fund.....	299,676 59
University fund.....	844,555 78
Agricultural College fund.....	116,827 68
Normal School fund.....	58,801 82
Railroad and other deposits.....	3,408 38
Total.....	\$3,079,846 71

The lands now belonging to the State are:

	Acres.
Primary-school lands.....	869,919.18
Primary-school indemnity.....	49,178.29
Primary-school forfeited.....	25,699.11
Agricultural College.....	162,400.84
Agricultural College forfeited.....	2,898.40
Salt-spring land.....	1,815.68
Salt-spring forfeited.....	280.00
Asylum.....	680.00
Asylum forfeited.....	1,060.00
University.....	200.00
University forfeited.....	98.25
Normal School forfeited.....	160.00
Internal improvement.....	880.81
Asset (received in settlement of claims).....	3,850.90
Swamp-land.....	2,405,017.98
Swamp indemnity.....	46,718.19
Swamp forfeited.....	3,868.00
Total acres.....	3,073,290.91

In the Insane Asylum, at Kalamazoo, there were, on September 30th, 618 inmates, an increase within two years of 137. Weekly cost of support per patient, \$4.87. Number of insane in the State according to reports of Superintendent of the Poor, 1,193. A new asylum at Pontiac is in course of construction, and will be nearly or quite ready for reception of patients within a year.

The State Public School, at Coldwater, constructed to furnish homes and education for children who are objects of bounty, has received since it was opened 412 children, of whom 255 still remain. The most of these were taken from the poor-houses of the State. Places are found for these in private families as rapidly as opportunities offer.

The State Reform School for Juvenile Offenders, at Lansing, is reported as in a very satisfactory condition. Governor Bagley, in his retiring message, reports it as a Reform

School in fact: "The bars and iron doors have disappeared, the high fence that walled it in is kindling-wood. And the results are, no corporal punishment, no escapes since its opening, less destruction of State property, a general tone of comfort and cheerfulness in all its surroundings, and a brighter, better look on the faces of the boys. The general outfit of the school is greatly improved. The table and furnishing, the clothing, etc., are better than heretofore, and all tend toward lifting this institution out of the prison-mire, and on to the higher plane of a school." Average number in the school, 230; average age when received, thirteen and a half years. The Board of Control recommend that boys over eight may be received from their parents without commitment, and that the limit of confinement be fixed at eighteen instead of twenty-one, as at present. Governor Bagley says:

In the provision made by the State regarding vagrant, neglected, and dependent children, through the State Public School, and for criminal children through the Reform School, it has followed the old idea of institutional life; but by far the wisest, most economical, natural, and humane of all its endeavors in this direction is the work being done by the county agents of the State Board of Charities, under the law of 1873 and 1875. The duties of the county agents are, to investigate the case of every child arrested for crime, and to advise with the magistrates as to the disposition to be made of it, to visit children adopted or indentured from the Public or Reform School, to procure homes for children, and generally to keep watch and ward over these waifs who seem to be deserted by every one but the State. They have attended to 252 cases of arrests for crime—224 boys and 28 girls—that were disposed of as follows: 182 were discharged under suspended sentence and returned to parents or guardians, 57 were sent to the Reform School, 11 were sent to the House of Correction, and two were fined. The average age of children arrested was twelve and three-fourths years; 86 are reported as having lost fathers, and 57 as having no mother. Of the 182 discharged, 12 were sent to the State Public School, six to poor-houses, and homes were found for six. The children for whom homes were found from the State Public School—117 in number—have all been visited and their situation reported upon to the school. The total expense of this work up to September 30, 1876, was \$474.45. In addition to these formal duties required by law, they have been of incalculable service in preventing crime, preserving peace in families, restraining cruelty, and in many other ways. If the work of these agents was to be estimated by simply dollars and cents, the amount of money saved the State by keeping boys out of institutions would be found to be very large.

The following are the statistics for the year relating to primary schools:

Number of towns and cities.....	1,004
" " districts.....	5,834
Average wages per month, males.....	\$45 50
" " " " females.....	\$28 78
Number of children between ages of five and twenty years.....	450,847
Increase for the year.....	10,666
Whole number of children that attended school during the year.....	344,956
Average number of months schools were taught.....	7.3
Number of volumes added to district libraries during the year.....	16,413
Paid for books for district libraries.....	\$16,269 74
Number of volumes in district libraries.....	141,478

Number of school-houses.....	5,661
Number of pupils who can be seated.....	426,611
Value of school-houses and lots.....	\$9,257,094
Number of graded schools.....	299
" " qualified teachers employed, males.....	8,548
" " " " " females.....	9,231
Total wages of teachers for the year, males.....	\$787,775 88
" " " " " females.....	1,238,949 86
Number of volumes added to town libraries during the year.....	5,115
Whole number of volumes in town libraries.....	55,875
Number of new districts organized.....	140
Number of private or select schools in the State.....	170
Number attending private or select schools, as near as may be known.....	8,008
Money on hand September 4, 1876, belonging to the several districts.....	\$598,505 71
Two-mill tax.....	512,889 89
Received from primary-school fund.....	290,996 27
From tuition of non-resident scholars.....	85,466 96
District taxes for all purposes.....	2,261,119 55
Raised from all other sources.....	242,389 85
Total resources for the year.....	4,067,801 68
Paid male teachers.....	736,886 15
Paid female teachers.....	1,225,818 95
Paid for building and repairs.....	451,426 49
Paid on bonded indebtedness.....	846,780 20
Paid for all other purposes.....	820,949 84
Amount on hand September 4, 1876.....	609,296 17
Total expenditures for the year, including amount on hand.....	4,067,801 68
Bonded debts of the districts September 4, 1876.....	1,553,534 45
Total indebtedness of districts September 4, 1876.....	1,673,710 99

The number of pupils in the Asylum for the Deaf, Dumb, and Blind, is: Mutes, 178; blind, 42; total, 220. Cost per head of maintaining them, \$177.33. Very few are reported in the State as needing such an institution who have not been gathered in here.

The State-prison is reported as greatly overcrowded. Number confined at end of the year, 835; increase within the year, 47. Of those received within the year 77 per cent. were intemperate. The State-prison is more than self-supporting, the net earnings for the last two years being about \$20,000.

The report of the Board of Commissioners on Charitable, Penal, Pauper, and Reformatory Institutions estimated the number of persons receiving aid or wholly supported by the State and counties to be as follows:

In county poor-houses.....	5,583
Temporarily relieved outside.....	35,240
State Public School.....	255
Asylum for Insane.....	1,016
Institutions for Mutes and Blind.....	250
Harper Hospital, Detroit.....	51
Detroit House of Correction.....	2,896
State-prison, Jackson.....	1,094
Reform School.....	380
County jails.....	7,256
Total.....	54,210

In estimating the cost of supporting these persons, it is assumed that the State-prison and House of Correction are self-supporting. Expenses of other support:

For paupers in poor-houses, exclusive of value of labor.....	\$287,197 90
For temporary relief.....	255,579 88
For transportation.....	12,646 61
For the insane.....	122,600 64
For deaf, dumb, and blind.....	42,500 00
For boys in the Reform School.....	26,235 88
For children in State Public School.....	28,403 49
Total.....	\$725,168 00

The cost of maintaining jails for the year is estimated at \$102,767.60. The condition of jails is said to be wretched beyond description, though not exceptional as compared with those of other States. A large majority of the prisoners are innocent in point of law, nothing, as yet, having been proved against them; they are accused only; they are forced into the society of hardened criminals. The promiscuous association of all classes of accused prisoners, with no possible employment or occupation, is declared to be demoralizing in a high degree, and the question is asked: "If the State, while it has a right to punish, has no right to contaminate, may not the prisoner claim protection from such contamination, and especially if he be innocent, as nearly all in jails are in point of law, may he not claim of the State protection from the criminal contagion to which the jail system exposes him? If he is but accused of wrong, shall he be placed in circumstances where nothing tends to repress crime, but all instrumentalities are active to generate it? Accused persons are, in fact, held by the State as but hostages for justice. The State has no right to impair the security, no right to take an innocent man and expose him to such damage that, after having failed to make out a case against him, it returns him to society a worse man actually than he would have appeared if simply guilty of the accusation against him."

The gross amount of taxation levied in the State for all purposes is estimated by Governor Bagley at \$15,000,000. The indebtedness of the incorporated cities is \$6,584,590.48. No report is made of other municipal indebtedness. The following reference is made in the message of the retiring Governor to the liquor-traffic of the State:

The law of 1875 providing for the regulation and taxation of the liquor-traffic has been in operation nearly two years. It was the purpose of the friends of this act not only to regulate but to restrain the traffic in strong drink that had grown to be, under other laws, the greatest evil of the day. For the purpose of ascertaining what has been accomplished under it, I addressed the treasurer of each county, asking for full details of the operation of the law in their respective counties. A tabulated statement of the replies, together with a report made by the Auditor-General for 1875, by the same officers, is published herewith. The information is somewhat incomplete, but is probably as near correct as could be expected.

In 1875 the number assessed, as reported to me, was 4,974. Of these, 4,215 paid the tax, amounting to \$481,462.93. It is altogether probable that those who have not paid have retired from the business. In 1876 the number assessed was 4,653. Of these, 3,385 are reported as having paid the tax, amounting to \$384,387. The collectors of internal revenue report the number of persons assessed in 1876 by the General Government as dealers in liquors as 5,338, but this includes druggists, who, as a rule, are not assessed under the State law; while in 1874 the number assessed was 6,444, showing a decrease of 1,106 in two years. It is evident, therefore, that the act of 1875 has decreased the number of places where liquor is sold very largely. As many of the persons assessed have retired from the business, and others

have been assessed for periods less than a year, I estimate from the reports that there are about 4,000 places for the sale of liquors in that State.

The official reports of the police-officers of the cities of Detroit, Grand Rapids, East Saginaw, and Jackson, report 3,974 arrests for drunkenness in 1874, 3,232 in 1875, and 3,228 for 1876. This decrease of drunkenness, and of places where humanity is made barter of and dollars traded for degradation, must be gratifying to every citizen.

The reports show very generally that behind this law there stands a public sentiment that says, Enforce it. There are counties, however, as shown by the reports of 1876, in which it has not been properly enforced. This is notably the case in Bay, Houghton, Ingham, Jackson, Kent, Lapeer, Marquette, St. Clair, Saginaw, and Wayne Counties. Some of the officers whose business it is to enforce the law have lost sight of the restrictive and restraining idea underlying it, and, rather than close up the business, have fostered it by accepting monthly payments on account. I find this system in vogue quite extensively. There is no time fixed in the law for the collection by the sheriff, or for return of warrant by him. I suggest, therefore, that the law be amended, giving the Treasurer a certain specified number of days in which he may receive the tax, giving to the sheriff not exceeding thirty days in which to collect, and five days additional in which to make his return. When his return is made, he should be required to furnish a copy of it to the prosecuting attorney of the county, whose duty it should be to commence proceedings at once in all cases where the tax has not been paid.

The general business of the State was greatly depressed during the whole year. In the lumber-regions it was especially dull, though mills were kept in operation to an extent that decreased steadily the stock of lumber remaining on hand at the places of manufacture and at points of storage. The iron and copper interests were characterized by no activity. Report of production for taxation—copper, 15,164 tons; iron, 799,645 tons. In the manufacture of salt it was different. The report of inspection for the year shows the following result:

Fine salt, barrels.....	1,402,410
Packers' salt, barrels.....	14,298
Solar salt, barrels.....	94,418
Second quality, barrels.....	91,668
Total.....	1,462,729

This would amount in bushels to 7,813,645, an increase of 1,904,820 bushels or 380,864 barrels over the preceding year. The manufacturers were pretty effectually united in a combination, and nearly all the salt sold passed through the hands of an association which allowed on receiving it a certain price, and sold in its discretion. The amount in the hands of the association at the end of the year was very large.

In fish-culture since December 1, 1874, the State has expended \$28,057.20. Of white-fish, 12,400,000 have been placed in the waters of the State; of salmon, 1,470,000; of lake-trout, 150,000. The results thus far are very satisfactory. Salmon are occasionally caught, and promise finely. A large stock of eggs of salmon and white-fish is on hand and being hatched in the Detroit and Pokagon hatcheries.

In respect to education, as there was no

session of the Legislature, there is little to report beyond the usual statistics of the primary schools. The State University had its usual prosperity, modified somewhat by the very determined opposition of a portion of the "regular" medical profession, growing out of the establishment of an homœopathic school. This diminished the attendance of medical students somewhat, but not so greatly as was anticipated. The two medical schools had no connection whatever, except that students in the new school were admitted to some of the lectures in the old. The Agricultural College had a year of prosperity, with the exception of the accidental destruction of one of the dormitories by fire. Number of students, 166; number graduated, 17. The college held in January a series of six institutes in different parts of the State, which were largely attended by farmers, and at which papers were discussed. About one-half of these were presented by farmers. The State Normal School was attended by 722 students, an increase of 286 in two years. Its condition under the management of Principal Estabrook is in every respect prosperous. The statistics of primary schools, so far as yet received, are the following:

Number of children between ages of five and twenty.....	457,785
" attending public schools.....	343,947
" of school-houses.....	5,917
" of sittings in school-houses.....	419,662
" of teachers employed.....	12,900
Value of school-buildings and grounds.....	\$9,862,970 00
Total school expenditure for the year.....	4,128,707 00
Indebtedness of school-districts.....	1,674,175 00
Annual income from primary-school fund held by State.....	214,860 88

A convention of the Republican party of Michigan, to appoint delegates to the Republican National Convention at Cincinnati, was held at Grand Rapids on May 10th. The following delegates at large were chosen: Henry P. Baldwin, William A. Howard, Silas S. Tyler, and Jonathan J. Woodman.

The following resolutions were adopted by the convention:

We, the Republicans of Michigan, in convention assembled, in this Centennial year of the nation's life, reiterate our firm and abiding faith in the principles of the Republican party as enunciated in former national platforms, while we point with pride to the party's glorious record of grand achievements in behalf of freedom, equal rights, and good government. We exult in the reflection that from the day of the party's organization within the borders of this State to the present time the people of Michigan have attested their steadfast fealty to the party's true views and purposes. In the unbroken line of Republican victories we recognize the fact that no past achievements or declaration of principles, however just and patriotic, will deserve or can alone secure success without candidates of known ability, integrity, stability, and character. Therefore—

Resolved, That the delegates this day chosen to represent us in the forthcoming National Convention be requested to act in the convention with harmony and as much unity among themselves as is possible; that they extend all proper courtesy to other delegations, and treat with deference the opinions of those representing States less reliably Republican than our own; but under no possible cir-

circumstances may they yield anything of Republican principle. While we are willing to waive personal preferences, our delegates must never consent to commit Republican principles to any standard-bearer of doubtful position, or to one who does not, in his own character, afford an assurance of practical economy, honesty, and purity, in all matters of administration.

The convention of the Democratic party, to appoint delegates to the Democratic National Convention at St. Louis, assembled at Lansing, on May 24th. A majority and a minority report were made by the Committee on Resolutions. The majority report was adopted by a vote of 157 to 70. The report was as follows:

The Democrats of Michigan in convention assembled, considering that, by a departure from the principles on which our nation was formed, the Government of the country is being changed from a Federal Union of States to a centralized oligarchy; that the powers and trusts conferred by law, instead of being used for the benefit of the whole people, are used by officials for their private and personal benefit; and with a view, so far as is in our power, of correcting these evils, declare that we recognize the following as principles held by the constit-

5. That while political parties are necessary agencies in administering the Government, yet the love of party should always be subordinate to patriotism, and if unfit persons are nominated such action is not binding.

6. That no party deserves success at the polls except upon the basis of unselfish devotion to the best good of the whole people.

7. Leaving details to legislators, we reassert that coin is the only money recognized by the traditions of the Democratic party as warranted by the Constitution.

8. That when a party has been in power so long that the principal part of its office-holders have become corrupt, it is impossible to obtain genuine reform within the party.

9. We recommend to all local Democratic conventions to place in nomination such men only as are known to be honest, capable, and efficient men, who have the confidence of the community, and who, if elected, will strive to lessen the burden of taxation on the people.

10. That we have confidence that our delegates to the National Convention will support only those who are proper representatives of the foregoing principles, and we leave them free to exercise their discretion as to the choice of men best fitted to bring about thorough reform in the administration of our national affairs; that in the interest of pure government outraged, free institutions imperiled, and to

redeem the American name from the stigma attached to it by the corruptions of the party in power, we cordially invite the cooperation of all honest men, irrespective of former party affiliations.

The Republican Convention to nominate candidates for State offices assembled at Lansing, on August 3d. The following nominations were made: For Governor, C. M. Crosswell; Lieutenant-Governor, Alonzo Sessions; Secretary of State, E. G. Holden; State Treasurer, W. B. McCreery; Auditor-General, Ralph Ely; Land-Commissioner's Office, B. F. Partridge; Attorney-General, Otto Kirchner; Superintendent of Public Instruction, H. S. Tarbell. The resolutions adopted were substantially as follows:

NEW STATE CAPITOL AT LANSING.

agency we represent, and we personally pledge ourselves to labor for their general adoption, viz.:

1. That the officers under our system of government have and should exercise only such powers as are conferred upon them by law, and these should be used only for the good of the whole people, without reference to party.

2. We utterly repudiate the idea that there can be any spoils of office for victors in an honest administration of the Government.

3. We repudiate the idea that candidates have a right to manipulate conventions and thrust themselves into nomination.

4. That the use of money to influence elections is demoralizing to the people, and any candidate who will seek by the use of money to influence nominations or elections is unworthy of support.

The first affirms allegiance and fidelity to the declarations of principles and the nominees of the Republican National Convention, and declares that the letters of acceptance of the candidates are a sure guarantee that the party's record in the future, as in the past, will be distinguished for the preservation of the Union, faithfulness of its financial engagements, protection to all in the equality of civil and political rights, and a prompt and efficient reform in the Government service.

The second resolution declares that the history of the party appeals to the patriotism of to-day; that, with a Treasury exhausted in 1861, it created unlimited financial credit; that, with eleven States defying the national authority and a gigantic rebellion inaugurated, it boldly met the crisis with a patriotism and energy unequalled in history; that,

with the rebellion closed and the Union saved, it amazed the world by its masterly management of its disbanded armies, and in the exhibition of an unheard-of amnesty; that it gave to a race liberty and citizenship; that the magnitude of the national debt it has reduced in nine years nearly one-fourth; that it has steadily lessened the burden of taxation; that its record is its character, and it proudly points to it as a sure guarantee of future fidelity to its trusts.

The third resolution invites the cooperation and support of all fair-minded and patriotic men in securing the election of our candidates, and the continued ascendancy of our principles, until the civil and political rights of every citizen, native or foreign born, black or white, shall be respected and maintained in every part of the Union.

The fourth declares that the able, honest, and faithful administration of our State affairs by our present State officials entitles them to the gratitude of the people, and that the record of their administration, with that of their Republican predecessors, cannot fail to challenge the admiration of all fair-minded men.

The fifth is as follows: "We present to the electors of the State the ticket this day nominated, and earnestly commend each name thereon as worthy of the united and hearty support of the people of this Commonwealth."

The Democratic Convention to nominate candidates for State officers was held in Detroit on August 9th. It nominated the following ticket:

Governor, W. L. Webber; Lieutenant-Governor, Julius Houseman; Secretary of State, George H. House; Treasurer, J. G. Parkhurst; Auditor, General F. M. Holloway; Commissioner of the Land-Office, C. W. Green; Superintendent of Public Instruction, Zelotus Truesdell.

The following platform was adopted:

1. The Democracy of Michigan, in convention assembled, affirm their abiding faith in the traditional principles of the Democratic party, namely: Strict construction of the Federal Constitution; local self-government; the strict responsibility of public officials to the people; hostility to sumptuary laws and to undue protection, by Federal legislation, of special and local interests.

2. We declare that the supreme object of political action at the present time is to bring about such a reform in public administration as shall remove from office the men and the party whose corruptions have dishonored the republic at home, and disgraced it in the sight of foreign nations, and shall restore to the people under a Democratic Administration a just, honest, economical, and constitutional government.

3. In the declaration of principles adopted by the National Democratic Convention at St. Louis, we recognize a just and explicit statement of Democratic principles, and an unanswerable presentation of the necessity of reform in the administration of public affairs, and we hereby declare our unqualified assent to the same.

4. The Democracy of Michigan demand in our public servants, both State and national, honest capability and fidelity, as guarantees of good government, and in our national standard-bearers, as well as in the candidates for State offices nominated by this convention, we recognize men who possess preëminently these qualifications, and we pledge them our cordial support to the end that, in their triumphant election, may be inaugurated the reforms demanded by the people and so essential to the very existence of good government itself.

5. We declare our devotion to the Federal Consti-

tion, with all its amendments, and insist that it is the paramount duty of every State government to protect in the enjoyment of all their rights all law-abiding citizens, of whatever nationality or color, and to bring to conviction and punishment all persons guilty of the violation of the laws.

At the general election, held in November, the following was the result:

PRESIDENT.	
Hayes (Republican).....	166,901
Tilden (Democratic).....	141,695
Cooper (Greenback).....	9,060
Smith (Temperance).....	767
"Anti-Secret Society".....	75
Republican plurality.....	25,206
GOVERNOR.	
Charles M. Crosswell.....	165,926
William L. Webber.....	142,492
L. Sparks (Greenback).....	8,207
A. Williams (Temperance).....	870
Crosswell's plurality.....	23,434

The following were the other State officers chosen on the Republican ticket: Secretary of State, E. D. G. Holden; State Treasurer, William B. McCreery; Auditor-General, Ralph Ely; Attorney-General, Otto Kirchner; Commissioner of the State Land-Office, B. F. Partridge; Superintendent of Public Instruction, H. S. Tarbell; member of State Board of Education, Witter J. Baxter.

The following is the vote for members of Congress:

FIRST DISTRICT.		
	No. of Votes.	Plurality.
Williams (Democratic).....	14,471	2,054
Duffield (Republican).....	12,417
Ruehle (Greenback).....	1,736
SECOND DISTRICT.		
Willets (Republican).....	19,211	2,187
Robinson (Democratic).....	17,024
Granger (Greenback).....	506
THIRD DISTRICT.		
McGowan (Republican).....	19,876	2,658
Livermore (Democratic).....	17,228
Thomas (Greenback).....	1,025
FOURTH DISTRICT.		
Keightley (Republican).....	18,716	2,886
Chamberlain (Democratic and Greenback).....	16,830
Scattering.....	6
FIFTH DISTRICT.		
Stone (Republican).....	21,908	3,363
Harris (Democratic and Greenback).....	18,546
Scattering.....	50
SIXTH DISTRICT.		
Brewer (Republican).....	23,856	1,741
Durand (Democratic).....	21,615
Scattering.....	9
SEVENTH DISTRICT.		
Conger (Republican).....	15,818	2,641
Chadwick (Democratic).....	13,177
Whiting (Greenback).....	289
EIGHTH DISTRICT.		
Ellsworth (Republican).....	16,098	889
Potter (Democratic).....	15,760
NINTH DISTRICT.		
Hubbell (Republican).....	18,224	5,568
Kilbourne (Democratic and Greenback).....	12,656

At the same election three amendments to the constitution were voted upon: 1. Strik-

ing out the provision in the constitution which prohibits licensing the sale of liquors, which has been in force twenty-five years. Adopted—yes, 60,689; no, 52,561. 2. Allowing constitutional amendments to be voted upon in the spring. Adopted—yes, 52,306; no, 21,984. 3. Increasing salaries of circuit judges from \$1,500 to \$2,500. Defeated—yes, 65,371; no, 65,966.

At the Centennial Exhibition at Philadelphia the State was represented very satisfactorily—the exhibition being under the general management of a board consisting of the Governor, and Messrs. M. I. Mills, J. J. Woodman, H. Fralich, and J. A. Hubbell. The following persons had charge of different departments: Educational, D. C. Jacokes; Mineral, S. Brady; Agricultural and Pomological, C. E. Inglefritz. The Michigan building was constructed entirely of Michigan wood, slate, and stone, and was a good specimen of neat and substantial architecture, constructed for comfortable occupation. The number of Michigan visitors registered there was over 81,000. The exhibits made by the board consisted of 1,200 varieties of woods and shrubs, 210 varieties of grasses sent by the Agricultural College, 540 samples of wool, 500 specimens of grains and seeds, 475 specimens of iron, copper, and gypsum, 40 of salt and salt-brine, many samples of building-stone and slate, 370 archaeological specimens illustrative of prehistoric ages, 475 specimens of fruit. Of the show of fruit, Mr. Landreth, the Superintendent of the Agricultural Department of the Exposition, says: "It at all times exceeded that of any other State, and in the aggregate more than doubled the quantity sent from any other State, while the variety and quality were unexampled. The display of fruit alone was of incalculable value as a means of directing the thoughtful to the resources of Michigan."

MICROMETER-TELESCOPE. The portable micrometer for finding distances, invented by Rogers, is an adaptation of the divided-object-glass principle originated by Dolland. This method of determining distances has been used in astronomical observations, and large instruments on this principle have been in use for some time; but a portable micrometer, for use on shipboard or in land and harbor surveys, is a new and valuable idea. The Rogers micrometer has considerable advantages over the Rochon micrometer, the only smaller instrument of the kind before used, being more compact and manageable, and much more accurate. By a new arrangement of the slides and micrometer-screw, the compact form is obtained, which is convenient enough for use in a ship, boat, or on horseback. The readings are taken by combining the number indicated on a revolving micrometer-head in front of the object-glass, and the number indicated on a sliding scale. Each instrument is provided with both an ordinary eye-piece magnifying fourteen diameters, and an invert-

ing eye-piece magnifying ten diameters. The corrected zero-reading, the number of micrometer-divisions, and the value in seconds of the arc of each division, can be determined at any time by brief calculations. The index-correction, or the difference between the indicated zero-reading and the absolute reading, must be applied in all observations. The angle, subtended by a vertical object, can be directly noted in terms of the micrometer-divisions. The height of an object being known, its distance is found by multiplying the height into the cotangent of the angle it subtends (formula: $d = h \times \frac{1}{\tan. x}$). The values of all angles in terms of the micrometer-divisions may be made into a table for each instrument for the sake of convenience. By means of three or more spars of known height set up on the shore, a complete harbor-survey can be made of a harbor with the micrometer. Among the various uses to which this inestimable instrument can be applied are: to survey an anchorage; to find the position of a vessel in reference to a lighthouse; to observe the relative positions of ships in a fleet; and to observe whether a pursuing or fleeing vessel is losing or gaining ground.

MILMAN, ROBERT, Bishop of Calcutta, born in 1816; died March 15, 1876. After receiving an education at Westminster School and Exeter College, Oxford, he was ordained in 1839, and was, successively, Curate of Winwick, Northamptonshire; Vicar of Chaddleworth, Berks; Vicar of Lambourne, Berks; and Vicar of Great Marlow, Bucks. In 1867 he was consecrated Bishop of Calcutta, in succession to Dr. Cotton, who was drowned in India, in October, 1866. He was the author of the following works: "The Life of Tasso" (2 vols., 1848), "Conversion of Pomerania," "Love of the Atonement," "Meditations on Confirmation," "Voices of the Harvest," and "The Way through the Desert; or, the Caravan" (1850).

MINNESOTA. The State of Minnesota has a Bureau of Statistics, under the charge of Commissioner J. B. Phillips. The labor of obtaining returns and making up the annual report necessarily keeps the statistics about one year behind, those for 1875 being made up in 1876. According to the last report, the product of the leading grains in 1875 was as follows:

GRAINS.	Acres.	Bushels.
Wheat.....	1,092,501	28,969,835
Oats.....	401,744	18,641,825
Corn.....	238,614	7,165,293

The number of acres sown in 1876 was: wheat, 1,860,421; oats, 482,745; corn, 301,315. The wheat-crop of this year was comparatively a failure, the yield scarcely exceeding eight bushels to the acre, while the average of other years has been over 17 bushels. In 1875 the product of butter was 12,029,372 pounds; cheese, 1,009,999 pounds. Great interest has been taken in tree-planting, and over 10,000-

000 trees have been planted in groves, and a large number by waysides and about dwellings.

The total valuation of taxable property in the State, as determined by the Board of Equalization, for the year 1876, was \$218,850,744, a decrease of \$4,999 from that of 1875. The State tax is two mills on the dollar, and the average rate of taxation throughout the State for all purposes is 1½ per cent. The receipts of the State Treasury, for the year ending November 30th, were \$1,151,649.79, including a balance of \$130,245.29 on hand at the beginning of the year. The disbursements amounted to \$1,035,385.50, leaving an unexpended balance of \$116,264.29. A suit brought against the Chicago, Milwaukee & St. Paul Railroad Company, to determine the amount due the State in lieu of taxes, resulted in the recovery of about \$50,000. The total amount paid by the railroads of the State in taxes on their gross earnings, in 1875, is \$131,559. There are now 1,984 miles of railroad in operation in the State. The only addition made this year was about 80 miles of the Worthington & Sioux Falls road, from Worthington to Luverne. The following table presents the important railroad statistics of the year:

RAILROADS.	Tonnage.	Passengers.	Gross Earnings.
Chic., Mil. & St. Paul, R. D.	154,228	145,238	\$645,559
Chic., Mil. & St. Paul, H. & D.	24,055	18,510	68,750
Chic., Mil. & St. Paul, I. & M.	285,642	120,805	725,928
Chic., Dubuque & Minnesota.	95,975	6,000	25,561
Central Minnesota.	21,968	6,900	46,080
Lake Superior & Missisippi.	285,898	59,776	566,479
Minneapolis & St. Louis.	145,614	40,709	141,860
Northern Pacific.	86,759	25,489	476,232
St. Paul & Sioux City.	225,795	67,287	623,740
Sioux City & St. Paul.	118,909	18,255	169,028
St. Paul & Pacific, main line.	186,196	280,540	624,022
St. Paul & Pacific, branch.	64,827	191,996	382,022
St. P., Stillwater & Taylor's Falls.	79,879
Southern Minnesota.	198,868	55,226	691,567
Winona & St. Peter.	288,681	129,678	641,929
Winona, Mank. & North Ulm.	10,840	18,233	4,189
West Wisconsin.	73,105	66,008	93,678
Total.	2,079,568	1,169,079	\$4,000,968

The total operating expenses of these roads during the year were \$4,182,140, leaving the earnings over operating expenses \$1,798,424.

The number of insurance companies doing business in the State is 86; total assets, \$94,023,234.41; liabilities, \$68,791,025.79. Only two of these companies were organized in the State. The total amount paid by citizens of the State for insurance, in 1875, was \$1,027,699.67; losses paid in the State for the same year, \$422,362.12.

The penal and charitable institutions of the State have all been built up in the last ten years. The amount expended for buildings is as follows:

State-prison.	\$202,297 66
Inane Asylum.	478,969 00
Deaf and Dumb and Blind Asylum.	142,500 00
State University.	109,850 00
Reform School.	75,200 00
Normal schools.	928,861 52
Total.	\$1,235,178 38

The expense of supporting the State-prison during the past year was \$39,406.78, while its earnings amounted to \$18,156.87, leaving \$21,247.91 as the net cost to the State. There were 166 inmates at the end of the year, and the average number was 158½.

The number of patients in the Insane Asylum at the beginning of the year was 434; admitted during the year, 353; discharged, 157; number remaining at the end of the year, 530.

The number of pupils at the Institution for the Deaf, Dumb and Blind, during the year, was 125, of whom 103 were in the deaf and dumb and 22 in the blind department. The amount asked for the support of the institution in 1877 is \$28,000, and an appropriation of \$40,000 is called for to complete the buildings.

The Reform School had 139 inmates at the close of the year.

An Inebriate Asylum has been organized, and a farm of 160 acres purchased at Rochester for the sum of \$9,000, on which buildings are to be speedily erected.

The Home for Soldiers' Orphans contained 59 inmates at the end of the year.

The whole number of school-districts in the State is 3,581; number of school-houses, 3,119; value of school-houses, \$2,768,464; number of scholars enrolled, 151,866. The permanent school-fund of the State is \$3,390,000, and there are school-lands enough, if sold at prices equal to those heretofore obtained, to swell it to \$26,000,000. The State has three normal schools: one at Winona, with an average attendance during the year of 302; one at Mankato, with an attendance of 140; and one at St. Cloud, with 165. The State University is in a flourishing condition, and had about 300 students during the year.

The eighteenth annual session of the Legislature began on the 4th of January, and came to a close on the 6th of March. There were 404 acts passed, a large portion of which related to the powers and privileges of counties, towns, and cities, or were in amendment of existing statutes. Very few acts were of any general interest or importance. Three amendments of the constitution were proposed. One of these changed Article IV., section 11, so as to give the Governor the power to veto separate items in appropriation bills without withholding his approval from the rest. Another modified Article VI., section 3, so as to authorize the Governor to assign one or more judges of district courts to act on the supreme bench when all or a majority of the judges of the Supreme Court shall from any cause be disqualified from sitting in any case. The third affected Article X., section 5, and declared that each stockholder in a corporation should be "liable only for all unpaid installments on stock owned by him, or transferred for the purpose of defrauding creditors." An act was passed conferring upon women twenty-one years of age and upward, who have resided in the United States one year, and in the State four

months, the right to "vote at elections for school officers and in matters pertaining to the management of schools." Women so entitled to vote are also declared to be "eligible to hold any office pertaining solely to the management of public schools." An act providing for limited divorce gives the district courts and courts of Common Pleas authority to decree separation from bed and board forever or for a limited time, on the complaint of a married woman, if she and her husband are inhabitants of the State, if the marriage was solemnized in the State, and the woman resides there when exhibiting her complaint, or if the marriage was solemnized elsewhere, but both parties have resided in the State one year, the

STATE SEAL OF MINNESOTA.

causes for which such separation can be decreed being cruel and inhuman treatment by the husband, such conduct on his part as makes it unsafe or improper for the wife to cohabit with him, and abandonment by the husband and refusal or neglect to provide for the wife. An act was passed to regulate the storage of grain, providing for the rights of the owner to have his property kept separate, and to retain his control and ownership. Another act provided for the creation of safety-funds by fire-insurance companies as security against losses by extraordinary conflagrations. Companies are authorized but not required to create guarantee-surplus funds and special-reserve funds out of the surplus of profits over and above ten per cent. of the capital stock. Once they have filed with the Insurance Commissioner an intention to create such funds, they cannot declare dividends of more than ten per cent. until the guarantee and special funds shall be equal to the whole capital stock. These funds must be invested as security against extraordinary losses. A general act was passed regulating the organization of mining and manufacturing companies. Solitary imprisonment, except for prison discipline, was abolished. Provision was made for the inspection of illuminating oils manufactured from petroleum, and for the punishment of adulteration or the sale of dan-

gerous compounds. Among the appropriations was one reimbursing counties for money paid out as bounties for the destruction of grasshoppers, amounting in the aggregate to some \$89,000.

A convention of the Republicans of the State was held at St. Paul, on the 24th of May, for the purpose of choosing delegates to the National Convention of the party, and nominating candidates for presidential electors. Lieutenant-Governor Wakefield presided. Ex-Governor Alexander Ramsey was chosen to head the delegation to the National Convention, and ex-Governor Davis, ex-Governor Miller, General Edgerton, C. K. Kinsett, and L. Bogen, were nominated for electors. The following platform was adopted:

The Republicans of Minnesota hereby reaffirm those great principles of free government which were declared by the fathers of the republic one hundred years ago, and whose final triumph in our day has been consecrated by the sacrifices of the late war. We are in favor of the unity and constitutional rights of the States, and of every citizen thereof; the preservation of the great results achieved by the war, the grateful recognition of the service of defenders of the republic in the hour of its supreme peril; thorough retrenchment and reform in every branch of public service; the fearless and uncompromising exposure of corruption and malfeasance in office; pure, honest, and efficient government; the preservation untarnished of the national credit; hard money or its equivalent; paper convertible into coin; the education of every child within the borders of the republic, and a thorough system of common schools, absolutely free from sectarian or partisan bias.

We believe the sublime mission of the Republican party, in the spirit and language of the martyr President, is that a government of the people, for the people, and by the people, should not perish from the earth; and therefore, without regard to past difference or dead issues, we earnestly and cordially invite all who believe the administration of the Government should not be confided to the men who through years of bloodshed strove to destroy it, and who seek an economical administration by thorough and capable officials, to unite with us in fraternal and considerate cooperation for the accomplishment of these great ends.

We emphatically condemn the treachery of every official who is faithless to his trust, and approve the injunction of President Grant, to "let no guilty man escape," and recognize a vigorous prosecution of all reforms which tend to purify the civil service and elevate the character of the Government as the supreme duty of the hour.

The Republicans of Minnesota expect and demand of their delegates in the National Convention to support the candidate for the presidency whose character and history shall afford the strongest guarantee of his courage, ability, and zeal, to carry forward the great work of purification, until corrupt men and systems shall alike be discarded from the Government.

The following additional resolution was adopted, with only three dissenting votes:

Resolved, That we recognize in James G. Blaine, of Maine, a man of tried integrity, of uncompromising loyalty, of commanding ability, both as a leader and a fearless, unfaltering advocate and defender of the principles which have preserved the Union, and given undying lustre to the party of which he is today the most admired representative, and we take pleasure in recording the fact that he has Minnesota's

proud preference for the office of President of the United States; and while we pledge ourselves to cordially support any pure Republican whom the Cincinnati Convention may nominate, we nevertheless express it as our conviction that no other candidate will develop the enthusiasm, or call out the number of votes that would be polled by the American people for the noble champion of their rights, their liberties, and their honor.

The Democratic State Convention was held at St. Paul, on the 1st of June. Ten delegates were chosen to the National Convention at St. Louis, and Edmund Rice, J. F. Meagher, Joseph Capser, Richard A. Jones, and W. T. Bonnewell, were nominated for presidential electors. The following declarations were adopted as expressive of the principles and sentiments of the party in this State:

1. We accept and will uphold the Constitution of the United States in all its parts.
2. The powers of the Federal Government are limited by the Constitution, and should never be transcended.
3. Union of the States is perpetual, and the right of local government in the several States is affirmed.
4. The public credit should be maintained at any and every cost.
5. Gold and silver coin is the only legal tender contemplated by the Constitution, and resumption of specie payments, as soon as the business interests of the country will permit, is the only policy consistent with a high regard for the public faith.
6. We reaffirm the unwavering position of the Democratic party that a tariff for protection is of the nature of class legislation, and is oppressive and unjust, and that a tariff for revenue is only admissible when it is indispensable to provide means to defray the ordinary expenses of the Government, and to meet its obligations.
7. Retrenchment in every branch of the Federal, State, and local Government is demanded, that the burden of taxation may be diminished.
8. The peculation and appropriation of public funds to private or partisan uses merit, and should be visited by, prompt and severe penalties.
9. The most rigid accountability should be exacted of all persons intrusted with the custody and disbursement of public funds, and the use of money in influencing votes should be punished as a flagrantly criminal offense.
10. Public schools free to all.
11. Equal and exact justice to all men; no partial legislation; no partial taxation.
12. Reform in all departments of the Federal Government, which can only be accomplished by the displacement from power of the Republican party.

We arraign that political organization before the people as directly responsible for the demoralized and disgraceful condition of the public service, which brings shame to the face of every honest citizen; for shielding offenders from just and long-deserved punishment; for contemptuous disregard of the plain provisions of the Constitution; for repeated violations of the rights of States guaranteed by that instrument; for the innumerable thieveries of Belknap, and most of the minor criminals; for the decay and almost destruction of our commercial marine; for the inefficient state of our navy, upon which countless millions of the public money have been squandered; and for the absurd and vicious legislation of the past fifteen years, which has unsettled values of all property, and has culminated in the depression of business that has brought disaster and ruin upon so many of our citizens.

Cordially inviting the co-operation of honest men of all shades of political opinion, we pledge the Democratic party of Minnesota to work unceasingly

and earnestly for the overthrow of the dominant party, which by its acts of omission and commission has wrought so much dishonor and so many evils upon all classes of our countrymen.

After considerable discussion, the following resolution was adopted by a vote of 120 to 74:

Resolved, That in Governor Samuel J. Tilden we recognize the representative reformer of the times, and believe that his nomination for President will be the best course of the Democracy to secure the reforms for which our party is earnestly striving, and which are so essential to the very life of our nation.

The Prohibitionists of the State held a convention on the 7th of June, at St. Paul, and nominated candidates for presidential electors. A long series of resolutions was adopted, setting forth the evils of intemperance, and the corrupt influences of the liquor interest in politics, demanding retrenchment and economy, and favoring woman-suffrage. The following views were also expressed regarding financial questions:

6. That it is the duty of the General Government to establish post-office savings-banks, similar to those of Great Britain, where laboring-men and women may deposit their surplus earnings without the danger of losing them.
7. That it is the duty of Congress to repeal the act of January 14, 1875, promising a resumption of specie payments at a time when resumption will be practically impossible, and that a true financial policy would induce Congress to set apart a portion of the specie derived from import duties for the gradual redemption of greenbacks.
8. The separation of the money of the Government from all banking institutions. The national Government only should exercise the high prerogative of issuing paper-money, and that should be subject to prompt redemption on demand, in gold and silver, the only equal standards of value recognized by the civilized world.

At the election on the 7th of November there were 124,294 votes cast for presidential electors. Of these the Hayes and Wheeler ticket received 72,962, Tilden and Hendricks 48,799, Cooper and Cary 2,889, and Smith and Stewart 144. The Republican majority was 21,630. The three members of Congress elected were all Republicans. In the Second District there was a "Greenback" candidate, who received 2,879 votes, the Republican candidate having 19,730, and the Democrat 14,990. The Legislature of 1877 consists of 26 Republicans and 15 Democrats in the Senate, and 77 Republicans and 29 Democrats in the House. This gives the Republicans a majority of 11 in the Senate, 48 in the House, and 59 on joint ballot.

A vote was taken at the election on the three amendments to the constitution submitted by the Legislature. That to section 11, Article IV., relating to the Governor's veto, was ratified by 47,802 votes in its favor to 4,426 against it; that to section 3, Article X., concerning the liability of stockholders, was rejected, 21,721 votes being cast for it, and 22,803 against it; that to section 8, Article VI., relating to an assignment of judges, was ratified by a vote of 41,069 to 6,063.

The question of recognizing the obligation of the State to pay what are known as the "railroad bonds" has not ceased to occupy the attention of the people, though the last Legislature refused to take any action. A committee of each branch made a labored report undertaking to show that the State was under no moral or legal obligation to provide for them, but this view evidently has not the support of public opinion. The matter was made the subject of a special report by the State Baptist Convention in October. The committee, which was appointed at the previous convention to consider the matter, after going into the history of legislation and judicial action affecting the bonds, submitted the following resolutions, which were unanimously adopted:

1. That the Minnesota State Railroad bonds are legal and moral obligations against the State.

2. That until such time as the State shall provide for the payment of the interest on said bonds, the charge of practical repudiation is sustained.

3. That it is the religious duty of every Christian member of the Commonwealth to do all in his power, by his voice, vote, and pen, to arouse the public mind and conscience to the legal and moral obligations of the State to provide for the honorable settlement of our suspended State indebtedness.

The Governor, in his message to the Legislature of 1877, renewed his recommendation that some action be taken to fulfill the long-neglected duty of the State in regard to these bonds. After reviewing the history of the case once more, he said:

It is difficult to see why these decisions do not effectually dispel the clouds and mists which have so long enveloped the subject, leaving the golden line of duty stretching out clear and distinct before the representatives of the people, and the State of Minnesota must hereafter stand dumb when questioned as to why she does not walk by it.

With such unmistakable and imperative commands from the voice of law, equity, and honor, is the question not reduced to the simple one of our willingness to pay an honest debt? And can our young State with so fair a future—as a member of the sisterhood in this triumphant era of the nation's centenary—afford to rest under so damaging an imputation?

The law which gives to juries the sole power to inflict capital punishment for the crime of murder is said to work unsatisfactorily, as a plea of guilty will prevent even the worst cases from going to a jury at all, and render the extreme penalty impossible. The Governor recommends the abolition or amendment of the law.

The grasshopper or locust plague has been a subject of serious consideration in this State. For three successive seasons it has inflicted very great injury upon the growing crops. The insects come in vast swarms from the Rocky Mountains, and settling upon thriving fields devour every vestige of vegetation in a few hours. Thus far the farmers have been almost helpless in striving to check its devastation. Official reports show that the destruction of the most important products in 1875 reached the following aggregates in the several counties mentioned:

COUNTIES.	Wheat. Bushels lost.	Oats. Bushels lost.	Corn. Bushels lost.
Becker.....	16,092	5,806	1,141
Blue Earth.....	226,459	153,744	113,673
Brown.....	338,985	212,639	64,097
Cottonwood.....	150,610	88,241	62,288
Jackson.....	78,405	61,944	31,037
Lyon.....	31,700	30,766	18,123
Le Sueur.....	16,243	8,285	7,116
McLeod.....	27,830	13,863	22,074
Redwood.....	101,225	52,217	36,107
Renville.....	80,841	28,198	23,579
Wilkin.....	615	905
Martin.....	8,696	24,100	11,925
Yellow Medicine.....	60	6	120
Murray.....	59,069	23,609	22,474
Watsonwan.....	133,449	90,252	58,961
Nobles.....	54,911	44,562	24,938
Total.....	1,482,578	842,965	500,966

Other counties suffered severely, from which no official reports were received. The devastation in 1874 is indicated in the following statement:

CROPS.	No. of Acres injured.	Bushels lost.
Wheat.....	240,417	2,644,392
Oats.....	62,125	1,816,733
Corn.....	84,139	738,415
Barley.....	2,094	58,962
Rye.....	137	1,748
Buckwheat.....	844	15,314
Potatoes.....	2,784	221,434
Beans.....	1,019	14,971
Sorghum (gallons).....	106	5,284
Cultivated hay (tons).....	1,721	3,622
Flax-seed (bushels).....	5,632	52,338

The bounties paid for the destruction of grasshoppers in seven counties in 1875 amounted to \$78,505.81, the whole amount destroyed, for which bounties were paid, being 56,336½ bushels of the insects. Governor Pillsbury has devoted much attention to the subject, and secured a conference of Governors of several States at Omaha, Neb., on the 25th and 26th of October, to consider the means for averting or mitigating this destructive plague. His conclusions are, that it is entirely practicable to prevent ravages by insects hatched upon the soil of the State, but against the full-fledged swarms that come from distant places "man, with all his resources, can but stand helpless and aghast." He thinks that by co-operation among all the States liable to the ravages of the pest, to exterminate it from their own soil, its power for destruction will be greatly reduced.

JOHN S. PILLSBURY, Governor of Minnesota for the term of two years, ending in January, 1878, was born in Sutton, N. H., July, 1827. At the age of sixteen he entered the store of his brother, at Warner, N. H., as a clerk, and subsequently went into business in that town with ex-Governor Walter Harriman. At a later period he was in business in Concord, N. H., but went West in 1854, and finally settled at St. Anthony's Falls, Minn., where he engaged in the hardware business. He has been active, energetic, and successful, and has taken a lively interest in the public affairs of the State. He served in the Senate ten or twelve years, and

was most of that time chairman of its Committee on Finance. He has held the position of President of the Board of Regents of the State University several years, and has been instrumental in building up that institution to a condition of prosperity. He was chosen

Governor of the State at the election of 1875, and entered upon the duties of the office in January following.

MISSIONS, FOREIGN. In the following table are given the missionary statistics of the Protestant churches:

The foregoing table has been compiled by the Board of Missions of the Presbyterian Church in the United States of America, and published by them in connection with a "Survey of Fifty Years' Mission-Work." It is prefaced by a statement in explanation of the difficulties of making a table of the kind accurate and complete. These are occasioned chiefly by the difference in the methods of making up statistical tables by different societies. A division of the native laborers into ordained and unordained was desired, but it could not be made for all the societies; in like manner, the distinction between the wives of missionaries and unmarried women-laborers could not be marked. The returns of some of the Continental societies, and some of the smaller British and American societies, had to be taken from the reports for 1875. In one or two instances, as in the case of the Netherlands Missionary Society, the number of members had to be in part estimated approximately. In the returns of the Society for the Propagation of the Gospel and the Wesleyan Missionary Society, the colonial work is not included. The figures fail to give the amounts that have been expended by local societies, the local contributions of different missions, and the amounts that have been used by the Bible and Tract Societies in their distinct operations abroad.

The Basel Missionary Society celebrated in 1876 its sixty-first anniversary. Its receipts during the year had been 861,041 francs, and its expenditures 763,512 francs. All of its thirty mission-stations showed an increase of native members. The most fertile field of labor was China; after that were the Gold Coast and India. The number of European missionaries in the service of the Society was one hundred and sixty-eight, besides sixty-seven European women-missionaries, and two hundred and twenty-seven native helpers of both sexes. The institute at Basel had during the year ninety-six pupils. It had in the same period furnished six new missionary agents, to whom would shortly be added seven young men who had just completed their studies.

MISSISSIPPI. The session of the Legislature which began on the 3d of January and closed on the 15th of April was one of the most important in the history of the State. It secured the removal of three important State officials, submitted important amendments to the constitution of the State, reduced the expenses of the government very largely, and did much toward bringing the administration of affairs to a systematic and economical basis. The body was composed of 87 Senators and 116 Representatives. Of the Senators, 26 were Conservatives and 11 Republicans, 5 of whom were colored. Of the Representatives, 97 were Conservatives and 19 Republicans, 16 of the latter being colored. The more important results of the session may be briefly summarized thus: Repeal of the militia law, repeal of the law giving the

Governor power to appoint tax-collectors and county officers, repeal of the district printing bill, reduction of the number of judicial officers, reduction of the expenses of the Commissioner of Immigration, general reduction of salaries, reduction of the cost of State institutions, reduction of State tax from 9½ to 6½ mills on the dollar, general reformation of the financial system, new levee laws, new school law, new registration law, revision of the criminal laws, reapportionment of the congressional representation, constitutional amendments, removal of the Governor, Lieutenant-Governor, and Superintendent of Education. Some of these measures call for more particular notice.

STATE SEAL OF MISSISSIPPI.

On the 14th of February the House of Representatives adopted a resolution directing that articles of impeachment be prepared against Alexander K. Davis, the colored Lieutenant-Governor, and managers were appointed to conduct the case before the Senate, as a court of impeachment. Five articles were submitted, charging the Lieutenant-Governor with receiving a bribe while acting as Governor, in the absence of Governor Ames, in June, 1875, as consideration for granting a pardon to Thomas H. Barrentine, convicted of the murder of Ann Thomas, in Lowndes County, on the 25th of August, 1874. In his answer, Mr. Davis admitted granting the pardon, but denied that it was "in any manner procured, induced, influenced, or promoted by any money, or other thing whatever, paid or delivered, or to be paid or delivered, to this respondent, or to any other person." The trial of Mr. Davis was completed on the 13th of March, and resulted in his conviction by a vote of 32 to 4, six republicans, one of them colored, voting "guilty." The four voting "not guilty" were all colored Republicans. Sentence was passed on the 23d of March, by a vote of 25 to 4, removing Mr. Davis from office, and disqualifying him from holding any office of profit, honor, or trust, in the future.

The resolution directing the impeachment

of T. W. Cardozo, Superintendent of Public Education, also colored, was adopted on the 16th of February, and proceedings were begun at once. Twelve articles of impeachment were adopted, charging him with retaining money belonging to the State, and received by him as Clerk of the Circuit Court of Warren County, in 1873, for lands forfeited for taxes and redeemed through him; with converting to his own use funds of the Tongaloo Normal School, while treasurer of the institution; with obtaining money from the State for unnecessary books for the public schools, a portion of which was for his own benefit; and with proposing with another to divide and convert to their own use a portion of the school-teachers' fund of Warren County. On the 21st of March, and while the impeachment was still pending, Mr. Cardozo asked permission to resign his office, and have the proceedings dismissed. This was granted, and on the 22d Mr. Cardozo resigned, and resolutions were adopted by the House of Representatives, by a vote of 64 to 12, discontinuing the proceedings before the Court of Impeachment.

As early as January 6th, and almost immediately after the organization of the Legislature, a committee had been appointed to investigate the official conduct of Governor Ames. On the 22d of February its report was submitted, recommending the impeachment of the Governor for official misconduct on eleven separate and distinct charges. The substance of these was that he had in several specified instances refused to remove certain officials as required by law, and had in other cases made removals without cause; that he had caused a conflict between races, attended by bloodshed, at Vicksburg, in December, 1874, by directing Peter Crosby's return, in violation of law, and sustaining him in taking possession of the sheriff's office of Warren County; and that he had attempted to incite a war of races in Hinds County, in October, 1875, by causing a company of colored militia, which had taken part in the Clinton riot, to parade the streets of that town "armed and defiant." The report and the resolution of impeachment were adopted by the House February 25th, by a vote of 86 to 14, all the Republicans present and two Democrats voting in the negative. Twenty-three articles of impeachment were prepared and adopted. On the 13th of March all the preliminary proceedings of the court were taken, and the trial was to begin on the 29th of March, when the following letter addressed by the Governor to his counsel was submitted to the House:

EXECUTIVE MANSION, JACKSON, *March 28, 1876.*

GENTLEMEN: In regard to your suggestion, I beg leave to say that, in consequence of the election of last November, I found myself confronted with a hostile Legislature, and embarrassed and baffled in my endeavors to carry out my plans for the welfare of the State and of my party. I had resolved, therefore, to resign my office as Governor of the State of Mississippi. But, meanwhile, proceedings of im-

peachment were instituted against me, and, of course, I could not and would not retire from my position under the imputation of any charge affecting my honor or integrity. For the reasons indicated, I still desire to escape burdens which are compensated by no possibility of public usefulness; and if the articles of impeachment presented against me were not pending, and the proceedings were dismissed, I should feel at liberty to carry out my desire and purpose of resignation.

I am very truly yours,

ADELBERT AMES.

To MESSRS. DURANT & PRYOR, JACKSON, Miss.

The following resolution was then adopted, by a vote of 78 to 10:

Whereas, Assurance has been received by the House of Representatives of the State of Mississippi that Adelbert Ames, Governor of said State, but for the pending against him of articles of impeachment exhibited by the House of Representatives, would have resigned his office of Governor, and will now do so, as the managers are informed by a letter addressed by said Governor Ames to his counsel—Messrs. Durant and Pryor—and read to said House on a resolution adopted, directing its managers to dismiss said proceedings: now, therefore, be it

Resolved by the House of Representatives of the State of Mississippi, That the managers on the part of this House, in the matter of the impeachment of Adelbert Ames, Governor of said State, be, and they are hereby, directed to dismiss the said articles against the said Adelbert Ames, (Governor as aforesaid, which were heretofore exhibited by them against him at the bar of the Senate.

The proceedings were accordingly dismissed in the Senate by a vote of 24 to 7. Governor Ames immediately resigned, and Colonel J. M. Stone, President *pro tem.* of the Senate, was at once installed in the office of Governor in joint convention of the two Houses.

Two amendments to the constitution of the State were adopted. One of these abolished the office of Lieutenant-Governor, and provided that the President of the Senate should assume the Executive office in case of vacancy from any cause. If he were dead, incapable, or absent, the Speaker of the House should become Governor, and, in case neither of these officials could assume the office, the Secretary of State should convene the Senate to choose a President, in order that he might act as Governor.

The other amendment provides for biennial sessions of the Legislature, beginning on the Tuesday after the first Monday in January, 1878.

The new registration law makes the Governor, the presiding officer of the Senate, and the Secretary of State, a State Board of Registration. They are required to appoint a board of three officers of registration in each county, all of whom shall not belong to the same political party. These county boards are required to designate the election districts and appoint a period of not less than two or more than five days in each district for the registration of qualified voters. A separate book is to be provided for each district, and a member of the Board of Registration designated in each county to register the names of all quali-

fied voters. When the work has been completed, one day must be appointed for revision in each district. All persons voting on election-day must have been registered, but the right of any registered person to vote may be challenged, and his vote rejected if the cause of challenge is established by proof. The provisions of the revised code of 1871 regarding elections are retained where not inconsistent with this act.

The new school act provided for the separation of each county into districts, the appointment of teachers, and the fixing of their salaries by the county superintendent, in connection with the Board of Supervisors or the mayor and aldermen of towns and cities. It also requires that public schools shall be maintained at least four months in the year, and provides that teachers may "contract with patrons for additional compensation, or may, with the consent and approval of the trustees, charge additional tuition." The act is in

amendment of existing laws, which are not repealed, except so far as inconsistent with it.

Among the acts passed having relation to the financial interests of the State were an elaborate revenue law containing eighty sections; an act authorizing the issue of bonds in the Treasury to fund the floating debt; two providing for the cancellation of State warrants amounting in the aggregate to nearly \$185,000; one to secure the prompt payment of fines collected by justices of the peace; one to secure the Agricultural Land Scrip Fund; one authorizing the Boards of Supervisors to ascertain the outstanding indebtedness of the several counties; and one authorizing the appointment of an agent "to investigate frauds and collect revenues due the State, counties, and levee boards of the State." This agent holds his office four years, and has power to examine all books and accounts of tax officials, to receive all moneys due on account of taxes, to bring suits where necessary, and otherwise

NATCHEZ-ON-THE-HILL.

to exercise the powers of the State in securing a faithful collection of the revenues.

The new county of Sharkey was created out of portions of Warren, Issaquena, and Washington Counties; the name of Colfax County was changed to Clay; and the boundaries were more or less changed of the counties of Covington, Marion, Benton, and Tate. The congressional districts of the State were also reorganized.

Among the other acts of the session were one providing for the lease of the penitentiary and the convicts; one providing for the retirement of Judges of the Supreme Court on a salary of \$3,000, when, after the age of seventy, they are unable, on account of infirmity, to perform their duties; one reorganizing the University of Mississippi, providing for a new board of trustees, etc.; one requiring railroad companies to provide accommodations for passengers on freight-trains; one to facilitate the

construction of telegraph-lines in the State; one abolishing the office of cotton-weigher, and providing that any person giving the proper bonds and conforming to certain regulations may weigh cotton; and one providing for a Board of Health for Jackson, Harrison, and Hancock Counties, and for quarantine regulations at the ports of the State.

There has been great improvement in the financial condition of the State, owing to the judicious action of the Legislature, and the more efficient and economical management of the Treasury. The State tax, which had risen from one mill on the dollar in 1869 to fourteen mills in 1874, and was nine and a quarter mills in 1875, was reduced to six and a half mills. The disbursements for the year amounted to \$547,816.55, while in 1875 they were \$1,130,192. The receipts, including \$275,000 of taxes not reported on the 18th of December, amounted to \$988,299. The valuation of real estate

was \$95,097,480; personal property, \$35,702,-040. The State warrants, which in January, 1875, were sold at seventy-three cents on a dollar, rose during the session of the Legislature to ninety-five cents, and before the end of the year were only one per cent. below par. There were still outstanding of Auditor's warrants on the 30th of November \$590,368.-52. The total indebtedness of the State on the 1st of December was \$3,226,847.43, but, deducting the Chickasaw school-fund of \$814,743.23, and the common-school fund of \$878,572.67, on which the State is required to pay interest only, the balance of \$308,582.55 in the Treasury December 1st, and the warrants in the Treasury owned by the State and reckoned in the indebtedness, we have remaining \$1,110,605.22 as the net indebtedness. During the year, \$137,400 was paid on the bonded debt, and \$41,824 for interest, and certificates of indebtedness amounting to \$122,504 were canceled. John H. Echols was appointed in April, under the law of the last session, as Revenue Agent, "to investigate frauds and collect revenues due the State, counties, and levee boards of the State."

The following are the school statistics of the year:

NUMBER OF CHILDREN OF SCHOOL AGE IN THE STATE.			
White males.....	84,973		
" females.....	79,946	164,918	
Colored males.....	80,917		
" females.....	100,171	190,078	
			354,996
TOTAL NUMBER IN SCHOOLS.			
White.....	76,026		
Colored.....	90,178	166,204	
AVERAGE MONTHLY ENROLLMENT IN SCHOOLS.			
White.....	65,384		
Colored.....	68,580	133,964	
NUMBER OF TEACHERS EMPLOYED.			
White.....	2,128		
Colored.....	1,333	3,461	
Receipts for scholastic year, from fifty counties reported (exclusive of universities and normal schools).....			\$441,422 50
Expenditures for scholastic year, from fifty counties reported (exclusive of universities and normal schools).....			\$417,760 27

Average number of days taught, during scholastic year, in schools outside incorporated cities and towns, is 80.

Average monthly salary paid teachers, as reported in 50 counties, is: white, \$43; colored, \$39.55.

Hon. Joseph Bardwell was appointed Superintendent of Public Instruction in August, to succeed Hon. Thomas S. Gathright, who had been chosen President of the Agricultural and Mechanical College of Texas.

The number of students at the University of Mississippi during the year was 114; in the normal department of the Tongaloo University there were 112, and in the preparatory department 109; and at the Normal School at Holly Springs there were 70. The two last-named schools are for colored students. The

Alcorn University, which had become sadly run down, has been reorganized, with Hon. H. R. Revels as its president, and bids fair to become a prosperous and useful institution. It had 50 students at the close of the year.

The Lunatic Asylum contained, on the 31st of December, 167 male and 169 female patients, an increase of ten males and two females during the year. The number admitted during the year was 88, discharged recovered 42, discharged improved 9, died 24. The appropriation for the expenses of the institution was \$60,000, which was not wholly expended.

The Institution for Deaf-Mutes had 24 pupils on the 20th of December, and the Institution for the Blind had an average of 28 during the year.

The number of convicts in the State penitentiary on the 20th of December was 711, of whom 83 were white, and 628 colored. Only 159 were within the walls of the penitentiary, while 552 were outside. The institution contains 200 cells, only 174 of which are serviceable. Under the act of April 15th the convicts, buildings, and property, were leased by the inspectors, on the 9th of June, to J. S. Hamilton and J. L. Hebron, the lessees to take care of the prisoners, bear all expenses, pay all salaries and wages, except the salary of the State Superintendent, and pay the State \$1.10 per month for each convict over the number of 140. On the 9th of November the lessees entered into a contract with a sub-lessee under the old lease to French & Jobes, by which the sub-lessee is to retain 150 convicts in his possession till January 1, 1878. On the 30th of December, the lessees made a contract with French & Jobes, by which the latter surrendered all the convicts held by them under the act of February, 1875.

The Republican party of the State held a convention at Jackson, on the 30th of March, to appoint delegates to the National Convention at Cincinnati, nominate candidates for presidential electors, and choose a State Executive Committee. The following platform was adopted:

The Republicans of Mississippi, in convention assembled, declare:

1. Their adhesion to the principles of Republicanism as repeatedly uttered in State Conventions from 1867 to the present time, and in the National Conventions of the party from its organization, the cardinal tenets of which are: freedom of speech, freedom of the press, a free ballot, freedom for all, and the enforcement of the laws.

2. Adopting the sentiments of the call for the National Convention, we invite all Republican electors and all other voters, without regard to past political differences, or past party affiliations, who are opposed to reviving sectional issues and desire to promote friendly feeling and harmony throughout the country by maintaining and enforcing all constitutional rights of every citizen, including the full and free exercise of the rights of suffrage without intimidation and without fraud; who are in favor of continued prosecution and punishment of all official dishonesty, and of an economical administration of the Government by honest, faithful, and capable officers; who are in favor of making such reforms in

the Government as experience may from time to time suggest; who are opposed to impairing the credit of the nation by depreciating any of its obligations, and in favor of sustaining in every way the national faith and financial honor; who hold that the common-school system is the nursery of American liberty, and should be maintained absolutely free from sectarian control; who believe that for the promotion of these ends the direction of the Government should continue to be confided to those who adhere to the principles of 1776, and support them as incorporated in the Constitution and laws, and who are in favor of recognizing and strengthening the fundamental principles of national unity in this centennial anniversary of the birth of the republic, to unite and go with us.

3. A sound national currency, and a return to specie payment as soon as can be done with safety to the commercial interests of the country.

4. We adopt the sentiment of General Grant, "Let no guilty man escape;" and we further say, Let every guilty man be brought to punishment. In view of these sentiments we arraign the Democratic leaders of Mississippi, and charge them with prosecuting impeachments for partisan purposes, and to consolidate power obtained by violence, intimidation, and fraud. They charged the late Governor and the late Superintendent of Education with "high crimes and misdemeanors." If guilty, they should be punished; if innocent, justice and truth have been wantonly violated—whether guilty or innocent could only be known upon a full, fair, and impartial trial. This the accused parties were not only entitled to, but justice demanded it. Instead, assuming their charges to be true, Democrats have compounded felonies, and have thus added another serious crime to the long catalogue of high crimes and misdemeanors on their part. We, the Republicans of Mississippi, therefore, arraign the Democratic party of the State before an enlightened public sentiment, and charge that party with corruption in order to secure public offices for partisan purposes. The history of impeachments shows this and nothing less.

5. We further arraign Democratic leaders, and charge:

(1.) In seeking to prostitute the highest judicial tribunal of the State to political purposes by a legislative resolution requiring the Presiding Justice of the Supreme Court to resign his position as Presiding Judge, and that another of the judges be elected Presiding Judge for the express purpose of sitting in the trial of the Governor in the Court of Impeachment. Such change was made, and a Chief-Justice was chosen in response to such request expressly to preside in such trial, and, as the records show, by his own vote.

(2.) They have usurped power from the people, first, by violence, intimidation, and fraud, and thereby providing that a Senator, elected as such, shall be Governor, thus refusing to let the people say who shall be Governor.

(3.) Themselves illegally elected, they seek to maintain power by unheard-of legislation in the interest of the Democratic party, without regard to the rights or will of the people, and in disregard of both.

(4.) They have gerrymandered the State by a most outrageous, unjust, and partisan alteration of the congressional districts, making one district front on the Mississippi River, along the Louisiana and Arkansas border, 400 miles long and in many places only twenty miles wide!

6. As important and vital as are the great principles in the foregoing, we present to the people of the State and of the whole country, as underlying and overriding all other issues, as containing all that is dear to us, as one that will invade the North and West if not arrested and crushed out, the question of the freedom of the ballot. Without this all other questions are as nothing to us. Violence at elections is a blow at free institutions, and these with us are

practically a mockery. This violence will destroy all other interests, social, educational, financial, business, and religious. Under its blighting curse all other interests and industries are paralyzed. To us this is the great and vital issue, as it will be to the whole country, if it is ignored and discarded by other sections.

7. In behalf of those we represent we tender our gratitude to Senator Morton for the interest he has manifested in the protection of Southern Republicans in their personal freedom, and in the sacred rights of free speech and a free ballot. He is entitled to our thanks and our gratitude for his devotion to those principles.

The Democratic State Convention for similar purposes was held at Jackson, on the 14th of June. The following was the platform adopted:

Resolved, That the Democrats and Conservatives in convention assembled proclaim their heart-felt gratitude for the complete victory which was won by the advocates of reform, in the election of 1875, over the incompetent, corrupt, and proscriptive political organization which had held unlimited control of the State government for six years, and that they emphatically repel the imputation that their triumph was won by any other than the legal, honest, and sincere efforts which the justice of their cause and their duty as freemen to maintain unimpaired their inalienable rights demanded them to make.

Resolved, That in proof of the sincerity of the pledges of the victorious party in that election to reduce expenditures to an honest and economical standard, and elevate the scale of official qualification, we point with pride and pleasure to the acts of the Legislature at its late session, to which body the thanks of the whole people are due for its faithful discharge of duty in correcting the abuses of the public service; in diminishing the burden of taxation; in dismissing supernumerary officials from the various branches of the public service, who consumed the earnings of labor without rendering an equivalent; in dispensing the blessings of just laws without distinction of race, color, or class; in holding faithless public officials to strict accountability for their misconduct; and especially does the popular branch of the Legislature, standing as the grand inquest of the Commonwealth, deserve thanks for investigating the acts of the guilty officials whom it arraigned for malfeasance, corruption, and usurpation of unconstitutional powers, and for driving them, by the terrors of the offended law, into obscurity, from the public trusts which they had violated.

Resolved, That, in addition to the foregoing, we proclaim the following principles as the rule and guide of our political faith and conduct:

1. The doctrine of local self-government, the surest protection of personal liberty; fidelity to the Constitution of the United States, and all the obligations imposed upon us as citizens of a common country.

2. Free schools, free suffrage, equal rights.

3. Equal and exact justice to all citizens, of every race and clime, native and foreign-born; and no discriminating legislation for the benefit of favored classes or corporations.

4. No proscription for opinion's sake—no sectional lines—no resurrection of dead issues for partisan success and as a pretext for vindictive legislation.

5. The sacred maintenance of the public faith and the strict performance of all obligations, State and national.

6. Retrenchment and economy in all the departments of public service, and adherence to the time-honored Jeffersonian standard of qualification for office, "Is he honest, is he capable, is he faithful to the Constitution?"

With these declarations, we cordially invite all men to cooperate with us in establishing the permanent

supremacy of the principles which they embody, in the administration of public affairs.

There were no State officers to be chosen. A spirited canvass was made by the Democrats, who effected a thorough organization through what were called Conservative Clubs, but the Republicans displayed little activity. At the election, on the 7th of November, the whole number of votes cast for presidential electors was 164,778. Of these, 112,178 were for the Democratic, and 52,605 for the Republican ticket, making the majority for the former 59,568. The six members of Congress chosen were all Democrats. The Legislature of 1877 consists of 26 Democrats and 11 Republicans in the Senate, and 97 Democrats and 19 Republicans in the House; Democratic majority, 15 in the Senate, 78 in the House, and 98 on joint ballot.

A committee of the United States Senate was in the State for several weeks during the summer, making an investigation into the circumstances of the election of 1875. Majority and minority reports were made to the Senate early in the session of 1876-'77.

MISSOURI. The assessed value of property in the State of Missouri is \$800,000,000. The bonded debt of the State on the 1st of January, 1877, amounted to \$17,248,000, of which \$3,026,000 belonged to the school and seminary funds. The debt has all been funded in six per cent. bonds, and the annual interest-charge is reduced to \$1,034,880. Twenty cents on the hundred dollars of taxable property, and one-half the proceeds from merchants' licenses, are set aside annually for the interest and sinking funds. The rate of taxation for all State purposes is forty cents on each hundred dollars of valuation.

The principal of the State school-fund at the beginning of 1877 was \$2,909,974.61, an increase of \$286,280.91 in two years. The annual income from this, distributed for the benefit of public schools, is \$174,598.47. The seminary-fund was \$122,000, an increase of \$13,300 in two years.

The State penitentiary has been considerably enlarged during the past two years. The additions include a brick cell-building for men, which will accommodate 640 inmates, a cell-building for women capable of holding 146, and a hospital which will accommodate 100 patients. The penitentiary is now capable of receiving 2,000 men and 167 women, and the actual number of inmates at the close of the year was 1,833. The institution was surrendered by the lessees to the inspectors on the 22d of November, 1875, and it is now in the hands of the State, with no profitable employment for a large portion of the convicts.

The Republicans of the State held a convention at Jefferson City on the 24th of May, to choose delegates to the National Convention of the party, and appoint an Executive Committee to direct the canvass of the year on their behalf. The following was

adopted as an expression of the sentiments of the party :

We, the Republicans of Missouri, in convention assembled, declare our principles as follows :

1. We are for the unity of the nation and the just rights of the States; for full reconciliation and enduring harmony of all sections; for the inviolate preservation of the results of the war, and the constitutional rights of every citizen; for grateful recognition of the services of the brave soldiers of the republic; for thorough retrenchment and reform; for unsparring pursuit, exposure, and punishment, of public frauds and official dishonesty; for maintaining untarnished the national credit and honor; for sound currency of coin, or paper convertible into the same, and for common schools absolutely free from sectarian influences.

2. We charge the Democratic party with being the same in character and spirit as when it sympathized with treason; with making its control of the House of Representatives the triumph and opportunity of the nation's recent foes; with reasserting and applauding in the national capital the sentiment of unrepentant rebellion; with sending Union soldiers to the rear and promoting Confederate soldiers to the front; with deliberately proposing to repudiate the plighted faith of the Government; with being equally false and imbecile upon the overshadowing financial question; with thwarting the ends of justice by its partisan mismanagement and obstruction of investigation; with proving itself through the period of its ascendancy in the Lower House of Congress utterly incompetent to administer the government. And we warn the country against trusting a party thus unworthy and incapable.

3. Without regard to past differences we cordially invite all who believe the direction of the General Government should not pass into the hands that sought to destroy it, and who seek a pure and economical administration by honest and capable officers, to unite with us in fraternal and considerate cooperation for the promotion of those ends.

STATE SEAL OF MISSOURI.

The following additional resolution, submitted by one of the delegates, produced a warm discussion, but was adopted by a vote of about three-fourths of the convention :

We, the Republicans of Missouri, in convention assembled, declare anew our faith in the patriotism and integrity of U. S. Grant, President of the United States, and remember with gratitude his distinguished service in the preservation of the Union and of the civil administration of the Government.

The convention of the Democrats for simi-

lar objects was held at Jefferson City on the 31st of May. Among the delegates at large sent to the National Convention were Governor Hardin and ex-Governor Woodson, and the favorite candidate for President was T. A. Hendricks, of Indiana. The platform adopted was as follows:

1. Fidelity to all the provisions of the Constitution of the United States.
2. Perpetual union of States, with local self-government in every section.
3. Civil service reform and restitution of tests of honesty, fidelity, and capacity, as qualifications for public office.
4. Retrenchment and economy in Federal, State, and municipal administration; lessening the burden of labor by a reduction of offices and taxation.
5. Exposure and speedy punishment by penal laws of corruption and speculation in the administration of public affairs.
6. Private use and appropriation of public funds by State custodians means embezzlement and robbery; official accountability exacted and enforced by better administration of civil and criminal laws.
7. Free schools, exempt from all sectarian control; a free press, accountable for abuses to civil and criminal laws.
8. The preservation of public faith and credit, and honest payment of the public debt.
9. That we are in favor of a repeal of the resumption act of January, 1875; but inasmuch as the National Convention of the Democratic party is to be held within the next thirty days, we deem it inexpedient to adopt any resolutions respecting the currency or finances of the country, but refer the same to such convention, hereby pledging ourselves to support its platform, and to give the electoral ticket of Missouri for its nominee. The Democratic party is the party of the Constitution, the party of reform, and the party of economy, and if intrusted with the administration of the Federal Government will hold it to be its present and pressing duty to restore full and perfect equality among the States against the aggressive usurpations of centralized power; to establish the moral character of the Government and eliminate crime as a common characteristic of political life; that the present deplorable condition of the morals and business interests of the country is the result of corrupt and partisan administration, and that reform is absolutely necessary for the relief of the people and the preservation of the Government, and that this can only be done by a change of administration.

The Democratic Convention for the nomination of candidates for State officers and presidential electors was held at Jefferson City, on the 19th of July. The State ticket agreed upon was as follows: For Governor, General John S. Phelps; for Lieutenant-Governor, H. C. Brockmeyer; for Secretary of State, Michael K. McGrath; for Auditor, Thomas Holladay; for Treasurer, Elijah Gates; for Attorney-General, Jackson L. Smith; for Register of Lands, James E. McHenry; for Railroad Commissioners, James Harding, for the term of six years; J. S. Marmaduke, for the term of four years; and John Walker, for the term of two years. The following resolutions were unanimously adopted:

1. That we, the Democracy of Missouri, in State Convention assembled, do hereby indorse, adopt, and reaffirm, the national Democratic platform adopted at St. Louis on the 28th day of June, 1876.

Resolved, That we hail with enthusiasm the nomi-

nation of Governor Samuel J. Tilden, of New York, for President, and of Governor Thomas A. Hendricks, of Indiana, for Vice-President, as the strongest possible combination the Democracy of the Union could have selected for the suffrages of the American people, and in their great and varied civil services, eminent abilities, pure civic and honorable record, without spot or blemish; that in their election the people have a certain guarantee of reform, that the Constitution will be preserved intact, the laws executed vigorously and without distinction to race, color, or creed, with protection and equality guaranteed to life, liberty, and property, to every citizen of the Union; and we hereby pledge the State of Missouri to ratify their nomination by sixty thousand majority.

Resolved, That we point with pride to the administration of Charles H. Hardin, Governor of Missouri, as a model one in the history of the State, and challenge comparison for it with that of any other State in the Union; and, upon the honorable record thus made in the management of our State affairs, we invite all good men to cooperate with us in our determination to present and elect a State ticket that shall prove a worthy successor to Governor Charles H. Hardin and his associates in the various State offices.

The Republican nominating convention took place at Jefferson City, on the 9th of August. The following State ticket was agreed upon: For Governor, G. A. Finkelnburg; for Lieutenant-Governor, C. C. Allen; for Secretary of State, Eugene F. Weigel; for Treasurer, John F. Severance; for Auditor, George R. Smith; for Attorney-General, A. W. Mullins; for Register of Lands, Richard Drain; for Supreme Judge, David Wagner; for Railroad Commissioners, T. R. Allen, E. D. Harper, and Isaac Hayes.

The platform adopted was as follows:

Resolved, by the Republican party of the State of Missouri in convention assembled:

1. That, as the preservation of our nation from destruction from a rebellion incited, and for four years continued, by the leaders and followers of the Democratic party was, under Divine Providence, accomplished by the Republican party, so we hold that the perpetuation of our existence as a nation and the maintenance of our civil liberties depend upon the continuance in power of the Republican party.

2. That we should regard the election of Samuel J. Tilden to the presidency of the United States as a national calamity, as practically reopening the issues settled by the war, by placing in power as commander-in-chief of the army and navy one whose political record identifies him with those who hold the doctrine of secession and are opposed to coercive measures to maintain the integrity of the Union.

3. That the bold and impudent assumption by the Democratic national platform and the letters of its candidates, that the Democratic party is a party of reform, is groundless, false, and brazen pretense of virtue which it has not, and is shown to be so by the past history of that party in city, State, and national government, and is especially illustrated and proved by the recent nomination for the office of President of a man whose life has been devoted to the service of railroad corporations; who originated the scheme by which combinations destroyed competition, and in transportation have robbed the producers of the West of millions annually; who has amassed enormous wealth by jobbery in railroad stocks and bonds; who was the personal and political friend and associate of William M. Tweed during the period of his stupendous robberies, and who stands condemned by the testimony of Horace Greeley as a

participant in frauds upon the people by stuffing ballot-boxes; who was the legal adviser of the parties who perpetrated the Credit Mobilier frauds upon the Government, and who is surrounded by all the corrupt and vicious elements in New York City, led by the notorious John Morrissey and others of like infamous reputation.

4. That true and genuine reform, and an honest administration of the affairs of the Government, can be looked for only at the hands of the Republican party, which has the disposition, courage, and integrity, to punish such unworthy members of the party as are guilty of misbehavior or crime in office; whereas the Democratic party always suffers its rogues to go unwhipped of justice.

5. That the best interests of the State of Missouri demand a change of administration from Democratic to Republican, to the end that immigrants may be induced to settle within our borders, that capital may be safe here on its investment, and that the tide of prosperity which flowed into this great commonwealth under Republican rule prior to the year 1870, and which has been disastrously checked and repulsed by the accession to power of the Democratic party, may again visit us, leading to that development of our magnificent agricultural and mineral resources which would speedily make Missouri the Empire State of the great West.

6. That the Republican party stands pledged to promote and sustain our public-school system, and to improve the same until every child in the State shall have opportunity to obtain a good education; and the Republican party stands pledged to oppose, and by all proper and legitimate measures to remove, every obstacle to the success and usefulness of the system, whether that obstacle is found in constitutional provisions, unwise legislation, sectarian bigotry, ignorance, or political prejudice.

7. That the principles and policy of the national Republican party, as enumerated in the platform adopted in the National Convention held at Cincinnati in June last, meet our hearty approval, and that we hereby indorse, ratify, and reaffirm, the same; that we recognize in Rufus B. Hayes and William A. Wheeler, the Republican candidates for President and Vice-President, men of the highest moral worth, of tried integrity, and ample capacity; men who are in every way fitted for the exalted position for which they are nominated; and that the sentiments expressed in their letters of acceptance are worthy the men and the cause, and we call upon all good citizens of the State without regard to previous party affiliation to rally to their support, and pledge to them the votes of a united Republican party in the State of Missouri, enthusiastic in their support of a ticket which even Democratic malice with all its venom has confessed its inability to assail.

The following additional resolution was adopted by a close vote after considerable discussion:

That while the mighty advancement toward the

perfection of human rights won by the soldiers and patriots of the Union be vigilantly guarded, the Republican party stands ever ready to welcome to full fellowship any and all persons who have ever been in the council or camp of rebellion upon the single condition of belief in and support of republican principles, so that the valor and heroism of Americans, whether born of right or wrong judgment, shall be honored by a patriotic devotion to a nation whose great foundation was laid by our common fathers.

The Greenback party also nominated presidential electors, and candidates for Governor and Lieutenant-Governor.

At the election, which occurred November 7th, there were 351,604 votes cast for presidential electors. Of these the Democratic candidates received 208,077, the Republican candidates 145,029, and the Greenback ticket 8,498. The plurality of the Democratic vote over the Republican was 58,048; majority over all, 54,550. The total vote for Governor was 350,286, of which Phelps, Democrat, received 199,580; Finkelnburg, Republican, 147,694; and Alexander, Greenback, 2,962; Phelps's plurality

NEW COURT HOUSE, ST. LOUIS.

over Finkelnburg, 51,886; majority, 48,924. The highest Democratic majority on the rest of the State ticket was 57,610; lowest, 58,051. Of thirteen members of Congress chosen, ten were Democrats and three Republicans. The Legislature of 1877 consists of 28 Democrats and six Republicans in the Senate, and 101 Democrats and 42 Republicans in the House, making the Democratic majority 22 in the Senate, 59 in the House, and 81 on joint ballot.

A decision was rendered by the United States Circuit Court in April, in the cases of the Missouri, Kansas & Texas, the Iron Mountain, the Chicago & Southwestern, and the Atlantic & Pacific Railroads, against the State,

brought to resist the collection of taxes assessed in 1873. The assessment, as made by the county authorities, had been largely increased by the State Board of Equalization. It was claimed that this board had no legal authority to make original assessment or to increase the aggregate of that made by the proper authorities. Its action was alleged to be illegal and fraudulent, and hence the collection of the taxes was resisted. The court held that the action of the Board of Equalization was illegal but not fraudulent, and that the companies must pay the taxes on the basis of the assessment made by the county courts.

A decision rendered by Judge Bradley, of the United States Supreme Court, in May, declared \$90,000 of bonds issued by Mount Pleasant Township, in Bates County, in payment of subscription to the stock of the Lexington, Lake & Gulf Railroad Company, to be null and void, on the ground that their issuance was not authorized by a vote of two-thirds of the qualified voters, as required by the constitution. By the holders of the bonds it was set up that Mount Pleasant Township, not being a "county, city, or town," was not subject to the restrictions laid down by the constitution for such organized communities, and furthermore that two-thirds of the qualified voters actually voting on the question did sanction the issue of bonds and the subscription to the stock of the railroad. The language of the constitution is, "The General Assembly shall not authorize any *county, city, or town*, to become a stockholder in, or to loan its credit to, any company, association, or corporation, unless two-thirds of the qualified voters of such county, city, or town, at a regular or special election to be held therein shall assent thereto." Judge Bradley held that this provision applied to townships, as mere subdivisions of counties, and that a vote of two-thirds of all the qualified voters, and not merely of those voting on the question, was necessary to legalize the issue of bonds.

MOHL, JULIUS VON, a celebrated German Orientalist, born at Stuttgart, October 28, 1800; died in Paris, January 4, 1876. His father furnished him and his brother, Robert von Mohl, the celebrated jurist, who died in 1875, with an excellent education. His first academic instruction he received in the university and the theological seminary at Tübingen. In 1823 he went to Paris, where he made extensive Orientalistic studies, and became a pupil of Silvestre de Sacy and Rémusat. In 1826 he received a call to Tübingen as Extraordinary Professor of Oriental Literature, and, being granted a furlough immediately after his appointment for the purpose of continuing his studies, he spent the years 1826-'27 in London, and 1830-'31 in Oxford, making extensive scientific researches. His specialty was the Persian language. The first results of his Persian studies was "Fragments relatifs à la Religion de Zoroaster" (1829), which he

published anonymously, together with Olshausen. This was followed by "Confucii Chinking sive liber Carminum, ex Latina P. Lacharme interpretatione" (1830), and "Yking, antiquissimus Sinarum liber, ex interpretatione P. Regis" (2 vols., 1834-'39). In 1832 the French Government engaged him to edit the "Shah Nameh" of Firdusi for the *Collection Orientale*, after he had previously resigned his position in Tübingen. From this time on he took up his permanent abode in Paris, where he became an active member of the Asiatic Society, furnishing numerous valuable articles to its journals. In 1844 he was elected a member of the Academy of Inscriptions, in the following year was appointed Professor of the Persian Language in the Collège de France, and in 1852 inspector of Oriental printing in the Imperial Printing-Office. In the latter year he was also elected Secretary of the Asiatic Society, which office he filled with great ability. The celebrated excavations of Botta, at Nineveh, were due mainly to his exertions. He published the letters of M. Botta under the title of "Lettres de M. Botta sur les Découvertes à Khorsabad" (1845).

MORAVIANS. The following is a summary of the statistics of the American Province of the Moravian Church, December 31, 1875:

Northern District: number of churches, 62; of communicants, 7,765; of non-communicants over thirteen years of age, 1,340; of children, 4,648; total number of persons connected with the churches, 13,753; number of Sunday-school scholars, 6,194; of officers and teachers in Sunday-schools, 773.

Southern District: number of churches, 13; of communicants, 1,165; of non-communicants over thirteen years of age, 236; of children, 588; total number of persons connected with the churches, 1,939; number of Sunday-school scholars 611; of officers and teachers in Sunday-schools, 81.

Total for the Province: number of churches, 75; of communicants, 8,930; of non-communicants over thirteen years of age, 1,576; of children, 5,186; total number of persons connected with the churches, 15,692; number of Sunday-school scholars, 6,805; of officers and teachers in Sunday-schools, 854.

The Provincial Synod of the Moravian Church met at Nazareth, Pa., May 17th. Bishop Edmund de Schweinitz was chosen president. A letter was presented from the Unity's Elders' Conference (Berthelsdorf), signed by Bishop Gustavus T. Tietzen. It stated that the conference had intended to send a fraternal delegation; the brethren whom they had expected to depute had, however, felt constrained to ask special guidance of the Lord. The lot was cast, and resulted in the negative. For this reason no delegation was sent. The report of the Provincial Elders' Conference gave information on the condition of the Church since the last previous meeting of the synod. Three

active ministers and four retired ministers had died—among them Bishops David Bigler and Samuel Reinke, the latter the oldest bishop in the American Province. There were now 63 ministers in active service, of whom 53 had pastoral charges, while the others were connected with educational establishments or engaged in official duties for the Church. The regular churches were 27 in number, of which a few still had to receive help from the sustentation fund in the support of their pastors. The home-mission churches comprised 35 congregations. Six new churches had been organized within the three years. More than 900 communicants and a total of 1,800 members (communicants and non-communicants) had been added to the churches. An average of \$3,100 a year had been spent in the support of home missionaries, and an average of \$3,666 a year for the building of churches and parsonages for home-missions. Adding these items, and making a suitable allowance for other expenses connected with the work, it was found that the average total cost of home-missions, or church extension, per annum, had been \$7,000. The theological seminary had 31 students, more than it had ever had before. A salutatory letter was received from the Provincial Elders' Conference of the Southern Province. It spoke of the possibility of the union of the two districts, which, it said, although not as yet joined in organic union, "are as one in many respects." No advance toward a merging of the two districts could be reported at this time, for the reason that no regular Provincial District Synod of the Southern District had been in session since the meeting of the Northern District Synod in 1873.

The synod expressed approval of the course of the United States Centennial Commission in closing the International Exhibition, at Philadelphia, on Sundays. It was ordered that "in future no church which is not self-supporting shall be entitled to lay representation at provincial synods." A plan was adopted for the revival of the system of classes. It provides that the pastors and elders of congregations shall divide their people into classes, the distinctive idea of which shall be fellowship in the Christian experience and in the work for souls; that while liberty is used, attempts shall be made to secure uniformity among the several congregations; that members of the congregations shall be chosen to act as superintendents of the classes, and special stress shall be laid on personal prayer and labor by the members of the same. The subject of a change in the basis of representation in the provincial synods was referred to a special committee, under instructions to mature a plan to be presented to the synod of 1879. The synod recommended the election in all the congregations of a board of elders, separate from the board of trustees, who shall be solemnly installed in their office by the pastor, while the congregation shall be instructed to

show all due respect to their labors. The bishops were instructed to prepare a circular containing the teachings of Scripture and the Church on the subject of the eldership. Members of the Church were appealed to "to abstain from all amusements which interfere with a personal devotion to Christ." A four years' course of study, or reading, was adopted for men who may wish to enter the ministry of the Church, but are not able to acquire the necessary education except by private effort. Candidates may be licensed to preach while pursuing the course, but cannot be ordained except upon examination. Commemorative services appropriate to the Centennial year were appointed to be held in the churches on the Sunday before the 4th of July, 1876. The president of the synod was requested, in his communication to the Unity's Elders' Conference, to express the desire that the next General Synod may be convened at such a time as shall enable this Province to make its next Provincial Synod a preparatory synod.

The annual meeting of the Society for the Propagation of the Gospel among the Heathen was held at Bethlehem, Pa., August 24th. The Rev. Robert de Schweinitz presided. In his address he called attention to the fact that, although eleven years were yet wanting to complete the first century of the existence of the Society, this was nevertheless its one hundredth general meeting. The Board of Directors reported that \$11,500 had been given to the general mission-fund. The treasurer reported that the total assets of the Society amounted to \$217,758.25. The contributions of members during the year had amounted to only \$61.22, or half of what should have been collected. The Society had 225 members. Reports were made concerning the Indian missions in Canada and Kansas.

The entire field in which the Moravian missionaries are engaged is divided into sixteen provinces, viz.: Greenland, Labrador, the Indians of North America, the islands of St. Thomas and St. Johns, St. Croix, Jamaica, Antigua, St. Kitts, Barbadoes, and Tobago, in the West Indies, the Mosquito Coast, Surinam, the western part of South Africa, the eastern part of South Africa, Australia, and Western Himalaya. In these sixteen provinces there were, according to the report of the mission department of the Unity's Elders' Conference for 1876, 94 mission-stations and 15 preaching-places. There were engaged in these missions 154 brethren and 144 sisters as missionaries, besides a large number of native assistants. The total number of communicants reported was 22,051, and the whole number of souls under the spiritual care of the missionaries was upward of 67,000. During 1875, 376 adults and 2,228 children had been baptized, and 1,141 persons confirmed.

MOROCCO, an empire of Northern Africa. Sultan, Muley Hassan; succeeded his father in 1873. Owing to the indefiniteness of the

boundaries of the empire in the south, its area is variously estimated. The nearest estimate, probably, is about 259,600 square miles. The population has been estimated by Gerhard Rohlfs and others at 6,000,000. The capital, Fez, has about 150,000 and the city of Morocco from 40,000 to 50,000 inhabitants.

The commerce in 1875 was as follows (in francs):

COUNTRIES, Etc.	Imports.	Exports.
Great Britain	22,220,000	18,820,000
France	10,150,000	10,910,000
Spain	450,000	1,710,000
Other countries	82,000	1,630,000
Coined money	6,200,000	2,250,000
Total, 1875	89,840,000	85,820,000
" 1874	81,950,000	29,250,000

The most important articles of import and export are as follows (values in francs):

IMPORTS.			
ARTICLES.	Value.	ARTICLES.	Value.
Woven goods	14,270,000	Tea	1,050,000
Sugar	8,000,000	Cloths	890,000
Raw silk	1,500,000	Iron	580,000

EXPORTS.

ARTICLES.	Value.	ARTICLES.	Value.
Wool	6,270,000	Hemp-seed	16,000
Hides and skins	8,140,000	Oatrich-feathers	690,000
Matze	1,530,000	Dates	170,000
Peas and beans	10,210,000	Oxen	1,040,000
Almonds	2,010,000	Shoes	1,530,000
Olive-oil	660,000		

The movement of shipping in 1875 was as follows:

SHIPPING.	LADEN.		IN BALLAST.		Total Tonn.
	Vessels.	Tons.	Vessels.	Tons.	
Entered	696	142,659	745	110,897	258,556
Cleared	1,220	177,922	220	75,620	258,542

Of the vessels entered a little less than one-half were English, and not quite one-third Spanish. Of other countries, France and Portugal alone were represented to any considerable degree. The largest number of vessels entered at Tangiers. The following table shows the movement of shipping arranged according to nationality and the ports, together with the values of the cargoes (in francs):

NATIONALITY.	ENTERED.		PORTS.	ENTERED.		VALUE OF CARGOES.	
	Vessels.	Tons.		Vessels.	Tons.	Entered.	Cleared.
English	687	188,557	Tangiers	516	78,506	10,970,000	7,280,000
French	243	89,952	Larache	137	7,703	990,000	3,500,000
Spanish	407	7,870	Rabat	85	10,466	2,170,000	1,640,000
Portuguese	110	5,978	Casablanca	164	48,229	9,250,000	7,600,000
German	5	1,028	Mazagan	207	65,221	3,880,000	6,900,000
Danish	16	2,556	Safi	100	26,257	1,190,000	2,330,000
Italian	16	8,941	Mogador	85	29,609	6,020,000	6,440,000
Others	7	1,364	Tetuan	197	2,207	670,000	270,000

In February the Sultan sent his cousin, the Sherif El-Hadsh, to Algeria, to treat with the rebellious tribes of Uled-Sidi-Sheik, to secure

their settlement west of Fez. The sherif, who is the highest dignitary of the church in Western Africa, is described as a highly intelli-

CITY OF MOROCCO.

gent and enlightened man. He is married to an English lady, who with her sister accompanied him on this journey. His wife and his

son of three years are dressed in European style, while he himself is attired in an Egyptian Mameluke uniform. During his journey

through Algeria the natives everywhere pressed near to see him, and to be allowed to touch his dress, and completely loaded him down with presents. His wife, a Miss Keane, was governess in the house of the British consul-general in Tangier, when the sheriff saw her and fell in love with her. She consented to be his wife on the condition that he removed all his other women, which he accordingly did. He secured to her a dower of 100,000 francs, and 300,000 francs in case she should survive him. A special mission was sent during 1876 to France and Italy to negotiate commercial treaties, which was well received in both countries.

MORRILL, Lor M., was born at Belgrade, Me., May 3, 1813. He studied a year in Waterville College, was admitted to the bar in 1839, and became a prominent leader of the Democratic party in the State. In 1854 he was elected to the lower branch of the Legislature, and in 1856 to the Senate, of which he was made president. Dissatisfied with the position of his party on the slavery question, Mr. Morrill joined the Republicans, by whom he was elected Governor in 1857. He continued in this office, by reelection, till 1860, when he was chosen to serve in the United States Senate the unexpired term of Hannibal Hamlin, who had been elected Vice-President of the United States. He took his seat January 17, 1861, and was appointed a member of the Committees on Commerce, District of Columbia, and Olaims. He was a warm supporter of the war-policy of the Government, and in 1863 was reelected to the Senate for the term ending in 1869. During this time he served as chairman of the Committees on Expenses, on the District of Columbia, on Appropriations, and on Indian Affairs. He was defeated by Mr. Hamlin for reelection to the Senate, but on the death of Senator Fessenden, in 1869, he was appointed to serve out the unexpired term. In 1871 he was elected for the full term ending in March, 1877. He voted against the inflation bill, and in favor of the resumption act. On the resignation of Secretary Bristow, in June, 1876, Senator Morrill was appointed Secretary of the Treasury.

MUSIC. The attention of the musical world is directed to the new German school of composition, and a feeling of uncertainty and suspense as to the real meaning and ultimate influence of the "Music of the Future" disquiets the minds of lovers of music. Great as has been the triumph of Wagner, which was confirmed and crowned this year at the Baireuth festival, there is a vague feeling that his music lacks those popular elements which are present in the works of Meyerbeer and other admired masters, whose reputations he attacks, and that it can never become equally familiar and dear to the people. The influence of the German school is marked, and is most apparent in the works of composers whose reputations are founded upon productions in styles entirely different. There is no reason to believe

that the world's ideas of music will be revolutionized or the limits and destiny of the art greatly enlarged by the new tendency; yet it cannot be denied that this school of music alone shows signs of living development nowadays; for the Italian musical drama, in its best days too given to formalism and artifice, has passed its time of growth and productivity, and the French style of comic music cannot pretend to any of the qualities of serious art.

A symphony by J. K. Paine was produced at the concerts of Theodore Thomas, and was well received by the New York people and the musical critics; a scherzo in the second movement and the adagio in A flat in the third section were specially commended. The work is entirely genuine, and free from sensational effects; its melodiousness, the fine orchestral coloring, its unity, and naturalness, and freedom from dry passages, won for it immediate popularity. Wagner's "Centennial March," written by Herr Wagner for the Woman's Centennial Union, for which the composer received the price of \$5,000, was played at the opening of the Philadelphia Exhibition, under the direction of Theodore Thomas; the scoring is very elaborate, and novel effects are produced by sounds made upon wood and brass and by percussion, and even a gong is included in the instruments.

Henry Gadsby's attempt to set the "Alcestis" of Euripides to music was spoken of not unfavorably by the English critics. The work was given in the Crystal Palace, in the beginning of December. The music consists of nine choral and melodramatic numbers, with an overture. Necessarily, owing to the structure of the verse, there was a strong resemblance to the music of Beethoven's "Antigone" and "Elihus." Another English work of an unusual class was F. H. Cowen's opera, "Pauline," founded on Bulwer's "Lady of Lyons," the libretto by Henry Hersee. It shows some of the qualities of the French comic opera of the higher class, but is defaced by the introduction of several songs of incongruous character, simply designed for popular effect. A sacred cantata by John Francis Barnett, called "The Good Shepherd," is inferior to "The Ancient Mariner" by the same composer, but its failings may be charged to the barren character of the libretto. A cantata, "St. Dorothea," founded on the early Christian legend, composed by Madame Sainton-Dolby, is spoken of with approbation.

No new work of striking merit has been produced on the Paris stage this year. Yet several pieces, both serious and humorous, have succeeded in gaining for a few days the attention of the public. Lecocq's "La Petite Mariée" shows an improvement in style, approaching nearer to the true comic opera than any of his earlier works. "Le Déluge," a sacred composition by M. Camille Saint-Saens, is spoken of as able, but wanting in sentiment. An orchestral piece by the same composer,

named "Le Rouet d'Omphale," has been listened to with approval at the Popular Concerts and at the Conservatoire in Paris, and has also been successfully produced in Germany and Russia, and by Thomas in New York. Mermet's long-talked-of "Jeanne d'Arc," produced at the Opéra on the 5th of April, was a disappointment. A new requiem by Gounod, written in a style of severe simplicity, and marked by an entire absence of the fugue, was given by Padeloup on Good-Friday. A new mass by the same composer, called "La Messe du Sacré Cœur," is said to contain some very fine orchestral passages. Gounod's new opera, "Polyeucte," though completed, and eagerly expected by the Parisians this season, will not be acted before the year of the Universal Exposition, 1878. "Piccolini," by Guiraud, libretto by Sardon, and "Le Moulin du Vert-Galant," by Serpette, are light works, which were well received. "Dimitri," an opera by Victorin Joncières, produced at the Opéra, contains some good passages; and "Les Amoureux de Catherine," an *opéra comique* in one act, by Henri Maréchal, was favorably received. Offenbach's latest opera is founded on Jules Verne's story, "Dr. Ox's Experiment." A new opera by Victor Massé, "Paul et Virginie," was favorably criticised. Some French composers are reported to have undertaken to rival Wagner in his own manner. Ernest Reyer is engaged upon an opera whose story is similar to the third part of the "Ring des Nibelungen;" it will be called "Sigurt;" and M. Joncières is engaged on the music to a libretto which Louis Gallet has written, called "Tristan." "Les Erinnyes," a drama by Leconte de Lisle, after Æschylus, has been set to music by Massenet, and enacted with success.

Pierre Benoit, the Flemish composer, has produced at Antwerp a symphonic opera of strong realistic character, named "Charlotte Corday."

Ponchielli's new opera, "La Gioconda," was received at La Scala, in Milan, with great applause. "Cleopatra," by Lauro Rossi, said to be composed in a higher style than the ordinary run of modern Italian operas, was enthusiastically received at the Royal Theatre in Turin. A new opera by Cagnoni is much spoken of; it is called "Il Duca di Tapigliano," and had a great success in Turin.

Dr. O. Bach, of Salzburg, has been preparing an heroic opera, "Die Argonauten," whose text is worked over from Grillparzer's trilogy, "Das goldene Vlies." Edmund Kretschmer lately produced an opera called "Die Folkunger," which had considerable success; and has prepared another work, "Heinrich der Löwe," the libretto for which he wrote himself; it was given in Dresden in the autumn. This composer's music bears the impress of the Wagnerian manner in a marked degree. A comic opera called "Joconde," by Carl Zeller, a young Viennese amateur, has had considerable success; the libretto is based on a fanciful episode

in the English Civil War. "Die Falkensteiner," by Count Hochberg, another amateur, who writes under the *nom de plume* of J. H. Franz, was successfully produced at Hanover. Herr Hiller's "Prometheus," for orchestra and chorus, is said to be one of the finest productions of the aged composer.

The most important musical event that has taken place for many a year was the production of Richard Wagner's great four-part opera in the theatre built specially for the representation of the composer's works, at Baireuth, in Bavaria, on the four consecutive evenings of the 13th, 14th, 16th, and 17th of August last. The successful production of this stupendous work, and the acknowledgment of its power and beauty by the most critical musical audience ever assembled, were a complete and unreversible justification and recognition of the great master's art, a triumph on which Wagner had set his honor, and which was decisive to establish his supreme artistic rank, and to repay the long period of neglect and contempt through which the stoutest spirit and highest artistic purpose had alone enabled the composer to battle. The theatre in Baireuth had been erected at a cost of about \$350,000. To fit the scenic requirements of the opera, the stage-room was enormous. The scenery was the most elaborate and the mechanical arrangements the most complicated ever attempted. The trials of scenery commenced in the beginning of July. The arrangements were all directed, and for the most part conceived, by the composer himself. There was much doubt at first as to the success of some of the strange scenic effects; but, as they were finally perfected, their illusive power was found to be wonderful. By a novel arrangement the orchestra was entirely concealed from the view of the audience: this excellent idea has since been applied in one or two other theatres in Germany. The rehearsals commenced on the 14th of July. All the first artists of Germany were employed in the numerous rôles of the trilogy. The leading parts were *Siegmond*, acted by Niemann; *Sieglinde*, by Fräulein Scheffsky; *Wotan*, by Betz; *Siegfried*, by Unger; and *Brünnhilde*, by Frau Friedrich-Materna. On the days of the festival the little town of Baireuth was crowded with strangers. Spectators came from all countries, and thousands of people flocked in from the neighboring districts, who never set foot inside the theatre. The prices of the seats were set very high—100 Prussian thalers for each performance. As many as one thousand leaders of orchestras assisted at the performances. There were twenty representatives of royalty present, and fifty or sixty newspaper correspondents from Germany, France, Italy, England, and America. The performance fully corresponded to the expectations of the composer and his friends. The orchestral rendering, the singing, and the acting, were in the highest manner of German

art. In the scenery, which surpassed everything ever before witnessed, and formed a potent adjunct to the drama, about the only exception taken was at the clumsiness of the dragon-scene. The friends of Wagner, who had heard parts of the work before, were surprised at the new power which those parts gained in being presented in their right connection; the wonderful unity and organic development both of the drama and the music were admitted and admired by all. Many who came to cavil and condemn went away enthusiastic converts. The "Ring des Nibelungen," in its true dramatic character, is a trilogy, to which the first part, "Rheingold," forms the prelude. Founded on several of the ancient Germanic sagas, Wagner has developed the powerful dramatic character of his work only by freely altering the connection

and final bearing of some of the events, while at the same time preserving all the main episodes—in one instance even when the story is hideous to the modern sense. In the introductory part, "Rheingold," are presented supernatural beings only, the three warring races of Northern mythology, the gods, giants, and dwarfs. Their jealous struggles, plots, and counterplots for power form the motive of the drama. The Rhine-gold, the emblem of earthly power, rests in the depths of the tranquil Rhine, faithfully guarded by the Rhine-Daughters, a beautiful race of mermaids. The dwarf Alberich, a Nibelung, from the region of subterranean gloom, robs them of the treasure out of which he forges the ring of magic virtue, the symbol of earthly power. The god Wotan, or Odin, by crafty arts, masters the dwarf in Nibelheim, and extorts from him the

REGENSBURG, BAVARIA.

wonder-working ring. This ring he must deliver to the giants Fasolt and Fafner, as a ransom for Freia, the goddess of love and beauty. Fasolt is slain by Fafner, who, in the form of a dragon, guards the talisman, whose curse threatens destruction to the god unless it be rescued by a spotless mortal hero. In the second part of the tetralogy, "Die Walküre," the scene of action is transferred to the heroic world of the old Teutons. The dark legend of Siegmund and Sieglinde, and the protection of the erring hero against the wrath of Wotan by the Walküre, Brünnhilde, afford poetical and musical motives of the highest grandeur. The fruit of the guilty union of the above-named pair was Siegfried, the destined deliverer of the ring. The third part, "Siegfried,"

forms the dramatic climax of the tetralogy. The well-known legend is faithfully recounted: the human interest is here stronger, the music sweeter and richer. In the fourth drama, the "Götterdämmerung," the legend of the "Nibelungenlied" is concluded: Hagen's treacherous plots, Siegfried's love for Gutrun, and victory over Brünnhilde, under the disguise of Gunther, her suitor and Gutrun's brother, and the final fall of Walhalla, afford material of deep tragical moment, which fitly closes the great work. In the "Ring des Nibelungen" Wagner has completed the story which is only partly told in the "Nibelungenlied," connecting it with the sagas of the two Eddas, and supplying the logically consequent and necessary dramatic links.

N

NAVY OF THE UNITED STATES. The Navy now comprises 146 vessels of 150,157 tons' measurement, carrying 1,142 guns, exclusive of howitzers and Gatlinga. Of these 23 were sailing-vessels, carrying 229 guns; and 123, of 120,894 tons, and carrying 913 guns, were steam-vessels, including 24 iron-clads of 72 guns, 27 tugs, and two torpedo-boats. Of the whole number of vessels 75 were in actual use at the close of the year, of which 37, including 11 iron-clads on the North-Atlantic Station, were in commission attached to fleets. In his last annual report Secretary Robeson says:

The reduction of the force of our fleet by act of Congress, from 8,500 to 7,500 men, has placed our Navy, in the *personnel* of the enlisted men, below that of nearly every navy of Europe. The effect of this reduction has been to lose to the service many valuable seamen, who, for want of continuous employment in the Navy, and in the absence of any commerce of our own, have been forced to go abroad for employment. Their services are thus lost to the country, and the time and care given to their education as men-of-war's-men has been to some extent in vain. As a remedy for this misfortune, and for the purpose of maintaining a trained class of men in the Navy, skilled in their duties and devoted to their flag, I have the honor to repeat my recommendations of last year, that Congress give the necessary authority to enlist annually 750 boys for the Navy, under existing laws, but in addition to the number of men now allowed. The cost of these boys, so far as the pay of the Navy is concerned, would not amount to more than the cost of 250 men; and it is expected that this number enlisted annually will, in the course of a few years, not only fill the vacancies made by discharge, death, and desertion, but finally man our fleet with educated American seamen.

The system of training boys has been in successful operation for little more than one year, and there are at present 479 in the service, one-half of them under instruction on board the training-ships *Minnesota* and *Monongahela*, and the others already afloat in various sea-going vessels. The Department has stationed the *Minnesota* at New York, the *Constitution* at Philadelphia, and the *Monongahela* at Baltimore, as permanent school-ships for these lads, and the experience of the past year fully demonstrates the success of this effort to improve our seamen. I feel myself, therefore, most fully justified in earnestly renewing my recommendation of this addition to the *personnel* of the Navy.

On July 1, 1875, the amount of the appropriations applicable to the year ending June 30, 1876, was \$18,301,731. The actual expenditures during the year amounted to \$17,937,355, or about \$364,376 less than the appropriations. The appropriations available for the year beginning July 1, 1876, aggregate \$12,961,790. The estimates for the general maintenance of the Navy for the next year are as follows:

Pay of officers and seamen of the Navy.....	\$7,800,000 00
Pay of civil establishment in navy-yards.....	205,922 00
Ordnance and Torpedo Corps.....	445,575 00
Coal, hemp, and equipments.....	1,250,000 00
Navigation and navigation supplies.....	135,136 44
Hydrographic work.....	89,800 00

Naval Observatory, Nautical Almanac, etc.....	\$54,200 00
Repairs and preservation of vessels, etc.....	8,300,000 00
Steam-machinery, tools, etc.....	2,000,000 00
Provisions and clothing.....	1,403,731 53
Repairs of hospitals and laboratories.....	40,000 00
Surgeons' necessaries.....	40,000 00
Contingent expenses of various departments and bureaus.....	351,000 00
Naval Academy.....	199,242 40
Support of Marine Corps.....	905,769 00
Naval Asylum, Philadelphia.....	63,597 00
Maintenance of yards and docks.....	562,023 00
Total.....	\$18,646,012 00

The amount estimated for new buildings and the repairs and improvements necessary at the various navy-yards, stations, and hospitals, is \$2,908,596. There is also submitted by the Bureau of Ordnance an estimate for \$775,500 to provide the proper armament for large iron-clads and other ships being fitted out for sea.

The following is a statement of the number and yearly amount of pensions of the Navy on the rolls June 30, 1876, and the amount which was paid during that fiscal year:

PENSIONS.	On Roll June 30, 1876.	Annual Amount of Roll.	Amount paid for Pensions during Fiscal Year ended June 30, 1876.
Navy invalids.....	1,648	\$188,716	\$167,189 73
Navy widows and others.....	1,744	267,726	309,538 89
Total.....	3,392	\$456,442	\$476,728 62

NEAL, JOHN, an American author; died at Portland, Me., June 20, 1876. He was born in Falmouth (now Portland), Me., August 25, 1798. His parents were members of the Society of Friends, with which he also was connected until the age of twenty-five, when, principally for his inability to "live peaceably with all men," he received his formal dismissal. About the age of twelve he was employed in Portland as a shop-boy; a few years later he taught drawing and penmanship in the principal towns of Maine; in 1814-'15 he was a dry-goods retailer and jobber in Boston and New York, and afterward established himself in Baltimore as a wholesale dealer in partnership with John Pierpont. In 1816 they failed, and Neal began the study of the law. He read through a legal course intended to embrace a period of several years in a twelve-month, besides attending lectures and studying several languages. In 1816 he produced a review of the works of Byron, written, it is said, in four days, which appeared from month to month until completed in the *Portico*, a Baltimore magazine. In 1817 he published his first novel, "Keep Cool" (2 vols., Baltimore), originally called "Judge Not," followed the next year by "The Battle of Niagara, Goldau, and other Poems." In 1819 appeared "Otho, or the Bastard," a five-act tragedy; and about

the same time he assisted Dr. Watkins in writing the "History of the American Revolution, by Paul Allen." Admitted to the Maryland bar in 1819, he entered upon practice, but continued his literary labors. Besides preparing an index for "Niles's Register," then amounting to upward of fifty volumes, he published in 1823 the novels "Seventy-six, a Romance of the Revolution," "Logan," "Randolph," and "Errata." They were severally written, according to his own account, in periods of from twenty-seven to thirty-nine days. He went to England in January, 1824, and wrote articles for various periodicals, including "Sketches of the Five American Presidents and the Five Candidates for the Presidency" for *Blackwood's Magazine*. His literary efforts attracted the notice of Jeremy Bentham, who invited him to take up his residence in his house, of which he remained an inmate during a considerable portion of his stay in England. In 1827 he returned to America, and settled in Portland, where he employed himself in practising law, writing, and lecturing; "and, that no superfluous energy might run to waste, established gymnasiums and gave lessons to large classes in sparring and fencing." This life he continued till 1850, when he gave up his profession. He also published "Brother Jonathan" (3 vols., London and Edinburgh, 1825); "Rachel Dyer" (Portland, 1828); "Bentham's Morals and Legislation" (Boston, 1830); "Authorship, a Tale" (1833); "The Down-Easters" (2 vols., New York, 1833); "One Word More" (1854), essays of a religious character; "True Womanhood, a Tale" (Boston, 1859); "Wandering Recollections of a Somewhat Busy Life" (1869); and "Portland Illustrated" (1874).

NEBRASKA. The existing law in the State of Nebraska requires an enumeration of the inhabitants to be made every year by the precinct assessors, and returned to the county

thereafter, and it is probable that the law will be speedily changed to conform thereto, dispensing with the annual enumeration. The following table furnishes a comparison of the last two censuses:

COUNTIES.	POPULATION.	
	1876.	1875.
Adams.....	3,940	3,098

STATE SEAL OF NEBRASKA.

clerks, by whom they are forwarded to the Secretary of State. The new constitution provides for a census in 1885, and every ten years

The valuation of property in the State in 1875 for purposes of taxation was \$75,467,398.81, and for 1876 \$74,178,645.43, a decrease of \$1,288,753.38. The tax-levy for each year was four mills on the dollar for the general fund, one mill for the sinking-fund, one mill for the common-school fund, one mill for the penitentiary fund, one-quarter mill for the university fund, and one-tenth mill for the State bond fund, or $7\frac{1}{10}$ mills in all. The aggregate revenue to be obtained by this levy is \$540,-

805.11 for 1876, but there were taxes due on the 30th of November, delinquent for different years, amounting to \$765,815.25. The receipts of the Treasury for two years ending November 30th were \$1,693,849.59, including a balance of \$234,543.41 on hand at the beginning of that period. The disbursements for two years amounted to \$1,869,795.91, leaving a balance at the end of the last fiscal year of \$324,053.68. This balance, together with delinquent taxes, made the resources of the State (exclusive of unsold lands) \$1,089,863.95. The total liabilities were \$528,524.36, classified as follows:

Certificates of indebtedness issued to the permanent school-fund for general-fund warrants paid by said fund.....	\$342,957 84
Outstanding general-fund warrants.....	2,480 74
Interest on outstanding general-fund warrants..	652 28
Outstanding penitentiary-fund warrants.....	74,756 08
Interest on outstanding penitentiary-fund warrants.....	5,565 88
Outstanding State building-fund warrants.....	31,059 82
Interest on outstanding State building-fund warrants.....	30,468 41
Outstanding temporary school-fund warrants....	389 41
State bonds.....	50,000 00
Total.....	\$528,524 36

The new constitution provides for the funding of the certificates of indebtedness issued to the school-fund.

The sixty organized counties of the State are divided into 2,510 school districts. The number of children of school age is 86,191, of whom 59,966 attended the public schools during the year. There were 1,984 school-houses, valued at \$1,585,736.60, and 3,361 teachers, receiving an average salary of \$34.24 per month. The total receipts of the year from all sources, for school purposes, were \$1,093,275.39, and the expenditures \$1,098,974.75. The bonded and floating school-debt was \$1,063,058.60. The State University, at Lincoln, is in a flourishing condition. The attendance increased from 132 in 1874 to 292 in 1876. The Normal School, at Peru, is also on a satisfactory basis. The average attendance for the year was 142, while the whole number of different students was 268.

The Legislature of 1875 made an appropriation of \$10,000 for the erection of an Institute for the Blind at Nebraska City, on condition that the citizens of that place should raise \$3,000 for the same purpose. The condition was complied with, and the necessary building constructed in 1875. The institution was opened on the 13th of January, and has accommodations for fifty pupils. The number in attendance on the 30th of November was seventeen. Prof. Samuel Bacon is the principal.

The Institute for the Deaf and Dumb, at Omaha, has been in successful operation since 1869, and during the past two years there have been fifty-three pupils connected with the school. Appropriation was made in 1875 for the construction of a new building for this institution, which was nearly completed at the end of the year.

A new wing has been added to the Hospital for the Insane, at a cost of \$35,000. The maintenance of the hospital for two years cost \$60,746.69. Of this amount \$26,962.99 was charged to the counties having patients in the institution. The number of inmates on the 30th of November was 93, an increase of 47 in two years. The whole number admitted during those years was 118; number discharged as recovered, 50; improved, 9; unimproved, 6; escaped, 1; died, 5. The daily average in 1876 was 81 patients; the weekly cost per patient was \$7.55½.

The State penitentiary has been completed in a substantial manner. The daily average of convicts for two years ending November 30th was 63. The cost of maintenance for that period was \$57,658, of which \$50,000 was appropriated by the Legislature, and the balance earned by the convicts. The average daily cost of each prisoner was \$1.20. The contract for the labor of the prisoners has expired, and it is proposed to establish some branch of industry in the prison itself for the employment of the inmates. The younger class of criminals are kept separate from the rest, and night-schools have been established for their benefit.

The State has twenty-two organized and well-armed companies of militia, favorably situated for the protection of the frontier against incursions of the Indians. After the outbreak of hostilities with the Sioux, arms were obtained from the Federal Government, the Governor executing a bond for their safe return, and the companies were fully equipped. They have served a useful purpose in protecting the frontier and giving the people a sense of security.

The title of the State to the salt-springs near the city of Lincoln has been confirmed by the United States Supreme Court, against the claim of a private party.

The Democrats of the State held a convention at Lincoln, on the 19th of April, for the purpose of choosing delegates to the National Convention of the party. They adopted resolutions favoring reform in administration, and a return to specie payments "as soon as it can be done without detriment to the commercial and industrial interests of the country." A State Central Committee was also chosen. No instructions were given to the delegates, but a large majority of the convention was understood to be in favor of the nomination of Mr. Tilden.

The Republicans held a convention at Fremont on the 23d and 24th of May, organization not having been effected until the second day, owing to a number of contesting delegations. The local divisions were between those known as Hitchcock and anti-Hitchcock men, or the supporters and opponents of Senator Hitchcock as a party leader. Six delegates to the Cincinnati Convention were chosen, and instructed to vote for James G. Blaine as the candidate for President. The new

Central Committee was strongly "anti-Hitchcock."

The Democratic Convention for the nomination of candidates was held at Omaha, on the 6th of September. The State ticket adopted was as follows: For Governor, Parn England; Lieutenant-Governor, Miles Zentmeyer; Secretary of State, Joseph E. Ritchie; Treasurer, Samuel Waugh; Auditor, G. P. Thomas; Attorney-General, D. L. Ashby; Superintendent of Public Instruction, I. N. Jones; Commissioner of Public Lands and Buildings, Henry Grebe. The candidate for Congress was General Joseph Holman, of Dakota County. The following was the platform adopted:

Resolved, by the Democracy of the State of Nebraska, in convention assembled:

1. That we heartily indorse the statement of principles of the Democratic party as enunciated by the St. Louis Convention; and that we look upon the election of Tilden and Hendricks as the only means of saving to this country the government our fathers gave us.

2. That, in view of the history of the Republican party, we have no faith in their pledges of reform; that they have so often deceived the people and obtained their support on the strength of such pledges, that it is the height of folly to trust them longer; and that the people place no confidence in a party whose entire history is replete with broken pledges, violated personal rights, criminal extravagance, and unpunished corruption.

3. That we arraign the Republican party, and particularly a Republican Senate, as being false to the interests of the people, and to their repeated pledges of economy in refusing to consent to a reduction of the expenditures of the Government, made by a Democratic House of Representatives.

4. That we denounce the policy of the Republican party in furnishing the Indians with arms and ammunition with which to take the lives of tax-paying white men, and in protecting the Indians while they leave our frontier unprotected.

5. That we denounce interference on the part of the General Government with a free exercise of the elective franchise by keeping a standing army over the ballot-box in several States of the Union as an unwarranted exercise of the Executive power, in a time of profound peace, for the sole object of subserving party purposes.

6. That the pretended claim of the Republican party that they are the friends of the soldier is a gross and deceptive fraud in that after a Democratic House had passed a bill for the purpose of equalizing the bounties of the soldiers, a Republican Senate defeated the same.

7. That we demand the utmost economy in the expenditures of our State government, and that the public money shall not be used by its custodians in speculation, or to advance party ends, and that such use be punished with severe penalties.

The Republican nominating convention was held at Lincoln, on the 28th and 29th of September. The ticket was made up as follows: For Governor, Silas Garber; Lieutenant-Governor, N. O. Abbott; Secretary of State, Bruno Tzschuck; Treasurer, J. C. McBride; Auditor, J. B. Weston; Attorney-General, George H. Roberts; Superintendent of Public Instruction, S. R. Thompson; Commissioner of Public Lands and Buildings, F. M. Davis; member of Congress, Frank Welch. Presidential electors were also nominated. A long series of

resolutions was adopted. The preamble reaffirmed the faith of the party in the perpetuity of the Union and the sanctity of the Constitution, and steadfast loyalty to its principles under all circumstances. The platform and nominations of the Cincinnati Convention were approved in the first two resolutions. Then followed these declarations:

8. We affirm that the Republican party stands pledged to the principle of the equality of all citizens before the law, without regard to color, creed, or nationality. The fact of citizenship clothes all alike; its panoply is over all, and each and every one is entitled to the fullest protection in accordance with the Constitution in every State of the Union.

4. We commend the legislation of Congress, the orders of President Grant, and the action of the Attorney-General in his letter of instructions to the United States marshals to enforce the laws, and protect the citizens in the performance of their political rights, and sacredly shield the elective franchise in States where obstructed.

5. We unhesitatingly indorse the financial policy of the Government in its successful efforts to "restore the public credit and maintain the national honor," and the late fiscal arrangements, by means of which \$800,000,000 of bonds have been placed at four and a half per cent. interest, and an equivalent amount of six per cent. bonds retired, thus effecting a saving of \$4,500,000 interest money annually, meets the unqualified approbation of the Republican party.

6. We approve the policy of redeeming the outstanding currency in coin or its equivalent, so as to make it convertible at any time at the option of the holder, either into gold, silver, or government bonds, at an equal interchangeable value, and we look with confidence to a returned prosperity and to such a revival of commerce, trade, and manufactures, as will make such redemption speedily practicable.

7. Owing to the requirements of the public debt, revenues must be provided in addition to the ordinary expenditures of the Government, sufficient to discharge the accruing interest; which revenues must in the nature of things be derived principally from duties on imports; and, in the adjustment of the tariff laws, equitable protection should be given to domestic manufactures, and thus foster labor, promote enterprise, and advance the public welfare.

8. We approve and commend the generous and beneficent policy of the Government in granting pensions to loyal men who periled their lives that the nation might live, and to their widows and orphans. A grateful people will cheerfully pay taxes for this holy purpose.

9. We desire to express our abhorrence of and place our seal of condemnation on that element in the Democratic party which justified the slaughter at Hamburg, S. C.; which looks with complacency on the butcheries at Coushatta, La.; which approves of the shot-gun policy in Mississippi; which indorses the displacement of Union soldiers, and establishes the Confederate guerrillas in their vacant positions; which has cut down the appropriation for the army and navy, while a savage warfare is in progress on our borders; which has sent to the congressional halls the most violent and bitter foes of the restored republic; which has in solemn convention declared the amendments to the Constitution null and void, and which presents itself to-day in an attitude of defiance and hostility to the peace, integrity, and autonomy of the nation.

We, the Republican party of Nebraska, charge the above on a portion of the adherents of the Democratic party, and we reject with disdain the presentation of statements made in the platform of that party at St. Louis. To the maintenance of all herein set forth, we pledge ourselves as becomes all

good citizens, all patriots who love their country and cherish their country's honor.

The State election took place on the 10th of October, and resulted in the choice of the Republican candidates. The total vote for Governor was 50,088, of which Silas Garber, Republican, received 29,947; Parn England, Democrat, 17,719; and J. F. Gardner, "Greenback," 3,017. Garber's plurality over England was 12,828; majority, 9,811. The candidates for Congress received the following vote: Frank Welch, Republican, 80,900; Joseph Holman, Democrat, 18,206; Marvin Warren, "Greenback," 3,580. The total vote for presidential electors on the 7th of November was 58,889. The Republican candidates received 31,916; Democratic, 17,554; "Greenback," 2,320; Prohibitionist, 1,599. The Republican majority was 10,448.

As the new constitution imposes the duty of canvassing the votes upon the Legislature, and the regular session was not to be held until January, 1877, the Governor called an extra session of the members of the last Legislature, to be held on the 5th of December, for the purpose of canvassing the votes for presidential electors. The legality of this course was disputed by the Democrats, and steps were taken to invoke the intervention of the courts, and prevent the electors from casting the votes. The Legislature met, however, and canvassed the votes for electors, declaring the Republican candidates elected. Question having been raised as to the eligibility of Amasa Cobb, one of the candidates, the following resolution was adopted by the House of Representatives:

Resolved, by the House of Representatives of the State of Nebraska, That the Senate be and is hereby invited to meet the House in joint convention immediately after the adoption of this resolution, for the purpose of electing an elector of President and Vice-President of the United States, to fill said alleged vacancy.

The following points of order were raised:

1. That this body had no knowledge of any vacancy existing in the board of electors.
2. That the law required that the presidential electors be elected by the people, at the general election in November.
3. That the joint resolution under which this body sought to appoint an elector was void, for the reason that it was not read at large on three separate days, as required by the constitution, nor does it repeal the present law providing for the election of presidential electors.

These were promptly overruled, the resolution was adopted, and the two Houses in joint convention filled the "alleged vacancy." The electors met next day and cast their votes for Hayes and Wheeler, without any interference from the courts.

Much damage was done again this year over a large portion of the State by grasshoppers. A convention of Governors of several Western States and Territories was held at Omaha, in October, to consider the question of dealing with this destructive pest. Among those present were Governors Pillsbury, of Minnesota;

Kirkwood, of Iowa; Hardin, of Missouri; Pennington, of Dakota; Garber, of Nebraska; and several scientific men. The following plan of action, suggested by Governor Pillsbury, of Minnesota, was adopted, after a discussion upon the whole subject:

1. A joint and urgent appeal to the President of the United States, to be signed by the Executives here assembled, and others favoring the movement, requesting him in his forthcoming annual message, or other suitable manner, to commend the subject to the prompt and favorable action of Congress.

2. A similar joint request from this body to the congressional delegations from the States here represented, and others interested, urging their assiduous efforts for the passage of an act of Congress providing for the appointment of a commission of both scientific and practical men to consider the whole question, including cause and remedy, with adequate provision for suitable bounties for the prevention and cure of the evil.

3. A joint memorial, if practicable, or some other form of combined official action by our several Legislatures, asking the aid of Congress for these purposes, and to that end requesting the concerted and persistent influence of our several congressional delegations.

4. Recommendations of the subject by the Governors to the favorable consideration of the several State Legislatures interested, invoking the adoption of such practicable measures as have proved efficacious, and such as further experience may suggest, including the repeal of existing game-laws, or such modification of them as will prevent the destruction of birds which feed upon the insects; the offering of bounties for the destruction of eggs and insects; the prevention of prairie-fires until a suitable time, for the destruction of the young grasshoppers by firing the grass. The encouragement of tree-culture for promoting moisture and harboring birds, and such other means as may promote the great end desired.

A decision of the U. S. Circuit Court, rendered in May, by Justice Miller, confirmed the title of the Burlington & Missouri River Railroad Company to the lands taken under a grant by act of Congress of July 2, 1864. An attempt had been made to have the patents set aside, on the following grounds: that lands had been taken beyond the lateral limit of twenty miles on each side of the road; that some sections being fifty or a hundred miles from the road could not be considered "on the line thereof," as required by the grant; that the sections were not distributed equally along each twenty miles of the road; and that along certain portions of the road, where it came within twenty miles of the Union Pacific, the lands had all been taken from one side. The court held that, as no lateral limit was mentioned in the grant, the allowance of "ten sections per mile, on each side of said road, on the line thereof," could be taken at any distance necessary to make up the amount of the grant from lands "not sold, reserved, or otherwise disposed of by the United States;" that "on the line thereof" meant simply parallel to the road, and was not restricted to any particular distance; that it was not necessary that the lands should be taken up and patented on the completion of each twenty miles of the road, though that was authorized; that it was

not essential that the distribution should be equal along each twenty miles; and, finally, that where the sections could not be obtained on the south side of the road, on account of being previously granted to the Union Pacific, the company was not entitled to double the amount on the north side; but, having obtained it, the patents could not be set aside, unless the lands taken in excess of the grant could be identified and described.

NEHER, MICHAEL, a German painter, born in 1798; died December 4, 1876. He passed six years in the principal cities of Upper Italy, and in 1823 went to Rome, where he studied the old masters, and at the same time brought out a number of *genre* paintings, which were very highly valued, and also produced a number of fine pen-pictures of the surroundings of Naples and Rome. In 1825 he returned to Munich, and there painted a large number of landscapes, *genre* paintings, and architectural paintings, the latter being his chief branch. In 1834 he, together with several other artists, was employed in decorating the walls of the old castle Hohenschwangau with frescoes. Neher painted in this castle the "Departure of Lohengrin from the House of his Parents," and "His Marriage with Elsa of Brabant," both after designs by Rubens.

NETHERLANDS, THE, a kingdom in Europe. King, William III., born February 19, 1817; succeeded his father, March 17, 1849. Sons: 1. William, Prince of Orange, and heir-apparent to the throne, born September 4, 1840; 2. Alexander, born August 25, 1851. Brother of the King: Henry, governor of the grand-duchy of Luxemburg. The area of the kingdom is 12,679 square miles.*

The population was, in December, 1875, officially estimated at 3,809,527. The following table gives the population of the several provinces, and the percentage of Protestants and Catholics, leaving out of account the Israelites and the minor sects:

PROVINCES.	PERCENTAGE IN 1868 OF		Population, 1875.
	Protestants.	Catholics.	
Brabant	11.6	87.9	451,095
Gelderland.....	62.0	36.8	448,820
South Holland.....	78.8	24.6	743,169
North Holland.....	66.8	27.8	629,345
Zealand.....	78.5	25.9	155,628
Utrecht.....	62.1	37.0	154,084
Friesland.....	90.8	8.2	313,904
Overijssel.....	68.7	29.7	265,144
Groningen.....	90.9	8.2	288,669
Drenthe.....	92.8	8.2	112,221
Limburg.....	1.7	97.7	282,563
Total.....	61.8	36.7	3,809,527

The Israelites and the minor sects constitute two per cent. of the population. The Protestants are a majority in nine, and the Roman Catholics in two, provinces. The population of the larger cities in December, 1875, was as follows:

CITIES.	Population.
Amsterdam.....	283,982
Rotterdam.....	182,064
The Hague.....	100,054
Utrecht.....	65,052
Leyden.....	40,784
Groningen.....	40,165
Arnhem.....	34,755
Haarlem.....	34,189
Maastricht.....	28,891
Leeuwarden.....	27,108
Dordrecht.....	26,157
Tilburg.....	25,397
Breda.....	24,297
Delft.....	23,504
Nimeguen.....	22,198
Schiedam.....	21,582
Zwolle.....	21,448
Heerde.....	21,223

The colonies of the Netherlands are considerably larger and more populous than the country itself. The total area is estimated at 641,201 square miles; the population at 24,480,900, divided as follows:

1. POPULATION OF THE DUTCH COLONIES IN THE EAST INDIES IN DECEMBER, 1875.....		24,370,000
Java and Madura (1874).....	18,120,209	
Western Sumatra.....	1,620,979	
Bencoolen.....	140,116	
Lampung.....	112,784	
Palembang.....	577,065	
Etouw and eastern coast of Sumatra.....	60,296	
Banda.....	63,922	
Billiton.....	26,689	
Western Borneo.....	363,793	
Southern and Eastern Borneo.....	859,629	
Celebes.....	335,942	
Menado.....	486,895	
Molucca Islands.....	97,918	
Ternate.....	94,745	
Amboyna.....	153,458	
Banda.....	900,000	
Timor.....	79,574	
Bali and Lombok.....	200,000	
New Guinea.....	200,000	
2. POPULATION OF THE DUTCH COLONIES IN THE WEST INDIES (1875).....		41,024
Curaçao Islands.....	23,979	
Aruba.....	5,670	
Bonsire.....	4,470	
St. Martin.....	8,101	
Saba.....	2,008	
St. Eustache Islands.....	1,509	
3. SURINAM.....		60,839
Total.....		24,480,900

The foreign population of the colonies in 1874 included 14,310 Europeans in the army; 34,212 other Europeans (27,571 in Java and Madura); 962 descendants of Europeans; 805,897 Chinese; 18,083 Arabs; and 19,518 Hindoos.

The population of Batavia, on January 1, 1875, was 99,109.

The budget estimates of the Dutch colonies for the year 1876 were as follows (in florins):

COLONIES.	Revenue.	Expenditures.	Surplus (S.) or Deficit (D.).
East Indies.....	140,958,294	180,107,889	S. 10,850,455
Surinam.....	1,108,800	1,700,673	D. 596,873
West Indies.....	407,251	492,989	D. 85,738

The imports in Java and Madura in 1874 amounted to 93,493,000 and the exports to 144,212,000 florins. The imports in the other East Indian colonies in 1878 were 42,486,000 and the exports 41,869,000 florins.

In the budget for the year 1876, the expenditures and revenue are estimated as follows:

* For the area of the several provinces, see ANNUAL CYCLOPEDIA for 1872.

EXPENDITURES.		Florins.
1. Royal House.....		950,000
2. Cabinet, supreme state authorities.....		600,756
3. Ministry of Foreign Affairs.....		629,309
4. Ministry of Justice.....		3,683,860
5. Ministry of the Interior.....		22,112,282
6. Ministry of the Navy.....		13,632,587
7. Ministry of War.....		24,214,000
8. Public debt.....		26,785,322
9. Ministry of Finances.....		20,003,075
10. Colonies.....		1,682,884
11. Unforeseen.....		50,000
Total.....		114,849,675

REVENUE.		
1. Direct taxes.....		23,059,643
Land-tax.....	10,441,243	
Poll-tax.....	3,868,000	
Patent-tax.....	8,750,400	
2. Excise.....		32,320,000
On spirits.....	17,900,000	
On other liquors.....	14,420,000	
3. Taxes on stamps, enregistrement, inheritances.....		13,147,000
4. Customs.....	3,211,799	
5. Taxes on gold and silver wares.....	851,200	
6. Domains.....	1,600,000	
7. Post.....	3,100,000	
8. Telegraphs.....	673,000	
9. Lottery.....	410,000	
10. Taxes on game and fisheries.....	123,000	
11. Pilotages.....	800,000	
12. Taxes on mines.....	4,630	
13. State railroads.....	1,873,400	
14. Miscellaneous.....	5,171,499	
15. Receipts from the colonial administration.....	10,350,455	
Total revenue.....		108,710,675
Deficit.....		10,689,000

This deficit is to be provided for provisionally by the emission of treasury notes for not more than 5,000,000 florins. The financial estimates are, however, always framed with great moderation, mostly exhibiting a deficit, which in the final account becomes a surplus.

In 1876 the national debt was represented by a capital of 922,741,326 florins, divided as follows:

DIVISION OF DEBT.	Capital.	Interest.
Debt bearing interest at the rate of 3½ per cent.....	682,108,002	15,502,700
Debt bearing interest at the rate of 3 per cent.....	91,579,294	2,746,368
Debt bearing interest at the rate of 3½ per cent.....	11,867,000	407,470
Debt bearing interest at the rate of 4 per cent.....	177,167,100	7,088,410
Miscellaneous.....	79,253
Total debt, 1876.....	922,741,326	26,196,731
Total debt, 1875.....	936,636,926	27,163,349

The total value of imports in 1874 amounted to 671,538,000 and the exports to 508,222,000 florins, being a decrease in both cases under the preceding year. The transit trade in the same year was estimated at 1,265,019 kilogrammes.

The imports and exports in 1873 and 1874 were valued as follows (in florins):

COUNTRIES.	IMPORTS.		EXPORTS.	
	1873.	1874.	1873.	1874.
Great Britain.....	247,243,000	228,089,000	115,304,000	117,086,000
Zollverein.....	181,180,000	186,999,000	229,566,000	222,023,000
Hanse towns.....	7,106,000	7,943,000	8,914,000	10,453,000
Austro-Hungary.....	824,000	61,000	142,000	173,000
Belgium.....	91,210,000	86,885,000	76,232,000	76,624,000
Russia.....	26,776,000	33,646,000	3,426,000	3,407,000
Denmark.....	419,000	636,000	2,066,000	1,370,000
Sweden and Norway.....	7,033,000	6,317,000	3,666,000	4,477,000
France.....	12,408,000	11,664,000	6,755,000	6,297,000
Italy.....	2,919,000	2,016,000	9,154,000	10,573,000
Spain.....	1,900,000	1,325,000	114,000	41,000
Portugal.....	1,568,000	3,102,000	903,000	1,312,000
Other countries.....	3,339,000	3,175,000	3,615,000	3,134,000
1. EUROPE.....	583,890,000	627,078,000	459,799,000	462,447,000
United States of North America.....	29,847,000	29,328,000	4,080,000	4,623,000

Total.....	671,500,000	508,200,000

Education is provided for by a non-denominational primary instruction law, passed 1857. Under its working there were in December, 1873, according to the report of the royal commissioner, issued in 1876, 2,669 public schools, with 6,519 schoolmasters and 729 schoolmistresses, and 143 subsidized and 978 non-subsidized private schools, with an aggregate of 4,317 teachers (2,472 males and 1,745 females). At the same date the pupils in the public schools numbered 382,146 (212,995 boys and 169,151 girls); the pupils in subsidized private schools numbered 5,999 (2,870 boys and 3,129 girls), and in non-subsidized private schools 111,914 (49,950 boys and 61,964 girls). The total number of elementary schools was 3,790, of pupils 500,059, of teachers 11,465.

The teachers appointed under the law of 1857 are superintended by 94 district-school inspectors, who act under 11 provincial superintendents. The inspectors grant licenses for the establishment of schools, and present to the Government, three times a year, an account of the state of the public instruction.

The number of pupils in the public evening-schools was 19,236, in private evening-schools 4,555; total number, 23,791, of whom 17,736 were boys and 6,055 girls. The number of repetition and Sunday schools was 241, of which 102 were public, 18 subsidized private, and 121 non-subsidized private schools. The total expenditures for elementary instruction

in 1873 was 6,558,519 florins. There were 11 navigation-schools, with 23 teachers and 350 pupils. In the colony of Java there were 53 government schools, with 4,160 pupils, of whom 2,352 received instruction free; 29 private schools were reported to have 2,000 pupils. There were also 73 government and 114 private schools for natives of which the number of pupils was not given.

The army of the Netherlands in Europe consisted, in 1876, of 2,076 officers and 60,867 men; the East Indian army numbered 1,425 officers and 83,996 men.

The navy of the Netherlands on July 1, 1876, consisted of 87 steamers, with 386 guns, and 18 sailing-vessels, with 119 guns: total, 105 vessels, with 505 guns.

The merchant-navy, on January 1, 1876, consisted of 1,749 sailing-vessels, of 437,897 tons, and 86 steamers, of 76,828 tons: total, 1,835 vessels, of 514,725 tons.

The aggregate length of railroads in operation was, on January 1, 1876, 1,602 kilometres (1 kilometre = 0.62 English mile), of which 988 were state railroads.

The aggregate length of the state telegraph lines was, on January 1, 1876, 3,440 kilometres; the aggregate length of the wires, 12,333 kilometres; the number of officers was 330; the number of telegrams carried in 1875 was 2,214,730; the revenue was 708,986 florins; the expenditures, 1,276,540.

Early in January General Enderlein, War Minister, retired from office, in consequence of the unfavorable action of the States-General upon his plan for putting the country into a condition for defense. Heer Klerck, formerly a counselor in the department of railroad affairs of the Ministry of the Interior, was appointed War Minister in his place. The questions concerning military affairs in reference to which the differences arose that led to this change in the War Ministry were more political than technical in their character, and were closely connected with the increasing objections of the upper classes to military service. In May the Second Chamber approved a bill providing for the introduction into the coinage of the exclusive gold standard of value. The bill, however, authorized to be used still, for change, gulden-pieces in silver and cents in copper. A proposition to introduce the gold standard into the Indian possessions was referred to the State Council.

A cabinet crisis was brought about in June by the continued unfavorable action of the States-General toward the military bills of the Government. The Second Chamber denied a motion for the increase of the contingent from 11,000 to 14,000 men, whereupon, June 19th, Heer Heemskerck, Minister of the Interior, announced that the cabinet had sent in their resignations to the King. By the request of the King, the resignations were held in suspense for several weeks. It was found extremely difficult to form a new minist-

try, as agreement between the present Chambers and the Government seemed to be impossible, and new elections would only result in the return of a new Chamber of precisely the same stamp as the old one; so the ministers had no alternative but to stay, confining their attention, however, to keeping the machinery of the Government in regular operation, without attempting to enter upon or carry out any definite policy. Early in August the King invited Heer Kappeyne van de Copello to a consultation with reference to the formation of a new ministry. Heer Kappeyne was one of the most prominent speakers on the side of the Left in the debate which resulted in the rejection of the military law. The conferences were without result. Heer Heemskerck refused to withdraw his resignation.

About the beginning of September the King succeeded in partly reconstructing his ministry, by naming Heer Alting Mees to be Minister of the Colonies, and by giving the Ministry of War temporarily to Heer Taalman Kip, Minister of the Marine.

A difficulty which had arisen with the Republic of Venezuela with reference to the ship *Midas* was peacefully adjusted in August, the Government of Venezuela agreeing to deliver the ship to the Dutch consul at St. Thomas.

The new session of the States-General was opened September 18th. The King in his speech said that the relations of the kingdom with foreign powers continued friendly. The country was in a flourishing condition, agriculture was prosperous, and the crops generally were satisfactory. A part of the land had been visited with floods at the beginning of the year, but the help afforded by the nation to the sufferers had healed many wounds. The great public works which were in progress, the new approaches from the sea to the commercial towns, now almost completed, the extension of the railroad system, the improvement of the rivers, and the proposed connection by canal of the northern part of the country with Germany, promised to be of great advantage to trade. The condition of the finances was favorable, and the public revenues were increasing, thereby also showing the material progress of the nation. The display of the art and industry of the nation, and of the skill of its ship-builders, at the International Exhibition at Philadelphia, was spoken of as creditable. The attention of his Majesty was given to the strengthening of the military force. Extraordinary exertions were still necessary to protect the dominions of the nation in Northern Sumatra. The army and the fleet in that region were doing their duty steadfastly and vigorously. In all the other possessions of the East Indies quiet prevailed. It was hoped that a peaceful solution of the difficulties with Venezuela was assured. The coöperation of the States-General was invoked in the revision of the laws. Propositions would be made for the improvement of the military laws and the re-

vision of the election laws. A bill respecting elementary education would be submitted. Bills were contemplated concerning railroads and the quarantine laws, bills modifying the tax laws, and bills concerning the regulation of the money standard, both at home and in the Indies, in all of which the coöperation of the States-General was asked. Shortly after the opening of the Chambers, the King appointed Major-General Beyen War Minister. On the 25th of September, in the Second Chamber, the Minister of Finance brought forward the budget for 1877. The expenditures were estimated at 115,500,000 gulden, of which 10,000,000 gulden were for the making of railways, 27,000,000 gulden for the payment of interest on the public debt, and 4,000,000 gulden as extraordinary expenditure for improving the national defenses. The receipts were estimated at 107,000,000 gulden, thus showing a deficit of 8,500,000 gulden, which would be covered by the accumulated surpluses from previous budgets and the regular increase in the public revenues. In a discussion in the Second Chamber concerning the affairs of the colonies, Heer van der Putte asked the Government to limit its operations to the erection of a few coast-forts. The Colonial Minister replied that he doubted if such a limitation were possible. Speaking in reference to the relations of the country with Venezuela, the Minister of Foreign Affairs remarked that he considered that the formal resumption of diplomatic relations was very near. On the 24th of November the Second Chamber adopted a money bill which temporarily continued the double (gold and silver) standard of value, and authorized the Minister of Finance to sell silver and buy gold, as circumstances required. The bill likewise provided for the currency of gold and silver in the East Indian colonies, but did not give the Government the right to sell silver further than to limit the circulation of foreign coinage. On the 22d of December the First Chamber, by a vote of 16 to 11, rejected the money law passed for Holland, and laid on the table the one relating to the East Indies. On the 1st of December, in the course of the debate on the colonial budget in the Second Chamber, the statement was made by the minister that it was understood that the agricultural laws would be carried out in the East Indies, and the culture of coffee would be maintained by the Government. On the 26th of December, in the Second Chamber, the Minister of War made an explanation of the condition of the defenses of the nation. He suggested that it would be better to consider the subject in a secret session, so that foreigners should not be made acquainted with the present deficiencies. The defenses were weak, and the nation had the right, and ought, to refuse to publish the particulars of its weakness.

Much interest was attached to the modifications of the electoral law which the Government intended to propose to the Chambers.

By the present law, the number of deputies (now eighty) sitting in the Second Chamber is increased in proportion to the increase in the population, at the rate of one member for every 45,000 inhabitants. It is, therefore, ordered that the lists be revised every five years. This revision is the occasion of partisan jealousy, which became so strong in 1874, when it should have taken place, that the bill to provide for a revision and a redistribution of the districts was never brought forward for debate. As the ordinary elections to replace the retiring half of the Second Chamber were to be held in 1877, and as since 1869 the population had increased to such an extent that four or five new deputies will have to be elected, the question pressed for settlement. Herr Heemskerk, therefore, withdrew his bill for the revision of the lists, and replaced it with a proposal to modify the electoral law of 1850 itself.

Great importance was attached to the announcement, in the speech from the throne at the opening of the Chambers, that a bill on elementary education would be introduced by the Government. The subject of education occupies a very prominent place among the political and social questions before the country. The present educational law was enacted in 1857, and is in effect a compromise among political parties. It is based upon a clause of the fundamental law which prescribes—1. The legal organization of public instruction in such manner as to respect the religious ideas of all parties; 2. Freedom of instruction, saving inspection on the part of the authorities and examination into the capabilities and morality of the teachers. The law

of 1857, therefore, recognized the establishment of public primary schools, at which instruction offending no religious views is given. The communes defray the expenses alone, or with assistance, if they need it, from the province and the state; private schools may also receive pecuniary aid so long as they are accessible to children of all denominations. The first draft of the law contained no religious allusion whatever, but, at the suggestion of the Orthodox party, a paragraph was inserted defining the object of instruction to be the education and development of children and the inculcation of all Christian and social virtues, but forbidding the teaching in the schools of anything contrary to the respect due to the views of others. The orthodox Protestants now com-

plain of the working of the law, that the words "Christian virtues" have become void of meaning; and they, with the Roman Catholics, have joined to seek a modification of the law, compelling the state to make grants for their denominational schools. The Liberal party seek to pass a bill maintaining the basis but enlarging and strengthening the provisions of the present law. The Government purposes the passage of a measure which shall conciliate all parties.

The question of religious instruction entered largely into the discussions on the bill for the establishment of a new university at Amsterdam, which passed the Second Chamber April 8th, by a large majority. The debate had continued twenty-three days, during which time seven hundred speeches were made. The Government sought to have the provision for a theological faculty struck out, and expected in this to be supported by the Clericals and a majority of the Liberals; but only the extreme party voted with them. The clause providing for the theological faculty was indeed once struck out, but was immediately inserted again

QUAY OF THE GRAIN-MARKET, WITH ST. BAVON'S CHURCH, HAARLEM.

in another shape. According to this bill, any one may impart higher instruction without being subject to supervision by the state, which reserves only the *jus promovendi*. The attempt was made while the bill was in the Chamber to subject private instruction to the supervision of the state, but Heer Heemskerk threatened to withdraw the bill if higher instruction was not left perfectly free.

On the 1st of November the great ship-canal connecting Amsterdam directly with the North Sea was opened by the King in person. Heretofore the only route from the sea to Amsterdam for vessels of more than five feet draft was the North Holland Canal, connecting Amsterdam with the Helder, or Nieuwediep. It was constructed in the reign of

William I., is fifty-one miles long, very tortuous and narrow, and was only available for vessels drawing sixteen feet of water or less. The idea of making a more direct communication had long been entertained.

Disturbances occurred at Amsterdam, August 11th and 12th, in consequence of the abolition of the annual Kermesse, or fair. Bands of the lower classes of the populace paraded the streets, and broke the windows of a number of houses. The troops were called out, and, with the help of the communal guards and the police, suppressed the disturbance.

In June the city of Amsterdam celebrated the six-hundredth year of its existence as a city by a grand historical exhibition of art, industry, trophies, and relics.

The conduct of the crown-prince has been the occasion of a great many unfavorable remarks. Complaint has been made that he lived in Paris, that his palace at the Hague was closed, and that all endeavors to induce him to return to the Hague had failed. This discontent, however, found no public expression till August, when Heer Mock, a well-known Conservative politician, in proposing a toast at a dinner, openly reproached the prince for going into voluntary exile, and for spending on the boulevards time which ought to be given to his country, over which he would perhaps one day reign as William IV. Heer Mock further expressed his regret that the crown-prince had not yet given the nation the opportunity to welcome a crown-princess. This speech and its publication in full in the Conservative journal, *Dagblad*, created a great sensation. The Liberal papers condemned Heer Mock's language as disloyal. But Prof. G. W. Vreede, of the University of Utrecht, applauded the speech, and said that if the prince did not listen to these words, which were spoken at a banquet, it would become necessary that more emphatic language should proceed from the benches of the Representatives.

The situation at the seat of war with the Achinese in Sumatra does not appear to have materially changed during the year, either for better or for worse. At the beginning of the year the troops had taken their positions at Bitalantemin and Samboug, and had set out on their advance. On the 24th of January the submission of the chiefs of the district Mockim was reported, and shortly afterward the subjection of the district Daroe. General Pel, the commander of the forces, died February 24th, of cholera. His death was a great loss to the army. He had taken command when the force was in a very critical situation, had fortified its position, driven from the neighborhood the enemy who were threatening it, put it on the advance, and had won and received the universal confidence of the troops. Major-General Wichers van Kerchem was appointed to succeed him. Lambaroe was taken after active resistance, and a fort was begun at Ka-jeto. The occupation of Guala Gighem gave

a large region into the power of the Dutch. On the 29th of February the chief of Pedir swore allegiance, and agreed to raise a Dutch flag which was sent him. Pedir is one of the strongest states on the north coast. On the 22d of April the enemy with a considerable force attacked the post at Lansprit, and were repulsed. Late in the summer, the Prince of Gighem, who had surrendered to the Dutch, again allied himself with the Achinese against them. His ports were blockaded. In September the troops at Parseu Kurung Tjut were building bridges, fortifying themselves, and establishing communications with Lampheit. A patrol of twenty men, under command of Captain Nuysink, had had a hand-to-hand fight with the enemy, dispatched fourteen of them, and put the rest to flight. The captain and four of his men were wounded. Toward the end of the year the Rajah of Simpangolim withdrew his submission to the Dutch and took to flight. He was consequently deprived of his dignities. The reports of the general health of the army showed an improvement in its sanitary condition over that of former years. An engagement took place in Celebes in October, between a force under the command of Lieutenant Brass, of the cavalry, and the native insurgent chieftain Kraeng-Bonto Bonto. Two of the sons of this chief and two of his nephews, Patata Daeng Patanga and Seraug Daeng Maroe, were taken prisoners, and Daeng Lalvela surrendered, severely wounded. This was the first decisive blow as yet inflicted after a long campaign against the insurgents, and caused much gratification.

NEVADA. The general condition of the State in 1876 was prosperous. The following are educational statistics for the year: number of children between six and eighteen years of age, 8,475; pupils enrolled in pub-

STATE SEAL OF NEVADA.

lic schools, 5,581; average daily attendance, 3,832; number of free public schools maintained without rate-bill, 83; valuation of school-houses and furniture, \$160,494; whole

number of primary schools, 62; whole number of intermediate schools, 7; whole number of unclassified schools, 32; whole number of grammar-schools, 16; whole number of high-schools, 3; total number of schools, 120; total number of school-districts, 80; number of school-houses built of brick, 4; number of school-houses built of wood, 79; number of school-houses built of adobe, 5; number of school-houses built of stone, 2; number of school-houses rented, 19; number of school-houses unfit for use, 20; number of new school-houses erected, 11; number of teachers—male, 36; female, 77—total, 113; average monthly wages paid male teachers, \$112.63 $\frac{1}{2}$; average monthly wages paid female teachers, \$85.20; number of schools maintained less than three months, 2; number of schools maintained only three months, 14; number of

schools maintained more than three and less than six months, 10; number of schools maintained more than six and less than nine months, 32; number of schools maintained nine months and over, 43; average number of months of all schools in the State, 7 months 15 days; average rate of county school-tax, 27 per cent. Total income, \$195,535.44, including a balance of \$26,808.45, \$44,246.77 from State apportionment, \$91,221.34 from county taxes, and \$24,091.19 from district taxes; total expenditure, \$162,760.94, including \$101,015.64 for teachers' wages; balance, \$32,774.50. The State University was opened at Elko in 1874. A preparatory department is in operation, having 30 pupils in 1876. The permanent State school-fund amounts to \$300,000.

The transactions of the State Treasury for the year were as follows:

TRANSACTIONS.	Coin.	Currency.
Balance on hand January 1, 1876.....	\$295,520 58	\$70,992 51
Total receipts for the year 1876.....	470,096 34	24,757 70
	\$765,616 92	\$95,750 21

Totals.....	\$176,783,102 32	\$83,129,421 44	\$1,649,958 42

* Of the second and third quarters of 1876, the sum of \$207,068.12 is in litigation and unpaid.

Of the valuation in 1876, \$16,820,383.87 represented real estate, and \$12,744,289.36 personal property. The State tax amounted to \$265,753.70; the county tax to \$497,046.57. The value of mines in the State is estimated by the Governor at \$150,000,000. These are not taxed, but a tax is levied on their net proceeds. The number of acres of agricultural land inclosed is 131,084; acres cultivated in 1876, 53,498; bushels of wheat raised, 89,393; of barley, 542,009; oats, 198,197; corn, 10,653; potatoes, 328,693; tons of hay, 70,397; pounds of butter, 251,810; of wool, 534,127; number of horses, 27,698; cattle, 143,088; sheep, 153,387; feet of lumber sawed, 29,870,000; number of quartz-mills, 133; tons of borax produced, 1,514; acres of land irrigated, 128,235; length of railroads, 645.66 miles. The State-prison is at Carson City; a new State-prison is in course of erection at Reno. The State Orphans' Home is also at Carson City.

At the election in November, 10,383 votes were cast for the Hayes electors, and 9,308 for the Tilden electors; 10,241 for Thomas Wren (Republican) for Congress, and 9,330 for his opponent. O. R. Leonard (Republican) was elected Supreme Court Judge by 571 majority.

NEW HAMPSHIRE. The Republican party of this State met in State Convention at Concord, on January 5, 1876, for the purpose of nominating their candidates for Governor

and Railroad Commissioner. The convention had a full attendance, 582 delegates being present from all parts of the State. The nominations were as follows: for Governor, Person C. Cheney, of Manchester; for Railroad Commissioner, William A. Peirce, of Portsmouth. The nominations of the five candidates for Councilors were remitted to district conventions. The following platform was reported from the Committee on Resolutions, and unanimously adopted:

The Republicans of New Hampshire, in convention assembled, declare in regard to national issues:

1. The States are one and indissoluble as a nation. All citizens are equal under the laws, and entitled to their fullest protection.

2. Ours is a Government of the people, for the people, and by the people. The national Constitution, and the Government established under it, the State constitutions, and the governments established under them, are the creation of the people, in their primary capacity, and supreme in their respective relations.

3. The General Government is bound by the most sacred obligation to preserve republican government in all the States, and to protect the freedmen of the South in the full, fair, and free exercise of every right of citizenship.

4. A just, generous, and forbearing policy toward those lately in arms against the integrity of the Union, yet demanding a full recognition, in practice as well as in theory, of the letter and spirit of the constitutional amendments, and all the laws of Congress made in pursuance thereof.

5. A tariff for revenue which shall be so adjusted as to be the least burdensome and most favorable to home industry and labor.

6. A currency based on coin and which shall be made redeemable in coin. Every consideration which affects the common weal demands the speediest possible return to specie payments. An irredeemable currency is a national evil, involving a constant fluctuation in values, placing the earnings of labor in the power of speculators, and working untold demoralization in every department of human endeavor.

7. Regarding as conclusive the President's declaration that he is not a candidate for renomination, and with the profoundest gratitude for his patriotic services in both military and civil life, we reaffirm our unalterable opposition to the election of any President for a third term.

8. That the course of the present Administration, in preserving peace with all nations, in liquidating so large a portion of the public debt, in conducting the affairs of the nation with energy, economy, and impartial justice, and in exposing and punishing fraud and corruption wherever found, with the determination to "let no guilty man escape," meets our highest approbation, and commands our undivided support.

9. Our free public-school system is the bulwark of American liberty. We approve, therefore, the proposed amendment to the Constitution of the United States, declaring that "no money raised by taxation in any State for the support of public schools, or derived from any public fund therefor, shall ever be placed under the control of any religious sect; nor shall any money so raised ever be divided between religious sects or denominations." We believe it to be the duty of the State, not only to maintain the integrity of the common-school system, but to do all that is needful so to increase its efficiency as to secure the blessings of wise and generous education to every child within its borders.

10. That the Republicans of New Hampshire ear-

nestly desire a true reconciliation with their brethren in the South, and welcome gladly all assurances that this Centennial year will be made to contribute to that end.

11. That we cherish gratefully the services of our veteran soldiers, and hereby express our unqualified abhorrence of the action of the Democratic majority in the national House of Representatives, in removing from places of employment about the Capitol maimed Union veterans, and filling the vacancies thus made with men whose only claim upon the majority is, that they fought to destroy this Union.

12. Prudence and patriotism alike require that the administration of the Government should continue in the hands of the political organization which has always been true to it, and not be given over to the control of a party which has given ample evidence of its purpose to falsify every profession of loyalty to the amended Constitution, and of reform, wrung from it by constant defeat.

Touching matters relating especially to our own State, this convention declares:

1. That the action of the Democratic Governor and Council last June, in the matter of the vacancies in senatorial districts two and four, was an open, palpable usurpation of power, an overt encroachment of the Executive Department upon the Legislative branch of the Government, and a deliberate subversion of the elective rights of the qualified voters of this State.

2. That we are in favor of a Constitutional Convention, having for its object such changes in the constitution as are required by the progress of the State in population, wealth, intelligence, and political ideas.

3. That we hail with unbounded satisfaction the temperance reform movement which is making such wonderful progress in our State, and we hereby express our full and hearty sympathy with this and every other moral reform which will tend to elevate the character and promote the welfare of our people.

4. That in presenting the name of our honored Chief Magistrate, Person C. Cheney, for reelection, we but give expression to the wish of every Republican of New Hampshire; and that his honest and upright character, his generous public spirit, his sympathy with every reform that can conduce to the good of the people, and the dignity and capacity with which he has discharged the duties of the office of Governor during the past year, commend him preeminently to the suffrages of the people. We pledge him our undivided support, and a triumphant reelection.

5. That in nominating William A. Peirce as Railroad Commissioner, we present a candidate eminently qualified for that position, and in every way worthy of our suffrages. To him, also, we pledge our full party strength.

The convention then adjourned *sine die*; and, immediately after its adjournment, the delegates from each district formed themselves into separate conventions to choose candidates for State Councilors, their several nominees being as follows: First district, Charles A. Foss, of Barrington; second district, Charles A. Hackett, of Belmont; third district, John M. Parker, of Goffstown; fourth district, Albert S. Scott, of Peterborough; fifth district, Evarts W. Farr, of Littleton.

The Democratic State Convention was held at Concord, on January 12th, with the very full attendance of 625 delegates, representing all the towns in the State. The nominations were as follows: for Governor, Daniel Marcy, he having received 614 votes out of 622, the whole number cast; for Railroad Commis-

sioner, Thomas Dinsmore, of Alstead, received 418, and was declared unanimously nominated.

The following platform was reported by the chairman of the Committee on Resolutions, and unanimously adopted by the convention:

Resolved, That in entering upon the first State canvass of the Centennial year, the Democracy of New Hampshire deem it proper to declare that they recognize the final settlement of the issues involved in the late civil war and the binding force of the constitutional amendments; that they demand for all citizens their full constitutional right, the cessation of Federal interference in local affairs, the devotion of the Government to the work of restoring commerce, giving employment to labor and capital, and fostering the interchange of the products of the country, to the end that domestic peace and public prosperity exhibited throughout a united and happy nation may prove the success of the experiment of self-government and insure the perpetuity of the American Republic; and in the contest, on this basis, we solicit and claim the support and coöperation of all who desire a strictly constitutional Government, and honest and economical administration.

Resolved, That the people of every State have the sole and exclusive right of governing themselves, as free, sovereign, and independent States, and ought to exercise and enjoy every power, jurisdiction, and right pertaining thereto, which has not been by them expressly delegated to the United States of America, in Congress assembled.

Resolved, That the Democratic party has been always, as it is now, the advocate of a sound currency, stable in amount, fixed in value, and convertible into coin at the will of the holder.

Resolved, That the present unstable, inflated, and fluctuating currency is the work of the Republican party, whose official theory has always tended in that direction, and has largely contributed to the deplorable evils which now afflict the country.

Resolved, That we believe, as the Democratic National Convention of 1873 declared, that "a speedy return to specie payments is demanded alike by the highest considerations of commercial morality and honest government; that such legislative policy should be adopted as will steadily tend to this result with the least possible derangement of the business of the country, and with due regard to the interests of all classes and sections; that the most safe, sure, direct, and speedy way to this end lies through severe retrenchment, strict economy, careful husbandry of resources, and the honest direction of all revenues to the legitimate purposes of the Government," in other words, through administrative reform and honest government.

Resolved, That the present condition of the country, the paralysis which rests upon business and enterprise, the disgraceful state of the currency, the enormous and unequal burden of taxation, and the frightful exhibition of waste, profligacy, speculation, and fraud, which characterize all branches of the public service, all attest alike the unfitness of the Republican party to manage the affairs of the country, and the necessity of an immediate change, and the most thorough and searching reform in the national Administration.

Resolved, That the Democracy of New Hampshire, by their representatives here in convention assembled, pledge to the people their earnest efforts in favor of a sound currency, a reform of all abuses in State and national Administrations, retrenchment and economy in public expenditures, and equal and just taxation, to the end that labor may be as slightly burdened as possible, the administration of public affairs be made efficient, and the public indebtedness be reduced, industry and enterprise be relieved of the incubus now paralyzing them, and the old-time prosperity of the country be restored.

Resolved, That the inestimable system of common schools, and our no less valuable scheme of religious toleration, are the workmanship of Democratic hands and fruits of Democratic policy; that it is the exclusive right and duty of the State to provide for the education of its children; that it is the inalienable right of every citizen to worship God according to the dictates of his own conscience, and no political disabilities should be incurred by reason of religious belief; and, while we defend these principles and institutions to the fullest extent, we deprecate all attempts to raise sectarian issues in politics as utterly uncalled for and reprehensible, and meriting the emphatic condemnation of every good citizen.

Resolved, That we favor a tariff for revenue only, that we are unalterably opposed to favoritism in legislation, and to all subsidies to individuals, classes, corporations, or monopolies.

Resolved, That while the illustrious example and the spirit of our institutions are alike opposed to a third presidential term, the course of the present Chief Executive, by using the great trusts incident to his office for personal and family aggrandizement, by inflaming sectarian animosity, and by interfering with the course of public justice toward the defrauders of the revenue and their abettors, demonstrates the wisdom of the fathers, and enforces the belief that a third term would be dangerous to the liberties of the citizen and the prosperity of the nation.

Resolved, That we assert the purity of the ballot and the integrity of the ballot-box, on which depends the perpetuity of self-government; and we declare that the action of the Republican majority in the House during the last Legislature in defeating the bill providing for the discovery and punishment of offenses in the exercise of the electoral franchise, and other measures intended to secure free elections and honest representation, places that party as the champion of political corruption, and furnishes an alarming evidence of the desperate means by which it hopes to retain power.

Resolved, That we recognize the need of social as well as political reform, believing that the perpetuity of our free institutions depends upon the virtue and intelligence of the people. We, therefore, welcome the present movement in behalf of temperance as designed to promote a very desirable end by the most proper and effectual means.

Resolved, That regarding the plain requirements of the Constitution and laws, and the independence of the coordinate branches of the State government—the executive, legislative, and judicial—within their appointed limits, and respecting the rights of the people, we emphatically indorse and approve the action of the Governor and Council, and the course of the Senate and Superior Court, on the organization of the State Senate in June last; and we as emphatically condemn the revolutionary course of the Republican leaders in inducing a minority of the Senators by secession to assume to be the Senate, and to maintain the same by threats of mob violence.

Resolved, That we cordially commend to the people of New Hampshire the candidates this day nominated, as, by their character and fitness, eminently worthy of their confidence and support, and we pledge those candidates our most earnest effort to secure their election.

Two months earlier than the Republicans and Democrats, the Temperance party of New Hampshire met in State Convention at Concord on November 10, 1875, to nominate their State ticket. For Governor, Asa S. Kendall, of Swanzev, was declared nominated. J. A. Roberts, of Farmington, was nominated for Railroad Commissioner.

A long series of resolutions was reported from the committee appointed for that purpose. Some of them were the subject of much excited discussion before they were adopted. Among other points set down in this platform, the association charges the legislative and administrative departments of the State with dereliction of duty in failing to uphold the cause of temperance; blames the Republican and Democratic leaders on the same ground, declaring that the aim of both these parties in shaping their policy is merely to obtain the favor and vote of anti-temperance people, and that the differences between them are only the continuation of old feuds and a contest for office; denounces the Republican party for repealing the prohibitory laws, and avers that all endeavors at retrenchment and reform are vain, unless they are strengthened by simultaneous action for the cause of temperance. One of the resolutions declared "that, to establish prohibition as the policy of the State, experience demands that the legislative, executive, and judicial departments of the government should be in the hands of its friends, supported by a constituency and public opinion which such control will secure."

Several ladies attended this convention. Prior to the ballot on the competitors for the office of Governor, a member moved to allow the ladies present to vote in the selection of a candidate, which motion was lost—yeas 14, nays 16.

STATE SEAL OF NEW HAMPSHIRE.

The people's vote at the election on March 14, 1876, resulted favorably to the Republican candidates generally. The whole number of votes polled in the State for Governor was 80,681, of which Person C. Cheney received 41,756, Daniel Marcy 38,500, Asa S. Kendall 411. For Railroad Commissioner it was 80,324, out of which William A. Peirce had 41,721, Thomas Dinsmore 38,190, Joseph A. Roberts 406.

The election of Councilors resulted as follows: First district—Charles A. Foss, Republican, had 8,768 votes; William Rand, Democrat, 7,192; Daniel Emerson, Temperance, 161;

whole number of votes cast, 16,126. Second district—Moulton H. Marston, Democrat, 9,224; Charles A. Hackett, Republican, 8,876; Edward P. Prescott, Temperance, 62; whole number of votes, 18,170. Fourth district—Albert S. Scott, Republican, 8,737; Jonas Livingstone, Democrat, 6,347; David Heald, Temperance, 62; whole number of votes, 15,147.

In the third and fifth districts there was no choice, neither of the candidates having received one-half of all the votes cast.

The political complexion of the legislative body in either House was as follows: Senate, Republicans 9, Democrats 3; House of Representatives, Republicans 207, Democrats 178.

At the same election the citizens of New Hampshire voted upon the question "Whether it is expedient that a convention be called to revise the constitution of the State," in accordance with the requirements of the act passed by the General Court at the session of 1875 for that purpose. The people approved the calling of the proposed convention by a majority of nearly three yeas to one nay, the aggregate number of votes polled on that question having been 39,683, of which 28,971 were cast for the convention, and 10,712 against it.

The members of the Legislature assembled at Concord on June 7th, and opened the regular session. In the Senate, Charles H. Holman, of Nashua, was elected President. In the House of Representatives, Charles P. Sanborn, of Concord, was elected Speaker by a vote of 204 against 168 given to his competitor, Frank Hiland, of Manchester.

The State revenue during the last fiscal year amounted to \$503,328.19, of which \$400,000 was derived from the State tax, the rest from all other sources. The public expenditures within the same period were \$391,536.23, classified into ordinary, \$139,461.87; extraordinary, \$29,895.05; and interest on the State debt, \$222,679.31. Compared with the preceding year's, the revenue showed a decrease of \$2,326.02; the expenditures a net reduction, or gain in favor of the Treasury, of \$26,332.89.

The sum of \$111,791.96 was paid during the year toward canceling the principal of the State debt, which was thereby reduced to \$3,629,538.49, its present amount.

Notwithstanding the extraordinary outlay to be incurred for the holding of the Constitutional Convention, the sum of \$400,000 was deemed sufficient to cover all the expenditures of the State, and leave a reasonable amount for the reduction of its indebtedness.

There is only one bank of discount in New Hampshire operating under a State charter, namely, the Salmon Falls Bank, located at Rollingsford. It has a capital of \$50,000, is in a flourishing condition in every respect, and pays a yearly dividend of ten per cent.

The number of savings-banks doing business in New Hampshire is sixty-eight, and all of them are reported to be in a sound condition.

Their aggregate surplus at the end of the year showed a decrease from that of the previous one, owing to the depreciation in the stocks held by them, as well as to failures and other losses, caused probably by the long-continued depression in all branches of business.

The entire amount of deposits in these banks is \$31,198,064.16, showing an increase of \$989,578.45 over the amount presented in the last report. The whole number of depositors is 101,091—an increase of 3,258 during the year. The individual depositors in the savings-banks of New Hampshire represent nearly one-third of the whole population of the State.

The number of children over ten years of age and unable to read, in the whole State, is less than 8,000, or two and one-third per cent. of the population.

The State Teachers' Institute was abolished a few years ago by act of the Legislature.

The Normal School at Plymouth has proved completely successful in accomplishing the purpose intended in its establishment. One hundred and seventy-two have graduated from it; over 150 of that number are now actually engaged in teaching, with beneficial effect upon the schools of the State.

The Agricultural College, at Hanover, which also has received considerable aid from the State, is quietly progressing in its work, although the number of students in it is less than would seem desirable.

The Asylum for the Insane is under good management, and the State expenditures on it have returned a corresponding equivalent.

In the Reform School each of the boys has been furnished with an extra suit of clothes, purchased with \$1,000 appropriated for that purpose by the Legislature at the preceding session. The condition and management of this school are most satisfactory in every respect; and nothing more is the Legislature required to do for the coming year in its behalf than to make the usual appropriation of \$6,000 to defray its current expenses.

The number of convicts detained in the State-prison at the end of May, 1876, was 147—that is, nearly twice as many as there were in it four years before. There being no adequate cell-accommodation in the penitentiary building, the warden is compelled to make use of the hall and the hospital for sleeping-apartments for a large number of the prisoners.

Commissioners were appointed two years ago to consider the question of erecting a new State-prison, and report to the Legislature of 1875. They executed their mission, recommending the construction of a new penitentiary. A bill to provide for the building was accordingly introduced before the General Court of that year; but, not having been disposed of by final action, it was referred to the present session.

Governor Cheney, in his message this year, bears testimony to the extraordinary and very gratifying progress which the temperance movement has made in New Hampshire during the twelve months last past, not as a political association, but in regard to the good influence it has exerted on her people of all conditions generally, stating:

At no time probably in the history of the State has the public conscience been more thoroughly aroused to the great evil of intemperance. In no

STATE HOUSE, CONCORD.

equal period have so many citizens of this State taken upon themselves a solemn pledge to abstain from that which intoxicates. This reform movement has pervaded all classes. The high and the low, the rich and the poor, alike have felt and recognized its power. It has had the sympathy of every religious sect, of all political parties, and has engaged the active efforts of many of their representative men; but has found its readiest and most effective champions in men but recently the victims of drinking-habits. Nor has it lacked the earnest support of the women of New Hampshire. In many instances these combined influences have reached the dealers of intoxicating drinks, and not a few of them have voluntarily closed their places of sale. In other instances a sentiment has been created which has led to a more complete enforcement of the law. It is proper that a movement like this, the beneficial results of which are likely to reach far into the future, should receive this official recognition.

For United States Senator from New Hampshire in the place of Mr. Cragin, whose term expires with March 3, 1877, Edward H. Rol-

lins was elected for the term of six years, beginning with March 4, 1877.

On June 27th the two Houses met in joint convention to elect some State officers and the State Printer, when the following persons were elected: For Secretary of State, Benjamin F. Prescott, of Epping; for State Treasurer, Solon A. Carter, of Keene; for Commissary-General, Frank W. Miller, of Portsmouth; for State Printer, Edward A. Jenks.

The Legislature of 1876, having continued in session forty-four days, adjourned on July 21st.

Numerous acts and joint resolutions were passed at this session—one to provide for a Constitutional Convention; also a joint resolution appropriating \$25,000 to defray the expenses of the Constitutional Convention.

The act appointed the 7th day of November, 1876, for the people to elect their delegates to the convention, and the first Wednesday of December next following for the delegates to assemble at Concord.

With respect to political legislation during the session, a new law regulating naturalization has been enacted, intended to check the abuses alleged to have taken place by the working of the naturalization system previously in force. The students voting bill, passed in 1874, was repealed.

Soon after the adjournment of the Legislature, Governor Cheney, with his Council, in compliance with the provisions of the act reorganizing the judiciary, appointed the six judges composing the new Supreme Court of the State, superseding the former, as follows: For Chief-Justice, Charles Doe; for Associate Judges, William L. Foster, Clinton W. Stanley, George A. Bingham, Aaron W. Sawyer, and W. H. H. Allen.

The Republican State Convention to appoint ten delegates to the Republican National Convention to be held at Cincinnati on June 14, 1876, assembled at Concord, on May 24th. Daniel Hall, of Dover; Charles H. Burns, of Wilton; Nathaniel White, of Concord; and Ira Colby, of Claremont, were elected delegates at large.

The following resolution was adopted:

Resolved, That the Republicans of New Hampshire, impressed with the importance of securing the best possible nominations, leave their delegation uninstructed and untrammelled. They only require that the delegation shall use every honorable effort to secure the nomination of candidates whose names will inspire confidence and enthusiasm, and whose election in November will be an unfailing assurance to the country of a pure and efficient Administration.

The convention then adjourned as such, and resolved itself into district meetings to choose their respective delegates to the Cincinnati Convention.

The Democrats of New Hampshire assembled in State Convention at Concord, on the 19th of September, 1876, and nominated their candidates for presidential electors. Their names were as follows: Samuel K. Mason,

of Bristol; Edmund L. Cushing, of Charlestown; John T. Cloutman, of Farmington; Edson Hill, of Manchester; and John W. Sanborn, of Wakefield.

The following resolutions were adopted by the convention:

Resolved, That in Samuel J. Tilden and Thomas A. Hendricks we have candidates whose purity of character and marked ability and eminent public services qualify them for the high positions for which they are named, and render them worthy of the support of all patriotic citizens.

Resolved, That the platform of the Democratic National Convention and Governors Tilden and Hendricks's letters of acceptance declare the true principles and views upon which the Government should be administered, and we cordially indorse and reaffirm them.

Resolved, That the recent order of the President for the employment of the army to control the elections in the Southern States is an outrage upon popular rights and the freedom of the ballot, and a gross imposition of power and violation of the Constitution, and merits the severest condemnation of every patriotic citizen.

The delegates to the Constitutional Convention, chosen by the people at the general election of November 7th, met together and opened its session at Concord on December 6th. Daniel Clark was elected president. (Mr. Clark is at present Judge of the United States District Court, and has formerly represented New Hampshire in the Federal Legislature as Senator for twelve years.) The delegates in attendance numbered 82, and continued in session the remarkably short time of eleven days. The session was closed by final adjournment on December 16th, though under the conditional resolution, adopted just before dissolving, "That, when this convention adjourn, it is to meet again at the call of the president of this convention, or the Governor of this State, some time in 1877."

Thirteen amendments to the old constitution of 1792 were proposed by the convention, and submitted to the people for their ratification; the most important of which seem to be the following:

The new instrument doubles the number of Senators in the General Court, by making it 24 instead of 12, as it now is. The next Legislature is enjoined to divide the State into four-and-twenty senatorial districts, equalizing them as far as possible in regard to the amount of direct taxes paid.

It diminishes by about one-fourth the number of Representatives in the Lower House, by making the right of representation to depend, not on ratable polls, as heretofore, but on the number of inhabitants of the place to be represented, by a certain and uniform rule: "Every town or place entitled to town privileges, and wards of cities, having 600 inhabitants by the last general census of the State, may elect one Representative; having 1,800 such inhabitants, it may elect two Representatives; and so proceeding in that proportion, making 1,200 such inhabitants the mean increasing number for

every additional Representative." This rule, if sanctioned by the people, will reduce the number of Representatives from about 890 to 800.

It fixes the official terms of Governor, Councilors, and members of the Legislature, at two years. It accordingly prescribes that the State

and be in force at such time or times as the General Court, at its June session for the year 1877, shall fix and determine;" the convention reserving to itself the power of determining the said time at a future meeting in case the General Court should fail to do so.

DARTMOUTH COLLEGE, HANOVER, N. H.

general elections and the sessions of the Legislature shall be held once every two years, instead of annually. It also changes the day for such elections from the second Tuesday in March to the first Tuesday in November.

It prohibits the removal of public officers from their places for political reasons.

It authorizes the Legislature to provide for the trial of causes without the intervention of a jury, when the value in controversy does not exceed \$100, and title of real estate is not concerned; also, to increase the jurisdiction of justices of the peace to \$100; also, to provide that appeals from a justice of the peace may be tried by some other court, without the intervention of a jury. At present, all causes in which the disputed value exceeds \$13.33 are to be brought to the Supreme Court.

It strikes out the word "Protestant" in the Bill of Rights; also the clause of the "religious test," so called, which prescribes that all incumbents of the offices of Governor or member of the Legislature shall be of the "Protestant religion." After all of the amendments had been adopted, a further resolution was offered on the last-named point, purporting "to strike out the words 'Protestant religion' wherever they occur as a qualification for office, in the constitution;" which also was adopted.

The amendments will be submitted to the people at the election on the second Tuesday of March, 1877.

That any of the proposed amendments may be regarded as adopted by the people, two-thirds of the votes cast upon it must be in the affirmative.

The convention further ordains that "such of the proposed amendments as shall receive the requisite number of votes shall take effect

NEW JERSEY. The outstanding bonded debt of the State of New Jersey, on the 1st of January, 1877, was \$2,296,800. The bonds fall due at the rate of \$100,000 a year until 1891, after which the amount varies, but does not exceed \$200,000 in any one year. The last become payable in 1902. The sinking-fund amounts to \$1,859,379.57. At the beginning of the last fiscal year, November 1, 1875, there was a balance in the Treasury of \$308,769.05. The receipts of the year were \$3,195,493; disbursements, \$3,886,186.04; leaving a balance, on the 31st of October, of \$118,076.01. Of the disbursements, \$218,500 was a permanent addition to the school-fund. The balance of \$3,167,686.04 was expended as follows: Payment of temporary loan and refunding of taxes, \$210,455.01; payment of State bonds and interest, \$176,848.70; for educational and scientific purposes, \$1,437,781.89; for benevolent, charitable, and patriotic institutions and purposes, including part in Centennial Exhibition, \$696,257.12; for criminal, penal, and reformatory purposes, \$186,328.10; for legislative and judicial branches of the government, \$152,519.32; for printing and binding, \$112,929.37; for military purposes, \$66,511.49; miscellaneous, \$128,555.08. The sources of revenue were a school-tax of two mills on a dollar, which yielded \$1,238,115.80; a State tax of one and a half mill, yielding \$905,678.88; the tax on corporations, from which \$585,558.35 was derived; income of school-fund, \$114,400.46; interest and dividends on stock and bonds, \$31,010; receipts from State-prison, \$34,206.65; and various others yielding smaller sums. The State owns stock of the Camden & Amboy Railroad Company, joint stock of the Delaware & Raritan Canal and Camden & Amboy Railroad Companies, and other securities, amounting in all to about \$400,000 market value. The school-fund amounts to \$2,208,680.50, including \$1,214,833.50 invested in securities, \$238,000 due from the State fund, and the balance in the form of grants or leases of land.

The Insane Asylum, at Trenton, contained 472 patients on the 31st of October. The new asylum at Morristown was opened in August, though some of the buildings were not com-

pleted. It contains accommodations for 500 patients. When the institution was opened, 292 were transferred to it from the Trenton asylum, and 54 more had been received up to October 31st. The amount expended in completing the Morristown asylum was \$500,000.

The number of convicts in the State-prison, on the 31st of October, was 829, the average for the year having been 766. The institution was very much crowded, the number of cells being 530. The payments from the Treasury on account of the prison amounted to \$98,829.51, the receipts from the supervisors to \$34,208.65, but there were also paid from the earnings on account of expenses \$27,794.78. Thus the total disbursements were \$122,965.90, of which \$60,964.57 was net cost to the State.

The amount paid out during the year for care and instruction of the deaf and dumb was \$25,370.01; for the blind, \$18,723.53; for the feeble-minded, \$8,044. They were still cared for in institutions of other States, the Governor having vetoed the act of last session providing for the establishment of asylums for the purpose. The amount paid on account of the Home for Disabled Soldiers was \$48,852.11. The Soldiers' Children's Home was closed in April, all the children having been permanently provided for.

The militia of New Jersey, known as the National Guard, consists of 62 companies of

infantry, two of cavalry, and one of artillery. The expenditures for the year were \$65,947.19.

The annual session of the Legislature, which began on the 11th of January, continued until the 21st of April, being the longest for thirty years. The amendments of the constitution adopted in 1875 necessitated a considerable amount of legislation, and it was found that their provisions were in some respects so ambiguous that it was very difficult to conform legislation to them. On this account a bill was introduced, providing for a convention to revise the constitution, but this was finally defeated. Among the most important measures considered were several relating to taxation. This was a difficult matter to deal with on account of the antagonistic interests of what were known as the "five counties"—that is, Essex, Hudson, Union, and Passaic Counties, and the cities of New Brunswick, Trenton, Camden, and Atlantic City—and the rest of the State. The "five counties" contain one-half the taxable property of the State, and pay fully one-half the taxes, but the representation in the Senate is not based on population or property, but consists of one member from each county, which gives the rural districts disproportionate power. A bill for the equalization of taxes was defeated in the Senate through the opposition of the lower counties. It provided for a State Board of

CARRIAGE FOR LIFE-BOAT ON NEW JERSEY COAST.

Assessors, who should visit each county every year and see that all property was assessed at its true value. Great inequalities are said to exist at present, assessments being made in some parts of the State on the full value of property, and in other parts on not more than fifty per cent. of its actual value. A bill for the exemption of mortgages met with opposition from the same quarter, and a compromise was finally effected by the passage of two acts. One provided that a deduction might be claimed from the value of mortgaged property to the amount of the mortgage, and in that case the latter should be taxed, payment being made by the mortgagee in the town where the property was located. The other applied only to the counties of Essex, Hudson, Union, and Passaic, and the cities of New

Brunswick, Trenton, Camden, and Atlantic City, and provided that the mortgagee might agree with the mortgagee not to ask for a deduction, and in that case the former should pay the tax on the value of the property, and the latter be exempt.

Another act imposed a tax of one-half of one per cent. on the cost of construction and equipment of railroads. This did not apply to the Pennsylvania Railroad Company, as it had already paid \$298,000 in lieu of transit duties; and, as this is a much larger sum than the tax would amount to, its branches were also exempted.

Among the other acts passed were: a general election law, which was little more than a codification of existing regulations; an act reducing the salaries of State officials; one mak-

ing May 30th a legal holiday; acts appropriating \$40,000 for a geological survey, \$55,000 for the Reform-School buildings, and \$300,000 for the new Lunatic Asylum at Morristown; one prohibiting the sale of liquors on election-day; one prohibiting the running of excursion-trains on Sunday; one providing for a commission to frame a general law concerning cities; one providing for a commission to establish the boundary between New York and New Jersey; and one levying a State tax of one and a half mill, etc. Among the acts defeated were: one providing for a "local option" liquor law; one establishing specie payments on State obligations; repealing the usury laws; appropriating \$7,000 for a new dome to the State-House; providing for an insurance commissioner; providing for a fish-warden; to prevent the sale of liquors on Sunday; to repeal the Jersey City Commissions; to prevent gambling-pools; and many more. Several bills were vetoed by the Governor, including one providing for a Deaf and Dumb Asylum at New Brunswick, and one for an Institution for the Feeble-

Resolved, That we believe the welfare of the country demands the firm establishment of the principles with which the history of the Republican party is identified; a firm maintenance of the national faith as embodied in the amendments to the Constitution, which sum up and secure the results of the war; the hearty and unqualified support of the doctrine of national unity and equal rights for all classes and conditions of men; the full payment of the obligations imposed upon the country by a long and destructive war, forced upon us by the insane and wicked policy of the leaders of the Democratic party, North and South; a speedy return to specie payments; a free, non-sectarian, non-partisan system of public schools, as the safeguard and glory of our free institutions; a financial and economical policy looking to the promotion and protection of every form of American industry.

Resolved, That the delegates to-day elected are hereby instructed to advocate such measures and support such candidates before the National Convention as will be to the country a pledge and guarantee of an honest and able Administration, a reformed and elevated public service, and a high and honorable devotion to the welfare of the country and the perpetuity of its priceless heritage of free popular government.

A resolution offered as an amendment declaring that "notwithstanding the grand and imposing history of our party, we are aware that we cannot live in the future solely upon the record of the past; that we cannot shut our eyes to the fact that unworthy, incompetent, and corrupt men have succeeded in obtaining place and power in the State and nation; that being fully alive to the necessity of having our offices filled by men of stern integrity, unblemished character, and thoroughly competent to discharge the duties of office, the Republican party of New Jersey, in State Convention, hereby pledges itself to the people of this State and to the Republicans in the

SHOOTING THE ROPE TO A WRECKED VESSEL.

State to nominate none to office, however high or honorable, unless he is honest, trustworthy, and competent; that to achieve success we ought first to deserve success, and we can only deserve it by putting up the best men as candidates," was defeated by a decisive vote.

The Democrats held a convention at Trenton, on the 23d of May, and chose their delegates to the national nominating body at St. Louis. The platform adopted was as follows:

A convention of Republicans was held at Trenton on the 17th of May, for the purpose of choosing delegates to the National Convention of the party. After a preamble renewing allegiance to the principles of the Republican party, and arraigning the Democracy as "false to the trusts reposed in it by a confiding people," the following resolutions were adopted:

Resolved, That the principles set forth in the platform of the last Democratic State Convention in New Jersey are hereby affirmed, viz.:

Restraint of both the national and State Governments within their respective constitutional spheres.
Equal political rights to all.

Subordination of the military to the civil power.
Restoration of gold and silver as the basis of currency, as soon as practicable.

A tariff for revenue, to raise the legitimate expenses of Government economically administered.

Such reform as will secure a just return for labor, recognizing it as the basis of prosperity.

Economy of administration and the punishment of corrupt officials.

Opposition to the government of municipalities by legislative commissions, because they violate the vital principle of self-government on which a republic rests.

Resolved, That, recognizing the amendments to the Federal Constitution as part of the organic law of the country, we will abide by that instrument in all its parts, in letter and in spirit.

Resolved, That the national Administration, by its imbecility, extravagance, and gross corruption, has disgraced itself, and brought the country to the verge of financial ruin.

Resolved, That the thanks of the people are due to the House of Representatives of the United States for reducing appropriations and confining expenditures within proper limits; also for instituting investigations and unearthing fraud and corruption in high places.

Resolved, That the Republican party of this State, by its partisan and proscriptive policy, as illustrated by the Legislature at its recent session, has forfeited all claim upon the people for support.

Resolved, That we have entire confidence in the ability and integrity of Joseph D. Bedle, Governor of this State; that we commend his efforts to reduce the public expenditures and prevent mischievous and unconstitutional legislation, and approve of his administration of public affairs.

Resolved, That while we recognize the merits and high character of all the distinguished gentlemen who are named in connection with the nomination for the presidency by the Democratic party, and will give cheerful support to the nominee of our National Convention, yet, remembering the patriotic record of Joel Parker, his consistent Democracy, his eminent services and wise administration of affairs during the most trying period of the history of our State and country, and his pure and unsullied private character, we do respectfully but earnestly suggest to our brethren of other States that his nomination would insure the success of the Democracy in the approaching presidential contest.

LIFE-CAR.

The Republican convention for the nomination of candidates for presidential electors was held at New Brunswick, on the 30th of August. There were no State officers to be chosen. The following resolutions were adopted:

The Republicans of New Jersey in convention assembled reaffirm their unwavering adherence to the principles which they have hitherto avowed and supported, and heartily indorse the declarations and pledges made by the National Republican Convention at Cincinnati, and will give to the candidates there nominated for the presidency and vice-presidency of the United States a cordial and united support; and we cordially invite and welcome, in the effort to elect these candidates, the cooperation of that large body of voters who have not always hitherto acted with the Republican party, but whose convictions of present duty now impel them to act with us.

Resolved, That the Republican party of the nation, by its consistent and vigorous advocacy of equal civil and political rights for all citizens of the republic, by its faithful adherence to the pledges given to maintain the national credit unimpaired and the national honor inviolate, and by its vigorous efforts

to detect and punish official corruption, has earned the gratitude and confidence of the people.

Resolved, That the safety and honor of the nation and its peace and prosperity in the future can only be assured by intrusting the control of national affairs to the keeping of that party which saved the nation and preserved its integrity when assailed by domestic treason, and has since maintained its honor untarnished; and these would all be imperiled by

THE CAR OF THE ROPE.

committing our national interests to the hands of the Democratic party, which is unable to point to a single measure of public policy either inaugurated or supported by it as a party which would redound to the honor of the republic or tend to promote the best interests of the people.

Resolved, That the Republican party is pledged by its principles to support all measures that tend to genuine practical reforms in the civil service of the Government; and that we adopt, as our declaration

LIFE-SAVING STATION.

on this subject, the language of our candidate for the presidency, and with him we demand "a civil service organized upon a system which will secure purity, experience, efficiency, and economy, a strict regard for the public welfare solely in appointments, and the speedy, thorough, and unsparing prosecution and punishment of all public officers who betray official trusts."

Resolved, That the proof is ample and convincing

that the country cannot trust the professions of the Democratic party in favor of reform or in reference to any measure of public policy. Its record is one of subserviency to its own worst elements, of extravagance, waste, and corruption, wherever it has acquired power. And there is nothing in the record of the Democratic party, and certainly nothing in the present attitude of its candidate for the presidency, that warrants the hope that any reform under it could be effected by that party or its candidates in any department of government administration. It is to-day controlled by that element which created, organized, and prolonged the war of secession and rebellion, thereby entailing upon the nation an enormous debt and involving the sacrifice of hundreds of thousands of loyal lives; it is now supporting candidates who not only acquiesce in this leadership, but are committed to a financial policy which is both dishonest and dangerous.

Resolved, That we are in favor of the earliest possible resumption of specie payments and of adhering faithfully to all pledges made and all measures adopted with a view to that desirable end.

Resolved, That we are inflexibly opposed to any and all attempts, direct or indirect, to impair the efficiency of our free public schools, and we demand that they be kept forever free, by the adoption of an amendment to the Constitution of the United States, from all ecclesiastical or sectarian interference.

Resolved, That the letters of acceptance of our candidates for President and Vice-President meet our cordial approval, especially for their straightforward and emphatic utterances upon those cardinal points of civil-service reform, free and unsectarian education, honest currency, and the protection of the rights of citizens of all classes in every section of this country; and we pledge ourselves in the event of their election to give them our hearty support in their endeavors to administer the government in the full spirit of these declarations.

The same day there was a convention of the Prohibition party at Trenton. An electoral ticket was put in nomination, and a platform adopted, approving the principles and candidates of the National Convention of the party, and expressing the views of the Prohibitionists regarding the results of liquor-selling. The following were also among the declarations:

In all that regards the interests of labor our party stands out before the country as the only true labor-reform party. The measures we advocate cover the whole field of labor-reform, and when adopted will proclaim permanent peace and friendship between the interests of labor and capital.

We demand that all needless expenditures of public moneys be stopped, all sinecures abolished, and the public expenditures reduced to the lowest possible amount consistent with a faithful administration of public affairs.

We demand that the administration of justice be made less expensive and burdensome to the community than it now is; that all our courts be thrown open for the redress of grievances to the rich and poor alike; that all fees and perquisites to judges and other court officers be abolished, and such officials be paid for their services by reasonable and proper salaries.

The Democrats held their nominating convention at Trenton on the 12th of September. Speeches were made by ex-Governor Joel Parker, Senator Bayard, of Delaware, and others, and ex-Governor Parker was placed at the head of the ticket of presidential electors. The only platform adopted was the following:

Resolved, by the Democratic Electoral Convention,

this day assembled at Trenton, That we hereby approve of and indorse the platform of principles adopted at the late Democratic National Convention at St. Louis, and the letters of acceptance of our standard-bearers for President and Vice-President.

Resolved, That we do hereby cordially ratify the nominations of Samuel J. Tilden, of New York, for President, and Thomas A. Hendricks, of Indiana, for Vice-President; and that we commend them to the people of New Jersey for their suffrages, as among the ablest and purest statesmen in our land, and eminently fitted to inaugurate reform in our national Administration, to bring back to our distracted and impoverished country peace and prosperity.

The whole number of votes cast for electors on the 7th of November was 220,236, of which 115,962 were for the Tilden and Hendricks ticket, 108,517 for Hayes and Wheeler, 714 for Cooper and Cary, and 43 for Smith and Stewart. The Democratic plurality over the Republican vote was 12,445; majority over all, 11,688. Of the seven members of Congress chosen four were Democrats and three Republicans. There was a "Greenback" candidate in the Sixth District, who received 520 votes. The Legislature of 1877 consists of 11 Democrats and 10 Republicans in the Senate, and 80 Democrats and 80 Republicans in the House.

The Hon. John R. McPherson was elected to the United States Senate early in January, 1877, for the term ending March 4, 1883, to succeed Mr. Frelinghuysen.

NEW JERUSALEM CHURCH. The fifty-sixth Annual Convention of the New Jerusalem Church met in Philadelphia, June 9th. The Rev. Chauncey Giles presided. The treasurer reported that the convention had a balance of \$8,494 deposited with the United States Trust Company. The receipts for the year had been \$1,980.28, and the expenditures \$2,105.92. The Rev. R. L. Tafel, D. D., was present as a fraternal delegate to the convention from the New Church in England, and bore an address from the societies in that country. He stated that the work of collecting and arranging the manuscripts of Swedenborg had been intrusted to him, and was nearly completed. The Executive Committee made a report of the progress of the revision of the liturgy. It had been intrusted to a special committee. They had first endeavored to arrange a consecutive and nearly invariable service, or series of services, which must be used always and everywhere in essentially the same way. But none of their efforts based on this plan had given satisfaction. They had, therefore, endeavored to provide a set of services susceptible of variation. To this end they had provided a general order of services, with rubrics, to which they had added the materials for filling out the service, consisting of music, responsive exercises, selections from the Word, prayers, selections from the Psalms, morning and evening services, anthems, and hymns. One bequest of \$5,000 and one of \$1,000 were announced to the convention. The report of the Committee on Foreign Correspondence gave statements of the condition of affairs of the Church ir

Australia, Scandinavia, Germany, Italy, Switzerland, France, Sweden, and Austria. Encouraging reports were made of the growth of the Church in Canada and the United States. The report of the committee on the fund of the theological seminary stated that the receipts for the year had been \$844.70, and the expenditures \$679.25. The entire property belonging to the fund was valued at \$31,871.72. The Board of Church Extension presented a report showing progress. The sum of \$1,035.50 had been spent in support of mission-work during the year. The report of the Board of Publication showed that \$8,000 had been subscribed during the year toward the fund of \$50,000 which the board was trying to raise for defraying the expenses of carrying on its work. Including the compendium of the theological writings of Swedenborg, 3,000 volumes had been published during the year. The Committee on Ecclesiastical Affairs were instructed to confer with the Committee of the New Church Conference in England in relation to a new translation of the Bible.

NEW MEXICO. Education in New Mexico has labored under many difficulties. The isolated situation of the Territory, subject to Indian incursions, and other causes, and the character of the population, have retarded the progress of intelligence. The latest report, for the year 1875, is by W. G. Ritch, Territorial Secretary, and bears date February 1, 1876. According to this document, education in New Mexico dates its first permanent establishment from the organization of the "Academy of our Lady of Light" (Sisters of Loretto), in Santa Fé, in 1852. This school, started in small and unpretentious rented quarters, with seven boarders and a few day-scholars and with two teachers, now numbers ten teachers and 165 pupils, with an extended curriculum of English, Spanish, and classical studies, including music and fine arts, and occupying commodious buildings, with broad grounds and delightful surroundings.

From the organization and establishment of this school for home education, other private, academic, and parochial schools of various religious denominations have since been located and established in the various centres of population. With the thirst for knowledge thus introduced, the people through their legislative assembly of 1871-'72 reversed their decision at the polls of ten years previous, when they voted down a public-school law by a nearly unanimous vote, for the reason that the tax for their support was deemed oppression, and authorized by law the public-school system in force to-day, giving one or more free schools in nearly every precinct in the counties reported.

The law is crude in character, as school laws are usually estimated; the best, however, that could be then or since obtained. It leaves the details and management of the schools and of the school-funds entirely to a Board of Supervisors and Directors of the Public Schools, to

be elected by each county respectively. The school system of each county is thus independent of any other.

Unfortunately, the school boards in most of the counties are composed of persons inexperienced in any school system whatever, and all without the instruction or advice of a central authority, often giving but little personal attention, and not unfrequently under the control or composed in part, or whole, of the clergy. In a majority of the counties, to-day, the school-books and church catechism, published by the Jesuits, and generally in Spanish, constitute the text-books in use in the public schools; while in at least five counties public schools have been placed in direct charge of either the Jesuits or other religious orders, or members thereof kindred in character. The somewhat limited amount of the school-fund, the disbursement of considerable portions of it for illegal or illegitimate purposes, and the attempt to accommodate the demand for schools in every neighborhood, very naturally make the school-term short, the compensation of teachers small, and, as a rule, commanding incompetent or indifferent talent.

Nevertheless, there are signs of encouragement in an awakening public sentiment. In 1875 there were, so far as reported, 138 public schools, with 5,151 pupils and 147 teachers (182 male and 15 female); average length of schools, 6.6 months; school-fund from all sources, \$25,478.46; disbursements, \$18,890.83. Of the schools 97 were for boys, 8 for girls, and 33 mixed; 86 were Spanish, 7 English, 38 mixed, 7 unreported; 10 were under the control of religious orders or societies.

There were 33 parochial and private schools, including 7 Pueblo Indian schools, 12 Roman Catholic, 8 Protestant, and 6 others; number of teachers, 81 (41 male and 40 female); average attendance of pupils, 1,259. There were 6 girls' schools, 6 for boys, and 21 mixed. The assessed value of property in the Territory was \$7,808,084; annual tax levy thereon for school purposes, one quarter of one per cent. The last Governor's message was transmitted to the biennial session of the Legislature, commencing December 6, 1875. He represents the Indians as peaceful throughout the Territory. He recommends a new apportionment of the members of the Council and House of Representatives, the adoption of the system of local self-government by means of town incorporations, and a small appropriation to be expended under direction of the Librarian to assort, label, and preserve the ancient archives of the Territory. He says: "I am satisfied that great injustice is frequently done to the poor by those who are in charge of our irrigating canals. In the first place the land-owners ought to keep the *acequias* in repair. In the second, the water should be equally and impartially distributed. I advise a revision of the *acequia* laws, and to make it a criminal offense for any person to offer or receive

money or rewards of any kind for preference in the distribution of water."

The receipts for the two years 1873-'75 were \$92,658.65; expenditures, \$90,839.90; total indebtedness, \$98,812.28 (\$59,500 funded at 10 per cent.). An undue portion of the public funds is expended for fees of officers, a fact to which the Governor directs the attention of the Legislature. In 1876 Trinidad Romero, Republican, was chosen Delegate to Congress by a vote of 9,591 to 7,418 for Valdez, Democrat. The Legislature has 8 Republicans and 5 Democrats in the Council, and 19 Republicans and 7 Democrats in the House.

NEW YORK. The annual session of the Legislature of New York began on the 4th of January, and came to a close on the 8d of May. The two amendments to the constitution proposed by the Legislature of 1875, providing for a Superintendent of Public Works and a Superintendent of State-prisons, were agreed to, and a joint resolution was adopted submitting them to a vote of the people at the next election. A new amendment was also proposed, to be added to Article IX., and is as follows:

SECTION 2. Free common schools shall be maintained throughout the State, forever. The Legislature shall provide for the instruction in the branches of elementary education, in such schools, of all persons in the State, between the ages of five and twenty-one years, for the period of at least twenty-eight weeks in each year.

Sec. 3. Neither the money, property, nor credit of the State, nor of any county, city, town, village, or school-district, shall be given, loaned, or leased, or be otherwise applied to the support or aid of any school or instruction under the control or in charge of any church, sect, or denomination, or religious society; nor to or in aid of any school in which instruction is given peculiar to any church, creed, sect, or denomination, or to or in aid of any such instruction; nor to or in aid of any school or instruction not wholly under the control and supervision, and in charge, of the public-school authorities. This section shall not prohibit the Legislature from making such provision for the education of the blind, the deaf and dumb, and juvenile delinquents, as it may deem proper, except in institutions in which instruction is given peculiar to any church, creed, sect, denomination, or religious society; nor shall it apply to or affect the Cornell University endowment-fund, hitherto pledged and appropriated.

A joint resolution was adopted proposing another amendment to the constitution, which provides that no county or city shall become indebted to an amount, including existing indebtedness, which shall exceed five per cent. of the assessed valuation of the real estate of the city or county subject to taxation. Any city or county whose present indebtedness exceeds five per cent. of the assessed valuation of its real estate, the amendment provides, shall not be allowed to become indebted to any further amount until such indebtedness is reduced to the prescribed limit.

Among the important acts passed was one for the equalization of assessments. It regulates the proceedings of State Assessors, and the forms and methods of making appeals from

their decisions. A final appeal to the Supreme Court is provided for. An act amendatory of the law of 1874, relating to the care and custody of the insane, contains a provision that whenever any person under sentence of death shall be declared insane and irresponsible by a commissioner duly appointed for that purpose, the Governor may in his discretion order his removal to the State Lunatic Asylum for Insane Criminals. The amendment further declares that the criminal shall "there remain until restored to his right-mind, and it shall be the duty of the medical superintendent of such asylum whenever, in his opinion, said convict is cured of his insanity, to report the fact to the State Commissioner in Lunacy, and a justice of the Supreme Court of the district in which said asylum is situated, who shall thereupon inquire into the truth of such fact, and if the same be proved to their satisfaction, they shall so certify it under their official hands and seals to the clerk of the court in which such convict was sentenced, and cause him, the said convict, to be returned to the custody of the sheriff of the county whence he came and at the expense thereof, there to be dealt with according to law."

An act was also passed providing that in criminal trials and examinations before trial a husband or wife may be examined as a witness in behalf of the other, but shall not be compelled to testify against the other. Another act provides that in a suit for criminal conversation the wife of a plaintiff may be a witness for the defendant, but shall not disclose any confidential communication had with her husband only. Among other acts passed was one prohibiting the employment of children under sixteen years of age as acrobats, gymnasts, peddlers, beggars, or in any immoral or dangerous vocation; one repealing the act of 1871 incorporating the Sisterhood of Gray Nuns, and one making it an offense punishable by fine to alter a ballot at a town or county election with a view to deceiving the voter. Several bills which occupied a good deal of attention were defeated, including a new apportionment act, distributing the representation in the Senate and Assembly. A commission consisting of Sinclair Tousey, Geo. R. Babcock, Archibald C. Nevin, and Louis J. Pillsbury, was created to investigate the condition and management of State-prisons, and report to the next Legislature.

No new action was taken in the matter of canal reform. The twelve special reports of the Investigating Commission, made in 1875, were submitted, together with a general report summarizing the results of that inquiry, and recommending certain changes in management. Governor Tilden also submitted a special message on the 24th of March, recommending several measures of canal reform, but nothing was done on the subject during the session.

The Prison Commission spent several months in investigation, and made a report

dated December 30th. The prisons were found generally in a very unsatisfactory condition, that at Sing Sing especially so. The buildings were insecure, overcrowded, and badly kept; there was a deplorable lack of discipline, and great extravagance and negligence in financial management. The main source of these evils was declared to be inexperienced, incompetent, and dishonest officials and employes, appointed for political reasons rather than fitness, and having a precarious tenure of office, destructive of faithful service.

The subject of reform in municipal government was broached by Governor Tilden in a special message to the Legislature of 1875, and a commission was appointed to investigate the subject and devise a plan for the government of cities. The commission not being prepared to make its report to the Legislature at the session of this year, its powers were continued. At the beginning of the session of 1877 it had not fully completed its work.

The funded debt of the State on the 30th of September was \$23,315,898.58, classified as follows:

General fund.....	\$3,092,238 58
Contingent.....	5,000 00
Canal.....	10,081,660 00
Bounty.....	10,137,000 00
Total.....	\$23,315,898 58

There was a reduction by cancellation during the year of \$5,012,787.82. The balances in the sinking-fund on the same date were:

General fund.....	\$3,910,529 86
Canal.....	2,121,050 24
Bounty.....	2,160,309 90
Total.....	\$14,191,889 50

The net debt, after deducting the sinking-funds, is \$9,124,009.08. The bounty debt matures April 7, 1877, and the sinking-fund and one-third mill tax will be sufficient for its full payment. The aggregate balance in the Treasury October 1, 1875, was \$3,126,778.98; the receipts of the year following were \$18,628,986.29; payments of the year, \$17,827,711.49; balance in the Treasury September 30, 1876, \$3,923,053.78. A large proportion of this balance belonged to the various sinking-funds. The receipts of the fiscal year on account of the general fund revenue were \$11,646,517.63; payments, \$11,644,982.98, including a deficit of \$733,863.77 at the beginning of the year, and \$4,640,849 transferred to the bounty debt sinking-fund; balance on hand at the end of the fiscal year, \$1,534.65. The amount of the State tax for the year was \$8,529,174.82, against \$14,206,680.61 in 1875, and \$15,727,482.08 in 1874. The reduction was due in large part to the diminished amount required for the bounty debt, but partly also to the stopping of extravagant expenditures for new works, and extraordinary repairs upon canals, and to other reforms. The rate of taxation was 3½ mills upon a dollar of assessed valuation of property, and it was estimated

that 2½ mills would be sufficient for the next fiscal year.

The gross income from the canals for the year ending September 30th was \$1,487,332.89, being \$438,662.74 less than for the preceding year. The cost of collection, ordinary repairs, and other charges on the revenues, amounted to \$1,149,104.61, which was \$318,121.34 less than for the preceding year. The Erie Canal showed a surplus of revenue over expenses amounting to \$508,953.14. All the others showed large deficiencies, as follows:

CANALS.	Gross Income.	Deficiency.
Champlain.....	\$94,944 55	\$58,667 51
Oswego.....	29,048 35	27,175 17
Cayuga & Seneca.....	11,068 99	14,812 84
Chemung.....	2,104 84	7,639 87
Chenango.....	3,717 88	4,602 08
Black Valley.....	11,289 28	23,734 45
Genesee River.....	14,668 50	8,565 60
Crooked Lane.....	80 48	1,562 41

The school statistics for the year ending September 30th are as follows:

Total receipts, including balance on hand September 30, 1875.....	\$12,643,269 50
Total expenditures.....	11,410,288 71
Amount paid for teachers' wages.....	7,949,065 17
Amount paid for school-houses, repairs, furniture, etc.....	1,779,194 19
Estimated value of school-houses and sites.....	31,517,904 00
Number of school-houses.....	11,571
Number of school-districts, exclusive of cities.....	11,027
Number of teachers employed for the legal term of school.....	19,241
Number of teachers employed during any portion of the year.....	30,909
Number of children attending public schools.....	1,067,199
Number of persons attending normal schools.....	6,261
Number of children of school age in private schools.....	134,404
Number of volumes in school-district libraries.....	804,503
Number of persons in the State between the ages of five and twenty-one years.....	1,555,001

The State tax for school purposes is 1½ mill, and produces about \$3,000,000. The rest of the \$12,000,000 and upward was raised by local taxation.

The National Guard of the State of New York consists of eight divisions, eighteen brigades—one regiment and eleven separate troops of cavalry; one battalion and eleven separate batteries of artillery; twenty-five regiments, twelve battalions, and eighteen separate companies of infantry—in all comprising 1,546 commissioned officers and 19,878 non-commissioned officers, musicians, and privates, making an aggregate force of 21,424, an increase of 2,011 for the year. An annual appropriation of \$275,000 is required to keep up this organization. Several rifle ranges have been established in different division districts. A majority of the members of the American Rifle-Team, which was victorious in the International Rifle-Match at Creedmoor, L. I., September 12th, 18th, and 14th, belonged to the National Guard. The State has recovered from the United States on account of war claims in the last two years \$162,614.85. This sum paid all the indebtedness of the State to the United States, and left a balance of \$57,047.80.

The number of convicts in the State-prisons, on the 30th of September, was 8,509, of whom 1,605 were at Sing Sing, 1,281 at Auburn, and 623 at Clinton. The excess of expenditures over receipts on account of prisons for the year was \$704,579.85, which had to be provided for from the State Treasury. This deficiency was larger by \$100,000 than ever before. A large portion of the Reformatory building at Elmira has been completed and occupied, 170 convicts having been transferred from the Sing Sing and Auburn prisons. It is believed that the institution will be completed during the coming year, and the entire cost will be about \$1,000,000.

The new State Capitol is still far from complete. It will probably be ready for occupancy by the 1st of January, 1879. There has been expended upon it thus far the sum of \$7,500,000, and the entire cost will ap-

proximate \$10,000,000, though the original estimate was \$4,500,000.

The number of passengers arriving in the city of New York from foreign ports, between January 1st and December 13th, was 109,592, of whom 72,826 came under the immediate charge of the Commissioners of Emigration. The number admitted to the Refuge and hospitals on Ward's Island during that period was 3,958, of whom 687 remained in the institutions at the date of the report, 331 being sick in the hospital, 141 insane in the asylum, 16 crippled or otherwise disabled in the Refuge, and 53 children in the Nursery. The income of the commission from the tax of \$1.50 for each immigrant landed by the steamship companies was cut off by a decision of the Supreme Court of the United States rendered on the 20th of March, declaring the law under which this imposition was made unconstitutional.

CORNELL UNIVERSITY, ITHACA.

This law, with various modifications, had been in force since 1847, and out of the income derived from the immigrant tax the beneficent institutions for the care of the sick and destitute had been established and maintained.

The political campaign of the year was one of unusual activity and importance. The fact that New York would cast thirty-five electoral votes, and it was thought probable that these would decide the presidential contest, stimulated all parties to unwonted exertions. The first political convention of the year was that of the "Greenback" party, which was held at Syracuse on the 15th of March. Its object was chiefly organization and expression of sentiments. The latter was accomplished through the following resolutions:

Whereas, The organization heretofore known as the Democratic party in the State of New York, in its conventions for the years 1874 and 1875, adopted certain resolutions relating to the subject of finance, against which we enter our solemn protest, for the following reasons:

1. Because the subject of finance was not a public question in this State when these conventions were held, and therefore it is unjust to the voters of the

State who are opposed to continuing the Republican party in power to commit them to the principles laid down in said resolutions in the next National Democratic Convention;

2. Because said resolutions are in conflict with the principles laid down in the platform adopted by the last National Democratic Convention, held in the city of New York in 1868, that being the last genuine National Democratic Convention held in this country, the convention in Baltimore in 1872 being only a ratification meeting for the nominations and platform of the Liberal Republican Convention, held in Cincinnati in that year;

3. Because the men who secured the adoption of said offensive resolutions are the men who contributed by voice, money, and personal influence, to defeat the Democratic party in other States where the currency question was uppermost in their canvass;

4. Because the men who now assume to lead the Democratic party in this State are associated with and controlled by its great money and corporate interests, and, having no sympathy in common with the people, are unfit to be trusted with the protection of their welfare;

Therefore, in view of this condition of affairs, the duty of perfecting an organization which will be Democratic in its character, and in harmony with the wishes of the people throughout the country, and the organization of the Democratic party in the Southern and Western States, where it is not controlled by

money, as it has heretofore been in this State, must be apparent to all honest men; and we ask all such to meet in their several Assembly districts and select delegates to represent them in a State Convention, to be held in _____ on the _____, 1876, for the purpose of selecting delegates to the National Democratic Convention, to be held on the 27th day of June next, in the city of St. Louis, Mo., and to ask their admission into said convention, as the representatives of the Democratic voters and people of this State, and also the adoption of the following resolutions:

Resolved, That we are opposed to any repudiation of the nation's obligations, and that we are in favor of an honest payment of the public debt according to the terms of the original acts of Congress under which they were created, and that we regard the act of Congress passed in March, 1869, promising to pay the five-twenty bonds of the Government in gold, as a gross violation of the contract by which said bonds were issued, and charge that the passage of said act was procured through fraud by the payment of money to corrupt public officials, and to suborn the press; and we demand the payment of said bonds according to the statute by which they were created, and the resolutions adopted by the National Democratic Convention held in the city of New York in 1868.

2. That the effort now being made by the Secretary of the Treasury to pay the fractional currency in silver should be immediately prohibited, since silver is now being produced in quantities equal to lead, copper, and many other of the baser metals, and is worth less than legal-tender notes, in which said currency is made payable by law.

3. That there should be no further funding of the bonds of the Government until a thorough examination of the books of the Treasury Department has been had, and the exact amount of bonds outstanding been ascertained, and the amount, if any, due from the syndicate been settled.

4. That the legal-tender notes of the Government are the standard of value throughout the country, because they will employ every hand to labor, or purchase every foot of land within its borders for a given sum and for any limited time, while gold fluctuates according to its production, the price of American securities in foreign countries, or the caprice of speculators in London, Frankfurt, and Wall Street.

5. That commerce should be the master and not the servant of money, and that the amount of money required by a people depends on their intelligence, and that the daily requirements of the American people for money to purchase books, newspapers, and other articles necessary to satisfy their intelligence, cannot be compared with that of any other people; and we wonder when we see certain newspapers advocating contraction of the currency and a reduction in the price of labor, whereby that intelligence which they have done so much to bring about cannot be gratified.

6. That the Government should not discredit its own obligations, and that the money which pays the President and members of Congress their salaries, the merchant for his goods, the manufacturer for his wares, the farmer for his produce, the laborer for his work, the soldier's and sailor's widows their pensions, should pay the bondholder his interest, and all other debts, private and public, including duties on imports.

7. That the act of Congress, passed in January, 1875, pledging the resumption of specie payments on January 1, 1879, has proved a failure, since there is less coin now in the Treasury than there was when said act was passed, and that it comes with poor grace from those public officials and journals who advocate the sale of bonds for the purpose of obtaining gold with which to redeem greenbacks, when they have for years urged the sale of gold for the purpose of purchasing bonds; and, since the only effect of the passage of said act has been to paralyze industries

and create distrust in business, we demand its immediate repeal.

8. That we favor the enactment by Congress of laws for the encouragement of labor, agriculture, and all the other industrial interests, and for the development of the nation's resources and wealth by the people to the exclusion of monopolies.

The Republicans held their State Convention for the purpose of choosing delegates to the National Convention on the 22d of March, at Syracuse. There was a division of sentiment between those known as the Reform Republicans, under George W. Curtis, who favored the nomination of B. H. Bristow as the candidate for President, and the regular Republicans, under A. B. Cornell, who supported the claims of Roscoe Conkling for the presidency. The platform reported was as follows:

The Republicans of New York, in this centennial of the nation, reaffirm the sacred truths and principles of their fathers, and make the following declaration:

1. We are for the unity of the nation and the just rights of the States; for the full reconciliation and enduring harmony of all sections; for the inviolate preservation of the results of the war and the constitutional rights of every citizen; for grateful recognition of the brave soldiers of the republic; for thorough retrenchment and reform; for the unsparring pursuit, exposure, and punishment of public frauds and official dishonesty; for the elevation of the public service, and pure and efficient government; for maintaining untarnished the national credit and honor; for a sound currency of coin, or paper convertible into coin; and for common schools absolutely free from sectarian influence.

2. We charge the Democratic party with being the same in character and spirit as when it sympathized with treason; with making its control of the House of Representatives the triumph and opportunity of the nation's recent foes; with reasserting and applauding, in the national capital, the sentiments of unrepentant rebellion; with sending Union soldiers to the rear and promoting Confederate soldiers to the front; with deliberately proposing to repudiate the plighted faith of the Government; with being equally false and imbecile upon the overshadowing financial questions; with thwarting the ends of justice by its partisan mismanagement and obstruction of investigation through the four months of its ascendancy in the Lower House of Congress; with proving itself utterly incompetent to administer the Government; and we warn the country against trusting a party alike unworthy, recreant, and incapable.

3. Without regard to past differences, we cordially invite all who believe that the direction of the Government should not pass into the hands that sought to destroy it, and who seek pure and economical government by honest and capable officers, to unite with us in fraternal and mutually considerate cooperation for the promotion of these ends.

4. We emphatically condemn the dishonesty and treachery of every official who is faithless to his trust, and approve the injunction to let no guilty man, however high, escape. We believe the virtue of the people, which saved the nation through the storm of war, will preserve it from the dangers of corruption. We commend the good work of the national Administration in protecting the public Treasury and punishing public offenders; and in laying down his trust at the close of the period for which he has been chosen, President Grant will carry with him the lasting gratitude of the American people for his patriotic services in war and in peace.

5. As a statesman and a patriot of the highest ability and character, whose long and distinguished public career is without reproach, who has faithfully served the cause of freedom and the Union through

the great struggle of the past fifteen years, who has been steadfast to equal rights and financial honesty, and the unflinching exponent of Republican principles, and who possesses the experience, capacity, courage, and firmness which qualify him to give strength and honor to the Government, we present Roscoe Conkling to the National Republican Convention as our choice for the nomination for President.

6. As the delegated representatives of the half-million Republican voters of New York, we send cordial greeting to our patriotic brethren throughout the land; and equally earnest with them for the success of our common cause, and pledging ourselves to the faithful support of the Cincinnati nominations, we give especial assurance that the nomination of our candidate will secure beyond question the thirty-five electoral votes of New York for the Republican ticket.

Mr. Curtis submitted the following as a substitute for the last two resolutions, and advocated its adoption in a vigorous speech:

Resolved, That while we would rejoice with pride that the candidate for the presidency in the election of this year be selected from among the Republicans

of national reputation in the State of New York, whom New York most highly honors, yet, recognizing that the nomination should be the result of the untrammelled deliberation of the National Convention, we are willing to leave the selection of the candidate to the patriotic wisdom of that body, in full confidence that it will present the name of some tried and true Republican, whose character and career are the pledge of a pure, economical, and vigorous administration of the Government.

This was lost by a vote of 118 yeas to 250 nays, and the resolutions reported by the committee were adopted.

The Democratic Convention for the appointment of delegates to St. Louis was held at Utica, on the 26th and 27th of April. There were several contesting delegations, including all those from the twenty-one districts of New York City. These consisted of the delegates chosen under the auspices of the Tammany Society, and those of opposing Democratic organizations. The Tammany delegations were ad-

BUFFALO, FROM THE SPIRE OF THE PRESBYTERIAN CHURCH IN DELAWARE STREET.

mitted. Speeches were made by Senator Francis Kernan, the Hon. Horatio Seymour, and others. Four delegates at large, and two from each congressional district, were chosen to represent the party of the State in the St. Louis Convention. The following resolutions were adopted:

Resolved, That the Democratic party of New York renew their pledge of fidelity to the principles set forth in their platform adopted in State Convention in 1874 and 1875, thrice approved at the ballot-boxes of the Empire State, well vindicated in the illustrious administration of Governor Samuel J. Tilden, and commended anew to their faith and their adoption by the indorsement of an increasing majority of their fellow-Democrats of sister States throughout the Union.

Resolved, That the Democratic party of New York readopt also the resolution adopted in the State Conventions of 1864, 1868, and 1872, to wit:

Resolved, That the delegates to the Democratic National Convention, to be appointed, are hereby instructed to enter that convention as a unit, and act and vote as a unit, in accordance with the will of a majority of the members thereof. And, in case any of its members shall be appointed a delegate thereof by another organization and should not forthwith in writing decline such appointment, his seat shall be regarded as vacated, and the delegates shall proceed to fill the same; and it is hereby also empowered to supply all vacancies by death, absence, resignation, or otherwise.

Resolved, That the Democratic party of New York, while committing to their delegates the duty of joining with the delegates of their fellow-Democrats of all the States in the momentous deliberations of a National Convention, declare their settled conviction that a return to the constitutional principles, frugal expenditure, and the administrative purity of the founders of the republic is the first and most imperious necessity of the times, the commanding issue now before the people of the Union; and they

suggest, with respectful deference to their brethren of other States, and with cordial appreciation of other renowned Democratic statesmen, faithful like him to their political principles and public trusts, that the nomination of Samuel J. Tilden to the office of President would insure the vote of New York, and would be approved throughout the Union as a recognition of this supreme necessity, the incarnation of this vital issue, the pledge of our high purpose, and the guarantee of the successful achievement of this arduous work of national regeneration and reform.

CROTON AQUEDUCT, CROSSING MILL RIVER.

A second "Greenback" Convention was held on the 1st of June in the city of New York. There were representatives present from 52 of the 60 counties and 120 of the 128 Assembly districts of the State. Four delegates at large were chosen to the Democratic Convention at St. Louis, and resolutions were adopted claiming admission for these delegates to the convention as the only duly authorized representatives of the Democracy of the State, and the only organization not controlled by money. Other resolutions recognized the duty of the Democratic party as the champion of the many against the aggression of the few, and declared in favor of the following objects: The unconditional repeal of the Republican resumption act; the substitution of legal tenders for national-bank notes—legal tenders to be received for all debts, taxes, and customs; no forced inflation or contraction, but a circulation equal to the wants of all; legislation for the development of the resources and wealth of the country by the people to the exclusion of monopolists. Declarations were also made in behalf of faithful compliance with the nation's just obligation; no centralization; denouncing the present corruption in the affairs of the Federal Government, and demanding the searching investigation and punishment of guilty persons independent of party; opposing the election of any persons to office who opposed the repeal of the resumption act, and instructing the delegates to support the platform

in accordance with the principles and to obtain the nomination of candidates pledged to support the policy declared, and to vote at the convention as a unit, in accordance with the sentiments of a majority of its members.

The Republican Convention for the nomination of State officers was held at Saratoga on the 23d of August. A. B. Cornell, who was the choice of many of the delegates for Governor, withdrew his name, and Edwin D. Morgan was nominated, receiving 242 votes out of 410. Wm. M. Evarts, who was supported by the "Reform Republicans," had 126. The nomination of Mr. Morgan was made unanimous on motion of George W. Curtis, the leading supporter of Mr. Evarts. The remainder of the ticket was as follows: For Lieutenant-Governor, Sherman S. Rogers; Canal Commissioner, Daniel D. Spencer; Inspector of State-prisons, Chas. T. Trowbridge; Judge of the Court of Appeals, George F. Danforth. The platform adopted was as follows:

The Republicans of New York, appealing to the patriotism and judgment of all who maintain the principles of a restored Union, declare as follows:

1. We reaffirm the platform adopted at the National Republican Convention of June 14, 1876, and heartily affirm the principles set forth in the letters of Rutherford B. Hayes and William A. Wheeler, to which, in the light of their high public character and record, we point as the sure pledge of pure and just government.

2. We especially approve and emphasize the declarations for a reformed public service, based upon honesty, fidelity, and capacity; and we accept the manly and unequivocal declaration upon that subject of our presidential candidate as the platform of the Republican party.

3. Earnestly seeking the true harmony of the Union on the basis of the amended Constitution and of a just and generous national policy, we also insist that the equal rights and the lives of all citizens must and shall be protected, and that the Government must be restored from the consequences of war by those who saved it, and not by those who attempted to destroy it. So long as the rights of any citizens are insecure, so long as an irredeemable currency remains, the Republican party must live to do a work as great as that of its glorious past.

4. The interests of trade and industry imperatively demand a fixed financial policy in accordance with the terms and requirements of the act providing for the resumption of specie payments; and, *whereas*, the legal-tender notes made by the terms of the resumption act payable in coin on and after January 1, 1879, are valid and legal obligations of the United States; and, *whereas*, the date of payment of an obligation bearing no interest after maturity is the very essence of its full and entire validity, and the postponement of its payment repudiation to the extent of the usual interest from the dates of promised payment: we, therefore, denounce the repeal of the date of specie resumption by the Democratic House of Representatives, without making the dishonored notes bear the Government rate of interest, as an act of repudiation and disloyalty, and an open violation of the section of the fourteenth amendment of the Constitution of the United States, which provides that the validity of the public debt authorized by law shall not be questioned. The alacrity and great unanimity of the Southern Democrats in the House of Representatives to repeal the date of the payment of United States notes, without consideration of the interest and in violation of the plighted

faith of the Government, indicate that they are not the safe custodians of the national faith. Fidelity to public honor requires that the national Administration shall not be subject to their control, direction, or management.

5. As a conclusive evidence of Democratic duplicity, we point to the fact that the Executive of this State, while signing a law establishing specie payments in requiring all taxes to be paid in gold on and after January 1, 1879, joins with his party as a presidential candidate, and repudiating the pledge of specie resumption throughout the country at the same date, thus compelling the people of New York to pay in gold, and at the same time denying them the means to do it.

6. The Democratic party, in its controlling spirit, is false and untrustworthy in every living issue; false in practical government, for its eight months of power in Congress is barren of good fruits; false to equal rights and the guarantees of the Constitution; false in the currency, for it openly repudiates the resumption pledge; false on the question of the safety of the schools, for the solid Democratic vote in the United States Senate defeated an adequate amendment to prohibit the school system from sectarian attacks; and false on civil-service reform, for it signalized its control of the House of Representatives by removal of faithful and efficient officers in the persons of loyal Union soldiers, and by the appointment of corruptionists and thieves whose sole claim was service in the Confederate army.

7. The repeated claim that the large reduction of taxation in this State is due to the present Executive is pronounced utterly unfounded, and we confidently appeal to the record for proof. In 1867 the county debt was over \$25,000,000. In four years a Democratic administration paid off \$5,500,000; in the four years succeeding a Republican administration paid off \$19,500,000, and left less than \$1,000,000 remaining to be paid. In 1875 the tax to pay off the debt was \$6,337,567. In 1876, under the Republican Legislature, it was \$789,260. The reduction of taxes thus comes, not from a reduction of expenses, but from a reduction of the debt, effected under a Republican administration.

8. The Republican party has led the way in the reform of State offices, by proposing and adopting, among other measures, an amendment to the Constitution which cuts off all extra compensation to contractors on the canals, and also to complete the good work, and approve and commend to the people the two pending amendments which reform the system of canal and prison administration.

9. The Republicans of New York tender the Presi-

dent of the United States, upon the approaching completion of his official term, the assurance of their respect and gratitude for the illustrious public and patriotic service which will secure his name an imperishable place in history.

There was a gathering of Liberal Republicans at Saratoga on the same date, held under a call for a State Convention, which indorsed the nominations and platform of the National Convention at Cincinnati, and finally those of the State Convention. Several contesting delegations which had not been admitted held a conference, expressed their confidence in the reform policy of the Governor of the State, and recommended "all true Liberals of the country to cordially support the St. Louis nominees as the best means of lifting the country out of the ruin which threatens it."

The Democratic Nominating Convention was held at Saratoga on the 30th and 31st of August. On the first day and before the nominations were made, the following platform was unanimously adopted:

The Democratic party of New York hereby with cordial unanimity ratify the nomination by the St. Louis National Democratic Convention of Samuel J. Tilden for President of the United States, and of Thomas A. Hendricks for Vice-President. The Democratic party of New York, when selecting delegates to the National Convention, then declared, and now again declare, their settled conviction that a return to the constitutional principles, frugal expenditure, and administrative purity of the founders of the republic is the first and most imperious necessity of the times, the commanding issue now before the people of the Union.

The Democratic party of New York then declared and now again declare that the nomination of Samuel J. Tilden, while it insures the vote of New York, will be approved throughout the Union as the incarnation of the vital issue and a guarantee of the successful achievement of the work of national regeneration and reform.

The Democratic party of New York reaffirm the principles set forth in their Syracuse platform of 1874, which have been twice approved at the ballot-boxes of the Empire State, and upon which the St. Louis Convention, representing the Democracy of the whole United States, have set the seal of their faith

SENECA RIVER AQUEDUCT.

and their adoption, and they incorporate herein as part of this platform the said Syracuse platform of 1874, and the St. Louis National Democratic platform of 1876.

Resolved, That we condemn all interference with the constitutional amendments and all violations of law, holding that all people in all States alike, regardless of race, color, or condition, are entitled to equal

protection, and that all orders, practices, and opinions whereby public order and peace are disturbed should receive public rebuke and punishment according to the offense committed.

We recommend that the people of our State, at the coming election, do approve and ratify the two proposed constitutional amendments as being well-devised means for securing henceforth a more econom-

ical and efficient administration of the prisons and canals of the State, and for enforcing upon officers charged with their management a stricter responsibility to the people. And we favor such reduction of tolls upon and economical management of the canals as will best subserve the interests of the State and of the men engaged in canal-traffic.

Resolved, That as American citizens and Democrats, devoted to the union and equality of States, and the honor and good name of the Federal Government, we hereby enter our solemn protest against the recent order of the Secretary of War, approved by the President of the United States, to place Government troops in the Southern States with a view to intimidate the people and to control their election. A government by the bayonet to take the place of a government through the ballot-box is an outrage which demands the condemnation of all who love republican freedom and hate despotic power.

The same day, during an evening session of the convention, the nomination of William Dorsheimer for Governor was moved, when

there was a general call of the name of "Seymour." It was said that Mr. Seymour would not allow the use of his name as the candidate, on account of the state of his health, and had sent a dispatch to Mr. Kernan to that effect. Nevertheless, after some excited discussion, Mr. Seymour was nominated by acclamation, a committee appointed to notify him, and an adjournment taken to the next day in order that his answer might be received. The next day William Dorsheimer was nominated for Lieutenant-Governor, Darius A. Ogden for Canal Commissioner, Robert H. Anderson for Inspector of State-prisons, and Robert Earl for Judge of the Court of Appeals. The committee appointed to notify Mr. Seymour of his nomination reported that "under the extraordinary circumstances attending that nomination, Governor Seymour feels constrained to obey the

HIGH BRIDGE, HARLEM RIVER.

wishes of the people who have so often honored him." With this assurance, the convention completed its work and adjourned. It appeared, however, that Mr. Seymour had not consented to the nomination, and on the 2d of September he wrote to the chairman of the State Central Committee positively declining to be the candidate, his sole reason being that illness unfitted him for mental or physical exertion. Another convention was called to meet on the 13th of September, to fill the vacancy on the ticket. Lucius Robinson was nominated for Governor by acclamation, and Mr. Seymour was placed at the head of the electoral ticket, John Kelly withdrawing.

The "Greenback" party held another convention on the 26th of September, at Albany, and nominated a State ticket, as follows: For Governor, R. M. Griffin; Lieutenant-Governor,

Thomas Armstrong; Canal Commissioner, Anthony J. Cuddeback; State-prison Inspector, John W. Crump; Judge of the Court of Appeals, Marcus M. Dixon. The Prohibitionists also made nominations: William J. Groo being their candidate for Governor; Albert F. Brown, Lieutenant-Governor; Shotwell Powell, Canal Commissioner; Elias F. Talbot, State-prison Inspector; and Henry Hagen, Judge of the Court of Appeals.

At the election on the 7th of November there were 1,015,502 votes cast for presidential electors. Of these the Democratic candidates received 521,949; the Republican candidates, 489,207; the Prohibition ticket, 2,359; and the "Greenback" ticket, 1,987. The Democratic plurality over the Republican vote was 82,742; majority over all, 28,396. The total vote for Governor was 1,014,040, of which Robinson

received 519,831; Morgan, 489,871; Groo, 3,412; and Griffin, 1,436. Robinson's plurality over Morgan, 80,460; majority over all, 25,612. The amendments of the constitution were adopted by a large majority. On that relating to a Superintendent of Public Works the vote was 533,153 to 81,832; on that relating to Superintendent of State-prisons the vote was 550,226 to 80,358. Of the 33 members of Congress chosen at the same time, 17 were Republicans and 16 Democrats. The Legislature of 1877 consists of 19 Republicans and 13 Democrats in the Senate, and 71 Republicans and 57 Democrats in the House, making the Republican majority 6 in the Senate, 14 in the House, and 20 on a joint ballot. The total vote of New York City for President was 171,074, of which 112,378 were for Tilden, and 58,696 for Hayes; majority for the former, 53,682. For Governor: total, 170,248; Robinson, 110,643; Morgan, 59,605; Robinson's majority, 51,038. For mayor: total, 170,243; Ely (Democrat), 111,880; Dix (Republican), 57,811; scattering, 552; Ely's majority, 53,517.

The amendments to the constitution ratified at the last election were the following:

ARTICLE V., Section 3. A Superintendent of Public Works shall be appointed by the Governor, by and with the advice and consent of the Senate, and hold his office until the end of the term of the Governor by whom he was nominated, and until his successor is appointed and qualified. He shall receive a compensation, to be fixed by law. He shall be required by law to give security for the faithful execution of his office before entering upon the duties thereof. He shall be charged with the execution of all laws relating to the repair and navigation of the canals; and also of those relating to the construction and improvement of the canals, except so far as the execution of the laws relating to such construction or improvement shall be confided to the State Engineer and Surveyor; subject to the control of the Legislature, he shall make the rules and regulations for the navigation or use of the canals. He may be suspended or removed from office by the Governor whenever, in his judgment, the public interest shall so require; but, in case of the removal of such Superintendent of Public Works from office, the Governor shall file with the Secretary of State a statement of the cause of such removal, and shall report such removal and the cause thereof to the Legislature at its next session. The Superintendent of Public Works shall appoint not more than three assistant superintendents, whose duties shall be prescribed by him, subject to modification by the Legislature, and who shall receive for their services a compensation to be fixed by law. They shall hold their office for three years, subject to suspension or removal by the Superintendent of Public Works, whenever, in his judgment, the public interest shall so require. Any vacancy in the office of any such assistant superintendent shall be filled for the remainder of the term for which he was appointed by the Superintendent of Public Works; but, in case of the suspension or removal of any such assistant superintendent by him, he shall at once report to the Governor in writing the cause of such removal. All other persons employed in the care and management of the canals, except collectors of tolls, and those in the department of the State Engineer and Surveyor, shall be appointed by the Superintendent of Public Works, and be subject to suspension or removal by him. The office of Canal Commissioner is abolished from and after the appointment and quali-

fication of the Superintendent of Public Works, until which time the Canal Commissioners shall continue to discharge their duties as now provided by law. The Superintendent of Public Works shall perform all the duties of the Canal Commissioners and Board of Canal Commissioners, as now declared by law, until otherwise provided by the Legislature. The Governor, by and with the advice and consent of the Senate, shall have power to fill vacancies in the office of Superintendent of Public Works; if the Senate be not in session, he may grant commissions which shall expire at the end of the next succeeding session of the Senate.

ARTICLE V., Section 4. A Superintendent of State-prisons shall be appointed by the Governor, by and with the advice and consent of the Senate, and hold his office for five years, unless sooner removed; he shall give security in such amount and with such sureties as shall be required by law for the faithful discharge of his duties; he shall have the superintendence, management, and control of State-prisons, subject to such laws as now exist or may hereafter be enacted; he shall appoint the agents, wardens, physicians, and chaplains, of the prisons. The agent and warden of each prison shall appoint all other officers of such prisons, except the clerk, subject to the approval of the same by the Superintendent. The Controller shall appoint the clerks of the prisons. The Superintendent shall have all the powers and perform all the duties not inconsistent herewith, which have heretofore been had and performed by the Inspectors of State-prisons; and from and after the time when such Superintendent of State-prisons shall have been appointed and qualified, the office of Inspector of State-prisons shall be and hereby is abolished. The Governor may remove the Superintendent for cause at any time, giving to him a copy of the charges against him, and an opportunity to be heard in his defense.

A bronze statue of the Marquis de Lafayette was unveiled with appropriate ceremonies in Union Square, New York City, on the 6th of September. It was a gift to the city from the French Government, in recognition of the assistance rendered by its citizens to the people of Paris during the war of 1870-'71. The work was executed by M. A. Bartholdi, and represents Lafayette standing on the prow of a boat in the act of tendering his sword to America. The pedestal was a gift from the French citizens of New York, and bears these inscriptions: In front, "Lafayette;" on the back, "1876;" on one side, "To the City of New York, France, in remembrance of sympathy in time of trial, 1870-'71;" and on the other side, "As soon as I heard of American independence my heart was enlisted—1776."

On the morning of the 6th of December the people of New York and Brooklyn were startled by the news of one of the most terrible disasters that had ever occurred in the country. The Brooklyn Theatre, in which a large audience assembled on the evening of the 5th, to witness the pathetic play "The Two Orphans," caught fire in the scenery, and was burned to the ground, one-fourth of the audience meeting their death in the flames, and a large number of those who escaped being maimed and injured in the rush for the doors. The play was given under the management of Shook & Palmer, by a cast of New York actors. The flames spread rapidly, and the

audience was taken with a panic, so that in the rush for the doors numbers were overthrown and regardlessly trampled upon by the crowd. The galleries were particularly full, and the weight and rush of the people upon one of the staircases precipitated it and the mass of persons below, where they died by fire with fearful suffering. Two hundred and ninety-three persons perished altogether. Of the dead only two hundred and seventeen corpses were identified. The whole audience numbered about one thousand. The majority of the victims were young men and boys who occupied the galleries. The fire first began, probably, from the perforated border of one of the flies catching fire from one of the lights, or from a shred of paper falling into a light. The whole scenery burst into flames almost instantly, and the fire spread rapidly to the galleries and roof. At the first alarm Miss Claxton, one of the actresses, came to the front and begged the audience to keep quiet, but without effect. The fire spread so rapidly that the last people

to leave the parquet were closely pursued by the flame and smoke, and the dome of the roof fell before the theatre was abandoned. Among the dead were two of the actors in the cast, H. S. Murdock and Claude Borroughs. The theatre was considered as safe as the average of American play-houses, built with fifteen inches width of exit for each one hundred seats; but the provisions for the extinguishment of fire were altogether inadequate, and it appeared at the inquest that it had not been customary for theatrical directors to specially instruct their employes what to do in case of the outbreak of fire. Since this great calamity much completer precautionary measures have been practised in the management of theatres, and many of the theatres in the city have been required to improve their means of exit. As a partial consequence of the Brooklyn fire may be regarded the panic which occurred during service in St. Francis Xavier's Church in New York several weeks later, upon a false alarm of fire, in which seven lives were destroyed.

ATLANTIC DOCK, BROOKLYN.

LUCIUS ROBINSON, the new Governor, had spent many years in the public service of the State, and won especial distinction in the office of Controller of the Treasury, a position which he occupied at the time of his nomination. He was born in 1810, in Greene County, and was educated as a lawyer. After serving as District Attorney in his county, he was appointed Commissioner of Chancery in New York City, which office he retained from 1843 to 1846. As Assemblyman in 1859, and again in 1873, he rendered conspicuous and useful service. He was Controller for three terms, being first elected in 1861 on the Union ticket, by the immense majority of 160,000 votes, and being renominated in 1868 by the Republican State Committee, but, defeated in the State Convention, he was again elected upon the withdrawal of the nominee in his favor. For a third term he was the Democratic candidate, but was defeated by the popular vote. As

State Controller he had evinced force of character, financial knowledge, and executive ability. At the beginning of the war, shortly after the first issue of greenbacks, his financial principles led him to the very decided act of paying the interest of the canal debt in coin. His economical, systematic, and able management of the State Treasury was of great benefit to the State in trying times. He wiped out the bounty-debt in twelve years, was very efficient in breaking up the canal ring, and aided effectively the movement which frustrated railroad frauds. His whole record shows him to be a thorough man of affairs, equally conversant with the small details and the whole scope of State business, of earnest and enlightened views, and firm and discriminating judgment.

NIERITZ, KARL GUSTAV, a German writer for the young, born July 2, 1795; died February 16, 1876. He was educated in the teach-

ers' seminary in Friedrichstadt-Dresden, and in 1814 entered the school as teacher, where his father was also employed. For many years he labored under pecuniary difficulties, until, in 1831, he was appointed principal of his school. In 1841 he became director of the district school in Antonstadt-Dresden, and in 1864 resigned this position, receiving after that a pension of 200 thalers a year. Quite early in life he devoted himself to literary labors, his first work being a short story, "Das Pomeranzenbäumchen," which appeared in the *Mercur* of Dresden. He continued to employ his leisure time in similar work for periodicals, until in 1834 he was induced by Gubitz to try himself in juvenile literature, in the style of Christoph von Schmid. From this time on he sent out, with wonderful rapidity, volume upon volume of his popular tales, all of which enjoyed an unprecedented popularity with the youth of Germany. His tales have all been published in the "Jugendbibliothek" (1846-'64) and his "Jugendschriften" (1846, *et seq.*), and many of them have gone through a large number of editions. Among his most popular tales are "Der junge Trommelschläger," "Der Landprediger," "Der kleine Bergmann," "Das vierte Gebot," "Der blinde Knabe," and "Alexander Menzlikoff." His tales for adults, in the "Sächsische Volkskalender" (1842-'49) and "Deutsche Volkskalender" (1850-'53), also enjoyed considerable popularity.

NOBLE, MATTHEW, an English sculptor, born in 1820; died June 23, 1876. He was a pupil of John Francis, and at an early age acquired a certain distinction in his profession. One of his first commissions was for the Manchester Wellington monument, inaugurated in 1856, for which his design of a colossal statue of the duke, standing on a granite pedestal, around which were four figures personifying Wisdom, Valor, Victory, and Peace, gained the award over many competitors. Other of his early works were: a monument in Ashley Church, Staffordshire, typifying Life, Death, and Resurrection; a fine statue of Dr. Isaac Barrow, in the chapel of Trinity College, Cambridge; and a statue of Lord Canning, executed in 1864, for the city of London. Among his more recent works are the statue to Sir John Franklin, in Waterloo Place, the statue of the Queen, executed for St. Thomas's Hospital, and the statue of Lord Derby, in Parliament Square. He was a constant exhibitor at the Royal Academy, although he never gained any of its honors.

NORTH CAROLINA. The Democratic party of this State assembled in convention at Raleigh on the 14th of June, 1876, for the purpose of nominating their candidates for State officers and presidential electors. The meeting was very numerously attended by delegates representing all parts of the State. The nominations were made by ballot, and resulted as follows: For Governor, Zebulon Bird Vance received 962 votes, and D. S. Reid 4; for Lieutenant-Governor, Thomas J. Jarvis, of Pitt; for

State Treasurer, John M. Worth, of Randolph; for Secretary of State, Joseph A. Engelhard, of New Hanover; for State Auditor, Samuel L. Love, of Haywood; for Attorney-General, Thomas S. Henan, of Wilson; for Superintendent of Public Instruction, J. C. Scarborough, of Johnson. For presidential electors at large, the following were chosen: D. G. Fowle, of Wake, and J. M. Leach, of Davidson.

The nominations of candidates for Congressmen were made at local conventions held in the respective districts, and resulted as follows: First district, Jesse J. Yeates, of Hertford; third district, Alfred M. Waddel, of New Hanover; fourth district, Joseph J. Davis, of Franklin; fifth district, Alfred M. Scales, of Guilford; sixth district, Walter L. Steele, of Richmond; seventh district, William M. Robbins, of Iredell; eighth district, Robert B. Vance, of Buncombe.

The Republicans of North Carolina met in State Convention at Raleigh, on the 12th of July, 1876, and nominated the following State ticket: For Governor, Thomas Settle, of Guilford; for Lieutenant-Governor, William A. Smith, of Johnson; for Secretary of State, John W. Alberston, of Perquimans; for State Treasurer, William H. Wheeler, of Forsyth; for State Auditor, John Reilly, of Cumberland; for Attorney-General, T. L. Hargrave, of Granville; for Superintendent of Public Instruction, John C. Carson, of Henderson.

In both the Republican and Democratic platforms, as adopted by the two conventions, there is one resolution of the same import, pledging their respective organizations to a vigorous prosecution, and as early a completion as practicable, of the Western North Carolina Railroad to Ducktown and Paint Rock, by the use of convict-labor and such judicious legislation as might be found necessary.

At the local convention which the Republicans of the second congressional district held at Goldsboro, on July 26th, Curtis H. Brogden was nominated for Congress.

The contest between the two parties during this campaign was characterized by extraordinary activity and energy. The most influential members of either party canvassed the State throughout, and addressed the inhabitants of all her sections; while the two rival candidates for the office of Governor, having entered into an agreement among themselves, and announced the places and times of their meeting in the newspapers, made a joint canvass, appearing together on the same platform, and thence speaking to the same audience, the one after the other.

The election held on November 7, 1876, resulted in a complete victory for the Democratic candidates, except in a few instances, and by great majorities. The largest whole number of votes polled in the State at this election was that on Governor—233,525, of which Zebulon B. Vance received 123,265, and Thomas Settle 110,256. The largest number

of votes cast for any individual candidate on the State ticket was for the Democratic nominee of Secretary of State, 124,010, giving him a majority of 15,096 over his Republican competitor.

From the official count of the votes on presidential electors, it appears that the average majority cast for the Democratic nominees over the Republican was something above 16,000; the average number of votes cast for the former having been 122,354; for the latter, 106,248.

With regard to the election of members of the State Legislature, the strength of the two parties in either House is as follows: Senate—Democrats 39, Republicans 10; House of Representatives—Democrats 82, Republicans 33.

All of the proposed amendments to the State constitution submitted to the people were ratified. They will begin to go into practical operation on January 1, 1877.

As to the election of Congressman in the fourth district, the Republican candidate, Isaac J. Young, was successful by a majority of 77 votes over Joseph J. Davies, the Democratic nominee—the former having received 4,407 votes, the latter 4,330. In that district in 1872 the Republican majority for Governor was 525.

The members of the new General Assembly met for the regular session at Raleigh on November 20, 1876. In the Senate, James L. Robinson, of Mason, Democrat, was elected President, he having received 35 votes, and George Green, of Craven, his Republican competitor, 6. Mr. Robinson presides in the Senate till the beginning of January, 1877, when, in accordance with the new constitution, Thomas J. Jarvis, the new Lieutenant-Governor-elect, will be qualified, and assume the presidency of that body *ex officio*.

In the House of Representatives, Charles Price, of Davie, Democrat, was elected Speaker by a vote of 66 against 27 cast for Daniel L. Russell, of Brunswick, Republican.

The financial condition of the State, in regard to revenue and expenditure for the year ending September 30, 1876, was as follows:

Balance in hands of State Treasurer, October 1, 1875:	
Educational fund	\$14,089 78
Public fund	184,708 1½
	<hr/>
	\$198,742 89½
Receipts of educational fund for fiscal year ending September 30, 1876	\$42,285 59
Receipts of public fund for fiscal year ending September 30, 1876	524,089 17½
	<hr/>
	\$566,274 76½
Disbursement of educational fund for fiscal year ending September 30, 1876	\$765,017 66
Disbursement of public fund for fiscal year ending September 30, 1876	\$54,707 98
	<hr/>
	\$28,955 22
	<hr/>
	\$582,768 15
Leaving in hands of State Treasurer, October 1, 1876:	
Educational fund	\$1,567 44
Public fund	180,697 07

The public debt of North Carolina consists

of bonds issued for various purposes and at various times—before, during, and after the late civil war—and is at present nearly \$42,000,000, including the interest accrued and unpaid, on the principal. A comprehensive summary exhibiting the amounts of the several issues of State bonds, and the interest due on them respectively on October 1, 1876, is thus officially presented:

The bonded debt of the State on October 1, 1876, was as follows:	
Bonds issued before the war, called "old bonds"	\$5,872,800 00
Interest unpaid on same	4,008,777 50
	<hr/>
Total, principal and interest	\$12,876,677 50
Bonds issued since the war, under acts passed before the war	\$1,781,000 00
Interest unpaid on same	807,150 00
	<hr/>
Total, principal and interest	\$2,568,150 00
Bonds issued since the war, under ordinance and acts passed since the war, not special tax	\$2,015,045 00
Interest unpaid on same	921,171 35
	<hr/>
	\$2,936,172 35

This class embraces the following issues: Wilmington, Charlotte & Rutherford Railroad, issued during the war, under ordinance before the war, and renewed by acts of 1863 and 1866		\$405,000 00
Registered certificates of Board of Education—Chatham Railroad, ordinances convention	353,045 00	
Wilmington & Tarboro Railroad	1,053,000 00	
Penitentiary	150,000 00

An act was passed by the Legislature of 1874-'75 proposing a compromise of the State debt, and specifying the manner in which it should be effected; but its provisions have not been carried into execution, as only a few among the creditors signified their willingness to accept the proposed compromise, and the bonds held by them represent so small a portion of the debt that it was deemed undesirable to incur the expense of issuing new bonds, and laying a special tax on all the taxable property in the State for the purpose of paying the interest on such a small amount.

The Governor urged on the Legislature the

necessity of a prompt and decisive action in this matter, saying: "It is very important that we should compromise, commute, and settle the State debt, so that our financial condition may be the better known, both at home and abroad, and our public credit again established upon a sound basis."

not hope to advance rapidly in intelligence and wealth.

The education of youth is commendably cared for in the State, without discrimination between whites and blacks, the children of either race receiving instruction in separate schools, but in the same manner and on the same conditions. The following statement exhibits the number of children of school age, as well as the number of teachers, school-houses, and academies for white and colored children in North Carolina in November, 1876:

STATE SEAL OF NORTH CAROLINA.

With a view greatly to increase the material prosperity of the State, and also to retain within her borders the vast sums of money now constantly sent abroad for the purchase of almost all kinds of manufactured goods, Governor Bragden recommended that, without abating the protection and favor due to all branches of agriculture, the chief source of all wealth, the General Assembly should hold out suitable inducements to encourage the establishment of other industries both to supply the raw material required and to work it out for use, more especially as North Carolina is endowed by Nature with almost inexhaustible resources for the raising of such raw materials in great variety and abundance. He says:

We ought to manufacture and supply ourselves with a large proportion of our woolen clothes of all kinds, especially of the coarser and more substantial kind.

We ought to spin and weave at least one-half of our cotton-crop, which cannot be less than 200,000 bales per annum.

We ought to manufacture our own iron from the vast beds of ore which we have in various parts of the State, some of which are not excelled for quality elsewhere in the earth.

We ought to get out and use more of our timber, and send more of it than we do to the markets of the world. We ought to direct very much more of our attention and energies to the great work of building up a home market for our people, and of thus living more within ourselves.

A policy of this kind would benefit every interest, and would especially redound to the advantage and prosperity of the farmers, by creating a demand here at home for their products.

It would also save millions of dollars per annum to the State, which are now expended outside our borders, and which constitute a constant drain upon our wealth.

It would also diversify labor and give employment to all classes of our people, without which we can-

Graded schools, so called, have been opened in several places, and are conferring signal benefits on the communities in which they exist. The object and extent of the instruction given in these schools are "to begin with the rudiments for little children, and gradually to ascend, until the larger and older scholars are thoroughly instructed in the higher branches of learning, thus fitting them for the active business of life without further instruction, or preparing them for college, where they may make still further and higher progress in learning and knowledge."

The State University at Chapel Hill was opened for the reception of students on the 10th of September, 1875, and is now in successful operation.

An act was passed by the last General Assembly directing the State Treasurer to issue to the trustees of the said university a certificate of indebtedness for \$125,000, bearing interest at six per cent., payable in two semi-annual installments, to be used by the said trustees in support of the university. The sum of \$7,500 is annually paid from the public Treasury on that account.

In the State Asylum for the Insane there were, at the beginning of November, 1876, 264 patients under treatment. The whole number of patients admitted into this institution since the day of its first opening, Febru-

ary 23, 1856, is 1,173, of whom 302 have been discharged cured, 114 improved, 180 unimproved, and 318 have died.

An act was also passed at the preceding session "to provide another asylum for the insane of North Carolina," its building to be located within three miles of Morganton, and to be called "The Western Insane Asylum." The act appointed five commissioners to purchase in behalf of the State a suitable tract of land for that purpose, and to superintend the erection of the building. To meet the necessary expenses, the act appropriated the sum of \$50,000 for 1875, and of \$25,000 for 1876, besides empowering the commissioners to employ in the construction of this asylum as many convicts as the authorities of the State-prison could furnish for it. The whole amount appropriated has been drawn from the public Treasury, and a number of convicts put at work in the asylum building, which is now in the course of erection.

An act was also passed by the last General Assembly "to provide for the colored insane of North Carolina," appropriating the annual sum of \$10,000, to be paid to the directors of the Marine Hospital at Wilmington, for the support and treatment of the colored insane, as a branch of that hospital. The provisions of this act have remained without effect, as the commission appointed to carry them out has been unsuccessful in coming to an agreement with the directors of the Marine Hospital, who showed themselves unwilling to connect the treatment of colored insane with the institution under their charge.

As the colored race constitutes a large proportion of the population of North Carolina, the establishment of an asylum for colored insane under the same rules, regulations, and treatment, as are used in the State for white patients, is earnestly recommended by the Governor.

In the Institution for the Deaf and Dumb and the Blind, the whole number of pupils enrolled within the last two years has been 221, namely: deaf-mutes 128, of whom 63 were males, and 65 females; blind 93—males 51, females 42.

The inmates of this institution are well cared for and most kindly treated. Its financial condition seems to be very satisfactory. Its income during the two years ending October 31, 1876, amounted to \$101,855.41, made up by \$90,000 from the regular yearly appropriation of \$45,000; \$3,000 special appropriation; \$80 interest; \$2,020.25 from the shoe-shop connected with the institution; \$718.15 from miscellaneous sources; and \$5,997.01 surplus in the treasurer's hands on November 1, 1874. The whole expenditure for the said two years was \$89,931.41; leaving in the Treasury a balance, on November 1, 1876, of \$15,861.41.

The number of convicts in the State-prison is quite large. They are usefully employed within and without the inclosure, either on

public works or farmed out to contractors, on conditions generally advantageous to the State. The directors have furnished certain numbers of convicts to be kept out at work in different places, as follows: 332 to the Western North Carolina Railroad, where they have built three sets of quarters, the probable value of the work already done by them on it being estimated at \$100,000; 50 to the Insane Asylum at Raleigh, where they have manufactured the bricks used in the construction of the new kitchen and store-room for that institution; 50 to the new Insane Asylum near Morganton, for making bricks and grading the grounds; 30 to the North Carolina & Georgia Railroad Company, which line will form a part of the western division of the Western North Carolina Railroad leading from Asheville to Murphy in Cherokee County, the residents of this county having agreed to defray the expense of transporting, feeding, clothing, and furnishing medical attendance to the convicts for their labor; 30 to the lessees of the New Hanover Workhouse for the remainder of their term, upon the same agreement as with the residents of Cherokee County; 200 to the Spartanburg & Asheville Railroad Company for two years. This company has agreed, besides clothing, feeding, guarding, and furnishing the prisoners with medical attendance, to pay into the treasury of the prison a yearly sum of \$31.20 for each prisoner. These conditions have been punctually fulfilled by the company.

A considerable number of convicts is kept at work within the penitentiary inclosure, there being connected with it a foundery and machine-shop, a blacksmith-shop to manufacture tools for quarrying stones and other purposes, and a shoe-shop in which are made all the shoes worn by the convicts retained within the prison and those sent out of it to be kept at work elsewhere in the State. The work in these shops is performed by convicts, and, it is stated, in a very satisfactory manner.

During the last two years a strong cell-building, containing sixty-four cells, has been erected within the penitentiary inclosure, and was ready for use in November, 1876. The building is of brick, with iron doors and frames. The making of the bricks and the cutting of all the stone-work used in the structure have been done by convicts. They have also made the iron doors and frames, at less than one-half of the original contract price.

The management of the State-prison for the two years ending October 31, 1876, has been most satisfactory on the part of its several officers, and the conduct of the convicts in regard to discipline apparently commendable.

Owing to the increase in the number of convicts, of their guards and overseers, there is shown in the financial account of the prison a deficiency of \$21,678.97, to cover which and supply the wants of the prison the directors asked of the Legislature an immediate appropriation.

Among the prisoners now confined in the penitentiary of North Carolina there are "a white man sent thither for a term of ten years, for stealing a Bible while drunk; a youth for a term of three years for stealing one goose, valued at ten cents; another for a term of three years for receiving a stolen chicken!"

Under the law, as it now stands, according to the decision of the Supreme Court, assault and battery, even an assault with a deadly weapon and with intent to murder, is not a penitentiary crime!

As the Western North Carolina Railroad was to be sold under a decree of the Circuit Court of the United States, the General Assembly of 1874-'75 passed an act to purchase the said road for the State at a price not exceeding \$890,000. It appointed the Governor and two other citizens a commission to make the purchase, and pay for it by issuing bonds in the name of the Western North Carolina Railroad Company, and in the usual form of mortgage-bonds, the principal to be paid at fifteen years from the date of issue, and in the mean time bearing interest at the rate of seven per cent. per annum, payable semi-annually. The act empowered the Governor, after the purchase, to appoint three commissioners to manage the affairs of the road during the pleasure of the General Assembly, and to build and complete its unfinished portion to its termini at Paint Rock and the Georgia or Tennessee line, near Ducktown, according to the charter granted to the railroad company. For the execution of this work the act authorized the last-named commissioners to use the labor of convicts from the State penitentiary, and also the net earnings of the road, as they might deem proper. The judicial sale of the road, with all its property and franchises, including road-bed, superstructure, equipment, and all its real and personal estate, took place on the 22d of June, 1876, when the above-named commission, with the Governor at its head, bought it for the State, to whom a perfect title was conveyed in due time. The Governor then appointed the three commissioners. A considerable amount of work has since been done on this road.

One of the first matters acted upon by the members of the Legislature after the opening of the session on November 20th was their own-pay, as the amendments to the constitution adopted reduce its present amount some-

what. A joint resolution to fix the pay for the time previous to January 1, 1877, at the reduced rate prescribed by the constitutional amendments for the time thereafter—namely, mileage, at 10 cents *per diem*, of members, at \$4; of President of the Senate and Speaker of the House of Representatives, at \$6; and of the chief clerks of the two Houses, at \$5—was introduced in the Senate on November 21st, and adopted on the 22d. The resolution, as adopted, being sent to the Lower House for concurrence, was passed—yeas 97, nays 11.

Matthew W. Ransom was elected to the United States Senate for six years from March 4, 1877.

Both Houses agreed to adjourn on December 18th, and reassemble on the 30th, the last working day of the month in 1876, which agreement was carried into execution.

During the twenty days of session before the recess, a considerable amount of work was done by the Legislature, but chiefly of a local nature.

A joint resolution was introduced into the Lower House by a colored member, requesting the Representatives of North Carolina in Congress to procure such legislation from that body "as will assign to the negroes of the South two or three Territories west of the Missouri, for their exclusive use." The resolution was taken up at the sitting of December 11th, when, as some among his colleagues seemed inclined to ridicule his proposition by moving to refer it to the Committee on Military Affairs, and to the Committee on the Insane Asylum, he declared to the House that from facts and reflections he had come to the conclusion that the two races could not live together in the South in that harmony which was necessary and desirable; adding that this sentiment and belief were entertained by a large portion of his race. He then moved to postpone the further consideration of his resolution to January 10, 1877. A motion to table the whole matter was rejected by a vote of 50 nays to 37 yeas; and the motion to postpone to January 10th adopted.

On December 30th the members of the Legislature met again to resume the work of the session. On January 1, 1877, in accordance with the amended constitution, Zebulon B. Vance, the new Governor-elect, was formally installed in office.

OBITUARIES, AMERICAN. AMERMAN, JOHN, Jr., was born in Brooklyn, N. Y., April 2, 1809; died there, January 6, 1876. He was the oldest employing printer in New York, having followed that occupation for half a century. In 1834 he established with P. T. Barnum the *Herald of Freedom*, a weekly journal, at Norwalk, Conn. The paper soon passed in-

to other hands, and Mr. Amerman returned to New York, and formed a partnership with the late James Van Norden, making the printing of legal matters a specialty.

ANTHONY, JAMES, born in Franklin County, Pa.; died at San Francisco, January 8d, in the 52d year of his age. He emigrated to California in 1849; in 1851 he became part

proprietor and sole directing spirit of the *Sacramento Union*, in which position he continued till 1874, wielding an important influence for good in the affairs and politics of the Pacific coast and the nation.

ARNOLD, AARON, born in the Isle of Wight, in 1794; died in New York, March 18th. He came to the United States in 1823, and in 1827, with his nephew, George A. Hearn, established in New York City a wholesale and retail dry-goods store, under the firm-name of Arnold & Hearn. In 1842 Mr. Hearn was succeeded by Mr. Arnold's son-in-law, James M. Constable, and the name of the firm was changed to Aaron Arnold & Co. In 1853 Mr. Arnold's son Richard, and J. P. Baker, were admitted to the firm, which then became known by its present title, Arnold, Constable & Co. In 1869 Mr. Aaron Arnold left to his partners the active management of the business, which had now become one of the largest in the city.

ASPINWALL, Colonel THOMAS; died in Brookline, Mass., August 11th, aged 90 years. He was the oldest survivor of the War of 1812, and his services were memorable as major of the Ninth United States Infantry. From 1815 to 1853 he was United States consul at London.

BABCOCK, GEORGE R.; died September 22d, in Dannemora, N. Y. He took a prominent part in State politics, and was elected State Senator in 1850. In 1875 his name was brought forward for Controller, but he declined to be a candidate. He was subsequently appointed a member of the State-prison Commission.

BACON, Rev. Dr. GEORGE, was born at New Haven, Conn., in 1836; died in Orange, N. J., September 15th. He was a son of Dr. Leonard Bacon, graduated at Yale College, and, after a voyage to China for his health, returned to this country and entered Andover Theological Seminary. At the age of twenty-four he received a call from the Orange Valley Congregational Church, where he continued to minister during his life.

BAGLEY, GEORGE R., resident engineer of the Eads jetties; died December 14th, aged 54 years.

BAGLEY, Colonel JAMES, a sachem of the Tammany Society, and an ex-Alderman of New York, was born in Ireland in 1822; died in New York, December 21st. He commanded the Sixty-ninth Regiment from 1862 to 1866.

BAKER, NATHANIEL B., born in Hillsborough (now Henniker), N. H., September 29, 1818; died in Des Moines, Iowa, September 11th. He graduated at Harvard College in 1839, and was admitted to the bar in 1842. For three years he was joint proprietor and editor of the *New Hampshire Patriot*. In 1845 he was appointed Clerk of the Court of Common Pleas, and in 1846 Clerk of the Superior Court of Judicature for Merrimac County. In 1851 he was elected to the Legislature, was chosen Speaker of the House, and served two terms. He was a presidential elector in 1852, and in 1854 was elected Governor of the

State on the Democratic ticket. His term expired in 1855, and in 1856 he removed to Clinton, Iowa, and engaged in the practice of law. He was elected to the Legislature in 1859, and acted with the Republicans in the session of 1860 and the extra session of 1861. In July, 1861, he was appointed Adjutant-General of Iowa, which office he held until the time of his death.

BALDWIN, Judge CALKB; died at Council Bluffs, Iowa, in December. He was one of the judges of the Court of Alabama Claims.

BALLOU, GEORGE C., an extensive cotton and woolen manufacturer in Woonsocket, R. I.; died March 26th.

BARLOW, SAMUEL BANCROFT, was born in Granville, Mass., in April, 1798; died in New York, February 28th. He was graduated from the Yale Medical School in 1821. In 1841 he removed to New York, and was for many years a professor in the Hahnemann (Homoeopathic) College. He was well known as an antiquarian and philologist.

BARRETT, Rev. MYRON; died in Newton, N. J., May 8th. He was born in Dutchess County, N. Y., September 9, 1816, and graduated from Yale College in 1844. He completed his education at the Princeton Theological School in 1851, and became pastor of the First Presbyterian Church of Newton in 1854.

BARRY, Commodore GARRET R., pay-director of the United States Navy; died in New York, February 26th, at the age of 81. He was in almost constant service in the navy from 1817 until his retirement in 1867.

BARTLETT, General WILLIAM F.; died at Pittsfield, Mass., December 17th, at the age of thirty-six years. He entered the army, in 1861, as a captain in the Twentieth Regiment of Massachusetts Volunteers. He was engaged in the battle of Ball's Bluff, October 21, 1861, and made the official report of the engagement for his regiment. He lost a leg at the battle of Fair Oaks, Va., in May, 1862. He afterward became colonel of the Forty-ninth Massachusetts Regiment, which became a part of General Augur's division, in Louisiana, in 1863, and took part in several engagements. In the assault on Port Hudson, Colonel Bartlett was shot through the wrist and the heel. Returning to Massachusetts he organized the Fifty-seventh Regiment, and was again wounded in the battle of the Wilderness. In the summer of 1864 he was captured and confined in Libby Prison. Soon after he was exchanged he was brevetted major-general. He was an Independent Republican, and in 1875 declined the Democratic nomination for Lieutenant-Governor of Massachusetts.

BARTLEY, Mrs., wife of Judge Bartley, and sister of General Sherman; died in Washington, January 10th.

BENSON, SAMUEL P.; died August 12th. He was a member of the Maine Legislature in 1834 and 1836, and Secretary of State in 1838 and 1841. He was elected to Congress in 1853.

and served two terms, becoming chairman of the Committee on Naval Affairs.

BERGMANN, CARL, musician, born at Ebersbach, Saxony, in 1821; died in New York, August 10th. When the rebellion of 1848 broke out, he came to New York, and in 1850 became the conductor of the Germania Society, which position he held for two years. He organized and conducted the great German Musical Festival, held in the Winter-Garden Theatre, in 1855, and in 1856 he introduced German opera at Niblo's Garden. He was afterward the conductor of German and of Italian opera in New York, and was for a time the leader of the Arion (Singing) Society. Mr. Bergmann excelled as a player of the violoncello and the piano, and composed a number of orchestral pieces. For several years preceding his death he was conductor of the concerts of the Philharmonic Society in New York.

BINGHAM, SAMUEL, the oldest printer in the United States, was born at Hanover, N. H., in 1789; died in New York, May 7th. At the age of eleven years he was bound to the trade of a printer. He came to New York over fifty years ago, and worked at a hand-press for the Bible and Tract Houses, and Harper & Brothers. He worked the first steam cylinder-press introduced in this country.

BISHOP, VICTOR, was born in Paris, France, in 1819; died in New York, March 10th. When about seventeen years of age he came to New York, where for forty years he was an importer and wholesale dealer in diamonds and precious stones.

BIXBY, JOHN MUNSON, born in Fairfield, Conn., 1800; died in New York, November 22d. After nearly thirty years' practice of the law in New York, he retired in 1849 and married Miss Poe, a cousin of Edgar Allan Poe, the poet. He was the author of two novels, "Standish, the Puritan," and "Overing, or the Hair of Wychoerly."

BLOSS, GEORGE, M. D., was born in Derby, Vt., in 1826, and was killed, May 28th, by a locomotive, while walking near his home at Branch-Hill Station, near Cincinnati, Ohio. He was for many years one of the editors of the *Cincinnati Inquirer*, and was remarkable for his wonderful memory of political facts and statistics. He was an earnest Democrat, wrote a biography of George H. Pendleton, and two years ago was an unsuccessful candidate for Congress.

BLUMENBURG, Major LEOPOLD; died in Baltimore, Md., August 12th, aged 49 years. During the war he was major of the Fifth Regiment Maryland Volunteers, and was severely wounded at the battle of Antietam. From 1863 to 1865 he was Provost-Marshal of Baltimore.

BOOTH, JAMES W., State Senator of New York, born in New York City, 1822; died at Nyaok, N. Y., September 14th. He began life as an apprentice to a dyer, and retired from that business several years ago with a consid-

erable fortune. From 1853 to 1870 he was a common-school trustee in New York City. He was elected as a Republican State Senator in 1873, and reelected in 1875. He was chairman of the Committees on Literature and Public Health, and a member of the Committee on Affairs of Cities. In 1878 he was elected one of the regents of the State University.

BOOTH, WILLIAM CHATFIELD; died in Brooklyn, N. Y., at the age of 75. He was born at Southold, L. I., of one of the oldest families in the State. He spent many years in Suffolk County, where he held numerous public offices. During a large part of his life he was a teacher and organized one of the first public schools in Brooklyn. For twelve years he was a custom-house officer. His daughter, Miss Mary L. Booth, is the well-known author, and the editor of *Harper's Bazar*.

BOWLER, Mrs. ANNIE KEMP; died in Philadelphia, August 21st, of injuries received from a fall while rehearsing at the National Theatre. She was the wife of Brookhouse Bowler, was a well-known singer, and formerly a member of the Richings English Opera Company.

BOYCE, Rev. JAMES, pastor of St. Teresa's Roman Catholic Church, New York; died in that city, July 9th, aged 50 years. He was born in Ardagh, County Longford, Ireland, and came to this country at an early age. Having completed his ecclesiastical studies at St. Joseph's Seminary, Fordham, N. Y., he was ordained priest in 1854, and for nearly ten years was pastor of St. Mary's Church. In 1868 he was installed as pastor over St. Teresa's parish, and by his zeal made it one of the best in the city. He founded a parochial school for boys in Rutgers Street, and established a convent for girls, under the direction of the Ursuline Nuns, in Henry Street.

BRAGDON, CHARLES D., formerly editor of *Moore's Rural New-Yorker*; died at Port Ontario, N. Y., November 30th.

BRIGGS, Mrs. HARRIET HALL, wife of the late Governor of Massachusetts, and mother of General Henry S. Briggs, of Boston; died at Pittsfield, Mass., aged 82 years.

BRIGGS, Captain JEREMIAH; died at Richmond Hill, L. I., May 28th, in his 84th year. From early life he was connected with the navy, and served in the War of 1812. After the war he founded a transportation line of sailing-vessels between New York, Philadelphia, and Baltimore, but it ceased operations about two years ago.

BROOKS, ELISHA, born in Rye, Westchester County, N. Y., June 15, 1815; died in October. He was a member of the firm of Brooks Brothers, who carried on in New York City the extensive clothing business founded in 1818 by his father, Henry S. Brooks. Elisha became a partner in 1833. Soon after his father died, and the business was continued by his five sons, of whom only Daniel and John now

survive. Their sons, as well as the sons of the deceased brothers, are in the firm.

BROWN, HORATIO STOCKTON, the President of the Board of Port Wardens of the Harbor of New York; died June 28d. He was born at Windsor, N. Y., in 1822.

BRUENINGHAUSEN, DR. CHARLES; died in New York, August 20th, at the age of 68. During 1867 and 1868 he was one of the governors of the almshouse, and was at one time very prominent in politics.

BURR, DAVID J.; died in Richmond, Va., in his 57th year. He was for many years President of the Richmond Chamber of Commerce, and the first President of the Virginia Home Insurance Company.

BURROUGHS, WILLIAM, founder of the *Dry-Goods Reporter* and *United States Economist*; died in San Francisco, December 4th, aged 62.

BUTLER, MRS. BENJAMIN F.; died in Boston, Mass., April 8th, in her 55th year. She was a daughter of Dr. Israel Hildreth, of Lowell. She made her *début* on the stage August 10, 1837, at the Park Theatre, New York, as *Mariana* in "The Wife." During 1842 she performed a star engagement in Louisville, Ky., appearing as *Ion*. She soon after retired from the stage, and was married to General Butler.

CAIRNS, ROBERT, was born in Ireland; died at Fort Abercrombie, Dakota, August 4th. He served as second-lieutenant in a Kentucky regiment from 1862 to 1864. At the time of his death he was a first-lieutenant in the Seventh Cavalry of the United States Army.

CALHOUN, REV. SIMON HOWARD, was born in Boston, Mass.; died December 14th, in Buffalo, N. Y., aged 72 years. He graduated from Williams College in 1829, was a laborer in the Holy Land for nearly forty years, was thoroughly versed in the Arabic and Turkish languages, and assisted Dr. Goodell in making the first translation of the Bible into the Turkish language.

CHATTERTON, STEPHEN S., was born in Troy, N. Y.; died in New York City, February 26th. He was editor of the *Ithaca Republican*, and was active in politics during the Henry Clay campaign.

CHENEY, WARD, president of the Silk Company doing business under the name of Cheney Brothers, and of the Silk Association of America; died in South Manchester, Conn., March 22d, at the age of 68. He was actively engaged in the culture of raw silk at Burlington, N. J., and in 1886, in company with his brothers, he began the manufacture of silk from the raw material at South Manchester, Conn. The business was soon abandoned, but was resumed in 1841, since which time it has gradually extended, until about 2,500 operatives are now employed.

CLEVELAND, JOHN FITCH, was born in Chatauqua County, N. Y., February 4, 1819; died in New York, October 9th. For more than thirty years he was a member of the editorial staff of the *New York Tribune*, and in recent

years had compiled the "Tribune Almanac." From 1862 till 1871 he was Assessor of Internal Revenue in New York. In July, 1846, he was married to Esther Greeley, a sister of Horace Greeley. From 1849 till his death he was a stockholder in the *Tribune*.

CONNOLLY, MICHAEL, was born in the county of Oavan, Ireland, in September, 1811; died in New York, July 15th. He came to New York when seventeen years of age. For many years he was identified with the Democratic party, and in 1851 was elected police justice, which office he held for eighteen successive years. In 1868 he was elected Register, and served a term of three years. In 1872 he was nominated for Congress, but was defeated.

COOPER, General SAMUEL, ex-Confederate Adjutant and Inspector-General; died in November, at Cameron, Va., aged 78.

COX, HANNAH, was born at Longwood, near Philadelphia; died there, April 15th, at nearly 80 years of age. She was one of the original abolitionists, and joined the first movement in favor of emancipation, being a co-laborer with Benjamin Lundy, Garrison, Lucretia Mott, and Whittier. For years she and her husband, who now survives her in his ninety-first year, received and protected fugitive slaves. Their golden wedding was celebrated in 1878, when poems were sent by Whittier and Bayard Taylor.

COZZENS, WILLIAM COLE; died in Newport, R. I., December 17th. He was born in that city August 26, 1811. Since 1842 he has been at the head of the dry-goods firm of William C. Cozzens & Co., and for nearly twenty years he was President of the Rhode Island Union Bank. In 1854 he was Mayor of Newport. Subsequently he was elected a Representative to the General Assembly, and in 1861 a Senator. In March, 1862, the Governor and Lieutenant-Governor having resigned, Mr. Cozzens, who had been chosen President of the Senate, became Governor of the State, and performed the duties of that office for about three months.

CRAWFORD, DAVID, was born in Putney, Vt., December 14, 1832; died in New York, December 24th. He was a well-known member of a banking firm in New York, and was a director of several railroads.

CRESSON, DR. JOHN C., civil-engineer, was born in Philadelphia, March 16, 1806; died there, January 27th. For more than thirty years he was chief-engineer of the Philadelphia Gas-Works, and held other responsible positions.

CROSBY, JOHN P., a prominent lawyer of New York, was born in that city; was drowned September 19th while bathing at Fire Island. He was graduated from Columbia College in 1827, and soon after began the practice of law.

CROSS, General OSBORN, was born in Maryland; died in New York, July 16th. He entered the United States Army as second-lieutenant in 1825. In 1863 he was promoted to

lieutenant-colonel, in 1865 was brevetted brigadier-general, and in 1866 he was placed on the retired list.

CUTTING, JONAS; died at Bangor, Me., August 19th. He was Associate Justice of the Supreme Court of the State of Maine for twenty-one years.

CUTLER, THEODORE, was born at Poughkeepsie, N. Y., September 14, 1819; died in Philadelphia, April 4th. He graduated at the University of Pennsylvania in 1838, was admitted to the bar in 1841, and became one of the leading lawyers of Philadelphia. He was a prominent Democrat, and in 1872 was elected a delegate to the State Constitutional Convention, where he served as a member of the Judiciary Committee.

DANBY, AUGUSTINE G.; died in Utica, N. Y., November 27th. He was born in Mansfield, Mass., December 17, 1795. In 1810 he went to Utica to learn the printer's trade, and in 1816 established the first printing-office and newspaper in Rochester, N. Y. He returned to Utica in 1822, and in 1824 became proprietor of the *Observer*, but relinquished the ownership in 1834, though he still continued his editorial connection with that paper. He was an ardent Democrat, and as a political writer supported Monroe in 1816 and 1820. For twenty years he was Postmaster of Utica.

DANFORTH, CHARLES, originator and for some years president of the Danforth Locomotive and Machine Company; died in Paterson, N. J., March 22d, in his 79th year. A native of New England, he came to Paterson in 1830, and began the manufacture of machines. He invented the Danforth spinning-frame, which was sold extensively in this country and in Europe, and in 1852 began the manufacture of locomotives. His fortune was estimated at nearly \$3,000,000.

DAVIDSON, REV. ROBERT, D. D.; died in Philadelphia, Pa., April 6th. He was born in Carlisle, Pa., February 23, 1808. He graduated at Dickinson College in 1828, and at the Princeton Theological Seminary in 1831. He was pastor of a Presbyterian church in Lexington, Ky., from 1832 to 1840, when he became President of Transylvania University, which position he resigned in 1842. He was a pastor in New Brunswick, N. J., from 1843 to 1860; from 1860 to 1864 in New York, and from 1864 to 1868 in Huntington, Long Island. Dr. Davidson served as permanent clerk of the General Assembly from 1845 to 1850. For a quarter of a century he had been a member of the Board of Foreign Commissions, and since 1867 a director of Princeton Theological Seminary. In 1869 he was a delegate to the General Assembly of the Free Church of Scotland, in Edinburgh.

DAVIS, MRS. PAULINA WRIGHT, wife of the Hon. Thomas Davis; died in Providence, R. I., August 24th, at the age of 63. For thirty-five years she labored zealously to promote the rights of women, published the first woman-

suffrage paper, and acted in concert with Lucretia Mott, Ernestine R. Rose, Frances D. Gage, Sarah Tyndale, and other early advocates of the cause.

DE LONG, CHARLES E.; died in Virginia City, Nev., October 26th. In 1869 he was appointed minister-resident to Japan, and the following year was made minister plenipotentiary. He remained in Japan until 1873, when he was succeeded by Mr. Bingham.

DE PUY, HENRY WALTER; died February 2d. He was born at Pompey Hill, Onondaga County, N. Y., in 1820. He was admitted to the bar, and for several years edited a paper in Indianapolis, Ind., in support of the Liberty party. From 1853 to 1854 he was private secretary to Governor Seymour, afterward served as consul to Carlsruhe, and was appointed secretary of legation at Berlin, where he remained until 1860. He was appointed Secretary of Nebraska by President Lincoln, organized that Territory, and served as the first Speaker of the Nebraska Legislature. He was also Indian agent to the Pawnees, and devoted much time and ability in efforts to reform the Indian service. He was the author of several biographical and historical works, among them "Kossuth and his Generals," "Louis Napoleon and his Times, with a Memoir of the Bonaparte Family," and "Ethan Allen and the Green Mountain Heroes of '76, with the Early History of Vermont." He also wrote several popular poems.

DIXON, ARCHIBALD; died in Henderson, Ky., April 23d. He was born in North Carolina in 1802, removed to Kentucky in 1805, and served several terms in the Legislature between 1830 and 1841. In 1843 he was elected Lieutenant-Governor. He succeeded Henry Clay in the United States Senate, where he served from 1852 to 1855.

DODWORTH, THOMAS, the originator of Dodworth's band; died in New York, April 26th. He was born in Sheffield, England, in 1790; came to New York in 1826, and soon afterward organized the first military band of music in New York.

DOVE, DR. JOHN, a native of Richmond, Va.; died there, November 16th, at the age of 84. He was a Freemason sixty-three years; was the oldest Grand Secretary in the world, having held the office over fifty years; and was Grand Recorder of the Grand Encampment of Knights Templars for thirty years.

DOWELL, JAMES R., superintendent of the First District, Southern Division, of the Western Union Telegraph Company; died in Richmond, Va., February 25th, aged 53 years. He held various high positions of trust in the telegraph service, and was well known throughout the South as an eminent Freemason.

DOWING, BENJAMIN, a veteran sea-captain, and the oldest Odd-fellow in the world; died in New York, January 7th, aged 92.

DOWLING, JOSEPH; died in New York, May 18th. He was born in the county of Kilkenny,

Ireland, in 1828. At about eight years of age he came with his father to New York, and settled in the Sixth Ward, notorious for crime, where he continued to reside till his death. He first became a fireman, and then a policeman, being rapidly promoted till he was made captain. In 1857 he was legislated out of the department, but was reappointed two months after, and was soon appointed by Governor Seymour to fill an unexpired term of one year as police-justice. At the expiration of this term he was elected for the full term of six years, and made President of the board. He was reelected for another term of six years, which he served out. As a police-justice Judge Dowling was celebrated for his extensive knowledge of the criminal classes, remarkable memory, and his arbitrary and brusque manner on the bench.

DREW, ROXANA MEAD, wife of Daniel Drew; died in New York, January 27th, aged 77. She was born in Putnam County, N. Y., and was married to Mr. Drew in 1820.

DUDLEY, THOMAS U.; died at Richmond, Va., April 1st, in his 68th year. He held various high masonic and official positions, and was the father of Bishop Thomas U. Dudley, of Kentucky.

EDWARDS, WILLIAM W., the founder of the Dime Savings-Bank of Brooklyn, N. Y.; died there, March 10th. He was born in Northampton, Mass., in 1796. In 1817 he went to Greene County, N. Y., engaged in business of tanning, and from about 1851 till 1859 was connected with the insurance business in New York. Jonathan Edwards was his great-grandfather.

ELDRIDGE, DR. EDWIN; died in Elmira, N. Y., December 16th, at the age of 65. He was an extensive iron-manufacturer, owning a large interest in several founderies in the State of New York. He was identified with the Erie Railway, and at the time of his death was President of the Elmira Iron and Steel Company. He was noted for his liberality and public spirit, having presented to the city of Elmira a magnificent park, covering many acres.

ESTE, DAVID K., a well-known lawyer of Cincinnati, and one of the early settlers of that city, was born in Morristown, N. J., in 1785; died in Cincinnati, April 1st. He graduated at Princeton College in 1803, was admitted to the bar in 1808, went to Ohio in 1809, and settled in Cincinnati in 1814. He became one of the prominent lawyers of the bar, presiding judge of the First Judicial Circuit, and later judge of the Superior Court. On the expiration of his judicial term he retired from professional life, having reached the age of 62. His estate was estimated at nearly \$10,000,000.

FALLS, M. N., an old citizen of Baltimore; died on April 7th, aged 71. He was an acting member of the firm of Stockman, Falls & Co., who ran stage-lines from Baltimore to Washington and the West. For many years he was president of the Bay Line steamers.

FAWSITT, Miss AMY; died in New York, De-

ember 26th. She was born in London in 1836. Her *début* on the stage was made at Edinburgh, in 1865, and in 1869 she made her first appearance in London, acting *Flora Granger* in the "Mistress of the Mill." Afterward, in the same city, she appeared in "The Two Roses" four hundred times; and on September 27, 1876, she appeared for the first time in this country, at the Fifth Avenue Theatre, New York.

FAY, FRANCIS B.; died at Chelsea, Mass., October 6th, aged 88 years. He was born in Massachusetts, and was a member of the State Senate in 1843 and 1845, Mayor of Chelsea in 1857, and Representative in Congress in 1852-'58. He took a prominent part in Massachusetts politics.

FERRIER, Captain JOHN M.; died in New York, February 15th, at the age of 85 years. He was born in that city; was for many years a sea-captain; was President of the Marine Society, and one of the trustees of the Sailors' Snug Harbor, on Staten Island.

FIELD, Mrs. DAVID DUDLEY; died in Baltimore, April 19th.

FORD, MARY A. ("Una"), the Catholic poetess; died in Brooklyn, in April, aged 35.

FREEMAN, Mrs. ELLEN, born near Peekskill, N. Y.; died at Highland Falls, January 10th, at the age of 101 years.

FRENCH, Rev. MANSFIELD, popularly known as "Chaplain French;" died at Pearsall's, Long Island, March 15th. He was born at Manchester, Vt., February 21, 1810. In his youth he studied at the Bennington Seminary; and at twenty began his theological studies at Kenyon College, divinity school, Gambier, Ohio, and at the same time was principal of the preparatory department of the college. He founded Marietta College, in Ohio, and the Granville Female Seminary, and was for a time Principal of the Circleville Female Seminary. In 1845 he joined the Methodist Episcopal Church, and entered the itinerant ministry in the North Ohio Conference. He was a successful pastor for several years; was, also, President of the Xenia (Ohio) Female College, agent for the Ohio Wesleyan University, and then for Wilberforce University, the latter being the first college opened for the colored race in America. In 1845 he became proprietor of a religious monthly, *The Beauty of Holiness*, which he removed from Ohio to New York City in 1858. He was a strong anti-slavery agitator, and, at the urgent solicitation of Lewis Tappan and others, laid before President Lincoln his views of the nation's duties toward "contraband" slaves. In 1862 he visited Port Royal, for the purpose of inspecting the condition of the blacks; returned to New York, and through his efforts the "National Freedmen's Relief Association" was organized. He was made the general agent of this association; and in March, 1862, again sailed for Port Royal, with a large corps of teachers for the blacks, and superintendents for the plan-

tations. In 1832 Mr. French was married to Miss Winchell, a cousin of Dr. Winchell, the geologist. She became an active and influential co-laborer with her husband.

FRUTA, GEORGE; died near Crawfordville, Ind., August 6th. He was supposed to have been born near Baltimore, Md., in 1768. He did some service near the close of the Revolution; went to Virginia in 1787; was afterward with Daniel Boone in Kentucky; served in the Indian War between 1791 and 1796, and in the War of 1812. His wife survives him at the age of eighty-nine.

GALLATIN, JAMES, son of Albert Gallatin; died in Paris, May 29th, in his 80th year. He was President of the Gallatin National Bank of New York for thirty years, but retired in 1868, when he went to Europe.

GANSEVOORT, Judge PETER, son of General Gansevoort of Revolutionary fame; died in Albany, N. Y., January 4th.

GARRARD, Sergeant JAMES H.; died of yellow fever, at Savannah, Ga., October 12th. He was one of the most efficient members of the Signal-Service Corps, and remained at his post, notwithstanding the epidemic, forwarding much valuable information regarding its development and progress.

GARDNER, Dr. AUGUSTUS KINSLEY; died in New York, April 7th. He was born in Roxbury, Mass., in 1821. He graduated at Harvard College in 1842, and obtained his medical degree in 1844, when he visited Europe, and became a pupil of Dubois. Returning home, he published "Old Wine in New Bottles; or, Spare Hours of a Medical Student in Paris," in which he gave a vivid picture of French habits and customs. He edited "Tyler Smith's Lectures," and translated Scanzoni's "Diseases of Females." As Professor of Midwifery in the New York Medical College, the doctor became eminent for the originality and boldness of his views. He was the first to give chloroform in labor, and subsequently had a rupture with the Academy because he met a homœopathic physician in practice; but in this he had the sympathy of distinguished practitioners.

GARNER, WILLIAM T., Vice-Commodore of the New York Yacht Club; was drowned off Stapleton, S. I., July 20th, aged 36.

GAYLORD, GEORGE R., a leading officer in the Hudson River Freighters' Association; died at Poughkeepsie, N. Y., June 8th. He was one of the oldest freighters on the Hudson River.

GEEKEN, JOHN, Treasurer of Hamilton County, Ohio; died April 10th.

GESCHIEDT, LOUIS ANTHONY, M. D.; died at Hastings, N. Y., August 20th. He was born in Dresden, April 8, 1803. Being designed for the Church, he was educated at the Kreuz-Schule; but displaying an extraordinary aptitude for scientific investigation, he entered the Dresden University, where his progress in the natural sciences was so rapid that he became the scientific associate of the Crown-Prince of

Saxony, afterward Frederick August II. At nineteen he entered the university at Leipsic, and after returning to Dresden became associated with Dr. A. Carus, the great physiologist, and Dr. F. A. von Ammon, the most eminent oculist in Europe. He was the assistant of Dieffenbach during the prevalence of cholera in Berlin, and, upon his return to Dresden, published a valuable work upon certain diseases of the eye then imperfectly known. He emigrated to the United States in 1885, settled in New York, where his worth and ability were soon recognized, and retired, in 1870, with an ample fortune.

GILPIN, EDWARD W., Chief-Justice of Delaware; died at Dover, Del., April 29th, aged 78 years.

GLENN, WILLIAM WILKINS; died in Baltimore, June 24th, at the age of 52. Soon after the election of President Lincoln, Mr. Glenn became a part owner of the *Baltimore Exchange*, and, in consequence of the political sentiments expressed in that journal, he was imprisoned in Fort McHenry for about three months. After his release he resumed publication of the paper under the name of the *Baltimore Gazette*, with which he continued his connection until 1872. He subsequently engaged extensively in silver-mining in Colorado.

GOFF, GEORGE W.; died in New York, March 2d. He was born at Bloomingdale, N. Y., in 1806. He was connected with the iron-business in the northern part of that State, and was sent to the State Legislature from Essex County for two successive terms. He was also Collector of Customs at Plattsburg, for four years.

GOLDSBOROUGH, WILLIAM T.; died in Baltimore, January 26th, aged 68 years. He was born in Cambridge, Md. He was several times elected State Senator, and in 1847 was the unsuccessful Whig candidate for Governor. In 1850 he was again elected State Senator by the Whigs, but became an Independent Democrat in 1857, and in 1861 was appointed a member of the Peace Conference held at Washington.

GOODWIN, WILLIAM H., D. D., L.L. D.; died in Dryden, Tompkins County, N. Y., February 17th, at the age of 64. He was born in Ulysses, N. Y., and was for forty years a minister of the Methodist Episcopal Church—his last appointment being at Dryden, in 1874. In 1854 he was elected State Senator from the Ontario district, N. Y., and in 1865 was elected a member of the State Board of Regents.

GORMAN, General WILLIS ARNOLD; died in St. Paul, Minn., May 20th. He was born January 12, 1816, near Flemingsburg, Ky. In 1835 he began the practice of law in Bloomington, Ind., was several times elected to the State Legislature, and served in the Mexican War as major and as colonel. In 1849 he was elected to Congress, where he continued for two terms. In 1853 he was appointed by President Pierce Governor of the Territory of

Minnesota, and in 1857 was elected a member of the State Constitutional Convention. In 1861 he became colonel of the First Regiment of Minnesota Volunteers, and for his services at Bull Run was made a brigadier-general. He was mustered out of the service in the latter part of 1864, and resumed the practice of law in St. Paul. He was elected City Attorney in 1869, and continued in that office till his death.

Goss, Rev. WILLIAM, a prominent minister of the New York Conference of the Methodist Episcopal Church, and presiding elder of the Poughkeepsie (N. Y.) district; died in that city, September 26th.

GOVE, WILLIAM H.; died at Weare, N. H., in his 58th year. He was a pioneer of the Free-State cause in New England, and known as the "silver-tongued orator of New Hampshire." For several years he was a member of the Legislature.

GRAFTON, EDWARD C., commander in the United States Navy; died in New York, June 24th. He was born in Boston, Mass.; entered the navy in 1841, and was appointed lieutenant-commander and assigned to the command of the Genesee in 1862. He served as flag-officer of the Minnesota; was engaged in the battle of Hampton Roads, and also at the bombardment of Fort Morgan.

GRAHAM, JAMES LORIMER, Jr.; died in Florence, April 30th. He was born in New York, January, 1835. He was educated partly at Amiens, France. About 1869 he was appointed consul-general of the United States for Italy, and took up his residence in Florence.

GRAHAM, JOHN LORIMER; died in Flushing, N. Y., July 22d. He was born in London, March 20, 1797. He was admitted to the bar in 1821, and soon acquired a large practice in New York. He held several prominent positions in the State militia. In 1834 he was appointed a Regent of the State University; was Postmaster of New York from 1840 to 1844, and in 1861 occupied a confidential position in the Treasury Department at Washington.

GRAHAM, VAN WYCK, the first teller of the Phoenix Bank, in which he had been employed for nearly half a century; died in New York, January 22d.

GRAHAM, Lieutenant WALLACE; died in March. He was a native of New York; entered the United States Navy December 6, 1861, and was appointed lieutenant in 1869. He had been for two years with the United States steamer Michigan.

GRAVES, RALPH H., principal of the Military Academy at Hillsboro, N. C.; died in that city, May 10th.

GRAY, Commodore ALFRED G.; died in Brooklyn, N. Y., November 10th. He had been in command of vessels for more than thirty years. He was born at Norfolk, Va., in 1818. He first went to sea when seventeen years old, and at the age of twenty-seven became a captain. In 1843, as lieutenant, he

commanded the Texan sloop-of-war Austin in the engagement with the Mexican war-steamships Regenerador, Guadalupe, and Montezuma, off Campeachy. For three years during the late civil war he was captain of the army-transport McClellan. He became a captain in the service of the Pacific Mail Steamship Company in 1865, by whom he was made commodore in 1874.

GREEN, HENRY, Jr.; died at Trenton, N. J., December 20th. He was born in 1804. He graduated at Princeton College in 1820, was admitted to the bar in 1825, was member of the Legislature in 1842, Chief-Justice from 1846 to 1860, and in 1861 was appointed Chancellor.

GREENFIELD, ELIZABETH TAYLOR, well known in the concert-room as the "Black Swan;" died in Philadelphia, at the age of 68. She was born a slave at Natchez, Miss. At an early age she was manumitted by her mistress, Mrs. Greenfield, who gave her a liberal education. She became distinguished for her vocal abilities, sang with success in America, and went to England, where the Duchess of Sutherland and the Duchess of Argyll became her patrons.

GUNTHER, JOHN CHARLES; died in New York, March 6th, at the age of 53. He was born in that city, and at the age of sixteen he was sent to Paris, where he learned the art of dressing and cutting furs. On his return to New York he entered into partnership with his father and his elder brother, ex-Mayor C. G. Gunther, but retired from the fur-business in 1868.

HALL, ex-Governor WILLIAM, of New Hampshire; died July 22d, aged 69.

HALK, CHARLES B.; died in Morrisania, N. Y., February 11th. He was born at Ballington, England, June 23, 1819, and made his first appearance on the stage at Hereford, January 8, 1837. He made his first appearance in America in 1852, and was a member of Brougham's Theatre, New York, in 1869. He played character parts and old men.

HALL, Dr. WILLIAM H., editor of *Hall's Journal of Health*; died in New York, May 10th, aged 66.

HAMMOND, General M. C. M.; died near Beech Island, S. C., January 23d. He graduated at West Point in 1836, and served in the regular army until 1842, when he resigned, but in 1846 he became paymaster in the army. He served in the war with Mexico until 1847. He was the author of several works, one of them being a review of the Mexican War.

HARDIE, General JAMES A.; died in Washington, D. C., December 14th. He graduated at West Point in 1843, commanded the Fourth Regiment of New York Volunteers in the Mexican War, was aide-de-camp to Generals McClellan and Wool during the late war, and in 1865 was brevetted major-general for services in the inspector-general's department of the army.

HASKETT, WILLIAM JAY; died in New York, December 18th. He began the practice of law in that city fifty years ago, and was President of the Excise Board from 1865 to 1868. He took a great interest in reforms, and held a leading position in admiralty practice.

HIBBEN, ETHELBERT C.; died at Indianapolis, Ind., September 15th. He was born in Wilmington, Ohio, in 1824, went to Indianapolis about 1841, and was admitted to the bar in 1845. From 1857 to 1859 he edited a Democratic paper at Portland, Oregon.

HOPKINS, LUCIUS; died in New York, September 27th, in the 72d year of his age. He was born in Connecticut, but came to New York at an early age, and established the dry-goods house of Hopkins, Allen & Co. He organized the Importers and Traders' Bank, of which he was president until 1863. He was also director in the Manhattan Bank and in several insurance companies. In 1865 he became the senior partner in a firm of cotton-merchants.

HORSLEY, CHARLES EDWARD; died in New York, February 27th. He was born in London, December 17, 1825. He studied in Leipzig under Mendelssohn, and came to this country five years ago, when he became organist and choir-master of St. John's Chapel, Trinity Parish, New York, a position he held at the time of his death. He was conductor of the Church Music Association during the latter years of its existence. He wrote a variety of vocal and instrumental music, including symphonies, trios, church compositions, two oratorios, "David" and "Joseph," the cantata of "Comus," and "The Patriot Flag," his last work, written for the Lady Washington Reception.

HUBBARD, JOHN F.; died at Norwich, N. Y., October 5th, at more than 80 years of age. In 1816 he established the *Norwich Journal*. He was elected to the Assembly in 1824 and in 1829, and to the State Senate in 1868.

HUBBELL, LEVI; died at Milwaukee, Wis., December 8th. He was born at Ballston, N. Y., April 15, 1808. He graduated at Union College, and studied law. From 1833 to 1836 he was Adjutant-General of the State, and in 1841 he was a member of the Assembly. In 1844 he removed to Wisconsin, and became a leading Democratic politician. He was elected Judge of the Second Judicial Circuit, and for a year acted as Chief-Justice of the Supreme Court. In 1858 impeachment proceedings were instituted against Judge Hubbell, and the trial resulted in his acquittal. In 1856 he resigned his judgeship, and in 1864 was elected to the Assembly as a War Democrat. From that time he acted with the Republican party. From 1871 to 1875 he was United States District Attorney.

HULL, H. H., editor of the *Bath Courier* for a quarter of a century; died at Bath, N. Y., June 8th.

HUSTON, ANDREW C., a venerable journal-

ist; died in January, at Northumberland, Pa., at the age of 89. He became editor of the *Republican Argus* in his native place in 1809.

HUTCHINSON, SAMUEL; died in Brooklyn, N. Y., June 15th. He was born in Riverhead, L. I., in 1805. He was a well-known citizen of Brooklyn, and was connected with several banks and insurance companies.

IRVING, PIERRE MONROE; died in New York, February 11th, in his 74th year. He was a graduate of Columbia College, and, though bred to the law, gave much of his time to literature. He edited the "Life and Letters" of his uncle, Washington Irving, and in 1866 published "Spanish Papers, and Other Miscellanies."

JACKSON, Captain THOMAS P., Deputy-Collector of Customs; died in Richmond, Va., April 8th. He was a prominent Republican, and had been a member of the Legislature, and of the Reconstruction Convention.

JAMES, DANIEL; died near Liverpool, England, November 27th. He was born in this country in 1801, went to England in 1831, and was a member of the firm of Phelps, James & Co., in Liverpool, and of Phelps, Dodge & Co., of New York.

JEFFRIES, Dr. JOHN, a prominent physician; died in Boston, Mass., July 16th, at the age of 81.

JENKINS, Rev. TIMOTHY; died in Utica, N. Y., May 29th, aged 73 years. He was formerly editor of the *Y Cysfaill*, of Utica, the only Welsh Methodist magazine published in this country.

JOHNS, JOHN, Protestant Episcopal Bishop of Virginia; died April 5th, aged 80.

JOHNSON, Mrs. ANDREW, wife of the late President Johnson; died near Greenville, Tenn., January 15th.

KERR, Colonel JAMES K., a prominent member of the Pittsburg bar, and brother of Hon. M. O. Kerr, late Speaker of the House of Representatives; died in that city, February 25th. He served as a major in the Union army.

KETeltas, EUGENE, one of the oldest residents of New York City, and a descendant of an old Knickerbocker family; died at Newport, R. I., in his 78d year. He studied law, but, inheriting a large estate, and receiving a fortune through his wife, he retired from the profession.

KING, General RUFUS; died in New York, October 18th. He was born in that city, January 26, 1814; was the son of Charles King, once connected with Columbia College, and the grandson of Rufus King, the distinguished statesman. He graduated at West Point in 1838, and received a commission as lieutenant of engineers. In 1836 he resigned from the army, and became an engineer on the Erie Railway. Subsequently he was connected with the *Albany Evening Journal*, and in 1839 became editor of the *Albany Advertiser*, remaining in charge for about six years. He removed to Wisconsin, and edited the *Milwaukee Senti-*

nel from 1845 to 1861, when he was appointed minister to Rome. He returned to this country to enter the army, and commanded a division at Fredericksburg, Groveton, Manassas, Yorktown, and Fairfax. He left the army in 1863, and was reappointed minister to Rome, where he continued until 1867. He was Adjutant-General of New York State from 1839 to 1843.

KINGDOM, JOHN M., formerly of London; died in New York, July 24th. For several years he was connected with the legal profession. He was the author of many plays, including "Marcoretti," "Which is my Husband?" "Three Musketeers," and "Tancred." He also adapted for the American stage Tennyson's "Queen Mary."

KIRBY, TIMOTHY; died in Cincinnati, Ohio, January 10th, at the age of 81. He left an estate worth between two and three million dollars.

KIRWAN, DANIEL JOSEPH; died in New York, November 25th. He was born at Newtonbarry, Ireland, about 1843. He came to this country at an early age, and began his connection with the press during 1868, first on the *World*, and afterward on the *Tribune*. In 1869 he went to England to report the Harvard and Cambridge boat-race, and on his return to this country published a book entitled "Palace and Hovel." Subsequently he became a reporter for the *New York Herald*.

KITCHEN, WILLIAM K.; died in New York, September 21st. He was born in Philadelphia in 1815. He came to New York in 1855, and became a member of the firm of Harrall, Rislley & Kitchen, wholesale druggists. In 1863 he was elected Vice-President and Director of the National Park Bank, and in 1864 was elected president. Mr. Kitchen was a Director of the Queen's (Liverpool) Fire Insurance Company of New York, and also of the Provident Life-Insurance and Savings Company.

KNOX, General JOHN JAY; died at Knoxboro, Oneida County, N. Y., January 31st. He was born in 1791. He was a presidential elector for Harrison in 1840, and of Lincoln in 1860. He was President of the Bank of Vernon for thirty years, and for nearly fifty years was a member of the Board of Trustees of Hamilton College. He was the father of the Hon. John Jay Knox, Controller of the Currency of the United States, and of the Rev. Charles E. Knox, Professor of German in the Newark (N. J.) Theological Seminary.

LAFLIN, LUTHER, the oldest powder-manufacturer in the United States; died at Saugerteries, N. Y., October 19, aged 87 years.

LAMONT, GEORGE D.; died in Lockport, N. Y., January 16th, at the age of 53. He was born in the western part of New York, where he practised law several years. In 1859 he served part of a term in the State Senate, and from 1862 until 1865 was prosecuting attorney of the United States Provisional Court of Louisiana. After practising for a while in

New York, he resumed business in Lockport, and in 1871 was elected Judge of the Supreme Court.

LEFFERTS, Colonel MARSHALL; died while going with the Veteran Guard of the Seventh Regiment of New York to the Centennial Exhibition, July 8d. He was born in Brooklyn in 1820, and was a descendant of one of the old Knickerbocker families. During most of his life he was connected with the telegraph-business. From 1870 till his death he was President of the Gold and Stock Telegraph Company. But it was as colonel of the famous Seventh Regiment of New York that he was most widely known. He was elected colonel of that regiment in 1859, and when the first call for troops was made, in 1861, he left for the seat of war with his command, one thousand strong. The regiment, under Colonel Lefferts, also responded to calls in 1862 and 1863.

LEGGETT, FRANCOIS A., the well-known restaurant and hotel keeper; died in New York, December 20th. He was born in that city in 1819.

LENOX, SAMUEL, one of the oldest Freemasons in New Jersey; died in Trenton, October 19th, aged 94 years. He was a native of Ireland.

LEVERICH, CHARLES P.; died in New York, January 10th. He was born at Newtown, L. I., in 1808. He came to New York at an early age, and was formerly a member of the firm of Leverich & Co., of New York, and was extensively engaged in the cotton and sugar trade of the South. In 1840 he was elected director of the Bank of New York, and for twelve years prior to his death was president. He was also a prominent member of the Clearing-House Committee, and a trustee in the Bleecker Street Savings-Bank, and of several insurance companies.

LOOKWOOD, FREDERICK F., a member of the Produce Exchange in New York; died in that city in February. He was born in Troy, N. Y., in 1827. He came to New York in 1841, and engaged in the transportation business in the Troy Air-Line Company, and in later years was connected with several insurance companies. He had been identified with the Produce Exchange from its organization, and was a prominent Freemason.

LOTTIMER, WILLIAM, one of the oldest merchants of New York; died in that city, October 7th, at the age of 62. He was a native of Glasgow, Scotland.

LYMAN, SAMUEL P., for twenty-seven years Judge of the Probate Court of Northampton, Mass.; died January 4th.

MACDONALD, Rev. J. M., D. D.; died at Princeton, N. J., April 19th. He was born at Limerick, Me., in 1812, and was the son of the late Major-General John Macdonald. He graduated from Union College in 1832, and subsequently from the Divinity School in New Haven, and was ordained to the ministry of the Presbyterian Church in 1835. He was

formerly pastor of the Fifteenth Street Presbyterian Church, N. Y., and for the last twenty-three years had held the pastorate of the First Presbyterian Church of Princeton, N. J. Many of Dr. Macdonald's sermons were published in the *National Recorder*. He was a contributor to the *Princeton Review*, and for the *Bibliotheca Sacra*, for which he wrote his masterly defense of Gibbon. Two years ago he delivered a course of lectures on homiletics at the Boston University. His first book, "Credulity, as illustrated by Successful Impostors in Science, Superstition, and Fanaticism," appeared in 1848. He also published "Key to the Book of Revelation" (second edition, 1848), a short "History of the Presbyterian Church of Jamaica, L. I.," where he was once settled as pastor (1847), "The Book of Ecclesiastes explained" (1856), and a volume of sermons entitled "My Father's House, or the Heaven of the Bible."

MACY, JOSIAH, JR.; died in New York, October 5th. He was born in that city, July 15, 1838, and was the son of William H. Macy, President of the Seamen's Bank for Savings. In 1859 he became a member of the firm of Josiah Macy's Sons, and remained there until 1872, when he was elected Vice-President and Treasurer of the Devoe Manufacturing Company, and about a year later became its president, which position he held at the time of his death. He was also chairman of the Committee on Petroleum of the Produce Exchange, Treasurer of the Hahnemann Homeopathic Hospital, and director in several large insurance and banking companies.

MADDOX, SAMUEL T.; died in Brooklyn, N. Y., November 16th, at the age of 47 years. In 1861 he was elected to the Assembly. He was next appointed to the office of Provost-Marshal of the Eastern District, after which he was a Republican candidate for Congress, but was unsuccessful. He was reelected to the Assembly in 1870, and was nominated for Register of Brooklyn, but was defeated. Soon after, he was appointed Assistant Collector of the Port of New York, and held that office at the time of his death.

MANN, DR. GEORGE, of Newfane, Niagara County, N. Y.; died June 18th, at the age of 71. He had been a practising physician for nearly fifty years.

MARVINE, AROHIBALD ROBERTSON, mineralogist; died in Washington, D. C., in March. He was born at Auburn, D. C., September 26, 1848. He graduated at Harvard College, where he became a tutor. In 1871 he was selected by the university to accompany, as scientist, Commissioners Wade, White, and Howe, to San Domingo, and made an elaborate report on the minerals of the island. He was subsequently attached to Hayden's exploring expedition in the West.

MATTHEWS, JULIA; died at St. Louis, Mo., May 19th, aged 80 years. She was born in London, and made her first appearance on the

stage when very young. She was a popular singer in *opéra-bouffe*. In 1875 she made her *début* in this country at Wallack's Theatre, New York.

MOELROY, Rev. Dr. JOSEPH; died in New York, September 16th, in his 84th year. He was born in Northumberland County, Pa.; graduated at Jefferson College, and for fifty years occupied the pulpit of the Scottish Presbyterian Church in New York.

MILLER, J. WARREN, for some years connected with the staff of the *New York Tribune*; died in England, December 26th. He began the publication in London of a paper called *The States*, but it was unsuccessful.

MONELL, Judge CLAUDIUS L.; died at Narragansett Pier, R. I., August 1st. He was born in Hudson, N. Y., in 1815, and was a son of the Hon. J. W. Monell. He was admitted to the bar; came to New York in 1851, and organized the firm of Monell, Wellard & Anderson. He was elected to the Superior Court in 1861, 1867, and 1873, and became Chief-Justice.

MOORE, JOSEPH G., United States consul at Trinidad; died July 25th.

MOORE, TREDWELL; died at Fort Gibson, Indian Territory, May 28th. He graduated at West Point in 1847, and was promoted to be brevet second-lieutenant in the Eighth Infantry. He served in the war with Mexico, went on a voyage to California, and was on frontier duty until 1851. From 1858 to 1855 he was engaged in exploring the Coast Range Mountains. He served as aide-de-camp to General Wool from 1854 to 1855, and did good service at Fort Ripley, Minn., in 1856. In 1859 he was appointed captain and assistant-quartermaster, in 1865 was special inspector in the Quartermaster's Department, in the Military Division of the Tennessee; in 1866 he was promoted to the rank of major, and a few years later to be Lieutenant and Deputy Quartermaster-General of the Army.

MOWETT, JAMES ALEXANDER, editor of the *Commonwealth*; died at New Haven, Conn., March 11th.

MURPHY, Brevet Brigadier-General JOHN K.; died in Philadelphia, February 10th, in his 80th year. He began his military career as a private in the War of 1812. At the breaking out of the late war General Murphy raised a regiment, and covered the retreat of Banks's division at the battle of Winchester, when he was taken prisoner. In 1862 he was exchanged, and returned to the command of his regiment. Soon after he was ordered to the Veteran Reserve Corps, in which he served until the close of the war.

NYE, General JAMES W.; died at White Plains, N. Y., December 25th. He was born in Madison County, N. Y., in 1815. At one time he was District Attorney, and subsequently County Judge of that county. He was an unsuccessful candidate for Congress in 1848, and was the first President of the Metropolitan Police Board of New York City. In 1861 he was

appointed by President Lincoln Governor of Nevada Territory, and after the admission of Nevada into the Union he was chosen United States Senator for the term beginning in 1865 and ending in 1867. In 1867 he was reelected for six years.

OATMAN, Dr. JOEL S., a well-known physician of New York; died in that city, October 2d, aged 69.

OLDEN, CHARLES S.; died at Princeton, N. J., April 7th. He was born in 1797, at Stony Brook. From 1845 to 1851 he served in the State Senate, and in 1859 was elected Governor of New Jersey by the Republicans.

PALMER, WALTER B.; died in New York, October 31st, at the age of 43. In 1870 he was made cashier of the Tenth National Bank, and in 1872 president, which office he held at the time of his death.

PARSONS, EDWARD YOUNG; died at Washington, D. C., July 8th. He was born at Middletown, Ky., December 12th, 1842. He graduated at the university at Louisville in 1861, and at the Louisville Law School in 1865. In 1874 he was elected to Congress as a Democrat, and was a member of the Committees on Private Land Claims, and on Coinage, Weights and Measures.

PECK, GEORGE, D. D., a venerable member of the Methodist Church; died at Scranton, Pa., May 21st, aged 79 years. He began preaching at the age of eighteen, and went to the Wyoming Valley when it was sparsely peopled. He was the author of several works, including a "History of the Wyoming Valley." In 1848 he became editor-in-chief of the *Christian Advocate*.

PECKHAM, FELIX AUGUSTUS, a well-known artist; died at Newport, R. I., January 31st.

PENNOCK, Rear-Admiral ALEXANDER M.; died at Portsmouth, N. H., September 20th. He was born in Virginia in 1818. He entered the navy in 1828, became commander in 1855, captain in 1863, commodore in 1863, and rear-admiral in 1872. He took part in the Paraguay Expedition of 1859-'60, was lighthouse-inspector in 1861, and joined the Mississippi squadron as fleet-captain in 1862, remaining until 1864. In 1868-'69 he commanded the Franklin, flag-ship of the European squadron.

PERRIN, ROBERT P., President of the Butchers and Drovers' National Bank, New York; died in Brooklyn, N. Y., April 14th, in the 61st year of his age.

PETERS, THEODORE C.; died in Brooklyn, N. Y., May 8th, at the age of 71 years. He was for many years an active member of the State Agricultural Society, and was its president in 1845. He represented Genesee County in the Assembly in 1852 and 1853. In 1859 he was appointed State Assessor, and held that office till 1865.

PHELPS, PHILIP, Deputy State Controller; died in Albany, N. Y. He was born in Coeymans, July 4, 1789. He was admitted to the bar in 1811, and, at the commencement of the

War of 1812, was employed in the Quartermaster-General's Department. In 1826 he entered the Controller's office, and, except for the first two years, was Deputy-Controller till the time of his death. In 1869 he retired, at the age of 80, retaining the title and salary by a special act of the Legislature.

POLK, TRUSTEN; died at St. Louis, April 16th. He was born in Delaware in 1811, graduated at Yale College in 1831, and began to practise law in Missouri about 1835. He was elected Governor of the State in 1856; but soon after his inauguration, in January, 1857, he was elected to the United States Senate, from which he was expelled in January, 1862, for disloyalty.

POPE, Commodore JOHN; died at Dorchester, Mass., January 14th, at the age of 77 years. He was born in Massachusetts. He was appointed midshipman in the navy in 1816, and ten years later was raised to a lieutenantcy. In 1827 and 1828 he saw active service on the old frigate Constitution in the Mediterranean. He was on duty in different parts of the world, became a commander in 1843, and was commissioned captain in 1855 and commodore in 1862. In 1864 and 1865 he was prize commissioner in Boston, and from 1866 to 1869 was lighthouse-inspector.

PRAY, EBENEZER H., known as the "Westchester Millionaire;" died at White Plains, N. Y., March 17th. He was a native of Dutchess County, N. Y. For thirty years he was engaged in the cattle-trade and provision-business, and was a member of the New York Produce Exchange from its organization in 1861 till 1872. He was a pioneer of the Western cattle-trade, and in 1850 he became a member of the firm of Halstead, Chamberlain & Co., packers, now Halstead & Co.

QUACKENBUSH, Dr. JOHN V. P.; died in Albany, N. Y., June 7th. He was born in that city, June 8, 1819. He graduated from Williams College, Mass., and in 1842 from the Albany Medical College. In 1852 he was elected President of the Albany County Medical College, and in 1868 of the State Medical Society; during the late war he held the position of Surgeon-General of the State. In 1856 he was elected Mayor of Albany by the Democrats, but after a contest in the courts his opponent was installed. Dr. Quackenbush was defeated for the same office in 1868. At the time of his death he was connected with the Albany City and St. Peter's Hospitals, and was also Professor of Obstetrics in the Medical College.

RAWLINS, J. H., a member of the Pennsylvania House of Representatives; died at Hollidaysburg, Pa., February 26th.

REED, WILLIAM BRADFORD; died in New York, February 18th. He was born in Philadelphia, June 30, 1806. He graduated at the University of Pennsylvania in 1822, where at one time he was Professor of English Literature. He practised law, and in 1838 was elected Attor-

ney-General of the State. In 1857 he was appointed minister to China, and negotiated the treaty ratified in 1861. In 1847 he published the "Life and Correspondence" of his grandfather, Joseph Reed, of Revolutionary fame. He also edited the posthumous works of his brother Henry. He published numerous historical addresses and political pamphlets, and a memorial of Thackeray, and was for some time American correspondent of the London *Times*.

RICHARDSON, Rev. MARVIN; died at Poughkeepsie, N. Y., June 15th. He was born in 1788. In early life he joined the ministry of the Methodist Episcopal Church. At the time of his death he was the oldest member of the New York Conference, having joined it in 1809.

RICHARDSON, ex-Governor O. D.; died at Omaha, Neb., November 29th, at the age of 81 years.

RIDER, JAMES, was born at Jamaica, L. I.; died there, April 29th, aged 79 years. In 1855 he was Representative in the Legislature, and Senator in 1856 and 1857. He was also an active member of the State and County Temperance Societies.

ROBINSON, WILLIAM S., best known by his *nom de plume* of "Warrington;" died at Malden, Mass., March 11th. He was born at Concord, Mass., December 7, 1818. He edited a Whig paper in that town, and, after removing to Lowell, wrote for the *Courier and American*. Subsequently he became connected with several of the Boston journals. He acted with the Free-Soil party; was a member of the Massachusetts Legislature in 1852 and 1853, and in the latter year was a secretary of the Constitutional Convention. In 1862 he was chosen Clerk of the House of Representatives, holding the position eleven years. During this time he wrote regularly for the *Springfield Republican*. He was an authority on parliamentary law, and in 1875 published "Warrington's Manual."

ROGERS, Rev. Dr. FERDINAND, the oldest resident presbyter in the diocese of Central New York; died near Norwich, N. Y., January 18th, at the age of 60 years. He was a native of New York State. He was ordained to the ministry of the Protestant Episcopal Church in 1837; took charge of his first parish at Brownsville, where he remained until 1846, when he accepted a rectorship in Greene, N. Y., occupying that position until his death. He received the degree of Doctor of Divinity from Hobart College in 1866, and was a trustee of the General Theological Seminary in New York.

ROOSEVELT, Mrs. CORNELIA, wife of Judge Roosevelt, of New York; died in Paris, February 14th. Her father, Cornelius P. Van Ness, was, in her youth, Governor of Vermont, United States Senator, and minister to Spain. From the time of her marriage until her death she was known at home and abroad as one of

the most accomplished of American ladies. During the war she was intensely patriotic, and her house was the centre of social life for distinguished strangers, foreign diplomats, and officers, and in more than one instance was the Government indebted to her for information in regard to our foreign relations. She was also active in charitable undertakings, and delighted to relieve suffering and distress.

RUTHERFORD, General GEORGE V.; died at St. Helena, Cal., August 28th. He was born in Rutland, Vt., in 1830. He was admitted to the bar, and was appointed a superintendent of the construction of telegraph lines in the Southern States. In 1861 he was appointed Assistant Quartermaster-General for the State of Illinois, and he afterward filled a similar position in the Government service. In 1872 he removed to Northampton, Mass., where he was engaged in the manufacturing business.

SAYEE, Dr. DAVID M.; died in Newton, N. J., August 8d, where for forty years he had been a prominent physician.

SEARING, JOHN A.; died at Mineola, L. I., May 6th. He was born at North Hempstead in 1814. In 1848 he was elected Sheriff of Queen's County. In 1858 he was a Representative in the Legislature, and in 1864 and 1865 was a Democratic Representative in Congress.

SEARS, EDWARD J., LL. D.; died in New York, December 7th. He was for many years the editor of the *National Quarterly Review*. He was also identified with many of the educational movements of the city of New York.

SEIBERLING, JOHN; died in January. He was appointed postmaster at Lynnvile, Lehigh County, Pa., February, 1820, and held that position until his death.

SELDEN, SAMUEL LEE, LL. D.; died at Rochester, N. Y., September 20th. He was born at Lyme, Conn., October 12, 1800. When about twenty-five years of age he began to practise law in Rochester, N. Y.; was Chancery Clerk and first Judge of Common Pleas in Monroe County for many years, and in 1847 he was elected Justice of the Superior Court. In 1856 he was elected Judge of the Court of Appeals, which position he resigned in 1864.

SEWARD, Major AUGUSTUS H., eldest son of the late Hon. William H. Seward; died in Montrose, N. Y., September 11th. He graduated at West Point, received a second-lieutenancy in 1847, and passed through the different grades to the rank of major in 1861. He was a paymaster for many years, and received the brevet of colonel in the volunteers in 1865.

SHANDLEY, EDWARD J.; died in New York, in July. He began his political life in New York City while officiating as Clerk of the Marine Court, and subsequently became an active supporter of William M. Tweed. In 1863 he was elected police-justice by the Democrats. He was elected a second term, but served only four years, when he was legislated out of office. In 1871 he was nominated for Register,

but was defeated. In 1874 he was elected an alderman, his term expiring in 1876. At the time of his death he occupied the position of appraiser in the Surrogate's office.

SHELTON, JOHN T., Treasurer of the New York, New Haven & Hartford Railroad; died at Bridgeport, Conn., September 16th, aged 41 years.

SHIRLEY, Commodore PAUL; died November 24th. He was born in Kentucky, entered the navy in 1839, and was lieutenant at the outbreak of the civil war. He was stationed in the Pacific, became lieutenant-commander in 1862 and commander in 1863, and captured the privateers J. M. Chapman and Colon. He became captain in 1870.

SHOEMAKER, JOHN L., Solicitor to the United States Centennial Commission; died in Philadelphia, December 26th.

SICKELS, JOHN BARRETT, a representative of one of the oldest families in New York; died in that city, March 10th. He was born in New York, February 1, 1798. He took part in the War of 1812, and was subsequently engaged in various mercantile pursuits.

SMITH, AVERY; died at Newark, N. J., December 26th, in his 62d year. He was born at North Salem, N. Y., was for twenty years engaged in the wholesale grocery-trade in New York, and was associated with P. T. Barnum in the circus and menagerie business.

SMITH, EDWARD P.; died in June, at Accrea, on the west coast of Africa, where he was engaged in missionary labors. He was born in South Britain, Conn., in 1827. He graduated at Yale College in 1849, and at Andover Theological Seminary in 1858. After the war he aided in establishing schools for freedmen in the South, and in 1871 became an Indian agent. He was appointed Commissioner of Indian Affairs in 1873, and in December, 1875, was chosen President of Howard University in Washington.

SMITH, ex-Governor JAMES Y.; died in Providence, R. I., March 26th, in the 67th year of his age. He had been for many years one of the most prominent men in Rhode Island, and controlled extensive manufacturing enterprises, besides holding positions of trust in banking and other corporations. He was elected to the Legislature in 1843, and was several times reelected. He was Mayor of Providence, 1845-'47. In 1868 he was elected Governor by the Republicans, in 1864 was renominated and defeated, but in 1865 was reelected with practically no opposition.

SNELL, Prof. EBENEZER L.; died at Amherst, Mass., September 18th. He graduated from Amherst College in 1821, and was connected with that institution up to the time of his death.

SPARKMAN, JAMES D.; died at Perth Amboy, N. J., June 3d, aged 72 years. He was one of the original settlers of Williamsburgh, N. Y. In 1857 he became President of the Manufacturers' Bank, and held that position

for ten years. Subsequently he became President of the Firemen's Fund Insurance Company of New York, which office he held at the time of his death.

SPAULDING, Judge ALEXANDER; died in New York, February 20th. During the administration of Andrew Johnson he was Collector of Internal Revenue in New York City. In 1871 he was elected Judge of the Marine Court, and in 1873 was nominated for Judge of the Superior Court, but was defeated.

SPROAT, Colonel MORGAN L., a prominent member of the old State militia, and Street Commissioner of Middletown, Mass.; died there, December 28th, aged 72 years.

STARKEWEATHER, HENRY H.; died in Washington, D. C., January 28th. He was born in Preston, Conn., April 29, 1826. He practised law in Norwich, Conn., and in 1856 was elected to the Legislature by the Know-Nothing party. For several years he was chairman of the State Committee of that party, and became a member of the National Republican Executive Committee. In 1861 he was appointed Postmaster of Norwich, but in 1866 tendered his resignation to President Johnson, as an indication of disapproval of the latter's course. In 1867 he was elected to Congress by the Republicans, and was four times reelected.

STARR, CHANDLER; died at Stamford, Conn., in July. He was born at Warren, Conn., January 11, 1791. He removed to Albany, N. Y.; in 1823 was elected a member of the Common Council, and in 1829 was a Representative in the Legislature. In 1840 he was elected to the office of Bank Commissioner, which he held four years. In 1845 he removed to Brooklyn, where he was elected President of the City Bible Society, and also of the Brooklyn Athenæum. He was afterward a manager of the American Bible Society.

STEARNS, Dr. WILLIAM AUGUSTUS; died at Amherst, Mass., June 8th. He was the son of the Rev. Samuel Stearns, of Bedford, Mass., and was born there in 1805. He graduated at Harvard College in 1827, and became President of Amherst College in 1854. He was the author of several religious works, and was a frequent contributor to religious periodicals.

STOCKTON, RICHARD; died at Princeton, N. J., April 4th. He was born there in 1823. He was the son of the late Commodore Richard F. Stockton, and grandson of Richard Stockton, one of the signers of the Declaration of Independence. He graduated at Princeton College in 1843, and was subsequently admitted to the bar. He was Auditor, and afterward Treasurer, of the Camden & Amboy Railroad Company.

STRATTON, J. WILLIS, a prominent manufacturer of Newburg, N. Y.; died there, March 17th.

TENNEY, SARAH M. BROWNSON; died at Elizabeth, N. J., October 30th. She was born at Chelsea, Mass., June 7, 1839, and was the

only daughter of Dr. Orestes A. Brownson, and became the wife of William J. Tenney. She was a lady of fine literary attainments, and inherited much of her father's power of analysis. She was the author of "Marian Elwood, or How Girls Live" (1859); "At Anchor" (1865); "Life of Demetrius Augustine Gallitzin, Prince and Priest" (1873).

THEBAUD, DR. JULIUS S.; died in New York, October 30th. He was born at Morristown, N. J., October 28, 1827. For several years he worked indefatigably in the London, Paris, and Vienna hospitals. In 1851 he returned to New York, and achieved great success in the treatment of complicated surgical cases, notably in lithotomy. He was connected at different times with nearly all the hospitals in the city. He was also attached to the Catholic Orphan Asylum, the Foundling Asylum, St. Vincent's Hospital, and the Colored Home. He invented several surgical instruments, and also wrote on surgical subjects.

THOMAS, ex-Governor FRANCIS, was killed by a train at Frankville, Md., January 22d. He was born in Frederick County, Md., February 3, 1799. He was admitted to the bar in 1820, and was a member of the Maryland Legislature in 1823 and 1827, and Speaker of the House in 1829. He was a member of Congress from 1831 to 1841 and from 1861 to 1869, Governor of Maryland from 1841 to 1844, and a member of the State Constitutional Convention in 1850. During the war he supported the Union cause, raised a volunteer brigade of 3,000 men, and in 1866 was a delegate to the Loyalists' Convention. In 1870 he was appointed Collector of Internal Revenue for the Cumberland district, and in 1872 was appointed minister to Peru.

TILDEN, MOSES Y., elder brother of Samuel J. Tilden; died at Lebanon Springs, N. Y., September 9th, aged 64 years. He was elected to the Legislature in 1869, and distinguished himself mainly by his persistent opposition to the Tweed "Ring." He, with the cooperation of his brother, built the Lebanon Springs Railroad, but the enterprise has not proved successful.

TOOMATH, REV. JOHN, "the blind preacher;" died in Brooklyn, N. Y., March 18th. He was born in Ireland, and came to this country fifteen years ago. He was connected as a missionary with a Baptist church in Brooklyn.

TRACY, PHINEAS L.; died at Batavia, N. Y., December 23d. He was born in Norwich, Conn., December 25, 1786. He graduated at Yale College in 1806, and began the practice of law in Batavia in 1818. In 1826 he was elected to Congress on the Antimasonic ticket, and reelected for the two succeeding terms, but declined a reelection. In 1841 he was appointed Presiding Judge of Genesee County, N. Y., and continued in that office until 1846, when he retired from professional life.

TREADWELL, JOHN P.; died at New Milford, Conn., April 8th. He began his business car-

reer in the old Franklin House, New York, and in 1858 he, in company with the Ackers, of Albany, became proprietor of the St. Nicholas Hotel, New York, with which he remained connected till 1863.

TRENHOLM, GEORGE A.; died in Charleston, S. C., December 10th, aged 70 years. At the outbreak of the war he was a prominent merchant of Charleston. In 1864 he was appointed Confederate Secretary of the Treasury, and held that office till the fall of the Confederacy. He was taken prisoner by the Union troops and held till October, 1865, when he was pardoned by President Johnson.

TUFTS, CHARLES; died at Somerville, Mass., December 24th, aged 95. He was a liberal friend of education, and gave seventy acres of land as a site for the college which bears his name in Medford, Mass.

TYLER, General JOHN S.; died in Boston, Mass., January 20th, aged 80 years. He entered the army during the War of 1812, and for nearly sixty years took a great interest in the militia of Massachusetts.

TYLER, MORRIS; died in New Haven, Conn., October 31st, at the age of 70 years. He was mayor of the city in 1863-'64, and Lieutenant-Governor of the State in 1871 and 1872.

UNDERWOOD, JOSEPH R.; died near Bowling Green, Ky., August 23d. He was born in Goochland County, Va., October 24, 1791. He was educated at the University of Kentucky, at Lexington, after which he studied law. In 1818 he served as lieutenant of a volunteer company, and was wounded and taken prisoner at Dudley's defeat. After his release he settled at Glasgow, Ky., where he practised law for ten years. He was a member of the Legislature from 1816 to 1819, in 1825 and 1826, and was Speaker of the House in 1846. He was Judge of the Court of Appeals from 1828 to 1835, when he was elected to Congress, where he served till 1843. In 1847 he was elected to the United States Senate, and after the expiration of his term of six years resumed the practice of his profession. He again served in the Legislature in 1861, and in 1864 was a delegate to the National Democratic Convention in Chicago.

VANATA, Rev. Father ALOYSIUS, pastor of St. Joseph's Church, Jersey City Heights; died January 22d, in the 54th year of his age. He was born in Palermo, Sicily, and came to this country in 1850.

VANDERPOOL, Dr. JAMES; died at Yokohama, Japan, in January. He graduated at Williams College, Mass., and received his medical degree from the College of Physicians and Surgeons of New York City.

VAUGHN, O. A. J.; died at Laconia, N. H., April 30th. He was police-justice of that place, and editor of the *Laconia Democrat*. He was at one time State Senator, and Judge of the Probate Court of Belknap County.

VERMILYE, WASHINGTON R., senior member of the firm of Vermilye & Co., bankers, New

York; died at Englewood, N. J., December 28d. He was born in New York in 1809. He joined the Seventh Regiment in 1832, and was a member of the Veteran Association at the time of his death. He became captain in 1842, major in 1843, and colonel in 1844, and was also colonel of the Veteran Association. In the three months' campaign of 1862 he enlisted as a private in the Eighth Company. He was a director in various corporations, was a member of the Board of the American Bible Society, and of the Presbyterian Board of Foreign Missions, and President of the Greenwich Savings-Bank.

VORIES, HENRY M.; died at St. Joseph, Mo., October 30th. He was Judge of the Supreme Court of Missouri.

WARREN, EDWARD J.; died at Washington, N. C., December 10th. He was born in Vermont, December 23, 1826. In 1846 he graduated at Dartmouth College, and was subsequently admitted to the bar of Beaufort County, N. C. In 1866 he served as a member of the State convention, and was for several terms a representative in the Legislature. He was Judge of the Superior Court of North Carolina from the close of the war until 1868, and Speaker of the Senate in 1871-'72.

WARREN, Colonel HENRY J., a prominent ship-builder of Pownal, Me.; died August 12th.

WASHBURN, ISRAEL; died at Livermore, Me., September 1st, nearly 92 years old. He was the father of ex-Governor Israel Washburn, of Maine, Elihu B. Washburn, minister to France, and ex-Governor Cadwalader C. Washburn, of Wisconsin.

WATKINS, General N. W.; died at Morley, Mo., aged 81 years. He was a half-brother of Henry Clay. He was considered the oldest practising lawyer in the United States, and had served in the Missouri Legislature.

WEBSTER, General J. D.; died in Chicago, Ill., March 12th. He was born at Old Hampton, N. H., August 25, 1811. He graduated at Dartmouth College in 1832. In 1838 he was appointed a lieutenant of topographical engineers. After serving in the Mexican War he resigned from the army in 1854, and went into mercantile business in Chicago. He reentered the army in 1861, and had charge of the fortifications at Cairo, Ill. He became colonel of the First Regiment Illinois Artillery, and took part in the capture of Forts Henry and Donelson. He had charge of all the artillery at Shiloh, was made chief of staff to General Grant and afterward to General Sherman, and was brevetted a major-general of volunteers.

WHEE, Colonel THOMAS B., of the Seventh Cavalry, better known as General Custer's regiment; died in New York, December 9th, aged 38 years. He graduated at the Michigan University, and on the breaking out of the late war served as an officer of the Third Michigan Cavalry. At the close of the war he accepted a commission in the regular army. His participation with General Custer in the

campaign against Sitting Bull impaired his health, and he was ordered to take charge of the cavalry recruiting-office in New York.

WEST, Captain STEPHEN W.; died at Stapleton, S. I., March 5th. He was born in New Bedford, Mass., November 26, 1794. He was a veteran of the War of 1812, and was connected with the American squadron on Lake Erie. During the latter part of the war he was incarcerated in Dartmoor Prison, England. After the close of the war he became attached to various merchant-vessels plying between New York and Liverpool and between New York and Savannah, and about 1880 he retired from sea-life. During the Revolution in Spain, Captain West had charge of an American vessel loaded with grain for the Spanish Government, but upon entering port he was seized by the revolutionists, cast into prison, and condemned to death, but the intervention of an English frigate, which arrived before the time of the execution, saved his life. He became a stevedore and rigger in New York, superintended the launching of the Washington, thirty years ago, and assisted in building the bridge over the Harlem River. He retired from active business-life about fifteen years ago.

WETMORE, PROSPER MONTGOMERY; died at Great Neck, L. I., March 16th. He was born in Stratford, Conn., in 1798. While engaged for several years in mercantile pursuits in New York City, he wrote for magazines, and published "Lexington, with Other Fugitive Poems," in 1830. In 1832 he delivered a poem on "Ambition" before a literary society in New York, and in 1838 edited a volume of poems of James Mack. He also published in 1847 "Observations on the War with Mexico." He became Regent of the University of the State of New York in 1833, and was also a member of the New England Society. In 1834 and 1835 he was a Representative in the State Legislature, and chairman of the Committee on Colleges and Academies. He founded the Merchants' Clerks' Savings Institution, was a member of the New York Historical Society, and became President of the American Art Union, a position he held until 1850. In 1838 he was elected a member of the Chamber of Commerce, in 1848 was chosen secretary, and in 1849 was made vice-president. He was largely instrumental in the formation of the Union Defense Committee in 1861, and was elected its secretary, which position he held until the close of the war.

WHALLEY, WILLIAM H.; died in New York, April 7th, about 40 years of age. He came to this country from Ireland, and became an actor. He acted frequently in the South and West. For about five years he held a leading position in the Boston Museum, and afterward in the Bowery Theatre, New York. He was a favorite in such characters as *Othello*, *Macbeth*, *William Tell*, and others.

WHEATLEY, WILLIAM; died in New York, November 8d. He was born in that city, De-

ember 5, 1816. He first appeared on the stage at the Park Theatre in New York in 1826, as *Albert* in "William Tell," and for several years continued to act in juvenile parts. He became favorably known in New York and Philadelphia for his excellent representations of *Doricourt* in "The Belle's Stratagem," *Rover* in "Wild Oats," *Captain Absolute* in "The Rivals," *Claude Melnotte* in the "Lady of Lyons," *Henri de Legardere*, and of many other characters. He was associated in the management of the Arch Street Theatre in Philadelphia from 1858 to 1861, and was lessee of Niblo's Garden in New York from 1865 to 1868, during which time the famous "Black Crook" was first produced and had its long run.

WHEELER, Rev. Dr. AMOS D.; died in Topsham, Me., June 28th, aged 73 years. He graduated at Williams College, Mass., in 1827. In 1835 he was ordained over the Unitarian Church in Standish, and in 1839 was settled over the Unitarian Society in Topsham. In 1867 he became Secretary of the Maine Conference of Unitarian Churches. He was a member of the Maine Historical Society and of its Standing Committee, was connected with Bowdoin College, and received from it the degree of Doctor of Divinity in 1860.

WHIPPLE, Rev. GEORGE, D.D.; died in Brooklyn, N. Y., October 6th. He was born in Albany, N. Y., June 4, 1805. He graduated at the Lane Theological Seminary, and, after being ordained as a Congregational clergyman, he became professor in Oberlin (Ohio) College. Subsequently he was chosen Secretary of the American Missionary Association, which position he held nearly thirty years.

WILLIAMS, A.; died in San Francisco, January 20th, aged 79 years. He was formerly Mayor of Oakland, Cal.

WILLIAMS, JOHN S.; died in New York, November 14th. He was born in New York, in 1814. He became engaged in the commission-business with Stephen B. Guion, under the firm-name of Williams & Guion, who for many years have been favorably known as the owners of a line of passenger-steamers between New York and Liverpool. About twenty-five years ago Stephen B. Guion took charge of the business in Liverpool. His brother, William H. Guion, became a member of the firm, and devoted his attention to the New York branch of the business. Mr. Williams was a prominent member of the New York Produce Exchange.

WILLIAMS, WILLIAM; died at Buffalo, N. Y., September 10th. He was born at Bolton, Conn., September 6, 1815, and in 1839 removed to Buffalo. For fifteen years he was a director of the Michigan Southern Railroad Company, and at the time of its consolidation with the Lake Shore Railroad Company was president of the Erie division of the latter. He was also for a time second vice-president of the Lake Shore & Michigan Southern Railroad Company.

In 1873 he was chosen managing director of the Buffalo, New York & Philadelphia Railroad. He was a prominent Democrat, and was elected to the State Assembly in 1866 and 1867, and to Congress in 1870.

WILSON, JOHN; died in Washington, January 10th, aged 68. He was Commissioner of the General Land-Office from 1852 to 1856, and in 1864 became Third Auditor of the Treasury, which position he held for several years.

WINSLOW, HENRY C., a well-known ship-owner and commission-merchant of Buffalo, N. Y.; died there, December 14th.

YOUNG, Rev. JOHN H., D. D., formerly pastor of the Congregational Church at Laconia, N. H.; died there, January 29th, at the age of 75.

OBITUARIES, FOREIGN. ACERENZA-PIGNATELLI, JOHANNA MARIA, Duchess of, born in 1783; died April 14, 1876. She was the last surviving daughter of Peter, the last Duke of Courland. In her seventeenth year she married the Neapolitan Duke Acerenza, of the family Belmonte Pignatelli, with whom she lived an unhappy life. She was known and beloved by all who knew her for her great goodness of heart. During her long life she counted among her intimate friends some of the greatest minds of Europe, among them Goethe, and Louise, Prussia's great queen.

AMBERLEY, JOHN, Viscount, a British statesman, the oldest son of Earl Russell, born December 10, 1842; died January 10, 1876. He was educated at the University of Edinburgh, and was in Parliament for Nottingham from 1866 to 1868, where he acted with the Liberals. He was married in 1864 to Catharine Louisa, daughter of Lord Stanley of Alderley, who died in 1874. He had been engaged for some time previous to his death upon a work entitled "An Analysis of Religious Belief," which was published shortly after his death, and created considerable excitement. As his publisher states, the work beyond about three-fifths of its first volume has not had the benefit of the author's final correction, either as to thought or style. The idea of the work is to trace out and compare the various external manifestations of the religious sentiment among the various races of mankind; and then to inquire what common element, if any, they exhibit. After giving, in the first part, an examination of Confucianism, Buddhism, Taoism, Parseeism, Mohammedanism, and Christianity, with short sketches of the founder of each of these religions, his life, work, and doctrines, Lord Amberley asks himself these three questions: 1. Are there in the several religions of mankind any common elements? 2. If so, are those common elements a necessary and therefore permanent portion of our mental furniture? And, 3. If so, are those elements the correlatives of any actual truth, or not? To each of these questions Lord Amberley returns an affirmative reply.

ANDLAW, FRANZ XAVER VON, a German di-

plomatist, born October 6, 1799; died September 4, 1876. He studied law in the Universities of Freiburg, Landshut, and Heidelberg, entered the service of Baden in the Foreign Department in 1824, was secretary of legation in Vienna from 1826 to 1830 and from 1832 to 1835; went to Munich as minister resident in 1838, to Paris in 1843, and to Vienna as extraordinary ambassador in 1846, and retired from the service in 1856. He was the author of "Erinnerungsblätter aus den Papieren eines Diplomaten" (1857), "Mein Tagebuch, 1811-'61" (2 vols., 1862), "Die Frauen in der Geschichte" (2 vols., 1861), and "Die Byzantinischen Kaiser, ihre Palast- und Familiengeschichten" (1868).

ANDRASSY, ETEKA, Countess, born in 1800; died November 10, 1876. She was the mother of Count Julius Andrassy, the celebrated Austrian statesman.

ANGELIN, NILS PETER, a Swedish naturalist; died February 13, 1876. He was the superintendent of the paleontological collections in the Royal Swedish Museum, and the author of numerous works on paleontology.

APFALTERN, IWAN, Freiherr APFALTER VON, an Austrian peer and jurist, born in 1803; died July 17, 1876. He was a life-member of the Austrian Herrenhaus, and substitute of the President of the Imperial Court, and had been President of the Senate of the Supreme Court.

APPONYI, RUDOLF, Count, an Austrian diplomatist, born in 1812; died June 2, 1876. He was successively secretary of legation in Paris, envoy extraordinary in Turin, Munich, and London, and ambassador in London. In 1872 he was appointed ambassador, which position he resigned a short time before his death. He was a Privy Councillor, Imperial Chamberlain, and Knight of the Golden Fleece.

ARBUTHNOT, WILLIAM, a British general, born in 1786; died December, 1876. He was a son of the seventh Viscount of Arbutnot, entered the army in 1804, was present at the passage of the Douro, and the battles of Oporto, Talavera, and Busaco. He retired on full pay as lieutenant-colonel. At the time of his death he was a Deputy-Lieutenant of Kincardineshire.

ARCHIBALD, SIR THOMAS DICKSON, a British jurist, born in 1817; died in London, October 18, 1876. He was educated in Nova Scotia, where his father held an office. He was called to the bar at the Middle Temple in 1852, having for some years previously practised as a special pleader. He first joined the Northern, but shortly after changed to the Home Circuit, of which he remained a member until the date of his appointment to a judgeship in the Court of Queen's Bench in November, 1872. In February, 1875, on a vacancy occurring in the Court of Common Pleas, he was, at his own request, transferred from the Queen's Bench to that court. He held the appointment of Counsel to the Treasury from 1868 to 1872,

and in that post, as well as in the office of judge, he succeeded Sir James Hannen.

ARCONATI-VISCONTI, Marquis, an Italian geographer, born in 1840; died February 25, 1876. He had contributed much to the promotion of the study of geography in Italy. He was the last of his family.

ARMILLAN, JAMES CRAWFORD, Lord, a British lawyer, born in 1805; died in September, 1876. He was called to the bar in Scotland in 1829, and was Solicitor-General for Scotland from 1853 to 1855.

ARMITAGE, SIR ELKANAH; died November 26th. He had held the offices of Mayor of Manchester, and High-Sheriff of Lancashire, where he was one of the leaders of the Liberal party.

ARNDT, HARTMUTH, the son of the German poet Ernst Moritz Arndt, born March 26, 1824; died March 26, 1876. He showed in early years a decided taste for farming, and in 1853 emigrated to the United States, where, after living for a time in Texas and Florida, he finally settled in Wyandotte County, Kansas.

BAGRATION-MOUCHRANSKY, Prince, a Russian nobleman; died January 29, 1876. He was the representative of a noble family, the members of which have been conspicuous in the armies and cabinets of Russia.

BAKER, THOMAS, a British naval officer, born in 1807; died October 10, 1876. He had been many years in the service, and had held the office of Chief Inspector of Machinery at Chat-ham Dock-Yard. He retired from the service on July 6, 1869. On June 2, 1869, he was created a C. B. He was also a Knight of the Legion of Honor, and of the fifth class of the Turkish order of the Medjidie.

BARDSLEY, SIR JAMES LENNOX, a British physician, born in 1801; died July 10, 1876. Having graduated M. D. at Edinburgh, he settled at Manchester, where he became consulting physician to the Manchester Infirmary. He was a Fellow of the Royal College of Physicians of London. At the time of his death he held the offices of deputy-lieutenant and magistrate for Lancashire. He was the author of "Hospital Facts and Observations," and had contributed several articles to the "Cyclopædia of Practical Medicine."

BARROW, SIR GEORGE, a British baronet, born in London, October 22, 1806; died February 27, 1876. He was educated at the Charterhouse, and was appointed assistant junior clerk in the Colonial Office in 1825. He was promoted to be assistant clerk in 1836, senior clerk in 1843, and chief clerk in 1870. He was appointed registrar and secretary of the order of St. Michael and St. George on the reconstruction of the order in 1869. He succeeded to the baronetage on the death of his father in 1848, and was created a C. M. G. in 1874.

BAUMSTARK, ANTON, a German philologist, born April 14, 1800; died March 23, 1876. He studied in the University of Heidelberg, was appointed professor in the gymnasium in

Freiburg in 1823, and in 1836 Professor of Classical Philology in the University of Freiburg, in which position he remained up to his death. He was the author of the following works: "Prolegomena in Orationem Demosthenis adversus Phormionem" (1826), "Indices attici, oder Anleitung zur richtigen Messung und Aussprache der griechischen Penultima" (1833), "Julius Cæsars Werke in's Deutsche übersetzt" (third edition, 1854), "Die Blüten der griechischen Dichtkunst, in deutscher Nachbildung" (6 vols., 1840-'41), and his last and most important work, "Urdeutsche Staatsalterthümer, in sechs Büchern, zur schätzenden Erläuterung der Germania des Tacitus" (1873). He also contributed a number of papers to various journals.

BENO, Rear-Admiral, a French naval officer; died at St. Thomas, W. I., June 9, 1876, while on his way to Philadelphia. He was a distinguished officer, and had seen considerable service.

BERDELLÉ, JOHANN BAPTISTE, a German painter, born in Mayence, in 1811; was drowned in the Isar in July, 1876. He studied in Düsseldorf, where he furnished some excellent paintings. Among his best works are: "Nimrod," in 1847; two large religious paintings, in 1854; the "Four Seasons," in 1861; and "Arion" and "Hagen with the Water-Nymphs," in 1867.

BRESFORD, MARCUS, a British officer, born in 1818; died March 12, 1876. He served in the militia of Canada with the rank of general, and at the time of his death was colonel of the Seventh Surrey Rifle Volunteers. In 1870 he was elected to Parliament, being returned every succeeding year.

BERGMANN, KARL, a German-American musician, born in 1821; died August 10, 1876. Having taken part in the revolutionary movements of 1848 in Vienna, he fled to New York, where in 1849 he assumed the direction of the singing society Germania. Soon after, together with Theodor Eisfeld, he became the director of the Philharmonic concerts, and became sole director after the return of Eisfeld to Germany. He was also the director of the singing society Arion.

BRETINI, HENRI, a French pianist and composer, born October 18, 1798; died in October, 1876. At an early age he showed considerable talent, and, when twelve years old, made a professional trip with his father through Holland, Belgium, and Germany, and then devoted himself assiduously to the study of the theory of music. He was particularly well known by his excellent *études*, the "*Études caractéristiques*," "*Caprices-Études*," "*Études artistiques*," and others. His larger works (sextets, quartets, sonatas, etc.) are well written, but are deficient in originality.

BETA, HEINRICH, a German novelist; died March 31, 1876. He had lived for some time in London with Gottfried Kinkel and Ferdinand Freiligrath, like them, a political refugee.

He wrote a large number of novels, mostly descriptive of Scotch and English life.

BINDI, Archbishop, an Italian prelate, born September 29, 1812; died June 28, 1876. He was created Archbishop of Siena in 1871.

BRINSEIL, HEINRICH ERNST, a German scholar, born May 22, 1808; died November 26, 1876. After having attained the degree of Doctor of Philosophy, he became secretary of the University Library, and afterward librarian in the University of Halle. He edited the sixteenth volume of the "*Corpus Reformatorum*," containing the works of Philip Melancthon, a critical edition of Luther's translation of the Bible, and "*Abhandlungen zur allgemeinen vergleichenden Sprachlehre*" (1838).

BONA, Marquis, an Italian statesman; died February 2, 1876. He was Minister of Public Works in the cabinet of Count Cavour, in which position he took a great part in the creation of the first network of railways in Piedmont, as well as in the great undertaking of cutting a tunnel through Mont Cenis. In his positions as director of the state railways, and of the Southern Company, he displayed great administrative ability.

BONAPARTE, CONSTANZE, Princess, born January 30, 1823; died in the convent of the Sacred Heart, in Villa Sonite, Rome, September 4, 1876. She was the daughter of Lucien, Prince of Canino, the brother of Napoleon I., and his second wife Alexandrine Laurence de Bleschamp.

BONNEFOY-SIBOUR, ADRIEN, a French senator, born in 1821; died in December, 1876. He was a nephew by marriage of Mgr. Sibour, late Archbishop of Paris. In 1876 he was elected to the Senate from the department of Gard, as a Republican, and joined the Left Centre. He was also vice-president of the departmental council of Gard, and maire of the canton of Pont-Saint-Esprit.

BOOTH, Sir ROBERT GORE, M. P., born August 25, 1805; died December 22, 1876. He was educated at Westminster School, and at Queen's College, Cambridge, where he graduated M. A. in 1826, and was subsequently admitted *ad eundem* at Dublin. He was first returned as a Conservative member for the county Sligo in 1850, and since then every succeeding year. He was also deputy-lieutenant and magistrate for the same county.

BOULT, SWINTON, a British business-man; died July 8, 1876. He was one of the founders of the Liverpool and London and of the Globe Insurance Companies. Of the latter company he had been the manager for thirty-five years.

BOYD, PERCY, a British author; died in London, January 1, 1876. He had at one time enjoyed considerable popularity, and had been an intimate friend of Dickens and Thackeray.

BRAVARD, JEAN PIERRE, a French prelate, born February 20, 1811; died in August, 1876. He was appointed Bishop of Coutances in 1862. In his theological views he sympathized with the Gallican party, and he is said to have

refused to promulgate the decrees of the Vatican Council.

BRISTOW, EDMUND, a British painter, born in 1786; died February 12, 1876. He excelled in animal groups and landscapes.

BROWN, WILLIAM, the uncle of the Earl of Kenmare, born in 1791; died August 4, 1876. He had served with distinction in the wars with Napoleon, and had been for several years a Liberal M. P. for Kerry.

BUDRITZKI, RUDOLF OTTO VON, a Prussian general, born October 17, 1812; died February 15, 1872. In the war with France in 1870-'71 he was commander of the Second Infantry Division of the Guards.

BUNSEN, FRANCES, Baroness, the wife of Christian Karl Josias Bunsen, the eminent German scholar, born March 4, 1791; died April 23, 1876. She was a daughter of Benjamin Waddington, an English gentleman, and belonged to the same family as William Henry Waddington, the French Minister of Education. She was distinguished alike for her true piety, her kindness of heart, and her high intellectual culture. She published a biography of her husband, under the title of "Frances Baroness Bunsen, a Memoir of Baron Bunsen, drawn chiefly from Family Papers" (2 vols., London, 1868), which, with the aid of Prof. Nippold of Bern, she also published in German (Leipsic, 1868-'71).

BURDACH, ERNST, a German physiologist, born February 25, 1801; died October 10, 1876. He studied in Königsberg, where he afterward became Professor of Anatomy. Under the title of "Anthropologie für das gebildete Publikum" (2 vols., 1846-'47), he published the second and completely-changed edition of his father's celebrated work, "Der Mensch nach den verschiedenen Seiten seiner Natur."

BURNETT, Sir JAMES HORN, Bart., born June 21, 1801; died in September, 1876. He succeeded his brother as tenth baronet in 1856, and at the time of his death was Lord-Lieutenant of Kincardineshire.

BURNS, Rev. JABEZ, an eminent Baptist minister, born in 1805; died January 28, 1876. He was educated at Chester and at Oldham Grammar-School. At an early age he joined the Methodist New Connection, became minister of the United Christian Church at Perth in 1830, and in 1835 went to London to accept a call to the pulpit of the General Baptist congregation assembling at New Church Street, which rapidly increased in membership under his charge. He was one of the earliest members of the Evangelical Alliance, and took his place in the first conferences held in Liverpool, London, Edinburgh, and Birmingham. In 1847 he was appointed by the Annual Association of General Baptists one of the deputation to the Triennial Conference of the Free-Will Baptists in the United States. He was the author of a large number of works, among which are: "Marriage Gift-Book," "Life of Mrs. Fletch-

er," "Tracts and Small Treatises on Baptism," "The Pulpit Cyclopædia," "Hints to Church-Members," and "A Few Words to Religious Inquirers." He had also been for some time the editor of the *Temperance Journal* and the *Preacher's Magazine*.

BURBOWS, Sir JOHN CORDY, an English physician, was born in Ipswich in 1813; died March 25, 1876. He received his medical education at Guy's and St. Thomas's Hospitals, became a member of the College of Surgeons in 1836, and was elected a Fellow in 1852. He practised for many years as a surgeon in Brighton, of which city he was elected mayor three times, the last time in 1871. He was knighted in 1873, and was a Fellow of the Geographical, Zoölogical, and other learned societies.

BURTON, J. RYDER, Admiral, a British naval officer; died in August, 1876. He entered the navy in 1806, received a ball in his left side at Castro, Spain, in 1812, which was never removed, and afterward distinguished himself before Algiers. He was a knight of the Order of Guelphs of Hanover.

CAMMAROTA, FILIPPO, an Italian ecclesiastic, born November 23, 1809; died March 1, 1876. In 1854 he was appointed Archbishop of Gaeta.

CAROLINE, Duchess of Mecklenburg-Strelitz, born January 10, 1821; died June 10, 1876. She was married in 1841 to the Crown-Prince, afterward King Frederick VII. of Denmark, from whom she was divorced in 1846.

CARON, Hon. RENÉ EDWARD, a Canadian statesman; died December 13, 1876. At the time of his death he was Lieutenant-Governor of the Province of Quebec.

CÉZAUNE, ERNEST, a French engineer and politician, born in 1830; died June 21, 1876. He was appointed Engineer of Bridges and Highways in 1851, upon leaving the Polytechnic School. In November, 1870, he left Paris in a balloon with a mission from General Trochu for the delegation in Tours. In 1871 he was elected to the National Assembly for the department of Hautes-Alpes, and in 1876 for the same department to the Legislative Assembly.

CHESNEY, Colonel CHARLES, a British officer; died March 19, 1876. He was the author of the "Conquest of England in 1875, and the Battle of Dorking; or, Reminiscences of a Volunteer," which was published immediately after the Franco-German War, and was intended to alarm the public mind in England against the rapid growth of Germany. It had a large sale, and caused considerable excitement for a time.

CHILDERS, ROBERT CÆSAR, an English scholar, born 1838; died July 25, 1876. He was Professor of Pali and Buddhist Literature in University College of London, and was considered a high authority on everything relating to the Pali.

CHRISTIE, SAMUEL TOLFREY, a British general; died in October, 1876. He served throughout the Burmese War of 1852-'53, and for his

services at the capture of Promé received the special thanks of the Governor-General of India in council. He was actively employed in the Indian campaign of 1858-59. In the latter part of the campaign in Oude in 1858 he was wounded, and had a horse shot under him. He was made a companion of the Order of the Bath for his services during the mutiny. His commission as ensign bore date January 22, 1836; lieutenant, July 18, 1838; captain, August 28, 1845; major, October 31, 1852; lieutenant-colonel, December 9, 1853; colonel, November 28, 1854; major-general, March 6, 1868; and lieutenant-general, May, 1876.

CLANRICARDE, HARRIET, Marchioness of, born April 13, 1804; died January 8, 1876. She was the only daughter of George Canning, the eminent statesman, and sister of Earl Canning, a former Viceroy of India. She was married to Ulick John, late Marquis of Clanricarde, by whom she leaves one son, Hubert, Marquis of Clanricarde, who inherited the property of his uncle, Lord Canning, and four daughters. Her eldest son, Lord Dunkellin, died in 1867.

CLARK, THOMAS, a British artist; died October 7, 1876. In the course of his school-days he was unfortunate enough to sustain an injury to the shoulder, the effects of which crippled him through life. Having early resolved to become a painter, he pursued the necessary studies in Edinburgh, and in his twentieth year began to exhibit. He was known as an assiduous cultivator of landscape-art, whose works were never missed from the annual exhibitions of the Royal Scottish Academy, and whose efforts were recognized by that body in his election as an associate in November, 1865. He painted both in water-colors and in oil.

CONSOLATI, FERDINAND, Count, an Austrian peer, born January 7, 1833; died May 3, 1876. He was Commissioner of Delegation in Venetia up to the cession of this province to Italy. In 1867 he was created a life-member of the Herrenhaus, and in 1873 was elected Mayor of Trent.

CONYNGHAM, JANE, Marchioness of, born in 1798; died February 4, 1876. She was the second daughter of Field-Marshal Henry William, first Marquis of Anglesea, by his first wife, Lady Caroline Elizabeth Villiers, third daughter of George, fourth Earl of Jersey. She was married in 1824 to the present Marquis of Conyngham, by whom she had two sons and four daughters, all of whom survive her.

DAVIDIS, HENRIETTA, a German writer on the art of cooking, born in 1801; died April 8, 1876. She wrote, among other works, a "Kochbuch" (twentieth edition, 1875), which gained great celebrity, "Beruf der Jungfrau" (sixth edition, 1876), and "Die Hausfrau" (eighth edition, 1876).

DEAS, SIR DAVID, a British physician, born in 1807; died January 12, 1876. He was Inspector-General of Hospitals and Fleets, and was created a K. C. B. in 1867.

DENZIN, KARL FRIEDRICH VON, a German statesman, born October 16, 1800; died July 19, 1876. He had been a member of different legislative bodies for nearly forty years. From 1838 to 1864 he was a member of the Provincial Diet of Pomerania, and in consequence took part in the united Diets of 1847 and 1848. He was a member of the Upper House of Prussia from 1848 to 1853, and, having been elected to the Second Chamber in 1853, he formed a conservative faction with Prince Hohenlohe Ingelfingen, which existed up to 1858. He was a member of the North-German and afterward of the German Reichstag, ever since the creation of the empire. He was knighted by King William in 1861.

DIXSON, JOHN BOURMASTER, a British naval officer, born in 1815; died February 11, 1876. He held the rank of rear-admiral.

DIERINGER, FRANZ XAVER, a German Catholic theologian, born August 22, 1811; died September 8, 1876. He was ordained as priest in 1835, and appointed Professor of Homiletics in the Seminary of Freiburg in the same year. In 1843 he received a call as professor to Bonn, where he afterward also became university preacher, and director of the homiletic-catechetical seminary, founded in 1871. Although at first opposed to the doctrine of Papal Infallibility, he did not join the Old Catholics, but resigned all his positions in Bonn, and retired to a small country parish in Hohenzollern-Hechingen. His principal works are: "System der göttlichen Thaten des Christenthums" (1841; second edition, 1857), and "Lehrbuch der katholischen Dogmatik" (1847; fifth edition, 1865).

DONOVAN, MICHAEL, an Irish chemist; died in April, 1876. He was considered an admirable chemist and physicist. He wrote two systematic treatises for "Lardner's Cyclopædia" on "Domestic Economy," and a "Treatise on Chemistry." He also contributed a large number of monographs on various subjects to the "Transactions" of the Royal Society, and of the Royal Irish Academy, of which he was a member.

DREBER, HEINRICH, a German painter, born January 9, 1822; died August 3, 1876. He spent considerable time in Florence, and excelled in landscape-painting. Among his finest pictures is a harvest-scene in the East.

DUMBRECK, SIR DAVID, a British physician, born in 1805; died January 24, 1876. He was Inspector-General of Hospitals, and was knighted in 1871.

DUPUIS, SIR JOHN, a British general, born in 1800; died the latter part of November, 1876. He was twice in command of the entire artillery before Sebastopol, and distinguished himself in different battles in the Crimea.

DUSCH, ALEXANDRE VON, a German statesman, born January 27, 1789; died October 27, 1876. In 1815 he became secretary in the Ministry of Finance in Baden; was employed from 1819 to 1825 in the Ministry of Foreign

Affairs; was appointed *chargé d'affaires* and afterward ambassador to Switzerland; in 1834 ambassador in Munich; in 1838 ambassador to the Bundestag in Frankfort; and in 1840 extraordinary ambassador to Belgium. In 1848 he took charge of the Ministry of Foreign Affairs, was forced to resign with his colleagues after the revolution of May, 1849, but was elected to the Second Chamber in 1850, and by this body a member of the Parliament of Erfurt. In 1851 he was compelled to resign his position on account of his health, and devoted himself from that time exclusively to literary labors.

EDDIE, JOHN, D. D., LL. D., a Presbyterian minister, born about 1813; died June 3, 1876. He was educated at the University of Glasgow. Having joined the United Presbyterians, he was for many years pastor of a church in Glasgow, and Professor of Biblical History in the Divinity Hall of his church. He was a member of the Bible Revision Committee, and was the author of a "Bible Cyclopædia," "Commentaries" on the Greek text of several of St. Paul's Epistles, and a "Life of Dr. Kitto." He also contributed a number of articles to the *Journal of Sacred Literature*, the *North British Review*, and other journals.

EBERHARD, MATTHIAS, Bishop of Treves, born November 1, 1815; died May 30, 1876. He was ordained as a priest in 1839, was appointed Suffragan Bishop of Treves in 1862, and in 1867 was elected bishop. In 1874 he was one of those Prussian bishops who refused to obey the Government, and in consequence was sentenced to pay a fine; and as he refused to pay it, he was imprisoned up to the end of the year.

EDGELL, HARRY EDMUND, a British admiral, born in 1810; died February 4, 1876. He was the son of Rear-Admiral Edgell, received his education at the Royal Naval College, and embarked in 1828 as a volunteer. After serving for nearly three years as midshipman and mate on different stations, he was promoted to the rank of lieutenant in 1828. As such he distinguished himself in China, and in 1834 assisted in forcing the passage of the Boca Tigris. He subsequently commanded the *Siren*, on the Mediterranean station. He had received the thanks of the trustees of the British Museum for removing the sculptured remains of the tomb of Mausolus, now named the Canning Marbles, from the Castle of Boodroom in Asia Minor. He became rear-admiral (on the retired list) in 1864, and vice-admiral in 1871. He had been a Companion of the Order of Bath since 1859, and had been in receipt of a Greenwich Hospital pension since 1866.

EDWARDS, SIR BRYAN, a British lawyer, born in 1799; died July 6, 1876. He had been Chief-Justice of Jamaica, and was knighted in 1859.

EICHWALD, KARL EDUARD, a Russian naturalist, born July 4, 1795; died in November, 1876. He studied medicine and natural his-

tory in the Universities of Berlin and Vienna, was appointed lecturer in the University of Dorpat in 1821, Professor of Zoology and Midwifery in the University of Kazan in 1823, in 1833 Professor of Mineralogy and Zoology in St. Petersburg, Professor of Paleontology in the Mining Institute in St. Petersburg, and retired into private life in 1851. He undertook extensive explorations to the Caspian Sea, the Caucasus, through Southern Europe, and through Sweden, Norway, Esthonia, and Finland. He was the author of numerous works, the most important of which are: "Alte Geographie des Kaspischen Meers, des Kaukasus und des südlichen Russland" (1836); "Fauna Caspio-Caucasica" (1841); "Beiträge zur Infusorienkunde Russlands" (1844); "Die Urwelt Russlands" (1840-'47); in Russian, "Palæontology of Russia" (1851), "Lethæa Rossica" (2 vols., 1852-'68); "Analekten aus der Palæontologie und Zoologie Russlands" (1872), and "Geognostisch-palæontologische Bemerkungen über die Halbinsel Mangischlak und die Aleutischen Inseln" (1872).

EKMANN, GUSTAV, a Swedish manufacturer, born in 1804; died May 2, 1876. He was a member of the First Chamber of the Swedish Riksdag, a member of the Academy of Sciences and of the Agricultural Academy of Stockholm.

ERICHSEN, ALEXANDER LEOPOLD VON, a German general, born about 1787; died February 2, 1876. He entered the service of Brunswick in 1801; fought at Jena and Auerstädt, and with Wellington in Spain, and at the time of his death held the rank of lieutenant-general on the retired list.

ESMONDE, SIR JOHN, M. P., born in 1826; died December 10, 1876. He was educated at Trinity College, Dublin, and was called to the Irish bar in 1850. He represented Waterford County in the Liberal interest since 1852, and in June and July, 1866, was a Junior Lord of the Treasury. He succeeded his uncle, Sir Thomas Esmonde, as tenth baronet, in 1868. He was a deputy-lieutenant for the county of Wexford, lieutenant-colonel and honorary colonel of the Waterford militia, and a member of the Royal Irish Academy.

ESTCOURT, THOMAS HENRY SUTTON SOTHE-ROUN, an English statesman, born in 1801; died January 6, 1876. He was educated at Harrow, and at Oriol College, Oxford; was in Parliament for Marlborough from 1829 to 1832, for Devizes from 1835 to 1844, and for North Wilts from 1844 to 1865. In 1858-'59 he was President of the Poor-Law Board, and for a short time in 1859 Secretary of State for the Home Department. He was also justice of the peace and deputy-lieutenant for Wilts and Gloucester.

FALKE, JOHANNES FRIEDRICH GOTTLIEB, a German historian, born April 10, 1823; died March 2, 1876. He was appointed first secretary in the Germanic Museum in Dresden in 1856; in 1862 secretary, and in 1864 recorder, of the State Archives in Dresden. In 1856 he

edited, together with J. Müller, the *Zeitschrift für deutsche Kulturgeschichte*, which, however, existed only four years. He was the author of "Geschichte des deutschen Handels" (2 vols., 1859-'60), "Die Hansa als deutsche See- und Handelsmacht" (1862), "Geschichte des Kurfürsten August von Sachsen" (1868), and "Geschichte des deutschen Zollwesens" (1869).

FAWKES, Captain **HAWKSWORTH**, a British naval officer, born in 1836; died July 17, 1876. He entered the navy in 1849, was promoted to lieutenant in 1857, served in the Naval Brigade during the Indian mutiny, and on the China station from 1859 to 1862, being several times reported for his conduct before the enemy. He was appointed commander in 1863, and as such was employed on the southeast coast of America, where, in 1870, he was promoted to captain, and received the thanks of the British minister for his services up the river Paraguay. He was awarded the Kaffre, Baltic, Indian-mutiny, and China medals, with clasps for the Taku forts.

FIELD, **EDWARD**, an English prelate, born in 1801; died June 8, 1876. He studied at Rugby and Queen's College, Oxford, where he gained a Michel fellowship, was appointed public examiner in 1827, and was consecrated Bishop of Newfoundland in 1844.

FISHER, Sir **JOHN WILLIAM**, a British surgeon, born in 1787; died March 22, 1876. He was for some time chief-surgeon to the Metropolitan Police of London, and was knighted in 1858.

FLEISCHER, **KARL MORITZ**, a German scholar and teacher, born February 24, 1809; died July 5, 1876. He studied in the Universities of Halle, Berlin, and Leipsic, received an appointment in the Pädagogium in Halle in 1832, in the gymnasium in Cleves in 1839, in the Friedrichsgymnasium in Berlin in 1857, and was pensioned in 1870. He contributed a number of articles to the *Hallische Jahrbücher für Wissenschaft und Kunst*.

FLUDYER, Sir **SAMUEL**, Bart., born January 31, 1800; died March 12, 1876. He succeeded his father in 1833, and, dying unmarried, is succeeded by his cousin, Rev. John Henry Fludyer, born 1808.

FORBES, **DAVID**, an English geologist, born 1828; died November 9, 1876. He had traveled in different parts of the world, and was the author of the semi-annual reports on the iron and steel production of the world. He did not publish any books, but contributed numerous articles to the journals of the societies to which he belonged. Among them are articles on the "Geology of Peru and Southern Bolivia," and an essay on the "Rocks of Southern Norway."

FORSTER, Sir **GEORGE**, Bart., born March 21, 1796; died April 4, 1876. He succeeded his father in 1843, was M. P. for County Monaghan from 1852 to 1865, and at the time of his death was a deputy-lieutenant for Monaghan, and justice of the peace for Monaghan,

Meath, and Louth. He is succeeded by his son, Colonel Thomas Oriel, born in 1824.

FOULIS, Sir **HENRY**, Bart., a British clergyman, born in 1800; died October 7, 1876. He succeeded to the baronetcy on the death of his eldest brother in 1845. He was appointed Rector of Great Brickhill, Bucks, in 1834, and to the prebendal stall of Welton, Westhall. As he died unmarried, the baronetcy devolves upon his cousin, Mr. John Robinson Foulis, born in 1797.

FRANCOIS, Sir **PHILIP**, a British lawyer, born in 1822; died August 9, 1876. He was called to the bar at the Middle Temple in 1845, and at the time of his death was consul-general and Judge of the Supreme Consular Court of the Levant at Constantinople. He was knighted in 1868.

FREDERICK WILLIAM, Prince of Hesse, born April 24, 1790; died October 25, 1876. He had served in the Prussian army in the wars against Napoleon, and had been governor of the Federal fortress Luxemburg, which position he resigned in 1846. He was an uncle of Landgrave Frederick, the present head of the older (electoral) line of Hesse.

FREDRO, Count **ALEXANDER**, a Polish author, born in 1793; died July 16, 1876. He was the author of a number of plays, which were well received, and were translated into many other languages. One of his most popular productions was "Ladies and Hussars."

FREMENTIN, **EUGÈNE**, a French painter, born 1820; died August 27, 1876. He excelled in Algerian landscapes and battle-fields.

FROTSCHER, **KARL HEINRICH**, a German scholar and teacher, born May 6, 1796; died April 9, 1876. He studied at the University of Leipsic, was rector of the gymnasium in Schneeberg from 1818 to 1820, became lecturer at the University of Leipsic in 1826, and ordinary professor in 1828, went to Annaberg as rector of the gymnasium, and from 1843 to 1865 was rector of the gymnasium in Freiburg. He published several of the classics.

GALLIERA, Duke of, **MARCHESE RAFFAELE DE FERRARIS**, an Italian nobleman, born in 1803; died November 23, 1876. He was a senator of Italy, and was well known for the large sums he spent for charitable purposes.

GALWAY, **GEORGE EDWARD ARUNDEL MONCKTON**, sixth Viscount, born March 1, 1805; died February 7, 1876. He had been in Parliament for East Retford since 1847, was a lord-in-waiting to the Queen in 1852, and was a deputy-lieutenant and justice of the peace for Nottinghamshire. He succeeded his father in 1834, and in 1838 married his cousin, Henrietta Eliza, only daughter of Robert Pemberton Milnes.

GAMOND, **THOMÉ DE**, a French engineer; died February 11, 1876. He was the first to put forward in any practical shape the scheme for the submarine tunnel between England and France, and devoted thirty years of his life to propagate his ideas.

GAPE, JOSEPH, a British admiral, born in 1793; died March 20, 1876. He entered the navy in 1803, and took part in the battle of Trafalgar.

GELDART, Rev. JAMES WILLIAM, LL. D., an English scholar, born 1785; died February 16, 1876. He had been Regius Professor of Civil Law in Cambridge University from 1813 to 1847.

GEORGE, Duke of Mecklenburg-Strelitz, born January 11, 1824; died June 20, 1876. He was a brother of the ruling grand-duke, and was a general of artillery and adjutant-general of the Russian army.

GHILLANY, FRANZ, a German scholar, born in 1806; died June 26, 1876. He was the author of a number of historical works, among them "Geschichte des Seefahrers Martin Behaim" (1853); "Europäische Chronik von 1492 bis in die neueste Zeit;" and "Nürnberg historisch und topographisch, nach den ältesten vorhandenen Quellen und Urkunden" (1871). He was also the author of "Das Glaubensbekenntnis der denkenden Christen" (1847), which appeared under the *nom de plume* of Leonegg.

GIBBONS, Sir SILLS JOHN, Bart., born in 1809; died January 11, 1876. He was a commissioner of lieutenancy for London, had been Lord-Mayor of London 1871 to 1872, and was created a baronet in 1872.

GINZEL, JOSEPH AUGUST, an Austrian church historian, born in 1804; died June 1, 1876. He studied in Pilsen, Leitmeritz, and Vienna; became Professor of Ethics at the University of Leitmeritz in 1837, and of Church History and Ecclesiastical Law in 1848. He was the author of "Geschichte der Kirche" (2 vols., 1847, *et seq.*); "Evangelium und Kirche" (1848); "Ueber die Zukunft der Kirche in Oesterreich" (1848); and contributed numerous articles to German and Austrian theological journals.

GISEKE, BERNHARD LUDWIG, a German philologist, born September 28, 1823; died November 29, 1876. He studied philology in the Universities of Leipsic and Berlin. Having filled various positions as teacher, he was appointed director of the Realschule in Meiningen in 1859, where he remained up to his death. He was the author of "Die allmähliche Entstehung der Gesänge der Ilias" (1853), "Homeriche Forschungen" (1864), and "Thracisch-pelasgische Stämme der Balkanhalbinsel und ihre Wanderungen in mythischer Zeit" (1858).

GORDON, Sir HENRY PERCY, Bart., F. R. S., born October 21, 1806; died July 29, 1876. He studied law, and was called to the bar in 1831. He was married to Lady Mary, daughter of the third Earl of Ashburnham.

GORDON, LEWIS D. B., a British scholar and engineer, born in 1815; died April 28, 1876. He had been Regius Professor of Civil Engineering in the College of Glasgow.

GORDON, Sir WILLIAM HOME, Bart., born

1818; died July 29, 1876. He was a deputy-lieutenant and justice of the peace for Sutherlandshire, and is succeeded by his son, Home Seton, born in 1845.

GORMANSTON, Viscount EDWARD ANTHONY JOHN PRESTON, born June 3, 1796; died September 28, 1876. Besides his title of viscount and that of Baron Loundres in the Irish peerage, he held that of Baron Gormanston in the peerage of the United Kingdom. He was Premier Viscount of Ireland. He is succeeded by his son, Jenico William Joseph, born 1837.

GRASS, PHILIPPE, a distinguished French sculptor, born May 6, 1801; died April 18, 1876. Most of his works are in the various museums of Europe, and represented in the public monuments of Strasburg, where he resided. Two of his most remarkable works were exhibited in the Paris Expositions of 1855 and 1867—in the former a magnificent marble statue, called the "Rose of the Alps," and in the latter a monument in bronze, called "Love disarmed by Innocence." Besides these, he executed numerous busts of public persons, which are now in the public squares of Strasburg.

GROEBEN-NEUDÖRFCHEN, KARL, Count von, a German officer, born September 17, 1788; died July 13, 1876. He entered the army at an early age, but left it when the Prussian army was ordered to join Napoleon in his campaign against Russia. Having entered the army again in 1813, he took an active part in the wars that followed, and rapidly advanced. At the time of his death he was adjutant-general to the emperor. He was also a member of the Prussian Herrenhaus, to which he was called in 1854.

GROEN VAN PRINSTERER, WILLEM, a Dutch historian and statesman, born in 1801; died May 20, 1876. Having completed his legal studies in the University of Leyden, he was appointed Cabinet Secretary to the King in 1829, which position he resigned in 1833, in order to devote himself to his historical studies. His first work of importance was "Archives, ou Correspondance inédite de la Maison d'Orange-Nassau" (1835-'64; first series, 10 vols.; second series, vols. 1-5). At the same time he undertook a "Handboek der Geschiedenis van het Vaderland" (4 vols., fourth edition, 1874). He took a great interest in the political and religious questions of the day, and even at that time belonged to the "Anti-revolutionary" party. From 1849 to 1865 he was almost uninterruptedly a member of the Second Chamber, and the leader of his party in the House. Among his works are: "Bijdrage tot Herziening der Grondwet in Nederlandschen Zin" (1840), "Ongelooft en Revolutie" (1847), "La Prusse et les Pays-Bas," and "L'Empire Prussien et l'Apocalypse" (1867). He also published a large number of political brochures, and from 1850 to 1855 was editor-in-chief of the *Nederlander*, a political conservative journal.

HAFNER, KARL, a German novelist and dramatist, born in 1815; died February 29, 1876. He was the author of a number of popular novels and farces, of which the best known is "Therese Krone."

HALLER, FERDINAND NIKOLAUS, senator of the free city of Hamburg, born in 1804; died October 31, 1876. He held the office of first mayor six times, and that of second mayor three times.

HAMILTON, Sir JAMES JOHN, Bart., a British nobleman, born March 1, 1804; died January 12, 1876. He was a retired lieutenant-colonel.

HARLEIGH, JOHN RALPH ORMSBY GORE, first baron, born in 1816; died June 21, 1876. He had been in Parliament for Carnarvonshire from 1837 to 1841, for North Shropshire from 1859 to 1876, and was created a baron in 1876. He was a groom-in-waiting to the Queen from 1841 to 1850. Dying without issue, he is succeeded by his brother, William Richard Ormsby Gore, M. P. for Leitrim.

HASTINGS, Vice-Admiral GEORGE FOWLER, born in 1814; died in March, 1876. He was the third son of the twelfth Earl of Huntingdon, served with distinction in the Crimea, and at the time of his death was commander-in-chief at the Nile. He was decorated with the Cross of the Order of the Bath in 1858.

HAWKES, General ROBERT, born in 1789; died December 18, 1876. He entered the Indian army in 1806, served in the Mahratta War of 1817-'18, and was present with the dismounted cavalry at the storm of Choundah. He attained the rank of major-general in 1854, and of general in 1870.

HÄZLEHURST, THOMAS, an English Methodist minister, born in 1815; died in July, 1876. He was one of the most prominent preachers of the Methodist Church, and was distinguished by his munificence in its interests. A large number of his sermons have been published.

HEISLER, FERDINAND, an Austrian jurist, born January 7, 1798; died November 29, 1876. He had been President of the Senate of the Supreme Court, and at the time of his death was a member of the Herrenhaus.

HENRY, JAMES, an Irish physician and scholar, born in 1798; died July 14, 1876. Having inherited a fortune, he devoted himself, aided by his wife and daughter, to an immense commentary on Virgil. For many years he traveled over the Continent, examining the original manuscripts in the libraries of Germany and Italy. His great commentary is still in manuscript, with the exception of a few fragments which he gave to the world. Its extent may be imagined from the fact that the remarks on the first twenty-six lines of the "Æneid" fill 176 pages.

HENRY, Sir THOMAS, a British lawyer, born in 1807; died June 16, 1876. He was called to the bar at the Middle Temple in 1829, and at the time of his death was chief magistrate of

Bow Street Police Court. He received the order of knighthood in 1864.

HENSEL, LOUISE, a German poetess, born March 30, 1798; died December 18, 1876. She devoted herself to the life of a teacher, and was employed as governess in some of the first families of Germany. She was well known for her excellent songs and poems for children, particularly for "Müde bin ich, geh' zur Ruh!" Born of Protestant parents, she early joined the Catholic Church. Her brother is a distinguished painter.

HERRIES, WILLIAM CONSTABLE MAXWELL, thirteenth Baron, born in 1804; died November 12, 1876. He was married to Marcia, daughter of Sir Edward M. Vavasour, and is succeeded by his son, Marmaduke, born in 1837.

HEUNERT, KARL, a German painter, born in 1808; died November 27, 1876. He studied in Düsseldorf with J. W. Schirmer, and excelled in landscapes, choosing mostly for subjects the picturesque regions of Westphalia. He furnished also numerous water-color sketches.

HILDITCH, Sir EDWARD, a British physician, born in 1801; died August 24, 1876. He entered the Royal Navy in 1826, and in 1854 reached the highest rank in his branch of the service, that of Inspector-General of Hospitals and Fleets. In 1865, on his retirement from the active list, he received the honor of knighthood, and in 1868 was appointed Honorary Physician to the Queen.

HODSON, DOVETON, a British general, born in 1810; died in December, 1876. He entered the Madras army in 1826, and saw considerable active service in India. He served in the Goomsoor campaign in 1836, and in the Indian mutiny campaign of 1858-'59, including the battle of Bauda, the action near Kirwee, and the forcing of the Punghatee Pass. He received the medal and clasp for his services in Central India, and was made a Companion of the Order of the Bath in 1869, and in the same year became major-general.

HOGHTON, Sir HENRY DE, Bart., born in 1821; died November 29, 1876. He succeeded to the baronetcy in 1862, was Sheriff of Cardiganshire in 1849, and at the time of his death was a deputy-lieutenant and magistrate for Lancashire and Cardiganshire. He is succeeded by his brother, Charles, born in 1828.

HOLMES, ALFRED, a British musical composer, born in 1838; died March 4, 1876. Among his principal works are "Jeanne d'Arc" and "Inez de Castro."

HOLMES, SENATOR, a Canadian statesman; died in June, 1876. He represented the constituency of Pictou, Newfoundland, in the Dominion Parliament.

HORT, Sir JOSIAH WILLIAM, Bart., born in 1791; died in August, 1876. He was member of Parliament for Kildare in 1831, and is succeeded by his son, Major-General John Josiah, born in 1824.

HOSKYN, CHANDOS WREN, a British lawyer, born in 1812; died in December, 1876. He

was educated at Shrewsbury School and at Balliol College, Oxford, and was called to the bar of the Inner Temple in 1838. He contested Hereford as a Liberal in March, 1869, on the vacancy caused by the unseating of Mr. Clive and Mr. Wyllie, and sat until 1874. He was the author of "Talpa, or Chronicles of a Clay Farm," an "Inquiry into the History of Agriculture," and other writings.

HOWARTH, HENRY, a British minister; died in August, 1876. He graduated B. A. at Cambridge in 1823, when he was "senior optime," and was afterward elected a Fellow of St. John's College. He took holy orders in 1824, was Hulsean Lecturer at Cambridge in 1835-'36, and was appointed Rector of St. George's, Hanover Square, in 1845, and Chaplain in Ordinary to the Queen in 1855.

HOWE, GEORGE AUGUSTUS LOUIS FREDERIC CURZON, Earl, a British peer, born January 16, 1821; died February 8, 1876. He was member of Parliament for South Leicestershire from 1857 to 1870, when he succeeded his father. Dying without male issue, he is succeeded by his brother, Major-General Richard Curzon, born in 1822.

HÜLSSE, JULIUS AMBROSIVS, a German scientist, born May 2, 1812; died June 26, 1876. In 1850 he was appointed director of the Polytechnic School in Leipsic, and in 1868 was created chairman of the Technical Commission which was to aid the Ministry of the Interior in the consideration of technical questions. He was the author of "Allgemeine Maschinen-Encyclopädie," "Die Technik der Baumwoll-spinnerei," and "Die Kammgarnfabrikation." He also edited new editions of Vega's mathematical tables.

HYLTON, BARON, SIR WILLIAM GEORGE HYLTON JOLLIFFE, a British statesman, born December 7, 1800; died June 8, 1876. He was in Parliament for Petersfield in 1830 and 1831, and again from 1837 to 1866, was Under-Secretary of State for the Home Department during the Earl of Derby's administration in 1852, and Patronage Secretary to the Treasury from 1858 to 1859. He was created a baron in 1866.

ISABELLA MARIE, Princess of Portugal, born July 4, 1801; died April 22, 1876. She was the great-aunt of the present King, and had been Regent of Portugal from March 10, 1826, to February 26, 1828.

ISTOMIN, CONSTANTINE IVANOVITCH, a Russian admiral; died October 14, 1876. He had seen considerable service, and had distinguished himself in a number of battles, particularly at Navarino in 1827. At the time of his death he was President of the Supreme Military Tribunal of the Navy.

JELINEK, KARL, an Austrian meteorologist, born October 28, 1822; died October 19, 1876. He studied mathematics and natural sciences in the University of Vienna, was appointed Professor of Higher Mathematics in the Polytechnic Institute in Prague, and in 1863 Director

of the Central Institute of Meteorology and Magnetism of the Earth in Vienna. He was one of the leaders in the movement for an international meteorological congress, and was elected a member of the permanent committee of the congress held in Vienna in 1873. He was a member of the Bohemian Diet, was appointed in 1864 a member of the Council of Instruction, and from 1870 to 1873 was the head of the section for technical high-schools and commercial schools in the Ministry of Education.

JOSEPHINE, ex-Queen of Sweden, born in 1807; died June 7, 1876. She was a daughter of Duke Eugene of Leuchtenberg, and had been married to King Oscar I. She was the mother of the present King, Oscar II., as well as of the preceding one, Charles XV.

KEATINGE, RICHARD, a British lawyer, born in 1798; died in February, 1876. He was educated at Trinity College, Dublin, was called to the Irish bar in 1813, and obtained the honor of a silk gown in 1835. In 1842 he was made Queen's Sergeant in Ireland, and in the following year elected Bencher of the King's Inns, Dublin, and promoted to the judicial bench as Judge of the Prerogative Court, and of the Court of Probate, which positions he held up to his death.

KEMPER, I. DE BOSCH, a Dutch political economist; died October 23, 1876. He had been a member of the Second Chamber of the Netherlands, and was the author of works on political economy, and other subjects.

KING, RICHARD, a British explorer; died February 11, 1876. He was the companion of Sir George Back on his journeys to the Northern Ocean in 1838, 1834, and 1835. He was also the author of several geographical and medical books, and was the founder of the Ethnological Society in London.

KIRSNER, LUDWIG, a German politician; died September 6, 1876, at an advanced age. He was one of the oldest and ablest members of the National Liberal party in Baden. He belonged to the Second Chamber of Baden since 1849, and was its vice-president from 1861 to 1871, and then its president. He was also elected to the Customs Parliament (*Zollparlament*), and to the first German Reichstag, and was forced to decline a reelection on account of ill health.

KOCH, H. A., a German scholar, born August 26, 1829; died January 20, 1876. He studied in the Universities of Halle and Göttingen, and, after having filled various positions in different gymnasia, became prorector at the gymnasium at Frankfurt-on-the-Oder, and in 1866 professor at Pforta. He is well known by his editions of the Roman classics, particularly of Cicero. He also contributed valuable articles to the *Rheinische Museum*, and other philological journals.

KOHL, FRIEDRICH, a German technologist, born December 20, 1811; died April 12, 1876. He had been teacher at the industrial schools

in Plauen and Strehlen, and was well known by his work, "Geschichte der Jacquard Maschine und der sich ihr anschliessenden Abänderungen" (1873).

KÖNIG, HERBERT, a German artist, actor, and author, born in 1821; died June 13, 1876. He was, in his youth, a popular comedian; but, devoting himself exclusively to art, he contributed a large number of comical illustrations to the most popular German journals, and also contributed a number of satirical sketches. He published an autobiography in the *Gartenlaube* in 1872, under the title of "Ein Autodidakt."

KÖNIGSMARK-PLAUE, HANS KARL ALBRECHT, Count von, born September 15, 1790; died in the latter part of April, 1876. He was a member of the Prussian Herrenhaus, and a Privy Councillor (*Wirklicher Geheimrath*).

KRABBE, NIKOLAUS CARLOVITZ, a Russian admiral, born in 1815; died January 15, 1876. He had been Minister of the Navy from 1861 to 1876.

KRÜGER, K. W., a German scholar, born in 1796; died May 1, 1876. He studied at the University of Halle, and, after holding several minor positions, became professor in the Joachimsthal Gymnasium in Berlin in 1827, remaining there until 1838, when he was pensioned. He published "Historiographica Dionysii Halicarnassensis" (1823), and editions of Herodotus, Thucydides, and of the "Anabasis" of Xenophon and of Arrian. He published a smaller Greek grammar which has gone through nine editions, and a larger one which has gone through four. He also wrote "Geschichte der Englischen Revolution," "Zur Charakteristik der gestürzten Verwaltung in Preussen" (1848), and "Kritische Analekte" (1848).

KUH, EMIL, a German poet and critic, born December 13, 1828; died December 30, 1876. After having been connected for some time with several prominent literary journals in Berlin, he returned to Vienna, his native city, and in 1864 received an appointment as Professor of German Language and Literature in the Commercial Academy of that city. Among his critical works are: "Friedrich Hebbel" (1864), "Adalbert Stifter" (1868), and "Zwei österreichische Dichter, Franz Grillparzer und Adalbert Stifter" (1872). His "Gedichte" appeared in 1858, and "Drei Erzählungen" in 1857. He also published "Dichterbuch aus Oesterreich" (1853), and, together with Glaser, edited the complete works of Friedrich Hebbel (1864-'68).

LANG, HEINRICH, a German theologian, born November 14, 1826; died January 13, 1876. He studied in Tübingen, and in 1848 went to Switzerland to escape political persecution. In Switzerland he received a position as clergyman. In 1859 he established a religious paper, *Zeitsimmen für die Reformirte Schweiz*, which, in time, became the central organ of liberal Protestantism in Switzerland. He also published "Versuch einer christlichen Dogmatik"

(1858), "Stunden der Andacht" (2 vols., 1862-'65), "Martin Luther, ein religiöses Charakterbild" (1870), and "Das Leben Jesu und die Kirche der Zukunft" (1872).

LARABIT, MARIE DENIS, a French politician, born August 15, 1792; died in January, 1876. He had taken part as an officer in the campaigns of Napoleon I., whom he accompanied to Elba. Upon the restoration of the Bourbons he resigned his position in the army. During the reign of Louis Philippe he was a member of the Chamber of Deputies for Auxerre, and was created a senator by Louis Napoleon. In 1876 he was a candidate for the Senate from the department of Yonne, but died before the election was held.

LA ROCHETTE, ERNEST DE, a French statesman, born in 1804; died January 20, 1876. He represented the department of Loire-Inférieure in the Constituent and Legislative Assemblies, and was reelected by this department February 8, 1871. He was throughout his life a decided Legitimist. At the senatorial elections in the Assembly he entered into an alliance with the Republicans for himself and his friends, by which the Republicans obtained fifty-four and the pure Legitimists ten of the life-senators. He was the twenty-first senator elected by the Assembly, but died before that body organized.

LAWRENCE, GEORGE ALFRED, a British lawyer and author, born in 1827; died September 24, 1876. He was educated at Rugby and Balliol College, Oxford, where he graduated in 1848 as a second-class in classics, and was called to the bar by the Inner Temple in 1852, but early abandoned the law for literature. He was the author of "Guy Livingstone" and "Sword and Gown," both published anonymously; and a third tale by him, "Barren Honor," was published in *Fraser's Magazine* in 1861.

LAYCOCK, THOMAS, a British physician, born in 1812; died September 21, 1876. He was a professor in Edinburgh, and was the author of "The Reflex Functions of the Brain," "The Mind and Brain," etc.

LEBRETON, EUGÈNE CASIMIR, a French general of division, born January 18, 1791; died March 4, 1876. He served with distinction in Algeria, was elected in 1848 from Eure-et-Loire to the Constituent Assembly, of which he was elected quæstor, and afterward to the Legislative Assembly, where he showed himself a decided enemy of the republic. He was promoted to the grade of general of division in 1852, and retired from the service in 1854. In 1852 he was elected to the Corps Législatif as the Government candidate for La Vendée, which he represented until 1863, when he was returned for Eure-et-Loire. He retained this seat up to the overthrow of the empire, being appointed quæstor in 1869. He was created Grand Officer of the Legion of Honor in 1850.

LEDERER, JOACHIM, a German author, born August 23, 1808; died July 31, 1876. He

studied medicine and law in the University of Prague, but could not enter the academic career as he desired, because he was a Jew. Among his works, principally comedies, are the following: "Geistige Liebe," "Hänliche Wirren," "Die weiblichen Studenten," and "Eine rettende That."

LEGAŃNEUR, HUBERT MICHEL FORTUNÉ, a French judge and former peer, born February 18, 1797; died January 11, 1876. As *Procureur-général* of Douai, he prosecuted Louis Napoleon for the attempted *coup-d'état* at Boulogne. He was created a peer of France in 1845, and an officer of the Legion of Honor in 1842.

LEIGH, EGERTON, M. P., born in 1815; died July 1, 1876. He received his education in Eton, and entered the army as cornet in the Queen's Bays. He retired from the service in 1843 with the rank of captain, but was major of the First Cheshire Light-Infantry Militia for thirty years. He was High-Sheriff of Cheshire in 1872, was elected member for the Mid-Division of Cheshire in 1873, and at the election in 1874 was returned without opposition. He acted with the Conservatives. He was married, in 1842, to Lady Rachel, daughter of J. S. Wright, of Balcote Lodge. He was the author of "Ballads and Legends of Cheshire."

LETHEBY, HENRY, a British physician, born in 1816; died in April, 1876. He was the medical officer of health of the city of London, lecturer on chemistry and toxicology in the London Hospital, and chemical analyst to the Corporation of London. He published a large number of "Reports on the Sanitary Condition of the City of London," a series of papers on the "Mode of Conducting Post-Mortem Examinations in Cases of Suspected Murder" in the *Lancet*, and a number of other works. He was a member of the Linnæan and Chemical Societies, to the "Transactions" of which he contributed a number of papers.

LEVEN, JOHN THORNTON LESLIE MELVILLE, ninth Earl of Leven and eighth Earl of Melville, a Scotch nobleman, born December 18, 1786; died September 18, 1876. He succeeded his brother in 1860, and in 1865 was elected a representative peer of Scotland. He is succeeded by his oldest son, Alexander, Viscount Kirkaldie, born 1817.

LIMAIRAC, JULES DE, a French senator, born January 24, 1806; died in September, 1876. He was elected a member of the National Assembly in 1871 for the department of Tarn-et-Garonne, and supported the Legitimist party. In 1876 he was chosen in the same department for the higher dignity of senator.

LÖHR, EMIL, a German landscape-painter, born in 1809; died April 21, 1876. After having attended the Academy of Vienna, he went to Italy, where he studied the works of the old masters. An incurable disease prevented him from thoroughly exercising his art. His works, which comprise scenes in various parts

of Germany, although not widely known, were highly valued by art-critics.

MARCO-DUFRAISSE, a French politician, born in 1812; died January 22, 1876. He studied law, and was highly respected among his colleagues for his learning. After the Revolution of 1848 he was elected to the National Assembly, where he acted with the extreme Left. After the *coup-d'état* he was sentenced to be transported to Cayenne, but succeeded in escaping to Belgium, and soon after was called to a professorship in Zürich. Upon the overthrow of the empire in 1870 he returned to France, and received several appointments from M. Gambetta, but acted in such a manner as to make himself obnoxious. In 1871 he was elected to the National Assembly from Paris, where he acted with the Left. He was the author of several violent *brochures*, in which he attacked the government of Louis Napoleon.

MAROHAND, Count LOUIS, the last survivor of Napoleon's companions in St. Helena, born in 1791; died June 21, 1876. He entered the personal service of the Emperor in 1811, by whom he was created a count. When Constant, the first *calet de chambre* of the Emperor, retired in 1814, he took his place. He accompanied his master to Elba and St. Helena, and received from the latter, on his death-bed, a number of family souvenirs, which he handed over to the Imperial Museum upon the accession of Louis Napoleon.

MARGARY, HENRY JOSHUA, a British general, born in 1811; died in January, 1876. He was the father of Mr. A. R. Margary, who was killed at Manwyne, China, in 1875. He entered the Bombay Engineers in 1830, served in the Mahratta campaign in 1844, was field-engineer of the Sinde Reserve Force during the war in Afghanistan, and received the thanks of the Governor-General in council for his services. He retired from the army in 1863 with the rank of major-general.

MARIA, ex-Queen of Spain, born August 9, 1847; died November 8, 1876. She was the daughter of Prince Pozzo della Cisterna, and in 1867 married Amadeus, Duke of Aosta, the second son of King Victor Emanuel of Italy, and afterward King of Spain. She was respected by all who knew her for her high mental and moral qualities.

MARIA, Grand-duchess of Russia, born August 11, 1819; died February 21, 1876. She was the oldest daughter of the Emperor Nicholas, was married in 1839 to Maximilian, Duke of Leuchtenberg and Prince of Reichstädt, by whom she had six children, and in 1856 was again married to Gregory, Count Stroganoff.

MARTIN DES PALLIÈRES, CHARLES GABRIELLE FÉLICIOTÉ, a French general, born November 22, 1823; died September 14, 1876. He graduated from the Military School of St.-Cyr in 1843, as second-lieutenant of the marines, took part in the expeditions to the Senegal and against China, and in 1868 became brigadier-general. He took part in the war with Germany, was

wounded at Sedan, and was dismissed unconditionally by the Germans, being considered unfit for further service. Two months later he was appointed to the command of the Fifteenth Corps of the Army of the Loire, with the rank of general of division, but was soon relieved from this command. In 1871 he was elected from the Gironde to the National Assembly, of which body he was one of the questors.

MAITZGRATH, JOSEPH, a German poet, born January 28, 1818; died March 24, 1876. He studied law, and was employed in various positions by the Government. His first poems appeared in 1838. Together with Freiligrath and Simrock, he edited two editions of the "Rheinische Jahrbuch für Kunst und Poesie" for 1841 and 1842. It was mainly due to his advice that Niklas Becker wrote his celebrated poem on the Rhine.

MAURICE, JULES, a French senator, born in 1811; died March 21, 1876. He was a large real-estate owner of Douai, of which city he had been mayor for ten years under the empire. In 1871 he was elected to the National Assembly from the department of the Nord, and in 1876 was chosen senator, the first of five, by 495 votes out of 814. In the Senate he voted with the Right.

MEHMMED BUHEAN UDDIN EFFENDI, a Turkish prince, born May 28, 1849; died October 21, 1876. He was a son of the Sultan Abdul-Medjid Khan, and a brother of the Sultan Abdul-Hamid II.

MELVILLE, HENRY DUNDAS, Viscount, born in February, 1801; died February 1, 1876. He entered the army at the age of eighteen, became a lieutenant-colonel in 1829, commanded the Eighty-third Foot in Canada in 1837, and a division of the Army of the Punjab at Goojerat in 1849. For his Indian and other services he received the decoration of G. C. B., and in 1860 became lieutenant-general. Till his death he was general, and President of the Queen's Body-Guard for Scotland (Royal Archers). He is succeeded by his brother, Mr. Robert Dundas, Storekeeper-General of the Navy.

MILLER, GEORGE J., a British sculptor; died August 18, 1876. In 1857 he received the large gold medal of the Academy for his group, "The Samaritan." His best-known work is the monument on the grave of the Marquis of Hastings.

MILLER, ROBERT, a British judge; died in August, 1876. He was called to the bar at the Middle Temple, November 10, 1826, and went to the Midland Circuit. He was raised to the dignity of sergeant-at-law in 1850, and was appointed Judge of the Leicester County Court Circuit, January 1, 1856. He held all the courts in Leicestershire, Lincolnshire, and Rutlandshire, and at Nuneaton, Warwickshire.

MOORE, GEORGE, a successful British merchant, of the firm of Copestake, Moore & Co., born in 1807; died November 21, 1876. He came to London at an early age, and entered the house as an errand-boy, in which he after-

ward became a partner. During his connection with the firm the business was considerably extended, its factories being now at Nottingham, Manchester, Paris, and New York. He was well known for the zeal with which he entered into philanthropic enterprises. Although often pressed to accept municipal honors, and even to enter Parliament, he uniformly declined; and when, in 1844, he was elected Sheriff of the City of London, he preferred to pay the fine of £500 to accepting the office.

MORGAN, CAMPBELL DE, F. R. S., a British physician, born in 1811; died April 11, 1876. He was formerly an examiner in surgery at the Royal College of Physicians, and, although one of the first honorary Fellows of the Royal College of Surgeons elected, he always declined being put in nomination for a seat in the council of that institution. He was a frequent contributor to the *Philosophical Transactions*, and to medical journals.

NEAVES, Lord CHARLES, a Scottish judge, born in 1800; died December 23, 1876. He was admitted to the Scottish bar in 1822, was Sheriff of Orkney in 1845, Solicitor-General for Scotland from 1852 to 1854, a Lord of Session since 1854, a Lord of Judiciary since 1855, and Lord Rector of St. Andrew's University in 1872 and 1878.

NORTEN, ADOLF, a German painter, born in 1828; died May 28, 1876. From 1847 to 1851 he studied at the Academy of Düsseldorf. His paintings are mostly battle-scenes, the subjects for which are taken from the wars with Napoleon, while he would paint in the mean while small *genre* pictures. His best-known works are: "French Prisoners guarded by Guerrillas" (1851), "The Retreat of the Grand Army, 1812," "Napoleon on his Return from Russia," and others. These were followed by scenes from the battle of Waterloo, which he painted for King George of Hanover. He also excelled in water-colors.

ORPEN, Sir RICHARD JOHN THEODORE, Knt., born in 1788; died May 4, 1876. He had been a Commissioner of Inquiry into the Courts of Law and Equity in Ireland, and at the time of his death was President of the Incorporated Society of Solicitors and Attorneys of Ireland. He was knighted in 1868.

ORE, CHARLES ALEXANDER, a British lieutenant-general, born in 1812; died in October, 1876. He entered the army in 1831, served with the Coorg Expedition in 1836, and was present at the attack on the stockades of Buck. He was appointed colonel-commandant of the Royal Engineers in 1871.

OTTEE, H. C., a British rear-admiral; died in April, 1876. He entered the navy in 1822, and on several occasions distinguished himself by his bravery and coolness. In 1870 he retired with the rank of rear-admiral. He was created a C. B. in 1867.

OVERWEG, KARL, a German politician, born November 28, 1805; died in the latter part of May, 1876. He was a member of the Frank-

fort Parliament in 1848-'49, and from 1850 to 1852 was in the First Chamber of Prussia, in which he belonged to the Liberal party. From 1856 to 1873 he was a member of the Chamber of Deputies, and from 1871 to 1874 was also a member of the first German Reichstag, where he belonged to the Liberal Imperial party. He was one of the German jurors in the Exhibitions of London and Paris.

PALFFY, Count ALOIS, an Austrian nobleman, born in 1801; died February 2, 1876. He was Governor of Venice up to 1848, when it was ceded to Italy.

PASOLINI, Count GIUSEPPE, an Italian statesman, born in 1814; died December 4, 1876. He was at one time ambassador to England, and in 1876 was President of the Senate.

PATRIZI, CONSTANTINE, an Italian cardinal, born September 4, 1798; died December 17, 1876. He studied for the priesthood, and, after a brilliant collegiate career, was ordained. His promotion in the Church was rapid, and he was created a cardinal in 1836. He was Dean of the Sacred College and Bishop of Ostia and Velletri, Archpriest of the Basilica of St. John of Lateran, and Grand Prior of the Order of Malta, in Rome. He was held in high esteem by the Pope.

PAYNTER, JAMES AYLMEY, a British naval officer, born in 1814; died December 18, 1876. He entered the navy in his twelfth year, passed his examination for lieutenant in 1833, and in 1846 was made commander. He distinguished himself on various occasions by his bravery, being instrumental, while in command of the *Exmouth*, in saving the lives of two thousand women and children during a massacre near Sidon, Syria. He retired from the service in 1870 as rear-admiral. After this he took an active part in the politics of Bath, of which city he was mayor from 1874 up to his death.

PEDERSEN, KNUD, a Danish deputy; died February 6, 1876. He belonged to the so-called "Centre party," and was distinguished as an orator.

PEL, General, a Dutch officer; died February 29, 1876. He was in command of the Dutch forces in Acheen, where he distinguished himself by his courage and ability. He was severely wounded in one of the engagements, and was shortly after attacked by the cholera, of which he eventually died.

PEBGER, JOHANN, an Austrian prelate, born March 7, 1819; died April 6, 1876. In 1868 he was created Bishop of Kaschau, in Hungary.

PERRAUD, J. J., a French sculptor, born in 1821; died November 1, 1876. He was a pupil of Ramey and A. Dumont. Among his works are: "Adam," exhibited in 1855; a statue, "Despair," exhibited in 1869; and the group representing the musical drama, in front of the new opera-house. He also executed excellent busts of Béranger, Berlioz, and others. He was a member of the Academy of Fine Arts.

PERTZ, GEORG HEINRICH, a German historian, born March 28, 1795; died October 7, 1876. When Minister von Stein formed the Society for Early German History, for the purpose of collecting the historical works of the middle ages, Pertz was intrusted with the publication of the works of the historians of the Merovingian and Carolingian ages, and afterward with the direction of the whole enterprise. He began its publications in 1826, under the title of "*Monumenta Germaniæ Historica*" (20 vols., 1826-'67). During the publication of this work he made a large number of journeys in its interest, particularly through Austria, Switzerland, Belgium, England, and the Netherlands. He was successively royal librarian for George V. of Hanover, historian of the entire house of Brunswick-Lüneburg, and in 1840 went to Berlin as librarian-in-chief of the Royal Library, and Privy Councillor (Geheimer Regierungsrath), which position he held for many years.

PETERS, ADOLF, a German mathematician and poet, born February 9, 1808; died June 3, 1876. He studied in Göttingen and Leipzig, and, after holding several minor positions, became in 1851 Professor of Mathematics and Natural Sciences in the Royal "Landesschule" in Meissen, where he remained for over twenty years. Among his mathematical works are: "*Neue Curvenlehre*" (1835), and "*Die symmetrischen Gleichungen*" (1851). Among his poetical works are: "*Gesänge der Liebe*" (1840), "*Natur und Gottheit*" (1859; second edition, 1863), and "*Germania im Herbst, 1866*" (1867).

PFUND, Dr., a German explorer; died August 21, 1876. He went to Alexandria about twenty-five years ago, from there to Cairo, and in the beginning of 1875 accompanied a scientific expedition to Kordofan, sent out by the Khedive. He was distinguished as a botanist.

PLÖTZ, FRIEDRICH WILHELM ALBERT VON, a German parliamentarian, born July 18, 1803; died March 8, 1876. He was a member of the Prussian Herrenhaus, of which body he was vice-president in 1872-'73. He belonged to the so-called "Kreuzzeitung" party.

POCOI, Count FRANZ, a German poet, artist, and musical composer, born March 7, 1807; died May 7, 1876. He contributed illustrations to the *Fliegende Blätter*, the *Münchener Bilderbogen*, and to numerous juvenile publications. Among his musical productions, the best known is the opera "*Der Alchymist*," which was produced in Munich. His literary productions are chiefly popular and juvenile tales.

PRAGA, EMILIO, an Italian poet, born in 1846; died in June, 1876. In 1864 he published a volume entitled "*Tavolezze*," which was very successful. He was, however, unfortunate in his private life, and, after producing another beautiful but extremely mournful volume of lyrics, called "*Penombre*," he fell into ill health and died.

PEINOTTEAU, General, a French general of division, born in 1804; died March 25, 1876. He was formerly orderly officer to Louis Philippe, and at the taking of the Tuileries in 1848 was made prisoner by the insurgents, who mistook him for the Duke de Montpensier. He commanded in chief the artillery of General Ducrot's army during the siege of Paris, and was a member of the court-martial which tried Marshal Bazaine. He was a cousin of the Duke Decazes, and was decorated with the grand cross of the Legion of Honor.

PROUT, **SKINNER**, a British artist, born in 1806; died August 29, 1876. He excelled in water-color paintings, and had been for many years a member of the Institute of Painters in Water-Colors.

QUAIN, **SIR JOHN RICHARD**, Knt., a British judge; died September 12, 1876. He was educated at the London University, practised for some years as a special pleader, and was called to the bar at the Middle Temple in 1852, taking the Northern Circuit. He was appointed a Q. C. in 1866, a justice of the Queen's Bench in 1872, in which year he was also knighted, and since the passing of the Judicature Acts he had been a judge of the Queen's Bench division of the High Court of Justice.

RAMEAU, **SEPTIMUS**, Vice-President of Hayti; was shot by the insurgents in April, 1876. He had been a merchant, school-director, private secretary to Domingue, and in 1874 was elected Vice-President of Hayti. He was of a violent character, and was accused of having used his office for dishonorable purposes.

RANKE, **FREDINAND**, a German scholar and teacher, brother of the celebrated historian, born in 1802; died March 28, 1876. At an early age he became director of the gymnasium in Quedlinburg, was appointed in 1837 director of the Pedagogical Seminary and Professor of Ancient Literature in the University of Göttingen, and in 1842 director of the Friedrich-Wilhelm-Gymnasium in Berlin, where he remained up to his death. He was the author of several educational works.

RAU, **HERIBERT**, a German novelist, born in February, 1813; died September 26, 1876. He chose the biographical novel as his specialty. Among his best novels are "Mozart," "Beethoven," "Alexander von Humboldt," "Hölderlin," "Jean Paul," "Karl Maria von Weber," "Theodor Körner," and "William Shakespeare."

RAUMER, **RUDOLF VON**, a German philologist, born April 14, 1815; died in August, 1876. He was appointed Privatdocent in Erlangen in 840, extraordinary professor in 1846, and in 352 Ordinary Professor of German Language and Literature. His excellent work, "Der Unerricht im Deutschen" (third edition, 1857), is a reprint from his father Karl Georg von Raumer's "Geschichte der Pädagogik." His latest work of importance was "Untersuchungen über die Urverwandtschaft der semitischen und indo-europäischen Sprachen" (1868, *et seq.*).

In 1876 he took an active part in the labors of the commission for the regulation of German orthography.

REAY, **ENEAS MACKAY**, Baron of Scotland, and Baron Mackay d'Ophemert of Holland, born January 13, 1806; died March 6, 1876. He was vice-president of the Council of the King of the Netherlands.

REDGRAVE, **SAMUEL**, a British art-historian, born in 1804; died March 20, 1876. Together with his brother, Richard Redgrave, the well-known artist, he compiled the two volumes of the "Century of Painters of the English School," and completed, unassisted, the "Dictionary of English Artists" (1874).

REID, **SIR JAMES JOHN**, a British lawyer, born in 1800; died April 10, 1876. He was formerly Chief-Justice of the Ionian Islands, and was knighted in 1840.

REISCHACH, **HERMANN ALBERT**, Sr., Freiherr von, born 1798; died April 8, 1876. He was a son-in-law of Johann Friedrich von Cotta, and for over half a century had been connected with the large publishing-house of J. G. Cotta. His son, **HERMANN ALBERT**, Jr., born in 1827, died April 5, 1876, was one of the heads of the above firm.

RIBBLESDALE, **THOMAS LISTER**, Baron, born April 28, 1828; died August 25, 1876. He was a step-son of Earl Russell. While making a trip through Switzerland he committed suicide.

RICHARDS, **ALFRED BATE**, a British author and barrister-at-law, born in 1820; died June 12, 1876. He was one of the chief and earliest promoters of the volunteer movement; was the first to organize a workingman's corps, numbering nearly 1,000 men, of which he was colonel until 1869, when he resigned. On April 16, 1859, he convened the celebrated meeting at St. Martin's Hall for the purpose of forming volunteer corps. In 1870 he became editor of the *Morning Advertiser*, which position he retained up to his death. He was the author of a number of tragedies, novels, and poems.

RIECHTER, **HERMANN EBERHARD**, a German physician, born May 14, 1808; died May 24, 1876. He did much for the reconstruction and popularization of medical science, and was also very active in reforming the instruction in natural sciences, and in gymnastics. His principal works are "Grundriss der innern Klinik" (2 vols., fourth edition, 1860), and "Organon der physiologischen Therapie" (1850).

RIDDERHOLD, **HANS**, a Norwegian statesman, born in 1795; died July 22, 1876. He was Minister of Public Worship from 1848 to 1872.

RIECKE, **FRIEDRICH JOSEPH PYTHAGORAS**, a German scholar, born July 1, 1794; died April 13, 1876. He studied in the University of Tübingen, where he became professor in 1823, which position he retained up to 1864. In 1852 he was appointed extraordinary member of the Council of Studies of Württemberg, and in the following year a member of the Com-

mission for Technical Schools. He had also been royal commissioner for the Royal Polytechnical School. His brother, SOCRATES, born October 10, 1790, died April 26th, had distinguished himself as a physician, and had held several high positions in the sanitary department of the Government.

ROBERTS, JOHN JENKINS, ex-President of Liberia; died February 24, 1876. When the colony of Liberia was founded by the American Colonization Society, he was first lieutenant-governor, and then governor, of the colony. In 1848, upon the formation of the republic, he was elected its first President, and served four years. When, in 1871, there was a revolt against President Royle, Roberts was again elected President, and served until 1876.

ROLLAND, PIERRE CHARLES ANTOINE, a French senator, born November 4, 1818; died October 25, 1876. In 1848 he was a member of the Constituent Assembly, where he acted with the Left. After the *coup-d'état* he retired from politics, and devoted himself exclusively to literature. In 1871 he was elected deputy from Saône-et-Loire, and in 1876 a senator from the same department. In both the Assembly and the Senate he was a member of the Republican Left.

ROSS, SIR DAVID, a British merchant, born in 1802; died May 7, 1876. He was Lord-Provost of Perthshire in 1863-'64, and was knighted in 1864.

ROTHSCHILD, SIR ANTHONY, Bart., born in 1801; died January 4, 1876. He was one of the chiefs of the great banking-house of N. M. Rothschild & Sons, and as such displayed great talents for business. He was alike distinguished for his goodness of heart and his charity. As president of the Jewish school in Spitalfields, he contributed much to alleviate the sufferings of his correlative. He was created a baronet in 1846, and, dying without male issue, is succeeded by his nephew, Nathaniel Rothschild, M. P.

RUSSELL, ALEXANDER, a British journalist, born in 1814; died July 18, 1876. After contributing to *Tait's Magazine*, and other periodicals, he became, in succession, editor of the *Berwick Advertiser* (1839), of the *Fife Herald* (1842), of a liberal paper at Kilmarnock (1844), and of the *Scotsman* (1845). The last position he retained until his death. In politics he was a Whig of the Fox school, and was never solicitous for popularity. He was a writer for some of the leading English reviews, and contributed a number of articles to the "Encyclopædia Britannica."

SÄVE, CARL, a Swedish scholar, born October 22, 1813; died March 29, 1876. He studied botany, but by an accident became interested in the comparative philology of the Northern languages, on which subject he was considered one of the best authorities. He was for many years connected with the University of Upsala, first as *magister docens*, and afterward as Professor of Northern Languages. He contributed

a large number of papers to various learned journals in Sweden.

SAYN-WITTGENSTEIN-SAYN, Prince LUDWIG, born July 15, 1843; died February 28, 1876. He was an hereditary member of the Prussian Herrenhaus. He was the third son of Prince Ludwig Adolph Friedrich of Sayn-Wittgenstein-Berleburg, whom he succeeded in 1867. His father established a fideicommiss (Fideikommiss) of the estate of Sayn and the adjoining estates, which was confirmed by the King of Prussia in 1861, who at the same time gave to the fideicommiss the dignity of an hereditary member of the Herrenhaus, and the privilege of assuming the title of Prince of Sayn-Wittgenstein-Sayn. Prince Ludwig is succeeded by his brother, Prince Friedrich, born April 3, 1836.

SCHMIDT, General VON, a Prussian general of infantry, born July 26, 1809; died November 11, 1876. He was Governor of Metz at the time of his death.

SCOTT, General WALTER, a British officer; died in March, 1876. He entered the service in 1824, became captain in 1829, major in 1845, colonel in 1854, major-general in 1861, lieutenant-general in 1867, and colonel-commandant in 1868. He served in the Punjab campaign of 1848-'49, and was present at the siege and surrender of Mooltan, for which he received the medal and the clasp.

SCROPE, GEORGE POULETT, F. R. S., a British parliamentarian, born in 1797; died January 19, 1876. He was the second son of J. Poulett Thompson, and brother of Lord Sydenham, for some time Governor-General of Canada, and assumed the name of Scrope on his marriage with the heiress of William Scrope. He was first returned in the Liberal interest for Stroud, in May, 1838, having been defeated at the general election in December, 1832, and retained the seat until 1867, when he retired. He was the author of a "Life" of his brother. "Considerations on Volcanoes," and the "Geology and Extinct Volcanoes of Central France" (1858).

SERRIGNY, DENIS, a French lawyer, born in 1804; died in October, 1876. He was appointed Professor of Law in 1833, was a corresponding member of the Academy of Moral and Political Sciences, and was decorated with the grand cross of the Legion of Honor. He was the author of several able treatises on French law, and contributed to the *Revue de Droit Français et Étranger*, and the *Journal des Économistes*.

SETTEMBRINI, LUIGI, an Italian scholar; died November 4, 1876. He was a senator, and the author of a "History of Italian Literature."

SHAW, RICHARD, M. P., was born August 6, 1825; died January 19, 1876. He was the son of Richard Shaw, Esq., of Fulledge, Burnley, and received his education in the grammar-school of that town, and in St. Peter's School, York. He was a Manchester merchant of excellent standing, in partnership with the firm of John Dugdale & Brothers. He was elected to the House of Commons as the first member

for Burnley, in the month of November, 1868, and was a warm supporter of Mr. Gladstone.

SHAW, CHARLES AUGUSTUS, a British general, born in 1791; died April 7, 1876. He obtained his first commission as ensign in May, 1808, and served in the Coldstream Guards, in the Peninsula, from 1810 to 1812, and in Holland and Belgium in 1813-'14. He was severely wounded at Bergen-op-Zoom. He had been colonel of the Seventy-fourth Highlanders since 1856.

SHILLETTO, REV. RICHARD, a British scholar; died September 24, 1876. He was a Fellow of St. Peter's College, Cambridge, was one of the most accomplished Greek scholars in the university, and was the instructor of the majority of the best scholars of the university. On two occasions, in 1839 and 1840, he acted as one of the examiners for the classical Tripos. He edited Demosthenes's "De Falsa Legatione," and at the time of his death was engaged in editing "The History of the Peloponnesian War" by Thucydides.

SIMPSON, RICHARD, a British writer, born in 1820; died April 5, 1876. In 1862 he founded, together with Lord Acton and others, the Liberal weekly, *The Rambler*, and, after that had suspended publication, *The Home and Foreign Review*, which did not appear for more than two years. He was the author of a "Life of Campian," and other works.

SOULÉ, EUDORE, a well-known writer on art and literature, and the conservator of the Museum of Versailles, born in 1817; died in June, 1876. He began his career at Versailles in 1836, under the patronage of Chateaubriand, who was his godfather. Since then he gradually rose to the highest position in the service of that museum. To English students he was best known by his excellent Catalogue, which is not a new guide-book, but an important contribution to the history of art in the seventeenth and eighteenth centuries; but in France his name is mostly associated with that of Molière, of whom he wrote a most interesting and exhaustive biography. Other works of which he was part editor are the "Mémoires de Dangeau," "Mémoires du Cardinal de Luynes," and the *Journal d'Hérouard*.

STEIFENSAND, XAVIER, a German engraver on copper, born in 1809; died January 6, 1876. Among his works are numerous engravings on copper of the paintings of celebrated artists, as Kaubach, Overbeck, Chauvin, and others. His most celebrated engraving is that of the "Worship of the Three Wise Men," by Paul Veronese, which he completed in 1873.

STEWART, COLONEL ALEXANDER, a British officer, born in 1825; died September 22, 1876. He served with the expedition in China in 1842-'43, was present at the capture of Wou-sung and Shanghai, the storming of Ching-Kiang-Foo, and the operations before Nanking. He had been Inspector-General of Ordnance and Magazines at Madras.

STUBBS, Lieutenant-General Sir HENRY WIL-

LIAM, a British officer, born in 1817; died January 27, 1876. He entered the army as cornet in the cavalry in 1835, and was appointed major-general in 1864. He served for many years in the British army in India, taking part in the campaigns against Afghanistan, Beloochistan, Persia, and for the suppression of the Indian mutiny. At the creation of the Dominion of Canada he was appointed Lieutenant-Governor of Ontario, which position he held for some time.

STUART, Sir JOHN, a British statesman, born in 1793; died October 30, 1876. He was called to the bar at Lincoln's Inn in 1819, and was for years, until his death, one of the benchers. He was made Queen's Counsel in 1839, and appointed one of the Vice-Chancellors of England in 1852, which position he filled with distinction until March, 1871. He was created a knight upon his elevation to the judicial bench, and represented Newark in the conservative interest from 1846 to 1852, and Bury-St.-Edmunds from the latter date until made a judge.

TALBOT, Sir CHARLES, a British admiral, born in 1801; died August 8, 1876. He entered the Royal Naval College in 1815, and in 1817 embarked as a volunteer on board the Prometheus. He subsequently served on the South American stations, and on the night of April 6, 1831, an insurrection having broken out at Rio de Janeiro, he rescued and brought off from the Palace of São Christovão the Emperor and Empress, a service which Dom Pedro II. acknowledged by presenting him with the decoration of the Brazilian Order of the Southern Cross. In 1845 he served off the coast of Borneo, and was commodore at the Cape of Good Hope from 1852 to 1854. As captain of the Algiers, from 1854 to 1856, he was employed in conveying troops to the Baltic, and also at the blockade of Sebastopol. His last command was at the Nore, from 1864 to 1866.

TARNOCZY, MAXIMILIAN, Cardinal Archbishop of Salzburg, Austria, born October 24, 1806; died April 4, 1876. He entered the priesthood at an early age, was consecrated Archbishop of Salzburg in 1850, and cardinal in 1873. He was distinguished alike for his piety and zeal.

TAYLOR, Sir HENRY GEORGE ANDREW, a British general, born in 1783; died February 9, 1876. He served in the Mahratta campaign in 1803-'4, under the Duke of Wellington, and was wounded at Assaye; was subsequently Town-Major of Madras (1825), and held several brigade commands, terminating with the command of the Northern Division. He was created a G. C. B. in 1873.

TELEKI, Count DOMINIK, an Hungarian nobleman, born in 1810; died May 1, 1876. He had been director and honorary member of the Hungarian Academy, a member of the Hungarian Reichstag, where he belonged to the Deak party, and had written a number of historical essays.

TINDALL, LOUIS SYMONDS, a British admiral;

died February 4, 1876. He entered the navy in 1825, and obtained his first commission in 1832. He took part in the attack upon Chuenpe, in the taking of the Bogue forts, in the storming of the enemy's works close to Whampoa Reach, and in the capture of the last fort protecting the approaches to Canton, and in the other operations against that city. As a reward for his services on that occasion, he was made a commander in 1841. He obtained post-rank in 1852, and went on the retired list in 1864; became retired rear-admiral in 1868, and vice-admiral in 1874.

TOCQUEVILLE, HIPPOLYTE, Comte DE, a French senator, born in 1812; died in August, 1876. In 1871 he was elected from La Manche to the National Assembly, and in 1875 was elected by that body one of the life-senators, the fifty-seventh, by 840 votes. He was a member of the Left Centre.

TRAUBE, LUDWIG, a German physician, born January 12, 1818; died April 11, 1876. He was professor in the University of Berlin, and was one of the most distinguished clinical instructors of the nineteenth century.

VITALE, Count LUIGI S., an Italian statesman; died in January, 1876. He was one of the earliest champions of the unity and liberty of Italy. Having been appointed senator in 1848, he resigned a year later when a political change took place. He was again appointed senator in 1860, and was for a number of years secretary of the Presidential Bureau. For some years previous to his death he took no active part in the labors of the Senate, owing to his advanced age.

VOLKHART, WILHELM, a German artist, born June 23, 1815; died March 14, 1876. He was chiefly distinguished as an historical painter. His best works are: "The Murder of Rizzio" (1841), "Mary Stuart on the Scaffold" (1844), and "The Death of Admiral Coligny" (1846).

VOLLMER, ALEXANDER JOSEPH, a German philologist, born September 26, 1803; died December 5, 1876. His best work is a critical edition of "Gudrun" (1845). His edition of the "Nibelunge Not" and "Klage" introduced in 1845 the great collection of "Dichtungen des deutschen Mittelalters." Together with Conrad Hoffmann he published a corrected edition of the "Hildebrand-Lied" (1850), and in 1862 he published his corrections of the fragments of the "Skeireins."

WADDINGTON, JOSHUA, a British merchant, born in York, England, in 1792; died in Valparaiso, October 11, 1876. In 1817 he went to Valparaiso, where he established himself in business, his house becoming one of the largest on the Pacific coast of South America.

WALLNER, FRANZ, a German actor, born September 25, 1810; died January 19, 1876. He began his career as actor in 1830, with a traveling-troupe in Krems, Austria. During a trip through Germany he appeared within ten years on almost every German stage of any account. In 1854 he went to Berlin, where he built

within a few years his own theatre—the Wallner-Theater—which soon became one of the most famous in the city. In 1868 he retired to private life on account of his health.

WALPOLE, FREDERICK, M. P., born September 18, 1822; died April 2, 1876. He entered the Royal Navy in 1839, and served with distinction in the first Anglo-Chinese War, in the India waters, and during the operations on the Danube. In politics he was a Conservative. He contested Lynn unsuccessfully in November, 1865, and in 1868 was returned to Parliament for North Norfolk. He was the author of "Four Years in the Pacific," "The Anasayrii, or Further East," and other works.

WALPOLE, Sir ROBERT, born in 1808; died July 12, 1876. He was a lieutenant-general, and was created a K. C. B. in 1859.

WILDE, Sir WILLIAM ROBERT WILLS, Knt., M. D., F. R. C. S. I., a British physician; died April 19, 1876. He was Surgeon-Oculist in Ordinary to the Queen in Ireland, and was knighted in 1864 by the Earl of Carlisle, Lord-Lieutenant of Ireland, "to mark the sense of services rendered to statistical science, especially in connection with the Irish census."

WINTHER, CHRISTIAN, one of the most distinguished Danish poets, born July 29, 1796; died in the latter part of December, 1876. He published a large number of poems, all of them of great beauty. He also wrote a number of novels and juvenile works, among them "Tre Fortällinger" (1851), and "En Morskavstog" (1850), and a translation of Goethe's "Reineke Fuchs." He published a collection of his poems in nine volumes (1860). The Danish Diet, in 1851, granted him an annual pension of 1,000 rigsdalers.

WUTTKE, HEINRICH, a German historian, born February 12, 1818; died June 14, 1876. In 1848 he became a member of the Vorparlament in Frankfurt; was appointed professor in the university, and elected as Robert Blum's successor to the German National Assembly, where he helped to found the Grossdeutsche (Great German) party. He was the author of numerous works, of which "Die deutschen Zeitschriften und die Entstehung der öffentlichen Meinung" (1866; third edition, 1875) and "Geschichte der Schrift und des Schriftthums" (1 vol., 1872, *et seq.*) are especially valued.

ZIEGLER, FRANZ, a Prussian politician, born February 3, 1808; died October 1, 1876. As Mayor of Brandenburg, in 1840, he became very popular, was elected a member of the National Assembly of 1848, and was the only one of the tax-refusers who was arrested and tried for treason. From 1864 to 1870 he was a member of the Prussian Chamber of Deputies, and since 1867 a member first of the North-German and afterward of the German Reichstag. He was the author of several novels, among them "Nondum," "Landwehmann Krille," and "Der Bettler vom Capitol," and of a number of works on social questions.

ZUCCALMAGLIO, VINCENZ VON, a German

politician and author, born May 26, 1806; died November 23, 1876. In 1836 he published, under the *nom de plume* Montanus, his largest work, "Vorzeit," in eight volumes. In his "Geschichte des deutschen Volks," he advocated the unity of Germany under the leadership of Prussia.

The local indebtedness of the State is as follows:

	September 1, 1875.	September 1, 1876.
Debts of counties.....	\$3,044,578 90	\$2,984,099 48
Debts of townships, including debts incurred by boards of education, other than for separate school districts....	222,971 18	229,724 88
Debts of cities, first and second class.....	20,250,739 11	80,510,508 68
Debts of incorporated villages.....	981,869 64	1,074,069 05
Debts of school districts (special).....	1,507,938 48	1,814,591 57
Totals.....	\$25,957,589 21	\$86,059,978 56

The amount of reimbursable debt, therefore,

is:
State..... \$6,484,505 80
Local..... 86,059,978 56
Total..... \$92,544,484 86
Irreducible debt (consisting of school, college, and other trust funds)..... 4,207,716 90
Aggregate public debts in Ohio (State, local, and trust funds)..... \$96,752,200 76

The local indebtedness in this statement is reckoned to September 1, 1876, and the State debt to November 15, 1876.

The balance in the State Treasury on the 15th of November, 1875, was..... \$1,429,776 52
The receipts from all sources for the fiscal year ending November 15, 1876, were..... 5,159,667 96

Total amount of funds in the Treasury for the year..... \$6,589,444 48
The disbursements for all purposes during the year have been..... 6,008,617 44

Balance in the Treasury, November 15, 1876..... \$535,829 04

The taxes levied in 1875, collectible in 1876, were:

State taxes..... \$4,943,995 19
County and local..... 23,093,976 18
Delinquencies and forfeitures..... 940,211 00
Total..... \$98,893,189 87

The taxes levied in 1876, collectible in 1877, are:

State taxes..... \$4,646,620 54
County and local..... 23,394,685 98
Delinquencies and forfeitures..... 1,443,929 30
Total..... \$29,966,185 82

The taxable valuations in Ohio, as shown by the grand duplicate of 1876, are:

Real estate in cities, towns, and villages.... \$371,848,098 00
Real estate not in cities, towns, or villages.. 704,940,269 00
Personal property..... 590,681,569 00
Total..... \$1,667,469,966 00
Which is a decrease from the grand duplicate of 1875 of..... 1,105,596 00

This decrease arises as follows:

On personal property..... \$14,979,219 09
Increase in the value of real estate in cities, towns, and villages..... \$5,816,377 00
Increase in the value of real estate not in cities, towns, or villages..... 3,056,946 00

Total increase..... 18,873,822 00

Net decrease, as above..... \$1,105,596 00

From the foregoing statement it appears that the State debt was reduced during the year almost one and a half million dollars, and that the indebtedness of counties, townships, and school districts was reduced over \$800,000. But cities of the first and second class, and incorporated villages, have increased their indebtedness more than \$10,000,000 since the close of the fiscal year 1875.

The State School Commissioner complains of the neglect to furnish him with complete returns in all cases, thus rendering his statistics imperfect. The following is a summary of the leading facts shown by the reports received:

Number of youth of school age in the State in September, 1875.....	1,017,726
Number of school districts in the State.....	1,968
Number of sub-districts in township districts.....	18,627
Estimated value of school-houses, including grounds.....	\$20,960,567
Number of teachers actually employed.....	22,546
Number of pupils enrolled in the schools.....	722,963
Average number of pupils in daily attendance.....	447,189
Total of receipts, including balance on hand September 1, 1875.....	\$12,205,518 44
Total of expenditures.....	\$3,462,757 51

The Board of State Charities report that the aggregate numbers under public care or restraint in the State are as follows:

In charitable and benevolent institutions..... 12,548
In penal and reformatory institutions..... 16,960
Making a total of..... 29,508

The ratio of taxation for the maintenance of these classes is one and six-hundredths of one mill ($1\frac{6}{100}$) on each dollar of taxable property in the State; so that the citizen paying taxes on one thousand dollars' worth of property pays ten cents and six mills for the support of charitable, penal, and reformatory institutions, State, county, and city. This aggregate is reached, for the most part, by returns of actual numbers from State and county institutions. As a few counties failed to make full

returns, the actual aggregate is probably in excess of the number given above. The number of acres reported from eighty-one counties as occupied for Infirmary farms is 17,398, of which 12,906 acres are under cultivation.

The State Mine Inspector reports about 300 coal-mines in the State, of which all but twenty-five were worked in 1876. The total amount of coal raised was not over 3,000,000 tons, it having been a year of unusual dullness in the coal-trade, no one mining region working even half-time. Seventy serious and thirteen fatal accidents are reported.

The Adjutant-General reports the infantry force of the State to consist of nine regiments and three battalions, including seventy-five companies, with forty-two companies unattached; the artillery force includes two four-gun and ten two-gun batteries; the cavalry force consists of two unattached companies.

STATE SEAL OF OHIO.

The State Board of Centennial Managers reported to the Governor that a very successful exhibition had been made by the State at Philadelphia, and that the sum appropriated by the Legislature had more than sufficed for the needs of the Board, there being a surplus of several thousand dollars. The entire number of Ohio exhibits was 1,000, of which 250 received awards—a proportion larger than was obtained by any other State for the same class of articles.

Rutherford B. Hayes was inaugurated Governor on the 10th of January. In his inaugural address he called the attention of the Legislature to the great increase of local taxation and local indebtedness. He said:

The following statement, showing the increase of municipal taxation and indebtedness in the cities and large towns of Ohio, ought to arrest attention:

In 1871, in thirty-one of the principal cities and towns of the State, the average rate of taxation was twenty-three and one-tenth mills on the dollar. The total amount of taxes levied for all purposes was \$3,988,064. The total indebtedness was \$7,187,082.

In 1875, in the same cities and towns, the average rate of taxation was twenty-eight and three-tenths mills on the dollar. The total amount of taxes levied

for all purposes was \$12,361,934. The total indebtedness was \$20,800,491.

Under the provisions of the eighth article of the constitution, already referred to, the State debt, notwithstanding the extraordinary expenditures of the war, has been reduced from over \$20,000,000, the amount due in 1851, until it is now only about \$7,000,000. An important part of the constitutional provisions which have been so successful in State finances is the section which requires the creation of a sinking-fund, and the annual payment of a constantly-increasing sum on the principal of the State debt. Let a requirement analogous to this be enacted in regard to existing local indebtedness; let a judicious limitation of the rate of taxation which local authorities may levy be strictly adhered to; and allow no further indebtedness to be authorized except in conformity with these principles, and we may, I believe, confidently expect that within a few years the burdens of debt now resting upon the cities and towns of the State will disappear, and that other wholesome and much-needed reforms in the whole administration of our municipal government will, of necessity, follow the adoption of what may be called the cash-system in local affairs.

The Legislature met January 3d. One of its first proceedings was to pass an act repealing the "Geghan Law," the passage of which by the preceding Legislature had created much feeling, and was made an issue in the political campaign of 1875, the charge having been made that the law had been passed by a Democratic Legislature at the demand of the Catholics. The first session closed April 12, one hundred and seventy-three general laws and a large number of local and special laws having been passed. Among the general enactments were laws reorganizing the governments of the State institutions, the preceding Legislature having reorganized them on a different party basis when it came into power. The office of Controller of the Treasury was abolished. Several laws were passed limiting the taxing powers of municipal corporations, and restricting their powers to incur debts, and prohibiting appropriations beyond the amounts actually in the Treasury to the credit of the several funds. One law prohibits the making of contracts for special improvements, such as street-openings, paving, etc., until all the money has been placed in the Treasury by special assessment on the property benefited. A large part of the municipal indebtedness was made up of bonds issued for special improvements, and this enactment put a sudden stop to further work of the kind. A law was also passed for the protection of children engaged in public shows, preventing a child under fourteen years old being thus exhibited.

The Prohibition State Convention was held in Columbus, February 23d. The following State ticket was nominated: Secretary of State, E. S. Chapman, of Montgomery; Judge of Supreme Court, D. W. Gage, of Cleveland; member of Board of Public Works, Ferdinand Schumacher, of Akron.

The platform adopted was as follows:

1. That the making and vending of alcoholic liquor as a beverage is fraught with evil to property, peace, health, and life.

2. Government was organized to shield man against wrong and criminal acts of men.

3. Those who fail to secure this protection violate the design of government.

4. The most flagrant violation of government is found among those who make our government, and by those who give venders of liquor legal and political encouragement.

5. No government should contravene the purpose of its formation, by taking into public service those who are connected with the liquor-traffic, or addicted to the dangerous vice of drinking.

6. A Prohibition party is demanded. Others have failed to give or promise prohibition laws.

7. The women are the greatest sufferers. They are taxed for its support, and governed without their consent. They should have the means to protect themselves—the ballot.

8. Favors a well-maintained system of common schools, under the exclusive control of State management and money, and the widest diffusion of the teachings of the Bible.

A resolution was also adopted calling on the General Assembly to take steps to gather statistics showing the crime-increase and death

incident to the manufacture, sale, and use of alcoholic beverages.

The Republican State Convention met at Columbus, March 29th, and placed in nomination the following ticket: Secretary of State, Milton Barnes, of Guernsey County; Judge of Supreme Court, Washington W. Boynton, of Lorain County; member of Board of Public Works, James C. Evans, of Delaware County. The following platform was adopted:

1. The Republicans of Ohio renew their allegiance to the Republican party of the United States, and reaffirm its principles of free government as declared and defended by the grand men of 1776, and endeared to our times by the sacrifices of war and the blessings of an assured union of the States, based upon universal liberty.

2. The citizens of the several States of the Union are also citizens of the nation, and are equal under the Constitution and laws in all rights of citizenship, and are entitled to full and equal protection in their exercise.

3. We favor an honest and economical administration of the Government, and favor retrenchment and

CINCINNATI.

reform in the public service. Personal integrity and fidelity should be required of all officials, and when found to be dishonest and corrupt, they should be prosecuted and punished; and we cordially commend the vigorous prosecution of public offenders by the present National Administration.

4. The national credit and honor must be sacredly maintained.

5. We recognize gold as the true standard of values and the only steady and safe basis for a circulating medium, and declare that that policy of finance should be steadily pursued which, without unnecessary injury to business or trade, will ultimately equalize the value of the coin and paper dollar.

6. We favor a tariff for a revenue with incidental protection to American industry.

7. We stand by our system of free common schools supported by general taxation; there must be no division of the school-fund, and no sectarian interference with the schools.

8. To the soldiers and sailors who fought for the United States the nation owes a debt of gratitude, and they, and the widows and orphans of those who have fallen, are justly entitled to liberal bounties and pensions.

9. The thanks of the people are due to President Grant for his faithful adherence to Republican principles; and we assure him of the gratitude of the country for the distinguished services he has rendered as a soldier and civilian.

10. The Republican party of Ohio, having confidence in the honesty, ability, and patriotism of Rutherford B. Hayes, cordially present him to the National Republican Convention for the nomination of President of the United States; and our State delegates to that convention are instructed, and the district delegates are requested, to use their earnest efforts to secure his nomination.

The Democratic State Convention was held

at Columbus, May 17th. The meeting was stormy, and the contest over the platform and the selection of delegates was sharp. The State ticket put in nomination was as follows: Secretary of State, William Bell, of Licking County; Judge of Supreme Court, William E. Finck, of Perry County; member of Board of Public Works, H. P. Clough, of Butler County.

TYLER DAVIDSON FOUNTAIN, CINCINNATI.

The minority report, signed by eight of the twenty members of the committee, was adopted, and made the platform of the party, by a vote of 366 yeas to 308 nays. It was as follows:

Resolved, That, recognizing the duty of the Democratic party as the time-honored champion of the rights of the many against the aggressions of the few, to express its purposes in the pending currency conflict without reserve or equivocation, we declare that we shall urge against all opposition, come from what quarter it may, measures to effect the following objects:

1. The immediate and unconditional repeal of the Republican resumption law.
2. The defeat of all schemes for resumption which involve either contraction of the currency, perpetuation of bank issues, or increase of the interest-burden of the debt.
3. The gradual but early substitution of legal tenders for national-bank notes.
4. The issue by the General Government alone of all the circulating medium, whether paper or metallic.
5. No forced inflation, no forced contraction, but a sound currency equal to the wants of trade and industry, to be regulated in volume and gradually equalized with gold by means of appropriate legislation, such as making it receivable for customs, and interchangeable, at the pleasure of the holder, with a bond bearing an interest not to exceed 3.65 per cent., payable in gold, so that the volume of currency shall not be determined by the pleasure or caprice of either Congress or the banks.
6. A graduated income-tax, to meet at least the premium on gold needed to pay interest on the public debt.
7. That public policy and a sense of common jus-

stice require that the silver issued by the Government should be legal tender in payment of all debts, public and private, and that we demand the unconditional repeal of the so-called silver act, so far as the same limits the amount for which silver currency shall be a legal tender.

8. That we are in favor of a tariff for revenue only. And we denounce the Republican scheme of resumption, as intended and operating, through a large increase of the bonded debt and a sudden and enormous contraction of the currency, to double the burdens of taxation, rob debtors of their property, paralyze productive and commercial industries, cast laborers out of employment, and fill the land with want and misery, for the wicked purpose of doubling the values of money securities, and subjugating the mass of the people to the imperious sway of a money-oligarchy.

9. That the Democracy of Ohio present to the Democracy of the thirty-seven other sovereign States of the Republic the name of William Allen as the choice of Ohio for the presidency.

10. That the delegates at large of the St. Louis Convention, and the delegates appointed by the congressional districts, are hereby requested to vote in the National Convention in favor of William Allen for President, and to use all honorable means to secure his success.

The election was held October 10th. Great interest was taken in it, as being an indication of the probable result of the presidential election to take place a month later. The Republican ticket was elected, but by so close a vote that little effect was made on the national struggle. The vote stood thus:

SECRETARY OF STATE.

Barnes, Republican.....	317,858
Bell, Democrat.....	311,220
Chapman, Prohibition.....	1,608
Barnes over Bell.....	6,636
Barnes over all.....	4,778

JUDGE OF SUPREME COURT.

Boynton, Republican.....	318,772
Finck, Democrat.....	209,982
Gage, Prohibition.....	2,065
Boynton over Finck.....	5,889
Boynton over all.....	4,774

MEMBER OF BOARD OF PUBLIC WORKS.

Evans, Republican.....	318,873
Clough, Democrat.....	310,948
Schumacher, Prohibition.....	2,191
Evans over Clough.....	8,925
Evans over all.....	8,924

Twelve Republicans were elected to Congress and eight Democrats, nearly reversing the figures of the preceding congressional election, when thirteen Democrats and seven Republicans were chosen. The figures of the election for Congressmen were as follows:

DIST'S.			Majority
1.	Neal, R.....	14,144	Force, R..... 13,474 670 D.
2.	Banning, D.....	14,188	Matthews, R..... 14,053 75 D.
3.	Gardner, R.....	16,504	Savage, D..... 16,098 406 R.
4.	McMahon, D.....	18,557	Howard, R..... 18,461 96 D.
5.	Rice, D.....	20,548	Long, R..... 20,645 7,886 D.
6.	Cox, R.....	17,276	Hurd, D..... 15,861 1,915 R.
7.	Dickey, D.....	14,849	Bynn, R..... 18,518 1,341 D.
8.	Keller, R.....	17,728	Arthur, D..... 14,012 3,716 R.
9.	Jones, R.....	15,968	Poppleton, D..... 15,175 798 R.
10.	Foster, R.....	17,324	Hudson, D..... 17,058 271 R.
11.	Neal, R.....	15,218	Vance, D..... 14,689 574 R.
12.	Ewing, D.....	19,629	Nash, R..... 14,741 5,067 D.
13.	Southard, D.....	17,706	Barnhill, R..... 14,642 3,064 D.
14.	Finley, D.....	16,654	Grosce, R..... 11,067 5,587 D.
15.	Van Vorhes, R.....	14,620	Poston, D..... 14,116 504 R.
16.	Danford, R.....	16,089	Lawrence, D..... 18,337 2,250 R.
17.	McKinley, R.....	16,489	Sanborn, D..... 18,185 3,694 R.
18.	Monroe, R.....	16,906	Hall, D..... 12,772 4,134 R.
19.	Garfield, R.....	20,012	Casement, D..... 11,349 8,663 R.
20.	Townsend, R.....	17,894	Payne, D..... 14,521 3,373 R.

At the presidential election in November, five tickets were in the field, the result of the election being as follows:

Republican.....	890,098
Democratic.....	828,182
Greenback.....	3,057
Prohibition.....	1,686
Anti-Secret Society.....	76
Republican plurality.....	7,516
Republican majority over all.....	2,747

In April a strike among the coal-miners in Stark and Wayne Counties resulted in serious riots and destruction of property. The sheriffs of the two counties called upon the Governor for aid. The Adjutant-General and Attorney-General of the State were sent to the scene of disturbance, and, having reported the statements of the sheriffs to be correct, military companies were called out and sent to the assistance of the county officers. Several of the rioters were arrested, and the military remained in the disturbed district until peace was fully established.

OLD CATHOLICS. In Germany, the Old Catholic Church held its third Synod in May, at Bonn, under the presidency of the bishop, Dr. Reinkens. The statistical reports showed that in most parts of the country considerable progress had been made during the year. In the grand-duchy of Baden there was an increase of ten new congregations, of six priests, and of 2,210 members. Prussia and Hesse reported two new congregations each, and Oldenburg one. The total number of congregations and societies at present is: in Baden, 44; in Prussia, 35; in Bavaria, 81; in Hesse, 5; in Oldenburg, 2; in Württemberg, 1. Bavaria, which in 1875 had 3,505 families, and a population of 10,189, reported an increase of 76 families, but a decrease in the total population of 79. It was claimed, however, that, in consequence of the existing unfavorable circumstances, the figures were incomplete. Leaving out Bavaria, the statistics of the Church, as reported in 1876 and in 1875, compare as follows:

	1876.	1875.	Increase.
Congregations.....	87	79	15
Families.....	12,129	10,761	1,368
Total population.....	89,241	84,787	4,504

Three priests were ordained during the year, 427 persons confirmed, and 9 Old Catholic students were studying theology at the University of Bonn. The most important subject which this year engaged the attention of the Synod was the proposed abolition of priestly celibacy. About 20 congregations, and no less than 17 priests, united in asking for its immediate abolition. One of the most prominent lay members of the Church, Dr. Schulte, had previously written a special work on the subject, in which the enforcement of priestly celibacy was strongly condemned and its abolition recommended. The current of public opinion, among both the clergy and the laity, appeared to be strongly in favor of abolition. Nevertheless,

the synodal representation reported against the opportuneness of immediate legislation on the subject, and the Synod concurred in this recommendation by the overwhelming majority of 95 yeas against only 8 nays. This result was believed to have been brought about by the earnest remonstrance of Dr. Döllinger and one or two other leading men, who were said to have indicated their determination to withdraw from the movement in case the Synod should yield to the clamor against celibacy. The only concession which was made to the opponents of celibacy was the permission given to priests who had resigned their ecclesiastical functions to enter into the state of matrimony.

The fifth Old Catholic Congress was held at Breslau, September 22d to the 24th. The attendance was considerably smaller than in former years, only seventy delegates being present from the various congregations. The Congress passed a resolution requesting the bishop to order an annual house-to-house collection for the benefit of needy congregations, and another collection, either thrice a year in church, or by a rate on the parochial exchequers, for the "students and clergy fund." The Synodal Council was urged to make greater progress with the introduction of long-promised reforms, especially that of public worship wholly in the national tongue, the reform of liturgical books and services, and a general service of public confession before the reception of the holy communion. An organized system of parochial assemblies, for furthering the Old Catholic movement, was ordered to be drawn up. It was also decided to open negotiations with the German Protestants with a view to union.

The number of Old Catholic periodicals published in 1876 was six: the *Deutsche Merour*, at Munich, weekly, edited by Dr. Messner; the *Altkatholische Bote*, at Heidelberg, weekly, by I. Ricks; *Wahrheit-Pravda*, at Kattonitz, weekly, edited, in German and Polish, by Colbert; the *Friedensbote*, weekly, and the *Katholisches Volksblatt*, fortnightly, both edited by Pfarrer Grunert, at Königsberg; *Theologisches Literaturblatt*, fortnightly, by Prof. Reusch, of Bonn.

In Switzerland, the Christian Catholic organizations completed in 1876 the organization of their Church by the election of a bishop. As the Federal Constitution makes the establishment of new bishoprics dependent upon the consent of the Confederation, the Synodal Council of the Christian Catholics formally inquired of the Federal Council at Bern whether there was any objection on its part to the election of a Christian Catholic bishop. After the Federal Council had sanctioned the proposed step, the National Synod of the Church, in June, met at Olten, in the canton of Solothurn, and elected Dr. Eduard Herzog, pastor of the congregation of the city of Bern and Professor of Catholic Theology at the university of the same city, as its first bishop. Dr. Herzog received 117 votes, while the candidate of the more advanced par-

ty, Pastor Schröder, of Rheinfelden, polled 84. He was consecrated on September 18th, by Dr. Reinkens, the Old Catholic Bishop of Germany, in the church of Rheinfelden, in the canton of Aargau. From the report made to the Synod of Olten, it appears that the Church at this time numbered in Switzerland 55 organized congregations with resident priests, 25 societies which were as yet without priests, and 73,380 persons. Of the organized congregations, 25 are in the canton of Bern, 7 in that of Aargau, 3 in Solothurn, and 11 in Geneva. Fourteen of the twenty-two cantons were as yet without either congregation or society. The accession of several large congregations to the movement was shortly expected. The Synod greeted the union which the Old Catholic Church of Germany is striving to restore with the Protestant churches, and the Greek and Anglican churches, as "a great work longed for by the Founder of the Christian religion," and pledged its hearty cooperation with the movement. The Synod declared that it acknowledged "as the sole head of the Church Jesus Christ, under whom she governs herself autonomously in association with her episcopate, priesthood, and diaconate," and that it regarded as "Œcumenical Church assemblies only the seven councils recognized as such by the undivided Church of East and West." The use of the national language was declared to be permissible at the celebration of the mass, and to be in accordance with Christian antiquity, and a committee was charged with editing a ritual and missal in the German and French languages. It was further declared that the obligation to confess at least once a year, introduced in 1216 by the Fourth Lateran Synod, was not regarded by the Synod as binding, and that each man must decide, after conscientious self-examination, whether the reception of the sacrament of penance before the communion is necessary or advisable for him. In regard to the question of priestly celibacy, it was declared that the capacity for holding spiritual offices is not dependent upon the question whether the priest concerned is married or unmarried.

Two papers were published for the Old Catholics of Switzerland, the *Katholische Blätter*, at Olten, by Prof. Hassler, and *Le Catholique National*, at Geneva.

The number of students at the Old Catholic Theological Faculty of the University of Bern was 14—12 Swiss and 2 German. Two students were in the course of 1876 ordained as priests.

Dr. Herzog, the first bishop of the Christian Catholic Church of Switzerland, was born in 1841, at Schongau, in the canton of Lucerne. He studied theology in Lucerne, chiefly under his uncle, Prof. Leu, one of the foremost Catholic theologians of Switzerland. After his uncle's death he continued his theological studies at the Universities of Tübingen and Freiburg, and after his return to Lucerne was

ordained priest in 1867. The government of the canton of Lucerne, wishing to confer upon him the professorship of Biblical exegesis at Lucerne, sent him further to Bonn for a year's preparation. He held this position until 1872, when he resigned all his offices on joining the Old Catholic body. He was then called to the pastorate of the church at Crefeld, in Germany, but he was soon recalled to Switzerland, to become parish priest of Olten, in the canton of Solothurn. When the Catholic theological faculty was established in the University of Bern, Herzog accepted a professorship, and was, for some time, dean of the faculty, until the National Synod summoned him to be the first bishop.

The Old Catholics in Austria published, in 1876, two papers—the *Abwehr*, at Warnsdorf, with Pfarrer Nittel as editor, and the *Freie Staat*, at Vienna, under the editorship of Dr. Linder. Both papers are not exclusively devoted to religious questions, but also treat of secular affairs.

The Old Catholic movement has not gained any footing in France. The numerous writings of Abbé Michaud in defense of the movement have not led to the organization of congregations, and the abbé himself has left France, and accepted a call as professor to the Faculty of Old Catholic Theology at the University of Bern.

In Italy the organization called the National Italian Church chose Luigi Prota-Giurleo its bishop, at a general election, at which 10,250 votes were cast. (*See ITALY.*)

OREGON. The material and financial condition of the State of Oregon is quite promising. On the 14th of September, 1874, there was a balance in the State Treasury of \$138,178.97. During the two years following the receipts were \$679,380.04, and the disbursements \$753,664.47, leaving a balance, September 11, 1876, of \$63,894.54. The liabilities of the State consisted at that time of \$27,386 in soldiers' bounty and relief bonds, \$160,000 of Lock bonds, \$130,991.30 of Modoc War bonds, \$109,154 of wagon-road warrants, and \$289,665.01 of State warrants. The total appropriations for general expenses for the period of two years was \$388,743.16. The State tax was five mills on a dollar of taxable property.

The common-school fund now amounts to \$525,381.82. The sum of \$68,408.85 was distributed for the support of common schools during the period of two years. The fund accumulated for the support of the State University now amounts to \$75,492.20, and there are 22,826 acres of land belonging to the institution still unsold. The university building, at Eugene City, has been completed, and the structure and grounds, valued at \$52,000, have been given to the State by the people of Lane County, in consideration of having the institution permanently located there. The Agricultural College fund, so far as realized from sales

of lands already made, now amounts to \$16,231.08.

The State penitentiary on the 1st of September contained 104 inmates, a decrease of nine in two years. The total cost of maintenance during that period was \$49,308.95, and the earnings of the convicts amounted to \$37,521.80. The number of patients in the Hospital for the Insane and Idiotic was 218, an increase of twenty-three in two years.

The new State Capitol, though not finished, has been occupied by the government offices and the Legislature. The cost of the building thus far is \$225,555.70, and it is estimated that \$100,000 more will be required to complete it. It is 264 feet in length, with wings 80 feet in width, and transverse sections 160 feet in depth. It is three stories high above a heavy basement, and has a tower rising 180 feet.

The Board of Commissioners of Immigration, created by the act of the Legislature of October, 1874, was organized at the beginning of 1875, and expended about \$20,000 in twenty months for the promotion of immigration to the State. Circulars and pamphlets, relating to the advantages and resources of Oregon, were distributed in large numbers, and agencies were established in different parts of the Union and in Europe. The number of immigrants arriving in the State during the same period was 11,213.

The work of constructing a canal and locks around Cascade Rapids on the Columbia River has begun under the auspices of the United States Government, \$90,000 having been appropriated by Congress for the purpose. The total cost of constructing the canal, 2,600 feet long with three locks, and the removal of rocks, is estimated at \$700,000. A matter of great importance, and one occupying a large share of attention in the State, is the establishment of railroad connection with the States east of the Rocky Mountains, but no actual progress has been made in it during the year.

The ninth biennial session of the Legislature began at Salem on the 9th of September, and closed on the 21st of October. After several ballots for United States Senator, for the term of six years beginning March 4, 1877, Lafayette Grover was elected, receiving in joint convention 48 votes to 33 for Jesse Applegate, five for J. W. Nesmith, and four for T. F. Campbell. There was very little legislation of importance, two-thirds of the bills introduced being defeated, and those passed being for the most part such as were absolutely required to carry on the government, or relating to corporations and local interests. An amendment of the constitution granting the right of suffrage to women, and a compulsory education act, were among the defeated measures. Among those adopted was the following amendment to the criminal code:

That if any person shall sell, give, or cause to be sold or given, any intoxicating liquor to any minor in this State, without first obtaining the consent of

one of such minor's parents or guardian, in writing, or if any keeper of any saloon, bar-room, or other vender of spirituous or intoxicating liquors, within this State, shall harbor, permit, or suffer any minor to loiter or remain in or about such saloon, bar-room, or other place where such spirituous or intoxicating liquors are sold or kept for sale, or to engage in any game of cards, billiards, bagatelle, or other game, in such saloon, bar-room, or place aforesaid, either for amusement or otherwise, such person shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine not exceeding \$100, or by imprisonment in the county jail not exceeding six months, or by both, at the discretion of the court, and shall also forfeit any license such person may have to sell spirituous or intoxicating liquors in quantities less than one quart, or to keep such saloon, bar-room, or other place for the sale of such liquor. A justice's court shall have jurisdiction of the crime herein defined.

Committees were sent to visit the State University at Eugene City, and the Agricultural College at Corvallis, and report their condition. At the former a substantial brick structure was found, well built of good material, 114 feet long, 56 feet wide, two stories high, with basement and Mansard roof. The lower story was completed and ready for the furniture. The university had been organized, with Prof. J. W. Johnson for president, and a competent corps of teachers; and the 18th of October had been designated as the commencement of the first academic year. The location and grounds were pronounced beautiful, and the prospects of the new institution quite promising. At Corvallis a substantial frame building was found, situated on a farm of 85 acres, valued at \$10,000. The Agricultural College has been in operation for some years, and an annual appropriation of \$5,000 is made for its support. The State is entitled to have 60 pupils educated free of charge, but the number for the last two years has been only 47.

The Democrats of the State held a convention at Salem, on the 26th of April, for the purpose of selecting delegates to the National Convention, nominating candidates for district judges, prosecuting attorneys, presidential electors, and a member of Congress, and choosing an Executive Committee to manage the canvass for the party. There was to be no election of State officers. Lafayette Lane was nominated as the candidate for member of Congress, and H. Klippel, W. B. Laswell, and E. A. Cronin, as candidates for presidential electors. The platform of 1875 was reaffirmed at length, preceded by resolutions declaring that the common schools were the special charge of the Democratic party, favoring religious freedom, deprecating sectarian influence in public affairs, and commending the national House of Representatives for its work in effecting reforms. An additional resolution was adopted calling upon Congress to indemnify the sufferers by the Modoc War.

The Republican State Convention was held on the 8d of May, at Portland. Richard Williams was nominated for Congressman, and W. H. Odell, J. W. Watts, and J. C. Cartwright,

for presidential electors. The platform adopted was as follows:

The Republican party of Oregon, in convention assembled, makes this declaration of its principles and policy:

Resolved, That in this Centennial year of American Independence we again affirm our devotion to those fundamental principles upon which the republic and the Republican party were founded. Among these are:

1. Unswerving fidelity to the Constitution, and the perpetuity of the Union.

2. The preservation of the liberties and equal rights of all citizens throughout the nation, and the impartial administration of the laws in every part of the country, for the protection and enforcement of public and private rights, and the punishment of violence and crime.

3. Pure and economical administration of every department of the Government, State and national, and we pledge the support of the Republican party to all measures honestly proposed and wisely designed to promote the moral and material prosperity of the people.

4. That a well-instructed people alone can be permanently free; it is therefore essential that the public-school system shall be maintained in order that every child may receive such education as will fit him for useful citizenship; and we are unalterably opposed to any division of public-school money for any purpose whatever.

5. That while we are in favor of a revenue for the support of the General Government by duties upon imports, sound policy requires such adjustment of those imposts as to encourage the development of the industrial interests of the whole country, and we commend that policy of national exchange which secures to the working-men liberal wages, to agriculture remunerative prices, to mechanics and manufacturers an adequate reward for their skill, labor, and enterprise, and to the nation commercial prosperity and independence.

6. That the best interests of all citizens of every condition and pursuit imperatively demand the speediest return to a specie basis of values and currency, and we hail with gratification the act of a Republican Congress definitely providing for that end.

7. That we are in favor of the untiring prosecution and punishment of public fraud and crime, straggling and peccation in office, wherever existing, and we repeat the injunction, "Let no guilty man escape."

8. We demand that our national candidates shall be men of tried integrity, who will carry out this policy of reform, and preserve inviolate the great results of the war.

9. We arraign the present State administration, and its supporters, as corrupt and profligate. They have robbed the common-school fund; they have been guilty of partisan legislation; they have squandered our patrimony in lands, and heaped upon us a debt of over \$300,000 in direct violation of the constitution.

An additional resolution was adopted "amid great cheering," declaring James G. Blaine to be the choice of the convention for President of the United States.

There was an election on the 5th of June, at which only local officers and members of the Legislature were chosen. Of the new Senators the Republicans elected seven, the Democrats seven, and the "Independents" one, while four Republican and eleven Democratic Senators held over from the previous term. Of the Representatives chosen, 80 were Republicans, 27

Democrats, and 8 Independents. The Legislature was therefore composed of 18 Democrats, 11 Republicans, and one Independent in the Senate, and 80 Republicans, 27 Democrats, and 8 Independents in the House.

Presidential electors and a member of Congress were voted for on the 7th of November. An official canvass of the vote was made by the Governor and Secretary of State on the 4th of December. The following result was ascertained: For electors, Odell 15,206, Watts 15,206, Cartwright 15,214, Klippel 14,136, Cronin 14,157, Laswell 14,149, the three "Greenback" candidates respectively 507, 509, and 510, and scattering 4; for member of Congress, Williams 15,847, Lane 14,229, and scattering 8. At the close of the canvass Governor Grover announced that in the matter of the election of a member of Congress a certificate would issue to Richard Williams. In the matter of electors a protest had been filed against the issue of a certificate to Mr. Watts, which raised "grave questions as to jurisdiction and the law," and as the certificate need not issue until the 6th of December, the question could be investigated and argued. A hearing was given by the Governor on the 5th. The protest alluded to was as follows:

To His Excellency L. F. Grover, Governor of Oregon: The undersigned citizens of, and legal voters in, the State of Oregon, do hereby protest against the issuance of a certificate of election to John W. Watts, a candidate for presidential elector at the late election held on the 7th day of November, 1876, for the reason that on that day, and until about the 13th or 14th of the same month, he was a postmaster duly appointed and qualified as such by the proper authorities of the United States; and therefore ineligible as an elector under section 1 of Article II. of the Constitution of the United States. We claim and insist that the votes cast for the said J. W. Watts at that election amounted to nothing—the same as if they had never been cast, and he being ineligible to the said office, it is the duty of the proper canvassing officers to give the certificate of election to the three qualified candidates having the highest number of votes.

December 2, 1876.

R. R. THOMPSON,	JAMES K. KELLY,
J. C. AINSWORTH,	W. H. EFFINGER,
GEO. L. CURRY,	W. W. THAYER,
C. B. BELLINGER,	B. JENNINGS,
J. S. WHITE,	B. B. ACKER,
J. T. MILLER,	A. D. SHELBY,
J. H. REED,	T. PATTERSON.
W. F. TRIMBLE,	

Indorsed, filed, December 2, 1876.

A counter-protest signed by J. C. Cartwright, W. H. Odell, and J. W. Watts, was presented, claiming that the Governor and Secretary of State, as a canvassing board, had only the ministerial function of ascertaining what candidates had a majority of votes, and certifying to their election. The law was quoted at length in support of this position. Having heard arguments on both sides, the Governor took the matter under advisement, and on the morning of the 6th announced that he had decided not to give a certificate of election to Mr. Watts on account of his ineligibility, but to give it

instead to E. A. Cronin, who had received the next highest number of votes. Three certified lists of electors were accordingly signed by the Governor, bearing the names of W. H. Odell, J. C. Cartwright, and E. A. Cronin, and the great seal of the State was affixed by the Secretary of State, and at noon the candidates of both parties for electors met in a committee-room connected with the Senate-chamber in the Capitol at Salem. The certified list of electors, in an envelope, was handed in by the Secretary of State, and taken by Mr. Cronin, who refused to give it up to his colleagues. Messrs. Odell and Cartwright proceeded to organize the electoral college, and Watts, while claiming to have been duly elected, resigned, and was immediately elected by the other two to fill the vacancy. Three votes were cast by

and for which conduct he has rendered himself unworthy to sit among honorable men as a Senator of the United States, and we request that he be, for criminal, dishonorable, and unworthy conduct, refused a seat in that honorable body.

Resolved, That the Democracy of Oregon in attempting to steal the electoral vote of Dr. John W. Watts and transfer it to E. A. Cronin have proved themselves capable of as great frauds as their rebel confederates in Louisiana or Florida, and fully justify the charge made by President Grant in his message, that a large percentage of the people remaining in the Union sympathized with the rebellion, and made an enemy in the rear almost as dangerous as the more honorable enemy in the front.

On the 19th of December Governor Grover published in pamphlet form an elaborate argument in support of his action. He took the ground that Mr. Watts, being postmaster at Fayette on the 7th of November, and ineligible to the office of presidential elector, the votes cast for him were null. He maintained that it was his duty to take notice of the facts and the law, and cited numerous authorities in support of his position.

An investigation by a United States Senate committee in January and February, 1877, developed the fact that Governor Grover had been in consultation by telegraph with prominent Democrats in New York prior to his decision, and acted under their advice. The decision of the Electoral Commission in February, 1877, was in favor of the votes of Odell, Cartwright, and Watts. It was maintained before the Commission that Cronin could not be elected by a minority of votes, and that the ineligibility of Watts merely occasioned a vacancy which was to be filled by the other members of the electoral college, and that Watts, when chosen to fill such vacancy, was not ineligible, having resigned the office of postmaster on the 14th of November. It was also claimed that the Governor's certificate was not conclusive as evidence of legal appointment, and should not be regarded unless it was in accordance with the result of the election as shown by the official canvass of votes. This was the ground finally taken by the Commission.

LAFAYETTE GROVER, who has been elected by the Legislature of Oregon to succeed James K. Kelly in the Senate of the United States, was born in Bethel, Oxford County, Me., in 1828. He was educated at Bowdoin College, and afterward studied law in Philadelphia, where he was admitted to the bar in 1850. He soon after went to Oregon, and took up his residence at Salem. He was elected Prosecuting Attorney of the Territory in 1851, and in the following year Auditor of Public Accounts. He also served three terms in the Territorial Legislature, and in 1854 was appointed a commissioner to adjust the claims of citizens against the United States. Two years later he was one of the commissioners to investigate claims arising out of the Indian war of 1855-'56. In 1857 he was a prominent member of the convention which framed the constitution

STATE SEAL OF OREGON.

them for Hayes and Wheeler, and certified in due form, but the certificate of the Governor to the appointment of electors was not annexed, Mr. Cronin persisting in his refusal to give it up. The latter then, assuming that the virtual refusal of the others to act with him caused two vacancies in the legal college, chose J. N. T. Miller and John Parker to fill them, and two votes were cast for Hayes and Wheeler, and one for Tilden and Hendricks. The certificate of the Governor was affixed to these votes. Both sets of votes were sent by messenger to Washington, and delivered in due time to the President of the Senate.

An indignation meeting of Republicans was held at Salem, on the evening of December 6th, at which the following resolutions were adopted:

Resolved, That the conduct of Governor Grover in attempting to rob the people of Oregon of their choice of an elector to whom they had given over 1,100 majority of their votes is a glaring outrage upon their rights; is striking a blow at the fundamental principle upon which the Government rests—the free suffrage of the citizens—is a direct violation of his oath to support the Constitution of the United States and of the State of Oregon and his oath of office,

of the State, and was elected the first Representative of the new State in Congress, taking his seat in February, 1859. He subsequently resumed the practice of law, but from 1867 to 1870 was engaged in the milling business. He was elected Governor of the State in 1870, and reelected in 1874 for the term ending Septem-

ber, 1878. He has always been a Democrat in politics.

Governor Grover resigned his office on the 1st of February, 1877, and it was immediately assumed by Stephen F. Chadwick, the Secretary of State, upon whom it devolved by law until a new Governor should be chosen.

P

PALACKY, FRANZ, a Bohemian historian and statesman, born June 14, 1798; died May 26, 1876. He was educated in Presburg and Vienna, and, exposed to Bohemian influences, he received as a boy those impressions which characterized his after-course in literature and politics. In 1818 he published, together with Schafarik, the "Elements of Bohemian Poetry," in Bohemian. The fragments of a "Theory of the Beautiful," which appeared three years later, were succeeded, in 1823, by his "General History of Æsthetics," which gained for him considerable celebrity. In 1823 he went to Prague, where, in the employ of a nobleman, he studied the libraries and archives of old Bohemian families, and thus obtained a knowledge of the history of the nobility of that country, which has never been equaled. In 1827 he was appointed editor of the German and Bohemian journals of the National Museum, to which he contributed a large number of valuable articles. This position he retained until 1838, when he went to Italy. In 1848 he obtained a seat in the Government Council of Bohemia. He then took an active part in the Slavic Congress, and was for a time the leader of the Slavic parties in the Reichstags of Vienna and Kremsier. In 1861 he was created a life-member of the Austrian Herrenhaus. He was also for a great number of years a member of the Bohemian Diet. His principal work is the "Geschichte von Böhmen" (5 vols., 1836-'67), which he wrote at the instance of the Government. Among his other works are: "Würdigung der alten böhmischen Geschichtschreiber" (1830); "Dobrowski's Leben und gelehrtes Wirken" (1833); "Literarische Reise nach Italien im Jahre 1837, zur Aufsuchung der Quellen der böhmischen und mährischen Geschichte" (1838); "Die ältesten Denkmäler der böhmischen Sprache" (together with Schafarik, 1840); and "Die Idee des österreichischen Staates" (1865). He also established (1869) a collection of "Documenta" relating to the life and doctrines of John Huss, which is of great importance.

PARAGUAY (REPÚBLICA DEL PARAGUAY).* The little official news received from Paraguay during 1876 was of inconsiderable importance, though it gives abundant proof of a gradual coming round. The country now enjoys peace; its industries are receiving new development,

and coffee-planting has been greatly extended. Over 1,000 women were sent to a single plantation, which bids fair to be, in time, one of the finest coffee-plantations in South America. The payment of the interest on the home-loan, or *Deuda Interna*, has been resumed. The receipts of the custom-house are even larger than those of Buenos Ayres. The present form of government is cheap and economical, and, apparently, better suited to the country than other more complicated systems, too costly for the republic to support, and too weak to maintain law and order. Bondholders regard the change as a happy one for the Banda Oriental, and look forward hopefully to the early resumption of the payment of Paraguayan coupons in London.

PATIN, HENRI JOSEPH GUILLAUME, a French scholar, born August 21, 1798; died February 13, 1876. He was educated at the Normal School in Paris, where he became, in 1815, Master of Conferences of Ancient and Modern Literature. In 1818 he was appointed Professor of Rhetoric in the Collège Henri IV. He soon distinguished himself by his method of instruction, while he also gained some reputation as an author by his eulogies on Bernardin de Saint-Pierre (1816), Le Sage (1822), Bossuet (1824), and by his "Discours sur la Vie et les Ouvrages de Thou" (1827). In 1830 he succeeded M. Villemain in the Sorbonne, and after the death of Lemaire, in 1833, he was appointed to the chair of Latin poetry. Here he showed a profound knowledge of ancient literature, and a decided predilection for the authors of the age of Augustus, and particularly for Horace, on whose works he was considered one of the best authorities. In 1865, upon the death of M. Leclerk, he was elected Dean of the Faculty of Letters. He was elected a member of the French Academy in 1843, was created an officer of the Legion of Honor in 1845, and a commander in 1865. He was the author of "Études sur les Tragiques Grecs" (3 vols., 1841-'48), and contributed a number of articles to the *Revue Encyclopédique*, *Revue des Deux Mondes*, etc.

PAYNE, JOSEPH, a British educator, born in 1808; died April 30, 1876. He devoted himself early to the cause of education. After having retired for some years from active work, he was appointed, in 1873, to the newly-founded professorship of education in the College of Preceptors, the first chair in any pub-

* Statistical details will be found in the volumes of the ANNUAL CYCLOPEDIA for 1874 and 1875.

lic institution in England assigned to that subject. He devoted himself in this position, and also by his writings, to the promotion of education, making the improvement of methods of teaching his special object. He was the author of "Lectures on Education," and numerous lectures and pamphlets on allied subjects. He also took an active part in the work of the Women's Education Union. Mr. Payne contributed several papers to the "Proceedings" of the Philological Society, chiefly on English dialects, and the relation of Old English to Norman French. Among his other publications were school-books in English literature, entitled: "Studies in English Poetry" (fifth edition, 1864), "Studies in English Prose" (1867), and "Select Poetry for Children" (fifteenth edition, 1868).

PENNSYLVANIA. The funded debt of the State of Pennsylvania amounts to \$22,865,021.58, and there is \$118,929.11 of unfunded debt, making the total indebtedness on November 30, 1876, \$22,978,950.69. The assets of the sinking-fund amounted to \$9,054,910.92, leaving \$13,924,039.77 as the public debt unprovided for. The receipts of the sinking-fund for the year amounted to \$2,462,599.23, and the payments from it to \$1,622,607.03, leaving a balance of \$839,992.25 in cash in the fund. The rest of the fund consisted of bonds of the Pennsylvania Railroad Company (\$4,914,918.67), and bonds of the Alleghany Valley Railroad Company (\$3,800,000). The bonds of the State become due as follows:

Over-due, not presented for payment, and upon which interest is stopped.....	\$5,991 58
Five per cent. gold loan, payable August, 1877.....	8,245,500 00
Five per cent. gold loan, payable August, 1878.....	273,000 00
Six per cent. gold loan, payable August, 1879.....	400,000 00
Five per cent. gold loan, payable August, 1882.....	395,000 00
Four and one-half per cent., payable August, 1882.....	67,000 00
Six per cent. currency, redeemable February, 1877, and payable within five years.....	7,882,800 00
Six per cent. currency, redeemable February, 1882, and payable within ten years.....	9,995,800 00
Six per cent. currency Agricultural College Loan, payable 1923.....	500,000 00
Total.....	\$22,865,021 58

It is probable that a new five per cent. loan will be issued, to take the place of a considerable portion of the bonds which mature in the next five years, the aggregate being nearly \$12,000,000.

The receipts and disbursements of the Treasury for the last fiscal year were as follows:

RECEIPTS.	
Balance in Treasury November 30, 1875.....	\$993,207 27
Receipts.....	6,073,890 87
Total.....	\$7,072,097 64

DISBURSEMENTS.	
Ordinary expenses.....	\$4,505,518 82
Loans redeemed.....	254,187 05
Interest on loans.....	1,827,899 15
	<u>\$6,087,100 02</u>

Balance in Treasury November 29, 1876.... \$984,997 62

The receipts of the general fund, from which all expenditures of the government are made

except those on account of the public debt, were \$4,670,842.72, and the estimated receipts for 1877 fell to \$3,890,251.37. A portion of this is derived from the tax on the stock of corporations. Heretofore one-third of the revenue from this source has gone to the sinking-fund, and two-thirds to the general fund, but an act of February last reversed the proportion, and now the general fund receives but one-third. The receipts of the general fund from the corporation stock tax in 1876 were \$1,432,141.58; estimated receipts for 1877, \$650,000.

The railway system of the State consists of 5,585½ miles of main and branch roads, and 2,748½ miles of side-track. There is also 840 miles of projected road, making the total length of track laid and in contemplation 9,174½ miles. There are also 429 miles of street railways in cities, and 425 miles of underground railway in the anthracite coal-regions, not included in this statement. The total length of canals in the State is 784 miles, and of telegraph-wire in use 20,340 miles.

The number of insane persons in this State is 4,625, of whom 1,167 were in April supported in the State asylums. Of these there were three then occupied: that at Dixmont, containing 491 inmates; that at Harrisburg, 416; and that at Danville, 260. The Danville Asylum is not yet completed, and will ultimately have accommodations for 700 patients, and that at Warren, now in course of construction, will have the same capacity. The total capacity of the four asylums, when finished, will be 2,300.

SCHUTTKILL BRIDGE.

The schools for soldiers' orphans, which were established in 1864, have had 8,580 children in their charge, and have cost the State over \$5,000,000 for maintenance. The number of pupils remaining in the schools on the 1st of September was 2,641. The annual expense for several years has been about \$400,000.

The prison accommodations of the State are reported to be altogether inadequate to its needs. The Eastern Penitentiary at Philadelphia, which has only 530 cells, contained 944 convicts at the close of the year.

The National Guard of the State consists of 870 officers and 8,996 enlisted men.

The annual session of the Legislature began on the 4th of January, and reached a final adjournment on the 5th of May.

The general appropriations for the ordinary expenses of the government, common schools, and interest on the public debt, amounted to about \$3,800,000. The principal items were, \$1,325,000 for interest on the debt, \$1,000,000 for common schools, \$510,000 for the judicial department of the government, \$475,000 for

the legislative and \$175,000 for the executive department, and \$95,000 for printing. Besides these there were special appropriations for various purposes amounting in the aggregate to nearly \$2,000,000. The largest of these were, \$380,000 for soldiers' orphans' schools, \$168,000 for the Reform-School at Morganza, \$150,000 for the Insane Hospital at Warren, \$110,000 for the National Guard, \$100,000 for building the Institute for the Deaf and Dumb, \$96,000 for the Danville Hospital for the Insane, \$89,500 for the Dixmont Hospital for the Insane, \$83,000 for the support of the indigent deaf and dumb for 1876, \$75,000 for the State normal schools in 1875, \$62,000 for the support of the indigent deaf and dumb for 1875, \$55,000 for the military display at the Centennial Exhibition, \$50,175 for the Eastern Penitentiary, \$50,000 for the normal schools in 1876, \$45,000 for the Philadelphia Blind Asylum, \$42,000 for the House of Refuge at Philadelphia, \$40,000 for the State Board of Centennial Managers, \$35,000 for the Hospital of the Insane at Harrisburg, \$33,000 for the

Training-School at Media, \$30,500 for the Western Penitentiary, and \$25,000 each for the Southeastern Insane Hospital, the Wilkesbarre Hospital, and the Jewish Hospital at Philadelphia.

The general legislation of the session was unimportant. Among the acts passed was one amending and consolidating the laws relating to game and fish; one providing for the refunding and redemption of the indebtedness of counties, cities, towns, townships, boroughs, school-districts, and other incorporated districts; one providing for the punishment of the offense of unlawfully obtaining the keys of bank vaults, safes, and other depositories of money; one establishing a State Board of Agriculture; and one authorizing the Governor to appoint a commission to devise a plan for the government of cities. Among the measures defeated was one providing for an amendment of the constitution of the State, transferring the Capitol from Harrisburg to Philadelphia.

While a bill was pending to regulate the amount of toll, and other charges to be col-

BRIDGE OVER THE SUSQUEHANNA AT HAVRE DE GRACE.

lected by boom companies, several members were accused of bribery, and an investigation was ordered. The result was, the expulsion of Emile J. Petroff and Martin F. Lynott from the House of Representatives for conduct unbecoming members.

The committee appointed in 1875 to investigate the accounts of the Treasury made a report, the main points of which were that about \$3,400,000 had been diverted from the sinking-fund without constitutional warrant, and that an average monthly balance of \$2,100,000 was retained in the hands of the Treasury for a period of twelve years, beginning with 1862, and no money accounted for as interest on the same.

The commission to devise a plan for the government of cities, authorized by the act already mentioned, was appointed after the close of the session of the Legislature, and carried on its investigations through the rest of the year, but was not prepared to report at the beginning of the session of 1877.

There was no election of State officers this year. A convention was held by the Democrats at Lancaster on the 22d of March, for the purpose of selecting delegates to the National Convention, nominating presidential electors, and giving expression to their political principles. William A. Wallace, Heister Clymer, A. H. Dill, and H. M. North, were chosen as delegates at large to the St. Louis Convention, and Charles R. Buckalew was nominated at the head of the electoral ticket. The platform adopted was as follows:

The Democracy of Pennsylvania reassert their devotion to all the provisions of the Federal Constitution and to a perpetual union of the States; pledge themselves to a rigid fidelity to the public trust; to a pure and economical administration of the Federal, State, and municipal governments; to local self-government in every section; to the honest payment of the public debt, and to the sound preservation of the public faith. They see with humiliation and alarm the evidences of bribery, fraud, and speculation in high places, the distress that prevails, and the widespread financial ruin that impends over the people of the State, and they charge that these evils are

the direct results of the personal government, unwise legislation, vicious financial policy, extravagance, and corruption of the Republican party. They declare—

1. That the civil service of the Government has become corrupt, and is made the object of personal gain, and infidelity to public trust has become the rule and not the exception. We believe that honesty, capacity, and fidelity, are the only tests of fitness for public station, and that the wholesome penalties of the law should be used with rigor to enforce official accountability.

2. That the recent and repeated exposures of fraud and corruption in the administration of public affairs call for a searching and thorough investigation of the conduct and condition of every branch of the public service, to the end that all corrupt practices may be brought to light, and that all who have abused and betrayed their public trusts, whatever may be their station, may be exposed and punished; and we urge those in charge of this subject at Washington to a prompt, thorough, and exhaustive examination of their respective fields of labor.

3. That retrenchment and economy are indispensable in the Federal, State, and municipal adminis-

tration as an essential means toward lessening the burdens of the people; and we commend the efforts of the majority of the House of Representatives for the reduction of the expenditures of the Federal Government to a just standard, and their determination to lessen the number of useless officials.

4. That general amnesty of all persons implicated in the late rebellion against the Government of the United States who have not already been relieved from disabilities by the action of Congress and of the President would be an allowable and proper exercise of Governmental power in the year of the Centennial celebration of American Independence, and that the recommendation of such measure by President Grant in a public message and its indorsement and passage by a Republican House of Representatives at a former session constitute full proof that such a measure is fit, judicious, and timely.

5. That we approve of those provisions of the State constitution which protect not only the school-funds but other public moneys from appropriation to sectarian uses, and that they fitly illustrate the doctrine of the separation of Church and state, which always has been a cardinal one with the Democratic party.

HARRISBURG, FROM THE WEST BANK OF THE SUSQUEHANNA.

6. That the statute for the resumption of specie payments on the 1st day of January, 1879, is impossible to execute. It is a deliberate proclamation that at that date the United States will go into bankruptcy. It paralyzes industry, creates distrust of the future, turns the laborer and producer out of employment, is a standing threat upon the businessmen, and ought to be forthwith repealed.

7. That gold and silver are the only true basis for the currency of the republic, and that Congress should take such steps for the resumption of specie payments as will most surely and speedily reach that result, without destroying the business interests of the people.

8. That the present depression of all our national industries, which checks the wholesome flow of capital through the channels of enterprise, and denies to honest labor a decent livelihood, is the direct, inevitable fruit of extravagance, and of reckless and dishonest Republicans tampering with the finances of the country; and we denounce the authors of that legislation as officials who have unsettled the foundations alike of the State and of the home. We

call upon the people to aid us to halt them in this fatal career, and to set their faces in the direction of practical measures which shall eventually enable the Treasury of the United States to keep its plighted faith with rich and poor alike. We demand legislation through the power of the Federal Government which shall give us performances for promises, and restore solvency to the nation by restoring property to the people.

A resolution presenting the name of the Hon. Jeremiah S. Black as the candidate for President was laid on the table, and the delegation was instructed to vote as a unit on all subjects.

The Republican Convention was held at Harrisburg on the 29th of March. Edward McPherson presided, and J. D. Cameron, Wm. R. Leeds, H. M. Hoyt, and R. W. Mackey, were chosen as delegates at large to the National Convention, and fifty-four other delegates were appointed. Benjamin H. Brewster headed the

electoral ticket. The following resolutions were adopted:

Resolved, That we hereby reaffirm the platform adopted by the Republican State Convention at Lancaster in 1875, and, in view of recent events at Washington, we emphatically indorse that part of it which demands honest men in office—men with brains enough to know dishonesty when they see it, and courage enough to fight it whenever they find it. The Republican party is committed by its origin, its traditions, its history, and its duties, to an intrepid and honest administration of public affairs, and wherever in national, State, or municipal life maladministration has existed, or does exist, we demand that it be exposed, corrected, and the guilty punished, and to this end we pledge the full measure of our support as citizens and as voters.

Resolved, That we look to the Cincinnati Convention to give us candidates for President and Vice-President who are above suspicion, and in whose personal integrity the nation can most surely trust, and that we also look to our friends throughout the State to make sure that in presenting the candidates for Congress and the Legislature they secure those only who are known to be honest, capable, and faithful to the Constitution.

Resolved, That the Republicans of Pennsylvania, having nothing in their past history which they wish to blot out, or to apologize for, or would have the nation forget, arraign the Democratic leaders in Congress, and their abettors, for the preference shown to deadly principles and for the subserviency shown to the defunct leaders of the late Confederacy, now dominating for the removal from office of Union soldiers, and the appointment of Confederate soldiers; for the repeated indications of their purpose, only controlled by fear, to open the Treasury of the nation to alarming and unjust pecuniary demands from the insurrectionary States, for the persistent effort to force amnesty upon men too proud or unrepentant to ask it, or too guilty to deserve it, and for the combined recklessness and cowardice of their course on the final question, and the recklessness which mischievously holds out a threat to overthrow existing laws and a cowardice or incapacity to originate a substitute for them, all of which exposes the Democratic party as without national instinct or an unsectional impulse, or an affirmative policy, and as unfit to be trusted by the country, as, when last under their control, they madly hurried it into the vortex of civil war.

Resolved, That recent events in the late slave States clearly expose a purpose on the part of the Democratic party to seize them all and wield them as a unit in the next presidential election, and to this end brutal and bloody conspiracies have been made to coerce voters, and base legislative conspiracies are at this moment in operation in order that an unprincipled and fraudulent majority may deprive the properly-chosen officers of their rights; and as against these outrages we take an appeal to the people of the nation.

Resolved, That the common safety demands that our public schools shall not only be free to all, but shall be preserved from all special or partial control. All attempts to divide the school-fund for any purpose whatever, or to divert any portion of it into a channel not under popular control, is to be frowned upon and resisted with unyielding firmness. The recent defeat in the Democratic Legislature of Maryland of the constitutional amendment to secure the common-school fund of that State against division reveals at once a great danger, and its source, and, with other like facts, makes plain the duty of Congress to submit such an amendment to the Constitution of the United States as, when adopted, will effectually defend the common-school system from all enemies, open or covert.

Resolved, That the attempt of the Democratic House of Representatives at Washington, in the

face of the depressed condition of American industry, to inflict upon the nation a free-trade tariff, is an insult to the intelligence of the people, and an evidence of the inability of the Democratic party to meet the present wants of the country. The remedy for our suffering is in a higher, not a lower tariff.

Resolved, That the neglect of the public business of the State by the present majority of the lower branch of a Legislature, and the plainly apparent purpose of the majority to prolong the session, with the sole object of thereby increasing their pay, is worthy of the strongest censure, and must, if persisted in, awaken the just indignation of the outraged people.

Resolved, That the uniform policy of the Republican party of Pennsylvania in keeping down the taxation burdens while steadily reducing the public debt should be persistently maintained. When the debt is wiped out, the public expenditures should be confined to the civil expenses of the State government, the support of her public institutions, and the soldiers' orphan-schools, and efficiency of her reformatory and penal institutions.

Resolved, That the recommendation by Governor Hartranft of a uniform system of municipal government throughout the State, and of the adoption of effective measures to prevent a further increase of municipal indebtedness, is worthy of all commendation, and should be carried into practical operation as early a day as possible.

Resolved, That in recognition of the eminent services, both in the field and cabinet, the rare executive ability and unswerving rectitude of Governor John F. Hartranft, the Republicans of Pennsylvania, with great pride, present his name to the consideration of the Republicans of the United States for nomination to the presidency of the United States, in the full confidence that the great qualities which have rendered his administration of State affairs a model, even by the confession of political foes, will insure as wise, as capable, as unflinching, as honest, and as successful a conduct of the vast and varied interests of the nation; that the delegates from Pennsylvania in the National Convention are hereby instructed to present Governor Hartranft's name to the convention as the choice of Pennsylvania, and to give him an earnest, constant, and united support, and upon all questions to be brought before or arising in the convention to cast the vote of Pennsylvania as a unit, as the majority of the delegation shall direct.

At the election, on the 7th of November, the whole number of votes cast for presidential electors was 758,869, of which the Republican candidates received 384,122, the Democratic candidates 366,158, the "Greenback" ticket 7,187, the Prohibitory ticket 1,819, and the Anti-Secret Society ticket 83. The Republican plurality over the Democratic vote was 17,964; majority over all, 9,375. Of the 27 members of Congress chosen, 17 were Republicans and 10 Democrats. The State Legislature chosen at the same time consists of 31 Republicans and 19 Democrats in the Senate, and 120 Republicans and 81 Democrats in the House of Representatives. The Republican majority is therefore 12 in the Senate and 39 in the House, or 51 on joint ballot.

The total vote of the city of Philadelphia for presidential electors was 139,218, of which 77,075 were for the Hayes and Wheeler ticket, 62,110 for Tilden and Hendricks, 23 for Smith and Stewart, and 10 for Cooper and Cary. The Republican plurality over the Democratic vote was 14,965; majority over all, 14,982.

PÉRIER, AUGUSTE CASIMIR VICTOR LAURENT, a French statesman, born at Paris, August 20, 1811; died July 6, 1876. He was the oldest son of the celebrated minister of state, who died in 1832. At twenty years of age he entered the diplomatic career, and was successively secretary of legation at London, Brussels, and at the Hague, was *chargé d'affaires* at Naples and St. Petersburg, and minister plenipotentiary in Hanover. In 1846 he was elected to the Second Chamber, and at the Revolution of 1848 he retired to his private estates. In 1849 he was returned from the department of Aube to the Legislative Assembly, where he voted with the party in power, and was made a member of the permanent commission which was intrusted with the revision of the Constitution, and sustained the policy of the Elysée up to the formation of the ministry which preceded the *coup-d'état*, against which he protested. Brought on December 2d to Mont Valérien, he was detained but a few days, and then returned to private life. From 1845 to 1851 he was a member of the Council-General of Aube, and was re-elected in 1861. In 1869 he was a candidate for the Corps Législatif, but was defeated. In 1846 he was created grand officer of the Legion of Honor, and in 1867 was elected a member of the Academy of Moral and Political Sciences. When Thiers became President of the Republic in 1871, he appointed Périer Minister of the Interior on October 12. His brief stay in the Home-Office was marked by a mixture of rigor and conciliation. He was popular with his prefects, and retired from his position because of lack of harmony between him and M. Thiers on financial questions. He resigned on February 5, 1872, was again appointed on May 17, 1873, but went out with the entire Thiers government a week afterward. He was the author of "Le Traité avec Angleterre" (1860), "Les Finances de l'Empire" (1861), "Le Budget de 1863" (1862), "La Réforme Financière" (1862), "Les Finances et la Politique" (1863), "Les Sociétés de Coopération" (1864), and "L'Article 75 de la Constitution le 1^{er} An VIII sous le Régime de la Constitution de 1852" (1867).

PERKINS, GEORGE ROBERTS, died at New Hartford, Conn., August 22, 1876. He was born in Otsego County, N. Y., in 1812. He was self-educated, and at the age of eighteen was employed in the Slackwater Survey of the Susquehanna River. He was a teacher of mathematics in the Liberal Institute at Clinton, N. C., from 1831 to 1838, when he became Principal of the Utica Academy. In 1844, at the opening of the State Normal School, he was chosen Professor of Mathematics, and four years later was elected principal. In 1852 he resigned and superintended the erection of the Dudley Observatory. He published a series of arithmetics (1840-'51); "Treatise on Algebra" (1841); "Elements of Algebra" (1844); "Elements of Geometry" (1847); "Trigonome-

try and Surveying" (1851); and "Plane and Solid Geometry" (1854).

PERRONE, GIOVANNI, an Italian priest, born in 1794; died August 28, 1876. He studied theology in Turin, then went to Rome, and there entered the Society of Jesus in his twenty-first year. After his ordination he taught for some time in the Collegium Romanum, became rector of the College of Ferrara in 1839, returned after some time to the Collegium Romanum, went to England at the time of the Revolution of 1848, and in 1850 was appointed rector of the entire Collegium Romanum. He was the author of "Prælectiones Theologicæ" (9 vols., 1835), which has gone through more than thirty editions; "Prælectiones Theologicæ," abridged from the above (4 vols., 1845; thirty-first edition, 1864); "Synopsis Historiæ Theologiæ cum Philosophiâ comparatæ" (1845); "De Immaculato B. V. Mariæ Conceptu, an Dogmatico Decreto definiti posit" (1847; reëdited several times, and translated into French, Dutch, and German); "Il Hermetismo" (1838); "De Divinate D. N. Jesu Christi" (1869), etc. He was considered one of the most learned Italian theologians of the nineteenth century.

PERSIA,* a country of Asia. Reigning sovereign, Nasr-ed-Din, Shah of Persia, born 1830, succeeded his father, Shah Mohammed, September 10, 1848. Heir-apparent, Muzaffer-ed-Din, born in 1850. The area of Persia is estimated at 686,000 square miles. The population, which for some time had been on the decline, is now reliably reported as again increasing, and amounting to from 6,000,000 to 7,000,000.

The ministry formerly consisted of only two functionaries, the Vizier-i-Azem, or grand-vizier, and the Ameen-ed-Doulah, or lord-treasurer; but in more recent times it has been divided into a larger number of departments, after the European fashion. In 1876 it consisted of the following members: Hussein-Khan, formerly grand-vizier, Minister of Foreign Affairs and War and Commander-in-chief of the Army; Mirza Yussuf Khan, Minister of the Interior and of Finances; General Ali Kuli Khan, Minister of Telegraphs; Mirza Ali Khan, Minister of Posts; Mohammed Rahim Khan, Minister of the Royal House; Ali Riza Khan, Minister of Justice; Hassan Ali Khan, Minister of Public Works; Mirza Abdul Wahab Wahab-Khan, Minister of Commerce.

The Persian army, according to official returns of the Minister of War, numbers about 105,000, of whom one-third, or 30,000 men, constitute the standing army. According to a new law issued in 1875, the soldiers will no longer serve, as heretofore, for lifetime, but only for twelve years, and the right of providing substitutes is granted.

The aggregate length of the electric telegraph

* For an account of the religious statistics, the political divisions, and the imports and exports, see ANNUAL CYCLOPEDIA for 1874.

lines in 1876 was 3,966 kilometres; that of the wires, 7,646 kilometres. The number of offices was 46.

Reports from Persia agree in representing that the Shah was strongly impressed by the views of Western civilization which he gained during his travels in Europe, and has been actuated, since his return home, by a desire to secure the enjoyment of some of its benefits for his country. For this purpose, he has attempted to introduce several measures of reform; but, partly because of his own want of experience, as well as of his lack of comprehension of the true nature of the measures of reform that are needed—partly on account of the unsettled and impoverished condition of the country and the deficiency of means of communication—in greater part on account of the impossibility of enforcing any considerable

governor, Bekil-el-Mulik, was allowed to pay from his own private funds. As he is the richest landowner in the province, it is supposed that he will, in the end, find measures to recover at least double this amount from his tenants. A petition was sent to the Shah from Bushire, asking relief from the excessive tax on grain. The Shah replied by telegraph; but the director of the telegraph, who was in the interest of the collector of taxes, refused to deliver the dispatch, except for a granting of 200 tomans; and the people were not permitted to forward any new complaint by telegraph.

In February the Shah appointed a State Council of 25 members, to consult concerning reforms and adopt measures for introducing them. The subjects of coining money and the establishment of a postal system were especially confided to them. The new council

seems to have performed its functions in a satisfactory manner, till the news reached Persia of the deposition of the Sultan Abdul-Aziz of Turkey by a council of ministers, and his subsequent suicide. The fact that the downfall of the Sultan had been brought about by a council such as he had only recently established gave the Shah much anxiety, and induced him to adopt precautions lest a similar fate should befall himself from his council. He ordered that the council should do its business by committees of four members each, of which

COURT OF THE GRAND MOSQUE, ISPAHAN.

degree of accountability upon the local officers, his efforts have so far met with but little success. The "justice-boxes" which were ordered to be placed in all the towns for the reception of complaints, and which were to be sent with their contents monthly to the capital (*see ANNUAL CYCLOPÆDIA for 1875*), were at first regularly well filled; but the local officers, for whose interest it was that complaints should not reach the court, stationed spies near the boxes, who drove away all who would deposit complaints in them, and thus defeated the object of this effort. The full amounts of the taxes are rigorously collected, whatever may be the circumstances of the people. In the province of Ghilan, where the silk crop had partially failed for two years in succession, the same amount of impost was demanded as in more prosperous years, and the petitions of the inhabitants for relief received no answer. In the province of Kerman a deficiency of 20,000 tomans was shown in the revenues, resulting from the shortness of the crops, which the

only one committee should sit at a time, and that these should go out by rotation, monthly. Afterward he adjourned the meetings of the councils for six months, or, as another account has it, ordered that a full meeting of the council should be held only twice a year, and that the body should sit only in the presence of the Shah. Provision has been made for the coinage of Persian money with an apparatus which has been bought in Paris. A beginning has been made of the establishment of a postal system. The department has been organized under the superintendence of an Austrian postal officer, Herr Niederer. The first route was opened on the 12th of February, from Teheran to Tauris, in the northwestern part of the kingdom, and thence to the Russian boundaries at Djoulfa and Resht Enzeli. The service is performed by six couriers, who make the journey of 94 farsachs, or 80 Austrian miles, and back, in eighty hours. Provisions have been made in connection with the postal route for the negotiation of bills of exchange

between Teheran and Tauris, and similar facilities will be afforded, as soon as safe arrangements can be made with the local Persian merchants, for the intermediate towns on the route. The rate of postage is 25 centimes for a single letter within Persia, and 55 centimes to any part of Europe, an arrangement having been made with the Russian postal authorities by which letters bearing the Russian as well as the Persian stamp will be forwarded to their European destination. Herr Niederer reports that postal enterprise is popular, and its use is increasing. He contemplates, as soon as practicable, establishing other routes to the south and to Bagdad.

The country on the Russian border at Merv was disturbed at the beginning of the year by the irruptions of the Tekke, the most predatory tribe of the Turkomans. These people were in straitened circumstances for food, and made frequent raids into the Persian territories for cattle and sheep, and occasionally carried off some prisoners. A force was sent from Meshed to pursue one of these bands, and overtook them at Kelati Nadiri, where it totally defeated them with the loss of 500 dead and wounded and 500 horses.

A force of Turkish Kurds having entered Persian territory near the city of Ushna and committed heinous outrages on property and person, the Governor of Urina crossed the boundaries into Turkey, August 18th, with five regiments of infantry and eight guns, to give them wholesome chastisement.

On the birthday of the Shah, March 6th, his Majesty gave a reception to the diplomatic corps. The Austro-Hungarian minister presented an address of congratulation on behalf of the foreign representatives, to which the Shah made an appropriate reply. He afterward spoke especially to each of his guests. The Shah entered upon the thirtieth lunar year of his reign in December. As thirty years in the Persian reckoning mark a cycle, or *karn*, considerable importance was attached to this event, and it was decided to celebrate it with extraordinary festivities. The celebration was, however, postponed till January, 1877, in order to hold it in connection with the great religious festivals of Korban and Kad-dir.

The Presbyterian Church in the United States of America has a mission in Persia, with its headquarters at Urumiah, the labors of which have been directed chiefly to the Nestorian Christians. At the annual meeting of the mission held at Urumiah, October 18, 1876, action was taken in favor of beginning work among Mussulmans for their conversion to Christianity. The missionaries expressed themselves aware of the hostility that this step would excite from the Government, but decided that while they would, as far as possible, avoid a direct issue with the authorities upon the matter, they could not avoid what they considered to be a duty.

PERU (REPÚBLICA DEL PERÚ), an independent state of South America.

Details relative to boundaries, territorial division, population, etc., will be found in the ANNUAL CYCLOPÆDIA for 1873 and 1875.

The President of the Republic is General Mariano Ignacio Prado, installed in office on August 2, 1876.

GUANO WORKINGS IN THE NORTH ISLAND.

The cabinet is composed of the following ministers: Interior, Señor Manuel F. Benavides; Foreign Affairs, Señor José Antonio García y García; Justice, Dr. Antonio Arenas, who is also President of the Council; Finance, Señor José Aranibar; and War and the Navy, General Pedro Bustamante. This cabinet was

VOLCANO OF MISTI OR AREQUIPA.

considered particularly strong, being formed of men representing all the different shades of political opinion; but, according to the declaration of the new President, they will not be biased by any party spirit. Dr. Arenas was the Opposition candidate for the presidency at

the time of the election of General Prado's predecessor, Señor Manuel Pardo; Sr. Araníbar was a member of Balta's cabinet; and Señores García y García and Benavides were always among Pardo's chief supporters.

The Archbishop of Lima is P. Orueta y Castrillon; President of the Supreme Court, M. Vidaurre; Postmaster-General, Z. Dávila Condemarin; Inspector-General of the Army

and Navy, General P. Silva; Commandant-General of the Navy, Post-Captain D. de la Haza.

The army, in 1875, was composed of three regiments of horse, 1,200 men; eight battalions of foot, 5,600; two brigades of artillery, 1,000; and 5,400 gendarmes: total, 13,200 men.

In the summer of 1876 the navy comprised six iron-clads, with an aggregate armament of 88 guns; and six other steamers, mounting an

CHINCHA ISLANDS.

aggregate armament of 56 guns: total armament, 94 guns.

In the budget for the fiscal year 1875-'76 the revenue was estimated at 65,566,140 soles,* and the expenditures for the same year at 77,200,000 soles, constituting a deficit of 11,633,860 soles.

The following table exhibits the state of the national debt in January, 1876:

	Soles.
Home debt.....	24,952,158
Foreign debt.....	165,930,580
Floating debt.....	23,000,000
Total.....	213,882,688

In the absence of official returns concerning the foreign trade of Peru, we can merely say that the exports, consisting mainly of guano and cubic nitre, are of a mean annual value of 88,000,000 soles; the value of the imports being somewhat over that figure. The guano shipped to Great Britain in 1875 was of the value of \$5,842,850 (86,042 tons), and the cubic nitre of the value of \$8,965,550 (2,979,876 tons). Both these commodities are Government monopolies. General Prado, then President-elect of the Republic, proceeded to England in March, 1876, for the purpose of contracting for the shipment of guano on an extensive scale; and on June 13th the following telegram was received at Lima:

On 8th instant, signed contract with Raphael & Sons, Candama & Heeren, for consignment of 1,900,000 tons of guano; fixed expenses at £4 15s., if freight does not exceed 70s.; if over, Government pays excess. Loading, 10s. per effective ton; annuity, £700,000, beginning with January last. The debt to Anglo-Peruvian Bank to be deducted from first installment; excess for bondholders; interest both ways, five per cent.; Drayfus guaranteed; other clauses improved. Approved of by English bondholders. Am discussing the manner of arranging debt service. The Government may draw for £100,000 on Raphael & Sons.

PRADO.

* The sol is equivalent to about 96 cents, gold, of United States money.

A revolutionary movement, under the leadership of Don Nicolás de Pierola, in October, was put down within the month. At the end of the year the republic was in a state of perfect peace; an improvement was apparent in financial matters; exchange ruled at easier rates; money was obtainable on better terms; and a healthier tone prevailed, both in financial and commercial circles.

PEUCKER, EDUARD VON, a German general, born January 19, 1791; died February 10, 1876. In his eighteenth year he entered the artillery; took part in the Russian campaign of 1812, in the army corps furnished by Prussia, and returned from this campaign as adjutant in the artillery of this corps. In the campaigns against Napoleon that followed he held a similar position in the corps of General von York. After the conclusion of peace he received an appointment in the Ministry of War, where he soon gained a prominent position by his extensive knowledge, and made himself specially known by his plans for the improvement of guns. In 1822 he was appointed major; in 1834, lieutenant-colonel; in 1842, major-general; and in 1848, military commissioner for Prussia in the Federal Military Commission in Frankfort. In the same year he was appointed Minister of War for the empire by the Reichsverweser (regent of the empire), and in 1849 had command of the troops operating against Baden. Having advanced to lieutenant-general in 1849, he was appointed in the following year a member of the Central Federal Commission, and remained in that body up to its dissolution. In 1854 he was appointed inspector-general of the military education of Prussia, and in 1858 became general of the infantry. His most important act as inspector-general of military education, which position he retained up to his death, was the reorganization of the military schools of the kingdom. He was the author of "Das deutsche

Kriegswesen der Urzeit in seinen Verbindungen und Wechselwirkungen mit dem gleichzeitigen Staats- und Volkleben" (3 parts, 1860-'64).

PONROY, PIERRE GABRIEL ARTHUR, a French author, born March 25, 1816; died in March, 1876. He took the degree of Bachelor of Arts in Paris in 1837, studied medicine, and afterward went through a special course of mental discipline. He made his first appearance in literature in 1841, through some sketches in prose and verse, which, however, met with but little favor. A tragedy called "Le Vieux Consul" was his next effort, but was not successful. He published many pamphlets and *feuilletons*, and contributed to several reactionary journals at Paris and at Ohâteau-roux. In 1854 he presented at the Théâtre Français, in Paris, "Mirabeau" and "Minervine," prose dramas, each in five acts; but the representation of the former was forbidden by the Government, and the death of an actress prevented the representation of the other. In 1861 he reopened the Salle des Bouffes, and attempted to produce his plays by a company formed by himself, and presented his play, "The Wedding-Gift," taken from one of his novels, but the attempt was a failure. Among his other works are: "Forms and Colors," "Oriental Legends," "The Roman World," "A Daughter of Monck," and "The Gallo-Roman World."

PORTUGAL, a kingdom in Southwestern Europe. King, Luiz I., born October 31, 1838; succeeded his brother, King Pedro V., November 11, 1861; married, October 6, 1862, to Pia, youngest daughter of King Victor Emanuel of Italy. Issue of the union are two sons: Carlos, born September 28, 1868, and Alfonso, born July 31, 1865.

The area and population of Portugal were, according to Pery ("Geographia e Estadística geral de Portugal," Lisbon, 1875), as follows:

PROVINCES.	Area in Square Miles.	Population in 1874.
Minho.....	2,821	1,018,690
Tras os Montes.....	4,292	416,761
Beira Alta.....	4,551	976,477
Beira Baixa.....	4,707	418,615
Estremadura.....	6,984	908,465
Alentejo.....	9,425	875,998
Algarve.....	1,876	198,877
Total continental.....	34,606	4,298,881
Azores.....	922	260,079
Madeira.....	815	118,609
Total kingdom.....	35,843	4,677,569

The area of the Portuguese possessions, as given below, differs over 85,000 square miles from the statements of previous years. This is due to the fact that in Senegambia the area of the Portuguese colonies had been stated to be 8,000 square leguas (35,867 square miles). It has been recently found, however, that the Portuguese possessions in Senegambia include but very little territory, its area not exceeding twenty-five square miles. The following table shows the area and population of the Portu-

guese possessions in Asia and Africa (see Behm and Wagner, *Bevölkerung der Erde*, iv., 1876):

POSSESSIONS.	Area in Square Miles.	Population.
I. POSSESSIONS IN AFRICA.		
Cape Verd Islands (nine inhabited).....	1,487	90,704 (1875)
In Senegambia (Biasso, etc.).....	35	9,389 (1873)
Islands of São Thomé and Príncipe.....	417	81,692 (1875)
Ajuda.....	14	700 (1865)
Angola, Benguela, Mosamedes.....	812,582	2,000,000
Mozambique, Sofala, etc.....	882,692	300,000
II. POSSESSIONS IN ASIA.		
In India:		
Goa, Salsette, Bardes, etc.....	1,895	474,284 (1864)
Damaun and Territory.....	81	40,990 (1866)
Diu and Gogola.....	10	12,808 (1864)
Indian Archipelago:		
Timor and Ambolna.....	5,528	250,000
China:		
Macao.....	1.49	71,884 (1871)
Total.....	704,132	3,281,729

The following were the gross sums of the budget estimates for the financial year 1876 (value expressed in contos and milreis: 1 conto = 1,000 milreis; 1 milreis = \$1.08; 5,747:290 means 5,747 contos and 290 milreis):

REVENUE.	
1. Direct taxes.....	5,747:290
2. Register.....	2,564:480
3. Indirect taxes.....	12,615:779
4. National domain.....	2,089:716
5. Interest on bonds in Public Exchequer.....	443:716
	24,059:981

EXPENDITURE.	
1. Interest on home and foreign debt.....	10,570:783
2. Ministry of Finance.....	8,326:571
3. " of Foreign Affairs.....	258:629
4. " of the Interior.....	2,018:494
5. " of Worship and Justice.....	598:010
6. " of War.....	8,548:144
7. " of the Navy and Colonies.....	1,295:839
8. " of Public Works.....	1,428:468
Total, ordinary.....	23,464:827
Total, extraordinary (chiefly construction of roads).....	1,598:400
	25,062:737

The public debt of Portugal dates from the year 1796, when the first loan of 4,000,000 milreis was raised. In 1835 it amounted to 55,000,000 milreis; in 1875, to 848,601:250.

The movement of shipping in 1873 was as follows:

FLAG.	ENTERED.		CLEARED.	
	Sailing-Vessels.	Steamers.	Sailing-Vessels.	Steamers.
<i>Portuguese:</i>				
Sea-going vessels.....	676	48	963	89
Coast.....	5,298	154	5,011	161
<i>Foreign</i>	8,041	1,900	8,106	1,867
Total.....	9,015	2,102	9,079	2,067

The commercial navy of Portugal consisted in 1876 of 575 vessels, of which 89 were steamers. The total length of railways in operation, in October, 1876, was 966 kilometres, exclusive of 85 miles of railroads in mines.

The aggregate length of telegraph lines was 8,538; and of telegraph wires, 7,656 kilometres.

The military system is based on the law of June 28, 1864, which has been modified by several decrees of the year 1868, as well as by decrees of October 4, 1869, and December 15, 1875. The strength of the army in 1876, on the peace-footing, was 1,615 officers, and 32,356 men; on the war-footing, 2,566 officers and 71,378 men.

The trade of Portugal in 1872 was as follows (value expressed in contos; 1 conto = 1,000 milreis):

COUNTRIES.	Imports.	Exports
Great Britain.....	18,857	18,671
France.....	4,111	1,044
Spain.....	2,498	1,823
Germany.....	1,046	438
Russia.....	899	449
Sweden and Norway.....	698	304
Brazil.....	3,199	3,556
United States.....	941	184
Portuguese colonies.....	800	133
Other countries.....	1,007	1,970
Total, 1878.....	34,046	28,615
" 1872.....	29,135	23,241

The following are the chief articles of import and export:

MISCELLANEOUS.	Imports.	Exports.
Cereals.....	1,788	518
Seeds, fruits.....	507	3,458
Colonial produce.....	3,794	669
Beverages.....	421	8,904
Animals and animal provisions.....	2,440	2,176
a. Provisions and articles of indulgence.....	8,950	15,725
Minerals.....	2,095	2,744
Metals.....	6,201	420
Wood.....	2,226	1,302
Hides, skins.....	1,011	1,439
Materials for spinning textures.....	818	43
Other manufactured articles.....	10,444	1,082
	2,433	479
	863	431
b. Raw materials and manufactured articles.....	25,096	7,390
Total.....	34,045	28,615

According to a report on education in Portugal, transmitted to the Washington Bureau of Education by Hon. B. Moran, United States minister at Lisbon (dated December, 1875), the number of elementary schools was 2,244, of which 1,910 were for boys and 334 for girls; the number of pupils was 113,097 (92,834 boys, 20,263 girls); of teachers, 2,609 (2,114 males, 495 females). Secondary instruction was imparted in 18 lycæums, with 2,385 pupils, and in 123 other secondary schools. The University of Coimbra had 52 professors, 15 assistants, and 913 students, of whom 39 studied theology, 343 law, 6 political economy, 56 medicine, 104 mathematics, 262 philosophy, 103 drawing. The Polytechnic School at Lisbon had 174, the Military Academy of the same city 272, and the Polytechnic School at Oporto 109 students. In the Medico-Surgical

Schools of Lisbon, Oporto, and Funchal there were in all 277 students. The principal special schools are the Academies of Fine Arts at Lisbon and Oporto, with 277 students; the Conservatory of Music at Lisbon, with 95 students; and the Industrial and Commercial Institution, with 388 students. The total annual expenditure for education was \$1,200,000.

The Portuguese Cortes was formally opened by the King January 2d. In his speech his Majesty said that the most friendly relations were maintained with foreign powers. Referring to the happy termination of the arbitration of the question respecting the title to Delagoa Bay, the King said that he had manifested his gratitude to President MacMahon, of France (by whom the question had been decided), for the impartiality and justice with which he had considered so delicate an affair. He spoke of the visits of the Seyid of Zanzibar and the President of the Transvaal Republic, who had signed a treaty giving advantages to the colony of Mozambique. Among the subjects commended to the deliberation of the Cortes were the adoption of measures for improving the condition of the colonies, and for further strengthening the possession of the Portuguese territories; also moral and material reforms, including an improvement of the system of public instruction on the basis of compulsory education, and measures for the construction of railways in Beira. With regard to the budget, it was announced that the prosperity of the country enabled the Government to dispense with any new taxes. In view of the prosperous condition of the Treasury, Senhor Ardrade Corvo, Minister for the Colonies, intended to ask the Cortes to authorize the negotiation of a loan for colonial improvements, such as the construction of railways, bridges, landing-stages, roads, telegraphs, and lighthouses.

Mr. Watson, British secretary of legation at Lisbon, has published some facts showing that a rapid and great improvement has taken place in the condition of the finances of Portugal within the last ten years, as exhibited by the budgets for 1866-'67, 1871-'72, and 1876-'77, respectively. In 1866 the total revenue of the kingdom was estimated at not more than £3,529,000, while the expenditure amounted to £4,694,900, thus showing an estimated deficit of £1,165,900. In the budget of 1871-'72 the revenue had risen to £4,915,069, while the amount of expenditure had increased only £220,000, and the two items balanced each other. In the budget for 1876-'77 the revenue was estimated at £5,346,661, showing an increase in five years of £430,000, or of £86,000 per annum; while the expenditures were estimated at £163,539 more than that amount. The increase of revenue is caused not by the application of new principles of finance, but by the greater productiveness of the taxes, and especially of the customs duties. The chief item of increase in the expenditures is in the

interest on the public debt, which has grown from £1,362,137 in 1866 to £2,450,758 in 1876.

The Cortes was closed by a royal decree at the beginning of April, after having had a quiet session. The House of Peers, just before the closing, gave an expression of confidence in the Government, the vote upon the same being 45 to 24 votes.

The Opposition, or Liberal party of the country, have exhibited a moderate degree of activity. On the 19th of March, the Opposition members of the two Chambers, excluding the Republican group, held a consultation upon the propositions for constitutional reform, and other measures which they intended to advocate. On the 25th of March a demonstration of the Democratic party was made in celebration of the electoral victories which had been gained by their sympathizers in France. About two hundred persons took part in the affair, includ-

ing several foreigners. Oliveira Marreca presided. The meeting had for a second object the promotion of a union between the two democratic parties of the country, the "Old" and the "New" Democracy.

Several provinces were suffering at the beginning of the year from a scarcity of provisions. The crops of the last year had failed in consequence of the drought, and the present season threatened to be still more unfavorable. The Government was obliged to take measures to furnish the poorer part of the population with corn, and to see to the transportation of the same.

A financial crisis took place in May among the weaker banks. It was relieved by the importation of gold by the Government, and by the discounting of the bills of the suffering banks by the stronger concerns. The crisis was renewed with greater intensity in the middle of August, when the bills which had

LISBON, FROM THE SOUTH BANK OF THE TAGUS.

been discounted for the weaker banks had run their course. As the condition of these banks was not improved, the stronger banks refused to renew their bills. The gold which had been imported from England had been sent away again by the operation of the high rate of exchange, and all the banks issuing notes in the country were compelled to close. To relieve the crisis, the Government issued a decree authorizing the suspension of all engagements for two months.

In November, Senhor Barga, Minister of Justice, was succeeded in that office by Senhor Avelino, Minister of Public Works. Senhor Lauro Carvalho, former Director of the Douro Railway, was appointed Minister of Pub-

lic Works. The Duke of Saldanha, ambassador to the court of St. James, or Great Britain, died in London in November. Senhor d'Antas, ambassador to the Spanish court, was appointed to succeed him, and Count Balboni was appointed ambassador to the court of Spain.

PRESBYTERIANS. I. PRESBYTERIAN CHURCH IN THE UNITED STATES OF AMERICA.—The Presbyterian Church in the United States had, in 1874, thirty-six synods, mostly in the North, 172 presbyteries, 4,744 ministers, 5,077 churches, and 535,210 communicants. The following is a summary of the statistics of this Church, as they were reported to the General Assembly in May, 1876:

SYNODS.	Presbyteries.	Ministers.	Churches.	Communi- cants.

Miscellaneous.....	2,100,150
Total.....	\$9,810,228

This shows an increase over 1875 of 29 candidates, 20 licentiates, 38 ministers, 76 churches,

and 29,176 communicants; and a decrease of 1 presbytery, 8 licensures, 20 ordinations, 81 installations, and 25 dissolutions. The contributions have also increased \$183,629, although most of the specified items have decreased.

The *Committee of Ministerial Relief* reported that the amount of funds for current use, received from 2,100 churches and from all other sources, had been \$78,055.20, the whole of which had been expended. The receipts were \$784.23 in advance of those of the previous year, and were \$1,145.60 more than those of the most prosperous year preceding it.—The *Board of Education* reported to the General Assembly that their receipts for the year had been \$72,040.97, a gain of \$3,861.83 over the receipts of the year before. The payments in behalf of current work had been \$56,989.58. The balance of the debt standing over, amounting to \$15,000, and \$15,000 of loans made during the present year, had also been paid.—The *Board of Publication* reported to the General Assembly that their total receipts for 1875-'76 had been \$293,717.94, and their expenditures \$267,946.63. The contributions to the missionary fund of the board for carrying on its benevolent work had amounted to \$52,176.06. For the same work there had been directly expended \$49,712.59. The board had issued during the year 89,500 copies of new publications, 835,800 copies of reprints, and 5,746,873 copies of periodicals.—The *Board of Church Erection* reported to the General Assembly that their receipts since their last report had been \$125,016. Appropriations had been made to 136 churches, amounting in all to \$70,500.—The *Committee on Freedmen* reported to the General Assembly that their total receipts for the year had been \$54,958.84; their expenditures had been \$53,137. One hundred and thirteen missionaries had been employed during the year, eight churches had been organized, and 855 persons had been added to the Church.—The *Board of Home Missions* reported to the General Assembly that their receipts for the year ending April 1, 1876, had been, from churches, \$234,677.33; from legacies, \$33,103.59; from miscellaneous sources, \$19,936.99; total, \$267,717.01. Their expenditures had been \$284,226.21, in which sum was included the amount of the debt (\$24,372.78) reported by the board to the previous General Assembly. The receipts were \$25,907.36 less than those of the previous year. During the year 1,035 missionaries had been engaged in work under the direction of the board; 3,500 churches and stations had been supplied, and the largest number of additions to the churches on profession for several years had been made.—The *Board of Foreign Missions* reported that their receipts for the year ending April 30th had been \$517,688.69, and their expenditures \$515,593.62. Their debt on the 30th of April, 1876, amounted to \$36,187.93, having been reduced \$2,095.07.—The following are the statistics of the missions:

Conference, and cordially enters into the Presbyterian Alliance on this basis: That the Moderator and the stated and permanent Clerks of the Assembly, and the Rev. Howard Crosby, D. D., the Rev. James McCosh, D. D., and the Rev. S. I. Prime, D. D., be a special committee to appoint delegates from this Church to the first meeting of the Presbyterian Alliance at Edinburgh, July, 1877.

The committee who had been appointed by a previous Assembly to correspond with the Reformed Church in America on the subject of union, reported concerning the result of their negotiations, which they embodied in the following minute:

Whereas, These committees were originally appointed to confer in regard to the desirableness and practicability of union between the two bodies which they represent; and whereas, the General Synod of the Reformed Church in the year 1874 declined to continue their committee (as had been recommended) for further conference concerning "union," and subsequently appointed a committee to confer with us in regard to "cooperation," a matter which had not been committed to us by the General Assembly; and whereas, a document has been presented to us by said committee containing certain proposals and measures relating to "cooperation," and by our several Boards of Missions, Publication, etc.; and whereas, the "terms of correspondence" already existing between the two bodies provide for the most friendly relations, which we trust will always be continued; and whereas, the main object proposed to be accomplished by this scheme of "cooperation" can hardly be attained without it: Therefore, be it

Resolved, That we inform the committee of the Reformed Church that, in our judgment, the plan proposed by them is inexpedient; and that, in reporting our action to the next General Assembly, we request to be discharged from further consideration of the subject.

This report was adopted.

During the meetings of the Assembly, the Rev. Dr. Talmage sent a dispatch by telegraph to a prominent member of the Southern General Assembly, in session at the same time at Savannah, Ga., asking if anything could be done by the Northern Assembly that would forward the establishment of fraternal relations between the two bodies. He received an answer that any spontaneous resolution of the Assembly would receive respectful consideration. The subject was referred to the Committee on Correspondence. This committee reported the following as a suitable form in which to embody the expression of the Assembly:

The committee to whom was referred the resolution on fraternal correspondence with the General Assembly now in session at Savannah, report that they are unanimously and heartily in sympathy with the objects contemplated in the resolutions; and recognizing the fact that the two Assemblies accept the same Confession of Faith, form of government, and directory of worship, and are closely bound together by historical as well as doctrinal and ecclesiastical ties; and—

Whereas, These Churches, one in faith, order, and labor, are called by the Great Head of the Church to united efforts for the extension of his kingdom throughout the country and the world, and as no adjustment of differences is accomplished by rehearsal of the past: Therefore, with a view to the expression of the united and hearty wishes of this

The General Assembly of the Presbyterian Church in the United States of America met in Brooklyn, N. Y., May 18th. The Rev. Henry O. Van Dyke, D. D., was chosen moderator. The Assembly adopted a report which called the attention of the presbyteries to the importance of the relation of the Church to the German population, urged them to seek all proper opportunities for labor among this people, and to devise means whereby they may be more extensively and more deeply impressed with the Presbyterian faith and order. It advised the presbyteries to seek out proper German candidates for the ministry, and to communicate, in respect to them, with the Presbyterian German theological schools. It made provision for the collection of information concerning the German work, by means of a circular addressed to the presbyteries containing inquiries respecting the distinctive features which belong to the transition from the German to the American condition. A committee was appointed to communicate with the presbyteries, receive and arrange the desired information, and report to the next General Assembly. This committee was also directed to give attention to the whole subject of a denominational literature in German; to confer, if they thought best, with the Board of Publication in respect to the publication of books in German; and to consider what shall be done by the Church, if anything, in respect to Presbyterian newspapers, and other means of instruction through the press.—The delegation who had been appointed to attend the Conference of Presbyterians which was held in London in July, 1875, relative to the formation of a general alliance of Presbyterian churches, reported concerning the proceedings of the Conference and the organization of the Alliance. The meeting of the Alliance was to have been held on the first Tuesday in July, 1876; but in deference to the wishes of American Presbyterians, who would be engaged in services appropriate to the Centennial celebration, it had been postponed to July, 1877. The Assembly adopted the following resolution on the subject:

Resolved, That our branch of the Presbyterian Church, as represented in this General Assembly, approves the constitution proposed by the London

body, that at the earliest practicable moment we may see the establishment of correspondence with the other Assembly, we hereby

Resolve, That this Assembly reiterates its cordial desire to establish fraternal relations with that Assembly on terms of perfect equality and reciprocity, so soon as it is agreeable to their brethren to respond to this assurance by a similar expression.

This was adopted, and telegraphed to the Southern General Assembly. The Southern General Assembly, in the mean time, had taken action on the subject of fraternal relations. This action being reported the next day, the Assembly unanimously adopted a resolution in substance identical with that of that body, as declarative of the spirit in which its action was taken, as follows:

In order to show our disposition to remove, on our part, all real or seeming hinderance to friendly feeling, the Assembly explicitly declares that, while condemning certain acts and deliverances of the Southern General Assembly, no acts or deliverances of the Northern Assembly, or of the historical bodies of which the present Assembly is the successor, are to be construed or admitted as impugning in any way the Christian character of the Southern General Assembly, or of the historical body or bodies of which it is the successor.

The previous General Assembly had sent down to the presbyteries an overture providing for a basis of representation in the General Assembly, by synods instead of by presbyteries, as had always before been the rule. The object was to reduce the number of members of the General Assembly, which had become inconveniently large. The report of the vote of the presbyteries showed that 19 presbyteries had answered the overture in the affirmative, 101 in the negative, and that 53 presbyteries had not reported. The overture was consequently lost. The subject was again referred to a committee, who were to prepare a plan for reduced representation to the General Assembly, publish their report in all the Church papers before the spring meetings of the presbyteries, and report to the next General Assembly. The necessary action was taken to carry into effect the provision which had been adopted by the Church for the election of elders for a term of years, by churches preferring that tenure to one for life. The deliverances of previous General Assemblies of both branches of the Church, condemning promiscuous dancing, and regretting the giving of dancing-parties by Christian families, were reaffirmed. The session of each church was declared fully competent to decide when discipline in such cases is necessary, and when it should be administered. It was declared not in accordance with Presbyterian usage to invite persons to the Lord's Supper who are not connected with any branch of the visible Church. A committee was appointed to inquire whether Roman Catholic baptisms should be recognized as valid, and report to the next General Assembly.

The sixth anniversary of the *Woman's Foreign Missionary Society* was held at Philadel-

phia, April 27th and 28th. The receipts for the year had amounted to \$77,561.53. Sixteen new missionaries had been taken under the care of the Society during the year. The report stated that during the same period 110 auxiliary societies and 56 mission hands had been added to the list, making a present total of 648 of the former and 342 of the latter. Nineteen new presbyterial societies had also been organized, making 26 in all.

IF. PRESBYTERIAN CHURCH IN THE UNITED STATES (Southern General Assembly). The following is a summary of the statistics of this Church, as they were reported to the General Assembly in May, 1876:

Synods.....	12
Presbyteries.....	73
Ministers and licentiatees.....	1,079
Candidates.....	119
Churches.....	1,530

Total..... \$1,188,671

The *Executive Committee of Publication* reported to the General Assembly that their receipts had been: From contributions of the churches, \$6,570.21; from sales and subscriptions, \$85,894.79; and receipts from other sources swelled the total amount of available funds to \$42,704.26. Their disbursements had been \$41,866.24. The assets of the committee amounted to \$61,105.20, and their liabilities to about \$20,000. The business capital now amounted to \$39,576.86. The arrangements with the Reformed Church in America, contemplated in the plan of coöperation between the two Churches, had been in part begun. The Reformed Board had approved for sale all the books of the committee but one, and all the publications of the Reformed Board but a few small volumes were offered on the shelves of the committee's store. The objections in the case of the excepted books were based upon the introduction into them "of sentiments or incidents connected with the recent troubles of the country which might not produce edification in the opposite section from that in which they were first issued."—The

Executive Committee on Education reported to the General Assembly a deficiency of a little over \$3,000 in their receipts. The entire amount of funds furnished had been \$15,131.97. The committee were still in debt about \$32,000. Ninety-five persons were enrolled upon the list of beneficiaries, of whom fifty-four were pursuing their studies at theological seminaries.—The *Committee on Evangelistic Labor* reported that thirty-six out of sixty-four presbyteries employed evangelists. Fifty evangelists had been employed during the year, eleven more than had been employed the previous year.—The *Executive Committee on Sustentation* reported to the General Assembly that their total receipts during the year for the several departments classed under the general head of sustentation (embracing sustentation, the evangelistic fund, the colored evangelistic fund, the invalid fund, and the relief fund) had amounted to \$45,800.91. This amount, together with the balance of \$12,185.85 which was on hand, made the total amount under the control of the committee during the year \$57,986.76. The receipts for sustentation had been \$22,664.68, against \$21,186.65 the preceding year. The receipts of the evangelistic fund had been \$852.22 more than those of the previous year, and the payments to presbyteries \$578.82 more than those of the year before. Fifty-one evangelists had been employed by thirty-six presbyteries, with generally satisfactory results. The receipts for the colored evangelistic fund had been sufficient to meet the demands that had been made upon it. The receipts for the invalid fund had been \$1,700.25 more than those of the previous year, and had been adequate to meet all the applications for aid.—The *Committee on Foreign Missions* reported to the General Assembly that their total receipts for the year from all sources had been \$61,278.27, or \$19,038.98 more than the total contributions of the preceding year. Their total expenditures had been \$56,498.76, and their indebtedness had been reduced to \$9,848.67. The Home Department had been managed at an expense of only a fraction more than seven per cent. of the receipts. A considerable increase was reported in the number of contributing churches, ladies' missionary associations (from 58 to 108), and Sunday-schools, and in the amount of contributions from them. The committee had six principal stations in the southwestern Indian Territory, one in Mexico, two in the United States of Colombia, two in the Empire of Brazil, one in Italy, one in Greece, one among the Greeks in European Turkey, and two in China, with a much larger number of out-stations in all these different parts of the world. Connected with these various stations were 12 schools of various grades, embracing in all more than 500 pupils. The number of laborers connected with the missions was 75. The General Assembly resolved to forward the work of the committee.

The General Assembly of the Presbyterian Church in the United States met at Savannah, Ga., May 18th. The Rev. B. M. Smith, D. D., of Virginia, was chosen moderator. The Assembly adopted resolutions expressing its approval, in general, of the proceedings of the Conference held in London in July, 1875; also of the general tenor of the constitution of the new alliance. It decided to appoint delegates to represent the Presbyterian Church in the United States in the General Council to be held in Edinburgh in 1877, "provided that this appointment of delegates shall not be understood as pledging any funds of the Church to defraying the expenses of the General Council;" and it provided that the delegates should select from their own number members to prepare any papers concerning the condition and position of the Church, to be spread upon the records of the council; further, that if the delegates shall be unable to attend the council, they should be authorized to represent the Church in an official letter. This action was supplemented by a resolution, "That, in appointing delegates to the General Presbyterian Alliance, it is with the distinct declaration that it is not to be regarded as another and a higher court, but as an assemblage of committees appointed by their several churches, which they represent for the purpose of joint conference and joint report, and for such action only as belongs to an association of delegates thus constituted." There were chosen as delegates to the council one minister and one elder from each synod, and four delegates from the Church at large. A committee had been appointed by the previous General Assembly to take into consideration the deliverances which had been uttered by the Southern Presbyterian Church through its General Assemblies on secular matters. This committee submitted a report, carefully reviewing and comparing all the declarations of the General Assembly touching questions of politics and slavery, from its organization in 1861 to the present time. It began by quoting the explicit declaration adopted at the formation of the Southern General Assembly, that the Church has nothing to do with political matters, and followed this with quotations to the same effect from a pastoral letter adopted in 1865; from the report on foreign correspondence in 1862; from a letter of the Synod of Kentucky to the General Assembly in 1867; from the declaration of 1861, that in its ecclesiastical capacity the Church is neither the friend nor the foe of slavery; and from declarations to the same effect in the Pastoral Letter of 1865. On the other hand, expressions were referred to which were alleged to be inconsistent with the principle thus enunciated in the narrative adopted in 1862; in the report of 1862 on theological seminaries, as in the Pastoral Letter of 1862; in the narrative of 1863; and in the narrative of 1864. In some of these papers the words "we," "our cause," "our army," referring to the

Southern side in the war, were inadvertently used, and should have been disapproved. The narrative of 1864 contained two expressions that deserved notice: first, it said: "The long-continued agitations of our adversaries have wrought within us a deeper conviction of the Divine appointment of domestic servitude, and have led to a clearer comprehension of the duties we owe to the African race." This was explained by the committee to mean: "By declaring the institution of slavery to be of 'Divine appointment,' the Assembly must not be understood as expressing the opinion that it was ordained of God as a positively Divine and obligatory institute of society for all communities, but simply that, as it was recognized and enforced by the law of the Confederate States, and was an existing relation prevailing throughout its boundaries, it was, in the sense of all established civil relations, a matter of Divine appointment for the time being in the midst of the people of the States." The other expression was: "We hesitate not to affirm that it is the peculiar mission of the Southern Church to conserve the institution of slavery, and make it a blessing both to master and slave." Of this the committee said:

From all that is known to us as to the meaning intended by the Assembly which adopted that paper, as well as from the context itself, it is manifest that its true intent was not to assert that it was the duty of the Church to conserve the institution of slavery in the sense of perpetuating it—a word never used by it in reference to this subject—but to make the best of the relation and arrangement as it existed, and, by the administration of that gospel which is intrusted to the Church, "make it a blessing both to master and slave."

The report closed by proposing the following declaration:

1. We solemnly reaffirm the explicit and formal statement set forth at the time of the organization of our General Assembly in 1861, in an "address to the Churches of Jesus Christ throughout the earth." This document clearly and forcibly details our position concerning the nature and functions of the Church as a spiritual body, and, therefore, "non-secular and non-political."

2. Inasmuch as some incidental expressions, uttered in times of great public excitement, are found upon our records, and have been pointed out in the report of the committee aforesaid, which seem to be ambiguous or inconsistent with the above declarations and others of like import, this Assembly does hereby disavow them wherever found, and does not recognize such as forming any part of the well-considered, authoritative teachings or testimony of our Church.

The report and declaration were adopted. The Assembly had been asked by the Presbytery of St. Louis to take some action in regard to fraternal relations with the Northern General Assembly. Correspondence also passed during the session of the Assembly between some of its members and members of the Northern General Assembly on the same subject. The following resolutions bearing upon the matter were adopted by a vote of 83 to 6:

Resolved, That the action of the Baltimore Confer-

ence of 1876 (*see ANNUAL CYCLOPEDIA for 1875*), approved by the Assembly at St. Louis, explains with sufficient clearness the position of our Church.

But, inasmuch as it is represented by the overture that misapprehensions exist in the minds of some of our people as to the spirit of this action, in order to show our disposition to remove on our part all real or seeming hinderances to friendly feeling, the Assembly explicitly declares that, while condemning certain acts and deliverances of the Northern Assembly, no acts or deliverances of the Southern Presbyterian Assemblies are to be construed or admitted as impugning in any way the Christian character or standing of the Northern General Assembly, or of the historical body or bodies of which it is the successor.

A report was adopted on the subject of a theological institute for colored people. It recommended that such an institute be established; that it be located at Tuscaloosa, Ala., and the Rev. Dr. Stillman be appointed its principal.

III. UNITED, REFORMED, AND ASSOCIATE PRESBYTERIANS. (a.) *United Presbyterian Church of North America*.—The following is a summary of the statistics of this Church, as they were presented to the General Assembly at its meeting in May, 1876: Number of synods, 8; of presbyteries, 57; of ministers without charge, 159; of pastors and stated supplies, 465; of congregations with pastors or stated supplies, 561; of congregations vacant, 248; of members, 77,414; of adults baptized, 500; of infants baptized, 3,961; of Sunday-schools, 638; of officers and teachers in the same, 7,289; of Sunday-school scholars, 58,364; of theological seminaries, 4; of colleges, 3; total amount of contributions, \$873,675.

The *Board of Education* reported to the General Assembly that their total receipts for the year had been \$2,673.88, besides which they had a balance from the previous year of \$372.86. Their total expenditures had been \$3,732.45; their total liabilities were \$2,860.71. Twenty young men intending to enter the ministry had been aided by the funds of the Church.—The *Board of Publication* reported to the General Assembly as the condition of their finances: Total assets, \$101,786.55; total liabilities, \$30,540.22; receipts for the year, \$25,178.39; expenditures, \$27,085.32; cash on hand May 1, 1876, \$1,504.39.—The *Board of the Freedmen's Mission* reported to the General Assembly that their total receipts since the last report had been \$12,388.80. The treasurer had at present a balance of \$573. An appropriation of \$12,000 was asked to pay all indebtedness, furnish the school-building, and carry on the work for the coming year.—The *Board of Ministerial Relief* reported to the General Assembly that their total receipts for the year had been \$2,501.42, and their total expenditures \$644.43. Four ministers, or families of deceased ministers, had received help during the year.—The *Board of Home Missions* reported to the General Assembly that the total contributions to their treasury for the year had been \$35,294.82, being thirteen dollars more than had been contributed

during any previous year in the history of the board. Claims amounting to \$32,824.91 had been paid during the year, leaving a balance in the treasury of \$2,709.43.—The *Board of Foreign Missions* of the United Presbyterian Church reported to the General Assembly that their total receipts for the year had been, including the balance on hand at the beginning of the year, \$75,061.20, and their total expenditures \$71,950.06. There was an apparent balance in the treasury of \$3,111.14, but, taking into account the amount the board still owed, and the obligations coming due, it was estimated that there would be on the 1st of July a deficiency of \$18,981.86. The estimates for the ensuing year called for \$84,526, currency. This amount was approved by the General Assembly. Missions were supported in Syria, India, Egypt, and China, concerning which the following statistics were given: Number of foreign missionaries, 38; of native laborers, 114, of whom 4 were ordained and 9 were licensed. Number of communicants: in Syria, 84; in India, 153; in Egypt, 86; in China, 21; total, 915, an increase of 142; number of baptisms, 136. Number of pupils in the schools: in Syria, 417; in India, 1,148; in Egypt, 1,151; in China, 25; total 2,736. 11,890 volumes had been used in the mission fields, chiefly in Egypt.

The eighteenth General Assembly of the United Presbyterian Church in North America met in Philadelphia, May 24th. The Rev. Dr. James Brown, of Keokuk, Iowa, was chosen moderator. A resolution was adopted protesting "most solemnly against the opening of the Centennial grounds on the Lord's-day," and pledging support to the Centennial Commission in the resolution they had adopted to close these grounds on that day.

The subject of permitting the use of instruments of music in the churches was brought to the attention of the Assembly by a petition for the repeal of the section of the Directory of Worship which prohibits such instruments. The committee to whom it was referred reported an overture to be submitted to the presbyteries repealing the section. The overture was lost, failing to receive the two-thirds vote requisite to pass it, although it received the vote of a majority of the members present (86 to 74). The Committee on Conference with the Associate Reformed Synod of the South made a report recommending the coöperation of the two bodies in all Church work. Their action was approved. The presbyteries were instructed to require all congregations under their care to seek through them whatever preaching they might desire; and ministers and licentiates were forbidden to make any arrangements with congregations for preaching except through the presbyteries under whose care the congregations may be. A plan to establish a theological seminary in India, to be under the care of the Presbytery of Sealkote, was heartily approved.

(b.) The *General Synod of the Reformed Presbyterian Church of North America* met in Philadelphia, May 18th. The Rev. John Alford, of Newcastle, Del., was chosen moderator. The report of the treasurer of the Board of Foreign Missions showed that the expenditures for the year had been \$57, while the receipts were \$63, and that a balance remained in the treasury of \$1,453.55. The Board of Domestic Missions reported that the amount of their appropriations had been \$1,950. A committee was appointed to confer with a committee of the Synod of the Reformed Presbyterian Church in North America (O. S.) on the subject of a union of the two bodies. A report on the "Signs of the Times" was adopted. It reviewed the state of the religious and secular world, and designated the first Thursday in November as a day of thanksgiving, and Thursday of the first week in January as a day of fasting and prayer, in the Church.

(c.) The *Synod of the Reformed Presbyterian Church* met in Pittsburg, Pa., May 24th. The Rev. Joseph Beattie, missionary to Syria, was chosen moderator. The synod was composed of about one hundred and fifty members, representing about one hundred ministers and congregations. The whole amount of contributions given by the churches during the year was \$190,000, or about nineteen dollars per member. The number of theological students was increasing.

(d.) The *Associate Synod of North America* met at Portland Mills, Ind., May 24th. The Rev. H. S. Atchison was chosen moderator. It appeared from the statistical tables that this body embraced the four presbyteries of Iowa, Clarion, Muskingum, and Northern Indiana, and that it had 12 ministers, 2 licentiates, 34 congregational charges or stations, and 1,115 communicants. The total amount of contributions to the various causes of the Church during the year had been \$679.85.

(e.) The *Associate Reformed Synod of the South* met at Hopewell, S. C., September 21st. The Rev. William B. Pressly was chosen moderator. The committee who were appointed by the synod of the previous year to confer with a similar committee of the United Presbyterian Church, with a view to the coöperation of the two Churches in certain departments of their work, reported that the two committees had met at Baltimore, December 15, 1875, and agreed upon a plan of coöperation. This plan provided that "the presbyteries of each Church shall sustain the same relation to those of the other that they do to the coördinate courts of their own body, and that the ministers and licentiates of each shall be eligible to appointments and settlements in congregations of the other;" that the courts of each shall respect the discipline of the other; that ministers and members of the two bodies be recommended to cultivate friendly relations and Christian fellowship with each other; that the existing relations of the two Churches (actual coöpera-

tion) in the work of foreign missions be continued; that a friendly coöperation of help and non-interference be practised in the fields of home missions and Church extension; that the two bodies coöperate in building and sustaining the Normal or Training School of the United Presbyterian Church for the Freedmen, established at Knoxville, Tenn.; and that, in the work of publication, the Associate Reformed Synod coöperate with the Board of Publication of the United Presbyterian Church. These provisions were adopted by the Synod. The Committee on Correspondence with the United Presbyterian Church was reappointed, but was instructed to take no direct steps toward union without further instruction. The Board of Foreign Missions reported that their receipts for the year had been \$4,732.69, and their ordinary expenses \$604.08. They had invested the sum of \$2,664, and had \$1,464.61 on hand.

IV. CUMBERLAND PRESBYTERIANS. — The forty-sixth General Assembly of the Cumberland Presbyterian Church met at Bowling Green, Ky., May 18th. The Rev. J. M. Gill, of Elkton, Ky., was chosen moderator.

The Committee on Missions reported that the missionary work of the year had in the aggregate exceeded that of any former year, especially so far as the collecting and disbursing of money are concerned. The gifts to the missionary cause had been far in advance of those of former years. The most important home-missions were at St. Louis, in Colorado, and on the Pacific coast.

The question was asked the Assembly by a presbyter, whether baptism, as administered by Roman Catholics, is to be regarded as a valid Christian baptism? The committee to whom it was referred expressed the opinion that it could not be so regarded, and recommended an answer in the negative. "Notwithstanding this," they reported, "each church session must decide for itself what shall be done in each particular case that may come before them, as no absolute rule can be laid down which will meet the peculiarities of every case." Their report was adopted by the Assembly. A resolution adopted by the Assembly declared "that, as a denomination of Protestants, we are not dependent on regular succession from the Roman Church, or any other body of Christians, for authority to preach the Gospel and administer the ordinances of the Church." The Committee on Education reported of the institutions of the Church: Lincoln University, Lincoln, Ill., had an endowment and property estimated to be worth \$264,700, and liabilities estimated at \$8,017.55. The faculty numbered nine professors and three tutors, and nearly 800 students were in attendance. Cumberland University had eleven professors and 375 students. It was the oldest institution in the Church, and had had great reverses in the loss of its endowments and buildings during the war. Trinity Uni-

versity reported a year of "reasonable success." Bethel College, McKenzie, Tenn., reported four teachers, 110 matriculations, and five candidates for the ministry among its students. Cumberland Female College, McMinnville, Tenn., had an annual average of about 100 students. Waynesburg College had about 200 students. A new college building had been begun, which would cost over \$60,000.

The Board of Publication reported to the General Assembly that their receipts and expenditures during the year had been each \$56,206.14. The assets of the Publishing House, deducting liabilities, were valued at \$49,499.01, showing an increase of value from the previous year of \$21,528.46.

The *Colored Cumberland Presbyterian Church* has been formed by the amicable separation of colored members from the Cumberland Presbyterian Church, and their organization into an independent body. The first number of their newspaper organ, *The Banner of Light*, was published in September, 1876. It stated that the number of members of the Colored Cumberland Presbyterian Church in the States of Kansas, Missouri, Illinois, Mississippi, Tennessee, Alabama, and Kentucky, was, in May, 1874, 3,925; that the number of ministers at that time was seventeen; and that the value of church property was \$12,550. Since that time the Presbytery of Missouri had added 240 members, and the same presbytery had raised \$529.25 in 1874. Later reports than for 1874 had not been received from the other States.

V. PRESBYTERIANS IN CANADA. (a.) *Presbyterian Church in Canada.*—The following is a summary of the statistics of this Church as they were reported to the General Assembly in June:

Synods.....	4
Presbyteries.....	33
Congregations.....	1,076
Ministerial charges.....	654
Ministers.....	664
Families.....	50,200
Communicants.....	82,186
Added during year.....	11,247
Sabbath scholars.....	57,340

CONTRIBUTIONS.

Stipend promised.....	\$419,066 21
Paid by congregations.....	368,500 91
From other sources.....	82,006 70
College fund.....	14,817 97
Home missions.....	25,478 47
Foreign missions.....	16,178 58
Aged and infirm ministers.....	6,218 81
Assembly fund.....	5,062 24
French evangelization.....	11,219 98
Sabbath-school contributions.....	9,496 67
Total for schemes.....	88,561 68
Total for all purposes.....	989,690 20

The General Assembly of the Presbyterian Church in Canada met in Toronto, June 8th. The Rev. Dr. Topp was chosen moderator. Much of the time of the Assembly was spent in the discussion of the case of the Rev. D. J. Macdonnell, who had expressed views regarded as not according to the standards of the Church. The basis of the charge against him lay in a sermon which he preached in Novem-

ber, 1875, in St. Andrew's Church, Toronto, in which he expressed views at variance with the doctrines of the Church on the subject of everlasting punishment. He had been called to account by the lower courts of the Church, and examined by committees, but failed to satisfy his examiners, avowing that he held "that there was ground to hope that God would eventually remove sin and suffering entirely from every part of his dominions." Mr. Macdonnell spoke in the discussions on his case, and explained that his position was one of doubt. He was ready to believe the truth of God on the doctrine in question, but had not been able to satisfy his mind as to what the truth actually was. The Assembly adopted the following action on the case:

That this Assembly, sustaining the reference for judgment, find that, in the statement made before this Assembly, Mr. Macdonnell has declared that he does not hold the doctrine of everlasting punishment in the sense held by the Church and formulated in the Confession of Faith; nevertheless, that he has adopted no doctrinal views contrary to the Confession of Faith: Therefore, *Resolved*, first, That the above twofold statement is not satisfactory to this Assembly; second, that a committee be appointed to confer with Mr. Macdonnell, in the hope that they may be able to bring in a report as to Mr. Macdonnell's views which may be satisfactory to this Assembly.

The committee subsequently reported that Mr. Macdonnell had met with them and stated that, while he was desirous to meet the wishes of the Assembly in regard to conference with the committee, he respectfully referred them to the statement he had already made before the General Assembly, as clearly defining his position, and that the report of that statement, which was published in the *Daily Mail* of June 16th, was substantially correct. The committee offered the following minute relating to the case, which was adopted by the Assembly:

Considering—1. That this General Assembly has declared that the statement of his views made by Mr. Macdonnell before it was not satisfactory; 2. That, on meeting with the committee appointed by the Assembly to confer with him, he signified that he had at present no further statement to make, by which his position toward the doctrine in question might be modified; 3. That the doctrine of the eternity or endless duration of the punishment of the wicked, as taught in the Confession of Faith, is a doctrine of Scripture which every minister of this Church must hold and teach—the General Assembly feels under obligation to continue its care in this matter; but, inasmuch as Mr. Macdonnell expresses his regret for having preached the sermon which gave occasion to these proceedings, has intimated that his mind is at present in an undecided state as regards the doctrine in question, and has engaged, while seeking for the light, not to contravene the traditions of the Church, the Assembly, in the hope that Mr. Macdonnell may find his views in accord with the standard on the subject in question: *Resolved*, That further time be given him carefully to consider the matter; and that he be requested to report through his presbytery, to the next General Assembly, whether he accepts the teaching of the Church on the subject. The Assembly would commend their brother to the guidance of the Spirit

of Truth, praying that, with the Divine blessing upon the further study of the Word of God, all difficulties as to the Scriptural evidence of the momentous doctrine incurred may speedily cease to perplex his mind.

(b.) A number of ministers of the *Presbyterian Church of Canada in connection with the Church of Scotland* refused to enter into the union with the Canada Presbyterian Church, and, after the union was consummated, declared themselves to constitute the synod in connection with the Church of Scotland. This synod met in Montreal in June. The Rev. David Watson was appointed moderator. Trustees were appointed for the various funds of the synod, and the usual committees were also appointed. A petition was presented from the congregation of West King, praying for ordinances in connection with the Church of Scotland, and complaining of the proceedings which had resulted in their being deprived of their church property. A list was presented of congregations in similar circumstances. It was agreed that a commission, with synodical powers, be appointed to watch such cases, and, if that were called for, to appoint a deputation to proceed to Edinburgh and attend the next General Assembly, or the meetings at any time of the Colonial Committee of the Church of Scotland.

VI. PRESBYTERIANS IN SCOTLAND. (a.) *The Church of Scotland*.—The General Assembly of the Established Church of Scotland met in Edinburgh, May 18th, and was opened ceremonially by the Earl of Galloway as her Majesty's Lord High Commissioner. The Rev. Dr. Cook, of Bourne, was elected moderator. The statistical report stated that the total revenue of the Church for its various agencies and schemes had been £350,621, as against £282,834 in 1875. The income for the colonial scheme had been £17,138, and that for the Jewish mission £6,035. The income for home missions had been £11,857.

The report of the Endowment Committee showed that 25 churches had been endowed during the year, making a total of 240 churches endowed since the scheme was projected. The total number of charges, parishes, unendowed chapels, etc., now in possession of the Church, was 1,473. The income for home missions had been £11,857, showing a considerable increase over the income of the previous year. The income for the Jewish missions had been £6,035. The missions were established at Constantinople, Alexandria, Beyrout, Salonica, and Monastir. The income for foreign missions had been £12,949, and the expenditures for the same had been £8,679. An overture, declaring clergymen of the Church of England, among others, eligible for admission into the Scottish Church, was rejected, and an amendment was adopted declaring Presbyterian ministers alone eligible. A case of approach to ritualism in the church of Dunse was decided by the Assembly. An altar-cloth and cross had been introduced into

the church. The synod had ordered them removed. The Assembly, on appeal, confirmed the order of the synod.

(b.) *Free Church of Scotland.*—The General Assembly of the Free Church of Scotland met at Edinburgh, May 18th. Dr. Thomas McLaughlan, of Edinburgh, was chosen moderator. Report was made that the sum of £70,357 had been raised for foreign missions, and £5,191 for the conversion of the Jews. The report of the colleges made mention of a bequest of £13,000, a gift of £8,000, of the raising of £10,000 toward a fourth chair in Aberdeen College, and of a legacy of £17,000 to the new college. The total amount of funds raised for Church purposes during the year had been £534,450 10s. 9d. A motion was adopted by an overwhelming majority, to the effect that nothing in recent legislation has altered the attitude of the State to the Church which led to the disruption; that the Free Church should not be moved from the ground which it had taken, etc. On the 25th of May the Synod of the Reformed Presbyterian Church in Scotland, consisting of 36 ministers and 34 elders, came into the Assembly, with its moderator at its head, and the union of the two bodies was formally consummated.

(c.) *Reformed Presbyterian Church.*—The Synod of the Reformed Presbyterian Church in Scotland met at Glasgow, March 13th. The Rev. David Taylor, of Glasgow, was chosen moderator. The statistical reports showed that the Church included 42 congregations, with 7,500 members, and that its annual contributions amounted to about £14,000. The synod, by a vote of 57 to 6, adopted a resolution in favor of union with the Free Church. This resolution, having received the approval of the presbyteries and synods, had now become the resolution of the Church. The Committee on Union was reappointed to carry the negotiations to a conclusion. The union with the Free Church was finally consummated in the General Assembly of that body, May 25th.

(d.) *Reformed Presbyterian Synod.*—The Reformed Presbyterian Synod of Scotland met in Glasgow, May 8th. The Rev. Robert Wallace was chosen moderator. His address was upon the duties devolving on covenanted witness. He spoke of the Church over whose synod he was moderator as the true Reformed Presbyterian Church of Scotland. The Church called *Reformed Presbyterian*, which was about to become amalgamated with the Free Church, had no proper claim to the designation *Reformed Presbyterian*. That Church had been for a number of years violating many of the distinctive principles and practices of the Reformed Presbyterian Church of Scotland. The business of the synod was of a routine character.

(e.) *United Presbyterian Church.*—The following are the statistics of the United Presbyterian Church, as reported in May, 1876: Number of congregations, 620; of elders, 5,075;

members, 190,242; Sunday-school teachers, 12,129; Sunday-school scholars, 92,502; average Sunday attendance on church, 85,000. The total income for 1876 was £419,965.

The General Synod of the United Presbyterian Church (Scotland) met in Edinburgh, May 11th. The Rev. John Rankine was chosen moderator. The synod, by a vote of 373 to 45, gave its sanction to the union of the United Presbyterian Church in England with the English Presbyterian Church. An animated debate took place on the question of Disestablishment, at the end of which the synod resolved to issue a pastoral letter advocating a severance between the Church and the State. The attention of the synod was called to the case of the proposed monument to Thomas Gillespie in the churchyard of the Abbey of Dunfermline. It was intended to inscribe upon the monument a record of Mr. Gillespie's expulsion and deposition by the General Assembly of the Established Church of Scotland, but the Government had refused to allow the word "deposed" to be used. A resolution was passed, declaring "that the synod hear with surprise and regret of her Majesty's Board of Works' refusal, and remit it to the Disestablishment Committee to cooperate with the United Presbyterian Presbytery of Dunfermline, with power to memorialize the Government in regard to the matter."

VII. PRESBYTERIAN CHURCH IN ENGLAND.—The fortieth meeting of the Synod of the Presbyterian Church in England was held in Liverpool, beginning May 1st. The Rev. Dr. J. Oswald Dykes was chosen moderator. The statistical report showed that the number of communicant members of the Church was 29,045—1,963 more than the number reported the previous year. The total amount of receipts for the year had been £98,484, and the total amount paid as stipends for the year had been £38,069. The total income for home missions had been £2,133. Seven new fields of labor had been occupied. The expenditures of the Foreign Mission Committee for the year had been £8,268, or £505 in excess of the income. The committee had twelve missionaries in China, besides three who were at home for rest, fifty-six native evangelists, and twenty-three students. The mission-stations were at Amoy, Swatow, and the island of Formosa. A motion for the immediate consummation of the union with the United Presbyterian congregations in England was carried, with only two dissentient votes. The Union Committee was reappointed to arrange for the reunion on the 18th of June.

The synod reassembled in Liverpool, June 13th, to perfect the union with the United Presbyterian Synod. The latter body met at the same time in a neighboring church in the same city. After transacting some routine business in each court, including the approval of the basis of union, the members of the two bodies marched in procession to Philharmonic

Hall, where they coalesced. The minutes of the two synods were read, and the moderators in turn declared the two churches one. The first Synod of the Presbyterian Church of England was then constituted. The Rev. Dr. Anderson, of Morpeth, was elected moderator. Deputations were received from various Presbyterian churches in the United Kingdom, and the synod was visited by the Nonconformist ministers of Liverpool in a body. The United Church will consist of eleven presbyteries, with 268 congregations, 50,000 members, and a yearly income of £160,000.

VIII. IRISH PRESBYTERIAN CHURCH.—The General Assembly of the Irish Presbyterian Church met at Belfast, June 5th. The Rev. John Meneely, of Belfast, was elected moderator. Report was made that the total income of the Church for the year had been £141,152 8s. 9d., or £1,307 5s. 3d. less than the income of the previous year. The report of the foreign missions was stated to be the most satisfactory that had ever been presented to the Assembly. The work was carried on principally in India and Ohina. The subject of instrumental music in the churches was again discussed. Five of the congregations, which were reported as in offense the year before in employing instruments, had agreed to give up their use if the Assembly would provide them with precentors; but the ministers and congregations of Enniskillan and Queenstown still held out, and refused to submit to the decision of the previous Assembly. Action in their cases was deferred.

The Elementary Education Committee made a report of their action during the year, in opposing the attacks which had been made upon the non-sectarian system of education.

IX. WELSH CALVINISTIC METHODISTS.—The annual meeting of the Calvinistic Methodist Association (which, in spite of its name, is a Presbyterian body) was held at Tredegar, in June. The Rev. T. James, of Llanelly, presided. The following is a summary of the statistical reports: Number of churches, 33; of ministers, 30; of preachers, 8; of leaders, 123; of communicants, 2,339; of candidates for membership, 322; of children in the Church, 921.

X. PRESBYTERIAN CHURCH IN NEW SOUTH WALES.—Union of the Presbyterian churches was effected in New South Wales in 1865. In 1876 there were in the colony some 66 ministers and 108 churches, besides other preaching-places, with a total seating capacity for 24,000 persons. The number of Presbyterian churches in the colonies and mission-fields in the Southern seas was 407, with 350 ministers.

PROKESCH-OSTEN, Count ANTON, an Austrian diplomatist, born December 10, 1795; died October 26, 1876. He became, in 1827, chief of the general staff of Admiral Count Dondolo, with whom he remained until 1830. In this position he concluded treaties for the amelioration of the condition of the Christians with the Pashas of St. Jean d'Acre and of

Syria. In 1831 he went with the Austrian army to Bologna as imperial commissioner; in 1832 he was sent on a special mission to Rome, and in 1833 to Egypt, to mediate between the Sultan and the Viceroy. In 1834 he was appointed ambassador to Greece, where he remained up to 1849, having been raised to the rank of major-general in 1843, and created a Freiherr (baron) in 1845. In February, 1849, he went to Berlin as ambassador, remaining there until 1852; and in 1853 he became President of the Bundestag (Federal Diet) in Frankfurt, having been in the mean while raised to the rank of lieutenant field-marshal, and created a privy councillor. In 1855 he was appointed imperial nuncio and ambassador to Constantinople, and in 1867 envoy extraordinary to the same court, in which position he remained up to 1871. Upon his retirement from the service he was created a count. He wrote a number of works on the Eastern countries, his chief work being "Geschichte des Abfalls der Griechen vom türkischen Reich" (6 vols., 1867-'68).

PROTESTANT EPISCOPAL CHURCH.

In the table on next page is given a summary of the statistics of the Protestant Episcopal Church in the United States of America for 1875-'76, as they appear in the *Church Almanac* for 1877 (Pott & Young, New York). The aggregate number of communicants is given as in forty-three dioceses and nine missionary districts. The number of communicants in the whole Church is estimated in the *Church Almanac* as 286,000. The aggregates of other items are given by the *Almanac* in a "general statistical summary" (in many instances incomplete), as follows: Number of dioceses, 45; of missionary districts (including Africa, China, and Japan), 13; of bishops, 59; of bishops elect, 2; of priests and deacons, 3,192; whole number of clergy, 3,251; number of parishes, about 2,800; number of ordinations in 37 dioceses and 5 missionary districts, 214; of candidates for deacon's orders in 35 dioceses and 5 missionary districts, 251; of churches consecrated in 18 dioceses and 8 missionary districts, 53; of baptisms in 40 dioceses and 9 missionary districts, 41,453; of confirmations in 43 dioceses and 9 missionary districts, 26,954; of Sunday-school teachers in 39 dioceses and 7 missionary districts, 24,894; of Sunday-school scholars in 40 dioceses and 7 missionary districts, 235,509; amount of contributions in 44 dioceses and 8 missionary districts, \$6,804,448.29.

Whittaker's *Protestant Episcopal Almanac and Directory* gives as the number of communicants in the diocese of Arkansas, 768; in Florida, 828; in Oregon and Washington, 756; in Niobrara, 415; in the African missions, 400. This *Almanac* also gives the following totals: Number of bishops, 59; of bishops elect, 2; of priests and deacons, 3,171; of parishes, about 2,900; of baptisms, 42,031; of confirmations, 26,761; of communicants,

* Number reported in 1875.

Quarterly—*American Church Review*, Newark, N. J.

The forty-first annual meeting of the *Board of Missions* of the Protestant Episcopal Church was held in Philadelphia, Pa., October 10th. Reports were made of the receipts and expenditures for the year, as follows: The total receipts of the board were \$295,000.65; disbursements, \$309,451.81; debt, \$72,705.66; investments, \$139,507.16. From and including 1835 till October, 1876, the total amount received and expended by the Domestic Committee had been, in round numbers, \$2,500,000, giving an annual average of nearly \$61,000 during forty-three years. More than forty-three dioceses and ten missionary jurisdictions had, for longer or shorter periods, been given to the work of the committee, and all but sixteen of these had also been receivers. Forty-four dioceses and missionary jurisdictions had contributed to the work of the Indian Commission. Contributions were also acknowledged from England, Japan, and Liberia. Two young men of the Chippewa Indians had been ordained to the diaconate, two others were ready to enter upon the same office, and four more had been received as candidates for holy orders. The missionary bishops of Japan reported that there were at Ozaka station 4 presbyters, 5 teachers, 27 communicants, 2 day-schools with 24 scholars, and 1 Sunday-school with 25 scholars; and at Tokio station 2 presbyters, 4 teachers, 35 communicants, 4 day-schools with 61 scholars, and 2 Sunday-schools with 68 scholars. Two persons had been baptized at Ozaka, and 19 persons had been baptized and 17 confirmed at Tokio. The Bishop of Hayti reported that there had been 50 baptisms and 27 confirmations in his diocese, and that there were in it 283 communicants and 88 Sunday-school scholars. The Commission of Home Missions to the Colored People reported that the normal school at Raleigh, N. C., the school and parish at Petersburg, Va., and the high-school at Charleston, S. C., were in a highly successful and prosperous condition. The Bishops of Nebraska and Dakota, of Colorado and Wyoming, and of Montana, Idaho, and Utah, made reports showing a steady advance of the interests of the Church in their respective dioceses.

A special meeting of the *House of Bishops* was held in Philadelphia, October 13th and 14th. The principal business of the meeting was the election of missionary bishops for the dioceses of China and Cape Palmas, Africa. The Rev. Samuel I. J. Scherenschewsky, D. D., was elected Missionary Bishop for China. Dr. Scherenschewsky had been elected to the same office one year before, but had then declined to accept it. At this time, however, he yielded to the renewed call of the bishops, and signified his acceptance. The Rev. John T. Magrath, Rector of St. Paul's Church, Jackson, Mich., was elected Missionary Bishop of Cape Palmas.

The seventeenth annual meeting of the *American Church Missionary Society* was held in Philadelphia, October 25th. The Rev. S. H. Tyng, D. D., presided. The receipts of the Society for the year had been \$54,550.50. In the field of domestic missions the Society had more than one hundred and twenty-five stations, representing fourteen dioceses and three missionary jurisdictions. Forty-three missionaries had been commissioned, eight had resigned, one had died, and thirty-three were now in active service. In the field of foreign missions the Society occupied the city of Mexico, with a district surrounding it, having a radius of from two hundred to four hundred miles. More than sixty congregations were officially connected with the Church of Jesus, or, to describe it by its full legal title, "The Mexican Branch of the Catholic Church of the Lord Jesus Christ Militant upon Earth." The worship of this Church is guided in accordance with a provisional service-book, entitled "Prayers and Hymns." This work is liturgical and responsive in character, and is to be enlarged and perfected by the legislative body of the Church, under the advice of the bishops who compose the Mexican Commission of the House of Bishops of the Protestant Episcopal Church. Its ministry is constituted of men who were ordained by Bishop Lee, of Delaware, on his recent visit to Mexico, who have also been aided by former Roman Catholic priests who have renounced their Church. Seven candidates were awaiting holy orders. Many lay assistants were employed.

The tenth annual meeting of the *Evangelical Education Society* of the Protestant Episcopal Church was held in Philadelphia, October 26th. Bishop Vail, of Kansas, presided. The report of the Board of Managers showed the financial condition of the Society to be as follows: Money on hand at the beginning of the year, \$787.23; amount received during the year, \$24,536.83. The Society was free from debt, and, notwithstanding the stringency of the times, had aided every worthy student who had applied for help. Forty-six students were on the Society's roll at the beginning of the year, and twenty-four had been added since. The number still upon the rolls was forty.

The annual meeting of the *New York Bible and Common Prayer-Book Society* was held in New York City, October 22d. Report was made that during the year the Society had given away about 28,000 volumes of Bibles, prayer-books, and Testaments. The Society was at present engaged in publishing in separate parts a translation of the prayer-book into German, made under the supervision of a committee appointed by the General Convention of the Protestant Episcopal Church.

The forty-third anniversary of the *Bishop White Prayer-Book Society* was held in Philadelphia, in October. The Society had during the year distributed 17,965 volumes of Bibles, prayer-books, and hymnals, at a total cost of

\$3,900. The receipts of the Society had been \$2,620, leaving a deficiency of \$1,280.

The anniversary of the *Society for the Increase of the Ministry* was held at Philadelphia, October 8th and 9th. The report was made for the year ending September 1, 1876. The Society had begun the year with \$625.74 in the treasury, and had received till the date of the report, from 45 dioceses and missionary jurisdictions, the sum of \$28,869.66. Its expenditures had been \$32,939.50. It had aided 153 scholars, representing 42 dioceses and missionary jurisdictions. One in eight of all the clergy of the Protestant Episcopal Church now living had received help from the Society. It had assisted students from every diocese studying in every college and seminary of the Church.

The third meeting of the *Church Congress* was held at Boston, beginning November 14th. The opening address was delivered by Bishop Huntington, of Central New York. The Bishop of Massachusetts presided, and delivered an address of welcome to the Congress. The following topics were discussed during the sessions: "The True Place of Art in Christianity;" "Foreign Missions, under our Present Knowledge of Non-Christian Nations, their Morals and their Religions;" "The Relation of the Protestant Episcopal Church to the Freedom of Religious Thought;" "The Relations of Secular and Religious Education;" "The Morals of Politics;" "The Just Liberty in the Adaptation of the Services to the Varied Wants of the People;" "The Prevention and Cure of Drunkenness;" "Revivals and Christian Nurture."

The *Diocesan Convention of Iowa* met in Davenport, May 31st. At a former meeting of the Convention, the Rev. J. H. Eccleston, of Philadelphia, had been elected bishop. The validity of the election was disputed on account of some informalities, and Dr. Eccleston declined to serve. A new election was therefore necessary. A letter was read from Dr. Eccleston declining a nomination. On the first ballot, the Rev. W. Stevens Perry, D. D., President of Hobart College, Geneva, N. Y., received a very large majority of the votes, and was elected. A resolution was unanimously adopted commending the action of Dr. Eccleston in the case. Dr. Perry was ordained bishop at Trinity Church, Geneva, N. Y., September 10th.

The tenth annual session of the *National Convocation of the Haytian Church* was held in Port-au-Prince, beginning June 11th. Conferences on religious subjects formed a prominent feature of the meeting. The educational institution set on foot by Bishop Holly was cordially approved. It was decided to celebrate the completion of the tenth year of the existence of the Church by giving a contribution of one hundred dollars to the centennial fund of the Board of Missions of the Protestant Episcopal Church of the United States, that Church having been the

means of helping on the national development of the Church in Hayti.

The *Commission of Bishops* appointed by the House of Bishops, and placed in charge of the relations of the Protestant Episcopal Church in the United States with the "Mexican Branch of the Catholic Church of our Lord Jesus Christ Militant upon Earth," in October issued a circular calling attention to the need of the Mexican Church for help, inviting contributions in its aid, and stating the appointment of a committee of three presbyters and four laymen as a special auxiliary committee for Mexican relief, to take the needful measures for raising moneys and administering financial assistance to the Mexican Church during the pressure of its necessities.

PRUSSIA, a kingdom of Europe, forming part of the German Empire. King, William I., German Emperor and King of Prussia. (For an account of the royal family, see GERMANY.)

The Prussian ministry in 1876 was composed as follows: President, Prince von Bismarck, Minister of Foreign Affairs and Chancellor of the German Empire; Camphausen (appointed October 26, 1869), Minister of Finance; Count zu Eulenburg (December 9, 1862), Minister of the Interior; Dr. Leonhardt (December 5, 1867), Minister of Justice; Dr. Falk (January 22, 1872), Minister of Ecclesiastical, Educational, and Medical Affairs; General von Kameke (November 9, 1873), Minister of War; Dr. Achenbach (May 13, 1873), Minister for Commerce, Trade, and Public Works; Dr. Friedenthal (September 19, 1874), Minister of Agricultural Affairs; Von Bülow (June 6, 1876), Secretary of State in the Foreign Office; Hofmann (June 6, 1876), President of the Imperial Chancery.

According to the budget for the year 1876, the revenue and expenditures were estimated each at 651,429,400 marks (1 mark = 23.8 cents). The revenue, which is divided under seven heads, representing the various ministerial departments, with the exception of the Ministry of Foreign Affairs, was as follows:

I. MINISTRY OF FINANCE:	
1. Income from crown-lands and forests.....	74,281,854
2. Direct Taxes:	
a. Land-tax (Grundsteuer).....	39,862,000
b. House-tax.....	15,761,000
c. Income-tax.....	29,347,000
d. Class-tax (Klassensteuer).....	41,505,000
e. Trade-tax (Gewerbesteuer).....	17,423,000
f. Railroad dues.....	4,338,000
g. Direct taxes in Hohenzollern.....	249,000
h. Miscellaneous.....	156,000
Total direct taxes.....	143,664,000
3. Indirect Taxes:	
a. Share of imperial customs and taxes.....	15,194,180
b. Succession-tax.....	4,000,000
c. Stamp-tax.....	23,000,000
d. Bills of exchange.....	89,840
e. Bridge, harbor, river, and canal dues.....	2,188,000
f. Miscellaneous.....	1,743,580
Total indirect taxes.....	44,210,000
4. State lottery.....	4,065,500
5. Seehandlung (Naval Commercial Institution).....	3,450,000
6. The mint.....	2,304,000
7. State printing-office.....	1,484,600
8. Miscellaneous.....	43,861,671
Total revenue of Ministry of Finance....	327,328,125

Total revenue of Ministry of Finance....	327,328,125
II. MINISTRY OF COMMERCE, INDUSTRY, AND PUBLIC WORKS:	
1. General administration.....	1,148,778
2. Produce of mines, furnaces, and salines.....	103,175,845
3. State railways.....	167,883,287
4. Porcelain-manufactory in Berlin.....	553,000
Total revenue of Ministry of Commerce, etc.....	272,712,600
III. State Ministry.....	452,800
IV. Ministry of Justice.....	42,515,000
V. Ministry of the Interior.....	2,963,971
VI. Ministry of Agriculture.....	3,550,340
VII. Ministry of Ecclesiastical, Educational, and Medical Affairs.....	1,981,364
Total revenue.....	651,429,400

A remarkable feature of the revenue system of Prussia is the rapid increase of the receipts from railroads and other state undertakings, such as mines. It is expected that they will soon become a far more fruitful source of income than all taxation, direct or indirect.

The expenditures are divided into continuing (fortdauernde) and transitory (einmalige) and extraordinary (außerordentliche) disbursements. The continuing are subdivided into current expenditures (Betriebsausgaben), administrative expenditures (Staatsverwaltungsausgaben), and charges on the consolidated fund (Dotationen). In the estimates for 1876 the branches of expenditures were as follows:

I. CURRENT EXPENDITURES:	
1. Ministry of Finance.....	66,674,930
2. Ministry of Commerce, Industry, and Public Works.....	202,568,865
3. Ministry of State.....	507,275
Total current expenditures.....	269,749,130
II. ADMINISTRATIVE EXPENDITURES:	
1. Ministry of Finance.....	109,908,571
2. Ministry of Commerce, Industry, and Public Works.....	19,687,835
3. Ministry of Justice.....	65,615,000
4. Ministry of the Interior.....	33,064,532
5. Ministry of Agriculture.....	9,386,707
6. Ministry of Public Instruction, and Ecclesiastical Affairs.....	44,700,647
7. Ministry of State.....	1,770,406
8. Ministry of Foreign Affairs.....	411,600
Total administrative expenditures.....	286,944,813
III. CHARGES ON CONSOLIDATED FUND:	
1. Addition to the "Kron-dotation" of the King.....	4,500,000
2. Interest of public debt, exclusive of railroad debt.....	33,812,330
3. Sinking-fund.....	16,068,938
4. Annuities and management... ..	1,739,737
5. Herrenhaus (House of Lords).....	168,110
6. Abgeordnetenhans (House of Deputies).....	1,302,180
Total charges on consolidated fund.....	62,406,130
Total continuing expenditures.....	619,108,116
Transitory and extraordinary expenditures...	32,329,283
Total expenditures.....	651,429,400

The public debt, embracing the national debt bearing interest—which includes the consolidated debt, debt of provinces, non-consolidated loans, etc.—and the national debt not bearing interest, according to a report laid before the House of Deputies in the session of 1876, was on January 1, 1876, as follows:

I. NATIONAL DEBT BEARING INTEREST:	
1. Consolidated debt of May 2, 1842 (Staatschuldscheine)...	149,163,000
2. Debt of provinces annexed in 1866.....	97,559,792
3. Non-consolidated loans of 1850, 1852, 1853, 1862, and 1868.....	112,647,800
4. War debt of the Kurmark and Neumark.....	2,889,948
5. Preference loan of 1855.....	27,180,000
6. Consolidated loan of 1870.....	451,808,750
7. State railroad debt.....	48,063,451
Total national debt bearing interest.....	888,809,585
II. NATIONAL DEBT NOT BEARING INTEREST:	
Floating debt (Schatzanweisungen).....	80,000,000
Total national debt.....	918,809,585

The following table exhibits the rapid reduction of the public debt of Prussia since 1872:

YEARS.	Total Public Debt.
1876.....	919,409,505
1875.....	947,113,088
1874.....	1,014,227,907
1873.....	1,081,382,207
1872.....	1,317,988,584

The session of the Prussian Diet was opened on January 16th, more than eighty members being present. Herr Camphausen, Minister of Finance, and Vice-President of the Prussian Ministry, read the speech from the throne. The speech commenced by referring to the pressure weighing upon trade and industry, but expressed confidence that the Prussian people would succeed through their energy in overcoming the difficulties of the situation. The revenue was not so large as set down in the estimates for 1876, but sufficient to carry on the administration in the same manner as formerly, to allow larger grants in various departments, and to give further development to the great public works of construction which had been undertaken. The speech announced that the budget would be immediately submitted to the Diet, as also bills for settling the jurisdiction of the newly-created public authorities, altering the regulations for the administration of towns, forming a communal union for the city of Berlin, regulating the question of settlement and legal position of agricultural and forest laborers, completing the laws for the protection of forests, granting a legal sanction to the rules of the General Synod, and regulating the state's rights of supervision over the Evangelical Churches. The speech remarked that the preliminary labors connected with the drafting of a law upon the

state right of supervision and administration of the property of Catholic dioceses were approaching their conclusion. The debates on the budget were prolonged by the frequent and violent attacks made by the members of the Centre upon the policy of the Government in regard to the Catholic Church; but on March 24th the Herrenhaus adopted it in the form it came up from the Abgeordnetenhaus. A considerable excitement was produced by the introduction of a Government bill for the sale of the Prussian railways to the empire. The bill has only two paragraphs. The first, which has five clauses, commences thus: "The Government is empowered to conclude treaties with the German Empire by which shall be transferred to the German Empire, by purchase for a proper consideration, all state railways, including those railways still to be constructed, as well as those already in existence, with all premises and all existing rights and obligations." The second clause provides that all state rights having reference to the administration or management of the railways not belonging to the state shall be transferred to the German Empire. The third clause states that there shall be ceded to the German Empire to the same extent all other rights or shares incumbent on the state in connection with the railways. The fourth clause recites

ROYAL PALACE, POTSDAM.

that the German Government takes upon itself other state obligations connected with railways which are not its own. By the fifth clause the right of controlling the railways of the country is passed over to the Government. In the second paragraph the approval of both Houses of the Prussian Diet is reserved. With regard to the clauses 3 and 4 of the first paragraph, the explanations given in the bill occupy sixteen narrowly-printed pages. Stress is laid upon the long-needed reform of railway affairs

in Prussia, and the dangers of further delay in attending to the matter are pointed out. The most remarkable passage in these reasons is the following: "In case the endeavors of the Prussian Government respecting the transference of the Prussian railway property to the empire should fail by the opposition of some influential parties in the empire, there could be no doubt that Prussia herself would try with the greatest energy to accomplish the task, and would have especially to consider, as the next step in the carrying out of her railway policy, the enlargement and consolidation of her own railway system. What Prussia owes her confederates would then be paid, and nothing would henceforth hinder her opposing the detrimental division existing in the railway affairs, and the preponderance of private railway influence. The consequence of this Prussian railway policy would then probably be that by enlargement of the state railway system, and full development of the influence arising from the possession and administration of the railways, the ascendancy of the interests of the Prussian lines would be felt far beyond the limits of Prussian territory."

As Herr Delbrück, the president of the office of the Chancellor of the Empire, resigned at the time when the House of Deputies began the discussion of the bill, it was believed by many that the resignation was caused by a disagreement between Bismarck and Delbrück, but Prince Bismarck emphatically declared that it was unconnected with the railway question, and solely due to the condition of Herr Delbrück's health. The bill was favorably received by the majority of the Diet as tending to strengthen the consolidation and unity of the empire, and it was on April 29th passed to a second reading in the House of Deputies by the test-vote of 206 against 165. The bill for the incorporation of the duchy of Lauenburg with the kingdom of Prussia was passed without opposition, and was unanimously ratified, on June 2d, by the Lauenburg Diet. The bill providing for the introduction of the new synodal constitution of the United Evangelical Church* was approved (by the House of Deputies, on May 9th, by 211 against 141 votes), and the bill for the administration of the property of the Catholic Church obtained the approval of all the parties except the Centre and the Poles—the vote in the House of Deputies being 211 for and only 92 against it. The violent opposition, on the part of the Poles, to another Government bill, which makes the German the only official language throughout the monarchy, proved likewise unavailing. On one of the most important bills of the session, the so-called Competence bill, which is designed to regulate the powers of all authorities created by the laws published in 1872 and 1875 concerning the self-government of provinces, an agreement between the Government and the majority of the two Houses was ef-

fectured in the last days of the session. With regard to another important bill concerning the "Städteordnung," or municipal government, the majority of the House of Deputies refused to concur in the proposition of the Government as sanctioned by the House of Lords. It demanded an extension of the autonomy or self-government of cities to a degree which, in the opinion of the Government, would endanger the unity of the state, and a democratic change in the electoral law which at the present time, as the Government thought, would dangerously increase the influence of the Catholic Church and the social democratic party upon the masses of the population. The session was closed on June 30th by the Vice-President of the Ministry, Camphausen, without a speech from the throne.

The election of a new Prussian House of Deputies took place on October 27th. After the incorporation of the duchy of Lauenburg, which elects one deputy, the total number of the members of the Prussian Diet is 433. In the former Diet the two liberal parties, the National Liberals and the Party of Progress, had an aggregate of 242 members. In the new House they number 248, of whom 70 (an increase of 1) belong to the Party of Progress, and 178 (an increase of 5) to the National Liberals. To these must be added 8 "Old Liberals" (a decrease of 1), and 5 Liberals who are not connected with any of the parliamentary parties. The "Centre" has, as before, 68 members, among whom are 4 "Hospitanten" (visitors). The Poles have lost 3 districts, and have been reduced to 15. Northern Schleswig again sends 2 Danes. The various conservative parties have, as in the preceding House, an aggregate of 72 members.

The conflict between the Prussian Government and the Catholic Church continued throughout the year undiminished. On March 8th the Bishop of Münster, and on July 17th the Archbishop of Cologne, were deposed from their sees, and the property of their dioceses was placed under the administration of state officers.

PUBLIC DOCUMENTS. *Message of President GRANT, at the commencement of the second session of the Forty-fourth Congress, December 5, 1876.*

To the Senate and House of Representatives:

In submitting my eighth and last annual message to Congress, it seems proper that I should refer to, and in some degree recapitulate, the events and official acts of the past eight years.

It was my fortune, or misfortune, to be called to the office of Chief Executive without any previous political training. From the age of seventeen I had never even witnessed the excitement attending a presidential campaign but twice antecedent to my own candidacy, and at but one of them was I eligible as a voter.

Under such circumstances it is but reasonable to suppose that errors of judgment must have occurred. Even had they not, differences of opinion between the Executive, bound by an oath to the strict performance of his duties, and writers and debaters, must have arisen. It is not necessarily evidence of

* See ANNUAL CYCLOPEDIA FOR 1875, p. 655.

blunder on the part of the Executive because there are these differences of views. Mistakes have been made, as all can see and I admit, but it seems to me oftener in the selections made of the assistants appointed to aid in carrying out the various duties of administering the Government—in nearly every case selected without a personal acquaintance with the appointee, but upon recommendations of the representatives chosen directly by the people. It is impossible, where so many trusts are to be allotted, that the right parties should be chosen in every instance. History shows that no Administration, from the time of Washington to the present, has been free from these mistakes. But I leave comparisons to history, claiming that I have acted in every instance from a conscientious desire to do what was right, constitutional within the law, and for the very best interests of the whole people. Failures have been errors of judgment, not of intent.

My civil career commenced, too, at a most critical and difficult time. Less than four years before, the country had emerged from a conflict such as no other nation had ever survived. Nearly one-half of the States had revolted against the Government; and, of those remaining faithful to the Union, a large percentage of the population sympathized with the rebellion and made an "enemy in the rear," almost as dangerous as the more honorable enemy in the front. The latter committed errors of judgment, but they maintained them openly and courageously; the former received the protection of the Government they would see destroyed, and reaped all the pecuniary advantage to be gained out of the then existing state of affairs; many of them by obtaining contracts, and by swindling the Government in the delivery of their goods.

Immediately on the cessation of hostilities, the then noble President, who had carried the country so far through its perils, fell a martyr to his patriotism at the hands of an assassin.

The intervening time to my first inauguration was filled up with wranglings between Congress and the new Executive as to the best mode of "reconstruction" or, to speak plainly, as to whether the control of the Government should be thrown immediately into the hands of those who had so recently and persistently tried to destroy it, or whether the victors should continue to have an equal voice with them in this control. Reconstruction, as finally agreed upon, means this and only this, except that the late slave was enfranchised, giving an increase, as was supposed, to the Union-loving and Union-supporting votes. If *free*, in the full sense of the word, they would not disappoint this expectation. Hence, at the beginning of my first Administration, the work of reconstruction—much embarrassed by the long delay—virtually commenced. It was the work of the legislative branch of the Government. My province was wholly in approving their acts, which I did most heartily, urging the Legislatures of States that had not yet done so to ratify the fifteenth amendment to the Constitution. The country was laboring under an enormous debt, contracted in the suppression of rebellion, and taxation was so oppressive as to discourage production. Another danger also threatened us—a foreign war. The last difficulty had to be adjusted, and was adjusted, without a war, and in a manner highly honorable to all parties concerned. Taxes have been reduced within the last seven years nearly three hundred millions of dollars, and the national debt has been reduced in the same time over four hundred and thirty-five millions of dollars. By refunding the six per cent. bonded debt for bonds bearing five and four and one-half per cent. interest, respectively, the annual interest has been reduced from over one hundred and thirty millions of dollars in 1869 to but little over one hundred millions of dollars in 1876. The balance of trade has been changed from over one hundred and thirty millions against the United

States in 1869 to more than one hundred and twenty millions of dollars in our favor in 1876.

It is confidently believed that the balance of trade in favor of the United States will increase, not diminish, and that the pledge of Congress to resume specie payments in 1879 will be easily accomplished, even in the absence of much desired further legislation on the subject.

A policy has been adopted toward the Indian tribes inhabiting a large portion of the territory of the United States which has been humane, and has substantially ended Indian hostilities in the whole land, except in a portion of Nebraska, and Dakota, Wyoming, and Montana Territories—the Black Hills region and approaches thereto. Hostilities there have grown out of the avarice of the white man, who has violated our treaty stipulations in his search for gold. The question might be asked why the Government has not enforced obedience to the terms of the treaty prohibiting the occupation of the Black Hills region by whites? The answer is simple: The first immigrants to the Black Hills were removed by troops, but rumors of rich discoveries of gold took into that region increased numbers. Gold has actually been found in paying quantity, and an effort to remove the miners would only result in the desertion of the bulk of the troops that might be sent there to remove them. All difficulty in this matter has, however, been removed—subject to the approval of Congress—by a treaty ceding the Black Hills and the approaches to settlement by citizens.

The subject of Indian policy and treatment is so fully set forth by the Secretary of the Interior and the Commissioner of Indian Affairs, and my views so fully expressed therein, that I refer to their reports and recommendations as my own.

The relations of the United States with foreign powers continue on a friendly footing.

Questions have arisen from time to time in the foreign relations of the Government, but the United States have been happily free during the past year from the complications and embarrassments which have surrounded some of the foreign powers.

The diplomatic correspondence submitted herewith contains information as to certain of the matters which have occupied the Government.

The cordiality which attends our relations with the powers of the earth has been plainly shown by the general participation of foreign nations in the exhibition which has just closed, and by the exertions made by distant powers to show their interest in and friendly feelings toward the United States in the commemoration of the centennial of the nation. The Government and people of the United States have not only fully appreciated this exhibition of kindly feeling, but it may be justly and fairly expected that no small benefits will result both to ourselves and other nations from a better acquaintance, and a better appreciation of our mutual advantages and mutual wants.

Congress at its last session saw fit to reduce the amount usually appropriated for foreign intercourse by withholding appropriations for representatives of the United States in certain foreign countries, and for certain consular officers, and by reducing the amounts usually appropriated for certain other diplomatic posts, and thus necessitating a change in the grade of the representatives. For these reasons, immediately upon the passage of the bill making appropriations for the diplomatic and consular service for the present fiscal year, instructions were issued to the representatives of the United States at Bolivia, Ecuador, and Colombia, and to the consular officers for whom no appropriation had been made, to close their respective legations and consulates, and cease from the performance of their duties; and in like manner steps were immediately taken to substitute *chefs d'affaires* for ministers-resident in Portugal, Denmark, Greece, Switzerland, and Paraguay.

While thoroughly impressed with the wisdom of sound economy in the foreign service as in other branches of the Government, I cannot escape the conclusion that in some instances the withholding of appropriations will prove an expensive economy, and that the small retrenchment secured by a change of grade in certain diplomatic posts is not an adequate consideration for the loss of influence and importance which will attend our foreign representatives under this reduction. I am of the opinion that a reëxamination of the subject will cause a change in some instances in the conclusions reached on these subjects at the last session of Congress.

The Court of Commissioners of Alabama Claims, whose functions were continued by an act of the last session of Congress until the 1st day of January, 1877, has carried on its labors with diligence and general satisfaction. By a report from the clerk of the court, transmitted herewith, bearing date November 14, 1876, it appears that within the time now allowed by law the court will have disposed of all the claims presented for adjudication. This report also contains a statement of the general results of the labors of the court to the date thereof. It is a cause of satisfaction that the method adopted for the satisfaction of the classes of claims submitted to the court, which are of long standing and justly entitled to early consideration, should have proved successful and acceptable.

It is with satisfaction that I am enabled to state that the work of the joint commission for determining the boundary-line between the United States and British possessions from the northwest angle of the Lake of the Woods to the Rocky Mountains, commenced in 1873, has been completed. The final agreements of the commissioners, with the maps, have been duly signed, and the work of the commission is complete.

The fixing of the boundary upon the Pacific coast by the protocol of March 10, 1873, pursuant to the award of the Emperor of Germany by Article XXXIV. of the Treaty of Washington, with the termination of the work of this commission, adjusts and fixes the entire boundary between the United States and the British possessions, except as to the portion of territory ceded by Russia to the United States under the treaty of 1867. The work intrusted to the commissioner and the officers of the Army attached to the commission has been well and satisfactorily performed. The original of the final agreement of the commissioners, signed upon the 29th of May, 1876, with the original "list of astronomical stations observed," the original official "list of monuments marking the international boundary-line," and the maps, records, and general reports relating to the commission, have been deposited in the Department of State. The official report of the commissioner on the part of the United States, with the report of the chief astronomer of the United States, will be submitted to Congress within a short time.

I reserve for a separate communication to Congress a statement of the condition of the questions which lately arose with Great Britain respecting the surrender of fugitive criminals under the treaty of 1842.

The Ottoman Government gave notice, under date of January 15, 1874, of its desire to terminate the treaty of 1862, concerning commerce and navigation, pursuant to the provisions of the twenty-second article thereof. Under this notice the treaty terminated upon the 5th day of June, 1876. That Government has invited negotiations toward the conclusion of a new treaty.

By the act of Congress of March 23, 1874, the President was authorized, when he should receive satisfactory information that the Ottoman Government or that of Egypt had organized new tribunals likely to secure to citizens of the United States the same impartial justice enjoyed under the exercise of judicial functions by diplomatic and consular officers

of the United States, to suspend the operation of the act of June 22, 1860, and to accept for citizens of the United States the jurisdiction of the new tribunals. Satisfactory information having been received of the organization of such new tribunals in Egypt, I caused a proclamation to be issued upon the 27th of March last, suspending the operation of the act of June 22, 1860, in Egypt, according to the provisions of the act. A copy of the proclamation accompanies this message. The United States has united with the other powers in the organization of these courts. It is hoped that the jurisdictional questions which have arisen may be readily adjusted, and that this advance in judicial reform may be hindered by no obstacles.

The necessary legislation to carry into effect the convention respecting commercial reciprocity concluded with the Hawaiian Islands in 1875 having been had, the proclamation to carry into effect the convention as provided by the act approved August 15, 1876, was duly issued upon the 9th day of September last. A copy thereof accompanies this message.

The commotions which have been prevalent in Mexico for some time past, and which unhappily seem to be not yet wholly quieted, have led to complaints of citizens of the United States of injuries by persons in authority. It is hoped, however, that these will ultimately be adjusted to the satisfaction of both Governments. The frontier of the United States in that quarter has not been exempt from acts of violence by citizens of one republic on those of the other. The frequency of these is supposed to be increased and their adjustment made more difficult by the considerable changes in the course of the lower part of the Rio Grande River, which river is a part of the boundary between the two countries. These changes have placed on either side of that river portions of land which by existing conventions belong to the jurisdiction of the Government on the opposite side of the river. The subject of adjustment of this cause of difficulty is under consideration between the two republics.

The Government of the United States of Colombia has paid the award in the case of the steamer *Montijo*, seized by authorities of that Government some years since, and the amount has been transferred to the claimants.

It is with satisfaction that I am able to announce that the joint commission for the adjustment of claims between the United States and Mexico, under the convention of 1868, the duration of which has been several times extended, has brought its labors to a close. From the report of the agent of the United States, which accompanies the papers transmitted herewith, it will be seen that within the time limited by the commission one thousand and seventeen claims on the part of citizens of the United States against Mexico were referred to the commission. Of these claims, eight hundred and thirty-one were dismissed or disallowed, and in one hundred and eighty-six cases awards were made in favor of the claimants against the Mexican Republic, amounting in the aggregate to four million one hundred and twenty-five thousand six hundred and twenty-two dollars and twenty cents. Within the same period nine hundred and ninety-eight claims on the part of the citizens of the Mexican Republic against the United States were referred to the commission. Of these claims eight hundred and thirty-one were dismissed or disallowed; and in one hundred and sixty-seven cases awards were made in favor of the claimants against the United States, amounting in the aggregate to one hundred and fifty thousand four hundred and ninety-eight dollars and forty-one cents.

By the terms of the convention the amount of these awards is to be deducted from the amount awarded in favor of our citizens against Mexico, and the balance only to be paid by Mexico to the United States, leaving the United States to make provision

for this proportion of the awards in favor of its own citizens.

I invite your attention to the legislation which will be necessary to provide for the payment.

In this connection I am pleased to be able to express the acknowledgments due to Sir Edward Thornton, the umpire of the commission, who has given to the consideration of the large number of claims submitted to him much time, unwearied patience, and that firmness and intelligence which are well known to belong to the accomplished representative of Great Britain, and which are likewise recognized by the representative in this country of the republic of Mexico.

Monthly payments of a very small part of the amount due by the Government of Venezuela to citizens of the United States on account of claims of the latter against that Government continue to be made with reasonable punctuality. That Government has proposed to change the system which it has hitherto pursued in this respect, by issuing bonds for part of the amount of the several claims. The proposition, however, could not, it is supposed, properly be accepted, at least without the consent of the holders of certificates of the indebtedness of Venezuela. These are so much dispersed that it would be difficult, if not impossible, to ascertain their disposition on the subject.

In former messages I have called the attention of Congress to the necessity of legislation with regard to fraudulent naturalization and to the subject of expatriation and the election of nationality.

The number of persons of foreign birth seeking a home in the United States, the ease and facility with which the honest immigrant may after the lapse of a reasonable time become possessed of all the privileges of citizenship of the United States, and the frequent occasions which induce such adopted citizens to return to the country of their birth, render the subject of naturalization and the safeguards which experience has proved necessary for the protection of the honest naturalized citizen of paramount importance. The very simplicity in the requirements of law on this question affords opportunity for fraud, and the want of uniformity in the proceedings and records of the various courts, and in the forms of the certificates of naturalization issued, affords a constant source of difficulty.

I suggest no additional requirements to the acquisition of citizenship beyond those now existing, but I invite the earnest attention of Congress to the necessity and wisdom of some provisions regarding uniformity in the records and certificates, and providing against the frauds which frequently take place, and for the vacating of a record of naturalization obtained in fraud.

These provisions are needed in aid and for the protection of the honest citizen of foreign birth, and for the want of which he is made to suffer not infrequently. The United States has insisted upon the right of expatriation, and has obtained after a long struggle an admission of the principle contended for by acquiescence therein on the part of many foreign powers and by the conclusion of treaties on that subject. It is, however, but justice to the government to which such naturalized citizens have formerly owed allegiance, as well as to the United States, that certain fixed and definite rules should be adopted governing such cases, and providing how expatriation may be accomplished.

While immigrants in large numbers become citizens of the United States, it is also true that persons, both native-born and naturalized, once citizens of the United States either by formal acts or as the effect of a series of facts and circumstances, abandon their citizenship and cease to be entitled to the protection of the United States, but continue on convenient occasions to assert a claim to protection in the absence of provisions on these questions.

And in this connection I again invite your atten-

tion to the necessity of legislation concerning the marriages of American citizens contracted abroad, and concerning the status of American women who may marry foreigners, and of children born of American parents in a foreign country.

The delicate and complicated questions continually occurring with reference to naturalization, expatriation, and the status of such persons as I have above referred to, induce me to earnestly direct your attention again to these subjects.

In like manner, I repeat my recommendation that some means be provided for the hearing and determination of the just and subsisting claims of aliens upon the Government of the United States within a reasonable limitation, and of such as may hereafter arise. While, by existing provisions of law, the Court of Claims may in certain cases be resorted to by an alien claimant, the absence of any general provisions governing all such cases, and the want of a tribunal skilled in the disposition of such cases upon recognized fixed and settled principles, either provides no remedy in many deserving cases or compels a consideration of such claims by Congress or the Executive Department of the Government.

It is believed that other governments are in advance of the United States upon this question, and that the practice now adopted is entirely unsatisfactory.

Congress by an act approved the 8d day of March, 1875, authorized the inhabitants of the Territory of Colorado to form a State government, with the name of the State of Colorado, and therein provided for the admission of said State, when formed, into the Union, upon an equal footing with the original States.

A constitution having been adopted and ratified by the people of that State and the acting Governor having certified to me the facts as provided by said act, together with a copy of such constitution and ordinances as provided for in the said act, and the provisions of the said act of Congress having been duly complied with, I issued a proclamation upon the 1st of August, 1876, a copy of which is hereto annexed.

The report of the Secretary of War shows that the Army has been actively employed during the year in subduing, at the request of the Indian Bureau, certain wild bands of the Sioux Indian nation and in preserving the peace at the South during the election. The commission constituted under the act of July 24, 1876, to consider and report on the "whole subject of the reform and reorganization of the Army" met in August last, and has collected a large mass of statistics and opinions bearing on the subject before it. These are now under consideration, and their report is progressing. I am advised, though, by the president of the commission that it will be impracticable to comply with the clause of the act requiring the report to be presented, through me, to Congress on the first day of this session, as there has not yet been time for that mature deliberation which the importance of the subject demands. Therefore, I ask that the time of making the report be extended to the 29th day of January, 1877.

In accordance with the resolution of August 15, 1876, the Army regulations prepared under the act of March 1, 1875, have not been promulgated, but are held until after the report of the above-mentioned commission shall have been received and acted on.

By the act of August 15, 1876, the cavalry force of the Army was increased by 2,500 men, with the proviso that they should be discharged on the expiration of hostilities. Under this authority, the cavalry regiments have been strengthened, and a portion of them are now in the field pursuing the remnants of the Indians with whom they have been engaged during the summer.

The estimates of the War Department are made up on the basis of the number of men authorized by

law, and their requirements, as shown by years of experience; and also with the purpose on the part of the bureau officers to provide for all contingencies that may arise during the time for which the estimates are made. Exclusive of engineer estimates (presented in accordance with acts of Congress calling for surveys and estimates for improvements at various localities), the estimates now presented are about six millions in excess of the appropriations for the years 1874-'75 and 1875-'76. This increase is asked in order to provide for the increased cavalry force (should their services be necessary), to prosecute, economically, work upon important public buildings, to provide for armament of fortifications and manufacture of small-arms, and to replenish the working stock in the supply departments. The appropriations for these last named have for the past few years been so limited that the accumulations in store will be entirely exhausted during the present year, and it will be necessary to at once begin to replenish them.

I invite your special attention to the following recommendations of the Secretary of War:

1. That the claims under the act of July 4, 1864, for supplies taken by the Army during the war be removed from the offices of the Quartermaster and Commissary Generals and transferred to the Southern Claims Commission. These claims are of precisely similar nature to those now before the Southern Claims Commission, and the War Department bureaus have not the clerical force for their examination nor proper machinery for investigating the loyalty of the claimants.

2. That Congress sanction the scheme of an annuity-fund for the benefit of the families of deceased officers; and that it also provide for the permanent organization of the Signal Service; both of which were recommended in my last annual message.

3. That the manufacturing operations of the Ordnance Department be concentrated at three arsenals and an armory, and that the remaining arsenals be sold, and the proceeds applied to this object by the Ordnance Department.

The appropriations for river and harbor improvements for the current year were \$5,015,000. With my approval, the Secretary of War directed that of this amount \$2,000,000 should be expended, and no new work should be begun and none prosecuted which were not of national importance. Subsequently this amount was increased to \$2,287,800, and the works are now progressing on this basis.

The improvement of the South Pass of the Mississippi River, under James B. Eads and his associates, is progressing favorably. At the present time there is a channel of twenty and three-tenths (20.3) feet in depth between the jetties at the mouth of the pass, and eighteen and one-half (18½) feet at the head of the pass. Neither channel, however, has the width required before payments can be made by the United States. A commission of engineer officers is now examining these works, and their reports will be presented as soon as received.

The report of the Secretary of the Navy shows that branch of the service to be in condition as effective as it is possible to keep it within the means and authority given the Department. It is, of course, not possible to rival the costly and progressive establishments of great European powers with the old material of our Navy, to which no increase has been authorized since the war, except the eight small cruisers built to supply the place of others which had gone to decay. Yet the most has been done that was possible with the means at command; and by substantially rebuilding some of our old ships with durable material, and completely repairing and refitting our monitor fleet, the Navy has been gradually so brought up that, though it does not maintain its relative position among the progressive navies of the world, it is now in a condition more powerful and effective than it ever has been in time of peace.

The complete repairs of our five heavy iron-clads are only delayed on account of the inadequacy of the appropriations made last year for the working bureaus of the Department, which were actually less in amount than those made before the war, notwithstanding the greatly enhanced price of labor and materials, and the increase in the cost of the naval service, growing out of the universal use and great expense of steam-machinery. The money necessary for these repairs should be provided at once, that they may be completed without further unnecessary delay and expense.

When this is done, all the strength that there is in our Navy will be developed and useful to its full capacity, and it will be powerful for purposes of defense, and also for offensive action, should the necessity for that arise within a reasonable distance from our shores.

The fact that our Navy is not more modern and powerful than it is, has been made a cause of complaint against the Secretary of the Navy, by persons who at the same time criticize and complain of his endeavors to bring the Navy that we have to its best and most efficient condition; but the good sense of the country will understand that it is really, due to his practical action that we have at this time any effective naval force at command.

The report of the Postmaster-General shows the excess of expenditures (excluding expenditures on account of previous years) over receipts for the fiscal year ended June 30, 1878, to be \$4,151,988.66.

Estimated expenditures for the fiscal year ending June 30, 1878, are \$38,723,432.43.

Estimated revenue for the same period is \$30,645,165, leaving estimated excess of expenditure, to be appropriated as a deficiency, of \$6,078,267.43.

The Postmaster-General, like his predecessor, is convinced that a change in the basis of adjusting the salaries of postmasters of the fourth class is necessary for the good of the service, as well as for the interests of the Government, and urgently recommends that the compensation of the class of postmasters above mentioned be based upon the business of their respective offices, as ascertained from the sworn returns to the Auditor of stamps canceled.

A few postmasters in the Southern States have expressed great apprehension of their personal safety on account of their connection with the postal service, and have specially requested that their reports of apprehended danger should not be made public lest it should result in the loss of their lives. But no positive testimony of interference has been submitted, except in the case of a mail-messenger at Spartanburg, in South Carolina, who reported that he had been violently driven away while in charge of the mails, on account of his political affiliations. An assistant superintendent of the railway mail service investigated this case, and reported that the messenger had disappeared from his post, leaving his work to be performed by a substitute. The Postmaster-General thinks this case is sufficiently suggestive to justify him in recommending that a more severe punishment should be provided for the offense of assaulting any person in charge of the mails, or of retarding or otherwise obstructing them by threats of personal injury.

"A very gratifying result is presented in the fact that the deficiency of this Department during the last fiscal year was reduced to \$4,081,790.13, as against \$8,169,988.88 of the preceding year. The difference can be traced to the large increase in its ordinary receipts (which greatly exceed the estimates therefor) and a slight decrease in its expenditures."

The ordinary receipts of the Post-Office Department for the past seven fiscal years have increased at an average of over eight per cent. per annum, while the increase of expenditures for the same period has been but about 5.50 per cent. per annum, and the decrease of deficiency in the revenues has been at the rate of nearly two per cent. per annum.

The report of the Commissioner of Agriculture accompanying this message will be found one of great interest, marking, as it does, the great progress of the last century in the variety of products of the soil, increased knowledge and skill in the labor of producing, saving, and manipulating the same to prepare them for the use of man; in the improvements in machinery to aid the agriculturist in his labors, and a knowledge of those scientific subjects necessary to a thorough system of economy in agricultural production, namely, chemistry, botany, entomology, etc. A study of this report by those interested in agriculture and deriving their support from it will find it of value, in pointing out those articles which are raised in greater quantity than the needs of the world require, and must sell, therefore, for less than the cost of production, and those which command a profit over cost of production because there is not an over-production.

I call special attention to the need of the Department for a new gallery for the reception of the exhibits returned from the Centennial Exhibition, including the exhibits donated by very many foreign nations; and to the recommendations of the Commissioner of Agriculture generally.

The reports of the District Commissioners and the Board of Health are just received—too late to read them and to make recommendations thereon—and are herewith submitted.

The International Exhibition held in Philadelphia this year, in commemoration of the one hundredth anniversary of American independence, has proved a great success, and will, no doubt, be of enduring advantage to the country. It has shown the great progress in the arts, sciences, and mechanical skill, made in a single century, and demonstrated that we are but little behind older nations in any one branch, while in some we scarcely have a rival. It has served, too, not only to bring peoples and products of skill and labor from all parts of the world together, but in bringing together people from all sections of our own country, which must prove a great benefit in the information imparted and pride of country engendered.

It has been suggested by scientists interested in and connected with the Smithsonian Institution, in a communication herewith, that the Government exhibit be removed to the capital and a suitable building be erected or purchased for its accommodation as a permanent exhibit. I earnestly recommend this, and believing that Congress would second this view, I directed that all Government exhibits at the Centennial Exhibition should remain where they are, except such as might be injured by remaining in a building not intended as a protection in inclement weather, or such as may be wanted by the Department furnishing them, until the question of permanent exhibition is acted on.

Although the moneys appropriated by Congress to enable the participation of the several Executive Departments in the International Exhibition of 1876 were not sufficient to carry out the undertaking to the full extent at first contemplated, it gives me pleasure to refer to the very efficient and creditable manner in which the board appointed from these several Departments to provide an exhibition on the part of the Government have discharged their duties with the funds placed at their command. Without a precedent to guide them in the preparation of such a display, the success of their labors was amply attested by the sustained attention which the contents of the Government Building attracted during the period of the Exhibition from both foreign and native visitors.

I am strongly impressed with the value of the collection made by the Government for the purposes of the Exhibition, illustrating, as it does, the mineral resources of the country, the statistical and practical evidences of our growth as a nation, and the uses of the mechanical arts and the applications of ap-

plied science in the administration of the affairs of Government.

Many nations have voluntarily contributed their exhibits to the United States to increase the interest in any permanent exhibition Congress may provide for. For this act of generosity they should receive the thanks of the people, and I respectfully suggest that a resolution of Congress to that effect be adopted.

The attention of Congress cannot be too earnestly called to the necessity of throwing some greater safeguard over the method of choosing and declaring the election of a President. Under the present system there seems to be no provided remedy for contesting the election in any one State. The remedy is partially, no doubt, in the enlightenment of electors. The compulsory support of the free school, and the disfranchisement of all who cannot read and write the English language—after a fixed probation—would meet my hearty approval. I would not make this apply, however, to those already voters, but I would to all becoming so after the expiration of the probation fixed upon. Foreigners coming to the country to become citizens, who are educated in their own language, should acquire the requisite knowledge of ours during the necessary residence to obtain naturalization. If they did not take interest enough in our language to acquire sufficient knowledge of it to enable them to study the institutions and laws of the country intelligently, I would not confer upon them the right to make such laws nor to select those who do.

I append to this message, for convenient reference, a synopsis of administrative events and of all recommendations to Congress made by me during the last seven years. Time may show some of these recommendations not to have been wisely conceived, but I believe the larger part will do no discredit to the Administration. One of these recommendations met with the united opposition of one political party in the Senate, and with a strong opposition from the other, namely, the treaty for the annexation of Santo Domingo to the United States, to which I will specially refer, maintaining, as I do, that if my views had been concurred in, the country would be in a more prosperous condition to-day, both politically and financially.

Santo Domingo is fertile, and upon its soil may be grown just those tropical products of which the United States use so much, and which are produced or prepared for market now by slave-labor almost exclusively; namely, sugar, coffee, dye-woods, mahogany, tropical fruits, tobacco, etc. About seventy-five per cent. of the exports of Cuba are consumed by the United States. A large percentage of the exports of Brazil also find the same market. These are paid for almost exclusively in coin—legislation, particularly in Cuba, being unfavorable to a mutual exchange of the products of each country. Flour shipped from the Mississippi River to Havana can pass by the very entrance to the city on its way to a port in Spain, there pay a duty fixed upon articles to be reexported, transferred to a Spanish vessel and brought back almost to the point of starting, paying a second duty, and still leave a profit over what would be received by direct shipment. All that is produced in Cuba could be produced in Santo Domingo. Being a part of the United States, commerce between the island and mainland would be free. There would be no export duties on her shipments nor import duties on those coming here. There would be no import duties upon the supplies, machinery, etc., going from the States. The effect that would have been produced upon Cuban commerce, with these advantages to a rival, is observable at a glance. The Cuban question would have been settled long ago in favor of "free Cuba." Hundreds of American vessels would now be advantageously used in transporting the valuable woods, and other products of the soil of the island, to a market, and in carrying supplies and emigrants to it. The island

is but sparsely settled, while it has an area sufficient for the profitable employment of several millions of people. The soil would have soon fallen into the hands of United States capitalists. The products are so valuable in commerce that emigration there would have been encouraged; the emancipated race of the South would have found there a congenial home where their civil rights would not be disputed, and where their labor would be so much sought after that the poorest among them could have found the means to go. Thus in cases of great oppression and cruelty, such as has been practised upon them in many places within the last eleven years, whole communities would have sought refuge in Santo Domingo. I do not suppose the whole race would have gone, nor is it desirable that they should go. Their labor is desirable—indispensable almost—where they now are. But the possession of this territory would have left the negro "master of the situation" by enabling him to demand his rights at home on pain of finding them elsewhere.

I do not present these views now as a recommendation for a renewal of the subject of annexation, but I do refer to it to vindicate my previous action in regard to it.

With the present term of Congress my official life terminates. It is not probable that public affairs will ever again receive attention from me further than as a citizen of the republic, always taking a deep interest in the honor, integrity, and prosperity of the whole land.

U. S. GRANT.

EXECUTIVE MANSION, December 5, 1876.

Impeachment of William W. Belknap.

On the 2d of March, 1876, Mr. Clymer, of Pennsylvania, chairman of the Committee on Expenditures in the War Department, submitted to the House of Representatives the following resolutions:

Resolved, That William W. Belknap, late Secretary of War, be impeached of high crimes and misdemeanors while in office.

Resolved, That the testimony in the case of William W. Belknap, late Secretary of War, be referred to the Committee on the Judiciary, with instructions to prepare and report without unnecessary delay suitable articles of impeachment of said William W. Belknap, late Secretary of War.

Resolved, That a committee of five members of this House be appointed and instructed to proceed immediately to the bar of the Senate, and there impeach William W. Belknap, late Secretary of War, in the name of the House of Representatives and of all the people of the United States of America, of high crimes and misdemeanors while in office, and to inform that body that formal articles of impeachment will in due time be presented, and to request the Senate to take such order in the premises as they deem appropriate.

The resolutions were unanimously adopted, and the Speaker appointed, as the committee called for in the second resolution, Mr. Clymer, Mr. Robbins, of North Carolina, Mr. Blackburn, Mr. Bass, and Mr. Danford.

March 3d.—A message was received by the Senate notifying it of the action of the House, and thereafter the committee of the House, having appeared at the bar of the Senate, demanded that the Senate take order for the appearance of the said William W. Belknap to answer said impeachment.

The President *pro tempore*: "Mr. Chairman and gentlemen of the committee of the House of Representatives, the Senate will take order in the premises."

The committee thereupon withdrew.

Mr. Edmunds offered the following order:

Ordered, That the message of the House of Representatives relating to the impeachment of William W. Belknap be referred to a select committee, to consist of five Senators.

The resolution was agreed to.

By unanimous consent, the President *pro tempore* was authorized to appoint the committee; and Messrs. Edmunds, Conkling, Frelinghuysen, Thurman, and Stevenson, were appointed.

March 6th.—Mr. Edmunds, from this committee, reported the following, which was agreed to:

Ordered, That the Senate will, according to its standing rules and orders in such cases provided, take proper order thereon (upon the presentation of articles of impeachment), of which due notice shall be given to the House of Representatives.

Ordered, That the Secretary acquaint the House of Representatives herewith.

March 8th.—As Mr. Caleb P. Marsh, the chief witness against the Secretary, had fled to Canada, on report of the Judiciary Committee the House recommitted the resolution to proceed with the impeachment, and instructed the committee to take further testimony. At the same time, a bill was passed to protect witnesses against being held to answer for any act concerning which they may testify.

March 30th.—The Committee on the Judiciary of the House reported articles of impeachment, which were ordered to be printed, and which were adopted on April 3d, with resolutions appointing managers on the part of the House, and directing the articles to be presented. On the same day the Clerk of the House appeared at the bar of the Senate, and said that the House had agreed to the articles of impeachment, and that the House had appointed Mr. Scott Lord, of New York; Mr. J. Proctor Knott, of Kentucky; Mr. William P. Lynde, of Wisconsin; Mr. John A. MacMahon, of Ohio; Mr. George A. Jenks, of Pennsylvania; Mr. Elbridge G. Lapham, of New York; and Mr. George F. Hoar, of Massachusetts, managers to conduct the impeachment against William W. Belknap, late Secretary of War.

April 4th.—The managers of the impeachment on the part of the House of Representatives appeared at the bar of the Senate and exhibited the following articles. Proclamation being made, Manager Lord read the articles:

Articles exhibited by the House of Representatives of the United States of America, in the names of themselves and of all the People of the United States of America, against William W. Belknap, late Secretary of War, in maintenance and support of their impeachment against him for high crimes and misdemeanors while in said office.

ARTICLE I. That William W. Belknap, while he was in office as Secretary of War of the United States of America, to wit, on the 8th day of October, 1870, had the power and authority, under the laws of the United States, as Secretary of War as aforesaid, to appoint a person to maintain a trading-establishment at Fort Sill, a military post of the United States; that said Belknap, as Secretary of War as aforesaid, on the day and year aforesaid, promised to appoint one Caleb P. Marsh to maintain said trading-establishment at said military post; that thereafter, to wit, on the day and year aforesaid, the said Caleb P. Marsh and one John S. Evans entered into an agreement in writing substantially as follows, to wit:

Articles of agreement made and entered into this 6th day of October, in the year of our Lord 1870, by and between John S. Evans, of Fort Sill, Indian Territory, United States of America, of the first part, and Caleb P. Marsh, of No. 31 West Thirty-fifth Street, of the city, county, and State of New York, of the second part, witnesseth, namely:

Whereas the said Caleb P. Marsh has received from General William W. Belknap, Secretary of War of the United States, the appointment of post-trader at Fort Sill aforesaid; and whereas the name of said John S. Evans is to be filed into the commission of appointment of said post-trader at Fort Sill aforesaid, by permission and at the instance and request of said Caleb P. Marsh, and for the purpose of carrying out the terms of this agreement; and whereas said John S. Evans is to hold said position of post-trader as aforesaid solely as the appointee of said Caleb P. Marsh, and for the purpose hereinafter stated:

Now, therefore, said John S. Evans, in consideration of said appointment and the sum of one dollar to him in hand paid by said Caleb P. Marsh, the receipt of which is hereby acknowledged, hereby covenants and agrees to pay to said Caleb P. Marsh the sum of twelve thousand dollars annually, payable quarterly in advance, in the city of New York aforesaid; said sum to be so payable during the first year of this agreement absolutely and under all circumstances, anything hereinafter contained to the contrary notwithstanding; and thereafter said sum shall be so payable, unless increased or reduced in amount, in accordance with the subsequent provisions of this agreement.

In consideration of the premises, it is mutually agreed between the parties aforesaid as follows, namely:

1. This agreement is made on the basis of seven cavalry companies of the United States Army, which are now stationed at Fort Sill aforesaid.

2. If at the end of the first year of this agreement the forces of the United States Army stationed at Fort Sill aforesaid shall be increased or diminished not to exceed one hundred (100) men, then this agreement shall remain in full force and unchanged for the next year. If, however, the said forces shall be increased or diminished beyond the number of one hundred (100) men, then the amount to be paid under this agreement by said John S. Evans to said Caleb P. Marsh shall be increased or reduced in accordance therewith and in proper proportion thereto. The above rule laid down for the continuation of this agreement at the close of the first year thereof shall be applied at the close of each succeeding year, so long as this agreement shall remain in force and effect.

3. This agreement shall remain in force and effect so long as said Caleb P. Marsh shall hold or control, directly or indirectly, the appointment and position of post-trader at Fort Sill aforesaid.

4. This agreement shall take effect from the date and day the Secretary of War aforesaid shall sign the commission of post-trader at Fort Sill aforesaid, said commission to be issued to said John S. Evans at the instance and request of said Caleb P. Marsh, and solely for the purpose of carrying out the provisions of this agreement.

5. Exception is hereby made in regard to the first quarterly payment under this agreement, it being agreed and understood that the same may be paid at any time within the next thirty days after the said Secretary of War shall sign the aforesaid commission of post-trader at Fort Sill.

6. Said Caleb P. Marsh is at all times, at the request of said John S. Evans, to use any proper influence he may have with said Secretary of War for the protection of said John S. Evans while in the discharge of his legitimate duties in the conduct of the business as post-trader at Fort Sill aforesaid.

7. Said John S. Evans is to conduct the said business of post-trader at Fort Sill aforesaid solely on his own responsibility and in his own name; it being expressly agreed and understood that said Caleb P. Marsh shall assume no liability in the premises whatever.

8. And it is expressly understood and agreed that the stipulations and covenants aforesaid are to apply and bind the heirs, executors, and administrators of the respective parties.

In witness whereof the parties to these presents have hereunto set their hands and seals the day and year first above written.

JOHN S. EVANS. [SEAL.]
CALEB P. MARSH. [SEAL.]

Signed, sealed, and delivered, }
in presence of }
E. J. BARTLETT.

That, thereafter, to wit, on the 10th day of October, 1870, said Belknap, as Secretary of War aforesaid, did, at the instance and request of said Marsh, at the city of Washington, in the District of Columbia, appoint said John S. Evans to maintain said trading-establishment at Fort Sill, the military post aforesaid; and, in consideration of said appointment of said Evans so made by him as Secretary of War as aforesaid, the said Belknap did, on or about the 2d day of November, 1870, unlawfully and corruptly receive from said Caleb P. Marsh the sum of one thousand five hundred dollars; and that at divers times thereafter, to wit, on or about the 17th day of January, 1871, and at or about the end of each three months during the term of one whole year, the said William W. Belknap, while still in office as Secretary of War as aforesaid, did unlawfully receive from said Caleb P. Marsh like sums of one thousand five hundred dollars, in consideration of the appointment of the said John S. Evans by him, the said Belknap, as Secretary of War as aforesaid, and in consideration of his permitting said Evans to continue to maintain the said trading-establishment at said military post during that time. Whereby the said William W. Belknap, who was then Secretary of War as aforesaid, was guilty of high crimes and misdemeanors in office.

ART. II. That said William W. Belknap, while he was in office as Secretary of War of the United States of America, did, at the city of Washington, in the District of Columbia, on the 4th day of November, 1870, willfully, corruptly, and unlawfully, take and receive from one Caleb P. Marsh the sum of one thousand five hundred dollars, in consideration that he would continue to permit one John S. Evans to maintain a trading-establishment at Fort Sill, a military post of the United States, which said establishment said Belknap, as Secretary of War as aforesaid, was authorized by law to permit to be maintained at said military post, and which the said Evans had been before that time appointed by said Belknap to maintain; and that said Belknap, as Secretary of

War as aforesaid, for said consideration, did corruptly permit the said Evans to continue to maintain the said trading-establishment at said military post. And so the said Belknap was thereby guilty, while he was Secretary of War, of a high misdemeanor in his said office.

ART. III. That said William W. Belknap was Secretary of War of the United States of America before and during the month of October, 1870, and continued in office as such Secretary of War until the 2d day of March, 1876; that as Secretary of War as aforesaid said Belknap had authority, under the laws of the United States, to appoint a person to maintain a trading-establishment at Fort Sill, a military post of the United States, not in the vicinity of any city or town; that on the 10th day of October, 1870, said Belknap, as Secretary of War as aforesaid, did, at the city of Washington, in the District of Columbia, appoint one John S. Evans to maintain said trading-establishment at said military post, and that said John S. Evans, by virtue of said appointment, has since, till the 2d day of March, 1876, maintained a trading-establishment at said military post; and said Evans, on the 8th day of October, 1870, before he was so appointed to maintain said trading-establishment as aforesaid, and in order to procure said appointment and to be continued therein, agreed with one Caleb P. Marsh that, in consideration that said Belknap would appoint him, the said Evans, to maintain said trading-establishment at said military post, at the instance and request of said Marsh, he, the said Evans, would pay to him a large sum of money, quarterly, in advance, from the date of his said appointment by said Belknap, to wit, twelve thousand dollars during the year immediately following the 10th day of October, 1870, and other large sums of money, quarterly, during each year that he, the said Evans, should be permitted by said Belknap to maintain said trading-establishment at said post; that said Evans did pay to said Marsh said sum of money quarterly during each year after his said appointment, until the month of December, 1875, when the last of said payments was made; that said Marsh, upon the receipt of each of said payments, paid one-half thereof to him, the said Belknap. Yet the said Belknap, well knowing these facts, and having the power to remove said Evans from said position at any time, and to appoint some other person to maintain said trading-establishment, but criminally disregarding his duty as Secretary of War, and basely prostituting his high office to his lust for private gain, did unlawfully and corruptly continue said Evans in said position, and permit him to maintain said establishment at said military post during all of said time, to the great injury and damage of the officers and soldiers of the Army of the United States stationed at said post, as well as of emigrants, freighters, and other citizens of the United States, against public policy, and to the great disgrace and detriment of the public service.

Whereby the said William W. Belknap was, as Secretary of War as aforesaid, guilty of high crimes and misdemeanors in office.

ART. IV. That said William W. Belknap, while he was in office and acting as Secretary of War of the United States of America, did, on the 10th day of October, 1870, in the exercise of the power and authority vested in him as Secretary of War as aforesaid by law, appoint one John S. Evans to maintain a trading-establishment at Fort Sill, a military post of the United States; and he, the said Belknap, did receive from one Caleb P. Marsh large sums of money, for and in consideration of his having so appointed said John S. Evans to maintain said trading-establishment at said military post, and for continuing him therein, whereby he has been guilty of high crimes and misdemeanors in his said office.

Specification 1. On or about the 2d day of November, 1870, said William W. Belknap, while Secretary of War as aforesaid, did receive from Caleb P. Marsh one thousand five hundred dollars, in consideration of his having appointed said John S. Evans to maintain a trading-establishment at Fort Sill aforesaid, and for continuing him therein.

Here follow sixteen similar specifications charging the receipt of money at various times, the whole amount being twenty-four thousand four hundred and fifty dollars.

ART. V. That one John S. Evans was, on the 10th day of October, in the year 1870, appointed by the said Belknap to maintain a trading-establishment at Fort Sill, a military post on the frontier, not in the vicinity of any city or town, and said Belknap did, from that day continuously to the 2d day of March, 1876, permit said Evans to maintain the same; and said Belknap was induced to make said appointment by the influence and request of one Caleb P. Marsh; and said Evans paid to said Marsh, in consideration of such influence and request and in consideration that he should thereby induce said Belknap to make said appointment, divers large sums of money at various times, amounting to about twelve thousand dollars a year, from the date of said appointment to the 25th day of March, 1872, and to about six thousand dollars a year thereafter until the 2d day of March, 1876, all

which said Belknap well knew; yet said Belknap did, in consideration that he would permit said Evans to continue to maintain said trading-establishment, and in order that said payments might continue to be made by said Evans to said Marsh as aforesaid, corruptly receive from said Marsh, either to him, the said Belknap's, own use, or to be paid over to the wife of said Belknap, divers large sums of money at various times, namely: the sum of fifteen hundred dollars on or about the 2d day of November, 1870; the sum of fifteen hundred dollars on or about the 17th day of January, 1871; the sum of fifteen hundred dollars on or about the 18th day of April, 1871; the sum of fifteen hundred dollars on or about the 25th day of July, 1871; the sum of fifteen hundred dollars on or about the 10th day of November, 1871; the sum of fifteen hundred dollars on or about the 15th day of January, 1872; the sum of fifteen hundred dollars on or about the 18th day of June, 1872; the sum of fifteen hundred dollars on or about the 22d day of November, 1872; the sum of one thousand dollars on or about the 28th day of April, 1873; the sum of seventeen hundred dollars on or about the 16th day of June, 1873; the sum of fifteen hundred dollars on or about the 4th day of November, 1873; the sum of fifteen hundred dollars on or about the 22d day of January, 1874; the sum of fifteen hundred dollars on or about the 10th day of April, 1874; the sum of fifteen hundred dollars on or about the 9th day of October, 1874; the sum of fifteen hundred dollars on or about the 24th day of May, 1875; the sum of fifteen hundred dollars on or about the 17th day of November, 1875; the sum of seven hundred and fifty dollars on or about the 15th day of January, 1876: all of which acts and doings were while the said Belknap was Secretary of War of the United States, as aforesaid, and were a high misdemeanor in said office.

And the House of Representatives by protestation, saving to themselves the liberty of exhibiting at any time hereafter any further articles of accusation or impeachment against the said William W. Belknap, late Secretary of War of the United States, and also of replying to his answers which he shall make unto the articles herein preferred against him, and of offering proof to the same and every part thereof, and to all and every other article, accusation, or impeachment which shall be exhibited by them, as the case shall require, do demand that the said William W. Belknap may be put to answer the high crimes and misdemeanors in office herein charged against him, and that such proceedings, examinations, trials, and judgments may be thereupon had and given as may be agreeable to law and justice.

The President *pro tempore*: "The Chair informs the managers that the Senate will take proper order on the subject of the impeachment, of which due notice shall be given to the House of Representatives."

The managers thereupon withdrew.

The Chief-Justice, Hon. Morrison R. Waite, administered the requisite oath to the Senators. Thereafter, on being notified, the managers appeared and asked for process in the case, when the Senate

Ordered, That a summons be issued to William W. Belknap, returnable on Monday, the 17th day of the present month, at one o'clock in the afternoon.

April 17th.—Mr. Belknap, being called, was represented by Hon. Matthew Carpenter, who said: "Mr. President, William W. Belknap, a private citizen of the United States and of the State of Iowa, in obedience to the summons of the Senate sitting as a court of impeachment to try the articles presented against him by the House of Representatives of the United States, appears at the bar of the Senate sitting as a court of impeachment, and interposes the plea"—which he asked the Secretary to read, and requested that it be filed.

The Secretary read the plea:

That at the time when the said articles of impeachment were exhibited and presented against him, the said Belknap, he, the said Belknap, was not, nor hath he since been, nor is he now, an officer of the United States; but at the said times was, ever since hath been, and now is, a private citizen of the United States and of the State of Iowa; and this he, the said Belknap, is ready to verify. Wherefore he prays judgment whether this court can or will take further cognizance of the said articles of impeachment.

Mr. Carpenter announced that Judge Jeremiah S. Black, Hon. Montgomery Blair, and himself, appeared as counsel for Mr. Belknap.

The managers were given until the 19th, at one

o'clock, to consider what replication to make to the plea.

April 19th.—Mr. Manager Lord presented the replication to the Senate sitting as a court of impeachment.

The Secretary read the replication:

1. That the matters alleged in the said plea are not sufficient to exempt the said William W. Belknap from answering the said articles of impeachment, because they say that at the time all the acts charged in said articles of impeachment were done and committed, and thence continuously done, to the 2d day of March, A. D. 1876; the said William W. Belknap was Secretary of War of the United States, as in said articles of impeachment averred, and therefore that, by the Constitution of the United States, the House of Representatives had power to prefer the articles of impeachment, and the Senate have full and the sole power to try the same.

2. For a second and further replication to the plea of the said William W. Belknap, say that the matters alleged in the said plea are not sufficient to exempt the said William W. Belknap from answering the said articles of impeachment, because they say that, at the time of the commission by the said William W. Belknap of the acts and matters set forth in the said articles of impeachment, he, the said William W. Belknap, was an officer of the United States, as alleged in the said articles of impeachment; and they say that the said William W. Belknap, after the commission of each one of the acts alleged in the said articles, was and continued to be such officer, as alleged in said articles, until and including the 2d day of March, A. D. 1876, and until the House of Representatives, by its proper committee, had completed its investigation of his official conduct as such officer in regard to the matters and things set forth as official misconduct in the said articles, and the said committee was considering the report it should make to the House of Representatives upon the same, the said Belknap being at the time aware of such investigation, and of the evidence taken, and of such proposed report.

And the House of Representatives further say that, while its said committee was considering and preparing its said report to the House of Representatives recommending the impeachment of the said William W. Belknap for the matters and things set forth in the said articles, the said William W. Belknap, with full knowledge thereof, resigned his position as such officer on the said 2d day of March, A. D. 1876, with intent to evade the proceedings of impeachment against him. And the House of Representatives resolved to impeach the said William W. Belknap for said matters as in said articles set forth on said 2d day of March, A. D. 1876. And the House of Representatives say that by the Constitution of the United States the House of Representatives had power to prefer said articles of impeachment against the said William W. Belknap, and that the Senate sitting as a court of impeachment has full power to try the same.

The following order was made:

Ordered, That the respondent file his rejoinder with the Secretary on or before the 24th day of April instant, who shall deliver a copy thereof to the Clerk of the House of Representatives, and that the House of Representatives file their sur-rejoinder, if any, on or before the 25th day of April instant; a copy of which shall be delivered by the Secretary to the counsel for the respondent.

Ordered, That the trial proceed on the 27th day of April instant, at twelve o'clock and thirty minutes afternoon.

April 27th.—The rejoinder was read, as follows:

That the replication of the House of Representatives, first above pleaded to the said plea of him, the said Belknap, and the matters therein contained in manner and form as the same are above pleaded and set forth, are not sufficient in law for the said House of Representatives to have or maintain impeachment thereof against him, the said Belknap, and that he, the said Belknap, is not bound by law to answer the same.

And as to the second replication of the House of Representatives of the United States, secondly above pleaded, with that it is not true, as in that replication alleged, that he, the said Belknap, was Secretary of War of the United States from any time until and including the 2d day of March, A. D. 1876.

2. And the said Belknap further saith, as to the said second replication of the House, secondly above pleaded, that it is not true, as in that replication alleged, that he, the said Belknap, was Secretary of War until the said House of Representatives, by any committee of the said House raised or instructed for that purpose, or having any authority from the House of Representatives in that behalf, had investigated the official conduct of him, the said Belknap, as Secretary of War, in regard to the matters and things set forth as official misconduct in the said articles of impeachment.

3. And the said Belknap, as to the said second replication

of the said House, secondly above pleaded, further saith that at the city of Washington, in the District of Columbia, on the 2d day of March, A. D. 1876, at 10 o'clock and 20 minutes in the forenoon of that day, he, the said Belknap, resigned the office of Secretary of War, by written resignation under his hand, addressed and delivered to the President of the United States, and the President of the United States then and there accepted the said resignation, by acceptance in writing under his hand, then and there indorsed upon the said written resignation.

4. And the said Belknap, as to the said second replication of the House, secondly above pleaded, further saith that, when the said House of Representatives took the first proceeding in relation to the impeachment of him, the said Belknap, and when the matter was first mentioned in the said House—that is, in the afternoon of the 2d day of March, A. D. 1876—the said House of Representatives was fully advised and well knew that he, the said Belknap, had before then resigned the said office of Secretary of War, and that he, the said Belknap, was not then an officer of the United States, as the facts were.

5. And the said Belknap, as to the said second replication of the House, secondly above pleaded, further saith that the Committee on the Expenditures of the War Department were informed of his resignation while examining charges against him, and that thereupon the said committee declared that they, the said committee, had no further duty to perform in the premises.

6. And said Belknap, as to the said second replication of the House, secondly above pleaded, further saith, although true it is that he did resign his position as Secretary of War on the 2d day of March, A. D. 1876, nevertheless it is not true, as alleged in that replication, that he, said Belknap, resigned his said position with intent to "erase" any proceedings of said House of Representatives to impeach him, said Belknap; but, on the contrary thereof, he avers the fact to be, that a standing committee of said House, known as the Committee on the Expenditures of the War Department, without any authority from or direction of said House of Representatives to examine, inquire, or investigate in regard to the matters and things set forth in said articles as official misconduct of him, said Belknap, had examined one Marsh, and he had made a statement to said committee, which said statement, if true, would not support articles of impeachment against him, said Belknap, but which said statement was of such a character in respect to other persons, some of whom had been and one of whom was so nearly connected with him, said Belknap, by domestic ties as greatly to afflict him, said Belknap, and make him willing to secure the suppression of so much of said statement as affected such other persons as any cost to himself; therefore he, said Belknap, proposed to said committee that, if said committee would suppress that part of said statement which related to said other persons, he, said Belknap, though contrary to the truth, would admit the receipt by him, said Belknap, of all the moneys stated by said Marsh to have been received by him from one Evans, mentioned in said statement, and paid over by said Marsh to any other person or persons; but said committee declined to accede to said proposition, and Hon. Helster Clymer, chairman of said committee, then declared to said Belknap that he, said Clymer, should move in the said House of Representatives, upon the statement of said Marsh, for the impeachment of him, said Belknap, unless the said Belknap should resign his position as Secretary of War before noon of the next day, to wit, March 3, A. D. 1876; and, said Belknap regarding this statement of said Clymer, as aforesaid, as an intimation that he, said Belknap, could, by thus resigning, avoid the affliction inseparable from a protracted trial in a forum, which would attract the greatest degree of public attention, and the humiliation of availing himself of the defense disclosed in said statement itself, which would cast blame upon said other persons, he yielded to the suggestion made by said Clymer, chairman as aforesaid, believing that the same was made in good faith by the said Clymer, chairman as aforesaid, and that he, said Belknap, would, by resigning his position as Secretary of War, secure the speedy dismissal of said statement from the public mind, which said statement, though it involved no criminality on his part, was deeply painful to his feelings, and did resign his said position as Secretary of War, as hereinbefore stated, at 10 o'clock and 20 minutes in the forenoon of the 2d day of March, A. D. 1876; and at 11 o'clock in the forenoon of the day and year last aforesaid he, said Belknap, caused said committee to be notified of his said resignation and of the acceptance thereof by the President of the United States as aforesaid; all of which was in pursuance and in consequence of the said suggestion so made by said Clymer; and thereupon said committee declared that they, the said committee, had no further duty to perform in the premises. And he, said Belknap, submits that, while said House of Representatives claims that said Clymer was acting on its behalf in said pretended examination of said Marsh, said House ought, in honor and in law, to be estopped to deny that said Clymer was also

acting on behalf of said House in suggesting the resignation of him, said Belknap, as aforesaid, and ought not to be heard to complain of a resignation thus induced.

The Secretary read the sur-rejoinder of the House of Representatives:

1. That the said first replication to the plea of the said William W. Belknap to the articles of impeachment exhibited against him as aforesaid, and the matters therein contained, in manner and form as the same are above set forth and stated, are sufficient in law for the said House of Representatives to have and maintain the said articles of impeachment against the said William W. Belknap, and that the Senate sitting as a court of impeachment has jurisdiction to hear, try, and determine the same.

2. And the said House of Representatives, as to the first and second subdivisions of the rejoinder to the second replication of the House of Representatives to the plea of the defendant to the said articles of impeachment, wherein the said defendant demands trial according to law, the said House of Representatives do the like; and as to the third, fourth, fifth, and sixth subdivisions of the rejoinder of the said defendant to the said second replication, they say, reserving to themselves all advantage of exception to the insufficiency of the said subdivisions of said rejoinder to said second replication, that they deny each and every averment, in said several rejoinders to said second replication contained, or either of them, which denies or traverses the acts and intents charged against said defendant in said second replication, and they reaffirm the truth of the matters stated therein; and this the said House of Representatives pray may be inquired of by the Senate sitting as a court of impeachment.

To which respondent replied that he also demanded trial.

Application was thereupon made by counsel for Mr. Belknap for an adjournment until December, which was refused, and the following adopted, April 28th:

Ordered. That the Senate proceed first to hear and determine the question whether William W. Belknap, the respondent, is amenable to trial by impeachment for acts done as Secretary of War, notwithstanding his resignation of said office; and that the managers and counsel in such argument discuss the question whether the issues of fact are material, and whether the matters in support of the jurisdiction alleged by the House of Representatives in the pleadings subsequent to the articles of impeachment can be thus alleged, if the same are not averred in said articles.

Ordered. That the hearing proceed on May 4, 1876, at 12 o'clock and 30 minutes P. M.; that the opening and close of the argument be given to the respondent; that three counsel and four managers may be heard in such order as may be agreed on between themselves; and that such time be allowed for argument as the managers and counsel may desire.

May 4th.—The argument of the points indicated in the resolution of April 28th was commenced, and continued on the 5th, 6th, and 8th of May. The points presented on the part of Mr. Belknap by his counsel, Messrs. Carpenter, Blair, and Black, were:

1. That articles of impeachment cannot be entertained against a private citizen in any case whatever;

2. That wherever articles of impeachment are exhibited, they must set forth every fact essential to constitute a high crime or misdemeanor, and every fact necessary to bring the case within the jurisdiction of the court; and

3. That the issues of fact arising upon the plea in abatement are immaterial—

contending that, by his resignation, he ceased to be an officer, and was only a private citizen at the time of his impeachment.

Messrs. Lord, Knox, Jenks, and Hoar, on the part of the managers, contended that Belknap, having been in office at the time the offenses charged were committed, and at the time when the investigation was in progress, and for a portion of the day when the resolution was passed, could not oust the Senate of jurisdiction by a resignation of his office when he found impeachment imminent.

The argument being concluded, it was

Ordered. That until further notice, the attendance before the Senate, sitting for the trial of the impeachment, of the managers and the respondent will not be required.

The questions were held under advisement and consideration from May 15th to the 29th inclusive, when it was determined to take the vote.

May 29th.—The President *pro tempore* announced

the proposition before the Senate pending for determination.

Mr. Thurman submitted the following resolutions for consideration :

Resolved, That, in the opinion of the Senate, William W. Belknap, the respondent, is amenable to trial by impeachment for acts done as Secretary of War, notwithstanding his resignation of said office.

Resolved, That the House of Representatives and the respondent be notified, that on the — day of —, at 12 o'clock meridian, the Senate will deliver its judgment in open Senate on the question of jurisdiction raised by the pleadings, at which time the managers on the part of the House and the respondent are notified to attend.

Resolved, That at the time specified in the foregoing resolution the President of the Senate shall pronounce the judgment of the Senate as follows: "It is ordered by the Senate sitting for the trial of the articles of impeachment preferred by the House of Representatives against William W. Belknap, late Secretary of War, that the demurrer of said William W. Belknap to the replication of the House of Representatives to the plea to the jurisdiction filed by said Belknap be, and the same hereby is, overruled; and going back to the first defect, and it being the opinion of the Senate that said plea is insufficient in law, and that said articles of impeachment are sufficient in law, it is therefore further ordered and adjudged that said plea be, and the same hereby is, overruled and held for naught, and said William W. Belknap is ordered to plead or answer to the merits within — days;" which judgment thus pronounced shall be entered upon the journal of the Senate sitting as aforesaid.

Mr. Conkling moved to amend the first resolution by inserting at the end thereof, "before he was impeached."

The amendment was agreed to.

Mr. Conkling having demanded a division of the question embraced in the resolutions of Mr. Thurman, and a separate vote thereon,

On the question to agree to the first resolution as amended,

Mr. Paddock further moved to amend the said resolution by striking out all after the word "resolved," and, in lieu thereof, inserting :

That William W. Belknap, late Secretary of War, having ceased to be a civil officer of the United States by reason of his resignation before proceedings in impeachment were commenced against him by the House of Representatives, the Senate cannot take jurisdiction in this case.

Mr. Edmunds called for the yeas and nays, and they were ordered; and, being taken, resulted—yeas 29, nays 37.

So the amendment was rejected.

The question recurring on the first resolution of Mr. Thurman as amended,

On the question to agree thereto as follows :

Resolved, That, in the opinion of the Senate, William W. Belknap, the respondent, is amenable to trial by impeachment for acts done as Secretary of War, notwithstanding his resignation of said office before he was impeached—

Mr. Thurman called for the yeas and nays, and they were ordered; and, being taken, resulted—yeas 37, nays 29, as follows :

YEAS—Messrs. Bayard, Bogy, Burnside, Cameron of Pennsylvania, Caperton, Cockrell, Cooper, Davis, Dawes, Dennis, Edmunds, Goldthwaite, Gordon, Hamilton, Hitchcock, Kelley, Kernan, Key, McCreery, McDonald, Maxey, Mitchell, Morrill of Vermont, Norwood, Randolph, Ransom, Robertson, Sargent, Saulsbury, Sherman, Stevenson, Thurman, Wadleigh, Wallace, Whyte, Withers, and Wright—37.

NAYS—Messrs. Allison, Booth, Boutwell, Bruce, Cameron of Wisconsin, Christianity, Clayton, Conkling, Cragin, Dorsey, Eaton, Ferry, Frelinghuysen, Hamlin, Harvey, Howe, Ingalls, Jones of Florida, Jones of Nevada, Logan, McMillan, Morrill of Maine, Morton, Oglesby, Paddock, Patterson, Spencer, West, and Windom—29.

NOT VOTING—Messrs. Alcorn, Anthony, Barnum, Conover, Johnston, Merrimon, and Sharon—7.

So the first resolution, as amended, was agreed to. The question recurring on the second resolution of Mr. Thurman,

The said resolution having been amended on the motion of Mr. Bayard,

The question recurring on the resolution as amended, as follows :

Resolved, That the House of Representatives and the respondent be notified that on Thursday, the 1st day of June, 1876, at 1 o'clock p. m., the Senate will deliver its judgment in open Senate, on the question of jurisdiction raised by the pleadings, at which time the managers on the part of the House and the respondent are notified to attend—

On the question to agree thereto,

Mr. Thurman called for the yeas and nays, and they were ordered; and, being taken, resulted—yeas 45, nays 4.

So the second resolution, as amended, was agreed to.

The question recurring on the third resolution,

The said resolution having been amended on the motion of Mr. Bayard and on the motion of Mr. Thurman to read as follows :

Resolved, That at the time specified in the foregoing resolution the President of the Senate shall pronounce the judgment of the Senate as follows: "It is ordered by the Senate sitting for the trial of the articles of impeachment preferred by the House of Representatives against William W. Belknap, late Secretary of War, that the demurrer of said William W. Belknap to the replication of the House of Representatives to the plea to the jurisdiction filed by said Belknap be, and the same hereby is, overruled; and, it being the opinion of the Senate that said plea is insufficient in law, and that said articles of impeachment are sufficient in law, it is therefore further ordered and adjudged that said plea be, and the same hereby is, overruled and held for naught;" which judgment thus pronounced shall be entered upon the journal of the Senate sitting as aforesaid—

On the question to agree thereto, Mr. Thurman called for the yeas and nays, and they were ordered; and, being taken, resulted—yeas 35, nays 22.

Mr. Whyte submitted an order, which was considered by unanimous consent; and the same having been amended on the motion of Mr. Edmunds, it was agreed to, as follows :

Ordered, That each Senator be permitted to file his opinion in writing upon the question of jurisdiction in this case on or before the 1st day of July, 1876, to be printed with the proceedings in the order in which the same shall be delivered, and the opinions pronounced in the Senate shall be printed in the order in which they were so pronounced.

June 1st.—The President *pro tempore*: "The Senate is now ready to proceed with the trial. On the question of jurisdiction raised by the pleadings in this trial, it is ordered by the Senate sitting for the trial of the articles of impeachment preferred by the House of Representatives against William W. Belknap, late Secretary of War, that the demurrer of said William W. Belknap to the replication of the House of Representatives to the plea to the jurisdiction filed by said Belknap be, and the same hereby is, overruled; and, it being the opinion of the Senate that said plea is insufficient in law, and that said articles of impeachment are sufficient in law, it is therefore further ordered and adjudged that said plea be, and the same hereby is, overruled and held for naught."

June 6th.—It was

Ordered, That William W. Belknap have leave to answer the articles of impeachment within ten days from this date; and that in default of an answer to the merits within ten days by respondent to the articles of impeachment, the trial shall proceed as upon a plea of not guilty.

It was further

Ordered, That on the 6th of July, 1876, at 1 o'clock p. m., the Senate, sitting as a court of impeachment, will proceed to hear the evidence on the merits of the trial in this case.

Ordered, That the managers furnish to the defendant or his counsel, within four days, a list of witnesses, as far as it present known to them, that they intend to call in this case; and that, within four days thereafter, the respondent furnish to the managers a list of witnesses, as far as known, that he intends to summon.

June 16th.—Mr. Black presented a paper claiming that, as the vote on the former pleadings had stood 37 to 29, he was acquitted of the charges, two-thirds

not having voted against him, and that he could not be again put upon trial.

June 19th.—It was

Ordered, That the paper presented by the defendant on the 16th instant be filed in this cause; and the defendant having failed to answer to the merits within ten days allowed by the order of the Senate of the 6th instant, the trial shall proceed on the 6th of July next as upon a plea of not guilty: *Provided*, That the impeachment can only proceed while Congress is in session.

Ordered, That the Secretary issue subpoenas that may be applied for by the respondent for such witnesses to be summoned, at the expense of the United States, as shall be allowed by a committee, to consist of Senators Frelinghuysen, Thurman, and Christiancy; and that subpoenas for all other witnesses for the respondent shall contain the statement that the witnesses therein named are to attend upon the tender on behalf of the respondent of their lawful fees.

July 6th.—The case was opened on the part of the managers by Mr. Lynde, who, in closing, and in answer to a question, stated that the managers relied upon and referred to section 1781 of the Revised Statutes, and also to section 5501, to sustain the impeachment.

The examination of witnesses to support the allegations of the articles of impeachment was then proceeded with, and witnesses were produced and sworn on both sides and examined, the trial occupying until July 20th.

Argument on the part of Mr. Belknap was commenced on that day by Mr. Blair, who stated the propositions of the defense, as follows:

The questions are:

1. Whether the order dismissing the impeachment on the ground that more than one-third of the Senate have voted against the jurisdiction shall be granted;

2. Whether the question of jurisdiction be not involved in the plea of "not guilty" ordered by the majority of the Senate to be entered for the respondent;

3. Whether the facts alleged in the articles are proved; and

4. Whether the evidence established any improper conduct on the part of the respondent.

Mr. Manager Lynde followed, claiming that the impeachment should be sustained.

July 24th.—Argument continued by Mr. Manager Lapham, Mr. Manager Jenks, and Mr. Black.

July 25th, 26th.—Argument continued by Mr. Carpenter for the defense, who claimed, on the evidence—

1. The respondent stands before you under examination for almost seven years' administration of a great executive department of this Government, to which he was appointed for his ability, and his gallant service for the Union in the field.

2. We have shown that he possessed a spotless character from boyhood to 1869, when he was appointed Secretary of War; and that his administration of the War Department has been characterized by energy, ability, and integrity, never questioned save in the single transaction now under examination.

3. And in regard to this transaction we have explained every circumstance relied upon as evidence of guilt, dispelled every suspicion surrounding it, and we point you, in perfect confidence, to all the direct testimony in the case, which conclusively and emphatically acquits the respondent—

and on the law that the Senate had not jurisdiction.

July 31st.—It was

Ordered, That on Tuesday next, the 1st day of August, at 12 o'clock meridian, the Senate shall proceed to vote, without debate, on the several articles of impeachment. The presiding officer shall direct the Secretary to read the several articles successively, and after the reading of each article the presiding officer shall put the question following, namely: "Mr. Senator ———, how say you? Is the respondent, William W. Belknap, guilty, or not guilty, of a high crime"—or "high misdemeanor, or as the charge may be—"as charged in this article?" Whereupon such Senator shall rise in his place and answer "guilty," or "not guilty," with his reasons, if any, as provided in the order already adopted.

And each Senator shall be permitted to file, within two days

after the vote shall have been so taken, his written opinion, to be printed with the proceedings.

August 1st.—In accordance with such order, the Senate proceeded to vote on the articles, with the following result:

On the first article:

GUILTY—Messrs. Bayard, Booth, Cameron of Pennsylvania, Cockrell, Cooper, Davis, Dawes, Dennis, Edmunds, Gordon, Hamilton, Harvey, Hitchcock, Kelly, Kernan, Key, McCreery, McDonald, Merrimon, Mitchell, Morrill, Norwood, Oglesby, Randolph, Ransom, Robertson, Sargent, Saulsbury, Sherman, Stevenson, Thurman, Wadleigh, Wallace, Whyte, and Withers—35.

NOT GUILTY—Messrs. Allison, Anthony, Boutwell, Bruce, Cameron of Wisconsin, Christiancy, Conkling, Conover, Craig, Dorsey, Eaton, Ferry, Frelinghuysen, Hamlin, Howe, Ingalls, Jones of Nevada, Logan, McMillan, Paddock, Patterson, Spencer, West, Windom, and Wright—25.

Most of the Senators voting "not guilty" stating that they did so on the question of jurisdiction.

On the second article: "Guilty," 33, the same Senators who had thus voted on the first article, with Senator Maxey, who did not then vote. "Not guilty," 25.

On the third article, same vote: "Guilty," 36. "Not guilty," 25.

On the fourth article, same vote: "Guilty," 36. "Not guilty," 25.

On the fifth article: "Guilty," 37, same vote, with Senator Morton, who had been prevented by an accident from being present at the other votes. "Not guilty," 25.

The President *pro tempore*: "On this article, 37 Senators vote 'guilty,' and 25 Senators vote 'not guilty.' Two-thirds of the Senators present not sustaining the fifth article, the respondent is acquitted on this article. This concludes the action of the Senate on all the articles of the impeachment. The Chair will call the Senate's attention to Rule 23, which provides:

And if the impeachment shall not upon any of the articles presented be sustained by the votes of two-thirds of the members present, a judgment of acquittal shall be entered.

"If there be no objection to complying therewith, the Secretary will be directed to enter a judgment of acquittal. Is there objection? The Chair hears none, and it will be so entered."

PUGH, GEORGE ELLIS, died at Cincinnati, Ohio, July 19, 1876. He was born in that city, November 28, 1822. He graduated at the Miami University in 1840, began the practice of law, but when the Mexican War broke out he became captain in the Fourth Ohio Volunteers. In 1848-'49 he was a representative in the Ohio Legislature; was elected City Solicitor of Cincinnati in 1850, and Attorney-General of Ohio in 1851. In 1854 he defeated Salmon P. Chase in the contest for the latter's seat in the United States Senate. He sat during the six years beginning March 4, 1855, serving on the Committees on Public Lands and the Judiciary, and was defeated by Governor Chase for the ensuing term. In 1860 Mr. Pugh was chairman of the Ohio delegation to the National Democratic Convention held in Charleston. During the war he defended Mr. Vallandigham. In 1863 he was an unsuccessful candidate for Lieutenant-Governor of Ohio. In 1864 he was defeated as a candidate for Congress by Benjamin Eggleston. In 1878 he was chosen to the State Constitutional Convention, from which he afterward withdrew.

R

RAILROAD LAND-GRANTS. By the courtesy of the Commissioner of the Land-Office, Hon. J. A. Williamson, the following statement is furnished of all the lands certified to different railroads in the year ending June 30, 1876:

Alabama & Chattanooga.....	Miles. 2,188
South & North Alabama.....	3,107
Memphis & Little Rock.....	7,597
Little Rock & Fort Smith.....	61,731
Cairo & Fulton.....	280
Burlington & Missouri River.....	64,017
Cedar Rapids & Missouri River.....	406
Dubuque & Sioux City.....	1,069
Grand Rapids & Indiana.....	2,002
Chicago & Northwestern.....	2,251
Wisconsin Railroad Farming Mortgage Land Co....	40
Wisconsin Central.....	600
St. Paul & Pacific.....	19,616
Minnesota Central.....	40
St. Paul & Sioux City.....	2,228

	217,616,351.60	190,178,897.31	43,267,288.35
Deduct for lands reverted and lapsed, and for lands declared forfeited by Congress.....	6,859,544.55	4,569,120.44	4,007,596.75
Total.....	210,756,807.05	185,604,276.77	89,259,648.13

RANDALL, SAMUEL J., was born in Philadelphia, October 10, 1828. Much of his life has been spent in mercantile pursuits, and he has served one term in the Pennsylvania Senate. At the beginning of the civil war he enlisted as a private soldier, and served under Colonel George H. Thomas. In 1862 he was elected to Congress, where he has continued by successive reëlections, serving on many important committees, and becoming chairman of the Committee on Appropriations. In December, 1876, he was elected by the Democrats Speaker of the House of Representatives—a position for which he had been an unsuccessful candidate at the beginning of the Forty-fourth Congress.

REDFIELD, ISAAC FLETCHER, an American jurist, born in Weathersfield, Vt., April 10,

1804; died in Boston, Mass., in March, 1876. He graduated at Dartmouth College in 1823, studied law, and practised at Derby, and afterward at Windsor, Vt. From 1835 to 1860 he was a Judge of the Supreme Court, being Chief-Justice from 1852; and from 1858 to 1862 he was Professor of Medical Jurisprudence in Dartmouth College. In 1861 he removed to Boston, where he continued to reside till his death. From January, 1867, he was for two years Special Counsel of the United States in Europe, having charge of many important suits and legal matters in England and France. He received the degree of LL. D. from Trinity College in 1848, and from Dartmouth in 1855. He was the author of "The Law of Railways" (1857; fifth edition, 2 vols., 1873); "The Law of Wills" (3 vols., 1864);

"The Law of Carriers and Bailments" (1869); "Leading American Railway Cases" (2 vols., 1870); and, with W. A. Herrick, "A Treatise on Civil Pleading and Practice" (1868). From 1862 till his death he was one of the editors of the *American Law Register*, published in Philadelphia. He edited Story "On Equity Pleadings" and "Conflict of Laws," and Greenleaf "On Evidence," and was a frequent contributor to periodicals.

The *General Synod* of the Reformed Church in America met in Kingston, N. Y., June 7th. The Rev. John McClellan Holmes, D. D., was elected president. The committee who had been appointed to confer with a committee of the Northern General Assembly of the Presbyterian Church reported that they had held a joint meeting with the committee of the General Assembly, April 13, 1876. The committee of the Assembly presented a paper embodying the following points: The committees were originally appointed to confer regarding the desirableness and practicability of the union of the two Churches. The General Synod of the Reformed Church had in 1874 discontinued the Committee on Union, and substituted for it one to confer with the General Assembly's committee in regard to co-operation—a matter which had not been committed to it by the General Assembly. The terms of correspondence already existing between the two bodies provided for the most friendly relations, which the Assembly's committee trusted would always be continued; and the main objects proposed to be accomplished by this scheme of co-operation could easily be attained without it. The Assembly's committee had, therefore, resolved to inform the committee of the Reformed Church that, in their judgment, the plan proposed by them is inexpedient, and to ask of their Assembly to be discharged from the further consideration of the subject. The synod's committee further reported that they also deemed it inexpedient to pursue the subject of co-operation; and, with the earnest hope that the fraternal relations of the two Churches would ever be most pleasant, and fruitful of good results, asked to be discharged. They were discharged.—It was resolved to raise, during the year, \$2,500 in aid of the Assembly's school at Tuscaloosa, Ala., and of the work of evangelization undertaken by the Rev. H. B. Blake in North Carolina. Delegates were appointed to attend the meeting of the Council of the Presbyterian Alliance,

Total number of families in the Church, 42,338; number of baptisms of infants during the year, 4,230; number of baptisms of adults, 1,954; number of catechumens, 23,027; number of Sunday-schools, 574; number of scholars in the same, 73,247; amount of contributions for religious and benevolent purposes, \$310,035.88; of contributions for congregational purposes, \$872,804.28.

The following are the statistics of the domestic missions, as given in the report of the board having that interest in charge: Number of churches and missions aided, 95; of missionaries employed, 83; of families, 4,873; of church-members, 6,673; amount of contributions by the missions to the Board of Domestic Missions, \$983; amount of contributions by the missions to other benevolent objects, \$3,788.

The following is a general summary of the missions:

* Four or five places have been supplied with native preachers.
† Almost the entire body of native helpers.

to be held in Edinburgh, July 4, 1877. A committee was appointed to prepare a critical edition of the "Heidelberg Catechism" in its English version, to be reported to the next synod. It was resolved to make, during the year, special efforts for the Board of Domestic Missions and the Church-Building Fund, and to raise the sum of \$50,000 as an offering of thanksgiving. The Synod resolved that the experience of the Board of Foreign Missions in the conduct of the Indian agency placed under its control had proved the wisdom of the present civil management, and earnestly deprecated any change in it. The library committee of the Gardner A. Sage Library called attention to a manuscript copy of the correspondence with the Classis of Amsterdam, extending from 1689 to 1771, and several printed pamphlets respecting the so-called Coetus controversy, and were authorized to have them translated into English.

A case involving important questions regarding the title to church property was decided in the Court of Common Pleas of Philadelphia, October 28th, in the suit of Jones, *et al.*, representing the interests of the Reformed Church in America, against Wadsworth, *et al.*, representing the Immanuel Presbyterian Church in Philadelphia. A majority of the congregation of the Third Reformed Church in Philadelphia had withdrawn from connection with the Classis of the Reformed Church to which they belonged, and with their pastor, the Rev. Charles Wadsworth, D. D., had united with the Presbyterian Church, as the Immanuel Presbyterian Church, and had attempted to take their church property with them. Suit was brought by a minority of the church to recover the property for the Reformed Church. The case was referred to Mr. Victor Guillon as referee, who in April gave a decision to the effect that the plaintiffs, and such of the congregation as were associated with them, were members of the Reformed Church in America, and were entitled, as such, to hold the property; that the property was to be held in trust by the corporation, and for members of that Church who shall adhere to and maintain the mode of faith and Church discipline of the Reformed Church in America; and that the Rev. Dr. Wadsworth, on joining the Presbyterian Church, ceased to be pastor of the Reformed Church, and was enjoined from exercising his pastoral office in that Church; that the connection subsisting between the Third Reformed Church and the Reformed Church in America had never been lawfully dissolved, and that the alleged union of said church with the Presbyterian Church was null and void. This decision was confirmed in its terms by Judge Allison, of the Common Pleas Court, in October; the defendants were declared to have ceased to be members and officers of the Third Reformed Church, and were required to surrender and deliver to Daniel S. Jones, the only remaining trustee of the Third Reformed Church, the

property of that corporation, to be held by it "in trust for such members of the congregation as shall adhere to and maintain the mode of faith and discipline of the Reformed Church in North America." This decision was based on the following rule of equity:

Whenever a church or religious society has been duly constituted as in connection with, or in subordination to, some ecclesiastical organization or form of church government, and, as a church so connected or subordinated, has acquired property by subscriptions, donations, or otherwise, it cannot break off this connection and unite with some other religious organization, or become independent, save at the expense of impairing its title to the property so acquired.

II. REFORMED CHURCH IN THE UNITED STATES.—The following is a summary of the statistics of the Reformed Church in the United States, as they are given in the *Almanac for the Reformed Church in the United States for 1877*, published by the Reformed Church Publication Board, Philadelphia:

SYNODS.	Classes.	Ministers.	Congregations.	Members.
United States.....	8	179	425	64,878
Ohio.....	12	151	583	23,458
Northwest.....	9	124	157	14,985
Pittsburg.....	5	53	124	3,510
Potomac.....	6	106	247	23,908
Eastern German.....	5	82	81	7,114
Total.....	45	647	1,852	144,456

Total number of members unconfirmed, 88,980; of baptisms, 13,258; of confirmations, 9,186; of individuals taking the communion during the year, 116,599; of Sunday-schools, 1,178; of scholars in the same, 76,010; of students for the ministry, 144; amount of benevolent contributions, \$77,094.

The *Almanac* published at Cincinnati gives totals which differ but little from the above, as follows: Number of ministers, 650; of congregations, 1,347; of members, 143,609; of members unconfirmed, 88,256; of baptisms, 13,492; of confirmations, 8,845; of individuals receiving the communion during the year, 116,488; of Sunday-schools, 1,206; of scholars in the same, 76,570; of students for the ministry, 153; amount of contributions for benevolent purposes, \$65,835; of contributions for congregational purposes, \$864,544.

The theological institutions of this Church are: Theological Seminary at Tiffin, Ohio, chartered in 1831, J. H. Good, D. D., president; Mission House, Howard's Grove, Wis., J. Bærsard, D. D.; Theological Department of Ursinus College, Freeland, Montgomery County, Pa., J. H. A. Bomberger, D. D., Collegeville, Pa.; Eastern Theological Seminary, Lancaster, Pa., E. V. Gerhart, D. D.; Theological Department of Mercersburg College, E. E. Higbee, D. D., Mercersburg, Pa. The colleges are: Heidelberg College, Tiffin, Ohio, George W. Willard, D. D., president; Ursinus College, Freeland, Montgomery County, Pa., J. H. A. Bomberger, D. D., Collegeville, Pa.; Franklin and Marshall

College, Lancaster, Pa., Prof. W. M. Nevin, A. M., acting president; Mercersburg College, Mercersburg, Pa., E. E. Higbee, D. D., president; Catawba College, Newtown, N. C., Rev. J. C. Clapp, A. M.; Palatinate College, Myerstown, Pa., G. W. Anginbaugh, D. D.; Calvin Institute, Cleveland, Ohio, H. J. Rutenick, D. D. The following seminaries are connected with this Church: Clarion Collegiate Institute, Rimersburg, Clarion County, Pa.; Juniata Collegiate Institute, Martinsburg, Blair County, Pa., Rev. S. R. Breidenbach, A. M.; Greensburg Female Collegiate Institute, Greensburg, Pa., Rev. Lucien Cort, A. M.; Blainstown Academy, Blainstown, Iowa, Rev. David P. Le Ferne, A. B.; Allentown Female College, Allentown, Pa., Rev. W. R. Hofford, A. M.; St. John's Select School, Knoxville, Md., G. L. Staley, D. D.; Female Seminary, Mercersburg, Pa., Rev. J. Hassler, A. M.

The following are the missionary (home missions), educational, and benevolent societies of this Church: Ohio Board of Missions, Tiffin, Ohio; Board of Missions of the Northwest, Gallion, Ohio; Board of Missions of Ursinus Union, Lebanon, Pa.; Eastern Board of Missions, Harrisburg, Pa.; Board of Education of the Ohio Synod, Tiffin, Ohio; Board of Education of Ursinus Union, Lebanon, Pa.; Board of Education of the Eastern Synods, Philadelphia, Pa.; Bethany Orphan's Home, Womelsdorf, Berks County, Pa.; St. Paul's Orphan's Home, Butler, Pa.; Society for the Relief of Ministers and their Widows, Lancaster, Pa.; Board of Church Erection of the Synod of Ohio, Xenia, Ohio; Board of Church Erection of the Synod of the Northwest, Indianapolis, Ind. The treasurer's office of the Board of Foreign Missions is at Pittsburg, Pa. The list of periodicals comprises eleven English and three German publications, of which three are weekly, three semi-monthly, six monthly, and two quarterly.

It is only within a few years that steps have been taken looking to the organization of congregations of this Church in the Southern States. A congregation has been formed under the direction of the Indiana Classis at Winchester, Franklin County, Tenn., and a second in the Cumberland Mountains, about forty miles from the former. Mr. J. P. Roth, M. D., of Tennessee, has been studying for the ministry in Cincinnati, Ohio, with a view of engaging in the Southern work. Organizations of churches are contemplated at Knoxville, Chattanooga, and Nashville, Tenn., and Atlanta, Ga.

III. REFORMED CHURCH IN FRANCE.—The synod of 1872 and 1873 of the Reformed Church of France, as has already been recorded in the *ANNUAL CYCLOPÆDIA*, adopted a confession of faith affirming the doctrines which are ordinarily described as Orthodox, with the requisition that all new ministers should subscribe to it as a condition to their being recognized by the Church. It also prescribed a declaration to which members of the congregations should

give adhesion before they could vote. The Liberal or Unitarian party of the Church opposed this action, and refused to submit to the rules made by the synod. In the consistories and synods where they had majorities, the elections were held without regarding the conditions which had been imposed. These conditions having been recognized by the state as legal and valid, the elections so held were declared void and annulled by the Minister of Worship, and new elections were ordered. The Liberal party, in 1875, appealed to the Council of State against this order of the minister. Pending the appeal, the minister directed the new elections which he had ordered to be postponed till the case should be decided. A division of the Church was threatened in case the action of the synod was sustained by the Council of State. The Orthodox party professed a willingness to submit to a division, to allow the Liberals to be recognized by the state, and to yield to them a proportion of ecclesiastical property and support, if no other solution of the difficulty could be reached; but the Minister of Worship suggested that, if the Liberals withdrew, he would be unable to subsidize a new church, and would be obliged to recognize the Orthodox branch only as the legitimate Reformed Church. In April, 1876, the permanent commission of the synod waited upon M. Dufaure, Minister of Worship, with reference to the convocation of a new meeting of the synod, to consider the difficulties of the situation, and find a way out of them, if possible. On the 18th of April, a delegated body of the Liberal party, styled the Commission of Pacification of the Liberal Party, met at Paris, and invited the Liberals to negotiations with a view to secure a compromise of the questions in dispute. A conference was held and an agreement was reached, by which the Commission of Pacification engaged for the Liberal party that it would accept the Presbyterian synodal organization; that it would recognize the Declaration of Faith voted June 20, 1872, as the true expression of the general faith of the Church; that this declaration should not be the object of attacks by pastors in the exercise of their functions; and that the different ecclesiastical bodies should have the right to repress attacks upon it by all the disciplinary penalties within their power. The members of the permanent commission of the synod agreed that, in case the declarations made by the Liberal commission were accepted by that party, they would propose to the next synod that it withdraw from the demand that had been made upon the Council of State, to approve of the synodal rule requiring that "every candidate for the holy ministry must, before receiving consecration, declare that he adheres to the faith of the Church as declared by the General Synod," and would recommend to the synod to substitute for this rule the condition that "the act of consecration shall declare that the Declaration of Faith was read to the

candidate for the holy ministry before his consecration." The obligation of this agreement was held subject to the ratification of the bodies which the two commissions represented. Pending the convocation of electors to choose a new synod, it was agreed that the appeal of the Liberals to the Council of State should be held in abeyance; that the matter of the appeal, as well as the agreement of accord, should be held subject to the ratification of a new assembly of Liberals to be called at Nîmes; and that all concessions so far made on both sides should be considered as made solely with a view to pacification. This agreement met with no favor from the Orthodox party. One of the members of the permanent commission refused to sign it, and published a letter against it. Several consistories, presbyterial councils, and pastoral conferences, adopted resolutions protesting against it, as in effect surrendering all that was essential in the Confession of Faith, and in the safeguards which the synod had erected to secure its integrity. A meeting of delegates of the Liberal party, to consider the agreement, was held at Nîmes, July 12th and 13th. It adopted an elaborate and skillfully-drawn paper, defining the construction which would be put upon the terms of the agreement of accord by the Liberal party. The members of the permanent commission replied to this paper, July 25th, that they did not interpret the agreement in the sense put upon it by the Liberal conference, but repelled it, and charged that the construction given the agreement by the conference essentially changed its nature.

Another conference was held at Ronen, November 8th, to attempt to adjust the differences of opinion within the Church and prevent schism. It was attended by persons of both parties, but the Orthodox members conducted the proceedings. It adopted a paper protesting against schism, and calling upon the friends of peace to work for the union of the Church on the common ground of attachment to its faith and its historical institutions and traditions; expressing the belief that the synod alone can prevent disintegration, and asking its immediate convocation; calling upon the consistories and presbyterial councils to accept the religious conditions of the electorate; declaring attachment to the synodal organization and the self-government of the Church; calling upon the synod to authorize the formula of consecration already in use, or one similar to it; agreeing to ask the withdrawal of the demand for confirmation by the state of the rule requiring candidates for consecration to the ministry to declare their adherence to the Declaration of Faith; and affirming that the ecclesiastical judicatories already possessed the power to restrain all attacks against the general faith of the Church.

On the 9th of December, M. Dufaure, Minister of Justice and Worship, ordered the elections to be held in all the consistories and

presbyterial councils during the second half of February, 1877, and directed that the parish registers be closed previous to the elections on the 31st of January. These elections, it was further ordered, should be held in accordance with the religious conditions of the electorate as the General Synod had determined them, while the responsibility for regulating the mode of applying the conditions was left to the several bodies. This decree was confirmed December 18th, by M. Martel, successor to M. Dufaure in the office of Minister of Justice and Worship.

IV. REFORMED CHURCH OF HOLLAND.—The synod of this Church in 1875, at the request of about four hundred pastors, who deemed the form of the Declaration of Faith required of candidates for confirmation to be too dogmatic, changed it so as to give it a more liberal sense. The synod of 1876 revoked this action, and again made the old form obligatory. A meeting of the Liberal party was held at Amsterdam in October, at which it was determined to petition the synod to reconsider its later action, and restore the form of confession adopted in 1876. The Orthodox party in the synod is represented to be seeking a separation from the Liberal party.

V. CHRISTIAN REFORMED CHURCH OF THE NETHERLANDS.—The Christian Reformed Church of the Netherlands was separated from the Reformed Church in 1884, partly for doctrinal reasons and partly with the object of giving expression to their desire that the Church should be free from state control. It consists of about 850 congregations, and has upward of 800 ordained ministers, about 40,000 communicants, and about 120,000 adherents. The members of the Church are stated to be, as a rule, of the middle and humbler classes. In May, 1875, 70 students were being educated for the ministry, under the care of five professors. A sixth professor was appointed by the synod which met that year at Bois-le-Duc, and an effort was projected to raise the sum of £7,000, to render the theological school at Kampen more efficient.

REFORMED EPISCOPAL CHURCH. At the meeting of the General Council of the Reformed Episcopal Church, held at Ottawa, Ont., in July, reports were presented from thirty-four congregations, giving their statistics as follows. Number of families, 2,811; of communicants, 8,549; of children in the Sunday-schools, 4,905; of teachers in the same, 400; amount of contributions by the congregations, \$151,181.41.

The General Council of the Reformed Episcopal Church met at Ottawa, Ont., July 12th. Bishop Charles Edward Cheney was chosen presiding bishop, in place of Bishop Cummins, deceased. The committee appointed at a previous meeting of the General Council to report on the points of difference between the Reformed Episcopal Church and the Protestant Episcopal Church in the United States made the following report:

1. These Churches differ essentially as to what constitutes the Church of Christ. The Protestant Episcopal Church of the United States, as represented by a large majority of its ministers and members, holds that in the Church of Christ exists only one form or order of church government, a threefold ministry of bishops, priests, and deacons, based on the divine right of the bishops, who are the successors of the apostles in their apostolic office, and derive their authority from them by succession in an unbroken chain. On this theory, only such bodies of Christians as possess this order and succession—corrupt though they may be in doctrine and in living—are parts of Christ's Church. The Reformed Episcopal Church protests against this theory as unchristian, in that it denies the claims of the Protestant evangelical Churches around us. It holds that the true Church consists of all who are joined to Christ by a living faith, and which, under varying forms of organization, is yet one in Christ Jesus. The claims of the apostolical succession, as above cited, this Church repudiates—holding to episcopacy, not as of divine right, but simply as a very ancient and desirable form of church polity. Hence, while the Protestant Episcopal Church, in its corporate capacity, turns away from the Protestant Churches around us, to seek fellowship with the older, corrupt Churches—as, for example, the Russo-Greek Church—the Reformed Episcopal Church, with an equally historic episcopate, and bishops who are only presiding presbyters, not diocesan prelates, seeks the fellowship of all Protestant evangelical Churches, exchanges pulpits with their ministers, and sits down with them at the Lord's table.

2. They differ concerning the nature of the Christian ministry. In the Protestant Episcopal Church the presbyter is called a priest, and the Ordinal contains this formula: "Receive the Holy Ghost for the office and work of a priest in the Church of God, now committed unto thee by the imposition of our hands." The Reformed Episcopal Church abjures this dogma as unscriptural and dangerous, leading to many superstitions; strikes the word "priest," as applied to the minister, from its Ordinal and Prayer-Book, and knows but one priest, Christ Jesus.

3. They differ as to the nature and office of the sacraments. It is claimed, as the teaching of their standards, by a large majority of the Protestant Episcopal Church, that the sacraments convey special grace, to be derived through no other channels: (a.) Baptism. The Protestant Episcopal Church, as thus represented, holds that the grace of regeneration (a regeneration of some sort) is inseparably connected with baptism. (b.) The Lord's Supper. In the same way, the Protestant Episcopal Church holds that, after the priestly consecration of the elements, Christ is present as he was not before, and that the recipient feeds upon him by virtue of the presence thus induced or communicated.

The Reformed Episcopal Church regards the sacraments as institutions divinely appointed, and as means of grace, because they represent truth; but repudiates the theory that they convey a grace peculiar to themselves, and which is not common to other divinely-appointed means: (a.) Baptism. The Reformed Episcopal Church knows of but one regeneration—that by the Holy Ghost through the Word—of which baptism is to be regarded as the outward and visible sign. (b.) The Lord's Supper. The Reformed Episcopal Church holds that the Supper of the Lord is a memorial of redemption by Christ's death, and through faith we derive grace from him in this Supper, as we do in all other divinely-appointed means.

4. The Protestant Episcopal Church suffers altars to be erected in its churches, and tolerates auricular confession and prayers for the dead, with other imitations of Rome. The Reformed Episcopal Church prohibits the erection of altars in its churches, or

introduction into public worship of anything calculated to teach sacerdotalism.

5. The Protestant Episcopal Church "deposes" all clergymen leaving its communion, following them with an attempted badge of disgrace. The Reformed Episcopal Church commends any bishop or presbyter, who desires to leave it, to another evangelical Church, with its prayers and love.

6. The Protestant Episcopal Church, in receiving communicants from Protestant Churches, generally enforces a rubric which requires them to be confirmed. The Reformed Episcopal Church invariably receives to its membership, by letter or other satisfactory evidence, communicants of other Churches, dispensing with confirmation, unless desired.

7. The Protestant Episcopal Church discourages the use of extemporaneous prayer in the stated services of the Church, prohibiting it by canon. The Reformed Episcopal Church allows and encourages the use of extempore prayer with its liturgy, and values meetings for social worship, in which the laity participate, as promoting the spiritual growth of churches.

This report was returned to the committee, with power to carry out the suggestions and recommendations contained in it. A series of resolutions was adopted expressing gratification that the Reformed Episcopal Church was not divided by territorial divisions of nationality, province, or State, but that its council sat and its bishops were chosen irrespective of such divisions. The Committee on Doctrine and Worship made a report suggesting some changes in the service and some additions to it. The report was recommended to the next Council. Finally, all propositions offered to the Council for changes in the Prayer-Book were referred to the Committee on Doctrine and Worship, to be reported by that committee to the Council of 1879, to be acted upon, and finally adopted or rejected by the Council of 1880. The following resolution was introduced, and was referred to the Committee on Canons and Constitution, to be considered by them, and reported upon at the next meeting of the Council:

Resolved, That the Council hereby affirms the principle that none but communicants, duly enrolled as such, shall be permitted to vote for delegates to synod or council, or for the lay officers to be associated with the pastor in the admission, dismission, or discipline of church-members. That the Committee on Constitution and Canons be hereby directed to report, at the next ensuing annual meeting of the Council, such amendment as may be necessary in order to embody these principles in the canons.

The sum of \$7,687 was offered on a call of the parishes on the account of their assessments for the general enterprises of the Church. The Sustentation Committee reported that they had received \$3,000 from a friend, to be used in mission-work in the States of South Carolina and Georgia. The late George Curtis, of Boston, had bequeathed \$25,000 by will.

A resolution declaring it desirable that the members of the Reformed Episcopal Church partake of the Holy Communion in a sitting posture was introduced and referred to the Committee on Doctrine and Worship.

The Council decided to elect one missionary bishop. The Rev. Samuel Fallows, D. D., of

Chicago, Ill., was chosen. He was consecrated during the time of the session of the Council. Bishop Cridge, of Victoria, British Columbia, who had been chosen bishop at the preceding meeting of the General Council, was also consecrated at the same time. The consecration sermon was preached by Bishop Nicholson. The act of consecration, or "laying on of hands," was participated in by Bishops Cheney and Nicholson, Bishop Carman of the Methodist Episcopal Church of Canada, and ministers or presbyters of the Methodist, Presbyterian, and Reformed Episcopal Churches.

During the meeting of the Council, the Rev. Benjamin Johnson and the Rev. P. F. Stevens, evangelists in the South, made statements of successful labors and of the progress of the churches under their care.

The Rev. Samuel Fallows, D. D., elected Missionary Bishop of the Reformed Episcopal Church, was born at Pendleton, near Manchester, England, December 18, 1833. He moved with his parents to the State of Wisconsin in 1835. He was graduated at the University of Wisconsin in 1859. He was admitted to the ministry of the Methodist Episcopal Church in 1861. During the civil war he served in the national army as chaplain, colonel, and brevet brigadier-general. In 1870 he was chosen State Superintendent of Public Instruction for Wisconsin, and was afterward twice reelected to that office. He received the degree of D. D. from Lawrence University, Wisconsin, in 1878. In 1874 he was elected President of the Illinois Wesleyan University, Bloomington, Ill. The next year he withdrew from the Methodist Episcopal Church to join the Reformed Episcopal Church, and became rector of St. Paul's Reformed Episcopal Church, Chicago. In 1876 he became editor of *The Appeal*, a newspaper organ of the Reformed Episcopal Church. He was for seven years a regent of the University of Wisconsin.

RHETT, ROBERT BARNWELL, died in St. James Parish, La., September 14, 1876. He was born at Beaufort, S. C., December 24, 1800. He was known by his family name of Smith until 1837, when he assumed the name of Rhett, a colonial ancestor. He became a lawyer, and in 1826 was elected to the State Legislature. In 1832 he was elected Attorney-General of the State, and during the Nullification movement was an ardent advocate of State rights. From 1836 to 1849 he was a Representative in Congress. He entered the United States Senate in 1850, but resigned his seat in 1852. He was a zealous advocate of the doctrines of Calhoun, and is said to have been the first in late years* to propose in Congress a dissolution of the Union. He was a leading member of the South Carolina Secession Convention in 1860, and in the convention subsequently held at Montgomery he was chairman of the committee which reported the Confederate Constitution. He afterward became

a member of the Confederate Congress. He was owner of the Charleston *Mercury*, which was conducted during the war by his son, Robert Barnwell Rhett. After the war Mr. Rhett retired from public life. He was a delegate to the National Democratic Convention held in New York in 1868.

RHODE ISLAND. The financial condition of the State of Rhode Island is quite satisfactory. There was a balance in the Treasury on the 30th of April amounting to \$396,185.53. The receipts from that time to November 30th were \$259,396.55, making the total resources for that period \$655,582.08. The disbursements amounted to \$671,853.29. The estimated receipts for the period from November 30 to April 30, 1877, were \$550,000; estimated expenses, \$350,000; estimated balance at the end of the fiscal year, \$183,728.79. The actual balance on hand January 4, 1877, was \$296,442.83. The bonded debt of the State at the end of the year was \$2,545,000. At the same time there was in the sinking-fund \$362,750.60.

The following are the school statistics of the year:

Number of children, five to fifteen years of age ..	58,316
---	--------

DAY-SCHOOLS.

Number of different pupils enrolled	36,223
Average number belonging to the schools	36,516
Average attendance	27,021
Number of schools (graded, 466; ungraded, 291) ..	757
Average length of schools	9 months
Number of teachers regularly employed	661
Amount paid male teachers	\$97,126 33
Average wages paid male teachers per month	\$51 49
Amount paid female teachers	\$510,426 37
Average wages paid female teachers per month ..	\$46 73

EVENING-SCHOOLS.

Number of different pupils enrolled	2,179
Average attendance	1,565
Number of schools	95
Average length of schools	13 weeks

RECEIPTS.

State appropriation for day and evening schools ..	\$91,566 51
Town appropriations for day and evening schools ..	352,898 56

The State Farm, at Cranston, contains 420 acres, and on it are located the principal charitable and penal institutions of the State, which are under the general charge of the Board of Charities and Correction. The appropriation made for the support of the farm during the fiscal year was \$70,000, while \$24,785.29 was

* See ANNUAL CYCLOPEDIA, vol. 1. (1861), p. 121.

received from the board of inmates and other sources, making the total resources \$94,785.29. Up to December 31st payments had been made amounting to \$76,044.78. The estimated expenses for the fiscal year ending April 30, 1878, are \$89,500, and the appropriation required is \$74,000. The number of inmates of the Asylum for the Insane at the beginning of 1877 was 196, against 170 a year before. Of these 91 were women. In the Alms-house there were 142 inmates, of whom 68 were men, 60 women, 6 boys, and 8 girls. The total number at the end of 1875 was 137. The number in the Workhouse and House of Correction was 258, of whom 57 were women; in the same institution in 1875 there were 284. The average number of inmates in the three institutions on the farm for the year was 566, making the average cost of each \$123.72, or \$2.38 per week.

Good progress has been made on the new State-prison, which is located on the farm. The main building is nearly completed. The amount thus far expended on it is \$254,116.60. The total estimated cost is \$334,000. The number of convicts in the old prison at the end of the year was 86, in the jail 147, including 14 females. The latter institution is used jointly by the State and the county of Providence. The receipts of the year on prison account were \$4,173.82; on jail account, \$15,594.89: total, \$19,768.71. The expenditures were: on prison account, \$7,328.45; on jail account, \$15,447.31: total, \$22,775.76.

The new Court-House for Providence County is likely to be completed during the coming year. Its whole cost is estimated at \$225,000, and the State has appropriated \$180,000 for its construction. The courts have heretofore been held in the State-House at Providence.

There are 39 savings-banks in the State, and the total amount of deposits on the 28th of November was \$50,511,979.41. The number of depositors was 99,865, a decrease of 1,770 during the year; the average amount due each depositor was \$505.80, an increase of 95 cents. The decrease in the total deposits was \$799,351; of this sum, \$319,078.91 was paid out in dividends by two banks in course of liquidation. The largest amount due any one depositor was \$48,092.87. The average dividend of the year was a small fraction over six per cent. The total resources of the banks were \$52,287,389.64. There are other State banks having aggregate resources and liabilities of \$5,056,963.46. The assets and liabilities of the Rhode Island Hospital and Trust Company on the 28th of November were \$7,040,806.98. Its capital is \$500,000, and it had in deposits \$2,239,843.44, and in moneys in trust \$3,905,683.05.

The six fire and marine insurance companies chartered by the State Legislature have a capital of \$1,300,000; assets, \$2,153,945; liabilities, \$633,005. The total risks of these home companies amounted to \$8,809,577; premiums, \$110,618.48; losses paid, \$29,446.06.

There were 104 companies of other States doing business in Rhode Island, whose risks there amounted to \$31,423,576; premiums, \$406,818.53; losses paid, \$222,934.33. There were also 14 foreign companies having risks to the amount of \$8,303,146; premiums, \$113,611.82; losses paid, \$83,495.90.

STATE SEAL OF RHODE ISLAND.

The adjourned session of the Legislature began at Providence on the 11th of January, and continued until the 20th of April. Three amendments to the constitution of the State were proposed. One of these gave foreign-born soldiers and sailors, citizens of the United States, honorably discharged from service during the late war, the same right to vote in the election of all civil officers, and on all questions in all legally organized town, district, or ward meetings, on the same conditions as native-born citizens. Another, abolishing the registry-tax, gave every male citizen, twenty-one years old, with two years' residence in the State and six months in the district, a right to vote for all civil officers and in town meetings, except in election of city council in any city, or on any proposition to impose a tax, or for the expenditure of money in any town or city, in which cases he must have paid a tax on his property valued at least at \$134. Another looked to the adoption of a general corporation law.

An amendment was made to the general statutes in relation to the General Assembly, which makes the House of Representatives consist of one member for every 3,023 inhabitants of a town, and one additional for every fraction exceeding one-half of this ratio, provided, however, that each town shall be entitled to at least one representative, and no town to more than twelve. This makes the House consist at present of 72 members.

An amendment of the laws in relation to the exemption of property from taxation occupied a good deal of attention, and excited prolonged discussion. The exemptions finally agreed upon were as follows:

Property belonging to the State; lands ceded or belonging to the United States; buildings for free public schools; buildings for religious worship, and

the land upon which they stand, and immediately surrounding the same, to an extent not exceeding one acre, so far as said buildings and land are occupied and used exclusively for religious or educational purposes; the estates, persons, and families of the president and professors, for the time being, of Brown University, for not more than ten thousand dollars for each such officer, his estate, person, and family included; property specially exempt by charter, unless such exemption shall have been waived in whole or in part; lots of land used exclusively for burial-grounds; land of the Narragansett tribe of Indians, held by the tribe, or in severalty according to their usage, but not including any land owned in fee simple by a member of the tribe: provided that such land shall not be liable to taxation for the support of the poor, or the erection or repair of school-houses, or the support of public schools; the property, real and personal, held for or by any incorporated library society, or any free public library, or any free public library society, so far as said property shall be held exclusively for library purposes; or for the aid or support of poor friendless children, or for the aid or support of the aged poor, or for the aid or support of the poor generally, or for a hospital for the sick or disabled, and any fund given or held for the purpose of public education; almshouses, and the land and buildings used in connection therewith, except that almshouse estates, when belonging to the town, shall be subject to taxation for school purposes, in the school-district in which they are situated; the estate of any person, who, in the judgment of the assessor, is unable, from infirmity or poverty, to pay the tax; the bonds and other securities issued and exempted from taxation by the Government of the United States.

An amendment to the statutes in relation to divorce provided for giving effectual notice to the person against whom proceedings are instituted in case such person resides without the State. An act in relation to manufacturing corporations limits the liability of individual stockholders to the proportion of the shares of stock held by them. Another act established a Board of Harbor Commissioners. An act providing for the inspection of dams and reservoirs was defeated.

The first Board of Harbor Commissioners was appointed by the Governor on the 14th of June, and organized on the 28th of that month. It consists of J. H. Shedd, H. F. Potter, and Jedediah Williams.

While the Legislature was in session, the canvass for the State election, which occurred on the 5th of April, had been carried through. The first political convention was that of the Prohibitionists, which was held at Providence, on the 22d of February. Candidates for State offices were put in nomination as follows: for Governor, Albert C. Howard, of East Providence; for Lieutenant-Governor, Alfred B. Chadsey, of North Kingston; for Secretary of State, Joshua M. Addeman, of Providence; for Attorney-General, Warren R. Perce, of Providence; for General Treasurer, Alonzo D. Vose, of Woonsocket. The following resolutions were unanimously adopted:

Resolved, That we declare our continued hostility to the policy of licensing the sale of intoxicating liquors as a beverage, and our confidence in prohibitory measures as the only safe and wise policy.

Resolved, That we declare our conviction that the present license law is producing a wide-spread de-

moralization, and increasing the evils of intemperance, and we demand its immediate repeal.

Resolved, That we reiterate our uncompromising opposition to the bribery and corruption which have too often characterized our State elections, and we summon the people of Rhode Island to set the seal of their rebuke upon the party that seeks to corrupt our politics.

Resolved, That while we will use all proper means to secure the enactment and enforcement of prohibition, we will omit no effort to promote the temperance reform by moral and educational agencies.

The Democratic Convention was held at Providence on the 16th of March, and nominated, for Governor, General George Lewis Cooke, of Warren; for Lieutenant-Governor, Ziba O. Slocum, of Gloucester; for Secretary of State, John B. Pierce, of North Kingston; for Attorney-General, Oscar S. Lapham, of Providence; for General Treasurer, W. P. Congdon, of Newport. Mr. Cooke declining to be a candidate, Mr. William B. Beach, of Providence, was named for the vacancy on the ticket. The platform adopted was as follows:

The Democracy of Rhode Island, now in convention assembled, in view of the approaching presidential election, feel it due to their fellow-Democrats of the Union to declare their political attitude: therefore—

Resolved, That we reaffirm our devotion to the Union of the States on the broad and liberal principles of its founders, that all are equal in the Union.

Resolved, That we denounce the violation of this equality of rights by the Federal Government, in its illegal and wicked interference with our sister States, and we call upon all patriots, of whatsoever party affiliations, to unite with us in wresting the control of the Government from the hands of those who have trampled upon this fundamental principle of our Union.

Resolved, That the astounding developments so recently made through the committees of Congress and the courts, of Federal official corruptions at Washington, Cincinnati, Indianapolis, St. Louis, Chicago, and many other cities, have stamped indelible disgrace upon the Administration of President Grant and his advisers, and should convince all candid men that an immediate change of rulers and policy is imperatively demanded.

Resolved, That the present blighted condition of the business interests of the country is due to and chargeable upon the Republican party, in that it deserted the well-tryed and established theory of all enlightened governments of the earth, and adopted an irredeemable currency.

Resolved, That the only possible return to prosperity is a return to a sound currency, based on a gold redemption, and that we are in favor of such return at the earliest moment consistent with the business interests of the country.

Resolved, That we are opposed to that long-standing system of legalized robbery, under the name of protection to American producers, by which the few are enriched at the expense of the many, and demand in its stead a tariff for revenue.

Delegates to the National Convention at St. Louis were chosen, and a State Central Committee appointed.

The Republican Convention was held at Providence on the 23d of March. The nominations were: For Governor, Henry Lippitt, of Providence; for Lieutenant-Governor, Henry T. Sisson, of Little Compton; for Secretary of State, Joshua M. Addeman, of Providence for

Attorney-General, Willard Sayles, of Providence; for General Treasurer, Samuel Clark, of Lincoln. Delegates to the National convention were chosen, and a State Central Committee appointed, but no platform or resolutions were adopted.

The whole number of votes cast for Governor at the election was 19,087, of which 8,689 were for Henry Lippitt, 6,788 for Albert C. Howard, and 3,599 for William B. Beach, while 16 were returned as "scattering." As a majority of all the votes cast are necessary to elect in this State, there was no choice. The only candidate for a State office who was elected was Joshua M. Addeman for Secretary of State. He received 15,395 votes out of a total of 19,081, John B. Pierce having 3,684, and "scattering" 2. The Governor, Lieutenant-Governor, Attorney-General, and Treasurer, were therefore chosen by the Legislature at the regular session, which began on the 30th of May.

That body was composed of 27 Republicans and 10 Democrats in the Senate, and 62 Republicans and 10 Democrats in the House of Representatives. The Republican majority was therefore 17 in the Senate and 52 in the House, or 69 on a joint ballot. It elected the regular Republican candidates to the State offices to be filled. The vote in "grand committee" was: For Governor, Henry Lippitt 74, A. C. Howard 29; for Lieutenant-Governor, Henry T. Sisson 70, Alfred B. Chadsey 28; for Attorney-General, Willard Sayles 96, W. R. Perce 7; for Treasurer, Samuel Clark 97, A. D. Vose 6. The choice had to be made from the two candidates receiving the highest number of votes at the popular election.

The regular session of the Legislature was held, as usual, at Newport, and continued from May 30th to June 14th. Henry B. Anthony was reelected to the Senate of the United States, receiving 81 votes in the Senate to one for

NEWPORT.

Charles S. Bradley, and 66 in the House of Representatives to three for Mr. Bradley. The only measure of importance was an act approving the amendments to the constitution proposed by the preceding Legislature, and providing for their submission to a vote of the people at the election for members of Congress and presidential electors on the 7th of November.

The Democrats held their convention for the nomination of presidential electors at Providence, on the 20th of September. The candidates selected were William Beach Lawrence, Charles R. Cutler, A. B. Lewis, and Olney Arnold. A single resolution was adopted ratifying and confirming "the platform of the Democratic National Convention adopted at St. Louis."

The Republican Convention for the nomination of presidential electors was held at Providence, on the 4th of October. The candidates

were Samuel G. Arnold, George H. Corliss, Nathan F. Dixon, and Charles H. Fisher. Mr. Corliss's nomination was made unanimously and without a ballot. The following resolutions were adopted by the convention:

Resolved, That the Republican electors of the State of Rhode Island, in convention assembled, hereby affirm their allegiance to the principles of the Republican party, as set forth in the platform adopted by the National Convention at Cincinnati, and as illustrated in the characteristic letters of acceptance of the candidates there nominated.

Resolved, That this convention favors economy in administration of the Government, and a rigid accountability of all officers charged with public trusts; that it demands an early resumption of specie payments; that it insists on the protection of all citizens of the United States in the exercise of their rights and privileges; that it denounces the recent action of the National House of Representatives in the removal of faithful officers, who had periled their lives for the defense of the Union, to make room for men who had fought to destroy it.

Resolved, That "the government of the people, by the people, and for the people," to establish which the lamented Lincoln fell a martyr, and members of this party sacrificed life and treasure, shall continue to be the mission of the Republican party; and that until peace and good order shall prevail in every section of the land, and the free exercise of speech and the enjoyment of equal rights shall be secured to every citizen, the mission of the party shall not end.

Resolved, That in all future calls for conventions by the State Central Committee, they are hereby requested to drop the name of National Union Republican, and substitute the name of Republican, thereby placing the party in this State in line with the Republican party of the country.

At the election in November, the whole number of votes cast for presidential electors was 26,627, of which the Republican candidates received 15,787, the Democratic candidates 10,712, the Prohibition ticket 68, and the Greenback ticket 60. The Republican plurality over the Democratic vote was therefore 5,075, and the majority 4,947. Benjamin T. Eames and Latimer W. Ballou, Republicans, were elected as Representatives in Congress from the two districts of the State. All three of the proposed amendments to the constitution were defeated, three-fifths of all the votes cast being necessary to ratify them. The vote stood: For the amendment to Article V., relating to foreign-born soldiers and sailors, 9,187, against it 9,418; for the amendment to Article VI., modifying the property qualification for the suffrage, 10,700, against it 11,432; for the amendment to Article VII., relating to a general corporation law, 11,038, against it 10,956.

Question having been raised as to the validity of the election of George H. Corliss for presidential elector, on the ground that he was one of the United States Centennial Commissioners when chosen, Governor Lippitt, on the 23d of November, submitted to the judges of the Supreme Court for their decision the following questions, prepared by the Attorney-General:

1. Is the office of commissioner of the United States Centennial Commission such an office of trust or profit under the United States as to disqualify him for the office of elector of President and Vice-President of the United States?

2. If so, does such a candidate for the office of elector, who receives a plurality of the legal votes given and declines said office, create such a vacancy as is provided for in section 7, chapter 11, of the General Statutes?

3. If not, is the disqualification removed by the resignation of said office of "trust or profit?"

4. If not, does the disqualification result in the election of a candidate next in vote, or in a failure to elect?

5. If, by reason of the disqualification of the candidate who received a plurality of the votes given, there was no election, can the General Assembly in grand committee elect an elector?

An opinion, signed by four of the five judges, was transmitted to the Governor on the 28th of November. In answer to the first question, they gave it as their opinion that a Centennial Commissioner held an office of trust under the United States, which disqualified him for the

office of elector. In answer to the second question, it was declared that a vacancy could not be created by declining the office, for a person could not decline an office until elected to it, and, if not eligible, he could not be elected. In answer to the third question, the judges said:

3. We think the disqualification is not removed by the resignation of the office of trust, unless the office is resigned before the election. The language of the Constitution is that no person "holding an office of trust or profit under the United States shall be appointed an elector." Under our law, General Statutes, chapter 11, sections 1 and 2, the election by the people constitutes the appointment. The duty of the Governor is to "examine and count the votes, and give notice to the electors of their election." He merely ascertains—he does not complete—the appointment. A resignation, therefore, after the election is too late to be effectual.

The opinion was then given that "the disqualification does not result in the election of the candidate next in vote, but a failure to elect." Finally, the laws of the State provide that in case of a failure to elect, the Governor shall convene the Legislature at once "for the choice of electors to fill such vacancy by an election in grand committee." This, in the opinion of the judges, covered the existing emergency, and there was a vacancy which should be filled by the General Assembly convened for the purpose. Judge Stinees dissented from the views of the other judges on the first question, and gave a separate opinion, maintaining that Mr. Corliss was not disqualified from acting as an elector by reason of being a United States Centennial Commissioner. He contended that that was not an office of profit or trust within the meaning of the Constitution. On the other points he agreed with the majority of the judges.

The Governor summoned the Legislature to a special session on the 1st of December, and submitted to it the opinion of the judges of the Supreme Court. It proceeded immediately to elect William S. Slater in grand committee as an elector to fill the vacancy, and then adjourned to the 9th of January, 1877.

The work of compiling the statistics of the census taken in 1875 has been carried on during the year, and the aggregates of the four divisions into which they are classified are as follows: Population of the State, 258,239; value of farm and forest products for the year 1875, \$5,028,329; value of the products of the fisheries and shore-farms, \$1,337,087; value of the products of manufactures, \$126,659,875. The value of the products of some of the most important of the manufactures of the State is as follows: Cotton-manufactures, \$22,430,860; woolen-manufactures, \$17,463,240; print-works, \$16,497,100; iron-manufactures, \$10,666,491; jewelry and silver-ware, \$7,077,651.

RITSCHL, FRIEDRICH, one of the foremost classical scholars of the nineteenth century, born April 6, 1806; died November 9, 1876. He became Privatdocent at the University of Halle

in 1829, was appointed Extraordinary Professor in 1832, and went to Breslau in the following year as the successor of Passow, and Assistant Director of the Philological Seminary. Here he remained until 1839, when he went to Bonn as Professor of Classical Literature and Assistant Director of the Philological Seminary. There he also held the positions of Librarian-in-chief, Director of the Academic Art Museum, and President of the Society of Archæologists in the Rhine Provinces. In 1865 he came in conflict with the Government, through a dispute with Prof. Jahn, and in consequence resigned his position, receiving in the same year a call to Leipsic, where he remained until his death. He published an edition of Plautus, with numerous prolegomena on the metres of this poet (3 vols., 1843-'54), which is considered his best work. The "Parerga Plautina et Terentiana" (1845) properly forms an introduction to the former work, and is also regarded as one of his best works. In the "Præcæ latinæ Monumenta epigraphica" (1862) he gave over 100 lithographed plates, excellent imitations of the inscriptions dating before the age of Augustus.

ROMAN CATHOLIC CHURCH. The general position of the Roman Church underwent little change during the year 1876. The reign of the aged Pope Pius IX., already prolonged beyond precedent, continued during the year, and his attitude toward the Government of Victor Emanuel was unchanged. No encyclical letter or decree affecting the Church at large was issued by him. He made one promotion of cardinals, April 8d, when Bartholomew d'Avanzo, Bishop of Calvi and Teano, and Father Franzelin, of the Society of Jesus, were proclaimed. Bodies of pilgrims continued to visit Rome, to many of whom, and to delegations of Catholic associations in Italy and elsewhere, he addressed allocutions. Of the pilgrimages, the largest and most imposing was that from Spain, which was received in St. Peter's October 16th. He issued a brief on the centenary of St. Vincent de Paul, February 11th; and May 14th a decree in the case of the beatification of the venerable Redemptorist Hofbauer. Cardinal Donnet addressed the Pope June 29th, and the Bishop of Barcelona August 30th, in favor of the canonization of Christopher Columbus.

A brief to one of the German bishops, November 6, 1876, has a general bearing as an exposition of the Vatican Council:

VENERABLE BROTHER: Health and Apostolic benediction. We have learned with the greatest satisfaction, venerable brother, that you had already disapproved of the design which we have since deemed proper to condemn ourselves; and although we were well aware that the particular circumstances proceeding from the laws, the times, and the religious discussions, introduced in political assemblies, have paved the way to error, we, however, consider it useful to warn the erring, when a favorable opportunity presents itself.

But what is most painful to us is the rumor that has reached our ears regarding certain German

priests, who, after having long delayed manifesting their adhesion to the dogmatic definition of the Vatican Council touching the infallible magisterium of the Roman Pontiff, have at last made their adhesion, but on declaring either that they had only made up their minds to do so because they saw those German bishops who had defended the opposite opinion in the Council accept the definition, or else that they admitted indeed the dogma defined without admitting the opportuneness of the definition.

Now, as the definitions of the General Council are infallible, because they proceed from the inspiration of the Holy Spirit assisting the Church, according to the promise of Jesus Christ, they cannot but teach the truth. But truth does not derive either its force or its character from the assent of men: rather, as it proceeds from God, it requires a full and entire consent, which cannot depend upon any condition whatever. And, indeed, no heresy could ever have been proscribed until now, in an efficacious manner, if the faithful had been permitted to wait, before submitting to the definition of the truth, for the assent of those who opposed this definition and found themselves condemned by it.

This doctrine, which is the same for the definitions of Œcumenical Councils and for the definitions of the Supreme Pontiffs, was clearly formulated by the Vatican Council when it taught, at the close of its definitions, "that the definitions of the Roman Pontiff are irreformable of themselves, and not in virtue of the consent of the Church" (session iv., c. iv., *in fine*). But it is still more absurd to accept the definition and still persist that it is inopportune. Indeed, the vicissitudes of our times, the errors as numerous as those that have ever existed, the new errors that hell belches forth every day for the destruction of the Church, the Vicar of Jesus Christ deprived of his freedom, and the bishops deprived not only of the power of assembling, but even of teaching, all attest with what opportuneness Divine Providence permitted that the definition of the pontifical infallibility should be proclaimed at a time when the right rule of belief and conduct was about to be deprived, and in the midst of multiplied difficulties, of all other support. But putting all these considerations to one side, if the definitions of the Œcumenical Council are infallible, precisely because they flow from the wisdom and counsel of the Holy Spirit, nothing is more absurd than to think that the Holy Spirit teaches indeed things that are true, but may still teach them inopportune.

If, then, there be any of the priests in your diocese, warn them earnestly that it is not permitted to them so to limit their assent as to make it depend upon an act—even a praiseworthy act—of this or that bishop, rather than upon the authority of the Church; and that they must absolutely adopt the definition by a full and entire assent of the intelligence and will, if they do not wish to depart from the true faith.

In the mean time, while imploring for you those succors of Divine grace which are ever most abundant and most efficacious, as an earnest of our special good-will, we most affectionately bestow upon you, venerable brother, and upon your entire diocese, our Apostolic benediction.

Given at Rome, near St. Peter's, on the 6th of November, 1876, and in the thirty-first year of our pontificate.
PIUS IX., Pope.

The Italian Government continued its course of hostility to the Catholic Church. A decree was issued to the prefects to prevent the taking of religious vows or entering religious orders. On the 12th of March, Bonghi, Minister of Public Instruction, issued a decree suppressing the Vatican University, and declaring that "superior instruction can be given only in Government institutions." Theological students were

not exempted from conscription, but were forced into the army. This called out a letter from Bishop Dupanloup to Signor Minghetti, for which the Pope thanked him in a brief dated March 27th. The Government also continued the sequestration of church property, and in July seized that of the foreign colleges in Rome. The Catholic party organized as far as possible to check the influence of all these movements, and a Catholic Congress met at Bologna, to which the Pope addressed a brief on the 25th of September.

In the German Empire, especially in Prussia, the penal laws against the Catholics were rigorously enforced, and the state claims to jurisdiction in spiritual matters were pushed to strange limits. Three priests, at different

places, were punished by fine and imprisonment for withholding absolution from penitents in the confessional, and newly-ordained priests were similarly punished for saying their first mass. On one occasion a policeman interrupted the mass, seized the consecrated elements from the altar, and carried them to a Government inspector. The Government refused to censure this outrage on the religious feelings of its Catholic subjects. The prosecutions of bishops and clergy continued. Cardinal Ledochowski was released from prison February 8d, but was forbidden to enter Silesia or Posen under penalty of being interned at Torgau. He accordingly proceeded to Rome, whence, September 23d, he issued a formal protest against the law of June 7, 1876. On

ST. PETER'S CHURCH AND THE VATICAN PALACE, ROME.

March 8th John Bernard Brinckmann, Bishop of Münster, was deposed by the "Royal Tribunal of Ecclesiastical Affairs," on the charge of "having grossly violated his duties as a servant of the Church." The religious communities were steadily broken up, and the personal interposition of the Empress Augusta failed to save an orphan-house of the Sisters of the Infant Jesus. In some cases of vacancy, Old Catholic priests, by the nomination of patrons, or by an election where Catholics refrained from voting, were appointed and installed by the civil authorities in the Catholic churches. A Prussian law, promulgated June 7, 1876, subjected the church property absolutely to the administration of the civil authorities.

The closing of all Catholic schools, and the attempts of the Government to adapt the religious instruction of Catholic pupils to suit its own views, raised new opposition from the Catholic bishops and clergy, who were in many parts forbidden by name from giving any elementary religious instruction to the young members of their congregations. Pius IX., in a brief to the Bishop of Paderborn, July 31, 1876, says: "We prefer to congratulate you on your fate, rather than condole with you, and that all the more because you not only maintained your dignity and that of your holy office, but that you continue to look after the flock confided to your care. We rejoice that you have gathered manifold fruits from it in

the fidelity and in the love of your clergy and of your people, as well as in the cheerfulness with which they endure persecutions, and prefer the purity of their faith and the preservation of its unity to everything else. We see an admirable evidence of this in the solicitude which your clergy shares with you for the education of youth, and in the plan they have adopted, and which you have approved, according to which teachers appointed exclusively by the secular authorities shall be required to prove their submission to the Church, and that they will teach her saving doctrines by word and example. The carrying out of this will necessarily require a supernatural force, together with a degree of firmness no less great to surmount the difficulties that will rise up in its way; but God, who inspired this plan, will also supply the means for realizing this end." The Archbishop of Cologne also protested against the substitution of a catechism compiled by a Government official in the place of the regular catechism of his diocese. To encourage the Catholics of Germany in their difficult position, the Pope addressed a brief (August 14th) to the congress about to assemble.

Another curious episode in the *Kulturkampf* was the course of the Government in making numerous arrests at Marpingen, a small village in one of the Rhenish provinces, where the Blessed Virgin was believed by many to have appeared to some children near a fountain. No convictions followed, and the Government only intensified the resentment of the Catholics. The trial of Bishop Janiszewski, one of the coadjutors of Cardinal Ledochowski, resulted, October 7th, in an acquittal, but his proceedings were carefully watched to insure subsequent conviction. The whole course of Government during the year had gained little for the Old Catholic movement, and strengthened the Catholic party.

In France the Catholic hierarchy inaugurated (January 10th) a Free Catholic University at Paris, the Cardinal-Archbishop of Paris delivering the opening address. Waddington, Minister of Public Instruction, attempted to thwart this movement of the Catholic body, and to check the schools of the Christian Brothers. This led to agitation. A convention of Catholic committees was held in May, and the attempt to prevent the university from granting degrees excited such warm debates in the French Chambers that the Catholic party secured liberty of education. The whole hierarchy of France assembled to consecrate with imposing rites the Basilica of Lourdes (July 1st), surrounded by thousands of pilgrims. They transmitted a letter to the Pope, who replied by a brief (July 22d).

In Spain the question of a modification of the Concordat in regard to liberty of worship led to warm debates. The Bishop of Salamanca, in a speech of remarkable power, induced the Cortes to maintain the actual position. A brief

of Pope Pius IX. (March 4th), to the Spanish bishops, says:

Since the time when, in deference to the oft-repeated requests made to us by the Spanish Government, we sent our nuncio to Madrid, we instructed him to use every effort with the ministers of the nation, and with the most serene Catholic sovereign, to prevent the attempts made upon the Church in troublous and revolutionary times from being fully carried out, and for the faithful execution of the Concordat of 1851 and the treaties made subsequent to it. And as in the Constitution of 1869 a grave innovation was made in that kingdom upon the Church and upon the aforesaid Concordat, which had the force of law, by the public promulgation of the freedom of worship, our nuncio, from the time of the arrival at his post, directed all his cares and endeavors, in conformity with the instructions he had received, to restore in their full force all the rigor of this Concordat, rejecting, as to matters connected with it, every innovation of a nature calculated to endanger religious unity. In the mean time we have deemed it our duty to address a letter to the Catholic sovereign, to acquaint him with our sentiments on this subject. When the Spanish journals published the plan of the new Constitution submitted to the examination of the Superior Councils of the nation, and the eleventh chapter of which relates to the legal sanction of the freedom or toleration of non-Catholic worship, we immediately desired our Cardinal-Secretary of State to confer about it with the representative of the Spanish nation, and show him, in remitting to him the document in question, dated August 13, 1875, the just demands which right and duty exacted from us against the aforesaid chapter. The declarations put forth on this occasion were subsequently renewed by the Holy See, in the reply it felt called upon to make to several observations made by the Spanish Government on this point; and our nuncio at Madrid did not cease to ask the Ministers of State, at his interviews with them, that these protests should be inserted in the public acts of the ministry. But we have the extreme sorrow of seeing that everything we have done, either personally or through our Cardinal-Secretary of State and the nuncio at Madrid, has not yet had the desired result. Already, however, to divert from your country the misfortune of a false toleration, you, beloved son, and venerable brethren, have very justly and very properly expended your zeal and presented your protests and your petitions. To these protests, and to those of all the bishops and of the greater part of the faithful of Spain, we again upon this occasion unite ours, and we declare that the aforesaid chapter of the constitutional project of law which tends to give the weight and force of a public law to the toleration of all non-Catholic worship, under what form soever it may be presented, absolutely conflicts with the rights of truth and of the Catholic religion, abrogates, in violation of all right, the Concordat concluded between the Holy See and the Spanish Government on this most important and cherished point, burdens the state itself with a great crime, and, in opening the way to error, paves the road to persecution of the Catholic religion; moreover, it prepares an accumulation of evils for the downfall of this illustrious nation, which, in rejecting this false liberty or toleration in question, requires with all its means and with all its strength that the religious unity which it has inherited from its ancestors, and which is intimately allied with its historical monuments, with its morals, and its national glory, be maintained sound and unimpaired.

In Russia the severities against the United or Catholic Greeks were maintained, and representations made palliating the course of Gov-

ernment, which elicited a protest from the clergy of Chelm (June 1st).

In Turkey the general amnesty granted by Murad on his accession permitted Mgr. Hassoun, Patriarch of the Catholic Armenians, who had been banished by the grand-vizier Mahmoud Pasha, to return to Constantinople (July 6th). His restoration gave hopes of a speedy extinction of the schism which had caused his exile.

The policy adopted by Government in Switzerland was maintained, though not so rigorously, but Bishop Mermillod remained in exile, and the Catholic churches continued to be held by the Old Catholics, to whom they had been handed by the state.

The Church in other parts of Europe had few events of note. In May, Fort Augustus, Inverness-shire, which had been purchased by Lord Lovat, was given to the Benedictines, who established the first monastery seen in Scotland since the Reformation.

In the United States the influence was felt of the attempt to make the Catholic Church an element in the political questions of the day. In Ohio, a law passed to secure Catholics from official proselytizing in the State penal and eleemosynary institutions was repealed (January 21st). A new diocese, Alleghany, in Pennsylvania, was established, and steps taken to erect a Prefecture Apostolic for the Catholic Indians. The cathedral in Baltimore, the first Roman Catholic cathedral in the country, was solemnly consecrated with great pomp (May 25th), and in the same month Archbishop Purcell, the oldest bishop in the United States, and, with few exceptions, the oldest in the world, celebrated his golden jubilee. The operation of the public-school system on the rights of Catholics was discussed in many parts: in January, at Erie, between F. A. Crandall, editor of the *Sunday Morning Gazette*, and Bishop Mullen, leading to a general meeting of Catholics, who indorsed the bishop; in May there was a public discussion at Kingston, N. Y., between the Rev. James Dougherty and Rev. Mr. Vanderveer; in February Bishop McQuaid lectured on the topic before the Free Religious Association of Boston; Archbishop Purcell, of Cincinnati, couched his views on the subject in the following brief sentences:

DECLARATION TO THE PEOPLE OF THE UNITED STATES.

Enemies of the Catholic Church assert that the bishops and clergy of the Catholic Church are hostile to the public schools of the country, and are leagued together to destroy them. Americans! read our Declaration, and learn our true sentiments:

1. The Catholic bishops and clergy have no intention whatever to interfere with your public-school system. Build as many schools as you wish, we will never say a word against it, and we will leave to yourselves the care of your own children.

2. You wish your schools to be free from all religious influence; in other words, you wish them not to be sectional or sectarian in any case. The episcopate of the Catholic Church says, in this regard, Do with your children as you please.

3. We Catholics, on the other hand, are under the

conviction that children are sent to school not only to be formed into citizens, but also and especially to be educated into good men and good Christians, and our Church believes, in all earnest, with Guizot, the celebrated Protestant statesman of France, that education can by no means be separated from religious influence. Therefore, while leaving your schools and their management peacefully in your own hands, we claim the right of having schools of our own, from which religion shall not be excluded, but be allowed to exercise its salutary influence on youth.

4. We claim the right on the plea that we are a religious body in this free country, whose Constitution most solemnly guarantees the free exercise of religious belief to all its citizens, and the fullest personal freedom in regard to the dictates of conscience. Now, there is not a more essential or a more precious liberty than that of parents to educate their children in the manner which they think will make them happy for time and for eternity. Therefore, the Catholic people, with logical sequence, claim the protection of the Government, so as not to be molested in their schools.

5. We say, protection. No doubt, justice and equality would entitle the Catholic people of this country to exemption from taxation for the support of other schools, or to a share of the public-school fund in proportion to the number of pupils in their schools. But even this claim we are disposed to waive in your favor.

6. You can have no reason to fear the effect of our system on the Commonwealth, because experience has proved that the students of our colleges, academies, and schools, are as good and as useful citizens as those who come out of your institutions. And if in every other branch of human action you admit the principle of competition and believe in its beneficial influence, why should you exclude it from education, and deprive yourselves of the benefit which emulation would produce?

7. We fear that, notwithstanding this sincere, precise, and solemn declaration, there will yet be found fanatical men and political speakers who will endeavor to excite their hearers by asserting the imaginary opposition of the Catholic clergy to the public schools of the country. It is one of the misfortunes of this world that it cannot get rid of men who, like Don Quixote, are perpetually fighting against windmills, under the plea of imminent dangers to their fellow-men. Such men do not wish to know the truth, and though we repeat it a thousand times that we do not oppose their schools, any more than we adore images, or trust more in the Blessed Virgin than in the merits of Christ, they will a thousand times renew the charge and swear that we do. We do not expect to silence such men; but we appeal to all fair-minded citizens not to be led astray by the bigoted or ignorant ranting of men who would blind them for their own political ends.

We ask no favor or privilege. All we ask is to be let alone in following the dictates of our own conscience; and you cannot refuse this, without undermining the Constitution, and preparing the way for loss of the same freedom for yourselves.

Americans! we are willing to rally with you under the flag and Constitution, and maintain them with our blood, as we have done heretofore. But we cannot help fearing that both are in peril, while a large number of our fellow-citizens, in and out of office, allow themselves to be influenced by fanatical or self-interested politicians, or by infidel and revolutionary foreigners, who come to us with the proud pretension of teaching us what republican government is, about which they know nothing themselves. All we ask is, that you will not go to such men to learn what we aim at—what are our sentiments. Give us a fair hearing, and receive this declaration as the sincere expression of our true principles, which we make before God and men, actuated by no

other motive than our desire for the welfare and progress and perpetuity of our country, such as the fathers of '76 made it, and intended that it should remain.

Your sincere friend, and lover of the American Republic,

+ JOHN B. PURCELL,
Archbishop of Cincinnati.

In Iowa, an attempt to amend the constitution so as to establish the Protestant religion virtually in all the educational and eleemosynary institutions excited agitation and remonstrance from Catholics. In Arizona, Chief-Justice Dunne, who had delivered a lecture bearing on the school-question, was removed from office by President Grant. The attempt to add an amendment to the Constitution of the United States failed from a want of concurrence between the two Houses of Congress, the difficulty being to use words that would enable the Protestant Bible, general doctrines, and hymns, to be maintained in the schools, without at the same time making the amendment an instrument by which public schools might themselves be suppressed; and to authorize grants to educational and eleemosynary institutions where the general principles of the Protestant religion might be taught, while grants were forbidden to those where the Catholic religion was inculcated.

In Mexico, Bishop Moreno, of Lower California, was imprisoned in October, and subsequently exiled.

The new President of Ecuador, Borrero, attempted to pursue the policy of Moreno in encouraging religious influences, but his administration was soon brought to a close.

The Catholic Church in Venezuela underwent a series of attacks. Under the government of Guzman Blanco the archbishop was driven into exile, monasteries and convents were suppressed, celibacy was abolished by law, civil marriage established, and, finally, President Blanco issued a mandate to Congress in these terms: "I have taken upon myself to pass a law which shall declare the Church of Venezuela independent of the Roman episcopate, and ask that you further order that parish priests shall be elected by the faithful, the bishops by the rectors of parishes, the archbishops by Congress."

The difficult position of affairs in Brazil was brought to an unsatisfactory conclusion for the time. On the 29th of April Pius IX. addressed a letter of instructions to the bishops.

The press teemed with attacks on the bishops and Catholic party, and the stage used its influence to render the Catholic Church contemptible as compared with Masonry. This excited a warm protest from the bishops, which was, however, disregarded (May 6th). The fall of the ministry, however, the release of the bishops, and the raising of the interdict, quieted matters for a time, but left the original point undecided. This called forth a second brief (August 28th) from the Pope, insisting on the reorganization of the Sodalities in conformity

to the rules of the Church. The feeling of hostility was seen in the case of the Bishop of Rio Janeiro, who was driven from his pulpit (October 22d).

The missions of the Catholic Church in heaven countries showed generous devotedness. In January, 1876, the Rev. Messrs. Bouchard, Paulmier, and Ménoret, were put to death by the Tuariks, while on their way to Timbuctoo. On February 22d the mission at Ning-koee-foo, China, was destroyed; and on the 8th of April a massacre of Christians took place at Kiang-pestin; this was followed, July 15th, by the execution of Wang, a native Catholic priest, at Ning-koee-foo. Among the losses sustained by death, the Catholic Church had to deplore the decease of Dr. Orestes A. Brownson, and his daughter, Sarah M. Brownson Tenney, in America; the eminent theologian Perrone; Cardinals Antonelli, Barrios, and Patrisi, in Italy.

RUSSIA (Empire of all the Russias), an empire in Europe and Asia. Emperor, Alexander II., born April 17 (April 29, new style), 1818; succeeded his father, February 18 (March 2), 1855; crowned at Moscow, August 26 (September 7), 1856. Heir-apparent, Grand-duke Alexander, born February 26 (March 10), 1845; married November 4, 1866, to Maria Dagmar (born November 26, 1847), daughter of King Christian IX. of Denmark. Offspring of the union are two sons and one daughter: Nicholas, born May 6, 1868; George, born April 28, 1871; and Xenia, born March 25, 1875.

By the cession of the Kuriles to Japan in 1875, the area of Siberia was reduced about 1,922 square miles; while, on the other hand, the annexation of Khokan, which by a ukase of March 2, 1876, was organized as a Russian province under the name of Ferghana, added to the empire a territory of 28,270 square miles, with a population of 960,000. The area and population of the great divisions of the Russian Empire were, in 1876, reported as follows:

DIVISIONS.	Square Miles.	Population.
1. European Russia, inclusive of Poland and of the Sea of Azov.....	1,944,677	71,730,990
2. Grand-duchy of Finland.....	144,229	1,882,622
3. Caucasia.....	172,848	4,898,832
4. Siberia.....	4,524,561	8,428,867
5. Central Asia.....	1,805,528	4,650,218
Total Russian Empire.....	8,591,882	86,586,014

If the Caspian Sea, which embraces 169,666 square miles, and is now almost wholly encircled by Russian territory, be included in the area of the empire, the total area would amount to 8,561,498 square miles.

The religious statistics of the empire, exclusive of Finland, but embracing European Russia, Poland, Caucasia, Siberia, and Central Asia, and including Christians, Jews, Mohammedans and pagans, were, according to the *Petersburger Kalender* of 1876, as follows:

CREEDS.	European Russia.	Poland.	Caucasia.	Siberia.	Central Asia.
Orthodox Greek.....	54,853,956	84,185	2,073,089	2,996,927	274,089
Sectarians.....	992,674	4,926	47,592	79,847	46,447
Armenian Gregorians.....	83,720	695,810	15	1
United Greek.....	246,455
Roman Catholics.....	2,897,560	4,596,956	25,915	24,816	1,866
Armenian Catholics.....
Protestants.....	2,265,458	827,815	7,825	5,568	418
Total Christians.....	61,183,893	5,210,817	2,746,651	3,046,068	822,821
Israelites.....	1,944,878	615,488	22,782	11,941	3,896
Mohammedans.....	2,368,658	426	1,967,318	61,050	3,016,202
Pagans.....	253,125	245	4,678	286,016	14,740
Total non-Christians.....	4,566,661	616,104	2,014,698	359,016	3,034,468
Total empire.....	65,704,559	6,026,421	4,763,309	3,405,084	2,856,710

The movement of commerce in the years 1872 and 1873 was as follows (value expressed in thousands of rubles):

COUNTRIES.	IMPORTS.		EXPORTS.	
	1873.	1874.	1873.	1874.
Germany.....	167,012	179,745	109,991	135,487
Great Britain.....	128,580	128,864	129,456	136,669
France.....	25,113	19,729	23,108	26,114
Austro-Hungary.....	19,861	20,707	25,464	12,899
Turkey.....	20,075	17,535	7,900	9,802
Belgium.....	4,678	5,887	9,175	18,327
Netherlands.....	5,810	9,660	13,464	8,697
Italy.....	11,256	10,954	7,046	1
Spain.....	1,279	1,108	187	11,921
Sweden and Norway.....	2,983	3,002	6,457	6,601
Denmark.....	309	194	4,633	1,413
Greece.....	2,458	1,921	508	1,324

Tons.....	2,239,518			2,264,322		

The length of railroads in operation on January 1, 1876, amounted to 19,948 kilometres. At the close of the year 1875 the telegraph-lines in operation had an aggregate length of 81,545 kilometres, while the length of wire was 161,476 kilometres.

The most prominent feature of Russian history, during the year 1876, is the leading part taken by the Government in the great complications in Turkey (*see* TURKEY). In April, the official gazette of St. Petersburg published a declaration in respect to the situation in the East, which was intended to be reassuring. The accord between the powers, it said, with respect to the establishment of peace, was complete. The difficulties produced by agitations and material hinderances could not constrain the united will of Europe. The accord of the powers was only confirmed by the contemplated invasion of Montenegro. The imperial cabinet had immediately invited the other five great powers to advise their representatives at Constantinople to counsel the Porte against warlike proceedings. Germany, Austria, France, and Italy, had responded, and there were grounds to expect the accession of England. Favorable reports had been received from Constantinople. The Sultan had changed his Minister of Foreign Affairs, so as to seem to put away every design of attack on Montenegro, and to give assurances that the military measures at Scutari were intended only for eventual defense. A few weeks later the statement was repeated by the press, that the Government would act only in accord with the other powers in reference to affairs at Constantinople. In June diplomatic representatives were dispatched to Servia and Montenegro, to work, it was said, in a peaceful manner, with a view that Russia, in accord with the other powers, might watch over the introduction of Turkish reforms for the protection of the South Slavs. In the latter part of August the Czar attended a grand review of troops at Warsaw, where he made a short address, in which he said that, although there was at present no opportunity to test the devotion of the army, he knew that he could count upon it at any time. In the beginning of September a statement was officially made on behalf of the Government in reference to a policy which had often been attributed to it, of observing with indifference, or of not opposing, the formation of parties or risings among the Russian people in favor of self-administration for the provinces of Slavic race and Chris-

tian faith. Russia, it was said, had no occasion to encourage such enterprises as were referred to. She had no foreign enlistment-act, as England had, yet she could show that England had not always strictly fulfilled the obligations imposed by the existence of that act. The English were concerned with abstract constitutional rights, the Russians with national sympathies. The excesses of the press in stirring up partisan feelings had been punished, as was shown by the suppression of the *Grashdanin* and the *Russki Mir* for their extreme utterances; but a policy toward the press which would suppress the voice of the nation could not be demanded. Organizations for armed expeditions and free soldier-bands would not be permitted. In September the Czar went to the Crimea, where he remained two months. He was accompanied, during his sojourn there, by the Czarina, and the Minister Prince Gortchakoff. The fortifications of the Crimean coast from Kertch to Sebastopol were strengthened, and additional posts were established, so, it was represented, as to prevent Turkish ships from landing and smuggling weapons, and diffusing incendiary agencies among the Mohammedan populations of the peninsula. On the 9th of November the Czar was at Moscow, on his return from the Crimea, where, in reply to an address from the citizens, he made the following important speech :

I thank you for your sentiments respecting the political situation, which is now more clearly defined than before. You know that Turkey has yielded to my demands for an immediate armistice, to end the useless slaughter in Servia and Montenegro. In this unequal struggle the Montenegrins, as heretofore, have shown themselves real heroes. Unfortunately, the same cannot be said of the Servians, notwithstanding the assistance of our volunteers, many of whom shed their blood for the Slavonic cause. I know that all Russia joins me in warmly sympathizing in the sufferings of our brethren and co-religionists. The true interests of Russia are, however, dearer to me than all. My wish to the uttermost is to spare Russian blood. Therefore I have striven, and will still strive, to obtain a real improvement of the position of the Christians by peaceful means. In a few days negotiations will commence at Constantinople. My most ardent wish is that we may arrive at a general agreement. Should this, however, not be achieved, and should I see that we cannot obtain guarantees necessary for carrying out what we intended to demand from the Porte, I am firmly determined to act independently. I am convinced that the whole of Russia will respond to my summons, should I consider it necessary and Russia's honor require it. Moscow will lead the van by

its example. May God help us to carry out our sacred mission!

This speech was warmly applauded by the populace, and awakened a general and enthusiastic echo throughout the empire. Town councils, diets, trade-associations, merchants' guilds, the clergy, and all classes, declared their readiness to second and fulfill to the uttermost all the demands which the Czar and the empire might make for the protection of the interests of Russia. The speech was also regarded throughout Europe as one of great significance. About the same time orders were issued for the mobilization of the army, and appointing a day for calling recruits from

CRONSTADT.

all parts of the empire, except Siberia, Archangel, and Orenburg. Six army corps were ordered to be made ready for service in the provinces of Odessa, Kharkov, and Kiev. The command of the Southern Army was given to the Archduke Nicholas Nikolaievitch, brother of the Czar, with Adjutant-General Nepokoitschitzky as chief of staff, Prince Marsalsky as commander of artillery, Major-General Depp as chief of engineers, and Prince Barklai von Tolli-Weimarn, Lieutenant-General Radetzky, Baron von Kruedener, Prince Worozoff, Prince Schackoffski, and General Wannoffsky, as commanders of the several corps. In connection with the orders for the mobilization of the army, Prince Gortchakoff issued a circular to the Russian representatives abroad, explaining the measure, in which he said: "The Czar does not wish war, and will, if possible, avoid it. He is, however, determined that the principles of justice which have been recognized as necessary by the whole of Europe shall be carried out in Turkey under efficacious guarantees." Lord Loftus, British ambassador at the Russian court, reported of an audience that he had had with the Czar, November 2d, that the Czar said he had sent the ultimatum to the

Porte because he feared the discomfiture of the Servian army might be followed by atrocities. The Porte had, by a series of manœuvres, frustrated all attempts at pacification. The present state of things was intolerable. Unless Europe was prepared to act firmly and energetically, he would be obliged to act alone.

MONUMENT AT INKERMAN.

He regretted to see that inveterate suspicion and continual fear of Russian aggression still existed in England. The Czar reminded Lord Loftus that he had on several occasions given most solemn assurances that he desired no conquest. He had not the smallest wish or intention to acquire Constantinople. Such an acquisition would be a misfortune for Russia. In reference to the rumors that Servia and Roumania demanded that they should be erected into independent kingdoms, the Czar said that there was no intention of establishing any such kingdoms, and such a course would be folly. He had permitted officers to go to Servia, provided they left the Russian service, in the hope of calming the agitation in Russia.

This dispatch was verified by Prince Gortchakoff previous to its transmission to Lord Derby, and was approved by him as correctly representing the views expressed by the Czar. In a subsequent dispatch, November 7th, Prince Gortchakoff explained the necessity arising from the failure of diplomacy to subordinate the integrity of Turkey "to the guarantees which were demanded by the interests of humanity and the peace of Europe," and denied that Russia entertained after-thoughts respecting Constantinople. On the 18th of November the *Journal de St.-Petersbourg* published a circular of the chancellor, Prince Gortchakoff, which declared that, while the Czar did not desire war, but would do his best to prevent it, he would not cease his efforts till the humane and necessary principles for the establishment of which he contended were completely attained. A grand review of troops was held on

the Field of Mars, in St. Petersburg, November 15th, at which the Czar expressed a wish for the success of the commander-in-chief, who had gone to Kischinev, in the Crimea, to his command. On the 19th of November Prince Gortchakoff sent a dispatch to Count Shouvaloff, in London, in answer to a previous dispatch from Lord Derby of October 30th. Since August of the previous year, the dispatch said, Russia had tried to obtain a willing hearing from England. Russia had observed with regret that England's support of the Andrassy note had been neutralized by its refusal to sign the Berlin note; that it had failed to cooperate in the naval demonstrations, and that it had opposed the Russian policy in the matter of the six months' armistice without giving Russia previous notice of its intention to do so, whereby the esteem of the Porte for the unity of Europe had been greatly depreciated. Nevertheless, there was now, at length, accord between Russia and Europe. Russia had with pleasure seen Lord Derby take the first step toward calling a conference, and had cooperated in this object. Both powers were agreed as to the necessity of guaranteeing reforms and prosecuting them; they were not agreed upon means. England was seeking to bring into effect the stipulations of an earlier time, without thinking of the unfortunate results which they had produced, or to what weakness the action of Europe in respect to Turkey had been condemned by the treaty of 1856. Europe had been obliged several times to deny

COSSACK MAN AND WOMAN.

those stipulations, and they were to-day, as was shown by incontrovertible facts, the cause of evils which had been pointed out by Russia as threatened by them for twenty years. The powers must act, and present conditions to the Porte, which had broken the treaty of 1856

Russia would not be satisfied with merely preventive measures, but would still hold in consideration whether the existing difficulties could not be peacefully solved by the concurrence of the six great powers. Russia had no selfish wishes, as the Czar had told Lord Loftus at Livadia. If the English cabinet would now publish the report of Lord Loftus, and if it could convince itself that Russia had the will to go hand-in-hand with it, then the principles on which they were as one would be no dead letter, and the threatening danger would not hover over the peace of Europe.

A decree was issued February 5th, abolishing the office of Governor-General of the Baltic Provinces, consisting of Esthonia, Livonia, and Courland, which had been organized as a single department by the Czar Paul in 1800. The decree specified that the previous legislative organization of the provinces would remain unchanged. On the 15th of the month the Czar explained to a deputation of lord-marshals of the provinces the object of the act. It was intended as a manifestation of his trust in the Baltic people. Their devotion and love of order were known to him, and his good-will toward them was unaltered. A separate administration, such as was still required in Poland, Siberia, and the Caucasus, was no longer needed there. The cities of the Baltic provinces had formerly been in possession of the so-called Magdeburg right, and it had not been taken from them by the Polish Government; but, in carrying out the new plan of government, this institution was withdrawn, and the Russian town-regulations were substituted for it.

The independent judicial administration of Poland was abolished in July, by the operation of two decrees, one of which did away with the governmental justice-commission, and the other abolished the military commission of inquests at Warsaw. Direction was made that the trial of state offenses be handed over to the appropriate courts, and that the requests of Polish exiles to be permitted to return home be heard under the regulations which were established in 1871. The operation of this act was also to abolish the department for Polish affairs at St. Petersburg, under the direction of Secretary of State Naboloff. Another consequence of the measure was that the Russian language having been made the official language, one thousand officers of the Polish courts, who were not skilled in the use of that language, lost their places and were put on pensions.

The Government has striven for a long time to make the Russian language the exclusive language of literature and of intercourse among people of culture, and to confine the use of the different dialects exclusively to the common people. In pursuance of this policy, an order was issued on the 30th of May, from the Bureau of Affairs of the Press, prohibiting the introduction into the empire of books and

pamphlets in the Little Russian dialect without the permission of the bureau; also forbidding the writing and publishing within the empire of works in Little Russian, and translations into that dialect. Historic documents and memoirs, and works of fine literature, were excepted from the operation of the rule, but under the condition that the Russian form of writing should be preserved. Theatrical programmes and contracts in Little Russian, and the printing of Little Russian texts to music, were wholly forbidden. The act was received with much disfavor by the 14,000,000 Little Russians of the empire.

The Senate of Finland, in February, granted an appropriation of 300,000 rubles for building a canal to connect the Baltic with the White Sea. A Provincial Exhibition of the Products of Finland was opened in July by the Czar.

The conquest of Khokan was completed early in the year 1876, and the territory of that khanate was annexed to Russia by an imperial decree, dated March 2d, and organized as a Russian province under the name of the Province of Ferghana. (For a more full account of the conquest and annexation of this district, see the article on TURKISTAN.)

The third meeting of the International Congress of Orientalists was held at St. Petersburg, from August 30th to September 12th, under the management of a committee of organization composed of Russians eminent in literature and philological science. Most of the sittings were held in the rooms of the Imperial Home-Office, assigned to the congress by express command of the Czar. Prof. Gregorieff, of the Imperial University of St. Petersburg, presided. The congress was formed into nine sections, as follows: 1. Siberia; 2. Central Asia; 3. Caucasus; 4. Transcaucasia; 5. Eastern Asia; 6. India, etc.; 7. Turkey; 8. Archæology; 9. Religious Systems, etc. Baron von Osten-Sacken was chosen secretary of the congress, and Baron Victor von Rosen assistant secretary.

The first sectional meeting held was that of the Central Asian section (2), under the presidency of M. Ch. Schefer. Papers were read by Prof. Sachan on his edition of the work of the Arabian writer, Al-Biruni, the first part of which had recently been published, under the title "The Chronology of the Oriental Nations;" by M. Tcharykoff, on "A Voyage to the Uzbek Country, by Pazoukhine," who was sent thither by the Czar Alexis Mikhailovitch in 1671-'72; by Dr. MacNamara, on "The Routes followed by Cholera in its March from India to Europe;" by Prof. Oppert, on "The Asiatic Tongues incapable of being referred to either the Aryan or Semitic Families, but which are found in the Arrow-headed Texts," and which he styled Susi-Medic languages; by the Rev. John Long, formerly of Calcutta, on "The Aryan Race, its Origin in Central Asia, and its Emigration to

Europe and India;" besides other papers on subjects of less general interest. General discussions were held on the special codes of laws dictated by the founders of the nomad empires in Central Asia; as to whether or not a Mongol tribe or people existed before Genghis Khan; on the origin of the Turkish manuscripts in the so-called Vigur character; on the Central Asiatic calendars, and their relations to Chinese and Persian records; and on the Sogdian character and monuments.

In the Caucasian section (3), M. Gamaroff presiding, Prof. Gregorieff made an address on the Caucasian race and its origin, and M. Berger described several ethnographical objects which were exhibited in the Caucasian collection on view in the rooms of the Ministry of the Interior.

In the seventh section (Turkey), Ahmed Véfyk presiding, papers were read, or remarks made, on "The Ancient History of the

voyage to Fusang. With reference to the hypothesis in this theory, that the distances mentioned by the Chinese authors in describing the voyage to Fusang would make that country near America, the speaker pointed out that the Chinese *li*, the measure of distance mentioned in the account, was much larger now than formerly, and that a corrected calculation of the *li* would bring Fusang within the confines of Asia.

In the sixth section (India and Persia), Prof. Kern presiding, papers were presented on Dr. Leitner's "Comparative Grammar and Vocabulary of the Languages between Cabool, Badakhshan, and Cashmere;" by A. Marre, on the "Javanese, Mazache, and Malay Languages;" by Th. Bakouline, on "The Routes to Meshed;" by Baron Textor de Ravisi, on "The Mural Inscription of the Pagoda of Oodeypore;" by J. Duchâetan, on "The Pretended Egyptian Origin of the Chinese;" by M. Raverty, on "Sanskrit Words in the Pushtu Language." Prof. de Gubematis presented his work on "The Materials for a History of Oriental Studies in Italy," and the section discussed a number of special questions.

In the section on Siberia (1), M. Vassilieff presiding, papers were read by M. Slotsoff, on "The History of Public Instruction in Western Siberia;" by M. Neumann, on "The Tchonktchia, or People of Northeast Siberia;" by M. Sobruk, an Ostiak gentleman, on "The Idol-worship of the Ostiaks and Voguls;" by M. Slotsoff, on "The Proverbs, etc., of the Kirghiz

People;" and on special subjects. The section discussed the numerous emigrations which are said to have taken place during two thousand years from Siberia into Central Asia, the circumstances which had produced the overgrowth of population which had led to them, and the causes of their cessation.

In the Transcaucasian section (4), Prof. Patkanoff presiding, M. Berger gave an account of the poetical productions of the Persian province of Azerbaijan. M. Schmidt, of Gervalsberg, drew attention to the striking analogies in the languages of the aboriginal American tribes with those of the Armeno-Caucasians, which, he said, were altogether too intimate, too frequent, and too decided, to allow of the entertainment of any hypothesis of accidental similarity. The date of the composition of the geography attributed to Moses of Khorene, and the so-called Armeniac cuneiform texts, which, however, have no affinities with the language known as Armenian, were discussed.

WINTER PALACE, ST. PETERSBURG.

Slavs," by M. Harkary; on "The Khazars," by M. Howorth; on "The Present State of Popular Education in Siberia," by M. Mourkos; and on certain special works pertaining to Arabian literature and history. Ahmed Véfyk Effendi spoke on the question, "How far the mutual relations of the Arabic tribes before Mohammed threw light on the political state of the Israelitish tribes at the time of the Judges."

In the fifth section (Eastern Asia), Prof. Léon de Rosny presiding, papers were read by M. Makhov on "Japanese History and Tradition," in which he placed the beginning of the historical period of Japan at about 600 years B. C.; by Prof. de Rosny, on "The Possibility of reconstructing the Chinese Language as spoken during the Han Dynasty, or even previous to that Period;" by M. Vassilieff, on "The Chinese Language, its Ideographs," etc. Prof. de Rosny spoke of the theory of the discovery of America by the Chinese before Columbus, which is founded upon an ancient Chinese account of a

M. Tchonbinoff, in a paper on "The Laws of Georgia," showed how the feudal institutions of that country might be made available for the elucidation of the feudal institutions of Europe.

In the section on Archæology (8), Prof. Oppert presiding, the subjects of Numismatic Epigraphy and kindred topics, and Assyrian Archæology and Egyptology, were considered. Among the numerous papers in other branches of this department presented were one by M. Aspelin, on "The Prehistoric Civilization of the Permian Peoples and their Commerce with the East;" one by M. Camille Riquie, on "Inscriptions on the Rocks of Mount Sinai;" one by M. Lyoutsenke, on "Hebrew Sepulchral Monuments found near Sennaia, a Peninsula of Taman." At the final meeting of the congress,

the general subject of "The Religious and Philosophical Systems of Eastern Peoples" was discussed in papers bearing on "Mohammedanism" (Prof. von Mehren), "Chinese Philosophy and Natural Theology" (Rev. E. J. Estel, Ph. D., and the Rev. John Chalmers), "Slavonic Hebrew Studies" (M. Gorski-Platanoff), "The Biblical and Indian Cosmogonies," etc. (Prof. de Gubernatis), "The Chaldean Creation and Deluge Tablets" (Prof. Oppert), "Aryan Mythology" (M. Müller, of Moscow), on "Certain Egyptian Funereal Pictures and Hieroglyphical Legends" (Prof. Lieblein). In connection with the meeting of the congress, an extensive collection of Siberian, Finnish, Lapp, Tartar, and Buddhist articles, illustrative of the subjects discussed, was exhibited in the rooms of the Ministry of the Interior.

S

SA DA BANDEIRA, BERNARDO DE SA NAVEIRA, Viscount, a Portuguese statesman, born in 1796; died January 6, 1876. He took an active part in the war against the French, fought in the revolution of 1820 and against the counter-revolution of 1823, and was forced to seek safety in flight after the victory of absolutism. He returned after Dom Pedro had granted the charter, and defended the constitutional throne, both as a soldier and as a diplomatist. He distinguished himself particularly in the defense of Oporto, as governor of that city. In November, 1832, he was appointed Minister of the Navy, and at the same time Baron de Bandeira. He was dismissed as minister in May, 1833, was appointed Governor of Peniche in the same year, Governor of Algarve in 1834, and at the close of the war was created a peer of the kingdom. From November, 1835, to April, 1836, he was again Minister of the Navy, took part in the wars between the Chartist and Constitutionals, was the leader of the rising against the Duke of Saldanha in 1836, lost all his titles and dignities, and, after his restoration, became one of the leaders of the Opposition in the Cortes. From 1856 to 1869 he was on several occasions Minister of War, and President of the Council from July, 1868, to January, 1869, and again in 1870.

SALDANHA OLIVEIRA E DAUN, João CARLOS, Duke of, a Portuguese statesman, born in Lisbon, November 17, 1791; died in London, November 21, 1876. He began his public career during the Peninsular War, on the side of the French; was captured by the British troops, and sent prisoner to England. From there he went to Brazil, but subsequently returned to Portugal, and in 1828 became Minister of Foreign Affairs. In 1826 he was appointed Governor of Oporto, and, under the constitution of Dom Pedro, Minister of War, which position he held until 1827, when he went to England. Dom Miguel having usurped

power, Saldanha raised troops against him, but they deserted him. In 1832 he landed in Portugal with Dom Pedro, and ended the civil war by taking the capital and compelling Dom Miguel to surrender at Evora. In 1835 he became Minister of War and President of the Council; but he soon resigned, and went abroad, where he remained until 1846, when he was recalled by the Queen to form a ministry. In 1849 he was overthrown by Costa Cabral, and remained out of power until 1851, when he effected a new revolution, and was again placed at the head of the government till the accession of Dom Pedro V. in 1856. He was minister in Rome from 1862 to 1864, and again from 1866 to 1869. In May, 1870, he induced the army to revolt, and thus compelled the King to place him again at the head of the cabinet. The new elections, however, went against him, and he was succeeded, August 30th, by Sa da Bandeira. He was afterward appointed ambassador at the British court, where he remained until his death.

SAND, GEORGE, the *nom de plume* of AMANTINE LUCILLE AURORE DUPIN-DUDEVANT, a celebrated French novelist, was born July 5, 1804; died June 8, 1876. She was descended from the celebrated victor of Fontenoy, Marshal Maurice de Saxe, natural son of Augustus II., King of Poland, and the beautiful Countess Aurora de Königsmark. Her grandmother, the natural daughter of the marshal, was married to Count Horn, a natural son of Louis XV. of France. After his death she married the French nobleman Dupin de Francueil. The only offspring of this marriage was a son, Maurice Dupin, who served with distinction in the republican and imperial armies in Italy, where he became acquainted with Sophie Delaborde, the daughter of a dealer in birds, whom he married. One month after his marriage a daughter was born to him, the future George Sand. Through her, her father was able to

reconcile his mother, and to gain her consent to his *mésalliance*. After the death of her father, in 1808, her mother went to Paris, while she remained with her grandmother at the manor of Nohant, near La Châtre, in the ancient province of Berry. At this period, while still a child, she invented numerous stories, her tender youth being nearly absorbed by the composition of a romance, which she never published, but whose hero, Corambi, half pagan and half Christian, was the ideal of her dreams. She received a good education, but was taught no religion, as her grandmother was a bitter enemy of the Catholic Church. In her thirteenth year she was sent into the convent of the English Sisters of St. Augustin, where she remained three years. At first she was one of the wildest of the pupils of the convent, but when she had accomplished her fifteenth year, an ardent devotion replaced her precocious skepticism, and she resolved to take the veil. This period of her life she called a "religious disease," and she gave herself up to it entirely for the time being. But through various causes, mainly through her father-confessor, she was led to different views, and she soon renounced the idea of taking the veil. Her favorite literature now became the works of Locke, Aristotle, Leibnitz, and, later on, Rousseau and Byron. Having returned, after the death of her grandmother in 1821, under the control of her mother, she had daily to contend with a most irritable temper, and, in order to escape the maternal petty tyranny, she married in 1822, when only eighteen, Casimir Dudevant, the son of an ancient officer of the Imperial Guard, by whom she had two children, a son and a daughter. The relation between her husband and herself soon became unbearable to both. Their tastes widely differed, and, in addition, their pecuniary affairs were in an unsatisfactory condition. She was forced to apply to her husband for every franc she needed, thus giving her a feeling of entire dependency. As this position appeared to her unendurable, she parted from him amicably in 1831, and went to Paris with her daughter, purposing to use her remarkable talents in drawing, painting, and writing, and thus win money enough to provide for her wants and those of her daughter. She set to work with energy, translating foreign romances, drawing portraits, and painting microscopic flowers and birds on snuff-boxes and cigar-cases. In order to enjoy more freedom in the French capital, and, above all, to attend the great theatrical performances of that time without being exposed to improper remarks, she assumed male apparel, and soon became popular among artists and literary people. But she had still many hard rebukes to encounter before laying the firm foundation of her fame. M. de Kératry, a prominent novelist and director of a periodical review, disdainfully told her that "a woman must not write." Balzac himself did not pay much attention to her literary projects,

so strong and powerful was the general prejudice against female writers. But Delatouche, the publisher of the *Figaro*, welcomed her with sympathy, and accepted her contributions to his paper. This was her *début* in literature, she being at the time nearly twenty-eight years old. She then undertook to compose her first novel, "Rose et Blanche," with her old friend Jules Sandeau, from whom she took and ever after retained her *nom de plume*, George Sand. "Indiana," which she wrote in 1832, caused quite a sensation in the literary world. Soon afterward came "Valentine," followed by "Lélia" (1833), one of the most remarkable *romans de mœurs* ever published. She then started on a tour through Italy in company with Alfred de Musset, from whom, however, she soon separated. While in Italy her money gave out, and she was compelled to write steadily for several months in Venice. From there she sent to the *Revue des Deux Mondes*: "André," "Leone Leoni," "Mattea," and several "Lettres d'un Voyageur" and "Lettres d'un Oncle." Another result of her *liaison* with Musset, and of her Italian journey, was "Le Secrétaire Intime," which was not written, however, until two years later. In 1836 her relations with her husband became worse than ever, and a decree of the Tribunal-Civil granted her legal separation from him, and gave her the exclusive care of their two children. He appealed twice from this decision, but was defeated both times. By this decision she also came again into possession of her father's old estate of Nohant, being thus placed above want for the rest of her life. She visited Switzerland after the separation from her husband, and fell in love with Frédéric Chopin, the great composer, with whom she spent eight years, and who accompanied her to Majorca in 1838.

From 1838 to 1841 she published the greater part of her novels, criticisms, etc., in the *Revue des Deux Mondes*. Besides the works already mentioned, there appeared in its columns the following works from her pen: "Simon," "Metella," "Les Maitres Mosaïstes," "La dernière Aldini," "L'Orco," "Gabriel," "Pauline," etc. In October, 1841, she at once broke off her relations with it, because its editor refused her novel "Horace," on account of its radical and socialistic tendencies. Together with Leroux and Viardot she then established the *Revue Contemporaine*, which, however, did not exist very long, although she published in it, among other contributions, the novels "Consuelo" and "La Comtesse de Rudolstadt." After her quarrel with the *Revue*, she began to devote herself to the stage. When she wrote her first play, "Cosima," her fame was already so great that its appearance was awaited with great impatience; it was, nevertheless, a failure. But with "François le Champi," in 1849, and "Claudie," in 1851, she was more successful, the latter piece being played one hundred consecutive nights. The

Revolution of 1848 excited George Sand's mind. She threw herself with the utmost ardor into the revolutionary movement, writing the introduction to Ledru-Rollin's "Bulletins de la République" and two "Lettres au Peuple." She contributed to Barbé's *Communes de Paris*, and founded herself a paper, *La Cause du Peuple*, of which, however, only three numbers appeared. In 1850 she translated Joseph Mazzini's "Republic and Kingdom in Italy" into French, and, fearing for her safety after the *coup-d'état*, went to Belgium; from there, however, she soon returned. In 1853-'55 she published in the *feuilleton* of *La Presse* the history of her life, which afterward appeared in twenty volumes. This book was read with great interest at the time, and created considerable excitement. In 1859 she published in the *Revue des Deux Mondes* a novel, entitled "Elle et Lui," in which she attacked Alfred de Musset, who had died some time before. This book created a storm of indignation, and was answered most effectively by Paul de Musset in "Lui et Elle," in which he placed the assertions of George Sand in a different light, and attempted to vindicate his brother's character. Since this time she lived in comparative retirement, coming only once more before the public on the occasion of the War of 1870. When this war broke out she wrote an eloquent appeal in behalf of peace, "whose continuance alone would allow humanity to solve the social problems now at hand, and to emancipate itself finally from the double-headed politico-religious yoke of kings and priests." But though her own region escaped the turmoil of war, she had the sorrow of witnessing for the third time the invasion, crushing defeat, and dismemberment of France. She went to Tours, and proceeded along the French lines as far as she was permitted to go, taking notes and sketches of the heart-rending scenes of ruin and desolation. When the war was over, she published in the *Revue des Deux Mondes* her "Journal d'un Voyageur pendant la Guerre." After this time she did not appear before the public, but lived in quiet retirement until her death. Among her other works are: "Spiridion" (1839), "Les Sept Cordes de la Lyre" (1840), "Jeanne" (8 vols., 1844), "Lucrezia Floriani," "Le Piccinino," "La petite Fadette," "La Fillenle," "Mont Revêche," "Les Maitres sonneurs" (1853), "Jean de la Roche" (1860), "La Ville noire" (1861), "Le Marquis de Villemer" (1862), "Mademoiselle de la Quintinie" (1863), "La Confession d'une jeune Fille" (1864), and "Légendes rustiques" (1861), which she edited together with her son Maurice. During the greater part of her life she wore a mixed suit made of black cloth, woman's skirt with large cloth buttons, and fastened with a black-leather belt; a man's square jacket, made of the same stuff; a man's shirt, with collar and silk necktie. When out of doors she wore a mousquetaire's hat. For many years she had kept only a *pied-à-terre* in the Rue Racine, the

heart of the *Quartier Latin*, where she enjoyed a sort of worship from thousands of students. Her benevolence was extreme, and, like the elder Dumas, she was gifted with an extremely kind heart. She always suppressed hatred toward any person, even her enemies. But there were two things which she cordially detested, church-bells and guns, "the one and the other made with the same dark, gloomy metal, bronze, and symbolizing those two implacable enemies of liberty and fraternity, priestcraft and militarism."

SANDHURST, WILLIAM ROSE MANSFIELD, Baron, a British general, born in 1819; died June 23, 1876. After passing through the Royal Military College at Sandhurst, he entered the Fifty-third Regiment in 1835. In the rank of captain in the Fifty-third he entered upon his first war-service in the Sutlej campaign of 1846. He was present at the battles of Budniwal, Aliwal, and Sohraon, in the last of which he acted as aide-de-camp to the commander-in-chief. In the subsequent Punjab campaign of 1849, Major Mansfield was in command of the Fifty-third, and was present at the battle of Guzerat. He was next employed on the Punjab frontier in 1851-'52, sometimes in command of the Fifty-third, and sometimes attached to the staff of Sir Colin Campbell, who commanded the forces; and he was present at the affairs of Nawadund, Pranghur, and Skarcote. In June, 1855, he was attached to the embassy at Constantinople, with the rank of brigadier-general. When Sir Colin Campbell was appointed to the command of the army in India at the crisis of the mutiny, he selected Colonel Mansfield as chief of staff. As major-general he served throughout the mutiny. He was at the relief of Lucknow, at the battle of Cawnpore, where he was wounded, at the advance on Futteghur, the campaign in Rohilkund, the battle of Bareilly, and at Shahjehanpore; he served in the campaign in Oude in 1859, and was present at all the affairs which resulted in the subjugation of that province. He received repeated acknowledgments from his commanding officer, and in 1859 received the thanks of both Houses of Parliament. In 1860 he was appointed to the command of the troops in Bombay Presidency, and in 1865 commander-in-chief in India, which position he held up to 1870, when, upon his retirement from the service, he was raised to the peerage. He was a G. C. B. and a G. C. S. I., a privy counselor for Ireland, and general commanding the forces in Ireland from 1870 to 1875.

SANTA ANNA, ANTONIO LOPEZ DE, a Mexican general; died in the city of Mexico, June 20, 1876. He was born in Jalapa, February 21, 1798. He began his military career in 1821 against the Royalists, and after some success was given the command of Vera Cruz (1822); but insubordination led to his dismissal, and he took revenge by aiding in the downfall of the Emperor Iturbide. Becoming chief of the Federal party in the succeeding

contest, he was signally defeated, and retired to his home. At the end of 1828 he secured the overthrow of the Pedraza administration, and shortly after the elevation of Guerrero, who made him Minister of War and Commander-in-chief of the Army, after Santa Anna had repelled the Spanish invasion under Barradas, in September, 1829. He subsequently headed two successful insurrections, one to replace Guerrero in the executive functions by Bustamante, and the other to overthrow the latter in favor of Pedraza (January, 1832). In March, 1833, he was elected President; but, though a favorite with the army, he was unpopular with the nation, being suspected of aiming at the imperial crown. Several insurrections broke out, the last and most formidable of which was crushed by Santa Anna on May 11, 1835, when the insurgents sustained severe losses, and the Republican party received a fatal blow. A complete administrative reorganization was now effected, and the governors of the several States were henceforth dependent upon the supreme power. A revolutionary feeling, long existing in Texas, now broke out into open insurrection. Early in 1836 Santa Anna took the field in person. By the middle of February he reached the Rio Grande at the head of six thousand troops, stormed the Alamo at San Antonio on March 6th, after several days' siege, and massacred its defenders, but with great loss to himself, and, after the massacre at Goliad, done under his express orders, marched toward Gonzales. At San Jacinto he was totally routed by the Texan army under Houston, April 21st. The next day he was taken prisoner, and his functions were at once suspended by the Mexican Government. In 1837 he returned to his native country by way of the United States, but was coldly received, and at the presidential election of that year he had only two out of sixty-nine electoral votes, after which he retired to his estate at Jalapa. The same year he took part in the defense of Vera Cruz, bombarded by the French, and there sustained an injury which necessitated the amputation of a leg. In the long contention between the Centralists and Federalists he was one of the leaders of the former; and from October 10, 1841, to June 4, 1844, he was virtual dictator, under the title of Provisional President. He was again Constitutional President under the instrument of June 12, 1843, from June 4 to September 20, 1844, when he was deposed by a new revolution, taken prisoner near Tlacolula on January 15, 1845, and banished for ten years, and took up his residence in Cuba. In 1846 he was recalled, appointed generalissimo, and in December made Provisional President. Immediately after, at the head of twenty thousand men, he advanced northward, and on February 22, 1847, attacked the American troops at Buena Vista, five thousand strong, under General Taylor, by whom he was effectually repulsed on the following day. Having raised a

new army, he took up a position at Cerro Gordo, where he was again defeated by the Americans, under General Scott, on April 18th. Collecting three thousand men from the fragments of his army, he retreated toward the city of Mexico. Late in April he was informed of his appointment to the presidency by Congress; but, finding subsequently that the election for President, which the States had held on May 15th, was unfavorable to his pretensions, he prevailed on Congress to postpone the counting of votes until January, 1848, and in the mean time banished or imprisoned all who opposed his schemes, and established a severe censorship of the press. He had organized an army thirty thousand strong for the defense of the capital; but Molino del Rey was stormed by General Scott on September 8, 1847, and Chapultepec on the 13th, and on the 14th the city of Mexico fell. Santa Anna now resigned the presidency, and made a last effort to retrieve his reputation by the siege of Puebla; but he was attacked by General Lane at Huamantla, and forced to retire from the place, which was now relieved. Having received permission from the American commander-in-chief, he sailed for Jamaica on April 5, 1848. In 1853 he returned to Mexico, and was received with great enthusiasm. He was appointed President for one year, after which time he was to call a constituent Congress; but he fomented a new revolution, by which he was declared President for life, with power to appoint his successor, and with the title of Most Serene Highness. He began to rule with despotic authority, and the revolution of Ayutla followed, led by General Alvarez. After a struggle of two years, Santa Anna signed his unconditional abdication, and sailed, on August 16, 1855, for Havana. He afterward spent two years in Venezuela, and thence went to St. Thomas. During the French invasion he reappeared in Mexico, and pledged himself to strict neutrality; but a manifesto tending to excite disturbance in his favor led General Bazaine to order him to quit the country in May, 1864. Maximilian, however, appointed him Grand-Marshal of the Empire; but in 1865, having been implicated in a conspiracy against the Emperor, he again withdrew to St. Thomas. In 1867 he made a last attempt to gain ascendancy in Mexico, but was taken prisoner at Vera Cruz and condemned to death. Juarez pardoned him on condition of his quitting Mexican soil forever, and he came to the United States. After the death of Juarez he was permitted to return to Mexico.

SEWARD MONUMENT, THE. A colossal statue of William H. Seward, which was modeled by the sculptor Randolph Rogers, and cast in bronze in the Royal Foundry at Munich, presented to the city of New York by an association of private citizens, and erected on the southwest corner of Madison Square, in that city, was ceremoniously unveiled on the afternoon of the 27th of September.

The idea of erecting a statue of the late Secretary Seward in the city of New York was first conceived by Richard Schell, of that city, some three years before. After consulting Mr. Rogers about the probable cost of such a work, Mr. Schell conferred with Messrs. George J. Forrest, Lawrence W. Jerome, Thurlow Weed, E. D. Morgan, and Hugh J. Hastings, who all approved the project. To make up the sum of \$25,000, the estimated cost of the undertaking, subscriptions of just \$100 were readily obtained from 250 gentlemen, most of them residents of New York, the committee who attended to the business being G. J. Forrest, William H. Appleton, and Lawrence W. Jerome. Mr. Rogers was commissioned to make the statue. He came from Italy to make studies upon it, and two years were occupied in its completion. After it was cast in the famous works at Munich, it was shipped to New York, and within three weeks after its arrival the unveiling took place. The committee acting for the donors consisted of William H. Appleton, chairman; Edwin D. Morgan, Richard Schell, Lawrence W. Jerome, Frederick Law Olmsted, Isaac Bell, Richard E. Mount, Sheridan Shook, Charles W. Griswold, Chester A. Arthur, Abram S. Hewitt, James Bowen, John D. Maxwell, John E. Develin, William R. Martin, Elijah Ward, De Witt C. Wheeler, George M. Van Nort, and George J. Forrest.

The gift was formally made by the Hon. John Bigelow, Secretary of State of the State of New York, in the absence of Secretary Hamilton Fish, who was unable to be present, after the meeting had been called to order by Mr. William R. Martin, President of the Department of Public Parks in the city of New York, and the acceptance on the part of the city expressed by William H. Wickham, mayor, in two brief speeches. William H. Evarts, the orator of the occasion, then delivered a lengthy address before the large concourse of people whom the event had attracted to the spot. Mr. Evarts referred to the friendship which had existed between himself and the lamented statesman, during the twenty years preceding his death, which embraced the most eventful period of his career, but modestly deferred to the longer intimacy of Hamilton Fish and Thurlow Weed. He reviewed the public life of Seward, which he divided into four periods: "From 1824 to 1836 he was a lawyer, with an interval, indeed, of service in the Senate of the State, both as a debater and as a judge. From 1836 to 1843 he filled a prominent post in the service of the State, with intervals in which he resumed again his place as a lawyer and as a citizen. From 1848 to 1860, in the Senate of the United States, he led and filled out the great progressive movements of our politics, and there placed on the rolls of the renown which its records preserve a name second to none of those that preceded him; and from 1860 to 1872, in administration of great affairs, in times of transcendent interests and of gravest

difficulty, and then retiring in the complete triumph both of his politics and of his statesmanship, and leaving the helm from which an incomparable pilot could then be spared, to the smoothed seas and the calmed skies that had succeeded the tempest and the storm in which he had been the pilot and the savior of the state."

He spoke of his connection with the great Whig and Republican parties, in each of which he was a conspicuous agent in its formation and development, during its successes and defeats. He spoke of his disinterested attachment to the right as a lawyer, and the dignity of his brief services at the bar, and, referring to the Freeman case, declared: "I would give up all forensic fame if I could not add it to integrity, I would give up all glory if I could not add it to duty, to have it said of me that I defended William Freeman against a world in arms, and saved the jurisprudence and the justice of the State."

The speaker then referred to Mr. Seward's career in the Senate, from the time when he alone represented in the United States Senate a doctrine of slavery which was distinct from compromise on the one side, and from abolitionism on the other, to the time when, twelve years later, seven Senators gathered around him, supporters of his milder and conciliatory methods. He eulogized his course when the choice of the party, in 1860, fell upon "a younger soldier in the great cause" as its candidate for the presidency, and Seward, "without a sentiment of doubt, without a ripple in the composure of his spirit," took his place as supporter of his party's chosen chief. Mr. Evarts then passed to the crowing glory of William H. Seward's life—his administration of foreign affairs during the civil war—and qualified the serenity of judgment "which could make him master of the confused counsels of others, the power of forecast, and the patience, which characterized his mind."

In conclusion, he noted Seward's undeviating faith in popular institutions, which always guided and impelled his political course.

The statue is of light-colored bronze, and rests upon a pedestal with a base of New England granite and a dado of variegated marble of Spezzia. It represents Mr. Seward sitting upon a chair, the right leg thrown over the left, and turned slightly to the left in the chair—a common attitude with him in life. One hand grasps a paper, and the other, fallen to his side, holds a pen; he appears to be meditating upon what he has just written. A cloak hangs over the back of the chair, and books and a scroll lie underneath. The statue is ten feet in height, standing, with the pedestal, twenty feet high; the figure, if standing, would be thirteen feet tall. The inscription upon the pedestal is, "William H. Seward, Governor, Senator, Secretary of State of U. S."—Randolph Rogers, the artist, is a native of Michigan and former citizen of New York. He has resided in Rome many years,

and has received there the honor of election to a professorship in the Academy of San Luca. He has achieved an artistic fame second to that of no other American sculptor.

SIMROCK, KARL, a German poet and author, born August 28, 1802; died July 18, 1876. In 1823 he entered the Prussian judicial service, but was dismissed in 1830 on account of a poem on the July revolution in France. Since that time he devoted himself to literary labors, and in 1850 was appointed Professor of Ancient German Literature at Bonn. He possessed an extensive knowledge of the earliest German literature, and mastered like no other the national epic poetry of Germany, of which he partly furnished translations into modern German, and partly produced excellent imitations. He became famous by his translation of the "Nibelungenlied" (1827; thirty-second edition, 1876). Among his other excellent translations are those of the works of Walther von der Vogelweide (2 vols., fourth edition, 1869); of "Der arme Heinrich," by Hartmann von der Aue (1840); of "Parzival" and "Titurel," by Wolfram von Eschenbach, (third edition, 1875); of the "Tristan," by Gottfried von Strassburg; the "Wartburgkrieg," and "Minnelieder." Besides these translations of works of mediæval German literature, he also furnished excellent translations of the "Edda" (fourth edition, 1871), of "Beowulf," and "Heliand." Among his own poetical works "Wieland der Schmied" is the most important. A complete representation of the German heroic tales he presented partly by translations and partly by original poems in the "Heldenbuch" (thirty-second edition, 1876), which contained "Gudrun," the "Nibelungen," "Das kleine Heldenbuch," and "Amelungenlied." Among his scientific works, the most important are "Handbuch der deutschen Mythologie" (fourth edition, 1874) and "Ueber die Nibelungenstrophe" (1858). He also published "Die Rheinsagen" (seventh edition, 1874), "Deutsches Kinderbuch" (second edition, 1857), "Das malerische und romantische Rheinland" (fourth edition, 1865), "Deutsche Märchen" (1864), and the "Deutsche Volksbücher" (55 vols., 1839-'67). To the German Shakespeare literature he contributed "Die Quellen des Shakespeare in Novellen, Märchen und Sagen" (3 vols., new edition, 1872), and a translation of the poetical works of Shakespeare.

SMITH, GEORGE, a British Oriental scholar, born in 1840; died August 19, 1876. He was originally an engraver; but having carefully followed the researches of Sir Henry Rawlinson and others in the field of Assyrian antiquities for several years, he commenced, in 1857, the study of the inscriptions, and pursued it so unremittingly that at the time of his death his knowledge of Assyrian texts was unequalled. Believing that the chief difficulty in the reconciliation of Biblical and Assyrian chronology lay in the arrangement of the annals of Tiglath-pileser II., he undertook a careful examina-

tion of the monuments of this king deposited in the British Museum. The result of these researches were given in a series of papers in the *Zeitschrift für Aegyptische Sprache*. In 1867 he was appointed to assist Sir Henry Rawlinson in the preparation of the third volume of the "Cuneiform Inscriptions of Western Asia." In 1866 he began the copying of inscriptions relating to the Assyrian king Assurbanipal, the Greek Sardanapalus, for the purpose of publishing his annals. This work he gave to the world in 1871. There is no work on the Assyrian inscriptions which has done so much as this to place the decipherment of the texts on a firm and accurate footing. In 1872 he discovered an important series of tablets in the British Museum. These tablets were part of a cycle of early Chaldean legends, consisting of twelve tablets relating to the adventures of a mythical king called Isdubar. In the same year he was engaged by the proprietors of the London *Daily Telegraph* to conduct an expedition to excavate on the site of Nineveh. He left England in January, 1878. His excavations at Kouyunjik were most important in their results, in enabling him to complete many imperfect texts already in the collections. In the fall of 1878 he visited England, bringing with him a large and important collection of objects. He returned to Mosul, and, having completed the period of his *firman* and being unable to get a renewal from the authorities, he came back to England. The account of these investigations he published in his work, "Assyrian Discoveries." In March, 1876, he again set out for the East, but being unable to excavate on account of the prevalence of the plague and the unsettled state of the country, he was about to return to England, when he died at Aleppo. In 1875 he published a small "History of Assyria," and left the complete manuscript for a "History of Babylonia."

SOCOTRA, or SOCOTORA, an island in the Indian Ocean, about 130 miles east-north-east of Cape Guardafui, the eastern extremity of Africa, came in 1876 into prominent notice. The area is 1,309 square miles; the population is estimated at 4,000, of whom 1,000 live on the coast, and the remainder in the interior as cattle-raisers. (See Behm and Wagner, *Bevölkerung der Erde*, iv., Gotha, 1876.) According to English accounts, the Khedive of Egypt had, last year, the intention of taking possession of the island, but was forestalled by the English Government. In January, 1876, General Schneider, the British political resident at Aden, paid a visit to Keshin, on the coast of Arabia, and to Socotra. He concluded a treaty with the Sultan of Keshin, the proprietor of Socotra, which was signed by the latter, his heirs, and the other members of his family, never to sell Socotra to a foreign power, nor to permit a settlement to be made there without the consent of the British Government. For this he received \$1,000, and a smaller sum is to be paid annually to the

nephew and heir of the Sultan, who is governor of the island. The first account of this transaction (which was followed in the article on AFRICA) stated that General Schneider had bought the island directly from the natives for £2,400. The island has long been famous for aloe and the gum of the dragon's-blood tree, both of which are said to be the finest in the world; but its importance for England it derives chiefly from its geographical situation. As it commands the eastern inlet of the gulf of Aden and the coast of Eastern Africa, England was greatly interested in preventing it from falling into the hands of any other power. About forty years ago (in 1834) an English expedition had explored the island for two months, and for a time the English appeared to be disposed to occupy it permanently, but they abandoned it after they had occupied Aden.

The geography and history of the little island possess some features of special interest. Christianity appears to have been planted there even during the apostolic age, and the entire population to have become Christian at an early date. The Church of Socotra joined the Nestorian movement, and shared the fate of the Nestorian Church. In the ninth century Socotra appears as a suffragan see of the Archbishop of Persia, which relation it still sustained in 1280. At some later time it appears to have been a suffragan see of Angamale in India. From the beginning of the fourteenth century the Church of Socotra is believed to have been deprived of the pastoral care of Christian bishops, and of all intercourse with the remainder of the Christian world, and gradually to have sunk into utter decay.

According to an account of the English expedition of 1834, published by its leader, Wellstedt, the inhabitants of the eastern coast were Arabs. They lived mostly in the only town, Tamarida, in the village Oadhoop, and the little seaport Golenseah. All the others were called Bedouins. They included two peculiar tribes: one, the Beni Rahow, numbering about 150 men, believed to be the descendants of the Jews; and the other, Camhane, living on the granite mountains, and regarded as the descendants of the Portuguese, who ruled over the island during a part of the sixteenth century. They appeared to worship the moon, and were not inclined to make communication concerning their religion and mode of life. Once a year they had a procession, headed by a cross, around their temples. This is believed to be a remnant of their former Christianity.

SOUTH CAROLINA. Public affairs in this State during the year have attracted general attention. Some disturbances, attended with fatal consequences, have occurred, although not strictly of a political character. At Hamburg, on July 4th, Robert Butler, and another citizen of Edgefield County, while driving to the town of Hamburg, were interrupted by a colored militia company, who blocked up the public highway, and prevented them from pro-

ceeding on their way home. Complaint was made by Butler to Prince Rivers (colored), a trial-justice, who summoned witnesses to investigate the matter. "Doc" Adams, captain of the company, was the first witness examined. Adams became so insolent that Justice Rivers arrested him for contempt, and continued the case. When the trial was resumed the company proceeded to the court and rescued the prisoner Adams. Rivers, who, in addition to his being a trial-justice, commands the State militia, ordered the company to disarm; and, on refusing to comply with his orders, he called upon the citizens for aid to enforce his orders. The citizens responded, and the militia company took possession of a brick building and

STATE SEAL OF SOUTH CAROLINA.

refused to surrender. Fire was opened by both sides, which continued for several hours with but little effect. A small piece of artillery was taken from Augusta to Hamburg, but after firing a few rounds the ammunition gave out. The citizens of Edgefield were aided by citizens of Augusta, and a regular siege was laid to the building in which the negro militia were intrenched. Prince Rivers was in command of the citizens. Governor Chamberlain, in a letter upon the affair, says:

The effect of firing with the piece of artillery was to cause the militia to endeavor to make their escape from the rear of the building. The town marshal of Hamburg, a colored man, who was leaving the building, was instantly shot by the attacking party. While thus endeavoring to escape from the building, twenty or twenty-five of the militia were captured by the attacking party and kept under guard for several hours. Finally, about two o'clock, on the morning of the 9th of July—Sunday—after consultation among their captors, and with complete apparent deliberation, five of the captured militiamen were marched out, one by one, and shot to death in the presence of a large body of their captors. The rest of the captured party were either turned loose or broke loose, and ran. They were fired upon as they ran, and three of them severely wounded, one of them probably mortally.

General M. C. Butler, the counsel for the original complainants, in a letter on the disturbance, says:

I left the crowd arresting the negroes. How

many were killed or how they were killed I do not know. This collision was the culmination of the system of insulting and outraging of white people which the negroes had adopted there for several years.

Many things were done on this terrible night which, of course, cannot be justified, but the negroes "sowed the wind and reaped the whirlwind." . . .

I did not attempt to accomplish by force what I could not accomplish by peaceful means.

The collision was a sort of spontaneous combustion. I thought I saw it approaching, and did all that any human being could be expected to do to prevent it.

On July 22d Governor Chamberlain addressed a communication to President Grant, expressing his views on the state of affairs, and saying:

I deem it important to advise you of the facts now stated, and to solicit from you some indication of your views upon the questions presented. To be more specific, will the General Government exert itself vigorously to repress violence in this State during the present political campaign on the part of persons belonging to either political party, whenever that violence shall be beyond the control of the State authorities? Will the General Government take such precautions as may be suitable, in view of the feeling of alarm already referred to, to restore confidence to the poor people of both races and political parties in this State by such a distribution of the military forces now here as will render the intervention of the General Government prompt and effective, if it shall become necessary, in restoring peace and order?

President Grant on July 26th replied, concluding his letter as follows:

I repeat again that I fully agree with you as to the measure of your duties in the present emergency, and as to my duties. Go on, and let every Governor where the same dangers threaten the peace of his State go on in the conscientious discharge of his duties to the humblest as well as the proudest citizen, and I will give every aid for which I can find law or constitutional power.

Government that cannot give protection to the life, property, and all guaranteed civil rights (in this country the greatest is an untrammelled ballot) to the citizen, is, in so far, a failure; and every energy of the oppressed should be exerted (always within the law and by constitutional means) to regain lost privileges or protection.

Too long denial of guaranteed rights is sure to lead to revolution, bloody revolution, when suffering must fall upon the innocent as well as the guilty.

Expressing the hope that the better judgment and cooperation of the citizens of the State over which you have presided so ably may enable you to secure a fair trial and punishment of all offenders, without distinction of race, color, or previous condition of servitude, and without aid from the Federal Government, but with the promise of such aid on the conditions named in the foregoing, I subscribe myself, very respectfully, your obedient servant,

U. S. GRANT.

Some other outbreaks were reported during the year, the most important of which was the collision between whites and blacks at Ellenton, in Aiken County. The riot lasted for several days, and resulted in the killing of a number of persons, most of whom were negroes. This was alleged to have been an outrage committed upon the blacks by the white rifle clubs. It was asserted that rifle clubs had been organized in all parts of the

State, and that from 16,000 to 18,000 members had been enrolled. On the 7th of October Governor Chamberlain issued his proclamation ordering all organizations and combinations of men not a part of the militia of the State, formed for the purpose of drilling, etc., to disband and cease to exist, and if his proclamation is disregarded for three days, he will resort to military force. His reasons for issuing the proclamation are thus presented:

Whereas, It has been made known to me, by written and sworn evidence, that there exist such unlawful obstructions, combinations, and assemblages of persons, in the counties of Aiken and Barnwell, that it has become impracticable, in my judgment, as Governor of the State, to enforce, by the ordinary course of judicial proceedings, the laws of the State within said counties; by reason whereof it has become necessary, in my judgment, as Governor, to call forth and employ the military force of the State to enforce the faithful execution of the laws;

And, *whereas*, it has been made known to me, as Governor, that certain organizations and combinations of men exist in all the counties of the State, commonly known as "Rifle Clubs;"

And, *whereas*, such organizations and combinations of men are illegal, and strictly forbidden by the laws of this State;

And, *whereas*, such organizations and combinations of men are engaged in promoting illegal objects, and in committing open acts of lawlessness and violence, etc.

To this proclamation the Democratic State Executive Committee published a reply, of which the following are extracts:

The charges preferred by Governor Chamberlain against the citizens of the State are as false and libelous as his threatened usurpation of power is tyrannical and unwarranted, and his extraordinary proclamation can be explained only upon the assumption that Governor Chamberlain, with a similar disregard of law and of fact, is determined to resort to most extreme measures to prevent the otherwise certain defeat of himself and his corrupt party.

There have been disturbances in Aiken County, non-political in their character; they have long since ceased; all the parties for whom warrants were issued promptly surrendered themselves to the law. Perfect peace and the profoundest quiet prevail. No armed combinations hinder the processes of the courts, and the Republican County Convention, last week, held a continuous session of twenty days without molestation.

The disturbances in Barnwell were Republican in their origin, beginning in the resistance by an armed band of negroes of the arrest of a robber, for whom a warrant had been duly issued. This band tore up a railroad, wrecked a train, fired upon and wounded the sheriff of the county, and were dispersed by a so-called armed band of whites, who had been duly summoned by the sheriff as a posse, with the sanction of the judge of the court, then in session.

This posse, after performing their duties, quietly dispersed. So far from opposing the law, the whole people desire the prompt dispatch of business in the courts and the enforcement of the law by the civil arm. The white people throughout the State have volunteered their services to the Governor to maintain the law, and he has refused them in a libelous communication, intended solely to furnish a pretext to force the introduction of Federal troops to be placed under the control of irresponsible and unscrupulous officials to overawe the people and control the election.

Application having been made by Governor

Chamberlain to President Grant for military aid to preserve the public peace, the following proclamation was issued:

By the President of the United States of America—
Proclamation:

Whereas, It has been satisfactorily shown to me that insurrection and domestic violence exist in several counties of the State of South Carolina, and that certain combinations of men against the law exist in many counties of said State, known as rifle clubs, who ride up and down by day and night in arms, murdering some peaceable citizens and intimidating others, which combinations, though forbidden by the laws of the State, cannot be controlled or suppressed by the ordinary course of justice; and, *whereas*, it is provided in the Constitution of the United States that the United States shall protect every State in this Union on application of the Legislature, or of the Executive when the Legislature cannot be convened, against domestic violence; and, *whereas*, by laws in pursuance of the above, it is provided in the laws of the United States that in all cases of insurrection in any State, or of obstruction to the laws thereof, it shall be lawful for the President of the United States, on application of the Legislature of such State, or of the Executive when the Legislature cannot be convened, to call for the militia of any other State or States, or to employ such part of the land and naval forces as shall be judged necessary for the purpose of suppressing such insurrection, or causing the laws to be duly executed; and, *whereas*, the Legislature of said State is not now in session, and cannot be convened in time to meet the present emergency, and the Executive of said State, under section 4 of Article II. of the Constitution and the laws passed in pursuance thereof, has, therefore, made due application to me in the premises for such part of the military force of the United States as may be necessary and adequate to protect said State and the citizens thereof against domestic violence, and to enforce the due execution of the laws; and, *whereas*, it is required that whenever it may be necessary in the judgment of the President to use the military force for the purpose aforesaid, he shall forthwith by proclamation command such insurgents to disperse and retire peaceably to their respective homes within a limited time: now, therefore—

I, Ulysses S. Grant, President of the United States, do hereby make proclamation and command all persons engaged in said unlawful and insurrectionary proceedings to disperse and retire peaceably to their respective abodes within three days from this date, and hereafter abandon said combinations, and submit themselves to the laws and constituted authorities of said State, and I invoke the aid and coöperation of all good citizens thereof to uphold the laws and preserve the public peace. In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed. Done at the city of Washington, this 17th of October, in the year of our Lord eighteen hundred and seventy-six,

[SEAL.] and of the Independence of the United States one hundred and one.

U. S. GRANT.

By the President:

JOHN L. CADWALLADER,
Acting Secretary of State.

On the same day the following order was issued:

WAR DEPARTMENT, WASHINGTON, }
October 17, 1876.

General W. T. SHERMAN, commanding United States Army—SIR: In view of the existing condition of affairs in South Carolina, there is a possibility that the proclamation of the President of this date may be disregarded. To provide against such a contingency, you will immediately order all the available force in the military division of the Atlantic to

report to General Ruger, commanding at Columbia, South Carolina, and instruct that officer to station his troops in such localities that they may be most speedily and effectually used in case of resistance to the authority of the United States. It is hoped that a collision may thus be avoided, but you will instruct General Ruger to let it be known that it is the fixed purpose of the Government to carry out fully the spirit of the proclamation, and to sustain it by the military force of the General Government, supplemented, if necessary, by the militia of the various States. Very respectfully, your obedient servant,

J. D. CAMERON, Secretary of War.

This proclamation of the President was followed by an appeal to the people of the State by the Democratic Executive Committee, of which the following are extracts:

This proclamation is based upon the statements made by Daniel H. Chamberlain, the Governor of this State, which statements are aimed politically against his political opponents, and are proved to be untrue by the testimony of every judge in the State, and every trial-justice or other officer of the law from whom response has been obtained. Every resident of the State knows them to be untrue. Every Republican of character or intelligence, or who is not in office or seeking office, and many who are in office in the State, have expressed horror and disgust at the course which the Governor has pursued. We say this much for our vindication.

We make the declaration of our innocence not in disrespect to the President of the United States, but as an act of justice to ourselves as American citizens, and to put our case upon the record for an impartial trial before the great national tribunal. We bow in perfect submission to the proclamation of his Excellency the President, and exhort our fellow-citizens, whom we represent in the present canvass, to yield free and entire obedience to every command of the said proclamation.

We know that the clubs called "Rifle Clubs" are associations formed for home protection; that they are not combinations, as charged by the Governor of this State; that there are but few that have arms or ammunition; that those which have been equipped were so done with the sanction, and sometimes with the aid, of the Governor, and have been recognized by him as useful and appropriate bodies, and not one of them has been accused of disorder. We know that this necessity was occasioned by the reckless distribution of arms and ammunition among the colored people by the State officials.

The Democratic State Convention assembled in Columbia, and nominated the following candidates: For Governor, Wade Hampton; for Lieutenant-Governor, W. D. Simpson; for State Treasurer, S. L. Leaphart; for Attorney-General, James Conner; for Controller, General Johnson Hagood; for Secretary of State, R. M. Sims; for Inspector-General, E. W. Moise; for Superintendent of Education, H. S. Thompson. The following platform was adopted:

The Democratic party of South Carolina, in convention assembled, announces the following as its platform of principles:

We declare our acceptance, in perfect good faith, of the thirteenth, fourteenth, and fifteenth amendments to the Federal Constitution; accepting and standing upon them, we turn from the settled and final past to the great living and momentous issues of the present and future.

We adopt the platform of principles announced by the national Democratic party recently assembled at St. Louis, and pledge ourselves to full and hearty

coöperation in securing the election of its distinguished nominees, Samuel J. Tilden, of New York, and Thomas A. Hendricks, of Indiana, and believe that, under the wise and just administration of its distinguished reform leader, assisted by the eminently patriotic and able counselors by whom he will be surrounded, peace and prosperity will again bless our country, and the dissensions, the confusion, and maladministration of the past eight years will give place to concord, good government, and a thorough restoration of the Union in accordance with the declarations of that platform, and utterances and acts of our distinguished leader.

We demand genuine and thorough reform in the State of South Carolina, and call on all its citizens, irrespective of race, color, or previous condition, to rally with us to its redemption, for it is evident that substantial and lasting reform is impossible within the ranks of the Republican party of this State.

We charge that party with arraying race against race, creating disturbances and fomenting difficulties; with prostituting the elective franchise and tampering with the ballot-box, and holding unfair and fraudulent elections; with having accumulated an enormous debt, mismanaged the finances, and injured the credit of the State; with levying exorbitant taxes, and squandering the money when collected, thus wringing from the toil and livelihood of the honest poor man of the State a large percentum of his hard earnings, without giving in return any compensation therefor, and hopelessly involving in debt a majority of the counties of the State. Its management of our penal and charitable institutions is a shame and a disgrace.

We charge its legislation as demoralizing, partisan, and disgraceful, and the venality and corruption which have characterized every branch of the government—executive, legislative, and judicial—have no parallel in the history of nations. It has created a multiplicity of unnecessary and useless offices, complicated in their system, and unnecessarily expensive. It can never purify itself, give good and impartial government, or by its moral force and character exercise in its free sovereignty the law of the land. We do not charge the condition of things (which every patriot must deeply deplore) upon the masses of the party, but upon the leaders, who made such a fatal use of their confidence and trust; for it is our firm conviction that all good people of the State, of both races, desire peace and prosperity.

We therefore call upon all fellow-citizens, irrespective of race or past party affiliation, to join with us in restoring the good name of the State, and to again elevate it to a place of dignity and character among the Commonwealths of this great country.

We discountenance all disturbances of the peace of the State, and denounce all instigators and promoters thereof, and earnestly call upon all fellow-citizens, irrespective of party lines, to exercise forbearance and cultivate good-will; and if the government of the State is committed to our control, we pledge ourselves to protect the persons, rights, and property of all its people, and to speedily bring to summary justice any who dare to violate them.

We desire a fair, peaceful election, appealing to the reason and not to the passions of the people, and demand of the Republican party a fair showing in the appointment of Commissioners of Election. We demand a fair election and a fair count. We call upon all patriot sons of Carolina to join us. We ask but a trial of committing the State to our keeping, and if good government, security, protection, and prosperity, do not dawn on our over-taxed, depopulated, and disheartened people, then drive us from power with scorn and indignation; our object is reform, retrenchment, and relief, that by honesty and economy we may reduce the taxes and lighten the burdens of the people, giving at the same time absolute security and protection to the rights and prosperity of all.

Upon this paramount issue we cordially invite coöperation of every Democrat and Republican who is earnest and willing, in this crisis of our State, to unite with us in this great work.

The Republican State Convention met in Columbia, on September 12th, and nominated D. H. Chamberlain for Governor; R. H. Gleaves (colored) for Lieutenant-Governor; F. L. Cardozo (colored) for State Treasurer; R. B. Elliott (colored) for Attorney-General; H. E. Hayne (colored) for Secretary of State; T. C. Dunn for Controller-General; J. R. Tolbert for Superintendent of Education; and James Kennedy for Adjutant and Inspector-General. The following is a synopsis of the platform:

First, the party reaffirms its confidence in the national Republican party, and pledges its adherence to the principles adopted at Cincinnati. Second, indorses Hayes and Wheeler with the assurance that all necessary reforms can be effected within the party. Third, heartily indorses President Grant, and his economical administration is commended to the future observance of the party. Fourth, declares its belief in plain and unmistakable principles for the platform, rejects glittering generalities, and adheres to specific and substantial truths. Fifth, abhors and repudiates violence and intimidation and fraud in elections; will jealously guard the right of every citizen to choose his political party; denies the charge that Republicans countenance interference with colored voters who prefer the Democratic ticket, and denounces the Democratic practice of attending Republican meetings, and taking part therein without invitation. Sixth, pledges a thorough reform in all departments, and will submit the following specific reforms: The present adjustment of the bonded debt shall be inviolable; the General Assembly to meet once in two years, and no session to exceed seventy days; the number of the sessions of the Court of General Sessions and Common Pleas to be reduced to two annually to each county, the judges to call extra sessions; the veto power to be modified so as to allow disapproval of a part without reference to entirety of an act; agricultural interests to be fostered; an equitable distribution of taxation, and a system of licenses to be adopted; no public funds to be devoted to sectarian purposes; local and special legislation prohibited whenever private interests can be protected by general laws; especially pledges to support the free schools, and advocates an amendment to the constitution to establish a specific tax for this purpose; a reduction of salaries consistent with the necessities of the government; a reduction of fees and costs, especially of attorneys in civil cases; an immediate repeal of the lien law; the public printing to be reduced one-third; convict-labor to be utilized under humane laws; annual appropriations shall be expended economically; the number of trial-justices shall be reduced. The platform charges the Democratic party with a perversion of truth and history; with a denial of rights to their opponents; with antagonism to justice, the disruption of the Union, and opposition to reconstruction.

The election was held on the 7th of November. On the 10th the State Board of Canvassers met to determine and declare the results. The members of the board who acted were Henry E. Hayne (colored), chairman of the board and Secretary of State; F. L. Cardozo (colored), State Treasurer; Thomas C. Dunn, Controller-General; H. W. Purvis (colored), Adjutant-General and Inspector-General.

eral and William H. Stone, Attorney-General. All of these were Republicans, and Hayne, Cardozo, and Dunn, were candidates for reelection. M. J. Hirsch, chairman of the Committee on Privileges and Elections of the House of Representatives, was also by law a member of the board, but did not act on this occasion.

Soon after the assembling of the board, General Conner, counsel for the Democratic candidates, submitted the following paper as to the jurisdiction of the board:

On behalf of the citizens of the State whom we represent, and of the Democratic candidates on the State ticket, we submit that all acts of the General Assembly authorizing the Board of State Canvassers to hear and decide all cases under protest or contest that may arise in regard to the election of electors for President and Vice-President, members of Congress, and all officers elected at any general election held in this State, are in violation of section 2 of Article I. of the constitution, and therefore unconstitutional and void.

And on behalf of the parties aforesaid we demand that the Board of State Canvassers now assembled shall not hear or decide any such cases of contest or protest, but shall only act ministerially in ascertaining, from the returns and statements forwarded by the boards of county canvassers, the persons who have received the greatest number of votes for the offices for which they were respectively candidates, and declare the same and certify it to the Secretary of State.

The laws of the State require the votes cast to be counted immediately upon the closing of the polls by the precinct managers, who forward statements of the results to the Board of County Canvassers. From these statements the county canvassers make the proper county statements, and forward them with the precinct managers' returns, the poll-lists, and all papers appertaining to the election, to the Board of State Canvassers, who make the proper statements and determinations, declaring duly elected the persons who have received the greatest number of votes, whereupon copies of such statements and determinations are forwarded to such persons. This is applicable to all elections except those for Governor and Lieutenant-Governor, in which the returns are sealed up in the respective counties and transmitted to the Secretary of State, who is to deliver them to the Speaker of the House of Representatives at the next ensuing session of the General Assembly; and during the first week of the session, or as soon as the General Assembly shall have organized by the election of the presiding officers of the two Houses, the Speaker shall open and publish them in the presence of both Houses, and the person having the highest number of votes shall be Governor. The Board of State Canvassers

CHARLESTON, FROM THE BAY.

has jurisdiction by statute to decide all cases under protest or contest that may arise when the power to do so does not by the constitution reside in some other body.

On behalf of the Democratic candidates it was not denied that the statute gave to the board power to hear and determine cases of protest and contest; but it was contended that to hear or decide cases of protest or contest would be an exercise of judicial functions, and that, as the board was composed of members of the Executive branch of the State government, the statute vesting in it such powers was in violation of that provision of the constitution, which prohibits executive officers from exercising judicial functions; that no

judge can sit in his own case (three members of the Board of Canvassers being candidates) or in a case in which he is interested; and that questions relating to the election of members of the Legislature were by the constitution vested in that body.

On the 14th R. M. Sims and certain other persons, as Democratic candidates and citizens, applied to the Supreme Court of the State for a writ of prohibition to restrain the board from exercising any judicial functions in regard to the protests and contests, and from doing anything else than ascertaining from the managers' returns and the statements forwarded by the Board of County Canvassers the persons who had received the greatest

number of votes, declaring and certifying the same to the Secretary of State; and also for a writ of mandamus to compel the board to make such ascertainment, declaration, and certificate. Before proceeding to final judgment, the court (F. J. Moses, Chief-Justice) on the 17th made an order, "as auxiliary to its final action," that the Board of State Canvassers do forthwith proceed to aggregate the statements forwarded to them by the Board of County Canvassers and ascertain the persons who have received the greatest number of votes for the offices for which they were candidates respectively at the general election, held in the State on the 7th instant, and certify their action in the premises, under this order, to the court.

This order to apply to all officers voted for at the said general election, except the offices of Governor and Lieutenant-Governor, which are not in question by the pleadings.

On the 21st the board made a report to the court, stating what persons had received the highest number of votes for all the offices except those of Governor and Lieutenant-Governor. From this it appeared that the Republican presidential electors had been chosen by an average majority of 816, the average Republican vote being 91,672, and the average Democratic 90,856. The highest vote for any Republican elector was 91,870, and the lowest 91,136; highest for any Democratic elector 90,906, lowest 90,737. The tabulated results for State officers were as follows:

SECRETARY OF STATE.	
Hayne (Rep.).....	91,676
Sims (Dem.).....	91,449
Hayne's majority.....	227
ATTORNEY-GENERAL.	
Elliott (Rep.).....	91,146
Conner (Dem.).....	91,139
Elliott's majority.....	7
CONTROLLER-GENERAL.	
Dunn (Rep.).....	90,858
Hagood (Dem.).....	91,114
Hagood's majority.....	256
SUPERINTENDENT OF EDUCATION.	
Tolbert (Rep.).....	91,113
Thompson (Dem.).....	91,552
Thompson's majority.....	440
ADJUTANT-GENERAL.	
Kennedy (Rep.).....	91,606
Moise (Dem.).....	91,545
Kennedy's majority.....	61
STATE TREASURER.	
Cardozo (Rep.).....	91,485
Leaphart (Dem.).....	91,277
Cardozo's majority.....	208

According to the above, all of the Republicans received majorities, excepting the candidates for Controller and Superintendent of Education. The figures submitted to the court included the returns from Laurens and Edgefield Counties, which gave large Democratic majorities, showing the election of one Senator and three Representatives in Laurens, and one Senator and five Representatives in Edgefield.

Appended to the report of the board was the following memorandum stating that in their opinion certain irregularities should be corrected in favor of the Republican candidates for Controller and Superintendent of Education, and that frauds and intimidation had been practised in Laurens and Edgefield Counties, which they had been precluded from investigating. They say:

This statement is made to the court in obedience to its order of November 17, 1876; but it is respectfully submitted that, under the present proceedings in this court, this board is not, by law, compelled to report any of its actions to the court.

This board further declares that, in its opinion, the votes returned for F. C. Dunn for Controller-General should be counted for T. C. Dunn, the only candidate for the office of Controller-General by the name of Dunn. By making this addition to the votes cast for the said office, the said T. C. Dunn has received 91,176 votes for the office of Controller-General, which gives him a majority. So, also, votes, 632 in number, returned for John B. Tolbert, should be counted for John R. Tolbert for the office of Superintendent of Education. By making this addition the said Tolbert has received for the said office 91,644 votes, which gives him a majority.

The board further shows to this court that allegations and evidences of fraud have been filed with this board as to the election held in Edgefield County by many managers of election in said county; that similar allegations have been made and filed as to one or more precincts in Barnwell County; that the statements of the Commissioners of Election for Laurens County laid before this board were signed by two commissioners only, one of whom signed, as he certifies, under protest. The said commissioner has also filed an affidavit that the reason he signed the said statements was because he was in fear of bodily injury if he refused to do so; that various protests and notices of contests have been filed from counties of the State, alleging irregularities on the part of election-officers, illegal voting, etc.; that in view of said allegations, protests, and notices of contests, none of which have been heard or passed upon by this board, because of the pendency of these proceedings, the board cannot, in their opinion, properly ascertain and certify who have actually received the greatest number of legal votes in the said counties for the several offices voted for, unless they have the opportunity of investigating these allegations and hearing evidence upon these protests.

On the 22d the court issued a "writ of peremptory mandamus" commanding the board "forthwith to declare duly elected to the offices of Senators and members of the House of Representatives the persons who by said certificate of the said board to the court have received the greatest number of votes therefor; and to forthwith deliver a certified statement and declaration thereof to the Secretary of State; and commanding the Secretary of State to make the proper record thereof in his office, and without delay transmit a copy thereof, under the seal of his office, to each person thereby declared to be elected, and a like copy to the Governor, and cause a copy thereof to be printed in one or more public newspapers of this State."

On the same day the court issued a rule requiring the board to show cause on the 24th why a writ of mandamus should not be issued

compelling the members to proceed in the case of presidential electors with the merely ministerial duty of comparing the returns of the precinct managers with those of the boards of county managers, and, in order to correct errors, to report the result to the court.

Pending these proceedings in court, but before the service of the above writ and rule, the board, holding that their powers and duties were limited by statute to ten days, which expired on this day, the 22d, issued certificates of election to the Republican presidential electors and to the Republican State officers, making the corrections above referred to in the case of the Controller and the Superintendent of Education. Certificates were also issued to members of Congress and of the Legislature, and to county officers. They refused to make any determination or issue any certificates as to Edgefield and Laurens Counties, on the ground of frauds, violence, and irregularities in those counties. The board then adjourned *sine die*.

This action, alleged to have been done in contempt of the authority of the Supreme Court, caused much excitement, and called forth the following address from Wade Hampton:

COLUMBIA, S. C., November 22, 1876.

To the People of South Carolina.

The Board of Canvassers have, by their unprecedented action to-day, shown not only their contempt and defiance of the Supreme Court of the United States, but their utter disregard of their own official integrity. While the grave questions determining the result of the recent election were pending before the Supreme Court, composed of three judges belonging to the Republican party, and in direct violation of the orders of this tribunal, the board have issued certificates of election to the Republican presidential electors and to the Republican State officers, and have refused to give certificates to Democratic members of the Legislature shown by the returns of this same board to have been elected in the counties of Edgefield and Laurens. This high-handed outrage is well calculated to arouse the indignation of our long-suffering people; but I assure them that this daring and revolutionary act of the board can have no legal force whatever. I appeal to you, therefore, in the fullest confidence that the appeal will not be unheeded, that you will maintain, even under that provocation, your character as an orderly and law-abiding people. During the past exciting canvass you have studiously avoided even the semblance of a purpose to disturb the public peace or to transgress the law. Your cause—and it is the cause or the constitutional government of the country—has been carried to the highest court of the State, and we are willing to abide by its decision, feeling assured that this tribunal will see that the laws shall be enforced and justice secured.

WADE HAMPTON.

On the 24th proceedings for contempt were begun in the Supreme Court against the board, and on the following day each member of the board was fined \$1,500, and ordered to be committed to the jail of Richland County until further orders of the court. On the 27th the members of the board were brought into the United States Circuit Court, before Judges Bond and Bryan, on *habeas corpus* proceed-

ings. The application for the writ was based on the ground that the board were discharging the duties of appointing presidential electors, when the Supreme Court of the State interfered with them. On December 11th Judge Bond held that the Supreme Court had no jurisdiction over the members of the board, and ordered their release from custody.

As the time for the meeting of the Legislature approached, it was thought that the presence of United States troops at the State-House would be necessary to preserve the peace, and application to that effect was made to the President by Governor Chamberlain. The following order was then issued to the officer in command of the Federal troops:

WASHINGTON, D. C., November 26, 1876.

General THOMAS H. RUGER, or Colonel H. M. BLACK,
Columbia, S. C.

The following has been received from the President:

EXECUTIVE MANSION, November 26, 1876.

Hon. J. D. CAMERON, Secretary of War.

SIR: D. H. Chamberlain is now Governor of the State of South Carolina beyond any controversy, and remains so until the new Governor shall be duly and legally inaugurated under the constitution. The Government has been called upon to aid, with the military and naval forces of the United States, to maintain republican government in the State against resistance too formidable to overcome by State authorities. You are directed, therefore, to sustain Governor Chamberlain in his authority against domestic violence until otherwise directed.

(Signed)

U. S. GRANT.

In obeying these instructions you will advise with the Governor, and dispose your troops in such manner as may be deemed best in order to carry out the spirit of the above order of the President.

Acknowledge receipt.

(Signed)

J. D. CAMERON,
Secretary of War.

When the Legislature met to organize on the 28th, troops were stationed in and around the State-House. Governor Chamberlain had instructed United States Marshal John C. Dennis to admit to the State-House, on the day of the assembling of the Legislature, only persons having official business. Orders had been issued by Mr. Jones, Clerk of the former House, that only members having certificates of election from the Secretary of State should be admitted to the Hall of the House of Representatives. On the day of the assembling of the Legislature, 64 Democratic members, including those from Edgefield and Laurens Counties, applied for admission to the Hall of Representatives. The members from Edgefield and Laurens had not received certificates of their election from the Secretary of State, but had obtained certificates from the Supreme Court. They were therefore refused admission to the Hall, whereupon the entire body of Democrats withdrew to the front of the State-House, and read the following protest:

We, a majority of the members of the House of Representatives elect, protest against the refusal to admit us to the Hall of Representatives. We protest against the military power of the United States

barring the passage into the State-House of members-elect of the Legislature. We protest against the legality of the proceedings, and especially against the army of the United States being placed for the purpose of this exclusion under the command of one John B. Dennis, a partisan of Governor Chamberlain. We protest against the said Dennis's instructions to the guard to admit no one to the State-House except upon his own pass or a pass of A. O. Jones, the former Clerk of the House, who may thus exclude all except his own partisans, and who, by the Republican programme, is to organize the said House.

We have presented ourselves with the judgment of the highest court of South Carolina, certified to by its clerk, with the great seal of the court attached, as to our right to participate in the organization of the said House. We are refused, by the orders of the said Dennis, admission to said Hall, except upon his pass, the pass of said Jones, or the certificate of H. E. Hayne, Secretary of State, who is now under condemnation of said court for refusing to issue certificates in accordance with its judgment and mandate.

In protesting against this barefaced usurpation, this trampling on the laws and the constitution of the State, this defiance of the highest tribunal of the State, it is our purpose to offer no resistance to this armed intervention, but to make our solemn appeal to the American people, without distinction of party. Our veneration for law, our respect for the Supreme Court, and the usages of all legislative assemblages, forbid our participation in such unprecedented and revolutionary proceedings.

The Republican members, 59 in number, of whom 54 were colored, proceeded to organize the House. E. W. M. Mackey was elected Speaker. The whole number of members of the House is 124. But it was claimed that, excluding the members from Edgfield and Laurens, the number of members having lawful certificates of election was 116, and that a majority of this number, 59, constituted a quorum of the House.

The Senate also organized with a slight Republican majority, and reelected General Swails (Republican) President.

The 64 Democratic members of the House, after withdrawing, proceeded to Carolina Hall, and organized with William H. Wallace as Speaker. On the 30th they assembled in the Hall of the House of Representatives, and for several days both Houses were in session at the same time in the same hall. On December 4th the Democrats withdrew to Carolina Hall.

On December 1st General Ruger addressed the following to General Sherman :

COLUMBIA, December 1, 1876.

W. T. SHERMAN, or Secretary of War, Washington, D. C.

I have carefully abstained from interference with the organization of the House from the first. On the application of the Governor, and on my own belief of the necessity therefor for the preservation of peace, I placed troops in the State-House, but not in the rooms of either of the Houses. On the day of the meeting it came about that soldiers were placed on either side of the door of the entrance of the Hall of Representatives, under the following circumstances: A person at the door of the House, who claimed authority to review certificates of those claiming to be members prior to their admission to the Hall, but who had no legal authority for so doing, applied to an officer in command of troops placed

in the corridor for the preservation of peace, for assistance, on the ground that he was being pressed upon and could not perform his duty; soldiers were placed as stated. As soon as I was fully informed of the circumstances, I ordered the soldiers to withdraw, as I had previously informed Governor Chamberlain that I should confine my action to the preservation of the peace, and should do nothing with reference to keeping the doors of the rooms of meeting of the Houses or with the rooms themselves, unless it became necessary because of a breach of the peace with the civil officers of the Houses, which they should be unable to restore. No act was done by soldiers except that of their presence as stated, but, while they were so present, persons claiming the right of entrance, under the certificate of the Clerk of the Supreme Court, were refused admission.

(Signed) THOMAS H. RUGER,
Commanding Department.

On the 7th the Democratic House passed the following resolution :

Whereas, This House has seventy-one members, sixty-three of whom hold as their credentials certificates from the Secretary of State, and eight of whom hold certificates from the Supreme Court, constituting a quorum under the constitution and laws of the State :

And *whereas*, also, the Supreme Court, the highest judicial authority in the State, has unanimously decided that this is the lawful, constitutional House of Representatives of the State of South Carolina, and that there can be no other :

Resolved, That a committee be appointed to wait upon the officer in command of the United States troops in South Carolina, and inform him of these facts, and request the removal of the United States soldiers from the State-House; and also to ascertain what obstacle, if any, prevents the legal House of Representatives from occupying the hall in the Capitol intended for the House of Representatives.

A committee was then appointed to wait on General Ruger and inquire by whose authority troops were stationed in the State-House, and whether the troops would resist the entrance of the Democratic members into the Hall of Representatives.

General Ruger replied as follows :

COLUMBIA, S. C., December 8, 1876.

To the Hon. F. A. CONNER and others.

GENTLEMEN OF THE COMMITTEE: I have the honor to say in reply to your inquiries, based upon the resolution of which you handed me a copy on yesterday, that the United States troops in the State-House were placed there by my order for the purpose of executing such orders as might be given; and in this connection I would say, with reference to the inquiries numbered six and seven, that if your body should appear at the State-House for the purpose of entering the Hall of the House of Representatives, and should be refused admission by those having charge of the doors, and such persons should apply to the officers in command of the troops at the State-House for assistance necessary to prevent your entering, the present orders to the officers would require them to render such assistance. I am, gentlemen, your obedient servant,

THOMAS H. RUGER,
Colonel and brevet brigadier-general, Department of the South.

Mr. Wallace now applied to the Supreme Court for a mandamus to compel Secretary of State Hayne, and Mackey, to deliver to him (Wallace) the election-returns for Governor and Lieutenant-Governor. But Hayne had

delivered the returns to Mackey as Speaker of the House, and the court held that Mackey was a private citizen and not the Speaker of the House, and therefore mandamus could not issue. The court, however, adjudged Mr. Wallace the lawful Speaker of the legally-constituted House of Representatives.

On the 5th of December the Senate and the Republican House canvassed the votes for Governor and Lieutenant-Governor, and declared D. H. Chamberlain to have been elected Governor, and Richard H. Gleaves Lieutenant-Governor. The vote of Edgefield and Laurens Counties was excluded. According to the declaration, Chamberlain had received 86,216 votes, and Hampton 83,071: Chamberlain's majority, 3,145. For Lieutenant-Governor Gleaves had received 86,620 votes, and Simpson 82,520: Gleaves's majority, 4,100.

On the 7th Governor Chamberlain was sworn into office by Probate Judge Boon.

On the 12th Speaker Wallace, having given notice to the Senate for that purpose, and in presence of the Democratic House of Representatives, and of such Senators as chose to attend, proceeded to canvass the votes for Governor and Lieutenant-Governor. He did not have the original election returns, but had a certificate of the Secretary of State of the votes cast for Governor and Lieutenant-Governor, and duplicate returns filed with county clerks. Wade Hampton was declared Governor, having received 92,261 votes, to 91,127 cast for Chamberlain; and William D. Simpson was declared Lieutenant-Governor by a vote of 91,689, to 91,550 cast for R. H. Gleaves. The oath of office was administered to Hampton and Simpson by Trial-Judge Mackey.

Governor Hampton now addressed the following to Governor Chamberlain:

STATE OF SOUTH CAROLINA, }
 EXECUTIVE CHAMBER, COLUMBIA, December 18, 1876. }
 SIR: As Governor of South Carolina, chosen by the people thereof, I have qualified in accordance with the constitution. I hereby call upon you, as my predecessor in the office, to deliver up to me the great seal of the State, together with the possession of the State-House, the public records, and all other matters and things appertaining to said office. Respectfully your obedient servant,

WADE HAMPTON, Governor.
 D. H. CHAMBERLAIN, Esq.

To which Governor Chamberlain replied:

STATE OF SOUTH CAROLINA, }
 EXECUTIVE CHAMBER, COLUMBIA, December 18, 1876. }
 SIR: I have received the communication in which you call upon me to deliver up to you the great seal of the State, etc., etc. I do not recognize in you any right to make the foregoing demand, and I hereby refuse compliance therewith. I am, sir, your obedient servant,
 D. H. CHAMBERLAIN,
 Governor South Carolina.

WADE HAMPTON, Esq.

On the 19th the Democratic Senators and Representatives, 79 in number, elected M. C. Butler as United States Senator. The Republican Senate and House had previously elected D. T. Corbin as United States Senator.

At the beginning of 1877 both State govern-

ments and the two Houses of Representatives were in existence. Governor Hampton, however, appeared to be recognized by the civil and judicial officers of the State as the lawful Governor.

The condition of affairs in South Carolina was one of the first matters that engaged the attention of President Hayes. Both Chamberlain and Hampton were invited to Washington by the President for personal conferences. The President finally determined to withdraw the United States troops from the State-House at Columbia. The troops were accordingly withdrawn on the 10th of April, and on the same day Governor Chamberlain issued a proclamation declaring that he should no longer assert his rights to the gubernatorial office. The State government was peaceably turned over to Governor Hampton and the other State officers elected on the ticket with him.

SPAIN, a kingdom of Southern Europe. King, Alfonso XII., born November 28, 1857; proclaimed King December 30, 1874. The area of Spain is 195,774 square miles; the population in 1870 was 16,885,506. The area of the Spanish colonies* is 117,209 square miles; the population, 8,098,610.

The public debt and its annual interest were, according to a notice published by the Government in the "Guia oficial de España" of 1875, as follows, in December, 1871, and in June, 1875 (value expressed in reales, 1 real = 5 cents):

TIME.	Capital of Debt.	Interest.
December, 1871.....	29,784,596,152	810,211,218
June, 1875.....	40,975,987,607	1,066,252,927

The Spanish army is to consist, in time of peace, of 100,000 men, of whom 69,492 will belong to the infantry, 16,130 to the cavalry, 10,232 to the artillery, and 4,146 to the corps of engineers. The fleet, in 1875, was composed as follows:

NAVY.	Guns.	Horse-power.
VESSELS OF THE FIRST CLASS.		
6 iron-clads.....	105	4,900
10 screw-frigates.....	413	5,380
2 wheel-steamers.....	82	1,000
VESSELS OF THE SECOND CLASS.		
10 wheel-steamers.....	48	8,130
10 screw-steamers.....	47	1,920
2 transports.....	..	600
VESSELS OF THE THIRD CLASS.		
1 iron-clad monitor.....	3	260
1 swimming battery.....	5	80
18 screw-steamers.....	45	2,760
85 gunboats.....	85	1,400
8 wheel-steamers.....	14	907
4 screw transport-vessels.....	..	580
VESSELS NOT CLASSIFIED.		
2 steamers.....	4	810
29 fuerzas sutiles.....	89	1,214
188	790	24,891

* For a detailed account of the area and population of each of the colonies, see ANNUAL CYCLOPEDIA for 1874.

The aggregate length of the railroads in operation amounted, on January 1, 1876, to 5,796 kilometres (1 kilometre = 0.62 mile); the aggregate length of the telegraph-lines, on January 1, 1874, to 12,020 kilometres; that of the wires to 27,114 kilometres. Cuba has about 640 kilometres.

The campaign against the Carlist insurrection was carried on with incessant activity during the first two months of the year. In the first days of January, the Council of Ministers, under the presidency of the King, settled the plans for a general movement against the Carlist posts, which were at once carried into execution. On the 7th of January a notification was given to masters of British vessels, warning them to keep away from the whole Spanish coast east of Bilbao, as Carlist batteries were stationed at intervals all along the shore, and fired at everything that approached.

This action excited unfavorable comment in the English papers, which insisted that the Spanish Government should be held responsible for all damage to the shipping or property of other nations, by whomsoever inflicted. The siege of Hernani by the Carlists was raised about the beginning of January. On the 25th of January the royalists made a movement as if toward Vera. They were met by the Carlists, and a sharp engagement took place. This movement, however, it afterward appeared, was only a feint, to cover a real attack on Guetaria, the only point which the Carlists had held on the Cantabrian coast, west of St. Sebastian, since the beginning of the war. General Moriones, of the Government troops, returning to St. Sebastian, embarked two battalions, which landed at Guetaria on the 26th, and captured the height of Garatemondi, commanding the town of Guetaria. The Carlists

THE ESCURIAL.

fled without firing a shot. This was a very important capture, and gave many strategical advantages to the troops of the Government in their operations in Biscay. On the 1st of February General Quesada reached Bilbao, having marched through Biscay without meeting serious resistance, and having on his march destroyed powder and cartridge manufactories, and occupied Dima, Arteage, and Cenauri. At about the same time Durango was captured by General Loma. The Alfonsist forces had now almost entirely gained the provinces of Biscay and Alava, while General Martinez occupied the whole valley of the Bistan, intercepting the communication of the Carlists with France. The Carlists endeavored to concentrate their troops in Navarre and Guipúzcoa. On the 18th of February, General Quesada, of the royalist forces, advanced from Durango and found the

Carlists strongly intrenched at Elgueta. After five hours' hard fighting the Carlist positions were carried, and the Carlists retreated upon Azpeytia. General Quesada pursued them as far as Vergara, which he occupied in force. Simultaneously with these operations, General Loma moved from Marquina, breaking the Carlist lines on the river Deva, and General Moriones, advancing from the north, entered Zumarraga, and occupied the heights commanding Aya and Cestona. General Moriones effected a junction with General Loma, and captured Azpeytia, driving the Carlists toward Tolosa. On the 17th of February the Carlists were quite encircled by the royalists; the forces of General Campos were concentrated between Elizondo and the valley of the Oyarzun; the brigade of General Navazcues was at Irun; another brigade was concentrated between

Renteria and Oyarzun; on the south an army corps was advancing from Pamplona toward the mountains near Leiza; and in the west Moriones occupied important places near Tolosa.

On the 18th General Primo de Rivera had made such captures as gave him a complete line to the south of Estella. About the 20th of February King Alfonso took the command of the army in person. On the 19th the Carlist stronghold at Estella, the most important of their posts, surrendered unconditionally. With this position was captured a large part of the Carlist artillery. The Carlists were very much demoralized. Numbers of them fled to France, and their minor posts fell rapidly into the hands of the royal troops. On the 21st of February the royalists had carried all the heights near Tolosa, and the King entered the town in triumph. The Pope advised Don Carlos to stop fighting, now that success was hopeless. Hernani next fell into the hands of the Government. The Carlist forces were disbanded, and surrendered in parties at Tolosa and Pamplona, February 25th. The Senate, February 21st, passed a vote of thanks to the army for its services, and on the 23d a *Te Deum* was sung in the cathedral at Madrid in honor of the King's entry into Tolosa. On the 28th of February Don Carlos crossed the frontier at Arnéguy into France, having previously informed the French commanding officer at Bayonne of his intention. In his letter to that officer he declared that, having been conquered by adverse fortune, he had resolved to abandon further struggle as useless. As soon as he entered France the general commanding the department informed him that he and his officers might retain their swords and horses, but would have to submit themselves to the orders of *internment*, which would be communicated to them by the civil authorities. At Pau Don Carlos was informed by the prefect of the Basses-Pyrénées that he would not be allowed to remain even for a short time in that department, but might sojourn temporarily in a town in the north of France. He went to Boulogne without stopping at Paris, and departed thence, March 8d, for England. While in France he issued a manifesto to the Spaniards, in which he said: "Desiring to stop bloodshed, I forbear continuing a glorious but at present fruitless struggle. Seeing the sufferings of my volunteers, and the superiority of numbers against them, it becomes necessary to sheathe the sword. I will never sign a compromise. My flag remains folded until the moment which God shall fix as the supreme hour of redemption." Since his defeat Don Carlos has traveled in various countries. He spent a few weeks during the summer in the United States.

The King, after the conclusion of the war, made a march through the northern provinces at the head of a division of the army. Returning to Madrid, he entered the city in tri-

umph, March 20th, amid brilliant festivities and great popular rejoicings. Two days before this the Chamber of Deputies had voted the reply to the address from the throne, in which the King was styled *El Rey Pacificador*.

The elections for the new Cortes, which were begun January 20th, were attended with considerable excitement, but resulted in a signal triumph for the ministerial party, who secured a very large majority of the Deputies. Of the 406 Deputies chosen, the Opposition returned only 63, of whom 30 were classed as moderados, 30 as constitucionals, one was a radical, one a cantonalist, and one (Señor Castelar) a moderate republican.

The Cortes was opened, February 15th, by the King in person. In his speech his Majesty referred to the approaching end of the Carlist rebellion, and to his intention of going to the army in person, and spoke of the relations of the Government to foreign powers as being friendly. The representatives of Spain at the Vatican were engaged in regulating pending questions in a manner required by the interests of the Church and the state. The financial condition of the country had been much impaired. The integrity of the Cuban territory would be upheld; 82,000 troops had been sent to that island since the accession of his Majesty. The Cuban War had not prevented the emancipation of 76,000 slaves. The King claimed that, in view of the rapid wane of the Carlist insurrection, and the growing feebleness of the insurrection in Cuba, his short but difficult reign had not been without avail for the public good, and concluded with the words: "The efforts of Spain to preserve her place in the world show what she will accomplish when her strength is no longer wasted in sterile agitations. Heaven grant a speedy recompense for our painful sacrifices!" Señor José de Posada Nerrera was unanimously chosen President of the Chamber of Deputies.

The religious question formed the chief point of discussion in the debates on the proposed new Constitution. Article XI established religious tolerance for non-Catholic beliefs in the interior of places of worship and cemeteries, but interdicted all public manifestations, at the same time declaring the Roman Catholic to be the religion of the state. The article was attacked by the extremes of both sides. The clerical party opposed it on the principle that, in a country so wholly Catholic as Spain, tolerance of other beliefs ought not to be granted. The Liberals, under the lead of Castelar, were dissatisfied, because it did not go far enough, and establish entire religious freedom. On the 15th of March Señor Calderon Collantes, Minister of Foreign Affairs, speaking in the Cortes on this question, said that the Government "trusted to the wisdom of the Pope and his affection for Spain," and hoped that Providence would prevent so eminently a Catholic nation from being divorced from the common head of the faithful.

Señor Sagasta defended religious toleration, which, he declared, the Vatican would never consent to grant, though it would "accept accomplished facts." A few days afterward the Pope sent to the Cardinal Archbishop of Toledo a protest against the proposed article of the Constitution, and wrote an autograph-letter to King Alfonso on the subject. In May the King wrote to the Pope, assuring him that Spain was thoroughly Catholic, and that no danger threatened the supremacy of the Church from the proposed article. He also claimed that the article was not opposed to the spirit of the Concordat of 1851. The article was, however, generally favored by statesmen, and was passed by the Deputies, May 12th, by a vote of 220 to 84. The negative votes were given chiefly by the Clericals and the left wing of the Liberals. The Constitution of which this article formed so important a part was the one which was drawn up by the Commission of Notables in 1875, and of which a summary was given in the ANNUAL CYCLOPÆDIA for 1875. It was formally submitted to the Cortes for ratification in the latter part of March. The article declaring the government of the country to be a monarchy, and confirming the title of the King and the established rule of succession, was adopted before the adjournment for the Easter holidays, with only four dissenting votes. In the debate which preceded the vote of adoption Señor Canovas del Castillo said that the King could not receive his legitimacy from the Cortes which he had himself convoked, because his right could not be called in question, being of anterior origin. In May, Article XII., concerning the freedom of religious institutions, and Article XXVII., concerning the direct vote and the reëligibility of the representatives of the people, were adopted in the shape in which the Government had proposed them. The other provisions were adopted without material alteration, and the Constitution was approved as a whole by the House of Deputies early in June. On the 22d of June the Senate, having approved Article XI., relating to religious toleration, by a vote of 113 to 40, adopted the Constitution as a whole by a vote of 127 to 11. The Constitution was then approved by the King, and proclaimed in the beginning of July.

Immediately after the suppression of the Carlist rebellion, the Government was confronted with formidable difficulties growing out of the special privileges possessed by the Basque provinces and Navarre, by the operation of which these districts each constituted in effect a state within a state. Señor Sanchez Silva, demanding in the Senate the suppression of those privileges, charged that they had been the cause of the civil war. A measure to establish unity of administration in these provinces with the neighboring provinces was introduced in the Cortes early in March. The proposition excited great opposition among the people in the provinces to be affected by it, not less among

those who had been supporters of the Government throughout the rebellion than among those who had adhered to the Carlist cause. The juntas of the principal towns in these provinces adopted resolutions protesting against the measure, and appointed delegations to go to the capital to oppose it with the Government. The threat was even made that, if the *fueros* were curtailed, the Basque provinces would seize the first favorable opportunity of definitely separating from Spain and proclaiming their independence under foreign protection. The minister-president held several conferences with the Basque deputations, with a view to devising an harmonious adjustment of their claims with the objects sought by the

BASQUES.

Government, without satisfactory result. He proposed to limit the operation of the measure to the subjection of the provinces, to the general imposition of taxes, and to the general law of military duty, while their special democratic communal constitutions should be left unaffected. The delegates could not be reconciled to the measure, and returned to their homes dissatisfied. The scheme which was finally proposed by the Government went further than had been at first intended, and contemplated changes in the communal constitutions. The bill, as finally modified, was passed by the Senate late in June, by a vote of 97 to 4. The bill was passed by the Deputies in July, just before their adjournment for the summer. The act was received with disfavor by the Basque people. A few small outbreaks occurred, which were quickly suppressed. In November, General Loma issued a proclamation, calling upon the inhabitants to deliver all arms in their possession to the authorities.

The Minister of Finance, Don Pedro Salaverria, presented the budget in the Cortes, April 22d. The revenue for the year was estimated

at \$132,600,000, and the expenditures at \$180,800,000. Of the latter amount, \$34,400,000 would be required for the service of the national debt, and \$30,140,000 for the war and naval departments. The consolidated debt of the nation amounted to about \$1,966,800,000 (9,833,000,000 pesetas), and the floating debt to \$303,600,000 (1,518,000,000 pesetas), and there was a balance in the Treasury of \$18,600,000 (493,000,000 pesetas). In July the Budget Committee approved the following bases for the consolidation of the external and internal debts, viz.: an interest of one per cent. to be paid from January 1, 1877, and an additional one-quarter per cent. from January 1, 1892. Subsequently to the latter date, the Government is to negotiate with the creditors of Spain for a definitive consolidation of the debt. The four overdue coupons, and the one falling due on January 1, 1877, will be capitalized into a stock bearing an annual interest of two per cent., and to be redeemed within fifteen years.

The ex-Queen Isabella landed at Biscay, on the 28th of July, setting her foot again on Spanish soil for the first time since her expulsion by the Revolution of 1868. She established her residence at Santander. Toward the end of September she went to the Escorial, and in October made a visit to Madrid, where her arrival was noticed with some ceremony. Queen Christina having also returned to Spain in May, and settled herself at La Granja, there were, in September, three rival courts in the country striving for the controlling influence with the Government, viz.: the official court, represented by the King himself, and the ministry of Señor Canovas del Castillo; the court of Queen Christina, supported by partisans of Espartero; and the court of ex-Queen Isabella, sustained by the clergy, Sagasta, Serrano, and General Novaliches, which was the most active of all.

These movements were followed by a reaction in the policy of the Government on the question of religious toleration. The narrowest possible interpretation was given to Article XI. of the new Constitution, which had heretofore been considered to allow a free enjoyment of non-Catholic worship, so long as it did not extend to prominent public demonstrations. On the 19th of August, the Governor of Mahon issued a notification that no announcements of Protestant schools should be printed or published, since such announcements were expressly forbidden in the Constitution. Shortly afterward the governor forbade loud singing in the Methodist chapels. Early in September the Government addressed a circular to the Protestant ministers, forbidding all public manifestations of the dissenting religious bodies outside of the churches, and defining as among such manifestations all display of religious ceremonies, rites, usages, and customs, processions, notices, banners, and emblems mentioned in the public-worship clause

of the Constitution. Dissenters were required to give information to the authorities forty-eight hours before opening a place of worship or a cemetery, and to make known the names of the directors and rectors of the same; these officers must inform the authorities, within forty-eight hours afterward, of the temples or cemeteries having been opened. Schools might be independent of the churches in legal matters, but their directors should be Spaniards who had taken academical degrees. Foreigners would be treated as inviolable, and meetings in the chapels would not be interfered with, except in the case of the schools which remained subject to the Government. Other meetings, not authorized by the Government, were liable to be suppressed by the police. The Minister of Foreign Affairs addressed a circular, relative to the question of religious toleration, to the representatives of the Government at the foreign courts. After defining the terms of Article XI. of the Constitution, which, while recognizing the Roman Catholic as the religion of the state, provided that private worship should be permitted to non-Catholic creeds, but public manifestations should be forbidden them, the circular stated that notices placarded in places outside of the church, announcing the hours of service, were considered to be public manifestations within the meaning of the prohibition. The public streets were under the jurisdiction of the state, and it must preserve order there. For justification of the repression which had been exercised in the Balearic Islands (at Mahon), the circular asserted that an anti-Spanish or separatist propaganda had been carried on under the shelter of religious liberty, which had compelled the authorities of the island, while respecting tolerance within the church-edifices, to adopt measures which had the full approval of the Government.

The Cortes met again on the 6th of November. The ministry were subjected to sharp attacks by the Opposition, but were secure in a well-organized majority of the Deputies. On the 15th the Minister of the Interior introduced a bill restoring the electoral law formerly in force, the effect of which would be to abolish universal suffrage, to establish voting by departments, and to grant the suffrage only to persons paying a certain annual amount of direct taxes, or to the members of certain professions. In reference to external politics, the Ministerial Council made a declaration that Spain would not mingle in European troubles, for the blood of its sons could be shed only for national objects. A motion introduced by Señor Sagasta, declaring that the Government had given a false interpretation to the paragraph of the Constitution respecting religious toleration, was rejected by a vote of 183 to 40. The Minister of War presented a bill making military service obligatory, and providing that the standing army should never be less than 100,000 men. The period of service should be

eight years—four in the standing army and four in the reserve. In December, stirring debates took place on the situation in Cuba, and on the question whether a funeral service should be given in honor of the late Duchess of Aosta, wife of the ex-King Amadeus. The funeral service was denied. At the beginning of the year Señor Cardenas was appointed Spanish ambassador to the Vatican. He was received by the Pope in February, and diplomatic relations were restored between the two courts. In April, the Minister of the Marine, Señor Duran y Lira, resigned his office, partly, it was stated, on account of his health, partly because he disapproved of the principle of religious tolerance contained in Article XI. of the new Constitution. He was succeeded by Señor Bautista Antequera, Vice-Admiral of the Fleet. Señor Antequera had held a commission in the fleet since 1839, had been in command of several men-of-war, had served two years in the Philippine Islands, and had been Vice-President of the Admiralty Board. He had also at one time served provisionally in the ministry, and was understood to be a warm supporter of the administration of Señor

Canovas del Castillo. In July, Don José Barzanalla was appointed Minister of Finance.

On the 3d of February General Malcampo, Governor and Captain-General of the Philippine Islands, left Manila at the head of an expedition, numbering 8,000 men, to punish the Sooloo pirates. In March the expedition secured a very successful result by defeating the pirates, with a loss of 500 men to the Spaniards.

A circular, addressed by the Government of the United States to the European powers, inviting them to consider the situation in Cuba, in view of the long-continued failure of Spain to suppress the insurrection there, and the danger to peace and damage to commerce resulting from it, made a deep impression on the Spanish Government. It replied with a note, also addressed to the powers, somewhat indignant in tone. It assumed that the Government of the United States had no cause of complaint, and no just reason to invite attention to the affairs of Cuba; that American commerce, instead of having diminished by the insurrection, had in reality increased and prospered, and was greater than it was before the

CITY OF HAVANA, CUBA.

insurrection broke out. Moreover, many American citizens had established themselves in business on the island, had been unmolested by the Spanish authorities, and had gained large fortunes, which, however, had not added to the material wealth of the island, as they were owned abroad. The note further complained that Cuban outlaws found refuge in the territory of the United States, to the detriment and injury of the Spanish Government; and added that all just and equitable claims between the United States and Cuba had been amicably adjusted, or were in the courts for adjustment.

On the 8d of February the Minister of Foreign Affairs addressed a circular to the foreign powers on the condition of affairs in Cuba, the objects of which were to correct the errors propagated by the insurgents as to the result; to demonstrate the fatal consequences of any other solution than the suppression of the insurrection by Spain; to show the effect of the insurrection on the prosperity of the island and on international commerce; to enumerate the means of repression possessed by Spain; and to show that, in spite of domestic troubles, successive Spanish administrations, if they had

not mastered, had confined and weakened, the insurrection. The note traced the history of the revolt, which began in 1868. The insurgents at that time not proclaiming independence, but applauding Prim and the Revolution, several Spaniards joined the movement, ostensibly of fraternization, but leaders hostile to Spain soon gave it a separatist character. Some of the creole youth sympathized with it, supposing a white republican government could be established in a country where negro slaves formed the majority. Political and administrative reforms were first demanded, but, though Spain had made more concessions than any European government had given its colonies, the insurgents did not disarm, but increased in numbers. At the outset, property was respected; but all the leaders had fallen in the struggle and had been succeeded by foreigners, while the insurgents constituted a motley horde, of whom the Cuban whites in arms did not exceed 800. The revolt had become a war of race. The insurgents burned and laid waste all they could find. Their triumph would be a blow to civilization; and the Cubans abroad, who sympathized with them, could not constitute a government. The triumph of Spain would speedily lead to the abolition of slavery, as had been done in Porto Rico. In spite of the revolt, a third of the slaves had been already emancipated. Since King Alfonso's accession, a year before, Spain had sent 24,445 soldiers to Cuba, and Carlism once suppressed, the army would be considerably reinforced. It now consisted of 278 superior officers, 3,054 subalterns, 68,115 privates, 8,478 horses, 462 mules, and 42 guns, besides 10,370 men since dispatched. The naval force comprised 45 vessels, with 182 guns and 2,426 men, and the local volunteers numbered 50,000; whereas the native insurgents were under 1,000, while 40,000 natives are fighting for Spain. The struggle was prolonged owing to the nature of the country, and because the negroes and mulattoes, semi-savages, with none of the wants of regular troops, lived on plunder and wild fruit and animals. The effects of the insurrection were doubtless deplorable; nevertheless, the wealth of the island had not sensibly diminished. This was due to the fact that the insurgents had not been able to invade the plantations of the western provinces. Even in the eastern department the plantations around Santiago had been preserved by the presence of troops, and all the railways were working. The property of several foreigners had been confiscated on account of the insurrection; but the Spanish Government had never approved this measure, and had ordered the sequestrations to be immediately raised.

In August a convention was concluded with several Spanish capitalists for an advance of from fifteen to twenty-five million piasters, to be devoted to the expenses of the war in Cuba. As cooler weather approached, large shipments of troops were made to Cuba. In October

General Martinez Campos was appointed commander of the troops in the island, while Jovellar, as Governor-General, was left in the control of civil affairs. General Campos went out accompanied by a force of 14,000 men and a squadron of five vessels. One month later, it was reported that 21,000 soldiers had been shipped to Havana. Late in December the Cortes approved a loan for the suppression of the Cuban rebellion.

The relations of Spain and the United States, which seemed threatening at the beginning of the year, assumed at its close a peaceful and even friendly character. In September William M. Tweed, a fugitive from justice from the State of New York, and his cousin who was traveling with him, were arrested at Vigo and returned to the United States, although there was no extradition treaty between the countries. An extradition treaty was negotiated during the later months of the year, was ratified, and was published in January, 1877, which is more definite and satisfactory in its provisions than any other existing treaty of the kind.

SPRAGUE, WILLIAM BUELL, an American clergyman; died at Flushing, L. I., May 7, 1876. He was born in Andover, Conn., October 16, 1795. He graduated at Yale College in 1815, studied in the Theological Seminary at Princeton, and in August, 1819, was ordained pastor of the First Congregational Church at West Springfield, Mass., as a colleague of the Rev. Joseph Lathrop, whom he succeeded as pastor in 1820. In 1829 he was installed pastor of the Second Presbyterian Church at Albany, N. Y. He resigned this charge in 1869, and removed to Flushing, N. Y. He made large collections of pamphlets and autographs, the former of which he presented, in 1875, to the State Library at Albany. He published "Letters to a Daughter" (1822), republished under the title "The Daughter's Own Book;" "Letters from Europe" (1828); "Lectures to Young People" (1830); "Lectures on Revivals of Religion" (1832); "Hints on Christian Intercourse" (1834); "Lectures illustrating the Contrast between true Christianity and various other Systems" (1837); "Life of E. D. Griffin" (1838); "Life of Timothy Dwight, D. D., President of Yale College," in Sparks's "American Biography" (1845); "Letters to Young Men, founded on the History of Joseph" (second edition, 1845); "Aids to Early Religion" (1847); "Words to a Young Man's Conscience" (1848); "Women of the Bible" (1850); "Visits to European Celebrities" (1855); "Annals of the American Pulpit," a collection of biographies of leading clergymen of all denominations (9 vols., 8vo, New York, 1856-'69); and "Memoirs of Rev. John and W. A. McDowell, D. D." (1864).

STAHR, ADOLF WILHELM THEODOR, a German scholar, born October 22, 1805; died October 3, 1876. In 1826 he was appointed assistant and two years later ordinary teacher in

the Pädagogium in Halle. In 1836 he received a call as co-rector and professor in the gymnasium in Oldenburg, where he devoted himself in his leisure hours to the history, criticism, and explanation of the works of Aristotle, and published, as the fruits of his studies, "Aristotelia" (2 vols., 1830-'32) and "Aristoteles bei den Römern" (1834). At the same time he contributed a large number of articles to the *Hallische Jahrbücher*. In 1852 he went to Berlin, and there married, in 1855, Fanny Lewald, the celebrated novelist. From this time on he devoted himself exclusively to literature. Among his works are: "Ein Jahr in Italien" (3 vols., 1847-'50; third edition, 1875); "Torso, oder Kunst, Künstler und Kunstwerke der Alten" (2 vols., 1854-'55; English translation in the *Crayon*, New York, 1858-'59); "G. E. Lessing, sein Leben und seine Werke" (2 vols., seventh edition, 1873; English translation, Boston, 1866); "Bilder aus dem Alterthum" (4 vols., 1863-'66); with his wife, "Ein Winter in Rom" (1869; second edition, 1871); "Lebenserinnerungen" (1870, *et seq.*); "Tacitus' Geschichte der Regierung des Kaisers Tiberius übersetzt und erklärt" (1871); "Goethe's Frauengestalten" (for Kaulbach's "Goethe-Gallerie;" 2 vols., fifth edition, 1875); and "Tiberius' Leben, Regierung und Charakter" (1874). A collective edition of his works was commenced in Berlin in 1871.

STATISTICAL CONGRESS, INTERNATIONAL. The International Statistical Congress met at Pesth, Hungary, on the 1st of September. It was opened with an address of welcome by the Archduke Joseph. Minister Trefort was chosen president of the session; Archbishop Haynald and Ministerial Councilor Keleti were selected as his deputies, and a number of vice-presidents were named. Portugal and Brazil, which had never before participated in the Congress, were represented at the present meeting. The United States was not represented, for the reason, as was stated, that the American statisticians were engaged with the present International Exhibition. Secretaries were selected with reference to the use of the German and French languages. Memorials were read of the members of preceding congresses who had died since the last meeting, among whom the most prominent were Quetelet, of Belgium; S. Brown, of England; David, of Denmark; Schnake, of Berlin; O. Horn, of Sweden; L. Wolowski, of France; and the Princess Helena Paulowna, of Russia. On the succeeding days the Congress sat in six sections, for the consideration of the several classes of subjects which were brought before it.

The first section was devoted to the review of theoretical questions, the statistics of population, and of large cities. Three papers were read—by Konek, of Buda-Pesth; Jahnsen, of St. Petersburg; and Levasseur, of Paris—on instruction in statistics. The subject was considered in two directions: with reference, first,

to the diffusion of a certain measure of statistical information; and second, to the development of an interest in the collection of statistics. Resolutions were adopted recommending a course of statistical instruction in the public schools. The next subject taken up was the basis on which tables of mortality should be constructed. A discussion ensued as to whether the actual and floating population, or only the resident population of cities, afforded the better foundation for accurate calculations on this subject. The representatives of the communal bureaux of thirteen of the larger cities represented in the Congress were formed into a sub-section, for the consideration of special questions of communal statistics.

The second section was devoted to statistics of justice. Under this head were considered the subjects of crime, and the effect of different methods of punishment and reformation, and the laws in reference to mortgages. On the former point, the section concluded to recommend the general introduction of *casiers judiciaires*, which should aim to give annual alphabetical lists of criminals sentenced to imprisonment, and of those pardoned or dismissed from the prisons, and similar lists of those who are under the care of societies for released prisoners, and of those out on ticket-of-leave; it also expressed the desire that those condemned by military courts for non-military offenses should be included in the lists. On the subject of mortgage-laws, the section advised the collection of international statistics of the public records, to ascertain the number and value of the landed estates, the changes made each year in titles and incumbrances, the total amount of incumbrances, and the grouping of the same, according to the rate of interest of the single items. Among the cases of change in title, those occurring through expropriation; among changes in incumbrances, those occurring by inheritance, legacy, etc., were recommended to especial consideration.

The third section was engaged with medical statistics. Under this head were considered epidemics, cholera, and the statistics of disease and of mortality. Papers were read by Pettenkofer and Korányi, reviewing the report of the Cholera Commission of the German Empire, and the discussions of the International Sanitary Conference held at Vienna in 1874, and of the Congress of Physicians held at Brussels in 1875. The Permanent International Plague-Commission, which will meet next year in Vienna, was indicated as the proper medium for the concentration of material on this subject. The preparation of a catalogue of places visited by cholera four times or more since 1831, with an account of the mortality at each, was recommended. The statistics of baths, and of mineral and healing springs, were introduced to the attention of the Congress for the first time in this section. Excluding baths in ordinary waters, the situation, the constituents, whether solid or gaseous, the results of thermometrical

measurements, the quantity of water issuing from the springs, the manner of using the waters, the apparatus and furnishing of the curative institutes attached to them, the annual attendance of guests seeking to be healed, and the proportion, reckoned at least approximately, of those who derived benefit from them, were recommended as suitable subjects for inquiry.

The fourth section discussed the statistics of agriculture and forestry. The discussions were chiefly confined to principles, and did not enter largely into details. The suggestion was approved that each Government should monthly (from the 1st of June to the 30th of November, weekly) publish reports of the average market-price of agricultural products, and the amount sold; a report of the yield of the harvest to the end of September, and, with respect to certain crops, to the end of November; and yearly reports of the prices of transportation by railway, highways, and water. The section also recommended accurate inquiry into the harm done by insects. Resolutions were adopted regarding the organization of an international system of statistics of forestry, similar to the plan laid down by Meitzen, of Prussia. The subject of agricultural meteorology was considered with reference to the establishment of meteorological stations, and the organization of a system of meteorological reports in the interest of agriculture. The section resolved to transmit its conclusions to the Meteorological Congress to meet in Rome in 1877.

To the fifth section was referred the subject of industrial statistics. Under this head were discussed the statistics of joint-stock companies, of household industries, and of accidents to the laboring-classes. On the second subject, a distinction was marked in the forms of inquiry between the old national home-industries and the more modern industries, such as work done at home on account of manufacturing enterprises. The third subject was presented by Engel in a paper considering it in three aspects: in reference to the statistics of disease, invalidity, and mortality of the laboring-classes; of the accidents to which they are subject from their occupation; and of insurance against such accidents, and against invalidity originating in internal or external diseases. Another paper was read by Mayrs, on "Institutions for the improvement of the condition of laborers, as connected with industrial establishments."

Commercial statistics formed the subject of the discussions of the sixth section. The section suggested that improvements were needed in the commercial exhibits of several States on many points, some of which are as follows: The universal acceptance of the solar year as the statistical year; the separate exhibit of the traffic by sea, on rivers and canals, by railroads and by other roads; the ascertainment of the point of shipment and the destination of all goods, both in the domestic trade and in commerce by sea; the separate exhibit

of transactions in bullion, or in gold and silver coin; the adoption of the nomenclature recommended at St. Petersburg, as revised by Nessmann, for one hundred and five articles, the trade in which should be separately stated; the distinction of that traffic which is carried on by means of entrepôts from the general trade, etc. The necessity of a legal definition to guarantee the accuracy of the customs-invoices, especially in reference to free goods, with the addition of a penal sanction, was generally agreed in, since commercial statistics are dependent on the correctness of these statements. Five special papers were introduced on the statistics of railroads. The difficulties of arranging an international system of statistics on this subject were discussed, but not solved. It was decided to form an International Commission of fifteen specialists, to cooperate with the Permanent Commission of the Congress, to arrange a plan for such a system of statistics to be laid before the next Congress. The section selected as members of this Commission: Giffen, Brachelli, Keleti, and the directors Schüller and Ivanka, for Austro-Hungary; Becker and Jenke for the German Empire, Oalyvaer for Belgium, Kjär for the Scandinavian kingdoms, Perl and Wendrich for Russia, Bodio for Italy. Appointments for France and the non-European countries were reserved. Brachelli was chosen president of the Commission, and Perl and Bodio vice-presidents.

General sessions were held for the discussion of subjects of general interest. At one held on the 6th of September, notice was taken of the death of the Hungarian statistician Alexis V. Fényes. At the general meeting of the 7th of September, a telegram of greeting was received from the Emperor Francis Joseph, to which Minister Trefort, president for the day, sent an appropriate reply. A few subjects, not included in the programme of the Congress were referred to the Permanent Commission. Among them, the statistics of the press were taken specially in charge by Wenzel, of Berlin, and the statistics of the quantity of the precious metals by Neumann, of Vienna. Invitations were received for the next session of the Congress from Rome, Bern, and the United States.

STEWART, ALEXANDER TURNER, died in New York, April 10, 1876. He was born near Belfast, Ireland, October 12, 1803. He studied at Trinity College, Dublin, but did not graduate; emigrated to New York in 1823, and engaged in teaching. In 1825 he began, at 283 Broadway, a dry-goods business, which has gradually expanded into one of the largest in the world. About 1848 he built the extensive store at the corner of Chambers Street and Broadway, which in recent years has been devoted to the wholesale branch of his business. A few years ago he erected on the block bounded by Ninth and Tenth Streets, Fourth Avenue, and Broadway, the five-story iron building used for his retail business. This

is said to be the largest retail store in the world. The cost of the land and building was nearly \$2,750,000. About 2,000 persons are employed on the seven floors, and the current expenses of the establishment are more than \$1,000,000 a year. Besides these two immense establishments, Mr. Stewart had branch concerns in various parts of the world. During the war, Mr. Stewart's income averaged nearly \$2,000,000. In 1869 he estimated it at \$1,000,000. In 1867 Mr. Stewart was chairman of the honorary commission sent by the United States Government to the Paris Exposition. In March, 1869, President Grant appointed him Secretary of the Treasury, but his confirmation was prevented by an old law, which excludes from that office all who are interested in the importation of merchandise. President Grant sent to the Senate a message recommending that the law be repealed, in order that Mr. Stewart might become eligible to the office; and Mr. Stewart offered to transfer his immense business to trustees, and to devote the entire profits accruing during his term of office to charitable purposes. But the law was not repealed, and it was believed that Mr. Stewart's proposed plan would not effectually remove his disabilities. Mr. Stewart's acts of charity were numerous and liberal. During the famine in Ireland in 1846 he sent a ship-load of provisions to that country. After the Franco-German War he sent to France a vessel laden with flour, for the relief of the sufferers; and in 1871 he gave \$50,000 for the relief of the sufferers by the Chicago fire. He was also one of the largest contributors to the sum of \$100,000 presented by the merchants of New York to General Grant as an acknowledgment of his services during the war. At the time of his death he was pushing to completion, at a cost of more than \$1,000,000, the magnificent structure on Fourth Avenue and Thirty-second Street, New York, intended as a home for working-girls. He was also building, at Hempstead Plains, L. I., the town of Garden City, the object of which was to afford comfortable homes at a moderate cost. At the time of his death Mr. Stewart's wealth was estimated at about \$50,000,000. His real estate in New York City was assessed at \$5,450,000, which did not include property valued at more than \$500,000 on which the taxes were paid by the tenants. He had no blood-relatives, and by his will the bulk of his estate was given to his wife. He bequeathed \$1,000,000 to Judge Henry Hilton, who had long been his confidential and legal adviser, and who was made one of the executors of the will, and appointed to wind up Mr. Stewart's business affairs. Several bequests were made to persons in Mr. Stewart's employ, and to other persons. Mr. Stewart left a letter dated March 29, 1873, and addressed to Mrs. Stewart, saying that it had been his intention to make provision for various public charities, and that he depended on her to carry out his plans in case

he should fail to complete them. After Mr. Stewart's death his mercantile interests were transferred by Mrs. Stewart to Mr. Hilton, who, with Mr. William Libbey, the surviving partner of the firm, continued the business under the firm-name of A. T. Stewart & Co. A short time prior to his death Mr. Stewart had completed, on the corner of Fifth Avenue and Thirty-fourth Street, a marble edifice, which is one of the handsomest private residences in the United States. His art-gallery was one of the most valuable in the country.

STRINGHAM, SILAS HORTON, an American naval officer, died in Brooklyn, N. Y., February 7, 1876. He was born at Middletown, N. Y., November 7, 1798. He entered the navy as midshipman in 1809, became lieutenant in 1814, and served in Decatur's squadron in the Algerine War. Subsequently he assisted in the capture of slaves off the coast of Africa. In command of the Ohio, in 1846, he took part in the bombardment of Vera Cruz. He was in constant service on sea or shore duty till 1861, when he became flag-officer of the Atlantic blockading squadron, and in August cooperated in the capture of Forts Hatteras and Clark, on the coast of North Carolina. He was promoted to rear-admiral on the retired list in 1862, was commandant of the Charlestown Navy-Yard in 1864-'66, and was made Port-Admiral of New York in 1867.

SWEDEN AND NORWAY, two kingdoms of Northern Europe, united under the same dynasty. King, Oscar II., born January 21, 1829; succeeded to the throne at the death of his brother, Charles XV., September 18, 1872; married, June 6, 1857, to Sophia, born July 9, 1836, daughter of the late Duke Wilhelm of Nassau. Oldest son: Gustavus, heir-apparent, Duke of Wermland, born June 16, 1858.

The executive authority is in the hands of the King, who acts under the advice of the ministry, formerly called the Council of State.

The ministry at the close of 1875 was composed as follows: President of the Ministry and Minister of Justice, Baron B. von Geer; Minister of Foreign Affairs, O. M. von Björnsterne; Minister of the Interior, C. J. Thyselius; Minister of Ecclesiastical Affairs, Dr. J. F. Carlson; Minister of War, E. O. von Weidenhielm; Minister of the Navy, Baron F. W. von Otter; Minister of Finances, Dr. H. L. Forssell; and three ministers without portfolio: H. G. von Lagerstråle, C. J. O. Ålströmer, and Dr. J. H. Lovén. The composition of the ministry is essentially the same as that of the old Council of State. In Norway, the King is assisted by a Council of State, consisting of two ministers of state and seven councilors. One section, composed of one minister and three councilors, reside with the King while he remains in Sweden; the others form the Government in Christiania.

The following table shows the area of Sweden, inclusive of inland lakes, according to a new survey by the Swedish general staff, and the population on December 31, 1875:

LÄNS.	Square Miles.	Population.
Stockholm } city	12.63	152,582

The movement of shipping, in 1874, was as follows:

FLAG.	ARRIVALS.		CLEARANCES.	
	Loaded Vessels.	Lasts.*	Loaded Vessels.	Lasts.*
Swedish	4,574	167,563	8,014	251,497
Norwegian	522	27,969	2,109	191,450
Foreign	3,247	157,062	4,675	234,012
Total	8,343	352,598	14,798	676,959

The commercial navy, at the close of 1874, consisted of 3,719 sailing-vessels of 136,432 lasts, and 649 steamers of 18,922 horse-power, and 23,018 lasts.

The railroads in operation, at the close of

CHRISTIANSTAD, SWEDEN.

1875, comprised 1,509 kilometres Government and 2,717 kilometres private roads. There were 2,900 kilometres in course of construction.

The number of post-offices, in 1875, was 1,820; the number of letters sent in 1874, 16,250,000, and the number of valuable letters, 1,980,000. The total receipts amounted to 3,650,000 crowns, and the expenditures to 3,700,000 crowns.

In 1875, the length of lines of the Government telegraphs was 7,959 kilometres, and of wires, 19,377 kilometres. The number of stations was 170. There were, besides, 150 sta-

tions belonging to the railroads, and 201 belonging to private associations. The number of telegrams sent was 645,913 inland, 296,429 international, and 67,197 transit dispatches. The receipts amounted to 1,953,109 crowns.

The area of Norway is 122,280 square miles. A census of the population is taken every ten years. The kingdom is divided into twenty *amts* or provinces, or six *stifts* or dioceses. The area and the actual population of each of these, according to the census of December 31, 1875, were as follows:

* 1 Swedish last = 8.27 English tons.

The receipts for 1875 amounted to 41,386,500 crowns (1 crown = \$0.26 $\frac{1}{4}$), and the ex-

sisted of 91 vessels with 146 guns. The commercial navy, in the same year, consisted of 7,664 vessels of 1,819,734 tons. The railroads in operation, in 1875, amounted to 557 kilometres. The number of Government telegraph-stations, at the close of 1875, was 109; length of lines, 6,480, and of wires, 11,600 kilometres. The number of inland dispatches sent was 469,084; of foreign dispatches sent, 115,654; and of foreign dispatches received, 180,233: making a total of 714,921. Including the railroad-telegraphs, the length of lines amounted to 7,175 kilometres, and of wires to 12,405 kilometres; the number of stations to 171, and the total number of dispatches to 781,482.

The Swedish Parliament was opened by the King on January 19th. In his speech from the throne, referring to his visit in 1875 to Denmark, Germany, and Russia, he laid particular stress on the good feeling entertained by the princes and the people toward Scandinavia, and added that the latter would preserve this feeling by not interfering with foreign rights, but, at the same time, would do everything to preserve its dignity. The First Chamber elected for its president Count Lagerbjelke, and the Second Count Arvid Posse, the leader of the Peasant party. In February both Houses adopted an amendment to the Constitution by which the Council of State was changed into a ministry, with a responsible president at its head. The King, having approved this amendment, appointed as President of the Council Baron de Geer. On May 13th both Chambers adopted the bill introducing the metrical system, and on May 19th Parliament adjourned.

The Storting of Norway met on February 2d, and was opened by the King in person. In March the King ratified the admission of Norway to the Scandinavian monetary union. On May 23d the Storting resolved to contract a loan of 24,000,000 crowns for railway purposes, which is to bear interest at a rate not higher than four and one-third per cent., and is to be payable in from thirty to fifty years. On June 13th the Storting finally adjourned. In November the elections for the Storting resulted in a complete victory for the Opposition.

THE NEW STORTING HOUSE, CHRISTIANIA, NORWAY.

penditures to 39,091,500 crowns. The public debt, on December 31, 1875, was 48,307,600 crowns. The imports, in 1874, amounted to 185,776,000 crowns, and the exports to 121,198,000 crowns. The war navy, in 1874, con-

SWITZERLAND, a republic of Central Europe, consisting of twenty-two cantons, three of which are divided each into two independent half-cantons. The President of the Federal Council for 1876 was Dr. E. Welti, of the

Canton of Aargau, and the Vice-President, Dr. J. Heer, of Glarus. The area of Switzerland is 15,992 square miles, and the population, according to the census of 1870, 2,669,147. The total revenue of the Confederation for 1875 amounted to 42,408,029 francs, and the expenditures to 43,235,696 francs. The budget for 1876 estimated the receipts at 41,487,400

francs, and the expenditures at 42,622,000. The liabilities of the republic amounted, at the close of 1875, to 31,309,486 francs, as a set-off against which there was Federal property amounting to 35,872,955 francs.

In August, 1876, there were 2,243 kilometres of railroads in operation; besides which there were 64 kilometres of foreign railroads on

GENEVA.

Swiss territory. The Post-Office in Switzerland forwarded, in 1875, 51,267,244 inland and 16,808,029 foreign letters, making a total of 68,075,273 letters. The length of the Government telegraph-lines at the close of 1875 was 6,343 kilometres, and of wires 15,517 kilometres, with 1,002 stations. The length of railroad telegraph-lines was 227 kilometres, and of wires 2,282 kilometres. There were 498 telegraph-offices, of which 141 are open to the public. The number of inland dispatches was 2,062,439; of foreign dispatches, 594,315; and of transit dispatches, 240,171; besides 63,079 official dispatches.

In the Canton of Wallis a revised constitution was adopted in February, the vote polled being very light. The new constitution of Soleure was accepted by the Federal Council in February, while that of Zug was returned, to be subjected to another popular vote. On March 12th, at an election for the Grand Council of Soleure, the Liberals elected 105 members, and the Catholic party 9. On May 21st a new constitution was adopted in Schaffhausen by a large majority, after having been previously rejected three times. In Schwytz a new constitution was adopted on June 12th. Considerable excitement was created in the Canton of Ticino in October, by the action of the Liberal Council of State in dissolving the Grand Council, in which the Catholic party

had a majority, and ordering a new election. This led to disturbances, and on October 22d a bloody affray took place at Stabio, in which several persons were killed. The Federal Council sent a commissioner with full powers to

CHAMOIS.

the canton to settle the difficulty. On November 9th the Federal Council revoked the order of the Council of State of Ticino. A delegation composed of deputies of both parties went

to Bern, together with the Federal Commissioner Bavier, where an amicable agreement was finally arrived at.

The Federal Assembly, which was in session at the beginning of 1876, adjourned on March 25th, and assembled again on June 5th. The Ständerath, or State Council, elected for its president Paul Nagel, of Thurgau, and the National Assembly, Arnold Aepli, of St. Gall. On July 3d the Federal Assembly passed a law regulating the acquisition and renunciation of Swiss citizenship—a matter which had been previously regulated only by cantonal laws. On December 4th the Federal Assembly met for its regular winter session, and adjourned on December 23d until March 5, 1877.

An International Postal Congress was held in Bern from January 17th to 27th. The principal questions under discussion were the admission of French and English colonies, and the rates of postage to be charged on letters sent there.

An international congress respecting the observance of the Sabbath was held at Geneva, beginning September 5th. M. Alexander Lombard was chosen president. Accounts were given by delegates from Spain, Italy, Austria, France, Germany, the Netherlands, Switzerland, Germany, Great Britain, and the United States, of the manner in which the Sabbath was observed in their respective countries, and of the movements in progress in them to secure a greater regard for its sanctity. An International League was formed, and declared to rest upon "a Biblical basis," for the promotion and encouragement of the Sabbath, the definite constitution of which it was provided should be completed at a future meeting to be held after two years. The congress considered the question respecting the most suitable day of the week on which to pay workmen. It decided to recommend Friday as the pay-day, and Thursday as the day for closing the weekly accounts.

T

TAFT, ALPHONZO, was born in Townsend, Vt., November 5, 1810. He graduated at Yale College in 1838, and two years later became a tutor in that institution. In 1840 he began the practice of law in Cincinnati, Ohio, where, after a highly-successful career of twenty-six years at the bar, he was chosen Judge of the Superior Court of Cincinnati. To this position he was twice reelected. He has been a warm supporter of the Republican party since its organization, was defeated as a candidate for Congress by George H. Pendleton, was for three years a member of the City Council of Cincinnati, and for twenty-five years a member of the Board of Education. He has been a member of the Board of Trustees of the University of Cincinnati since its foundation, and is a Trustee of Yale College, from which he received in 1867 the degree of Doctor of Laws. In 1875 his name was prominently brought forward as a candidate for Governor of Ohio. Just before the assembling of the convention, ex-Governor R. B. Hayes telegraphed to a delegate: "I cannot allow my name to be used against Judge Taft. He is an able and pure man, and a sound Republican. I would not accept a nomination in contest with him." Considerable opposition had been developed against Judge Taft in consequence of an opinion which he had delivered on the school question; and after he had received 186 votes in the convention, his name was withdrawn. After the resignation of General Belknap, in March, 1876, Judge Taft was made Secretary of War, and in May following he became Attorney-General.

TELEPHONE, THE. The invention of a method of transmitting sounds, and even articulate language, by the telegraph, for long distances, opens up new and great possibilities in

the art of telegraphy. Mr. E. P. Gray, of Chicago, a gentleman who has originated other important improvements in telegraphic processes, is the undoubted author of the invention, although La Cour, of Copenhagen, had conceived its possibility almost simultaneously, and was engaged in the construction of the apparatus independently; and Prof. Graham Bell, of the Massachusetts Institute of Technology, who claims to have demonstrated the possibility of conveying sounds of different pitch by telegraph, in 1873, has the merit of having wrought very important improvements in the apparatus. An instrument on a similar principle to the musical telephone was also constructed by a German inventor about fifteen years ago. The possibility of telegraphing audible speech, it would seem, was not suspected before it was practically accomplished by Prof. Bell, in the early part of 1876. Prof. Bell has experimented with fifty or more different kinds of apparatus, and in the later improvements the distinctness of the vocal sounds transmitted has increased remarkably. The instrument used in his first success, by which a conversation was carried on between two separate houses, is described as consisting of two single-pole electro-magnets with a resistance of 10 ohms each, arranged in circuits with a battery of 5 carbon elements, the total resistance being 25 ohms, and 2 drumheads of goldbeater's skin of 2½ inches diameter, with a circular piece of clock-spring glued to the centre of each membrane. One of the earliest experiments made by Prof. Bell was to transmit the tones of a reed-organ. A membrane was stretched between the electro-magnet and its armature, and the reeds of the organ were so arranged as to open and close the circuit as

they vibrated. By this arrangement the musical notes were loudly reproduced at a distance, and when chords were struck, the component tones were simultaneously sounded by the armature of the receiving telephone. Galvanic music, or the production of musical sounds by rapidly magnetizing and demagnetizing an electro-magnet a sufficient number of times in a second, was the discovery of Page in 1837. It was Prof. Bell who, in 1874, discovered that this effect did not depend entirely on the magnetic condition of the iron core, but was due in a measure to the vibrations of the insulated copper wire which forms the coil. Telephony depends on the intense vibrations which can be produced by electrical means around a smooth wire of soft iron. Telephonic effects can be produced by three different kinds of currents: intermittent, pulsatory, undulatory. Intermittent currents are characterized by the alternate presence and absence of electricity in the circuit; the pulsatory current is marked by sudden changes in the intensity of the current; and the undulatory current is marked by gradual changes of intensity, analogous to the changes in the density of air produced by the vibrations of a pendulum. At first, the attempts to transmit words were not entirely successful; although the vowel sounds were perfectly rendered, the consonants were very indistinct. This was not, however, uniformly the case, and sometimes a whole sentence could be reproduced with startling naturalness. These defects have now been overcome, so that long dispatches can be sent, and have been sent, fifty miles and further, in which every word was instantly recognizable.

The completest and most satisfactory experiments yet made were those of Prof. Graham A. Bell, at Salem, on the 13th of February of this year (1877), and of E. P. Gray, at Chicago, on the 27th of the same month. At Salem, on the occasion of a lecture by Prof. Bell upon the telephone, to illustrate its powers, he had several messages transmitted back and forth from Boston, 20 miles away; the dispatches from Boston were distinctly heard by the audience; several questions and answers were interchanged, and not only could the words be distinguished, but coughing and singing in the Boston office were audible in the lecture-hall, and the applause which greeted the messages was distinctly heard at Boston. The experiments at Chicago were not less remarkable. Musical airs were played on an instrument connected with the telephone at Milwaukee, which is distant about eighty-five miles from Chicago, and clearly heard throughout a considerable hall in the latter place. These experiments also were conducted for the purpose of illustrating a lecture. Prof. Gray's apparatus consisted of fifteen boxes on which were stretched musical strings connected with the telegraphic instrument; a stringless violin hung upon a long wire, acting as a sound-box. A dozen or more

tunes played upon the organ at the Milwaukee end were perfectly audible to the large audience.

TELLKAMPF, JOHANN LUDWIG, a German scholar, born January 28, 1808; died February 10, 1876. Having emigrated to the United States in 1838, he received an appointment in the same year as Professor of Political Economy in Harvard College, and in 1843 in Columbia College, New York, but in 1846 returned to Germany as professor in Breslau. In 1848 he was elected to the Frankfort Parliament, in 1849 to the Prussian Chamber of Deputies, in 1855 to the Herrenhaus, and in 1871 to the first German Reichstag. Together with Potter, he wrote "Political Economy" (New York, 1840); with his brother Theodore "Ueber die Besserungsgefängnisse in Nord-Amerika und England" (1844); "Essays on Law Reform and Commercial Policy" (1859); "Ueber Arbeiterverhältnisse und Erwerbsoffenschaften in England und Nord-Amerika" (1870); and "Selbstverwaltung und Reforme der Gemeinde und Kreisordnungen in Preussen, und Self-government in England und Nord-Amerika" (1872).

TENNESSEE. In March, 1875, the Legislature of Tennessee created a department of Agriculture, Statistics, and Mines, and Colonel J. B. Killebrew was appointed a commissioner to take charge of it. During the twenty-one months following he performed an immense amount of labor in examining into the mineral and agricultural resources of the State, and disseminating information thereon. He has prepared and published the following special reports:

1. "Report on the Little Sequatchie Coal-field," comprising 40 pages.
2. "Report on the Ocoee and Hiawasse Mineral District," comprising 67 pages.
3. "Agricultural and Mineral Wealth of Tennessee," comprising 196 pages.
4. "Report on the Region of Country lying on the Cincinnati Southern and Knoxville & Ohio Railways," comprising about 150 pages.

The "Report on Agriculture and Mineral Wealth" is an abridgment of a larger work of nearly 1,200 pages, entitled "The Resources of Tennessee." Besides these, Colonel Killebrew has prepared a treatise of 120 pages on "Tobacco and its Culture in Tennessee," a pamphlet of 40 pages on "Sheep-husbandry and Stock-growing" in the State, and a tabular statement of the "Manufacturing and Mining Interests of the Commonwealth," showing the amount of capital invested, number of hands employed, the wages paid, and the amount of annual production. This last work had not been issued at the close of the year, but was ready for the press. These various pamphlets and reports have been accompanied by maps, and about 14,000 copies of them have been distributed. In addition to these published results of his labor, the commissioner has made a collection of 739 classified specimens of minerals and

agricultural products, which are arranged in a room set apart for the purpose in the Capitol, besides a large number not yet classified and arranged. In submitting his report to the Governor, in the latter part of December, the commissioner says:

The great end for which I have labored has been to induce capital to fill our unoccupied fields of industry. I have believed, and still believe, that our people need relief from taxation; not that taxes are higher than in other States, but because they are harder to pay, the margin between their necessary expenses and income being very small. This want of ability on the part of our people does not arise from a scarcity of agricultural products, but from the want of home-markets. There is to-day more wheat, corn, and cotton grown than can find a remunerative market. There is too great a proportion of our people engaged in agriculture compared with the aggregate population of the State. I believe that the industrial history of every country will fail to show a prosperous people where such a large number proportionally are engaged in agricultural pursuits. Every farmer in the State, if asked, will say that the price brought for what he has to sell is too low compared with the cost of production. The laborer will say, truthfully, that he cannot live on less than he is receiving. What the agriculture of the State needs is productive consumers—labor engaged in other departments of business creating what the farmer needs, and taking in exchange therefor what the farmer produces. . . .

The time is propitious for making the value and abundance of our mineral wealth known. Stagnation reigns throughout the iron-world, and iron-masters are looking the world over to secure better localities for the prosecution of their manufacturing enterprises, where all the raw material may be found close together, and where the investment required will be less. We have in the State of Tennessee a happy combination of all these advantages, and it can be demonstrated that we can make a ton of pig-iron anywhere along the line of the Cincinnati Southern, Knoxville & Ohio, and Nashville & Chattanooga Railroads, at about what the ore costs per ton in Pittsburg. This fact is well established; and to make it known, to prove the cheapness of our iron and coal-fields, to show the means of transportation by river and by rail in course of construction and already completed, have been the chief objects of my labor. . . .

Capitalists from Germany, Sweden, Switzerland, and from many of the States north, are daily inquiring into our capabilities. Companies are now forming, and negotiations pending, which will add many millions of capital to the State. Agents are now selecting lands in various portions of the State. The publications, or selections therefrom, which I have made, have to some extent been republished in Pittsburg, New York, England, Germany, and Switzerland. A growing inquiry for information is evidenced by nearly every mail. During the twenty-one months just passed more than 3,700 letters have passed through my office. The States of Virginia, Alabama, and Kentucky, seeing the effects of such advertising, have applied for copies of the act creating this department. Kentucky has already established a similar bureau, which is now in active operation; and the friends of the movement in Virginia and Alabama expect to have the acts before their respective Legislatures at present carried, having the same object in view.

A geodetic survey of the State has been begun, under the authority of the Superintendent of the United States Coast Survey, and at the expense of the Federal Government. It is to be executed by Prof. A. H. Buchanan, under

the general direction of Dr. J. M. Safford, the State Geologist, who has been mainly instrumental in securing the survey.

The finances of the State are not in an altogether satisfactory condition. Default has been made in the payment of interest due on the State's bonds since July 1, 1875. In June of that year an attempt was made to provide for the interest coming due, by the issue of bonds; but such harsh terms were demanded in order to negotiate the new bonds, that the plan was abandoned, and no interest has since been paid, though a considerable amount fell due July 1, 1875, January 1, 1876, and January 1, 1877. The present indebtedness of the State is as follows: Funded and registered bonds outstanding, \$22,812,400; bonds belonging to the East Tennessee University, not required to be registered, \$396,000; fundable bonds and coupons not presented, \$1,021,000; past-due interest, \$2,088,756: total, \$26,318,156. Deducting from this \$1,671,916 loaned to the Memphis & Charleston Railroad, \$1,199,180 loaned to the Mississippi Central Railroad, \$316,744 loaned to the Mississippi & Tennessee Railroad, \$14,150 due from the purchasers of the Tennessee & Pacific Railroad, \$51,125 due from the purchasers of the Knoxville & Charleston Railroad, \$204,000 due from the purchasers of the McMinnville & Manchester Railroad, and \$95,686.10 interest due from solvent railroads, we have as the debt to be provided for, \$22,765,404.90. In December Governor Porter received from several of the largest creditors of the State the following communication:

The undersigned holders of bonds of the State of Tennessee, believing that the best interests of Tennessee and of her public creditors will be served by an early permanent adjustment of the claims of such creditors, on a basis honorable to the State and equitable to them, respectfully ask your Excellency, in the full belief that such a settlement is practicable, to recommend that the Legislature of Tennessee, as early as may be possible at its ensuing session, appoint a commission to come to this city and confer with the holders of bonds of the State of Tennessee, for the purpose mentioned herein.

Early in 1877 the Board of Arbitration appointed to make a fair adjustment of the obligations of defaulting Southern States, after a prolonged conference and consultation in New York with a delegation of five prominent citizens of Tennessee appointed for the purpose, made an award proposing that, "after adding all the arrears of interest up to July 1, 1877, the then aggregate of the State debt should be readjusted by the issue of new bonds at the rate of sixty per cent, of the total amount. This was left to be ratified by the Legislature of the State, which was then in session. In the report of the Board of Arbitration in making the award, the following statement of reasons was made:

In the conclusion to which this committee have, with much deliberation, arrived, they have not lost sight of the fact that a sovereign State, although be-

yond the reach of legal coercion in the fulfillment of its obligations, is for that very reason under stronger bonds to maintain its credit inviolate. Nor have they been unmindful of the honorable character and unblemished credit which the great State of Tennessee has always enjoyed in the markets of the world, of her reputation for the possession of large resources, nor of the humiliation she must consequently endure by any compromise whatever of her legal obligations. All these considerations have been duly weighed, and they have induced this committee to carefully inquire whether it was not expedient for them to recommend, instead of so large a reduction of the principal of the debt, a concession for a few years in the rate of interest, as proposed in a plan submitted to the Governor by holders of a large amount of bonds, in the belief, which is generally entertained among the creditors, that a gradual recovery of wealth would accrue to the State, and enable her at an early day to resume payment in full. This mode of adjustment would be obviously more gratifying to State pride, and would also afford greater present relief, and it would certainly be more acceptable to the majority of bondholders.

But, after attentively considering the statements of your delegation respecting the sad results of the war, the social derangement and general impoverishment it has entailed, and the wide-spread disorganization existing in all the industries of the people throughout the State, we have been constrained to the decision that a summary reduction of the debt, even to the large extent indicated, is the best course for all parties concerned, and that, unless the Legislature shall now see its way clear for a settlement more favorable to the bondholders, it is both its duty and its policy to adopt the award which this committee most respectfully and conscientiously tender to them and to their creditors, as the result of their best judgment.

The new bonds proposed were to bear six per cent. interest from July 1, 1877, payable semi-annually in New York, the principal to

Balance in State Treasury, December 20, 1874,	\$328,704 55

Disbursements from Dec. 20, 1876, to January 1, 1877.....	129,701 91
Balance in the Treasury, January 1, 1877,	\$58,064 11

The estimated "amount necessary to be raised for the purpose of carrying on the State government for two years," ending December, 1878, as submitted to the Governor by the Controller, Treasurer, and Secretary of State, is \$1,032,532 for current expenses, and \$301,500 for interest on the school-fund, amounting together to \$1,334,032.

On the 8th of May the Railroad Commissioners of the State sold the Tennessee Pacific Railroad at public auction, to meet an unpaid balance due the State, amounting to \$150,000, with interest from July 1, 1870. It was purchased by the company, and the sum of \$178,000 in bonds of the State has been paid, leaving \$3,500 in bonds and \$10,650 in cash unpaid. The Knoxville & Charleston Railroad was sold by the commissioners for \$75,000, one-half having been paid in bonds of the State. The Mississippi Central Railroad, having failed to pay interest on bonds loaned to it by the State, was placed in the hands of a receiver on the 25th of February, and has since been operated by him on behalf of the State. During the year it was kept in repair, the running expenses were paid, and \$60,000 was paid into the Treasury of the State on account of taxes and interest.

The State Normal School has been located at Nashville, the trustees of the University of Nashville giving the use of its buildings. The

STATE SEAL OF TENNESSEE.

be payable in thirty years, and the interest-coupons to be receivable for State taxes. The board also recommended the establishment of a sinking-fund.

The assessed value of taxable property in the State is \$268,002,485—a decrease of \$20,425,835 in two years. The State tax of 1876 was four mills on the dollar. The balance-sheet of the State Treasury on January 1, 1877, presented the following figures:

Normal School, which is now in successful operation, has been supported thus far by the Board of Trust of the Peabody Education fund, but its support is to be withdrawn at the close of the scholastic year of 1876-'77.

The penitentiary of the State and its inmates are still under lease. An act of the Legislature of 1875 provided for a new lease for five years, if the highest bid received was satisfactory to the Governor and inspectors. Only three bids were received, and all these were rejected. The old lease has been extended for a period of eight months, at a rental of \$10,181.75 quarterly for 800 convicts.

A Republican Convention was held at Nashville on the 17th of May, for the purpose of choosing 24 delegates to the National Convention of the party at Cincinnati. There were about 200 delegates present, one-fifth of whom were colored. A letter from ex-Governor William G. Brownlow was read, urging the

maintenance of the credit of the State by the full payment of every obligation. Resolutions were adopted advocating the preservation of the national credit and the restoration of an honest currency; expressing entire confidence in the ability of the Republican party to correct the abuses and errors that may have found entrance among those to whom it had confided its governing policy; favoring the punishment of corrupt officials; opposing interference with public schools by any sect or denomination; denouncing repudiation in every form; expressing full confidence in the delegates to Cincinnati, and declining to instruct, and referring the matter of a convention to nominate a Governor and other State officials to the Executive Committee for their action.

The Democratic Convention for the selection of delegates to the National Convention at St. Louis was held at Nashville on the 31st of May. The following declarations were made:

NASHVILLE.

1. That civil reform in the public service is imperatively demanded.
2. The unconditional repeal of the resumption act.
3. The substitution of Treasury notes for national-bank currency at the earliest moment practicable.
4. The resumption of specie payments, whenever it can be effected without injury to the business interests of the country, and with fair prospects of being able to maintain them, the policy of the Republican party having rendered early resumption impossible without the ruin and bankruptcy of the country.
5. We demand rigid economy in expenditures, and strict accountability of all officials charged with the collection or disbursement of public money.
6. We are opposed to the further contraction of the circulating medium, and believe commercial and industrial interests would be promoted by the replacement of a portion of the currency already withdrawn.
7. We insist that only honest and capable men be appointed to office.
8. We demand the vigilant investigation and the condign punishment of official corruption and crime, according to the methods and measures of the law, and thank the popular branch of Congress for its unflinching efforts to uncover and punish official peccation.
9. No bounty to any one class engaged in special industry, to the prejudice of other and more numerous classes pursuing occupations equally important, and opposing protection for protection's sake.
10. We declare hostility to all legislation designed or calculated to foster and favor the few to the detriment of the many.
11. We insist on the subordination of the military to the civil authorities.
12. We declare unflinching fealty to the Constitution, and oppose any attempt to enlarge its powers beyond its true spirit and meaning.

13. That delegates to the St. Louis Convention be, and they are hereby, instructed to vote as a unit on all propositions, and that the majority shall control the vote; and while we will yield an unflinching and zealous support to any sound and capable Democrat who may be nominated for President, and while we do not instruct our delegates in regard to their votes, yet we express our preference for the Hon. Thomas A. Hendricks, of Indiana, as honest and capable, favorably located, and, in our judgment, combining more elements of success than any other named aspirant.

During the month of August, party conventions were held, at which the action of the National Convention was fully approved and their platforms reaffirmed. Candidates were nominated for presidential electors and for Governor of the State. James D. Porter was nominated by the Democrats for Governor. The Republicans made no regular nomination, but — Thomas was put forward as an independent candidate. George Maury was supported by a portion of the Republican party, William T. Yardley (colored) by others, and A. M. Hughes by a small number.

At the election on the 7th of November the total vote for presidential electors was 222,732, of which the Democratic candidates received 133,166, and the Republican candidates 89,566, making the majority of the former 43,600. For Governor there were 210,682 votes cast. Of these, Porter received 123,740, Thomas 73,695, Maury 10,436, Yardley 2,165, and Hughes 596. Porter's plurality over Thomas was 50,045; majority over all, 36,848. The Legislature chosen at the same time, to hold its session in January, 1877, consists of 20 Democrats and 5 Republicans in the Senate, and 57 Democrats, 16 Republicans, and 2 Independents in the House. This makes the Democratic majority 15 in the Senate and 39 in the House, or 54 on joint ballot. The Secretary of State, Controller, and Treasurer, are elected by the Legislature. In January, 1877, Colonel C. W. Gibbs and Colonel J. L. Gaines were reelected to the offices of Secretary of State and Controller, and Colonel Marshall T. Polk was chosen Treasurer. Colonel Polk is the youngest son of a brother of James K. Polk, a former President of the United States. He was educated at the West Point Military Academy, and served in the Confederate army, a part of the time on the staff of General Leonidas Polk.

James E. Bailey has been chosen United States Senator, to complete the term begun by Andrew Johnson and continued by D. M. Key, who was appointed by the Governor, but failed of election when the Legislature met. Judge Bailey is a lawyer of high standing, a native of Clarksville, and before the civil war was a prominent Whig. He served as a colonel in the Confederate army.

TEXAS. The Constitutional Convention which met at Austin on September 1, 1875, to revise and amend the organic law of the State, closed its session by final adjournment on the 24th of November. Among other changes made in the old constitution, the or-

ganization of the three departments of the State government is more or less altered; as, in the executive, some of the officers are made elective; in the legislative, the number of Senators is fixed at thirty-one, and of Representatives at ninety-three; and it establishes one Supreme Court, consisting of a Chief-Justice and two Associate Justices; one Court of Appeals, composed also of three judges; and twenty-six District Courts, held by one judge each. By ordinances appended to the new constitution, the convention divides the State into twenty-six judicial, thirty-one senatorial, and seventy-nine representative districts.

STATE SEAL OF TEXAS.

The new constitution makes the State elections biennial, and limits the duration of the legislative session to sixty days, except the first session, which may be extended to ninety days, with a still further extension of thirty days, if the Legislature deems it necessary.

The convention submitted its work to the people at an election held on the second Tuesday of April, 1876, when they should ratify or reject the new constitution, and vote also for the State and local officers specified in it.

In preparation for this election, the Democratic party of Texas met in State Convention at Galveston, at the end of the first week of January, 1876, to nominate candidates for State offices, for Judges of the Supreme Court and Court of Appeals, and for presidential electors; also to choose delegates to the Democratic Convention at St. Louis. The nominations resulted as follows:

For Governor, Richard Coke; for Lieutenant-Governor, Richard B. Hubbard; for State Treasurer, A. J. Dorr; for Controller of Public Accounts, Stephen H. Darbin; for Commissioner of the General Land-Office, J. J. Gross; for Attorney-General, Hamilton H. Boone.

For Chief-Justice of the Supreme Court, O. M. Roberts. For Associate Justices, Messrs. Moore and Gould.

For Judges of the Court of Appeals, John P. White, M. D. Ector, and C. M. Winkler.

For presidential electors at large and their

alternates, the following were declared nominated: D. C. Giddings, of Washington County, and S. H. Epperson, of Marion County, electors; Columbus Upson, of Bexar County, and Samuel J. Adams, of Dallas County, alternates.

The following platform was adopted by the convention:

We, the Democracy, in convention assembled, hereby declare our principles and policy, and ask for them the popular approval:

1. We reaffirm our faith in the principles of the Democratic party, as heretofore enunciated by our State Conventions, and congratulate the people upon the faithful redemption of all the pledges upon which the Democratic party was recently placed in power in Texas; and point to the honesty and efficiency of our present State administration, as a guarantee of our continued fidelity to the interests of the State and people.

2. The Democratic party, now as in the past adhering to its policy of maintaining an efficient system of general education, declares it to be the duty of the Legislature of the State to speedily establish and make provision for the support and maintenance of public free schools, and to this end to exercise the whole power with which it is invested.

3. The sufferings and losses of our people on the frontier from the forays of savages, and upon the Mexican border from invasions, murder, and rapine by the Mexican banditti, enlist our deep and sincere sympathy; and while we hereby pledge our most

energetic efforts to afford them adequate protection in person and property by the State, we also earnestly appeal to the General Government to give that protection and security to our people and their property thus exposed, to which they are entitled under the Constitution of the United States.

4. That the Democratic party, firmly upholding the Constitution of the United States as the foundation and limitation of the powers of the General Government, and the safe shield of the liberties of the people, demands for the citizen the largest freedom consistent with public order, and for every State the right of self-government and home rule; that, to uphold the former and protect the latter, the Democracy of Texas plants itself for the great leading principles enunciated in the inaugural of President Jefferson and the farewell address of the immortal Jackson, and enters the contest of 1876 with the firm conviction that the elements of opposition to the national Administration should be consolidated in the approaching presidential campaign, without prejudice to the unity and perpetuity of the Democratic organization.

5. We pledge to the nominees of this convention our earnest and active support.

For the same election of February 15, 1876, the Republicans nominated a State ticket, headed by William Chambers as their candidate for Governor, and adopted a platform which censured Governor Coke's administration of the State government; denounced the proposed

MARKET AND OPERA HOUSE, HOUSTON.

new constitution; indorsed the present administration of the Federal Government; and asked that Mr. Pinchback be allowed to sit in the Federal Legislature as Senator from Louisiana.

The election resulted generally in favor of the Democratic nominees, by greater majorities over their Republican competitors than in 1875. The majority of the Democratic candidate for Governor in that year was 47,631; the whole number of votes then cast on Governor having been 152,337, out of which Mr. Coke received 99,984, Mr. Davis 52,353.

The state of parties in the Legislature was as follows: Of the 81 Senators—Republicans 3, one of them colored, and 28 Democrats, two of these being characterized as Independent Democrats. Of the 85 Representatives—Democrats, 69; Independent Democrats, 4; Republicans, 4, of whom two are colored; Granger, 1; Independents, 2; with no party designation, 5. Of the 21 district judges elected, there were—Democrats, 16; Independent Democrat, 1; Republican, 1; Independent, 1; with no party designation, 2.

The new Constitution was adopted at the election of February 15th. The whole number of votes cast in the State was about the same as on the State ticket, and its adoption secured by about the same majority, though somewhat less.

The new constitution, being ratified by the people, went into operation on the third Tuesday in April, 1876. The benefits expected to accrue to the people of Texas from it have been stated as follows:

The adoption of the constitution has saved the people from an appalling disaster. It is a rebuke to railroad speculators; it has condemned the enemies of the Texas & Pacific Railroad, by preventing entry to the lands guaranteed to the road by the State; it has secured the payment of taxes on 30,000,000 acres of land, on which at present not a cent of taxes is paid; it has secured to every county its fair proportion of the proceeds from taxation; it prevents unjust usury; it preserves the credit of the State in her bonded securities; it fixes the capital of the State permanently at Austin, and gives her 3,000,000 acres of the public domain . . . which is worth, at the least calculation, as many dollars; this same to be expended in the construction of a new Capitol and other public buildings. Add to the other blessings which the constitution confers, that it is so framed as to remove the objections of the fastidious in the future by its provisions for easy amendments. A two-thirds vote of the Legislature is required to propose amendments; and the acceptance by a majority of the votes cast, at either a special or general election, secures its adoption. . . . Under the provisions of the new constitution, the Legislature will be convened on the third Tuesday in April. The session will consist of three months' duration, and after that the people will be called upon to pay for biennial sessions only, and these confined to a distinct period. The general election will be held on the first Monday in November, commencing with November, 1878. The officers elected under the new constitution will hold their offices as if they had been elected in November. This prolongs their terms of office six months and some days. They will be installed in office on the third Tuesday in April, the same day that is fixed for the assembling of the Legislature.

The members of the Legislature met at Austin on April 18, 1876, when both Houses were soon organized. T. R. Bonner was elected Speaker of the House, he having received 45 votes, against 43 cast for D. U. Barziga, his competitor, also a Democrat.

The aggregate amount of the State debt, bonded and floating, on August 31, 1876, consisted of the following items:

BONDED DEBT.

Bonds for funding State debt, act of November 9, 1866	\$125,000 00
Bonds for funding State debt, act of May 3, 1871	75,000 00
Frontier defence bonds, act of August 5, 1873	697,000 00
Bonds for funding State warrants, act of May 30, 1873	4,400 00
Bonds for funding State warrants, act of May 2, 1874	499,000 00
Revenue deficiency bonds, act of December 2, 1871	500,000 00
Bonds for payment of floating debt, act of March 4, 1874	1,000,000 00
Pension bonds, acts of August 13, 1870, and April 21, 1874	1,099,974 00
Bonds for redemption of State debt, act of July 6, 1876	875,000 00
Total	\$4,875,874 00

FLOATING DEBT.

Warrants on general revenue unpaid August 31, 1876	\$212,084 57
Pension certificates and approved claims unbonded	53,287 00
Approved certificates of debt	15,978 88
Interest due Agricultural and Mechanical College fund	53,400 00
Total	\$334,699 55

DEBT OF DOUBTFUL VALIDITY.

State bonds issued to State University fund, under act of November 12, 1866, as indemnity for United States bonds belonging to that fund, and transferred to general revenue account in February, 1860	\$184,472 26
Interest to August 31, 1876, on above bonds issued to University fund	68,874 80
State bonds of act of November 12, 1866, issued to school-fund in lieu of United States bonds belonging to that fund used during the late war	62,168 83
Interest to August 31, 1876, on above bonds issued to school-fund	89,080 20
State bonds, act of November 15, 1864, issued to school-fund in lieu of warrants belonging to that fund destroyed during the war	320,867 18
Interest on above bonds issued to school-fund, to August 31, 1876	217,849 50
Total	\$657,762 21

The business transacted at the General Land-Office, in regard to the disposal of lands belonging to the vast public domain of Texas, has been much larger during the last fiscal year than at any previous one. The number of patents issued within that period, and covering 2,421,989 acres of land, was 4,555; and new files have been made covering 9,870,687 acres. The amount of fees and dues received at the said office during the year was \$54,580.91.

The whole number of acres comprised within the area of Texas is estimated at 175,594,560; number of acres of public domain against which no claim exists, 67,580,129.

The Legislature continued its session for ninety days, comprising the full time of a regular session, and nearly the two additional months allowed by the new constitution, until August 22d.

On May 2d, the second Tuesday from the opening of the session, the Legislature proceeded to the election of a United States Senator, for the term of six years, to begin with March 4, 1877. The joint votes having stood, for Richard Coke 68, for John Ireland 49, Richard Coke was declared to be duly elected.

The legislation of the session was strictly local in its nature.

The total vote for presidential electors on November 7th was 149,555, of which the Democratic electors received 104,755, and the Republican electors 44,800. The Democratic candidates for Congress were elected by a combined majority of 60,476.

TIDEMAND, ADOLF, one of the most celebrated painters of Norway, born August 14, 1814 (not 1815, as erroneously stated in some works); died August 25, 1876. He studied in the Academies of Copenhagen and Düsseldorf, and in 1841 brought out his first large painting, representing a scene from the life of Gustavus Vasa. Having returned to Düsseldorf

after a journey to Munich, Rome, and Norway, he devoted himself exclusively to painting scenes from Norwegian history. He first gained considerable celebrity by his painting, "An Afternoon Service of Haugians" (a religious sect of Norway), for which he received the gold medal of the Berlin Academy. In 1850 he decorated the dining-hall of the Royal Palace in Oskarshall with ten paintings, representing the Norwegian peasant-life from beginning to end. Other works of importance are "The Orphan," "The Wolf-Hunter in the Mountain-Hut," and "The Norwegian Funeral." In 1860 he produced two paintings, "The Dressing of the Bride" and "The Administration of the Lord's Supper in a Hut," which attracted considerable attention. "The Duel at the Wedding" (1864) is considered his most powerful and passionate painting. His "Wedding Procession," finished in 1873, gained for him a medal in the Vienna Exposition. His last large picture was finished in February, 1876. It represents the landing of Colonel Sinclair with Scottish auxiliaries for Sweden, at Romsdalen, in 1612.

TILDEN, SAMUEL JONES, was born in New Labanon, Columbia County, N. Y., February 9, 1814, where his grandfather, John Tilden, settled in 1790, and where his father, Elam Tilden, was a farmer and merchant. Samuel entered Yale College in 1833, but soon left that institution and graduated at the University of New York. He was admitted to the bar in 1841, and began practice in New York City. In 1844 the *Morning News*, a daily paper, was established in New York, to advocate the election to the presidency of James K. Polk. Mr. Tilden invested capital in this enterprise and became the editor of the journal, which position he held until after the election. In 1845 he was elected to the New York Assembly, and in 1846 was chosen a member of the Constitutional Convention, where he was made a member of the Committee on Finance and Canals. In 1855 he was defeated as the "Soft-Shell" Democratic candidate for Attorney-General of New York. Mr. Tilden now devoted himself to his profession. His practice was very extensive, and by it he amassed considerable wealth. Besides other important cases he was counsel, in 1856, for Azariah C. Flagg, in the case growing out of the contested election for the controllership of New York City; in 1857 for the relatives of Dr. Burdell against the claims of Mrs. Cunningham; and for the Pennsylvania Coal Company in the suit brought by the Delaware & Hudson Canal Company. Mr. Tilden became chairman of the Democratic State Committee in 1866, and was a leading member of the Constitutional Convention of 1867, serving with distinction on the Finance Committee. He became an indefatigable laborer in the cause of judicial and political reform in the city of New York, and in 1869-'70 was active in the organization of the Bar Association. When the con-

test was waged against the members of the "Tammany Ring" holding city offices, who were charged with defrauding the city treasury of many million dollars, Mr. Tilden rendered invaluable services to the cause of reform by his famous analysis of the accounts of the Broadway Bank, showing conclusively how the alleged culprits had shared their spoils, and furnishing legal proof for their conviction. In 1872 he was again elected to the General Assembly, where he continued his exertions in the cause of reform. In 1874 he was elected Governor of New York by a plurality of 50,317 votes over John A. Dix (Republican) and Myron H. Clark (Prohibitionist). He was inaugurated January 1, 1875, and soon after declared war against the "Canal Ring," which resulted in the overthrow of that organization. When the National Democratic Convention assembled in St. Louis, in June, 1876, Governor Tilden was the leading candidate for the first place on the ticket. On the first ballot he received 403 of the 713 votes cast. When the vote for the second ballot was finally announced, Governor Tilden had 535 in a whole vote of 738. The nomination was made unanimous, and he was declared the Democratic candidate for the presidency. He accepted the nomination in a brief speech on July 11th. His formal letter of acceptance was dated July 31st. (For this letter, and the results of the election, see UNITED STATES.)

TRANSVAAL REPUBLIC, a free state in South Africa, occupying a part of the territory of the former Dutch colonies in that region. Area, about 114,800 square miles; white population, 36,600; native population, 300,000. President, Thomas François Burgers; he was inaugurated in 1872; his term expires in 1877. President Burgers conceived a plan for organizing a direct trade with the Netherlands by means of a railroad to be built to Delagoa Bay. With this view he visited Europe in 1875 and 1876, and secured from the Portuguese Government the concession of the privilege of building a railway, free of taxes for fifteen years, through the Portuguese territory to the port of Lorenzo Marquez, which was ratified by the Portuguese Cortes on the 23d of January. He also formed trade connections with mercantile houses in Amsterdam, and contracted a loan with a banking-house in that city for carrying out his purposes.

Soon after the return of President Burgers to his country, the republic became involved in difficulties with Secocoeni, the chief of one of the Caffre tribes. The trouble arose in charges by the Boers, or Dutch colonists, that the natives were committing depredations upon their lands and stealing their cattle. Secocoeni was called upon to repress the trespasses of his people, but, asserting that he was not tributary to the white government, refused to obey. The *Volksraad*, by the advice of President Burgers, ordered a "commando" to be called out to chastise him. An alliance was formed with

Samuel

the Amazwazies, another of the native tribes, and a considerable force was organized to proceed against Secocoeni. Early in July an attack was made by the allies upon the Caffre fortress at Johannesburg. The Amazwazies stormed the fort with bravery, and would have achieved a complete success, but that the Boers, who were to have supported them by advancing from another side, did not come up. On the 27th of July an attempt was made to storm the headquarters of Secocoeni, but the allied chief Mapasella led a part of the force of the Government into an ambushade, whereby they suffered great loss. For this, Mapasella and some of his officers were put to death, his village was destroyed, and 5,000 huts were burned and 169 of his people slaughtered. The course of events turned to the advantage of Secocoeni. By the end of August the force of the Government was reported to be substantially annihilated. The survivors fled to Pretoria. A position was maintained at Steel Poort, with the help of mercenary troops under General Van Schlickmann. These troops have been charged with committing outrages against the women and children of the natives, the effect of which was not beneficial to the cause of the Government. A movement was made, led chiefly by the English in the diamond-fields, to call for the intervention of the English authorities at Natal, but it was not countenanced by the *Volkeraad*, which met early in September. About this time Cetchwayo, the Zooloo king, announced to the Government of Natal that he could no longer restrain his people, and threatened to move upon the Transvaal with a force of nearly 40,000 men, and a general rising of the natives seemed imminent. Happily these apprehensions were not fulfilled. On the 17th of November General Van Schlickmann's forces attacked a minor fortress belonging to Secocoeni, but were twice repulsed, and General Van Schlickmann was killed. After this engagement Secocoeni's people assumed a bolder attitude. The course of events in the Transvaal country was observed with solicitude by the people and governments of the neighboring English colonies, for they apprehended that, if the natives succeeded in overcoming the Boers, the other European settlements would be exposed to the peril of gen-

eral attacks; and there were, besides, many British subjects in the territory of the republic whose interests and rights were injuriously affected by the hostilities. Nevertheless, the offers made by the English to assist, by negotiation or otherwise, were not received favorably by the Transvaal authorities. A peace was concluded with Secocoeni on February 5, 1877, he agreeing to pay an indemnity of 2,000 cattle, to submit to all the laws of the country, and to obey all the decrees of the Government regarding himself and his people. Quiet has also been restored among the Zooloos.

TURKEY, an empire in Eastern Europe, Western Asia, and Northern Africa. Reigning sovereign, Sultan Abdul-Hamid II., born September 22, 1842; succeeded his elder brother, Sultan Murad V., August 31, 1876. (*See ABDUL-HAMID.*) The heir-presumptive to the throne is Mehemet Reshad Effendi, the brother of the present Sultan, born November 8, 1844.

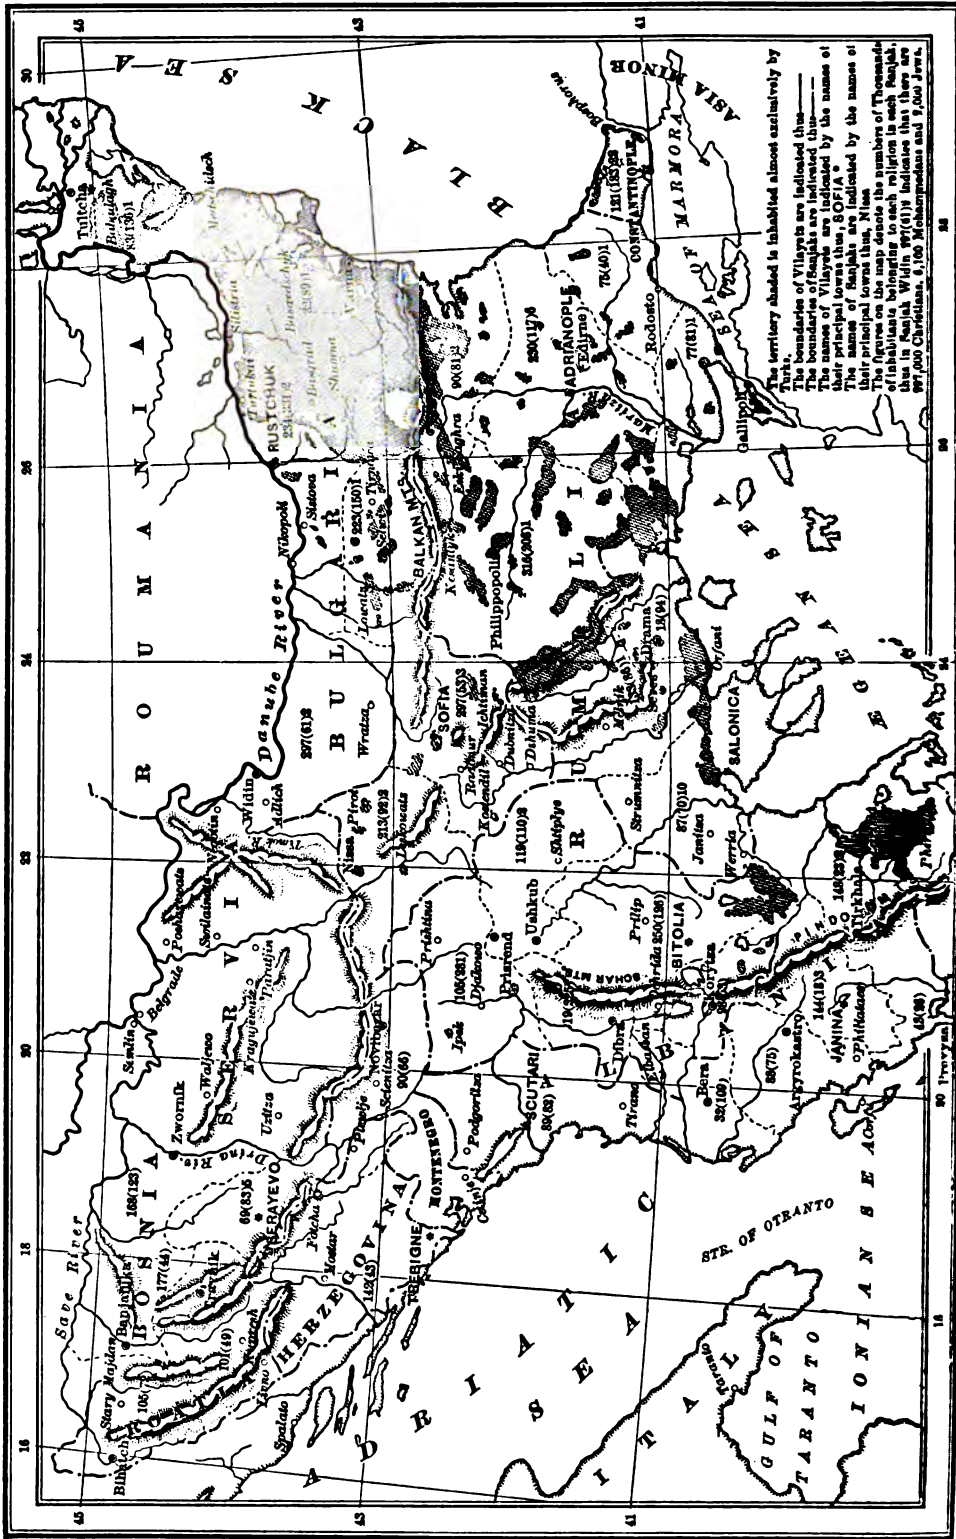

The area and population were as follows, according to the latest estimates:

COUNTRIES.	Area.	Population.
1. Turkey proper in Europe.....	140,368	6,506,900
2. Dependences in Europe:		
Roumania.....	46,795	5,078,000
Servia.....	16,817	1,877,000
3. Possessions in Asia.....	748,486	18,141,600
Tributary principality, Sissam (Samos).....	218	84,900
4. Dependences and possessions in Africa:		
Egypt.....	869,891	17,000,000
Vilayet of Tripoli.....	844,428	1,150,000
Regency of Tunis.....	45,710	2,000,000
Total.....	2,212,206	48,283,400

The empire is divided into vilayets, under governors-general (*valis*). They are subdivided into sanjaks (districts) under governors (*mutessarifis*), and these into *cazas* (circles) under lieutenant-governors (*kaimakams*), and the latter into *nahiyes* (communes). The mayors of villages are called *mukhtars*. The boundaries of the vilayets are constantly undergoing changes, which, however, do not generally affect the boundaries of the sanjaks, but consist in the transfer of one or several sanjaks to another vilayet, or in their erection into independent vilayets. In 1876* European Turkey was divided into the following vilayets:

VILAYETS.	Area.	POPULATION IN 1874.			
		Christians.	Mohammedans.	Jews.	Total.
Constantinople (European part).....	25,525	121,267	183,540	22,948	827,750
1. Adrianople.....		514,743	522,185	13,017	1,849,894
2. Danube.....	27,146	870,959	760,044	5,426	1,642,429
3. Sophia (inclusive of Nissa).....	11,694	509,340	145,286	5,045	660,121
4. Salonica.....	14,929	384,578	302,973	11,500	649,845
5. Janina.....	13,860	472,574	241,062	3,670	717,806
6. Bitolla (Monastir).....	15,771	494,159	742,270	3,993	1,240,421
7. Scutari.....	4,894	89,491	82,043	171,539
8. Bosnia.....	18,014	708,297	487,377	6,298	1,151,972
9. Herzegovina.....	5,877	142,128	48,219	74	185,421
Crete.....	8,317	284,118	87,840	3,200	275,158
Army.....			83,589	82,589
Navy.....			23,324	23,324
Total.....	189,967	4,792,448	3,609,606	75,163	8,477,214

* See Behm and Wagner, *Bevölkerung der Erde*, iv., p. 114.

If we add to these figures the islands in the European waters—Samothrace, Imbros, Lemnos, and Hagiostрати, which in an administrative point of view belong to an Asiatic vilayet of 402 square miles, with 27,800 Christians and 1,874 Mohammedans: total, 29,674 inhabitants—we obtain for European Turkey an area of 140,868 square miles, with 4,820,243 Christians, 3,611,480 Mohammedans, and 75,165 Jews: total, 8,506,888 inhabitants.

According to W. Jakshitch, chief of the statistical bureau of Belgrade, Servia, the inhabitants of Turkey proper in Europe were divided in regard to nationality into 3,732,300 Slavi (1,871,800 Servians, 1,860,500 Bulgarians), 1,024,200 Greeks, 1,229,200 Albanians, 199,600 Roumanians, and 2,210,800 Turks. Comparing the number of Turks with the number of Mohammedans as given above, it appears that the Turkish race constitutes less than two-thirds of the Mohammedan population of European Turkey. The remainder is made up of Mohammedans, Bosnians, Bulgarians, and Albanians. In Bosnia, in particular, the entire nobility has embraced Islamism, in order to retain its feudal privileges, and, while strictly adhering to its nationality and language, has repeatedly shown a fanatical opposition to all concessions which the Porte has made or intended to make to its Christian subjects. In three only of the thirty-three sanjaks—Rustchuk, Tulcha, and Varna (in the vilayet of the Danube)—the Turkish race constitutes the bulk of the population. The Turks are also numerous in the Rhodope Mountains, on the boundary between the Bulgarians and Greeks (the vilayets of Adrianople and Salonica). On the coast of the Ægean Sea and the Sea of Marmora, as well as on the southeastern coast of the Black Sea, they live in the midst of the more numerous Greeks, but they disappear more and more the nearer we approach Constantinople. On all the coasts mentioned the Greeks have a numerical preponderance. They inhabit in compact masses the sanjaks on the Ægean Sea and the Sea of Marmora, those on the Black Sea up to the river Kantohyk, and the island of Crete. The Slavic Bulgarians live south of the Danube, and their territory is bounded by the Danube, the Timok, and a line passing through the cities Nissa, Prisrend, Ochrida, Kastoria, Niaghusta, Salonica, Adrianople, Burgas on the Black Sea, Slivno, and Rasgrad. Sporadically they are found among the Albanese, the Greeks, the Wallachians, and in the Dobrudja. The other of the large Slavic tribes of Turkey, the Servians, inhabiting the principality of Servia, Bosnia, the Herzegovina, and Montenegro, occupy the territory between the Bulgarian Morava, the Save, and the Dalmatian frontier as far as Albania. On the right bank of the Bulgarian Morava they are living intermixed with the Roumanians. The Albanians, whom the Turks call Arnauts, while they call themselves Skipetars, are of Græco-Latin origin, and are regarded as descendants of the

ancient Illyrians. The northern boundary of the territory inhabited by them embraces the south and the east of Montenegro, and almost extends to the Bulgarian Morava, while the southern boundary-line separates it from Hellas. The Roumanians in the principality of Roumania also belong to the Græco-Latin family. Some colonies of Roumanians are also found in the midst of the Bulgarians, the Servians, and in the Dobrudja. As the boundaries of the sanjaks are generally undisturbed by the changes made in the vilayets, the following table, giving the number of Christians and Mohammedans in each sanjak, is of permanent value:

SANJAK.	Vilayets.	Christians.	Mohammedans.
Constantinople.....		121,000	188,000

The estimates of revenue and expenditure in the budget for the Turkish year 1291 (from March, 1875, to March, 1876) were as follows (value expressed in purses: 1 purse = 500 piasters; 1 piaster = \$0.0432):

REVENUE.	
1. Direct taxes:	
Capitation-tax.....	688,000
Ground-tax, patents, revenue of Constantinople.....	80,700
Military exemption.....	160,000
Total.....	828,700
2. Indirect taxes:	
Tithes.....	1,899,000
25 per cent. additional.....	848,000
Tax on sheep.....	408,960
" swine.....	6,480
" silk.....	11,000
" spirits.....	80,000
Customs.....	415,000
Tax on tobacco.....	380,000
Tapou (transfer-duty).....	198,000
Stamps.....	60,000
Tax on contracts.....	10,000
Judicial taxes.....	29,188
Miscellaneous taxes.....	95,800
Total indirect taxes.....	3,378,828

3. Divers receipts from salines, domains, forests, mines, telegraphs, postal administration, etc..	418,516
4. Tributes:	
Egypt.....	150,000
Roumania.....	8,000
Servia.....	4,600
Samoa.....	500
Mount Athos.....	144
Total tributes.....	168,544
Total ordinary revenue.....	4,776,588
EXPENDITURES.

11. " " Commerce.....	5,948
Sanitary Administration.....	17,078
Ministry of Public Instruction.....	25,411
13. Public works.....	157,147
Total expenditures.....	5,755,819
Deficit.....	1,009,281

If the floating debt, the expenses of war, and the payments due to the soldiers and others, are added to the deficit, it swells to twenty-two million Turkish pounds (\$94,200,000).

During the year 1874 the floating debt very largely increased, but the promise was made that it would be entirely consolidated. A de-

creed of September 20, 1874, authorized the Minister of Finance to enter a new foreign debt to the amount of 825,000,000 francs, with five per cent. interest, into the Great Book. Of this amount, 397,000,000 francs, at an issue-price of 43½ per cent., with back interest from June 13, 1874 (therefore real issue-price = 42½ per cent.), were issued in September, 1874. A financial report from Constantinople, dated May 10, 1875, estimates the entire debt of the Turkish Empire at 5,023,860,500 francs. In October, 1875, the Sublime Porte decreed that during five years, from January 1, 1876, the interest of the public debt be paid half in cash and half in five per cent. bonds. So much of the principal as would fall due during the same period should be paid in like manner. For this purpose a law of October 20, 1875, authorized the Minister of Finance to issue, in the course of the next five years, five per cent. gold bonds to the total amount of £35,000,000, or 875,000,000 francs, in series of £7,000,000 each.

The public liabilities of Turkey are officially divided into foreign or hypothecated debts, secured on special sources of revenue, and internal debts, known under a variety of names, issued at Constantinople alone, and therefore dependent only on a compact between the Porte and its subjects, and secured on the general credit and resources of the empire. The following table exhibits the foreign debts contracted from 1854 to 1874 (value expressed in francs: 1 franc = \$0.193):

No.	Year.	Rate of Interest	Issue-Price per cent.	NOMINAL CAPITAL.	REAL AMOUNT.	ANNUITIES.		Amount at the beginning of 1874.
				France.	France.	Interest.	Amortization.	
1	1854.....	6	80	75,000,000	60,000,000	3,110,000	2,140,000	51,822,500
2	1855.....	4	102½	125,000,000	125,800,000	4,000,000	2,250,000	104,042,500
3	1858.....	6	76	125,000,000	95,000,000	5,735,000	2,395,000	95,907,500
4	1860.....	6	58½	50,900,000	27,400,000	2,616,000	1,000,000	42,904,000
5	1862.....	6	65	200,000,000	135,000,000	8,220,000	7,750,000	135,980,000
6	1863.....	6	73	150,000,000	105,000,000	8,450,000	7,550,000	143,242,500

15	1873.....	6	58½	694,400,000	406,300,000	41,111,740	6,944,500	694,444,500
Total.....				4,447,700,000	2,700,400,000	212,946,990	58,950,750	4,000,571,750
Floating debt on January 23, 1874.....				824,665,441
Total.....				4,825,237,191

On July 27, 1876, the Turkish Government published a decree for the issue of paper-money. The first issue in notes of five, ten, fifty, and one hundred piasters, was fixed at 3,000,000 Turkish pounds (1 Turkish pound = \$4.39), but it was reported that more than twice the amount had been already issued at the end of November, 1876.

The Turkish Empire, exclusive of the vassal states and dependencies, has 429 post-offices. Besides, Germany, Austria, France, England,

Russia, Greece, and Egypt, support post-offices in Constantinople.

The Turkish Army is composed of the regular, irregular, and auxiliary troops. According to a law of June 22, 1869, and later decrees, the reorganization of the army is to be completed in 1878. It is to consist of 720,000 men, divided into the active army (about 220,000 men), the first reserve (80,000 men), the second reserve, and the sedentary army (corresponding to the German *Landwehr*). In this case

the yearly contingent would amount to about 37,500 men. The irregular troops consist of the *gensdarmes*, the Bashi-Bazouks, Spahis, Bedouins, and other volunteer corps, together about 50,000 men. The auxiliary troops are composed of contingents furnished by the provinces not yet subject to the *nizam* (active army) and the tributary states, and amount to about 80,000 men. In time of peace the army would number 157,667 men and 28,040 horses.

The Turkish Navy consisted, in 1874, of 19 large iron-clads, carrying 120 guns; 17 screw-steamers, of 640 guns; and about 80 other steamers: total, 150 steamers, carrying about 1,600 guns. The navy was manned by 80,000 sailors and 4,000 marine troops. The crews are raised in the same manner as the land-forces, partly by conscription and partly by voluntary enlistment. The time of service in the Navy is eight years.

The total length of railroads in operation in 1875 was 1,530 kilometres (1 kilometre = 0.62 mile) in Europe, and 274 kilometres in Asia. The length of telegraph-lines, in 1874, was 28,038, and of the wires 46,730 kilometres. The number of offices was 393, and the number of dispatches sent and received 910,130.

ROUMANIA.—The Turkish dependency of Roumania was, in 1875, governed by Prince Charles I., son of the late Prince Charles of Hohenzollern-Sigmaringen. Prince Charles was born April 20, 1839; elected Prince of Roumania, May 10, 1866; married, November 15, 1869, to Elizabeth, Princess of Newwied. A new ministry was formed on July 24, 1876, which was composed as follows: Presidency of the Ministry and Finance, J. C. Bratiano; War, Colonel J. Staniceano; Foreign Affairs, N. Jonesco; Justice, E. Statesco; Public Instruction and Worship, J. Chitzu; Agriculture, Commerce, and Public Works, D. Sturdza. The area is 46,795 square miles. The population was, at the close of 1873, estimated at 5,073,000, of whom 2,618,186 were males and 2,454,864 females. The movement of population from 1870 to 1873 was as follows:

YEAR.	Marriages.	Births, including Stillborns.	Deaths.	Stillborns.	Surplus (+) or Deficit (-) of Births.
1870.....	30,819	147,552	111,968	?	+ 35,589
1871.....	28,010	143,419	117,935	8,409	+ 30,484
1872.....	25,372	144,172	137,596	5,088	+ 6,576
1873.....	29,257	145,504	148,081	4,049	- 227

The great majority of the people (4,529,000) belong to the Greek Oriental Church. The Roman Catholics number about 114,200; the Protestants, 13,800; the Armenians, 8,000; the Lipowans, 6,000; the Israelites, 400,000; the Mohammedans, 2,000.

About 85 per cent. of the population belong to the Roumanian nationality. Of non-Roumanians, there are about 400,000 Israelites, 200,000 Gypsies, 85,000 Slavi, 39,000 Germans, 29,500 Hungarians, 8,000 Armenians, 5,000 Greeks, 2,000 French, 1,000 Englishmen, 500

Italians, 2,700 Turks, Poles, Tartars, and others. A recent Roumanian writer, Oretzulesco, "La Roumanie considérée sous le Rapport physique, administratif et économique," in the *Bulletin de la Société Géographique Roumaine* (Nos. 1-5, Bucharest, 1876), estimates the population belonging to the Roumanian nationality in other countries as follows: Hungary, 1,171,000; Transylvania, 1,500,000; other countries of Austro-Hungary, 360,100; Servia and Turkey, 1,600,000; Russia, especially in Bessarabia, 1,000,000; but other writers give the number of Roumanians in Turkey proper at only 200,000, and in Servia at 127,000.

The population of the largest cities is given as follows: Bucharest, 221,805; Jassy, 90,000; Galatz, 80,000; Botoshani, 40,000; Plöesti, 33,000; Braila, 28,272; Byrlat, 26,568; Kravova, 22,764; Ismail, 21,000; Giurgevo, 20,866; Foktchany, 20,323; Piatra, 20,000. In the budget of the year 1876 the revenue and the expenditure were estimated each at 97,894,427 lei (1 lei = \$0.193). The public debt on January 1, 1877, amounted to 620,710,213 lei. The aggregate strength of the permanent army and the "territorial" troops (which are localized in their respective districts) is 1,618 officers and 62,158 men, with 14,921 horses. The navy consists of 3 steamers and 6 gun-sloops. The imports, in 1874, were valued at 92,363,000 lei, the exports at 135,858,000 lei. The most important article of export is grain, especially wheat and maize. The movement of shipping in the most important ports, in 1875, was as follows:

PORTS.	ENTERED.		CLEARED.	
	Vessels.	Tons.	Vessels.	Tons.
Braila.....	8,938	501,954	3,435	681,541
Galatz.....	8,266	469,594	3,264	459,856
Giurgevo.....	576	156,421	672	156,941
Other ports.....	8,902	384,977	3,897	388,844
Total.....	11,977	1,464,946	11,468	1,562,182

In 1875 the length of the railroads in operation was 1,231 kilometres, and that of the telegraph-lines 3,820; that of wires, 6,842 kilometres. There were 236 post-offices; the number of private letters mailed was 5,072,686; the number of official letters, 966,479.

DANUBE COMMISSION.—The European Danube Commission, which was established in pursuance of Article XVI. of the Treaty of Paris, and embraces the representatives of the seven treaty-powers (Germany, France, Great Britain, Italy, Austria, Russia, and Turkey), has its seat at Galatz. It is not subject to the Roumanian Government, but has sovereign power over the lower course of the Danube down from Isaktehi; it manages the police, publishes regulations which have legal power, levies taxes, contracts loans, and disposes of its revenue for the furtherance of works of public usefulness. According to a new treaty, adopted by the Pontus Conference on March

18, 1871, the Danube Commission is to be continued for twelve years, and the works executed by it shall remain neutral. Its income for the year 1875 amounted to 1,567,145 francs, and its expenditures to 1,216,890. The following exhibits the movement of shipping at the Sulina mouth of the Danube, during the year 1875:

FLAGS.	VESSELS CLEARED.	
	Number.	Tonnage.
English	840	259,750

Others	70	24,899
Total	1,714	521,735

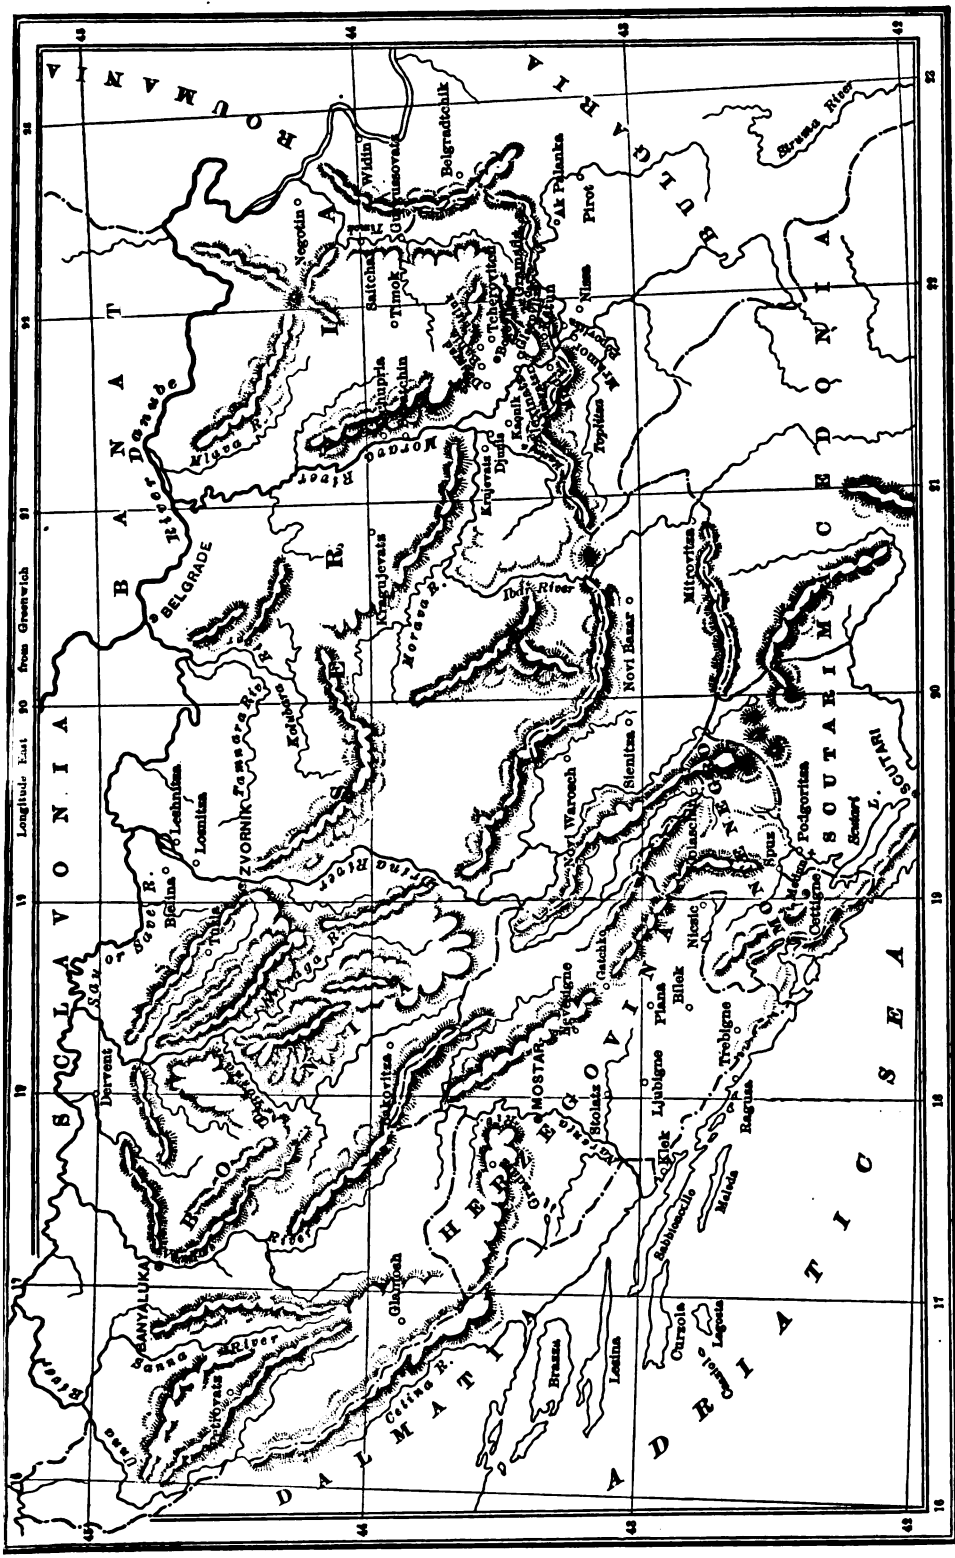

SERVIA.—The present ruler of Serbia, the other dependency of Turkey in Europe, Milan Obrenovitch IV., was born in 1854, and succeeded to the throne by the election of the Servian National Assembly, after the assassination of his uncle, Prince Michael Obrenovitch, June, 1868; was crowned at Belgrade, and assumed the government, August 22, 1872. He was married, on October 17, 1875, to Natalie de Kesho, the daughter of a Russian nobleman. Offspring of the union is a son, Prince Alexander, born August 14, 1876. The Servian ministry, in November, 1876, was composed as follows: Presidency and Foreign Affairs, Ristitch; Interior, Miloikovitch; Finance, Ivanovitch; War, General Nikolitch; Worship, Wassilyevitch; Justice, Gruitch; Public Works, Stevtcha. The legislative authority is exercised by the Skupshtina. The former Senate has been changed into a Council of State, which prepares the laws. The Skupshtina is composed of delegates chosen by the people, at the rate of one deputy to every 2,000 electors, and consisted, in 1875, of 134 members, of whom 33 were appointed by the prince and 101 elected by the people. According to the budget for the years 1875-'76, the revenue was 85,256,000 "tax-piasters" (1 piaster = 4 cents), and the expenditure 84,806,000 piasters. The area of Serbia is 16,817 square miles; population, at the close of 1874, 1,852,522, of whom about 5,000 are Mohammedans, 1,500 Jews, 360 Protestants, 3,400 Roman Catholics, and the remainder members of the Orthodox Greek Church. The capital, Belgrade, had, in 1874, a population of 27,605, exclusive of the garrison. The army actually under arms consists of 4,720 men, all infantry with the exception of 200 cavalry and a small artillery corps. The strength of the reserves is 150,490 men. The imports were valued, in 1872, at 27,400,000 francs; the exports at 27,300,000 francs. There were, in 1875, not yet any railroads in Servia, but the construction of a road from Belgrade to Nissa was begun; the aggregate length of the tele-

graph-lines was, in 1872, 1,376; that of the telegraph-wires, 2,051 kilometres. The number of private letters passing through the post-office was 740,838; the number of official letters, 431,275.

MONTENEGRO.—The principality of Montenegro, which was formerly a tributary state of Turkey, must now be regarded as an entirely independent state. It has an area of 1,701 square miles, and a population of about 190,000, nearly all of whom belong to the Greek Oriental Church, and the Servian nationality. All the men from seventeen to sixty, who are able to bear arms, constitute the national army, which numbers from 25,000 to 27,000 men. The country is divided into eight military districts, at the head of each of which is a *sedar*. The districts are subdivided into forty tribes, with a captain at the head of each. Subordinate to the captain are chiefs of one hundred and of ten men. In time of war every captain takes independently the necessary steps, until he can receive the orders of the *sedar* or the prince. The military organization is so complete that all the able-bodied men of the principality can be concentrated in one place within seventy-two hours.

The note of Count Andrassy of December 30, 1875 (*see ANNUAL CYCLOPEDIA for 1875*), was delivered to Reshid Pasha by Count Zichy, the Austrian ambassador at Constantinople, on January 31, 1876; and on the same day the ambassadors of England, Germany, France, Italy, and Russia, declared that they supported the Austrian propositions in all their points. On the 5th of February Reshid Pasha informed the ambassadors verbally, that a new *firman* decreeing reforms would be issued immediately for Bosnia and the Herzegovina. On the 20th, Reshid Pasha delivered to Count Zichy, as an answer to the Andrassy note, a memorandum promising to carry out the measures supported by the powers in Bosnia and the Herzegovina, immediately as to four points, and as soon as possible as to the fifth point. Previously, on the 11th of February, an *iradé* had been issued for the institution of certain reforms in these provinces. (The tenor of this *iradé* is given in another place in this article.)

The Prince of Montenegro had, about the 1st of January, expressed a desire to the Czar of Russia to be allowed to begin active operations. The Czar advised him on no account to depart from the policy of neutrality, and the prince gave assurances that he would be governed by this counsel. Nevertheless, reports prevailed during the month that Montenegro had negotiated a loan, and had made purchases at one time of 10,000 rifles and 60 muskets, and at another time of 15,000 muskets. In consequence of the threatening attitude of Turkey, it was represented, January 9th, that 3,000 Montenegrin guards had been armed with breech-loaders and sent to the frontier. A few days later a war-council of senators and military officers, summoned by the prince, resolved

that, if the concentration of the Turkish forces on the frontier was to take such proportions as really to carry into effect a repeated plan of blockading Montenegro on that side, it would be considered a *casus belli*, and the prince should summon all Montenegrins liable to duty and march into the Herzegovina; and that, in the mean time, Montenegro should keep an attitude of caution, but not disturb the peace, if Turkish operations developed nothing more serious than the present situation. An envoy was sent by Ali Pasha to Cettigne, requesting the prince to recall Pico Paulovitch, the insurgent commander, and to prevent the Montenegrins from joining the insurrectionists. The prince received the envoy coldly, and declined to interfere.

An article appeared in the Montenegrin official gazette during January, stating that Turkey was determined to make war upon Montenegro, justifying the insurrection, and denouncing the cruelty of the Turks. It declared that Montenegro had so far conformed to the requirements of international law. If Turkey acted differently, Montenegro would be freed from all restraint, and forced to adopt any measures calculated to protect herself and

gents into a valley, fought and defeated them. Raouf Pasha retired from the command of the Turkish force at the end of 1875, and was succeeded by Mukhtar Pasha, a nephew of the Sultan Abdul-Aziz. The new commander arrived at Klek on January 1, 1876, and proceeded directly to Trebigne, where he established his headquarters. The situation was not encouraging to the Turks. Since August, at least 30,000 men had been sent to the Herzegovina, of whom not more than 15,000 were fit for duty, and these were suffering for the lack of money, transportation, and medical supplies. An engagement occurred on the 18th of January, between the insurgents and the Turks, on the road from Ragusa to Trebigne, in which the insurgents claimed that they had defeated the Turks and inflicted a severe loss upon them. The Turks claimed to have gained the advantage in another engagement. On the 11th of February the Porte issued the following *iradé*, promising reforms in the disaffected districts:

The Sultan, with the object of ending the evils prevailing in the Herzegovina and Bosnia, and in accordance with the friendly advice of the great powers, confirms the provisions of his recent *firman*, and orders the execution of the following special reforms in the insurgent districts:

1. Complete liberty of worship.
2. Reform in the system of taxation.
3. Sale of waste lands to needy inhabitants, with facilities for payment.
4. The institution of mixed commissions in the capitals of Herzegovina and Bosnia, to insure prompt execution of reforms.
5. Augmentation of the sums applied to works of public utility in a proportion to be fixed by the advice of the mixed commissions.

These special reforms are granted for the welfare of those who, having been misled by perfidious counsels, desire to return to obedience. For these persons a general amnesty is proclaimed.

BELGRADE.

secure the future of the Servian race. The article concluded: "No regard for any one or any thing will fetter our action." The attention of the northern powers was called to this article, and they again remonstrated with the prince for countenancing the insurrection and allowing the article to appear.

The close of the year 1875 was signalized by a brilliant operation on the part of Raouf Pasha, the Turkish commander in the Herzegovina, in the relief of Nicsic, whose garrison had been reduced to their last rations. Two divisions were detailed to march into the Duga Pass from the north and south respectively; while a third division, diverting the insur-

BOSNIA.—Haidir Effendi, formerly an ambassador, was appointed president of the Bosnian Mixed Commission, and Varsa Effendi, an Albanian, president of the Commission for Herzegovina.

In connection with this *iradé*, the Turkish Government addressed a circular note to its representatives at the courts of the great powers, communicating to them the tenor of the Andrassy note. The circular also enumerated the reforms which the Sultan had ordered by his last *iradé*, as a complement to the favors previously granted, corresponding with the proposals of Count Andrassy, and which were to take effect without exception through-

out Bosnia and the Herzegovina. With regard to the fifth point, relative to the application of the direct taxes to meet the requirements of the provinces, the note explained that such

BOSNIANS.

an arrangement could not be brought into harmony with the general system of administering the Turkish finances. Nevertheless, in his solicitude for the provinces devastated by the insurrection, the Sultan had ordered that, as an addition to the amounts already applied to public objects in the Herzegovina and Bosnia, a certain sum should be set apart, the amount of which would be fixed on the basis of local requirements, after the evidence of the administrative authorities had been received and the corporations interested had deliberated on the point. The note concluded by stating that there did not appear to be any perceptible discrepancy between the facts in the case and the formal standpoint taken up in Count Andrassy's proposals. These declarations were supplemented by an *iradé* granting a general amnesty to all insurgents who within four weeks of its promulgation throughout the country should return to their homes. It announced that the Government would have the homes and churches of the returning refugees, where they had been destroyed, rebuilt at its own cost, and would furnish those who returned with the means of pursuing their usual employments.

HERZEGOVINA.—The European consuls at Mostar were advised by their respective governments to negotiate with the insurgents, and induce them to accept the propositions of the Andrassy note as a basis for the restoration of peace. The insurgents refused to entertain any propositions of the kind, as they had no faith in any salutary result following diplomatic negotiations. A meeting of a number of their

leaders was held at Suttorina, February 26th, at which a manifesto was issued against the acceptance of the terms offered by the powers. It was signed by the Waywode Lazar Sochtiza, the Archimandrite Melentii, Pico Paulovitch, and the Popes Bogdan and Stembkovitch. It pointed out the Porte's former failures to carry out promised reforms, and declared that the resistance of the Mohammedans would baffle every reform; the Mohammedans were even expected to revolt if an attempt were made to execute the reforms. The insurgents desired full freedom and independence—this, or nothing. The paper contained an expression of thanks to Austria for the care she had taken of the Herzegovinian refugees, to Garibaldi for his fatherly counsels, and to England that she had at last recovered from her partiality for Turkey. It compared the attitude of Serbia and of Montenegro, to the disadvantage of the former state. "Diplomatic combinations," it said, "are not our business; the European press may occupy itself with them: we must proceed to fight, to burn, to conquer. We cannot lay down our weapons so long as we are not granted an independence like that of Montenegro." The manifesto closed with an avowal that help was expected from Russia.

BULGARIAN COSTUMES.

DALMATIA.—Baron Rodich, the Austrian Governor of Dalmatia, was authorized by the Imperial Government to negotiate with the leaders on either side, so as to bring about a suspension of hostilities, in order that an opportunity might be given for carrying the proposed reforms into effect. With this view he visited the Turkish commanders, Ali Pasha and Mukhtar Pasha, at Ragusa, and the insurgents at Castelnuovo in the Suttorina. Mukhtar Pasha insisted, as a necessary preliminary, that Nicisic should be reprovioned from Montenegro. Baron Rodich endeavored to make an arrange-

ment for furnishing the garrison from Montenegro, but could only get its wants supplied from day to day. Early in March he met the chiefs of the insurrection at Cettigne. They declined to agree to a peace. Deputations of refugees communicated to him the general determination of that class not to accept a pacification or return home. They declared that they would resist to the last, rather than submit to the Turks again; they preferred letting their families starve in a Christian country to returning them to Turkish maltreatment. They had no confidence in the promises of the Porte. Baron Rodich informed them that the allowances to them would be discontinued in a few days, and that henceforward no powder would be allowed to cross the frontier. Baron Rodich held another interview with the insurgent leaders in the Suttarina, at Castelnuovo, on the 6th of April. On the previous day the chiefs had had a conference with M. Vesselitzky Bogdanovitch, a Serbian gentleman, who visited them partly on his own account and partly by the authority of the Russian chancellor, Prince Gortchakoff. The chiefs communicated to him, as the terms on which they would agree to a suspension of hostilities: 1. That all the Turkish troops in the Herzegovina should be concentrated in six fortified places, viz.: Niscio, Trebigne, Stolatz, Mostar, Fotcha, and Plevlje, and that the Christians and insurgents should keep their arms until the Mohammedans were disarmed. 2. That stores of provisions should be furnished by the Porte to last the population till the next harvest. 3. That the collection of taxes should be suspended for three years. 4. That the Christians should have a third of the lands held by the *rayahs*, on lease awarded to them. 5. That the reforms proposed in the Andrassy note should be immediately and fully carried out in those parts of Bosnia not in insurrection, so that it might be seen how the Mussulmans would behave in reference to them, and especially whether they would tolerate reforms in favor of the Christians. 6. That a commission of the European powers should be established, to look after the execution of the Turkish promises. A reply prescribing similar conditions was given to Baron Rodich. Although both parties refused to agree to a formal armistice, a suspension of hostilities was effected from the 28th of March to the 10th of April.

While the diplomatic agents were trying to bring about a peaceful understanding, military movements were suspended by the winter weather, and only a few engagements took place. These generally consisted of attacks by the insurgents upon the Turkish convoys conveying provisions to the garrisons. The most important of these occurred at Muratovizza, on the 6th of March. Five battalions of Turks, under the command of Selim Pasha, going to provision the fortress of Goransko, were attacked and defeated by the insurgents

under Paulovitch, with the loss, it was said, of 800 men killed, 675 rifles, and four rifled cannon. The Turks were pursued as far as Lipnik, four hours' march. The insurgents had in this engagement 1,150 men, and claimed to have lost only ten killed and twenty-five wounded.

Liubibratics, who had played an important part in the beginning of the insurrection, but had since lost much of his prominence as a leader through the superior influence and energy of Pico Paulovitch, had retired to Ragusa and busied himself in promoting the agitation through the journals, and by the help of their correspondents. He collected a small corps, consisting of Serbs, Russians, and adventurers from Italy, Poland, and France, designing to arouse to resistance the districts of Bosnia adjacent to the Herzegovina and to Servia, which had as yet taken but little part in the insurrection. The detachments of his force embarked from different points along the coast toward the last of February, and landed at Klek. With a command of between 500 and 600 men thus obtained, he marched, keeping close to the Austrian border, toward Linbushka. Near this place he met a company of Bashi-Bazouks, March 5th, who were out upon a reconnaissance, and repulsed them. On the 11th of March he reached the neighborhood of Imoschi, in Dalmatia, where he and the members of his staff were arrested upon Austrian territory. Among those who accompanied his expedition and were arrested with him was Mademoiselle Markus, a rich Dutch lady, who was an enthusiastic supporter of the insurgent cause, and had contributed liberally of her means and personal services to assist it. The prisoners were interned within Austrian territory, but by the end of March Mademoiselle Markus was again within the lines of the insurgents. The greater part of the command of Liubibratics, not having been on Austrian territory, escaped capture. Its members were dispersed, but eventually joined other bodies of the insurgents.

In April the needs of the garrison at Niscie became pressing. The understanding with Montenegro, by which provisions were supplied from day to day, though in quantities barely sufficient for the daily needs of the command, continued in force till the 10th of April, when the insurgents cut off the communications between Niscie and Montenegro. Mukhtar Pasha marched from Gatchko, April 13th, with a force of about 10,000 men and a convoy of provisions, for the relief of the garrison. At the north end of the Duga Pass he met with a fierce resistance from the insurgents, and it was only after four days' fighting that he succeeded, with his convoy considerably reduced, in reaching Presyeka. His force was exhausted, and he was obliged to retreat to Gatchko for reinforcements. On his retreat he was attacked and lost his mules. He started again from Gatchko, April 26th, with 18,000 men. As the sole object of the new expedition was to take

to Nicsic the provisions which had been left at Presyeka, the men took with them only the supplies they would need on the march. On the 28th the Turks encountered a force of 15,000 Herzegovinians, under Sotchitza, Paulovitch, and Pope Simonitch. A fierce engagement ensued, in which the Turks prevailed, and succeeded in penetrating to Presyeka. A part of the garrison of Nicsic had opened a way around to this place, and by this way the provisions were finally conveyed to that fort, April 29th. On the 30th of April Mukhtar returned to Gatchko, harassed by the enemy, having in the four days of fighting lost 3,000 men. The Herzegovinians claimed to have lost only 120 men. The insurgents also attempted to blockade Trebigne, the fort Drieno, west of Trebigne, and Govanitchka. The Turks, however, succeeded in introducing supplies into these places without encountering serious obstacles. The fortress at Nicsic was again provisioned in June without fighting. As the spring advanced, new reports were circulated of the spread of the insurrection through Bosnia. The public mind had been excited by ac-

counts of outrages which had been committed upon Christians by the Mussulman population. In several villages the Turks had risen against the Christians, killed numbers of them, and driven others away or subjected them to abuse. At the beginning of April the inhabitants of the Bilhacs district were reported to be in revolt, and that they were joined by several hundred Mohammedans. Five thousand insurgents were active in this district and in that of Travnik, and in a few days the insurrection was said to be under full headway along the Drin and the North Bosnian frontier. The Turkish commander, Ali Pasha, had here a force of about 10,000 men. The Vali, Ibrahim Pasha, reported to his Government that the insurrectionary movement had already become stronger than it had been at any time in the course of the year 1875. During the month of April there were twenty-seven bands of insurgents, spread over a wide extent of country, which were estimated to embrace not less than 15,000 men. These bands acted without any common plan, their most ordinary method of operation being to fall upon the

BUCHAREST.

isolated estates of the Mohammedan land-owners or upon the small town, or to lie in wait near the larger towns, watching their communications with the neighborhood, and occasionally seizing messengers or convoys of provisions. An important part in these movements was played at Orahiviza by the pretender to the Servian throne, Peter Karageorgevitch. He kept himself close by the Austrian boundary, so as to be able to cross over and put himself out of the way upon the sign of danger, while detachments from his camp scoured the country for several miles around. On the 7th of May occurred the massacre of the the consuls at Salonica. Emin Effendi, a Turk in high position, in whose family the office of state procurator of Salonica was hereditary, had abducted for his harem a handsome young Bulgarian girl, who was brought by railway to Salonica on the 6th of May. In the same train was her mother, who had followed in search of her. The two women did not know that they were upon the same train, but recognized each other at the station, and

rushed weeping into one another's arms. The cry was raised among the populace that the young woman was a Christian, who had been compelled to abjure her religion and become a Mohammedan. The Christians took the girl from the guards, and, seizing a vacant carriage belonging to the American consul, which stood near by awaiting the arrival of its owner, put her into it and carried her to the house of a Greek merchant, where she was hid. The next day the streets were filled with bands of excited Mussulmans demanding the return of the girl, and threatening a massacre of the Christians. Hearing of the tumult, the French consul, and the German consul, who was his brother-in-law, proceeded to the palace of the governor to demand that he cause order to be restored. The governor was found at the mosque, where a large mob was gathered, filled with rage at the affront that had been offered to the Mohammedan religion. The consuls were set upon by the mob with clubs, knives, and yataghans, and were murdered and mangled in the most horrible manner. This out-

rage aroused an intense excitement throughout the Christian world. The great powers took immediate steps to demand satisfaction for it, and guarantees against the repetition of similar scenes. France, Germany, Austria, and Italy, sent vessels-of-war to Salonica, and England dispatched a gun-boat to accompany the commission which the Turkish Government sent to investigate the affair. The chief perpetrators of the outrage were arrested and tried, and sentenced in June to penalties which, however, France and Germany declared were not satisfactory to them. In August the Porte paid to the families of the murdered consuls an indemnity of £40,000. The event was followed at Constantinople, May 12th, by a change in the ministry. The Grand-Vizier, Mahmoud Pasha, was overthrown, and Rushdi Pasha was appointed in his place; while Midhat Pasha, who had made himself the head of a new party opposed to further concessions to the demands of Russia, took a place in the cabinet without a portfolio.

The warning of the Andrassy note had so far produced no substantial result. The reforms promised by the Porte had not been realized; the discontent in Bosnia and the Herzegovina had not been diminished. On the 11th of May, Count Andrassy for Austria, and Prince Gortchakoff for Russia, met Prince Bismarck at Berlin, in a conference which continued till the 13th, to arrange what should be done next. The result was, that a new note was issued, more decisive in tone than the Andrassy note, in which allusion was made to more active proceedings that might be adopted in case the condition of affairs was not soon improved. This note, which was dated May 13th, and is known as the Berlin Memorandum, or the Gortchakoff note, declared, in effect, that the Porte, by accepting the Andrassy note, had pledged itself to Europe, and that the great powers had the moral right to expect the Porte to execute its pledges. The Sultan had done nothing to fulfill his promises, and the murders at Salonica must be regarded as a consequence of his weakness. An armistice of two months must be arranged between the Porte and the insurgents, on the basis of the five points mentioned in the Andrassy note, and of other points which had grown out of the righteous demands of the insurgents. If this armistice passed away without the object contemplated by the powers being gained, it would be necessary to consult concerning such more effective measures as the interests of general peace would demand, to limit the spread and growth of the prevailing disorder. The Berlin note was submitted to France, Italy, and England. France and Italy gave their adhesion to it; England declined to approve it, May 19th. Immediately afterward, England sent to Besika Bay, at the southern end of the Dardanelles, a fleet of twenty vessels, mostly iron-clads, with about 5,000 men, under the command of Admiral Drummond,

and increased her war-supplies at Gibraltar and Malta.

In the last days of May the Sultan Abdul-Aziz was dethroned, by a revolution in the palace, assisted by the *softas*. The leaders in the revolution were the ministers of the 12th of May, Midhat Pasha, the Grand-Vizier Mehemet Rushdi Pasha, the War-Minister Hussein Avni Pasha, and the Sheikh ul-Islam Karullah Effendi. The other leaders propounded to the Sheikh Karullah Effendi, as the authorized interpreter of the laws of Islam, the question: "If the commander of the Faithful becomes afflicted with a disorder of his faculties so that he cannot take cognizance of political affairs; if he, by personal extravagance, increases the burdens of the nation beyond endurance; if he, by wrongs which he causes, threatens the ruin of the empire and of the Mussulman community; if his rule is destructive—must he be deposed?" Karullah answered, "The law says, Yes!" and embodied the question and the answer into a *fetna*, officially signed, which had the force of a law with the Faithful. Armed with this *fetna*, the conspirators, on May 30th, proceeded to effect the deposition of the Sultan Abdul-Aziz. They kept their design carefully concealed till the moment for action arrived. Guards, consisting of soldiers on the land side and a vessel on the water, were stationed around the Palace Dolma Bagtshah. Hussein Avni Pasha was dispatched to the Prince Murad Effendi, the eldest son of the late Sultan Abdul-Medjid, and notified him that he must come to the palace to be made Sultan. The prince obeyed, and proceeded to the great hall of the Seraskierat, where he was received with homage, and the customary religious services were had for the authentication of the act of his accession. The proceedings of installation having been completed, Redif Pasha was sent to inform Abdul-Aziz that, "by the will of the people," he had been deposed, and must be taken to the Serail of Top Kapu, which had been assigned him as his residence. Abdul-Aziz was excited to a violent outburst of rage by this message; but when he was shown the guards posted around the palace, he exclaimed, "Great is Allah!" and fell into a stolid desperation. Accompanied by his mother, his sons, and eleven of his wives, he was taken to Top Kapu. The new Sultan was proclaimed as Murad V. An amnesty was immediately declared for all political offenses; the money in the imperial chest and the treasure of the mother of the Sultan Abdul-Aziz were turned over to the Minister of Finance. Abdul-Aziz was removed shortly afterward from Top Kapu to a pavilion of the palace of Toheragan, which was assigned to him as his future residence. Here he was found dead on the morning of the 4th of June. His body was examined by a council of nineteen physicians of various nationalities, who all agreed that he had killed himself by cutting his veins with a pair of scissors, and their verdict was published as the official explanation

of the cause of his death. On the night of the 15th of June a ministerial council was held at the residence of Midhat Pasha, at which were present, besides Midhat, the Grand-Vizier Mehemet Rushti Pasha, Hussein Avni Pasha, Minister of War, the Grand-Admiral (Capudan Pasha) Achmet Kisserli, and the Minister of Foreign Affairs, Reshid Pasha. Soon after midnight an officer rushed unannounced into the Chamber, fired repeatedly at Hussein Avni Pasha, and fell upon him with a knife. In the mean time all the lights were put out except a single candle. In the affray which followed, Reshid Pasha was killed by a shot from the assassin's revolver, the Capudan Pasha was shot in the shoulder and then stabbed, and Achmet Aga, a member of the household of Midhat Pasha, who attempted to arrest the murderer, was also killed. Finally a detachment of soldiers came in and captured the murderer. He was summarily tried, and was hanged on the morning of the 17th of June. His name was Hassan Beg. He was a Circassian, a brother of the third wife of the Sultan Abdul-Aziz, and had been during the reign of that Sultan adjutant of his eldest son, Yusuf Izzedin Effendi. According to the official statement of the affair, he felt aggrieved at Hussein Avni, and sought to gratify a personal animosity in assassinating him.

In Serbia the ministry of Kalievitch was at the head of the Government in the beginning of 1876. This ministry was decidedly in favor of peace, and was in opposition to the Skupshtina, the national Legislature. On the 22d of January the Skupshtina unanimously adopted the war estimates; on the 25th the Minister of War asked the Chamber to grant an additional £224,000 for army equipment, and urgency was voted on the measure. On the 20th of February the Minister of War issued an order calling out all men between twenty and fifty years of age. Disturbances occurred at the communal elections at Kraguyevatz and Semendria in the last days of February, occasioned by agitators who raised the revolutionary flag. About the same time Prince Milan made peaceful assurances to Prince Wrede, the Austrian representative at Belgrade, which caused a temporary subsidence of the war-feeling. Before the middle of March, however, pressure was brought by the war-party upon Prince Milan; on the 14th Belgrade was illuminated in honor of the battle of Muratovizza, in the Herzegovina. The Turkish troops massed upon the Servian borders having committed depredations, the Servian militia were mobilized and ordered to march to the frontier. A cabinet council was held to discuss the policy to be pursued by the Government, at which differences of opinion arose which threatened a crisis. On the 23d of March the levy of the reserve had resulted satisfactorily, with a promise that Servia would have 30,000 men disposable in case of war. On the 24th the purchase of 60,000 Chassepot

rifles for Servia was reported at Berlin. The Governor of Bohemia ordered the frontier to be watched, to prevent the conveyance of the rifles to Servia through Austrian territory. In April it was reported that Prince Wrede, the Austrian representative at Belgrade, had communicated to Prince Milan a threat that Austrian and Turkish troops would occupy Servia if she declared war against Turkey. Prince Milan laid Prince Wrede's communication before the ministers and a parliamentary committee, who unanimously advised him to pay no attention to it. On Sunday, April 9th, a mob at Belgrade made a warlike demonstration, and insulted two persons attached to the Austrian consulate. The Austrian Government made a demand for satisfaction, and an apology was promptly made. On the same day Prince Milan made an address at a popular festival, and said: "If the Turks attack us, we have sufficient force to repel them." On the 24th it was reported that the War-Office had ordered all militiamen to prepare for a foreign campaign, and that the troops had been ordered to march to the frontier. With the renewal of hostilities in the insurgent provinces the public mind became more inflamed, and fresh fuel was added by the atrocities in Bulgaria and the murder of the consuls in Salonica. Prince Milan was finally forced to comply with the popular demand, and the ministry of Kalievitch made way in May for the popular ministry, Ristitch-Gruitich. But, although the new cabinet was decidedly warlike in its composition, M. Ristitch hesitated to declare war, owing to the unprepared state in which the country still found itself; yet important steps were taken that Servia might be ready when the time came. On May 24th a decree was published providing for the issue of a loan of 12,000,000 francs, to bear interest, and to be payable within five years. On May 29th the Russian General Tchernayeff was appointed a general in the Servian army; a decree published soon after ordered the closing of the schools and courts in case of war, and troops were posted along the frontier. At the same time Servia had entered into negotiations with Montenegro, and on May 26th concluded with the latter a treaty offensive and defensive. In consequence of these proceedings the Turkish Government demanded an explanation from Servia, on June 9th, as to its preparations for war. Servia replied that it desired the preservation of peace, and by no means entertained any hostile intentions toward the Sublime Porte, and at the same time promised to send a special envoy to Constantinople, who should discuss with the Turkish Government the questions arising out of the situation. The negotiations of the great powers had gone on in the meanwhile, and on them the Servians had built great hopes. They had even gone so far as to formulate certain demands, which were essentially as follows: They claimed that Bosnia and Herzegovina

would be instantly pacified as soon as the direct rule of the Turks should cease there. This pacification ought therefore to be intrusted to Serbia and Montenegro; and in order that the pacification might be a permanent one, and as a consideration for the services rendered, Serbia should receive Bosnia and Montenegro the Herzegovina. The prince of Serbia was to remain entirely, and the prince of Montenegro only as far as the Herzegovina was concerned, a vassal of the Sublime Porte, and both princes were to pay tribute from the newly-acquired territory. These demands were brought to the notice of the great powers by a special envoy sent for that purpose to Ems. But the European diplomatists were decidedly opposed to a war of the two principalities against Turkey. On the other hand, a great enthusiasm for the war began to show itself among the Russian people. This, together with the fact

that a decided change had been gradually taking place in Western Europe in the feeling toward Turkey, led the Servians to regard the objections of the diplomatists as of secondary importance.

On June 28d the entire Servian forces were placed under arms, and on June 29th the Servian agent in Constantinople delivered a memorandum containing the demands of Serbia and Montenegro, mentioned in a preceding page. They were rejected by the Porte, as had been expected, and the declaration of war followed immediately, and M. Magazinovitch, the Servian agent, was recalled. On the same day Prince Milan left Belgrade for the army, and on his way published an address to the Servian people. In this address he said that he had had the intention of sending an ambassador to Constantinople, in order to come to an agreement with the Sublime Porte. But

CASTLES OF EUROPE AND ASIA, ON THE BOSPORUS.

the latter showed in every possible manner that it did not desire an agreement, and continued to send troops to the Servian frontier, ready to devastate the country with fire and sword. This danger Serbia must avert, and must even invade the neighboring provinces now in insurrection to restore to them peace and order. The Prince of Montenegro had given as the cause for his declaration of war the fact that the Turks completely blockaded the southern boundary of the principality; had shown themselves hostile toward it; had interrupted communication in the country; and had not been able to introduce or carry out the reforms which they had promised. On July 2d the prince announced to his troops, at Cettigne, that he had declared war against Turkey, and placed himself at their head in order to invade the Herzegovina.

The troops at the command of the belligerent parties at the opening of the war were as follows: In the Herzegovina, on the northern boundary of Montenegro, Mukhtar Pasha was in command of an army corps of about 20,000 men. The troops in Scutari and Podgoritza, south of Montenegro, amounted at the time to one brigade of 4,000 to 5,000 men only. The second army corps—that of the Danube—was in command of Eyub Pasha, and was composed of about 50,000 men. In Northwestern Bosnia, toward the Drina, Ali Pasha was in command of a strong division; and in Southwestern Bosnia Mehemet Ali, with a large brigade, occupied Sienitza, Novibazar, and Nova-Warosch, making in all 14,000 to 15,000 men. Another division was posted on the railroad from Salonica to Mitrovitza. These troops could be immediately reënfined by Bashi-

Bazouks, which represented the unorganized *Mustafiz* or *Landsturm*. In addition to these forces, 80,000 regular troops had been moved in May from Constantinople to suppress the Bulgarian insurrection, of which Abdul-Kerim, the Minister of War, had himself taken command. When the declaration of war came, the Porte not only called out the *redif* of the first, but also that of the second ban, and even drew a large number of troops from all the Asiatic corps. The troops already in Bulgaria were ordered to march still further north, and Abdul-Kerim Pasha was made commander-in-chief of all the troops operating against Servia.

In Servia, parts of the first ban had been called out as early as April. In the latter part of June the entire first ban was called out, and early in July the entire second ban was also ready for action. To these regular forces of Servia there were added volunteer corps of varying strength, which increased in time, of these some, however, could be employed at the outbreak of hostilities. These were mostly composed of Bosnians, Servians from Hungary, Bulgarians, and members of other Slavic tribes. Other countries were represented only in a few cases; even the Russians, who afterward took part in the war to such a considerable degree, were represented at the beginning in a few isolated cases only. The first ban was immediately moved to the frontier, and, together with the regular army, was divided into four armies, to which the second ban was afterward added. In order to prevent the Turkish gunboats on the Danube from attacking Belgrade and other cities on this river, the Servians intended to place torpedoes at the mouth of the Timok. Austria, however, interfered, and obtained from the Turks the assurance that they would not ascend the river with their gunboats above the mouth of the Timok, thus removing the necessity for the use of the torpedoes.

The four Servian armies were as follows:

1. The Army of the Drina, composed of the first and second bans of the first division, and numerous volunteer corps, principally composed of Bosnians. It numbered about 20,000 men, infantry and cavalry, and was under the command of General Alimpitch.
2. The Army of the Ibar, composed of the first and second bans of the division Western Morava, and volunteers from Southwestern Bosnia (Rascia), under the Archimandrite Dutchitch; this army also contained about 20,000 men.
3. The principal army, the Army of the South, was placed under the command of General Tchernayeff. It was composed of the first and second bans of the division Southern Morava, and of the first ban of the divisions Danube and Shumadiya, and had in all about 45,000 men.
4. The Army of the Timok was under the command of General Lieshanin, and consisted of the first and second bans of the fourth division, and several volunteer bodies, in all about

20,000 men. This left available the second ban of the fifth and sixth divisions (Danube and Shumadiya) and the entire reserve. On the morning of July 8d General Alimpitch crossed the Drina with fifteen battalions, leaving the second ban to guard the right bank of the river from its mouth to Liubovia, a distance of eighty kilometres. The column of the right wing landed at Popovo, put the Turkish advanced guards to flight, and was afterward attacked in a neighboring woods. The column of the left wing moved toward Janja, while the centre marched directly toward Bielina, soon encountering the Turkish fortifications, against which it brought to bear the artillery and infantry. The other two columns did not arrive until two o'clock in the afternoon, when the centre had been under fire for three hours. The fire was kept up until five o'clock, when the Servians proceeded to storm the town. The right wing succeeded in entering the fortifications, and, without making any provisions for holding the captured posts, pursued the retreating Turks into the streets of the city. Here the Servians were received by a well-directed fire from the houses; disorder began in their ranks, and they in turn were driven out. The disorder communicated itself to the centre, and Alimpitch was forced to retreat. He succeeded in restoring order, however, and retained a firm footing on the left bank of the Drina. Here he began to fortify himself, and gradually pushed his outposts nearer and nearer to Bielina. He received in his camp large numbers of fugitives from Bosnia, among whom were a great many capable of bearing arms. It was reported, although probably with some exaggeration, that up to July 12th he had organized 6,000 Bosnians. The Turks at this time abandoned Little Zvornik, which was immediately occupied and fortified by the Servians, thus placing them in complete possession of the right bank of the Drina. Alimpitch remained quiet in his camp, and by constant drilling succeeded in bringing his division to a high degree of military usefulness.

On the Timok, General Lieshanin assumed the offensive on July 2d. The first ban of the Timok division, and the "Holy Legion," a volunteer body, were concentrated in and around Saitchar, while the second ban held the entire Timok line. On the morning of the 2d General Lieshanin crossed the Timok, with 6,000 men, into the Turkish territory, leaving over 7,000 men behind. He immediately took up the line of march for Widin. In the neighborhood of Karaul he encountered the enemy; and as his troops displayed great difficulty in being managed, they were soon put to rout, and in the evening he returned to Saitchar with considerable loss. On the following morning Osman Pasha crossed into Servian territory, and immediately began to deploy his troops. This the Servian cavalry sought to prevent, but were forced to retire into Sai-

tchar. Lieshanin, who feared to have his line of retreat cut off, finally ordered the fortifications on the right bank of the Timok to be abandoned. The Servian loss on these two days was said to have been over 1,800 men, a great number of whom were killed, while the loss of the Turks is estimated to have been far greater—by some as much as double that of the Servians. But although Osman Pasha continued to harass the Servians, even as far south as Belgradshik, he did not intend to, nor could he, follow up his victory in the proper manner; for the principal Turkish army was as yet by no means in the condition to sustain him in any forward movements that he might make, and, besides, he was expecting a large addition to his forces. General Lieshanin had received, as early as July 7th, a full brigade as reinforcements.

General Zach, on the Ibar, crossed the boundary on difficult mountain-paths at Javor, intending to march upon Sienitza; on his right, Dutchitch was to disturb the region of Nova-Warosch, while on his left Colonel Antitch was to capture Novibazar, and, if possible, to threaten Mitrovitza, the terminus of the railroad from Salonica. On July 6th General Zach encountered a Turkish brigade under Mehemet Ali Pasha, who occupied a very strong position before Sienitza. He boldly attacked the Turks, although having considerably less men at his command than the latter; but his losses were very great, and he himself was wounded, so that he was finally forced to retire to Servian territory. Colonel Antitch advanced as far as Novibazar, fortified himself opposite to it, and then began to bombard the city and its works, without, however, effecting much; but as Novibazar was but poorly garrisoned, he succeeded in maintaining his positions. On his left flank he had sent out a scouting-party toward Mitrovitza. This party, although disturbing the country considerably, was too weak to capture Mitrovitza, or to prevent the disembarkation of Turkish troops at this point. Dutchitch had during this time accomplished little more than taking a few old barracks called forts, each containing but a few men. General Zach took his disaster at Sienitza very much to heart. Suffering from the effects of his wounds, he fell dangerously ill, was relieved of his command, and was replaced by Colonel Tcholak Antitch.

In the south, General Tchernayeff had left the division South Morava at Alexinat and Deligrad under the command of Colonel Milan Ivanovitch, with directions to cross the border on the left bank of the Morava and to threaten the fortress of Nissa. With the greater part of his army Tchernayeff marched to the left, to Bania and Gurgussovatz, and then, leaving Nissa on his right, intended to cross the border and march on Ak Palanka and Pirot. Ivanovitch, on July 2d, marched with two brigades, in two columns, toward Mramor and into the valley of the Toplitza. Here he

had a short engagement with the enemy, and seemed to have been successful in drawing the attention of the garrison of Nissa. Tchernayeff moved the greater part of his army on the road from Gurgussovatz to Ak Palanka, while a small detachment was ordered to advance to the right upon Nissa by way of Gramada, to watch it also on the right bank of the Morava, and thus impress the Turks with the idea of an intended siege of this fortress. A detachment on the left of the main army was ordered to march toward Pirot. On July 4th Tchernayeff appeared before Ak Palanka and Pirot, and, after a short engagement before the former city, entered them on the 5th. As, however, he did not receive the aid from the Bulgarians that he had expected, and as the misfortunes of Lieshanin on the Timok had cast a decided gloom over the Servian operations, Prince Milan ordered him to return to Servia; and on July 10th he left Ak Palanka and Pirot, and set out on his march back to Servia.

The Montenegrins, at the beginning of the hostilities, were divided into two corps: the one on the southern frontier, opposite the Turkish positions of Medun, Podgoritza, and Scutari, kept itself strictly on the defensive; while the other, on the Herzegovinian frontier, and openly allied with the insurgents, immediately took the offensive, and marched upon Stolatz in several columns. One column on the right, under Sotchitza, had marched toward Gatchko, taken several works before the city, and tried to surround it. Selim Pasha left the necessary garrison in it, and then marched with two battalions toward Nevesigne, intending to go from there to Mostar, where he was to meet Mukhtar Pasha. On the 11th he was attacked by a body of Montenegrins, and was only able, after several hours' sharp fighting, to continue on his way to Nevesigne, where he was reinforced. On July 11th the central column, said to have been led by Prince Nicholas in person, appeared before Stolatz, and, after a short engagement, occupied it, as well as the surrounding forts.

A very fortunate affair for the Montenegrins occurred at this time. The Austrian Government closed the port of Klek to the Turks, thus cutting off their shortest route to the Herzegovina. It helped them, however, but little; their forces continued to be scattered, even more so than at first. On the 16th they attacked Selim Pasha at Nevesigne, and forced him to retire to Blagni, where they defeated him again on the 17th. But now Mukhtar Pasha came up from Mostar with reserves, and on the 19th found before him but four Montenegrin battalions, which he defeated after a brave resistance. After this event the entire Montenegrin forces retired toward Grabovo.

With July 10th the offensive movements of the Servians came to an end, and their forces retired into Servia. The Turkish movements

did not begin until the last days of the month. During the three weeks that intervened comparative quiet prevailed, but few engagements occurring, and no movements of any account taking place.

In the latter part of July a combined action of the Turks against the Timok line began. The troops participating in this action were the corps of Achmet Eyub Pasha, from Nissa, reinforced on its right wing by the newly-arrived division of Suleiman Pasha and the strong division of Osman Pasha from Widin. The two principal points of the Servians on the Timok line were Gurgussovatz and Saitchar, with their surroundings. Eyub Pasha marched against Gurgussovatz. On his right wing Suleiman Pasha advanced on the line Pirotdandiralo, while on the left wing Hafiz Pasha led the advanced guard on the line Gramada-Derwent; this was followed by the reserve under Achmet Eyub himself. The entire force of Eyub Pasha at this time was estimated at 33,000 men, of whom, however, at least 10,-

000 remained in Nissa, while the mobile reserve, to an equal number, was posted along the road from Nissa to Gramada; so that, for the attack on Gurgussovatz, only 18,000 men were at the disposal of the general, who was afterward but slightly reinforced from the reserve. Osman Pasha commanded the operations against Saitchar, having at his disposal about 18,000 troops of the regular army. For the attack on the Timok line the Turks had, at the most, 35,000 men of the regular army, to which were added thousands of Bashi-Bazouks.

On July 28th Osman Pasha attacked the advanced post of Lieshanin at Weliki Iswor, forcing it to retreat to Saitchar. Large numbers of the inhabitants of this city now began to leave, and, after a short engagement on August 5th, General Lieshanin ordered the city to be abandoned. The remainder of the inhabitants then left, and in the evening General Lieshanin, with the garrison, retreated toward Paratchin. He did not, however, go as far as the valley of the Morava, but made a

THE DARDANELLES.

halt in the defiles of Bolyevatz and Lnkovo, his rear guard even at Planinitza, only thirty-five kilometres west of the Timok. On the 6th the Turks entered Saitchar, and, as there were no inhabitants on whom to practise cruelties, they contented themselves with burning nearly the whole town. While these events were occurring on the lower Timok, Hafiz Pasha, on July 29th, attacked the Servians at Gramada. The latter defended themselves bravely here, and at Derwent, on July 30th and 31st, but were forced to retire on Gurgussovatz; all the more so since Suleiman Pasha had also entered Servian territory by way of Pandiralo, and could be prevented from marching on by Horvatovitch only with the greatest difficulty. On August 2d Horvatovitch was forced to abandon all his advanced positions on the border, and then assembled his entire forces, about 6,000 men, in the position of Tresibaba, south of Gurgussovatz. Hafiz and Suleiman Pasha now united their forces, and Achmet

Eyub himself came on to assume the chief command of the troops in the attack on Tresibaba. Horvatovitch continued to defend this position on the 3d and 4th, but was forced on the latter day to abandon it to the vastly-superior enemy, as well as, on the 6th, Gurgussovatz, where he would have been in danger of being completely surrounded in case of longer delay. He retreated to the defiles of Bania, and left his rear-guard at Tchitluk and Zerovitz and entered into close communication with the camps of Alexinatz and Deligrad. During these events on the Timok, Tchernayeff, on August 5th, had dispatched a division of the troops in Alexinatz against Mramor, and into the Toplitza Valley. At Mramor this division encountered the forces under Ali Sahib and the garrison of Nissa, and was forced by them to retreat. The Turks, however, having gained this advantage on the Timok line, did not follow it up, but soon after abandoned their positions again; so that, on August 18th,

Horvatovitch again entered Gurgussovatz. They then concentrated all their forces at Nissa, for a combined attack on the positions Alexinat-Deligrad, on the southern Morava. These operations were under the chief command of Abdul-Kerim Pasha, the Minister of War. On August 19th Ali Sahib attacked the Servian positions on the left bank of the Morava. His object was to gain ground close to the left bank, so that a bridge could be built across the river, and thus establish an easier mode of communication between his army corps and that of Achmet Eyub than that previously used by way of Nissa and Mramor. At first he was successful, and drove the Servians back; but on the following day the Servians not only held their own, but attacked the Turks. On the 21st, Achmet Eyub attacked the Servian positions on the right bank. This forced the Servians to divide their attention, and on this day the Turks held the town of Teshitza. On the 22d the Turks began to build a bridge at this place; and although the Servians attacked the Turks during this and the following day, they were unable to prevent the completion of the bridge, and on the morning of the 24th the Turks began the main attack on Alexinat. The infantry succeeded in taking several Servian trenches, but were here so exposed to the enemy's fire that they were soon forced to retreat, with great loss. On the left bank, both the Servians and Ali Sahib kept very quiet during this day. On the evening of the 24th Abdul-Kerim received the news that Horvatovitch, who had occupied Gurgussovatz on the 18th, was on his way to the scene of action, and would in all probability attack the Turkish right wing at St. Stephan on the following morning. This, it is said, induced him to give up the operations against Alexinat on the right bank of the Morava; and on the same evening the Turks retreated upon Katun. The losses of the Servians in the six days' battle of Alexinat were 9 officers and 371 men killed, and 88 officers and 1,195 men wounded; in all, 1,613 killed and wounded: that is, 3.1 per cent. of the entire army. The losses of the Turks, although not definitely known, exceeded those of the Servians considerably. After the failure of these operations, Abdul-Kerim determined to unite his entire army on the left bank, effect a greater extension toward the west, to pass by Alexinat and Deligrad, and, if possible, to descend into the valley of the Morava on the left bank. Achmet Eyub was therefore ordered to cross over to the left bank of the river on the bridge at Teshitza, while on the right bank there remained but a few bodies of irregular troops. These, in order to cover the crossing of Achmet Eyub, attacked Alexinat on the 28th, and then retired again. On August 30th, Abdul-Kerim had gathered his main army on the left bank, near Teshitza. On the morning of September 1st he began to move forward, surprised some advanced Servian positions at

Zitkovatch, on his right wing, but particularly strengthened his left wing, so that his intention to seize the pontoon-bridge of Bogovista, and thus interrupt the communication between Alexinat and Deligrad, became apparent. This he did not accomplish, although the Servians were forced to retire to the right bank of the river. Tchernayeff then reënforced the exposed outposts Djunis and Kaonik, and at the bridge which covered the road from Krushevatz to Deligrad. At the same time he occupied the entire right bank of the Morava, from this bridge to Alexinat. The retreat of the Servians to the right bank had been attended by considerable disorder, so that at the time it seemed that the Servians had received their death-blow. But the Turks having, according to their custom, burned all the villages on their way, with the provisions in them, and not having money to procure any from without, were forced, against their will, to allow Tchernayeff to reorganize his forces. This he did, and, leaving but a few battalions in Alexinat, concentrated his main force on the road from Deligrad to Djunis, with his headquarters in Deligrad. After having let the week pass by quietly, the Turks, on September 7th, 10th, and 11th, made four different attempts to obtain a strong position on the left bank between Korman, Adrovatz, and Bogovista, and there to gain the right bank between Deligrad and Alexinat by erecting a bridge. All these attempts failed; and the same was the case with an attempt of Colonel Horvatovitch to cross to the left bank, in the rear of the Turkish forces, and attack them. At the other points, on the Drina, Ibar, and Timok, comparative quiet prevailed during this period, the only operations of any importance being those of Colonel Despotovitch and 2,000 Bosnians, who, having been sent out by Alimpitch from Popovo to revive the insurrection, gathered about him the remaining bands of insurgents, and captured the fort Petrovatz, between the Unna and Sanna, on August 14th, and, on September 8th, the city of Glamosh.

When the Montenegrins began their retreat before Mukhtar Pasha, on July 20th, they went by the way of Nevesigne, Gatchko, and Korito. Mukhtar Pasha, who followed on more westerly courses, intended to get ahead of them and cut off their retreat to Montenegro. At the same time, the Turkish corps of Albania was to attack the southern border. On July 27th Mukhtar Pasha arrived at the Convent of Plana, twelve kilometres north of Bilek, and from there intended, on the 28th, to march to the left and attack the Montenegrins in the rear. He therefore ordered the commander of Bilek to take a position to the east of the city and to await further orders, so that he might be able to assist Mukhtar Pasha, if necessary. At the same time, the commandant of Trebigne was ordered to send up a train of provisions—which was certainly a difficult order to fulfill, considering that he had very scant provis-

ions himself. On July 28th Mukhtar Pasha began his march from Plana in three columns; but he had hardly set out on his march when, to his astonishment, he was attacked by the Montenegrins. The advanced guard retreated as the Turks began to reply to their fire, and on its retreat was reinforced by other corps on its flanks. The Turks, as usual, were accompanied by Bashi-Bazouks, who, as soon as they saw that there was to be serious fighting, took to flight, in which they also involved some of the other battalions. As soon as the Montenegrins saw this, they set out in pursuit, cutting down with their long knives every one who came in their way. The Turkish regulars were cut down while fighting bravely for their artillery. Among the prisoners taken was Osman Pasha, the commander of one of the three Turkish columns. Mukhtar Pasha retreated to Bilek, and, not finding here the necessary means to restore his army, continued his retreat to Trebigne, where he arrived on July 29th. The allied Montenegrins and Herzegovinians immediately separated into several corps, one of which took up its position before Bilek, while the others blocked up the roads leading from Trebigne. Mukhtar Pasha, from Trebigne, sent repeated messages to Constantinople asking for aid, which in due time was rendered him. On September 2d he set out from Trebigne with 12,000 men, crossed the frontier on the 8d, at Saslap, and, after a short engagement at Zagoni, entrenched himself at Saslap, the Montenegrins taking up their positions opposite to him. Occasional engagements now took place between the different outposts, until, on September 16th, complete quiet began to prevail here also.

On the southern border of Montenegro the Fort Medun was the centre of operations. The Montenegrins succeeded in surrounding it, and repulsed several attempts of the Turks to provision it. In the beginning of August the Turks received considerable reinforcements; and on August 15th Mahmoud Pasha, the Turkish commander, attacked the Montenegrins, but was completely routed, his loss being very great. Mahmoud Pasha was placed before a court-martial, and was succeeded by Dervish Pasha. On September 6th he crossed to the north shore of Moratcha, at Rogatzi, and there attacked the Montenegrins, but was repulsed with great loss. On September 11th he attempted another battle, on the heights of Welie Brdo, northwest of Podgoritz, but was forced to retreat to the latter city.

When, on the 18th of July, Servia and Montenegro had declared war against the Porte, the other dependencies of Turkey occupied various attitudes toward her. The Herzegovina and Bosnia were in a state of insurrection; outbreaks had taken place in Bulgaria, which had been repressed with severity. Egypt hesitatingly sent the contingent of troops which the Porte demanded. Roumania occupied a neutral position, stationing a corps of

observation on her borders and carefully guarding her neutrality. On the 16th of July the Roumanian Government addressed a memorandum to the guaranteeing powers, expressing the desire that the Porte, which was accustomed to speak officially of the principalities of Moldavia and Wallachia, should recognize the historical name of Roumania for the united principalities, as the other powers had done. It demanded the acceptance of a Roumanian agent as one of the accredited diplomatic body at the Porte, and that this agent have jurisdiction over Roumanians settled in Turkey; a definition of boundaries in respect to the islands of the Danube which belong in part to Turkey and in part to Roumania; and, further, it demanded for Roumania the privilege of making trade, postal, telegraphic, and delivery contracts; that passports issued by the Roumanian Government should be recognized by the Porte; and, finally, asked for a rectification of the boundaries on the lower Danube, so as to assure a free use of the stream to the adjacent Roumanians. The powers declared these demands to be at present inopportune. In Crete, discontent prevailed at the failure of the Government to carry out the reforms promised in the constitution granted in 1869; the Christian judges and councilors had resigned their offices in expression of this discontent; the people, relying upon the statute, refused to respect the judgments of the Mohammedan judges, and a dead-lock existed in judicial administration.

The declaration of war by Servia was followed by a like act on the part of Montenegro. Under these circumstances the European powers were constrained to consider what policy they should adopt in reference to the new questions that were arising. The Porte announced its intention not to consider Servia and Montenegro as war-making powers; toward Servia, in particular, as being a vassal-state, it would place itself on the ground of formal right. Turkey had signed the Convention of Ghent of 1864, which provided for the immunity of the sanitary organizations of belligerents and for the care of the wounded; but it was given out that Servia and Montenegro not being recognized as belligerents, the provisions of the treaty would not be held binding as to them. The international committee of the Convention of Ghent addressed a memorial to the powers which had signed the convention, in which, without discussing the political question set up by Turkey, it suggested that any power as party to the convention was under a double obligation, in case of a civil war, to observe its rules toward its own subjects; for the Treaty of Ghent was not a mere political document, but was a declaration of high moral and humanitarian principles. It did not become necessary for the powers to act collectively upon this subject, for, at the suggestion of the English Government, the commanders of the Turkish forces

gave orders that the principles of the convention should be regarded by their commands in their dealings with the insurgents.

Sultan Murad V., soon after his accession, revealed his inability to cope with the difficulties of his situation, and his incapacity became more manifest as these difficulties grew with the louder demands of the powers upon the Porte. He became afflicted with fits of melancholy and stupor. A physician was called in from Vienna, who examined into his case and gave the opinion that he was in an irresponsible condition; his disease could not be pronounced incurable, yet it demanded a complete release from business, and stimulants. Acting upon this advice, the Ministerial Council decided, August 31st, that Murad should be deposed. The Sheikh ul-Islam was consulted, as he had been in the case of Abdul-Aziz, and, he

giving a favorable response, the deposition was effected. Abdul-Hamid, a younger brother of Murad, who was born September 22, 1842, was named as the new Sultan, and was girded with the sword of Osman on the 7th of September. On the 9th of September he issued an Imperial *hat*, confirming the ministers and other high officers in their positions, and projecting reforms. Halil Redif Pasha was appointed Minister of War in the place of Abdul-Kerim Pasha, who took the command of the army, and Savfet Pasha was appointed Minister of Foreign Affairs, in the place of the minister who had been murdered by Hassan.

The powers, particularly England and Austria, exerted themselves both at Belgrade and at Constantinople to secure an armistice. The Servians insisted steadfastly upon the accomplishment of the single purpose with which

CONSTANTINOPLE.

they had gone to war—the freedom of their Slavic brethren—and would listen to no propositions which did not further that end. The birth of a crown-prince, August 14th, and the birthday of Prince Milan, August 23d, were made the occasion of the presentation of an address from the Permanent Commission of the Skupshtina to the Prince, which was filled with warlike expressions. The “name-day” of the Czar of Russia was celebrated in Belgrade, September 11th, with great honors, as the festival of one who would deliver the country from Turkish oppression. The Porte, during the reign of Murad, had been accustomed to reply to the pressure of the powers for the institution of reforms, that a plan of reforms to embrace the whole empire was under consideration, and required time to ma-

ture it; and the state of health of the Sultan Murad was pleaded as an additional reason for forbearance. After the deposition of Murad the powers renewed their demands with energy. As a condition to an armistice with Servia, the Porte demanded that Servia should ask for it; Turkey had no interest in demanding an armistice, and could only take it into consideration as a preliminary to peace. The English ambassador requested Savfet Pasha to name conditions of peace, which the powers might consider and impose upon Servia if they approved them; but an armistice, he said, was indispensable, to give the powers time to come to an understanding concerning the proposed conditions. The Turks replied that the council was engaged in drafting the conditions, and would soon impart them to the powers;

they could not recognize the insurgents as belligerents by granting them a formal armistice, but their officers in the field could be instructed to refrain from hostilities while the terms were under consideration, provided the Servian troops likewise avoided acts of war. On the 14th of September Savfet Pasha communicated to the ambassadors a long memorandum, reiterating the objections of the Porte to granting an armistice except in connection with distinct propositions for peace, and stating the conditions on which Turkey was willing to make peace. These conditions were in substance as follows:

1. The Prince of Servia shall go to Constantinople and pay homage to the Sultan.

2. The four fortresses which were placed under the care of the Prince of Servia in 1867, but of which the title remained in the possession of the Turkish Government, shall be again occupied by the imperial army.

3. The Servian militia shall be abolished; the number of troops allowed for the preservation of order in the interior of the principality shall not exceed 10,000 men, with two batteries.

4. Servia shall return to their homes all inhabitants of the neighboring provinces who have escaped to her territories, and shall destroy all the fortresses which have been recently built, leaving only those which belonged of old to the principality.

5. The amount of annual tribute to be paid by Servia shall be increased by such a sum as shall be sufficient to pay the interest upon the amount of the war-indemnity to be assessed upon her.

6. The Ottoman Government shall have the right to build a railway to connect Belgrade with the line from Nissa, and operate it with officers of its own appointment.

Toward Montenegro the *status quo ante bellum* should be observed. These points differed totally from the conditions which the disaffected provinces were seeking to gain, as well as from the views of the powers. The counter-propositions of the powers were communicated to the Porte September 23d. Without taking any notice of the six points of the Turkish proposition, they demanded an autonomy for Bosnia and the Herzegovina, to be more clearly defined in future; a port for Montenegro; an organization for Bulgaria like that adopted for the Lebanon, with a Christian governor appointed by the Porte, and other privileges to be hereafter defined; for Servia, the *status quo ante bellum*, except that an indemnity for the damages occasioned by the war might be assessed from the principality. While waiting the answer of the Porte to these propositions, the powers engaged in correspondence with each other to determine what course should be taken in case they were rejected. They continued to insist upon an armistice, and finally effected an arrangement that the Turks should desist from hostilities from the 16th to the 25th of September, while Servia and Montenegro should be restrained from action during the same period. On the 16th of September General Tochernayeff and his officers, at a festival given at Deligrad, proclaimed Prince Milan King of Servia. On the

next day the proclamation was formally published to the troops of the army of the Morava; deputations of the people were present, and an address to King Milan I. Obrenovitch, duly signed, was read by General Protitch, "in the name of the heroic Servian people." The account of the proceedings was telegraphed to Prince Milan, and a deputation was dispatched to Belgrade in order to communicate to the Prince in person the feeling of the army. This affair caused disquiet to the powers and the adjacent territories, particularly to Austro-Hungary, and threatened to embarrass the negotiations for peace. Prince Milan was constrained to disavow it, and caused the deputation from the army to be turned back before it had reached Belgrade.

On the 7th of October the ambassadors of the powers made to the Porte a formal proposition for an armistice of six weeks. On the 12th the Porte replied, proposing an armistice of six months, from October, 1876, to the 31st of March, 1877, during which period the Servians would be expected not to disturb those places of which the Turks were in possession; the introduction of foreign volunteers and of arms and ammunition for Servia and Montenegro should be prohibited; and all proceedings tending to excite discontent in the neighboring provinces should be avoided. In connection with this proposition, the Porte submitted the draft of a new constitution which had been prepared for the whole empire. It provided for a National Assembly, to consist of deputies chosen by the capital and the vilayets, who should be called to Constantinople for three months in each year to settle the taxes and the budget; and for a Senate, who should be named by the Sultan; the attributes of the great state-bodies were to be more fully defined by a special law, which was now under consideration by a high commission of Mohammedans and Christians, sitting under the presidency of Midhat Pasha. Another law, for the reorganization of the provincial administrations, would provide for the execution of the present law in the vilayets, and for the extension of the active and passive right of election, and would also introduce in general the practical reforms which the European powers had sought only for Bosnia and the Herzegovina. The general councils of the vilayets would likewise have the right to watch over the execution of the laws and regulations; and in the intervals between the sittings of the general council the administrative councils chosen by the people should attend to affairs appertaining to the jurisdiction of the general council, and supervise the administrative officers in their functions. Further, it had been decided to improve the method of assessing and collecting the taxes in the whole empire; to elevate the communities as much as possible; to give to them the control of the disposition of a part of the public revenues; to reorganize the police; and, in short, to make as complete a provincial or-

ganization as could be attained. Prince Gortchakoff notified the other powers that Russia was not ready to agree to an armistice of six months, but would prefer one of six weeks, as had been proposed by England, and which could be renewed as often as there might be occasion. General Ignatieff, the Russian ambassador at Constantinople, who had been absent on leave for a considerable time, returned to Constantinople October 19th. He immediately conferred with the other ambassadors, and reiterated in a more definite form the demand of Russia for a security of the autonomy of Bulgaria, Bosnia, and the Herzegovina, and for the introduction of the reforms promised by the Porte, under the control of a commission of the European powers. Here arose a question whether the commission would not have to be supported by an armed force against the fanaticism of the Mussulmans. The action of General Ignatieff was very unwelcome to the Turks, for they regarded it as an indication that Russia had determined upon an ultimatum with the alternative of war. Unfavorable reports came from Roumania, that Prince Charles had refused to proclaim the accession of Abdul-Hamid as Sultan; that he had given permission to Russia to march troops through his territory; and that a great gathering of troops in the neighborhood of Galatz had been ordered for the autumnal manœuvres. On the 23d of October a plot was discovered, which had been formed among the adherents of the late Sultan Abdul-Aziz and his Grand-Vizier Mahmoud Pasha, for the deposition of Abdul-Hamid and the installation of Yusuf Izzedin Effendi, son of Abdul-Aziz. At the head of the conspiracy were Meshid-Din Effendi, former teacher of Yusuf Izzedin, who had been a candidate for the office of Sheikh ul-Islam; Riza Beg, former director of the archives; the Circassian, Ramiz Pasha, and several eminent ulemas. Mahmoud Pasha was to be Grand-Vizier of the new Sultan. The conspiracy had numerous adherents among the fanatical Moslems, and was to be carried into effect on the 1st of November. It was betrayed, the leaders were disposed of secretly, and many of their adherents were deported to the islands of the archipelago.

The suspension of hostilities was interrupted by several slight conflicts. An attempt was made to extend it till the 2d of October, but Servia refused to recognize it. On the 28th of September General Tchernayeff sent out detachments to Trnyan, Nozrina, and Buimir, and burned the Turkish bridges at Trnyan. At this time the situation of the two armies was as follows: The left wing of the Serbian army extended along the left bank of the Djunis stream from Weliki Shiliegovatz to Djunis, and was intrenched and supported by rifle-pits on the right bank of the Djunis. The centre, likewise intrenched, facing the south, stretched along the line from Djunis to opposite Korman, on the Morava. The left wing was

posted at Alexinat, and extended above and below the intrenched camp from Bogoviste to Glagowitza; it had in its rear the stone bridge on the road from Krushevatz to Deligrad, and three field-bridges over the Morava, all of which were guarded by intrenchments. The reserve was concentrated at Deligrad. The Turkish army, whose lines formed an angle, with the point to the north, had its left wing between Kruschie and Lower Adrovatz, and its right wing along the left bank of the Morava, from Lower Adrovatz to Teshitza. The Turks were, like the Servians, protected by rifle-pits. They had a force of about 60,000 infantry, including 6,000 irregular Arnauts and Circassians, 2,500 regular cavalry, and 15 batteries with 90 guns. Connected with this force were smaller detachments in the valley of the Toplitza at Prokoplie and Kurshumlie, and on the Babina Glava, containing together about 4,000 men; at Nissa a reserve of 20,000 men and four field-batteries; and at Ak Palanka and Pirov between 4,000 and 5,000 men. The Servians had in their lines between 60,000 and 70,000 men, including all the reinforcements which they had received from abroad. On the 29th of September General Tchernayeff made an unsuccessful assault upon the Turkish left wing. On the 30th the Turks opened an effective artillery-fire and established themselves without serious opposition upon the Ludak stream, occupied Gredetin and Peshtchanitza, and on the following day the heights on the left bank of the stream. In the first days of October the headquarters of their advance-guard were removed to Peshtchanitza. No further actions worthy of notice occurred till the 19th of October. On that day the Turks, having been previously reinforced from Nissa, made a general attack upon the Serbian lines. The battle, which was most actively fought around Weliki Shiliegovatz, lasted till dark, and resulted in important advantages to the Turks. As one of its results, they were enabled to withdraw their lines from the narrow corner between the Ludak stream and the Morava, and at its close they possessed an effective front to the north against the Serbian position between Gladova and Korman. On the 23d they had gained possession of both sides of the Djunis stream, and held a position between the right wing and the left wing and centre of the Serbian army. This would have been dangerous to them if General Tchernayeff had still held the bridge at Alexinat with sufficient force to make a strong attack from it upon the right flank of the Turks. But this was not the case. Believing that it would not be necessary to make a stand at this position, it had been left in charge of a force so small as to be incapable of performing an effective movement. Consequently the Servians were kept upon the defensive. A vigorous cannonade was kept up against their intrenchments on the 28th. On the 29th a number of intrenchments were carried by

storm, and General Horvatovitch was driven back upon Krushevatz, and General Tchernayeff upon Deligrad. The Turks next turned their forces against Alexinatx and Deligrad, and captured the former post, the strongest fortified position in Servia, on the 31st of October. There seemed now to be no possibility of staying the advance of the Turks, when Russia interfered with her ultimatum, on the evening of the 31st of October, demanding the assent of Turkey within forty-eight hours to an armistice of two months, as the alternative of her recalling her ambassador from Constantinople. The armistice was agreed to, and the Servians were released from their peril.

The Servian army of the Morava was seriously distracted, during October, by dissensions and jealousies between the Russian volunteers and the Servians, which nearly led to its disintegration. Among the Russian volunteers were numerous adventurers, who had entered the Servian service merely for the sake of the plunder. These caused so much trouble by their depredations among the peaceful population, that the Minister of War ordered them to be sent over the Servian frontier. General Tchernayeff was indignant at this order, and demanded the removal of Nikolitch, the Minister of War, from his office. The latter was, however, supported by his colleagues, and Prince Milan sent the Minister of the Interior to Deligrad to pacify Tchernayeff. Disputes and crimination arose also between the Russian and Servian officers, and the quarrel came to so high a pitch as to threaten the total destruction of discipline, and a revolt, when the signing of the armistice gave a new aspect to affairs.

On the Drina the Servians retreated to their own territory, some of the men being sent to aid Tchernayeff on the Morava, and others were granted an indefinite furlough. The Turks, on the other hand, made great preparations for a general attack, in which, however, they were interrupted by the armistice. On the Ibar, where the Servian troops had been placed, under the command of the Russian general Novoselov, no engagements of any importance took place. On the Timok, also, everything had remained quiet during this time, as the army of the Timok had been united with that of the Morava in August, and only a few detachments remained to guard the line of the river. In Montenegro, Mukhtar Pasha had quietly remained in his intrenchments during the cessation of hostilities. On October 9th a sharp engagement took place at Saslap, in which the Turks were driven from their positions, when they retired to Turkish territory. At the same time, the insurgent leader Dakovitch marched with 4,000 men to Liubigne, which he burned. The insurgents also obtained several advantages at other points; so that, when the armistice was proclaimed, the Turks were in a very precarious position on the northern border of Mon-

tenegro, while on the southern border their condition was not much better. Here Dervish Pasha undertook, on October 9th, an invasion from Saresh up the Zeta. He made considerable progress until, on the 16th, he was attacked by Stanko Radonitch at Zagarash, and was defeated; and on October 21st Fort Medun also capitulated. Thus, at the beginning of the armistice, the Montenegrins had cleared their whole country of the Turks; and while the Servians saw portions of their country in the hands of the enemy, the Montenegrins had gained a firm footing on Turkish territory, and were in a position to dictate their own terms.

When the Turks agreed to an armistice of two months, Savfet Pasha, with the consent of Ignatieff and the representatives of the other powers, reserved to himself the right to regulate the details. One of the most difficult of these details was the settlement of the lines of demarkation between the belligerents. For this purpose each of the six great powers appointed two military commissioners, who should cooperate with the Turkish, Servian, and Montenegrin commissioners. For Servia it was an easy matter to determine the line of demarkation; and although some difficulties presented themselves in the case of Montenegro, still the matter was also definitely settled here by December 12th. The blockade of Nicsie by Montenegro was continued, but a regular provisioning of the city was ordered from Montenegro, and under the supervision of that power. As soon as the armistice was definitely settled upon, the Servian militia was dismissed.

After the interview of Lord Loftus with the Emperor Alexander (*see* RUSSIA), Earl Derby assumed the initiative in calling a conference of the great powers of Europe, and for this purpose issued, on November 4th, a circular letter to the British representatives at the courts of the other powers. This letter was as follows:

Her Majesty's Government believe, from the communications which they have received from the powers, that there is a general feeling that the only solution of the questions arising out of recent events in Turkey is to be found in a conference, but that there is some hesitation felt in formally proposing it. Under these circumstances, and with the view of bringing about a satisfactory settlement of those questions, her Majesty's Government have determined to renew the suggestion made by them on the 5th ultimo, and to take the initiative in proposing that a conference should be held forthwith at Constantinople, in which all the guaranteeing powers and the Porte should take part, and each Government should be at liberty to appoint two plenipotentiaries to represent it. Her Majesty's Government further submit, as the basis for the deliberations of the conference:

1. The independence and the territorial integrity of the Ottoman Empire.

2. A declaration that the powers do not intend to seek for, and will not seek for, any territorial advantages, any exclusive influence, or any concession with regard to the commerce of their subjects which those of every other nation may not equally obtain.

This declaration was made on September 17, 1840, in the protocol for the pacification of the Levant, and again August 3, 1860, in regard to the pacification of Syria.

3. The basis of pacification proposed to the Porte on the 21st of September, viz.: (a) The *status quo*, speaking roughly, both as regards Serbia and Montenegro. (b) That the Porte should simultaneously undertake, in a protocol to be signed at Constantinople, with the representatives of the mediating powers, to grant to Bosnia and Herzegovina a system of local or administrative autonomy; by which it is to be understood a system of local institutions which shall give the population some control over their own local affairs, and guarantees against the exercise of arbitrary authority. There is to be no question of the creation of a tributary state. Guarantees of a similar kind to be also provided against maladministration in Bulgaria. The reforms already agreed to by the Porte in the note addressed to the representatives of the powers on the 18th of February last, to be included in the administrative arrangements for Bosnia and the Herzegovina, and, so far as they may be applicable, for Bulgaria. Her Majesty's Government desire that your Excellency should propose to the Government to which you are accredited a conference on these bases; and you may state that, if this proposal meets with general acceptance, her Majesty's Government will lose no time in appointing a special ambassador to proceed to Constantinople to take part in the conference. If the other powers thought it advisable, her Majesty's Government would not object to their plenipotentiaries joining in preliminary discussions with the plenipotentiaries of the other five guaranteeing powers, before the opening of the conference. These discussions to be on the same bases as those proposed for the conference.

The answers of the great powers to this note were all favorable, Russia being the first to accept the conference, by a note of November 7th from Prince Gortchakoff to Count Schuvaloff, the Russian ambassador in London. Turkey alone held out for some time, but was finally induced by England to consent to it. The desire of Earl Derby that the powers should send special envoys to the conference, besides their regular ambassadors, was not complied with by all. Germany, Russia, and Italy, considered their ambassadors as sufficient. Austria, however, represented by Count Zichy, sent, in addition, Baron Calice; France, represented by Count Bourgoing, sent Count Chaudordy; Turkey recalled Edhem Pasha, its ambassador in Berlin, to assist Savfet Pasha; and England sent the Marquis of Salisbury to assist Sir Henry Elliot. Lord Salisbury, who set out from London on November 20th, stopped on his way at Paris, Berlin, Vienna, and Rome, and arrived at Constantinople on December 5th. At all of these capitals he had conferences with the leading statesmen. Immediately after his arrival in Constantinople Lord Salisbury entered into communication with the Porte and with the ambassadors of the other powers, but into particularly intimate relations with General Ignatieff, the Russian ambassador. On December 11th the representatives of the six great powers of Europe met in a *salon* of the palace of the Russian embassy for a preliminary consultation, and on the following day the preliminary conference was

formally opened with the exclusion of the Turkish representatives. The preliminary conference came to an end on December 21st; and General Ignatieff, in informing the Porte of the fact, invited it to send its representatives to the definite conference, which was to begin its sessions on December 23d. The result of the preliminary conference had been that the powers had agreed to restore the *status quo* in Serbia and Montenegro; but, to prevent needless quarrels in future, Lesser Zvornik was to be annexed to Serbia. Montenegro was also to receive an addition to its territory by the corners of Herzegovina protruding into Montenegro at Trebigne and Nicsic, and a strip of land connecting it with the coast, with a port. A detailed plan had also been proposed to secure the political autonomy of Bulgaria, which was, however, so disadvantageous to the Porte, that the latter considered itself forced to reject the proposition. A weak point of the conference appeared, even before the preliminary conference had met. This was, that it intended to consider the condition of the Slavic Christians only, while the other Christians and the Jews were not taken into consideration at all. This fact aroused great commotion among the Greek subjects of Turkey. They were particularly opposed to the creation of the two vilayets of Bulgaria, as proposed by the conference, the western vilayet encroaching upon territory which originally belonged to the Hellenic tribe. In Roumania, Prince Charles, in opening the Chambers in November, made a decidedly peaceful speech, advocating strict neutrality, and the addresses of both Houses were animated by the same spirit. But they immediately granted the demand of the Government for a credit of four millions to keep the army on a war-footing up to the end of the year, and without opposition adopted laws which provided for exigencies in case of war. On the Danube the Government erected fortifications to guard against a sudden attack of the Turks, while troops were concentrated at the most important crossing-places. The Roumanian statesmen now demanded that Roumania should be declared an independent neutral state, under the guarantee of the great powers like Belgium and Switzerland. As long as this was not done, it would always be forced, in case of a conflict, to ally itself with a power which could protect it. Demeter Bratianu, the brother of the President of the Ministry, was sent to the conference as the Roumanian representative, with instructions to present these views. In Serbia, the Ristitch ministry on several occasions handed in their resignations, but had been induced to retain their offices. When the conference assembled, Prince Milan addressed himself to General Ignatieff, requesting him to propose the representation of Serbia in the conference. This request remained unanswered. The Jews, who were rather better situated in Turkey than the

Christians, but occupied a very subordinate position in Roumania, and the Armenians also, demanded that their cases should be considered by the conference.

In the middle of December an important change in the Government had taken place. The Grand-Vizier Mehemet Rushdi Pasha resigned, and Midhat Pasha succeeded him. This put an end to a long struggle between the two foremost men at the Porte. It was known—though, of course, it was officially denied—that an irreconcilable difference of opinion had prevailed between the Grand-Vizier and Midhat Pasha with respect to the constitution which had been drawn up under the direction of Midhat, and was then ready for promulgation. Both urged their conclusions on the new Sultan, Abdul-Hamid, whose short reign had been entirely occupied by their rivalry. The Sultan seemed to have been convinced that, whether the constitution be valuable or worthless, whether it be destined to endure or to perish, the acceptance and promulgation of it would be expedient as a political act at that time. This had, no doubt, been intimated to the Grand-Vizier, and the consequence was the resignation of the highest functionary of the State.

On December 23d the conference itself assembled, when the delegates of the Porte, Savfet Pasha and Edhem Pasha, were also present. According to diplomatic etiquette, the presidency was given to Savfet Pasha. This first sitting was filled up with the necessary formalities, the exchange of credentials, and the delivery of the result of the preliminary conference to the Turkish representatives. Hardly had the members of the conference taken their seats, when the firing of guns announced, as Savfet Pasha explained to them, the adoption of the new constitution as prepared by Midhat Pasha. The following is a transcript of the principal clauses:

The indivisibility of the Ottoman Empire. The Sultan, the supreme Caliph of the Mussulmans and sovereign of all Ottoman subjects, is irresponsible and inviolable. His prerogatives are those of the constitutional sovereigns of the West. The subjects of the empire are called, without distinction, Ottomans. Individual liberty is inviolable, and is guaranteed by the laws. Islamism is the religion of the state, but the free exercise of all recognized creeds is guaranteed, and the religious privileges of the communities are maintained. No provision investing the institutions of the state with a theocratic character exists in the constitution. The constitution establishes liberty of the press, the right of petition to both Chambers for all Ottomans, liberty of education, and the equality of all Ottomans before the law. They all enjoy the same rights, and have the same duties toward the country. Ottoman subjects, without distinction of religion, are admitted to the service of the state. Taxation will be equally distributed; property is guaranteed, and the domicile is declared inviolable. No person can be taken from the jurisdiction of his natural judges. The Council of Ministers will deliberate under the presidency of the Grand-Vizier. Each minister is responsible for the conduct of the affairs of his department. The Chamber of Deputies may demand the impeachment

of the ministers, and a high court is instituted to try them. In the event of the Chamber adopting a vote hostile to the ministry on any important question, the Sultan will change the ministers or dissolve the Chamber. The ministers are entitled to be present at the sittings of both Chambers, and to take part in the debates. Interpellations may be addressed to the ministers. Public functionaries will be appointed in conformity with the conditions fixed by law, and cannot be dismissed without legal and sufficient cause. They are not discharged from responsibility by any orders contrary to law which they may receive from a superior. The General Assembly of the Ottomans is composed of two Chambers, the Senate and the Chamber of Deputies, who will meet on the 1st of November in each year, the session lasting four months. A message from the Sultan will be sent to both Chambers at the opening of each session. The members of both Chambers are free with regard to their vote and in the expression of their opinions. Electors are prohibited from imposing binding engagements upon their representatives. The initiative in proposing laws belongs in the first place to the ministry, and next to the Chambers, in the form of propositions. Laws must be first submitted to the Chamber of Deputies, then to the Senate, and finally to the imperial sanction. The Senate is composed of members nominated by the Sultan and chosen from among the most eminent personages in the country. The Senate votes the laws already passed by the Chamber of Deputies, and returns to the latter, or rejects, any provisions contrary to the constitution or to the integrity or safety of the state. In the event of a dissolution of the Chamber of Deputies, the general elections shall be held and the new Chamber meet within six months from the date of dissolution. The sittings of the Chamber of Deputies are public. The deputies may not be arrested or prosecuted during the session without authority from the Chamber. The Chamber votes the laws article by article, and the budget by chapters. There is to be one deputy for every fifty thousand inhabitants, and the elections will be made by secret ballot. A special law will determine the mode of election. The mandate of a deputy will render him ineligible for any public office, except for a ministry. Each legislature will continue for a period of four years. The deputies will receive 4,600 francs for every session, which will last from November to March. The senators are appointed for life by the Sultan, and will receive 2,800 francs monthly. Judges are irremovable. The sittings of the tribunals are public. The advocates appearing for defendants are free. Sentences may be published. No interference can be permitted in the administration of justice. The jurisdiction of the tribunals will be exactly defined. Any exceptional tribunals or commissions are prohibited. The office of Public Prosecutor is created. The High Court, which will try ministers, members of the Court of Cassation, and other persons charged with the crime of *less Majeste*, or of conspiracy against the state, will be composed of the most eminent judicial and administrative functionaries. No tax can be established or levied except by virtue of a law. The budget will be voted at the commencement of each session, and for a period of one year only. The final settlement of the budget for the preceding year will be submitted to the Chamber of Deputies in the form of a bill. The Court of Accounts will send every year to the Chamber of Deputies a report upon the state of public accounts, and will present to the Sultan, quarterly, a statement showing the financial condition of the country. The members of the Court of Accounts are irremovable. No dismissal can take place except in consequence of a resolution adopted by the Chamber of Deputies. The provincial administration is based upon the broadest system of decentralization. The Councils-General, which are elective, will deliberate upon and control

the affairs of the province. Every canton will have a council, elected by each of the different communities, for the management of its own affairs. The communes will be administered by elective municipal councils. Primary education is obligatory. The interpretation of the laws belongs, according to their nature, to the Court of Cassation, the Council of State, and the Senate. The constitution can only be modified on the initiative of the ministry, or of either of the two Chambers, and by a vote of both Chambers, passed by a majority of two-thirds. Such modification must also be sanctioned by the Sultan.

In the second session of the conference, on December 28th, it was resolved to extend the armistice up to March 1st, after but little opposition from General Ignatieff.

A ministerial crisis occurred in Roumania in February. The Minister of Education had refused the salaries of two irremovable professors in the budget, and on that account was censured by the Senate. The entire ministry was about to resign in consequence, when the Senate declared that it had only meant the Minister Majorescu. The latter then resigned, and was replaced by M. Carp. The Foreign Office was given to Calceanu, and the Finances to Strat. In March, M. Strat, in presenting his estimates, showed that there was a deficit of 12,587,894 francs in 1875, and that there would be one of 12,894,427 francs for 1876. If the amounts voted by the Chamber during the present session be added, the total deficit would amount to 28,675,426 francs. In order to provide for the deficit, he proposed to take up a loan of 80,000,000 francs, or to issue Treasury notes. In consequence of this proposition the President of the Second Chamber, Prince Ghika, resigned, and was succeeded by the vice-president, M. Boerescu. The Chamber of Deputies finally refused to contract a new loan, and permitted the Government to issue Treasury notes to the amount of 16,000,000 francs only. As the Senate refused to agree to this measure, it was closed on March 15th, and new elections were ordered. The elections for the Senate took place in April, and resulted as follows: thirty-four National Liberals, twenty-six Conservatives, and eight boyars of the Ghika-Boerescu party. The ministers in consequence handed in their resignations, and General Florescu was called upon to form a new ministry. On April 27th the extraordinary sessions of the Chambers were opened by General Florescu, who read the message of the prince in both Houses, and then explained the ministerial programme. In the foreign policy the strictest neutrality was to prevail, while at home law and order and economy were to be the rule of the day. Among the Government bills was one to reduce the expenditures in the budget by 3,000,000 francs. After considerable trouble with the Senate, the new ministry resigned early in May, and another, belonging to the party Bratiano-Vernescu, took its place. With this ministry the Senate declared itself satisfied; and although the Chamber of Deputies declared

that it would put no obstacles in its way in the financial question, it was dissolved. The new elections, which took place in June, resulted in a complete victory for the National Liberals. The Chambers were opened on July 8d. The Lower Chamber immediately demanded the indictment of the former minister, Lascar Catargiu. This led to the resignation of the ruling ministry, and a new one was formed, with Joan Bratiano at its head. But little business was transacted during the short session that now followed. The Chambers met again in November, when the former ministers, Florescu and Catargiu, were indicted.

Of the three Sultans who reigned in Turkey in the course of 1876, Abdul-Aziz and Abdul-Hamid have been treated in special articles. (See ABDUL-AZIZ and ABDUL-HAMID.) The immediate successor of Abdul-Aziz, Sultan Murad V., occupied the throne for a few weeks only. He was educated in Paris, and it was therefore expected that he would show himself, as Sultan, favorably inclined to Western civilization, and introduce far-reaching reforms. But during his stay in Paris he had unfortunately given himself up to dissipations to such a degree that his health was seriously threatened. Having returned to Turkey, he continued his excesses, being especially a victim of intemperance, so that his nervous system was shattered. Upon the dethronement of his uncle, Abdul-Aziz, in May, 1876, he was called to the throne; but it soon became evident that his mind was affected, and that he was not able to fulfill the hopes placed in him. In consequence, his brother, Abdul-Hamid, was appointed Regent on July 29th; and on August 31st Murad was dethroned, and Abdul-Hamid proclaimed Sultan in his place.

By far the ablest among the three grand-viziers who succeeded each other during the year was Midhat Pasha, who was appointed in December. He was born at Constantinople in 1822, and was educated there. His father was a *cadi*. At the age of twelve Midhat entered the public service. When nineteen years old he accompanied Faik Effendi, member of the Audit-Office, to Syria, as his secretary. After three years' stay in Syria he returned to his office at Constantinople, and was shortly appointed secretary to the Governors of Konieh and Caramania, in Asia Minor. He next became chief reporting-clerk to the Council of Justice at Constantinople. A few years later he was again sent to Syria on a financial mission, and on his return became second secretary to the Council of Justice. During the Crimean War he was sent to put down brigandage on the east coast of Roumania, and was completely successful. In 1857 he was sent to inquire into the conduct of the ex-Governors of Rustchuk and Widin, and to pacify Bulgaria. He now obtained a short leave of absence, during which he visited London, Paris, etc. and on his return was made first secretary of

the Council of Justice. In the end of 1860 he was made a pasha, with the rank of vizier, being named Governor of Nissa, to which were subsequently added the districts of Uskul and Prisrend. In 1864 he was appointed Governor-General of the Vilayet of the Danube (geographical Bulgaria). Subsequently he became Governor-General of Bagdad, then member and President of the Council of Justice, and, later still, for a short time grand-vizier. On his resumption of the presidency of the Council he played a prominent part in dethroning Abdul-Aziz, and shortly after escaped from the assassin of Hussein Avni Pasha. (Both events have been referred to in a preceding page.) He is regarded as one of the most energetic statesmen of Turkey. Among the many examples which are related of his energy, an incident in his administration of Bulgaria is of special interest. Having carefully watched the secret movements of the Panslavists in Bulgaria, he had several of the chief agitators arrested whom he thought to be Russian emissaries. Ignatieff at once interceded in behalf of the prisoners, and the timid Grand-Vizier of that time, Ali Pasha, instructed Midhat by telegraph not to proceed any further against the prisoners, but to send a full report of their case to Constantinople. Midhat laconically replied by telegraph: "To-day two culprits convicted, sentenced, and executed. Report will be sent." The threatening remonstrances of Ignatieff induced the Grand-Vizier to send a second more urgent telegram, to which Midhat, with undisturbed laconism, replied: "Two other culprits sentenced, and executed. Report by mail follows." Frightened at the rage of Ignatieff, Ali Pasha telegraphed to Midhat: "I forbid you to take any other step, upon penalty of deposition and severe punishment. I expect telegraphic report." To which Midhat replied: "Report sent by courier; the explanations will be found satisfactory. Quiet has been restored. The four last culprits will be executed immediately."

TURKISTAN is the name given to a region of Central Asia extending from the Caspian Sea eastward, half-way across the desert of Gobi, bounded on the north by the Russian dominions, and on the south by Persia, Afghanistan, India, and Thibet. It is divided naturally by the lofty table-land of Pamir into the two divisions of East and West Turkistan. Western Turkistan comprises the khanates of Khiva and Bokhara (both of which have been brought under Russian influence), the former khanate of Khokan (now annexed to Russia), Wakhan, Badakhshan, Koondooz, including Khooloom, and Balkh (lately incorporated into Afghanistan). Eastern Turkistan, also called Chinese Tartary, comprises the region east of the table-land of Pamir, of which Kashgar is the principal state. The most important events in the history of Turkistan during 1876 relate to the annexation of Khokan to Russia, and to the movements of the Emir of Kashgar in

maintenance of his asserted independence of the Chinese Empire.

Khokan, or *Khokand*, until recently one of the three great khanates of West Turkistan, was annexed to Russia early in 1876, when it received the name of Ferghana, after the historic name of the valley of Ferghana. Its area is about 23,270 square miles. Its population is estimated by the Russians at about 960,000 souls; but Mr. Eugene Schnyler, in his "Turkistan," thinks this is far too great, and that 600,000 souls would be a large estimate.

The exports from Khokan to Russian or Siberian markets amounted in 1872 to 2,189,886 rubles, and the imports from Russian territory to 1,273,520 rubles. Khokan, the chief town and capital of the khanate, has 500 mosques, and about 75,000 inhabitants; Andijan has about 20,000, and Marghilan about 30,000 inhabitants. General Kaufmann, having been ordered to ravage the territory between the Naryn and the Sir Darya, the seat of the troublesome Kiptchaks, set out from Namanghan on January 6th, with a command of 800 men. He marched up the northern bank of the Sir Darya, and on January 14th reached Sarkhaba, having destroyed everything on his route. He then proceeded to Andijan, near which place the enemy were massed in force. After several engagements and a short bombardment, he occupied this city on January 21st, the enemy retreating toward Assake. General Scoboleff advanced toward that place on January 30th, and took it after a hard struggle. The towns of Shahrikhana and Marghilan then sent in their submission. On the 1st of February, Abderrahman, leader of the insurgents, made proposals for a conference, which was held on February 5th. The result was the unconditional surrender of himself and several other chiefs. Pulad Beg, another leader of the insurrection, was driven to the Alai Mountains, where he was captured shortly after the annexation of Khokan to Russia, and was brought to Marghilan and hanged for the murder of twelve Russian soldiers whom he had taken prisoners. Nasr ed-Din, the new Khan of Khokan, who had been driven away by the insurrection, returned to Khokan by invitation of his subjects, on February 2d. Although Nasr ed-Din had formerly been recognized by the Russians, General Scoboleff was ordered to occupy the city of Khokan, and did so on February 20th. Nasr ed-Din Khan, Abderrahman Aftobatcha, and other troublesome persons, were sent prisoners to Tashkend. On the 2d of March the Czar of Russia issued a ukase declaring that he had thought it proper, in order to assure the safety of the southeastern borders of Turkistan, to annex the territory of the khanate of Khokan, and ordered it to be organized into the province of Ferghana, as a part of the general government and military district of Turkistan. The command of the province was assigned to the Governor-General of Turkistan, assisted by a military

governor. Several tribes of the Kara-Kirghiz, principally the important tribe of the Bargas, refused to submit to Russian rule, concentrated themselves at Kulja under the leadership of Abdullah Beg, and began committing depredations upon the Russian settlements. General Scoboleff was dispatched with a considerable force to reduce them to submission. On the 6th of April General Kolpatchoffski announced the complete submission of all the chiefs except Abdullah Beg and two of his companions. In June some of the Kara-Kirghiz again gathered for raids in the Ferghana Valley. Colonel Bogoluboff was sent from Khokan, with 200 Cossacks, in pursuit of them. He attacked and put to flight a band of 400. Subsequently, about the 1st of August, General Scoboleff led a division against their most difficult positions, between the rivers Turuk and Schota, leaving garrisons at various points to protect the settlers against their irruptions. Near the town of Papan he attacked the enemy in their fastness, surrounded, and overcame them. The Kara-Kirghiz fled, leaving behind them 2,000

In Eastern Turkistan the khanate of Kashgar is steadily rising to greater importance. The trade with Russia seems to be increasing. The exports from Kashgar to Russia from the 1st of June, 1871, to the 1st of May, 1872, including goods sent by way of Khokan, were estimated to amount to 1,100,000 rubles. During 1874 there were exported from Kashgar to Russian territory, through the Naryn Pass, about 1,662,000 lbs. of merchandise, including 721,729 pieces of *daba* (or the native coarse cotton goods), worth 324,000 rubles; and there were imported to Kashgar 1,678,000 lbs. of goods, and 85,382 sheep, worth about 256,000 rubles. In 1875, to the 22d of July, the exports were 1,111,000 lbs., including 881,560 pieces of *daba*, worth about 396,000 rubles; and the imports were 402,000 lbs. of goods, and 54,049 sheep, worth about 162,000 rubles. The country is very elevated, and its climate is one of extremes. The ordinary crops and fruits of the temperate zone are produced in quantities sufficient for the wants of the inhabitants, but not for export. Among the sources of mineral

KASHGAR.

production are mines and beds of gold, jade, copper, lead, coal, silver, zinc, sulphur, alum, and sal-ammoniac. Among the articles of trade are stags'-horns, swan's-down, tiger and panther skins, various furs, wool, and musk. The manufactured articles are inferior to those of Western Turkistan.

The ruler of Kashgar, Mohammed Yakub Beg, is still regarded by the Chinese Government as a rebel, and a large army was sent out against him in 1874. (See ANNUAL CYCLOPEDIA for 1875, article KASHGAR.) The accounts of the operations of this army during 1876 are indefinite, and not well connected.

head of cattle, which were divided among the inhabitants of the valley. On the 31st of August General Scoboleff had pressed over the Sofi-Kurgan and Argak Dowan, to the left bank of the Amoo Darya, and had hunted the Kirghiz to their hiding-places. By the 1st of October his command had returned to Khokan. The expedition had been entirely successful; all the tribes of the Alai Mountains had been subjugated and placed under regular government. Since the conquest of the Ferghana Valley the Russian Government has pursued earnestly, and with much success, the policy of colonizing the more fertile portions of it with settlements of Russians and Cossacks. The country proves to be admirably adapted to this purpose. Postal communication has been established between Khojend and Khokan.

Yakub Beg has steadily cultivated friendly relations with the English. He formerly appeared suspicious of the Russians, but has more recently shown a disposition to be on good terms with them. Upon the conclusion of the campaign of General Kolpatchoffski against the Kara-Kirghiz, Beg sent an address to him, in return for which Captain Kurapatchkin, of the general staff, and three other officers, were dispatched to visit Beg at Kashgar, and communicate a reply to his letter. These officers remained some time at Kashgar, and then went to Toksoom, 1,200 versts to the eastward, to meet the emir. The conclusion of a commercial treaty between Russia and Kashgar was mentioned during the summer.

TWESTEN, AUGUST DETLEV CHRISTIAN, a distinguished theologian of Protestant Ger-

many, born in Glückstadt, April 11, 1789; died in Berlin, January 8, 1876. He studied at the University of Kiel, and was appointed professor at the same university in 1814. In 1835 he accepted a call to the University of Berlin, as the successor of Schleiermacher. He was also appointed *Oberconsistorialrath* and member of the *Oberkirchenrath* (Supreme Ecclesiastical Council), where he displayed considerable administrative capacity. In his history of German theology Twisten represents, with Nitzsch and Tholuck, that section of the followers of Schleiermacher which, beyond the standpoint of their master, proceeded to a

more positive and orthodox position, though continuing to adhere to the fundamental principle of the United Evangelical Church. The most celebrated of his works are his "Lectures on the Dogmatics of the Evangelical Lutheran Church" ("Vorlesungen über die Dogmatik der evangelisch-lutherischen Kirche," 2 vols., 1826-'37). Among his other works are a critical edition of the three œcumenical creeds and the unaltered "Augsburg Confession," essays on "Flaccius Illyricus," on Schleiermacher's "Ethics: an Outline of Analytical Logic" ("Grundriss der analytischen Logik," 1864), and others.

U

ULE, OTTO EDUARD VINCOENZ, a German naturalist, born January 22, 1820; died August 7, 1876. After 1851 he devoted himself entirely to writing popular works on natural sciences. Among his works are: "Untersuchungen über den Raum und die Raumtheorien des Aristoteles und Kant" (1850); "Das Weltall" (3 vols., third edition, 1858); "Physikalische Bilder" (2 vols., 1854-'57); "Wunder der Sternwelt" (1860; second edition, 1876); "Die neuesten Entdeckungen in Afrika, Australien und der arktischen Polarwelt" (1861); "Warum und weil" (1868; third edition, 1875); "Alexander von Humboldt" (1869); "Aus der Natur" (1871); and "Die Erde" (1878). He was one of the founders and editors of *Die Natur*, one of the leading German periodicals devoted to natural sciences. In 1863 he was elected a member of the Prussian House of Deputies, in which he belonged to the Party of Progress.

UNITARIANS. *The Year-Book of the Unitarian Congregational Churches for 1877* gives lists of 355 Unitarian churches and 393 ministers in the United States. The principal missionary or benevolent society of the Unitarians is the *American Unitarian Association*, which was founded in 1825 and incorporated in 1847. *The Year-Book* gives lists of three local missionary associations, allied in purpose to the American Unitarian Association, eighteen local conferences, six Sunday-school societies, fifteen ministerial associations, thirteen religious and charitable and miscellaneous societies, and two undenominational organizations for Christian work (on the plan of the Young Men's Christian Association). The Divinity School of Harvard University, Cambridge, Mass., has a faculty of three instructors and lecturers, with twenty-three students, and the Meadville Theological School, Meadville, Pa., has a faculty of four resident and three non-resident professors, with seventeen students.

The seventh biennial meeting of the *National Conference of Unitarian and other Christian Churches* was held at Saratoga, N. Y., beginning September 12th. The Conference was attended by 382 delegates, repre-

senting about 150 parishes and religious associations in the several States and Territories, and the cities of Montreal and Toronto, in Canada. In the absence of the president, the Rev. John F. Moors, of Greenfield, Mass., was elected chairman. The report of the council was read, reviewing the condition and progress of the concerns of the Conference during the year. An increasing interest in the organization was recognized on the part of the churches. The relation between the Conference and the American Unitarian Association, the council explained in their report, was not only very real but very vital. While each organization was wholly self-controlled and independent, the two bodies yet worked together in entire harmony and with cordial understanding. The council spoke of the danger to which the Unitarian churches were exposed, from the lack of effective safeguards against the admission to the ministry of men whose character and doctrinal soundness had not been tested. The report of *Antioch College* stated that the endowment-fund of \$100,000, asked for by the Conference in 1865, had been raised and exceeded. *Humboldt College* had completed its fourth year with an average annual attendance of nearly one hundred students. A committee was appointed, to confer with a committee of the American Unitarian Association, with reference to preparing a service and hymn book for the use of the churches. A resolution was adopted, in which, after recognizing the civilizing power of Christianity and "rejoicing in all its triumphs," the Conference expressed itself as "encouraged to a more earnest application of its truths and manifestation of its spirit in dealing with the miseries and sins which are still a scandal and a reproach to Christendom;" and invited the churches "to address themselves, in cooperation with existing agencies, to the direct relief of the poor and the prevention of pauperism."

The tenth annual meeting of the *German Protestant Union* was held at Heidelberg, August 29th, 30th, and 31st. The Union, it was represented, had made rapid progress during

the ten years of its existence. Affiliated unions had been formed in all parts of the empire. During the last year twenty new associations, with about 1,500 members, had been organized, including one union, with one hundred members, in Wurtemberg, where the Union had hitherto been unable to obtain a foothold.

The *Hungarian Unitarian Synod* met at Alkos, Transylvania, August 27th and 28th. Its principal business was the election of a bishop, in place of Bishop Kriza, deceased. The Rev. Joseph Ferez, minister of the congregation at Klausenberg, was chosen the new bishop, and was installed during the meeting of the Synod. Bishop Ferez studied at German and French universities. He was the head pastor of the church at Klausenberg during the life of Bishop Kriza. He preached the anniversary sermon at the tercentenary celebration in 1868. He visited England, and spent some time there. He is versed in the German, French, English, and Latin languages, and is said to be acknowledged as the foremost preacher in the Hungarian tongue.

UNITED BRETHREN CHURCH.* The following is a summary of the statistics of the United Brethren Church, as they are given in the *United Brethren Almanac* for 1877:

CONFERENCES.	Organized Churches.	Number of Ministers.	Number of Members.
Alleghany.....	154	59	6,805

* See ANNUAL CYCLOPEDIA for 1875 for account of the educational institutions of the Church.

† Statistics for 1875.

Total number of meeting-houses, 1,909; of parsonages, 277; of Sunday-schools, 2,854; of children, officers, and teachers in the same, 163,439; total benevolent contributions of the Church, \$669,799.21. An increase of 7,805 members was shown over the reports of 1875, and a decrease of \$113,505.61 in the total benevolent contributions.

UNITED STATES. Some changes took place in the cabinet of President Grant during the year. On March 7th Alphonso Taft, of Cincinnati, Ohio, accepted the office of Secretary of War, in place of William W. Belknap, of Iowa, resigned. On June 20th, Benjamin H. Bristow, of Kentucky, resigned the office of Secretary of the Treasury, and was succeeded by Lot M. Morrill, of Maine. On July 11th, Marshall Jewell, of Connecticut, resigned the office of Postmaster-General, and was succeeded by James N. Tyner, of Indiana. About the 22d of May Mr. Taft accepted the office of Attorney-General, and was succeeded as Secretary of War by J. Donald Cameron, of Pennsylvania. The former office became vacant by the appointment of Edwards Pierrepont, of New York, as minister to England. Secretary Belknap, subsequent to his resignation, was impeached by the House of Representatives, and tried before the Senate. (For the particulars of this case, see PUBLIC DOCUMENTS, in this volume.)

As the year was the first centennial anniversary of the national existence, various measures were taken in all parts of the country for its celebration. Congratulatory letters were also sent to the President by the Governments of Germany, Russia, Italy, and of other nations. The National or Centennial Exhibition opened in Philadelphia was participated in by citizens of all countries, and proved to be very successful. (See EXHIBITION, CENTENNIAL.) The following proclamation was issued by President Grant:

Whereas, A joint resolution of the Senate and House of Representatives was duly approved on the 13th day of March last, which resolution is as follows:

Be it resolved, by the Senate and House of Representatives of the United States of America in Congress assembled, that it is hereby recommended by the Senate and House of Representatives to the people of the several States that they assemble in their several counties or towns on the approaching centennial anniversary of our national independence, and that they cause to be delivered on such day an historical sketch of such county or town from its formation; and that a copy of the said sketch may be filed in print or manuscript, in the clerk's office, and an additional copy, in print or manuscript, may be filed in the office of the Librarian of Congress, to the intent that a complete record may thus be obtained of the progress of our institutions during the first century of their existence; and—

Whereas, It is deemed proper that such recommendation be brought to the notice and knowledge of the people of the United States: Now, therefore, I, Ulysses S. Grant, President of the United States, do declare and make known the same, in the hope that the object of the said resolution may meet the approval of the people of the United States, and that proper steps may be taken to carry the same into effect.

Given under my hand, at the city of Washington, this 25th day of May, in the year of our Lord 1876, and of the independence of the United States the one hundredth.

By the President: U. S. GRANT.
HAMILTON FISH, Secretary of State.

The attention of the people was early in the year aroused to the subject of the presidential election. A convention of colored men was held at Nashville on April 6th and 7th. The attendance was numerous, and, although resolutions were adopted expressing strong adherence to the Republican party, yet some of the leading colored men "advised the blacks no longer to remain in the Republican party, but to make terms with their white Southern friends, and hereafter to vote for honest and competent men without reference to party." Mr. Pinchback, of Louisiana, declared that "the colored people were beginning to think for themselves, and would never again vote the Republican ticket in a solid column, as heretofore."

About the same time a movement of dissatisfaction with the Republican party was manifested by the appearance of the following circular, addressed to many prominent Republicans:

NEW YORK, April 6, 1876.

DEAR SIR: The wide-spread corruption in our public service, which has disgraced the republic in the eyes of the world, and threatens to poison the vitality of our institutions; the uncertainty of the public mind, and of party counsels, as to grave economical questions involving in a great measure the honor of the Government, the morality of our business life, and the general well-being of the people; and the danger that an inordinate party spirit may, through the organized action of a comparatively small number of men who live by politics, succeed in overriding the most patriotic impulses of the people, and in monopolizing political power for selfish ends, seem to render it most desirable that no effort should be spared to secure to the popular desire for genuine reform a decisive influence in the impending national election.

Mindful of the fact that this patriotic desire is honestly struggling for effective expression inside of existing political organizations, as it is also strong outside of them, and believing that by all proper means it should be encouraged and made to prevail, the undersigned invite you to meet them, and others of like purpose who have been invited in the same manner, in a free conference, to consider what may be done to prevent the national election of the centennial year from becoming a mere choice of evils, and to secure the election of men to the highest offices of the republic whose character and ability will satisfy the exigencies of our present situation, and protect the honor of the American name.

The conference will be held in the city of New York on the 15th of May. You are respectfully and urgently requested to be present, and to communicate your acceptance of this invitation to H. C. Lodge, Esq., P. O. box 1,938, New York City, or 31 Beacon Street, Boston.

Very truly yours,

WILLIAM CULLEN BRYANT, New York.

THEODORE D. WOOLSEY, Connecticut.

ALEXANDER H. BULLOCK, Massachusetts.

HORACE WHITE, Illinois.

CARL SCHURZ, Missouri.

The conference thus called assembled at the Fifth Avenue Hotel, in New York, on May

15th. Persons were present, and united in the proceedings, from Maine, New Hampshire, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Pennsylvania, Ohio, Indiana, Illinois, Michigan, Wisconsin, West Virginia, North Carolina, Missouri, and Minnesota. An organization was effected by the choice of the following officers:

President: Theodore D. Woolsey, of Connecticut.

Vice-Presidents: New Hampshire, George G. Fogg; Vermont, Charles W. W. Clark; Massachusetts, Henry L. Pierce, Martin Brimmer, Julius H. Seelye, Mark Hopkins, James Freeman Clarke; Rhode Island, Rowland Hazard, Thomas Wentworth Higginson; New York, William Cullen Bryant, John Jay, Oswald Ottendorfer, Edward Salomon, Bradford R. Wood, Cyrus W. Field, Charles Butler, Samuel Osgood; Pennsylvania, Thomas Balch, Henry C. Lee, William Welsh; Ohio, ex-Lieutenant-Governor Muller, J. D. Cox; Indiana, Colonel Martin; Illinois, John H. Bryant, Robert Collyer; Wisconsin, Frederick W. Horn, M. M. Davis; Missouri, John McNeil, James S. Rollins.

Secretaries: H. C. Lodge, of Massachusetts; Francis A. Walker, of Connecticut; Henry Armit Brown, of Pennsylvania; August Thierne, of Ohio; Enos Clarke, of Missouri.

A Committee on Business was appointed, consisting of Carl Schurz, Parke Godwin, Lafayette S. Foster, John W. Hoyt, and Martin Brimmer. On the next day the committee reported "an address to the American people," of which the following extract contains the principal points:

It is useless to console ourselves with the idea that the corruption among us must be ascribed solely to the immediate effects of the civil war, and will, without an effort at reform, soon pass away. There is another cause which is not transitory, but threatens to become permanent. It is that system which has made the offices of the Government the mere spoils of party victory; the system which distributes the places of trust and responsibility as the reward of party-service and the bounty of favoritism; the system which appeals to the mean impulses of selfishness and greed as a controlling motive of political action; the system which degrades the civil service to the level of a mere party agency, and, treating the officer as the hired servant of the party, and taxing him for party support, stimulates corruption and places it under party protection; the system which brings the organization of parties under the control of their most selfishly-interested and therefore most active element—the place-holders and the place-hunters—thus tending to organize a standing army of political mercenaries to be paid out of the Treasury of the Government, who by organized action endeavor to subjugate the will of the people to their ends, through the cultivation of a tyrannical party spirit.

Every student of our political history knows that, since the spoils-system was inaugurated, corruption has steadily grown from year to year; and so long as this system lasts, with all its seductions and demoralizing tendencies, corruption will continue to grow in extent and power, for patriotism and true merit will more and more be crowded out of political life by unscrupulous selfishness. The war has only given a sudden stimulus to this tendency: but without the war it would have grown up, and will not cease to

grow, as long as the hot-bed of corruption, the spoils-system, lasts. The skill in corrupt practices acquired by one generation of spoilsmen will only be improved upon by the next. The result we know. We have already reaped so great a harvest of disaster and shame, that, we repeat, it has now become the first duty of the American people to reestablish the moral character of the Government by a thorough reform. What can we do toward this end in the impending national election?

In this respect, fellow-citizens, we consider it our duty to speak very plainly. Never were the cause of good government and the honor of the American name more immediately dependent on the character, ability, and reputation of the men to be selected for the highest offices. In view of the grave circumstances at present surrounding us, we declare the country cannot now afford to have any man elected to the presidency whose very name is not conclusive evidence of the most uncompromising determination of the American people to make this a pure Government once more.

Our duty in this respect is plain and imperious. It suffers no trifling or equivocation. The worn-out clap-traps of fair promises in party platforms will not satisfy it; neither will mere fine professions on the part of candidates. Not mere words are needed, but acts; not mere platforms, but men.

We therefore declare, and call upon all good citizens to join us, that at the coming presidential election we shall support no candidate who in public position ever countenanced corrupt practices or combinations, or impeded their exposure and punishment, or opposed necessary measures of reform.

We shall support no candidate who, while possess-

ing official influence and power, has failed to use his opportunities in exposing and correcting abuses coming within the reach of his observation, but for personal reasons and party ends has permitted them to fester on; for such men may be counted on not to uncover and crush corruption, but for the party's sake ready to conceal it.

We shall support no candidate, however conspicuous his position or brilliant his ability, in whom the impulses of the party manager have shown themselves predominant over those of the reformer; for he will be inclined to continue that fundamental abuse—the employment of the Government service as a machinery for personal or party ends.

We shall support no candidate who, however favorably judged by his nearest friends, is not publicly known to possess those qualities of mind and character which the stern task of genuine reform requires; for the American people cannot now afford to risk the future of the republic in experiments on merely supposed virtue or rumored ability, to be trusted on the strength of private recommendations.

In one word, at present no candidate should be held entitled to the support of patriotic citizens, of whom the questions may fairly be asked, "Is he really *the* man to carry through a thorough-going reform of the Government? Can he with certainty be depended upon to possess the moral courage and sturdy resolution to grapple with abuses which have acquired the strength of established custom, and to this end firmly to resist the pressure even of his party friends?" Whenever there is room for such questions, and doubt as to the answer, the candidate should be considered unfit for this emergency.

Obverse.

Reverse.

GREAT SEAL OF THE UNITED STATES.

A convention under the name of the Prohibition Reform Party assembled at Cleveland, Ohio, on May 17th. A series of resolutions was adopted, and candidates for President and Vice-President were nominated. The resolutions were as follows:

The Prohibition Reform party of the United States, organized in the name of the people, to revive, enforce, and perpetuate in the Government the doctrines of the Declaration of Independence, submit, in this centennial year of the republic, for the suffrages of all good citizens, the following platform of the national reforms and measures:

1. The legal prohibition in the District of Colum-

bia, the Territories, and in every other place subject to the laws of Congress, of importation, exportation, manufacture, and traffic of all alcoholic beverages, as high crimes against society; an amendment to the national Constitution to render these prohibitory measures universal and permanent; and the adoption of treaty stipulations with foreign powers to prevent the importation and exportation of all alcoholic beverages.

2. The abolition of class legislation and of special privileges in the Government, and the adoption of equal suffrage and eligibility to office, without distinction of race, religious creed, property, or sex.

3. The appropriation of public lands in limited quantities to actual settlers only; the reduction of the rates of inland and ocean postage, of telegraphic

communication, of railroad and water transportation and travel to the lowest practical point, by force of laws wisely and justly framed, with reference not only to the interests of capital employed, but to the higher claims of the general good.

4. The suppression by law of lotteries and gambling in gold, stocks, and produce, and every form of money and property, and the penal inhibition of the use of the public mails for advertising schemes of gambling and lotteries.

5. The abolition of those foul enormities, polygamy and the social evil, and the protection of the purity, peace, and happiness of homes by ample and efficient legislation.

6. The national observance of the Christian Sabbath, established by laws prohibiting ordinary labor and business in all the departments of the public service and private employments—works of necessity, charity, and mercy excepted—on that day.

7. The establishment of mandatory provisions in the national and State constitutions, and by all necessary legislation, of a system of free public schools, and for universal and enforced education of all the youth of the land.

8. The free use of the Bible, not as a ground of religious creeds, but as a text-book of the purest morality, the best liberty, and noblest literature, in our public schools; that our children may grow up in its light, and that its spirit and precepts may pervade our nation.

9. The separation of the Government in all its departments and institutions, including the public schools and all funds for their maintenance, from the control of every religious sect or other association, and the protection alike of all sects by equal laws, with entire freedom of religious faith and worship.

10. The introduction into all treaties hereafter negotiated with foreign governments of a provision for the amicable settlement of international difficulties by arbitration.

11. The abolition of all barbarous modes and instruments of punishment, the recognition of the laws of God and the claims of humanity in the discipline of jails and prisons, and of that higher and wiser civilization worthy of our age and nation, which regards the reform of criminals as a means for the prevention of crime.

12. The abolition of executive and legislative patronage, and the election of President, Vice-President, United States Senators, and of all civil officers, so far as practicable, by the direct vote of the people.

13. The practice of a friendly and liberal policy to immigrants of all nations, and the guarantee to them of ample protection and of equal rights and privileges.

14. The separation of the money of the Government from all banking institutions. The national Government only should exercise the high prerogative of issuing paper-money, and that should be subject to prompt redemption, on demand, in gold and silver, the only equal standards of value recognized by the civilized world.

15. The reduction of the salaries of public officers in a just ratio with the decline of wages and market-prices. The abolition of sinecures, unnecessary offices, and official fees and perquisites. The practice of strict economy in the Government expenses, and a free and thorough investigation into any and all alleged abuses of public trusts.

General Green Clay Smith, of Kentucky, was nominated for President of the United States, and G. T. Stewart, of Ohio, for Vice-President.

A convention of Independents, commonly called the National Greenback Convention, assembled at Indianapolis, Ind., on May 17th. Nineteen States were represented by 289 delegates. A series of resolutions was adopted, and candidates for President and Vice-Presi-

dent were nominated. The resolutions were as follows:

The Independent party is called into existence by the necessities of the people, whose industries are prostrated, whose labor is deprived of its just reward, as the result of the serious mismanagement of the national finances, which errors both the Republican and Democratic parties neglect to correct. And in view of the failure of these parties to furnish relief to the depressed industries of the country, thereby disappointing the just hopes and expectations of a suffering people, we declare our principles, and invite all independent and patriotic men to join our ranks in this movement for financial reform and industrial emancipation.

1. We demand the immediate and unconditional repeal of the specie resumption act of January 14, 1875, and the rescue of our industries from the ruin and disaster resulting from its enforcement; and we call upon all patriotic men to organize in every congressional district of the country, with the view of electing Representatives to Congress who will carry out the wishes of the people in this regard, and stop the present suicidal and destructive policy of contraction.

2. We believe that the United States notes issued by the Government, and convertible on demand into United States obligations, bearing a low rate of interest, not exceeding one cent a day on each one hundred dollars, and reexchangeable for United States notes at par, will afford the best circulating medium ever devised; such United States notes to be full legal tender for all purposes except for payment of such obligations as are by existing contracts expressly made payable in coin. And we hold that it is the duty of the Government to provide such a circulating medium, and insist, in the language of Thomas Jefferson, "that bank-paper must be suppressed, and the circulation restored to the nation, to whom it belongs."

3. It is the paramount duty of the Government, in all its legislation, to keep in view the full development of all legitimate business, agricultural, mining, manufacturing, and commercial.

4. We most earnestly protest against any further issue of gold bonds for sale in foreign markets, by which we would be made, for a long period, hewers of wood and drawers of water to foreigners especially; as the American people would gladly and promptly take at par all the bonds the Government may need to sell, provided they are made payable at the option of the holder, and bearing interest at 3½ per cent. per annum, or even a lower rate.

5. We further protest against the sale of Government bonds for the purpose of purchasing silver to be used as a substitute for our more convenient and less fluctuating fractional currency, which, although well calculated to enrich the owners of silver-mines, yet in operation it will still further oppress, in taxation, an already overburdened people.

Peter Cooper, of New York, was nominated for President of the United States, and Newton Booth, of California, for Vice-President. Mr. Booth subsequently declined, and the vacancy was filled by the appointment, as candidate, of Samuel F. Cary, of Ohio. The nomination was formally tendered to Mr. Cooper, on May 31st, by a committee of the convention appointed for that purpose. On the same day Mr. Cooper replied as follows:

NEW YORK, May 31, 1876.

Hon. MOSES W. FIELD, Chairman, and Hon. THOMAS J. DURANT, Secretary of the National Executive Council of the Independent Party.

GENTLEMEN: Your formal official notification of the unanimous nomination tendered by the National

Convention of the Independent party at Indianapolis, on the 17th inst., to me for the high office of President of the United States, and Hon. Newton Booth, of California, for Vice-President, is before me, together with an authenticated copy of the admirable platform which the convention adopted.

While I most heartily thank the convention, through you, for the great honor they have thus conferred upon me, kindly permit me to say that there is a bare possibility, if wise counsels prevail, that the sorely-needed relief from the blighting effects of past unwise legislation relative to finance, which the people so earnestly seek, may yet be had through either the Republican or Democratic party, both of them meeting in national convention at an early date.

It is unnecessary for me to assure you that, while I have no aspiration for the position of Chief Magistrate of this great republic, I will most cheerfully do what I can to forward the best interests of my country.

I therefore accept your nomination conditionally, expressing the earnest hope that the Independent party may yet attain its exalted aims, while permitting me to step aside and remain in that quiet which is most congenial to my nature and time of life.

Most respectfully, your obedient servant,

PETER COOPER.

The Republican Convention assembled in Cincinnati on June 14th, and was organized by the appointment of Edward McPherson, of Pennsylvania, as president. A series of resolutions was adopted, and candidates nominated for President and Vice-President. The resolutions were as follows:

When, in the economy of Providence, this land was to be purged of human slavery, and when the strength of government of the people, by the people, and for the people, was to be demonstrated, the Republican party came into power. Its deeds have passed into history, and we look back to them with pride. Incited by their memories to high aims for the good of our country and mankind, and looking to the future with unflinching courage, hope, and purpose, we, the representatives of the party in National Convention assembled, make the following declaration of principles:

1. The United States of America is a nation, not a league, by the combined workings of the national and State governments under their respective institutions. The rights of every citizen are secured at home and protected abroad, and the common welfare promoted.

2. The Republican party has preserved these governments to the hundredth anniversary of the nation's birth, and they are now embodiments of the great truths spoken at its cradle, "that all men are created equal; that they are endowed by their Creator with certain inalienable rights, among which are life, liberty, and the pursuit of happiness; that for the attainment of these ends governments have been instituted among men, deriving their just powers from the consent of the governed." Until these truths are cheerfully obeyed, or, if need be, vigorously enforced, the work of the Republican party is unfinished.

3. The permanent pacification of the Southern section of the Union, and the complete protection of all its citizens in the free enjoyment of all their rights and duties, to which the Republican party stands sacredly pledged. The power to provide for the enforcement of the principles embodied in the recent constitutional amendments is vested by those amendments in the Congress of the United States; and we declare it to be the solemn obligation of the legislative and executive departments of the Government to put into immediate and vigorous exercise

all their constitutional powers for removing any just causes of discontent on the part of any class, and for securing to every American citizen complete liberty and exact equality in the exercise of all civil, political, and public rights. To this end, we imperatively demand a Congress and a Chief Executive whose courage and fidelity to these duties shall not falter until these results are placed beyond dispute or recall.

4. In the first act of Congress signed by President Grant, the national Government assumed to remove any doubts of its purpose to discharge all just obligations to the public creditors, and "solemnly pledged its faith to make provision, at the earliest practicable period, for the redemption of the United States notes in coin." Commercial prosperity, public morals, and national credit demand that the promise be fulfilled by a continuous and steady progress to specie payment.

5. Under the Constitution, the President and heads of departments are to make nominations for office, the Senate is to advise and consent to appointments, and the House of Representatives is to accuse and prosecute faithless officers. The best interest of the public service demands that these distinctions be respected; that Senators and Representatives, who may be judges and accusers, should not dictate appointments to office. The invariable rule in appointments should have reference to the honesty, fidelity, and capacity of the appointees, giving to the party in power those places where harmony and vigor of administration require its policy to be represented, but permitting all others to be filled by persons selected with sole reference to the efficiency to the public service, and the right of all citizens to share in the honor of rendering faithful service to the country.

6. We rejoice in the quickened conscience of the people concerning political affairs, and will hold all public officers to a rigid responsibility, and engage that the prosecution and punishment of all who betray official trusts shall be swift, thorough, and unsparring.

7. The public-school system of the several States is the bulwark of the American Republic; and, with a view to its security and permanence, we recommend an amendment to the Constitution of the United States, forbidding the application of any public funds or property for the benefit of any schools or institutions under sectarian control.

8. The revenue necessary for current expenditures and the obligations of the public debt must be largely derived from duties upon importations, which, so far as possible, should be adjusted to promote the interests of American labor and advance the prosperity of the whole country.

9. We reaffirm our opposition to further grants of the public lands to corporations and monopolies, and demand that the national domain be devoted to the free use of the people.

10. It is the imperative duty of the Government so to modify existing treaties with European Governments that the same protection shall be afforded to the adopted American citizens that is given to the native-born, and that all necessary laws should be passed to protect immigrants, in the absence of power in the States for that purpose.

11. It is the immediate duty of Congress to fully investigate the effect of the immigration and importation of Mongolians upon the moral and material interests of the country.

12. The Republican party recognizes with approval the substantial advances recently made toward the establishment of equal rights for women by the many important amendments effected by Republican Legislatures, in the laws which concern the personal and property relations of wives, mothers, and widows; and by the appointment and election of women to the superintendence of education, charities, and other public trusts. The honest demands of this

class of citizens for additional rights, privileges, and immunities, should be treated with respectful consideration.

13. The Constitution confers upon Congress sovereign power over the Territories of the United States for their government; and in the exercise of this power it is the right and duty of Congress to prohibit and extirpate in the Territories that relic of barbarism, polygamy; and we demand such legislation as shall secure this end, and the supremacy of American institutions in all the Territories.

14. The pledges which the nation has given to her soldiers and sailors must be fulfilled, and a grateful people will always hold those who imperiled their lives for the country's preservation in the kindest remembrance.

15. We sincerely deprecate all sectional feelings and tendencies. We therefore note with deep solicitude that the Democratic party counts, as its chief hope of success, upon the electoral vote of a united South, secured through the efforts of those who were recently arrayed against the nation; and we invoke the earnest attention of the country to the grave truth that a success thus achieved would reopen sectional strife and imperil national honor and human rights.

16. We charge the Democratic party with being the same in character and spirit as when it sympathized with treason; with making its control of the House of Representatives the triumph and opportunity of the nation's recent foes; with reasserting and applauding in the national Capitol the sentiments of unrepentant rebellion; with sending Union soldiers to the rear, and promoting Confederate soldiers to the front; with deliberately proposing to repudiate the plighted faith of the Government; with being equally false and imbecile upon the overshadowing financial questions; with thwarting the ends of justice by its partisan mismanagement and obstruction of investigation; with proving itself, through the period of its ascendancy in the Lower House of Congress, utterly incompetent to administer the Government; and we warn the country against trusting a party thus alike unworthy, recreant, and incapable.

17. The national Administration merits commendation for its honorable work in the management of domestic and foreign affairs; and President Grant deserves the continued hearty gratitude of the American people for his patriotism, and his eminent services in war and in peace.

After the adoption of the resolutions the roll of the States was called in alphabetical order, when Stephen W. Kellogg nominated Marshall Jewell, of Connecticut; R. W. Thompson nominated Oliver P. Morton, of Indiana; John M. Harlan nominated Benjamin H. Bristow, of Kentucky; Robert H. Ingersoll, of Illinois, nominated James G. Blaine, of Maine; Stewart L. Woodford nominated Roscoe Conkling, of New York; Edward F. Noyes nominated Rutherford B. Hayes, of Ohio; Linn Bartholomew nominated John F. Hartranft, of Pennsylvania.

Seven ballots were taken, as follows:

NAMES.	1.	2.	3.	4.	5.	6.	7.
Blaine.....	285	298	293	292	256	303	351
Bristow.....	113	114	121	126	114	111	21
Conkling.....	99	93	90	84	82	81
Hartranft.....	58	69	6	71	69	50
Hayes.....	61	64	67	68	104	118	384
Jewell.....	11
Morton.....	194	111	118	108	95	85
Washburne.....	1	1	3	3	4
Wheeler.....	3	3	3	2	3	2

Rutherford B. Hayes was nominated as the Republican candidate for President by a majority of twelve votes. William A. Wheeler, of New York, was then nominated as the candidate for Vice-President.

On July 14th Mr. Hayes accepted the nomination by the following letter:

COLUMBUS, OHIO, July 8, 1876.

Hon. EDWARD MCPHERSON, Hon. WILLIAM A. HOWARD, Hon. JOSEPH H. RAINES, and others, Committee of the Republican National Convention.

GENTLEMEN: In reply to your official communication of June 17th, by which I am informed of my nomination for the office of President of the United States by the Republican National Convention at Cincinnati, I accept the nomination with gratitude, hoping that, under Providence, I shall be able, if elected, to execute the duties of the high office as a trust for the benefit of all the people. I do not deem it necessary to enter upon an extended examination of the declaration of principles made by the convention. The resolutions are in accord with my views, and I heartily concur in the principles they announce.

In several of the resolutions, however, questions are considered of such importance that I deem it proper to briefly express my convictions in regard to them.

The fifth resolution adopted by the convention is of paramount interest. More than forty years ago a system of making appointments to office grew up, based upon the maxim, "To the victors belong the spoils." The old rule, the true rule, that honesty, capacity, and fidelity, constitute the only real qualification for office, and that there is no other claim, gave place to the idea that party services were to be chiefly considered. All parties, in practice, have adopted this system. It has been essentially modified since its first introduction; it has not, however, been improved. At first the President, either directly or through the heads of the departments, made all the appointments, but gradually the appointing power, in many cases, passed into the control of members of Congress. The offices in these cases have become not merely rewards for party services, but rewards for services to party leaders. This system destroys the independence of the separate departments of the Government. It tends directly to extravagance and official incapacity. It is a temptation to dishonesty. It hinders and impairs that careful supervision and strict accountability by which alone faithful and efficient public service can be secured. It obstructs the prompt removal and sure punishment of the unworthy. In every way it degrades the civil service and the character of the Government. It is felt, I am confident, by a large majority of the members of Congress, to be an intolerable burden and an unwarrantable hindrance to the proper discharge of their legitimate duties. It ought to be abolished. The reform should be thorough, radical, and complete. We should return to the principles and practice of the founders of the Government, supplying by legislation, when needed, that which was formerly the established custom. They neither expected nor desired from the public officer any partisan service. They meant that public officers should owe their whole service to the Government and to the people. They meant that the officer should be secure in his tenure as long as his personal character remained untarnished and the performance of his duties satisfactory. If elected, I shall conduct the administration of the Government upon these principles, and all the constitutional powers vested in the Executive will be employed to establish this reform.

The declaration of principles by the Cincinnati Convention makes no announcement in favor of a single presidential term. I do not assume to add to

that declaration, but, believing that the restoration of the civil service to the system established by Washington, and followed by the early Presidents, can be best accomplished by an Executive who is under no temptation to use the patronage of his office to promote his own reelection, I desire to perform what I regard as a duty, in stating now my inflexible purpose, if elected, not to be a candidate for election to a second term.

On the currency question I have frequently expressed my views in public, and I stand by my record on this subject. I regard all the laws of the United States relating to the payment of the public indebtedness, the legal-tender notes included, as constituting a pledge and the moral obligation of the Government, which must, in good faith, be kept. It is my conviction that the feeling of uncertainty inseparable from an irredeemable paper currency, with its fluctuations of values, is one of the great obstacles to a revival of confidence and business, and to a return of prosperity. That uncertainty can be ended in but one way—the resumption of specie payment. But the longer the instability connected with our present money-system is permitted to continue, the greater will be the injury inflicted upon our econom-

ical interests and all classes of society. If elected, I shall approve every appropriate measure to accomplish the desired end, and shall oppose any step backward.

The resolution with respect to the public-school system is one which should receive the hearty support of the American people. Agitation upon this subject is to be apprehended, until by constitutional amendment the schools are placed beyond all danger of sectarian control or interference. The Republican party is pledged to secure such an amendment.

The resolution of the convention on the subject of the permanent pacification of the country, and the complete protection of all its citizens in the free enjoyment of all their constitutional rights, is timely and of great importance. The condition of the Southern States attracts the attention and commands the sympathy of the people of the whole Union. In their progressive recovery from the effects of the war, their first necessity is an intelligent and honest administration of government, which shall protect all classes of citizens in all their political and private rights. What the South most needs is peace; and peace depends upon the supremacy of law. There can be no enduring peace if the constitutional rights

THE CAPITOL, WASHINGTON, D. C.

of any portion of the people are habitually disregarded. A division of political parties resting merely upon the distinctions of race, or upon sectional lines, is always unfortunate, and may be disastrous. The welfare of the South, alike with that of every other part of the country, depends upon the attractions it can offer to labor, to immigration, and to capital. But laborers will not go, and capital will not be ventured, where the Constitution and the laws are set at defiance, and distraction, apprehension, and alarm take the place of peace-loving and law-abiding social life. All parts of the Constitution are sacred, and must be sacredly observed, the parts that are new no less than the parts that are old. The moral and material prosperity of the Southern States can be most effectually advanced by a hearty and generous recognition of the rights of all by all—a recognition without reserve or exception. With such a recognition fully accorded, it will be practicable to promote, by the influence of all the legitimate agencies of the General Government, the efforts of the people of those States to obtain for themselves the blessings

of honest and capable local government. If elected, I shall consider it not only my duty, but it will be my ardent desire, to labor for the attainment of this end. Let me assure my countrymen of the Southern States that, if I should be charged with the duty of organizing an Administration, it will be one which will regard and cherish their truest interests—the interests of the white and of the colored people, both and equally—and which will put forth its best efforts in behalf of a civil policy which will wipe out forever the distinction between North and South in our common country.

With a civil service organized upon a system which will secure purity, experience, efficiency, and economy, a strict regard for the public welfare solely in appointments, and the speedy, thorough, and unsparing prosecution and punishment of all public officers who betray official trusts; with a sound currency; with education, unsectarian and free to all; with simplicity and frugality in public and private affairs; and with a fraternal spirit of harmony pervading the people of all sections and classes, we

may reasonably hope that the second century of our existence as a nation will, by the blessing of God, be preminent as an era of good feeling, and a period of progress, prosperity, and happiness.

Very respectfully, your fellow-citizen,
(Signed) R. B. HAYES.

The Democratic National Convention assembled at St. Louis, Mo., on June 28th, and was organized by the appointment of John A. McClermand as president, and other officers.

When nominations were called for, Mr. Whitely nominated Thomas F. Bayard, of Delaware; Mr. Williams nominated Thomas A. Hendricks, of Indiana; Mr. Abbott nominated Joel Parker, of New Jersey; Mr. Kernan nominated Samuel J. Tilden, of New York; Mr. Ewing nominated William Allen, of Ohio; Mr. Clymer nominated General Winfield S. Hancock, of Pennsylvania. The results of the ballotings were as follows:

First ballot: Tilden, 404; Allen, 54; Thurman, 8; Hendricks, 140; Bayard, 83; Parker, 18; Hancock, 75; Broadhead, 16. Second ballot: Tilden, 535; Allen, 54; Thurman, 2; Hendricks, 85; Bayard, 4; Hancock, 58. Necessary to a choice, 492.

Before the result was declared, the nomination of Mr. Tilden was made unanimous. Thomas A. Hendricks, of Indiana, was nominated as the candidate for Vice-President.

The platform adopted was as follows:

We, the delegates of the Democratic party of the United States, in National Convention assembled, do hereby declare the administration of the Federal Government to be in urgent need of immediate reform; do hereby enjoin upon the nominees of this convention, and of the Democratic party in each State, a zealous effort and cooperation to this end; and do hereby appeal to our fellow-citizens of every former political connection to undertake with us this first and most pressing patriotic duty.

For the Democracy of the whole country, we do here reaffirm our faith in the permanence of the Federal Union, our devotion to the Constitution of the United States, with its amendments universally accepted as a final settlement of the controversies which engendered civil war, and do here record our steadfast confidence in the perpetuity of republican self-government.

In absolute acquiescence in the will of the majority—the vital principle of republics; in the supremacy of the civil over the military authority; in the total separation of church and state, for the sake alike of civil and religious freedom; in the equality of all citizens before just laws of their own enactment; in the liberty of individual conduct, unvexed by sumptuary laws; in the faithful education of the rising generation, that they may preserve, enjoy, and transmit these best conditions of human happiness and hope, we behold the noblest products of a hundred years of changeful history: but, while upholding the bond of our Union and great charter of these our rights, it behooves a free people to practice also that eternal vigilance which is the price of liberty.

Reform is necessary to rebuild and establish, in the hearts of the whole people, the Union, eleven years ago happily rescued from the danger of a secession of States, but now to be saved from a corrupt centralism, which, after inflicting upon ten States the rapacity of carpet-bag tyrannies, has honey-combed the offices of the Federal Government itself with incapacity, waste, and fraud, infected

States and municipalities with the contagion of misrule, and locked fast the prosperity of an industrious people in the paralysis of "hard times."

Reform is necessary to establish a sound currency, restore the public credit, and maintain the national honor.

We denounce the failure, for all these eleven years of peace, to make good the promise of the legal-tender notes, which are a changing standard of value in the hands of the people, and the nonpayment of which is a disregard of the plighted faith of the nation.

We denounce the improvidence which, in eleven years of peace, has taken from the people, in Federal taxes, thirteen times the whole amount of the legal-tender notes, and squandered four times their sum in useless expense, without accumulating any reserve for their redemption.

We denounce the financial imbecility and immorality of that party which, during eleven years of peace, has made no advance toward resumption, no preparation for resumption, but, instead, has obstructed resumption, by wasting our resources and exhausting all our surplus income; and, while annually professing to intend a speedy return to specie payments, has annually enacted fresh hindrances thereto. As such hindrance, we denounce the Resumption clause of the Act of 1875, and we here demand its repeal.

We demand a judicious system of preparation by public economies, by official retrenchments, and by wise finance, which shall enable the nation soon to assure the whole world of its perfect ability and its perfect readiness to meet any of its promises at the call of the creditor entitled to payment.

We believe such a system, well devised, and, above all, intrusted to competent hands for execution, creating at no time an artificial scarcity of currency, and at no time alarming the public mind into a withdrawal of that vaster machinery of credit by which ninety-five per cent. of all business transactions are performed—a system open, public, and inspiring general confidence—would, from the day of its adoption, bring healing on its wings to all our harassed industries, set in motion the wheels of commerce, manufactures, and the mechanic arts, restore employment to labor, and renew in all its natural sources the prosperity of the people.

Reform is necessary in the sum and modes of Federal taxation, to the end that capital may be set free from distrust and labor lightly burdened.

We denounce the present tariff, levied upon nearly four thousand articles, as a masterpiece of injustice, inequality, and false pretense. It yields a dwindling, not a yearly rising revenue. It has impoverished many industries to subsidize a few. It prohibits imports that might purchase the products of American labor. It has degraded American commerce from the first to an inferior rank on the high seas. It has cut down the sales of American manufacture at home and abroad, and depleted the returns of American agriculture—an industry followed by half our people. It costs the people five times more than it produces to the Treasury, obstructs the processes of production, and wastes the fruits of labor. It promotes fraud, fosters smuggling, enriches dishonest officials, and bankrupts honest merchants. We demand that all custom-house taxation shall be only for revenue.

Reform is necessary in the scale of public expense—Federal, State, and municipal. Our Federal taxation has swollen from \$60,000,000 gold in 1860 to \$450,000,000 currency in 1870; our aggregate taxation from \$154,000,000 gold in 1860 to \$730,000,000 currency in 1870; or in one decade from less than \$5 per head to more than \$18 per head. Since the peace, the people have paid to their tax-gatherers more than thrice the sum of the national debt, and more than twice that sum for the Federal Government alone. We demand a rigorous frugality in

every department, and from every officer of the Government.

Reform is necessary to put a stop to the profligate waste of public lands, and their diversion from actual settlers by the party in power, which has squandered 200,000,000 acres upon railroads alone, and out of more than thrice that aggregate has disposed of less than a sixth directly to tillers of the soil.

Reform is necessary to correct the omissions of a Republican Congress, and the errors of our treaties and our diplomacy, which have stripped our fellow-citizens of foreign birth and kindred race recrossing the Atlantic of the shield of American citizenship, and have exposed our brethren of the Pacific coast to the incursions of a race not sprung from the same great parent stock, and, in fact, now by law denied citizenship through naturalization, as being neither accustomed to the traditions of a progressive civilization nor exercised in liberty under equal laws. We denounce the policy which thus discards the liberty-loving German, and tolerates a revival of the coolie trade in Mongolian women imported for immoral purposes, and Mongolian men held to perform servile-labor contracts, and demand such modification of the treaty with the Chinese Empire, or such legislation within constitutional limitations, as shall

prize fought for at the ballot-box, be a brief reward of party zeal, instead of posts of honor assigned for proved competency, and held for fidelity in the public employ; that the dispensing of patronage should neither be a tax upon the time of all our public men, nor the instrument of their ambition. Here, again, promises falsified in the performance attest that the party in power can work out no practical or salutary reform.

Reform is necessary even more in the higher grades of the public service. President, Vice-President, judges, Senators, Representatives, cabinet officers—these, and all others in authority, are the people's servants. Their offices are not a private perquisite; they are a public trust.

When the annals of this republic show the disgrace and censure of a Vice-President; a late Speaker of the House of Representatives marketing his rulings as a presiding officer; three Senators profiting secretly by their votes as law-makers; five chairmen of the leading committees of the late House of Representatives exposed in jobbery; a late Secretary of the Treasury forcing balances in the public accounts; a late Attorney-General misappropriating public funds; a Secretary of the Navy enriched, or enriching friends, by percentages levied off the profits of contractors with his department; an ambassador to

England engaged in a dishonorable speculation; the President's private secretary barely escaping conviction upon trial for guilty complicity in frauds upon the revenue; a Secretary of War impeached for high crimes and misdemeanors—the demonstration is complete, that the first step in reform must be the people's choice of honest men from another party, lest the disease of one political organization infect the body politic, and, lest, by making no change of men or parties, we get no change of measures and no real reform.

All these abuses, wrongs, and crimes, the product of sixteen years' ascendancy of the Republican party, create a necessity for reform confessed by Republicans themselves; but their reformers are voted down in convention and

displaced from the cabinet. The party's mass of honest voters is powerless to resist the eighty thousand office-holders, its leaders and guides.

Reform can only be had by a peaceful civic revolution. We demand a change of system, a change of Administration, a change of parties, that we may have a change of measures and of men.

Resolved, That this convention, representing the Democratic party of the United States, do cordially indorse the action of the present House of Representatives in reducing and curtailing the expenses of the Federal Government, in cutting down salaries, extravagant appropriations, and in abolishing useless offices and places not required by the public necessities; and we shall trust to the firmness of the Democratic members of the House that no committee of conference, and no misinterpretation of the rules, will be allowed to defeat these wholesome measures of economy demanded by the country.

Resolved, That the soldiers and sailors of the republic, and the widows and orphans of those who have fallen in battle, have a just claim upon the care, protection, and gratitude of their fellow-citizens.

PRESIDENT'S HOUSE, WASHINGTON, D. C.

prevent further importation or immigration of the Mongolian race.

Reform is necessary, and can never be effected but by making it the controlling issue of the elections, and lifting it above the two false issues with which the office-holding class and the party in power seek to smother it:

1. The false issue with which they would enkindle sectarian strife in respect to the public schools, of which the establishment and support belong exclusively to the several States, and which the Democratic party has cherished from their foundation, and is resolved to maintain without prejudice or preference for any class, sect, or creed, and without largesses from the Treasury to any.

2. The false issue by which they seek to light anew the dying embers of sectional hate between kindred peoples once estranged, but now reunited in one indivisible republic and a common destiny.

Reform is necessary in the civil service. Experience proves that efficient, economical conduct of the governmental business is not possible if its civil service be subject to change at every election, be a

Mr. Tilden accepted the nomination, in a letter addressed to the committee on July 31st, as follows:

ALBANY, July 31, 1876.

To General JOHN A. McCLERNAND, Chairman, General W. B. FRANKLIN, Hon. J. J. ABBOTT, Hon. H. J. SPANNHORST, Hon. H. J. REDFIELD, Hon. F. S. LYON, and others, Committee, etc.

GENTLEMEN: When I had the honor to receive a personal delivery of your letter on behalf of the Democratic National Convention, held on the 28th of June at St. Louis, advising me of my nomination as the candidate of the constituency represented by that body for the office of President of the United States, I answered that, at my earliest convenience, and in conformity with usage, I would prepare and transmit to you a formal acceptance. I now avail myself of the first interval in unavoidable occupations to fulfill that engagement.

The convention, before making its nominations, adopted a declaration of principles, which, as a whole, seems to me a wise exposition of the necessities of our country, and of the reforms needed to bring back the Government to its true functions, to restore purity of administration, and to renew the prosperity of the people. But some of these reforms are so urgent, that they claim more than a passing approval.

REFORM IN PUBLIC EXPENSE.

The necessity of a reform "in the scale of public expense—Federal, State, and municipal"—and "in the modes of Federal taxation," justifies all the prominence given to it in the declaration of the St. Louis Convention.

The present depression in all the business and industries of the people, which is depriving labor of its employment, and carrying want into so many homes, has its principal cause in excessive governmental consumption. Under the illusions of a specious prosperity engendered by the false policies of the Federal Government, a waste of capital has been going on ever since the peace of 1865, which could only end in universal disaster.

The Federal taxes of the last eleven years reach the gigantic sum of \$4,500,000,000. Local taxation has amounted to two-thirds as much more. The vast aggregate is not less than \$7,500,000,000.

This enormous taxation followed a civil conflict that had greatly impaired our aggregate wealth, and had made a prompt reduction of expenses indispensable.

It was aggravated by most unscientific and ill-adjusted methods of taxation, that increased the sacrifices of the people far beyond the receipts of the Treasury.

It was aggravated, moreover, by a financial policy which tended to diminish the energy, skill, and economy of production and the frugality of private consumption, and induced miscalculation in business and an unremunerative use of capital and labor.

Even in prosperous times, the daily wants of industrious communities press closely upon their daily earnings. The margin of possible national savings is at best a small percentage of national earnings. Yet now, for these eleven years, governmental consumption has been a larger portion of the national earnings than the whole people can possibly save even in prosperous times for all new investments.

The consequences of these errors are now a present public calamity. But they were never doubtful, never invisible. They were necessary and inevitable, and were foreseen and depicted when the waves of that fictitious prosperity ran highest. In a speech made by me on the 24th of September, 1868, it was said of these taxes:

They bear heavily upon every man's income, upon every industry and every business in the country, and year by year they are destined to press still more heavily, unless we arrest

the system that gives rise to them. It was comparatively easy, when values were doubling under repeated issues of legal-tender paper-money, to pay out of the troth of our growing and apparent wealth these taxes; but when values recede and sink toward their natural scale, the tax-gatherer takes from us not only our income, not only our profits, but also a portion of our capital. . . . I do not wish to exaggerate or alarm; I simply say that we cannot afford the costly and ruinous policy of the radical majority of Congress. We cannot afford that policy toward the South. We cannot afford the magnificent and oppressive centralism into which our Government is being converted. We cannot afford the present magnificent scale of taxation.

To the Secretary of the Treasury I said, early in 1865:

There is no royal road for a government more than for an individual or a corporation. What you want to do now is, to cut down your expenses and live within your income. I would give all the legdemain of finance and financiering—I would give the whole of it—for the old, homely maxim, "Live within your income."

This reform will be resisted at every step, but it must be pressed persistently. We see, to-day, the immediate representatives of the people in one branch of Congress, while struggling to reduce expenditures, compelled to confront the menace of the Senate and the Executive, that, unless the objectionable appropriations be consented to, the operations of the Government thereunder shall suffer detriment, or cease. In my judgment, an amendment of the Constitution ought to be devised separating into distinct bills the appropriations for the various departments of the public service, and excluding from each bill all appropriations for other objects, and all independent legislation. In that way alone can the revisory power of each of the two Houses, and of the Executive, be preserved and exempted from the moral duress which often compels assent to objectionable appropriations, rather than stop the wheels of the Government.

THE SOUTH.

An accessory cause enhancing the distress in business is to be found in the systematic and insupportable misgovernment imposed on the States of the South. Besides the ordinary effects of ignorant and dishonest administration, it has inflicted upon them enormous issues of fraudulent bonds, the scanty avails of which were wasted or stolen, and the existence of which is a public discredit, tending to bankruptcy or repudiation. Taxes, generally oppressive, in some instances have confiscated the entire income of property, and totally destroyed its marketable value. It is impossible that these evils should not react upon the prosperity of the whole country.

The nobler motives of humanity concur with the material interests of all in requiring that every obstacle be removed to a complete and durable reconciliation between kindred populations once unnaturally estranged, on the basis recognized by the St. Louis platform, of the "Constitution of the United States, with its amendments universally accepted as a final settlement of the controversies which engendered civil war."

But, in aid of a result so beneficent, the moral influence of every good citizen, as well as every governmental authority, ought to be exerted, not alone to maintain their just equality before the law, but likewise to establish a cordial fraternity and goodwill among citizens, whatever their race or color, who are now united in the one destiny of a common self-government. If the duty shall be assigned to me, I shall not fail to exercise the powers with which the laws and the Constitution of our country clothe its Chief Magistrate, to protect all its citizens, whatever their former condition, in every political and personal right.

CURRENCY REFORM.

"Reform is necessary," declares the St. Louis Convention, "to establish a sound currency, restore

the public credit, and maintain the national honor;" and it goes on to "demand a judicious system of preparation by public economies, by official retrenchments, and by wise finances, which shall enable the nation soon to assure the whole world of its perfect ability and its perfect readiness to meet any of its promises at the call of the creditor entitled to payment."

The object demanded by the convention is a resumption of specie payments on the legal-tender notes of the United States. That would not only "restore the public credit" and "maintain the national honor," but it would "establish a sound currency" for the people.

The methods by which this object is to be pursued, and the means by which it is to be attained, are disclosed by what the convention demanded for the future, and by what it denounced in the past.

BANK-NOTE RESUMPTION.

Resumption of specie payments by the Government of the United States on its legal-tender notes would establish specie payments by all the banks on all their notes. The official statement, made on the 12th of May, shows that the amount of the bank-notes was \$300,000,000, less \$20,000,000 held by themselves. Against these \$280,000,000 of notes the banks held \$141,000,000 of legal-tender notes, or a little more than fifty per cent. of their amount. But they also held on deposit in the Federal Treasury, as security for these notes, bonds of the United States worth in gold about \$360,000,000, available and current in all the foreign money-markets. In resuming, the banks, even if it were possible for all their notes to be presented for payment, would have \$500,000,000 of specie funds to pay \$280,000,000 of notes, without contracting their loans to their customers, or calling on any private debtor for payment. Suspended banks undertaking to resume have usually been obliged to collect from needy borrowers the means to redeem excessive issues and to provide reserves. A vague idea of distress is, therefore, often associated with the process of resumption. But the conditions which caused distress in those former instances do not now exist.

The Government has only to make good its own promises, and the banks can take care of themselves without distressing anybody. The Government is, therefore, the sole delinquent.

LEGAL-TENDER RESUMPTION.

The amount of the legal-tender notes of the United States now outstanding is less than \$370,000,000, besides \$34,000,000 of fractional currency. How shall the Government make these notes at all times as good as specie?

It has to provide, in reference to the mass which would be kept in use by the wants of business, a central reservoir of coin, adequate to the adjustment of the temporary fluctuations of international balances, and as a guarantee against transient drains artificially created by panic or by speculation.

It has also to provide for the payment in coin of such fractional currency as may be presented for redemption, and such inconsiderable portions of the legal tenders as individuals may from time to time desire to convert for special use, or in order to lay by in coin their little stores of money.

RESUMPTION NOT DIFFICULT.

To make the coin now in the Treasury available for the objects of this reserve, to gradually strengthen and enlarge that reserve, and to provide for such other exceptional demands for coin as may arise, does not seem to me a work of difficulty. If wisely planned and discreetly pursued, it ought not to cost any sacrifice to the business of the country. It should tend, on the contrary, to a revival of hope and confidence. The coin in the Treasury on the 30th of June, including what is held against coin certificates, amounted

to nearly \$74,000,000. The current of precious metals which has flowed out of our country for the eleven years from July 1, 1865, to June 30, 1876, averaging nearly \$78,000,000 a year, was \$832,000,000 in the whole period, of which \$817,000,000 were the product of our own mines.

To amass the requisite quantity, by intercepting from the current flowing out of the country, and by acquiring from the stocks which exist abroad without disturbing the equilibrium of foreign money-markets, is a result to be easily worked out by practical knowledge and judgment.

With respect to whatever surplus of legal tenders the wants of business may fail to keep in use, and which, in order to save interest, will be returned for redemption, they can either be paid or they can be funded. Whether they continue as currency or be absorbed into the vast mass of securities held as investments, is merely a question of the rate of interest they draw. Even if they were to remain in their present form, and the Government were to agree to pay on them a rate of interest, making them desirable as investments, they would cease to circulate, and take their place with Government, State, municipal, and other corporate and private bonds, of which thousands of millions exist among us. In the perfect ease with which they can be changed from currency into investments lies the only danger to be guarded against in the adoption of general measures intended to remove a clearly-ascertained surplus—that is, the withdrawal of any which are not a permanent excess beyond the wants of business. Even more mischievous would be any measure which affects the public imagination with the fear of an apprehended scarcity. In a community where credit is so much used, fluctuations of values and vicissitudes in business are largely caused by the temporary beliefs of men, even before those beliefs can conform to ascertained realities.

AMOUNT OF NECESSARY CURRENCY.

The amount of the necessary currency, at a given time, cannot be determined arbitrarily, and should not be assumed on conjecture. That amount is subject to both permanent and temporary changes. An enlargement of it, which seemed to be durable, happened at the beginning of the civil war by a substituted use of currency in place of individual credits. It varies with certain states of business. It fluctuates, with considerable regularity, at different seasons of the year. In the autumn, for instance, when buyers of grain and other agricultural products begin their operations, they usually need to borrow capital or circulating credits by which to make their purchases, and want these funds in currency capable of being distributed in small sums among numerous sellers. The additional need of currency at such times is five or more per cent. of the whole volume; and if a surplus beyond what is required for ordinary use does not happen to have been on hand at the money centres, a scarcity of currency ensues, and also a stringency in the loan-market.

It was in reference to such experiences that, in a discussion of this subject in my annual message to the New York Legislature of January 5, 1876, the suggestion was made that "the Federal Government is bound to redeem every portion of its issues which the public do not wish to use. Having assumed to monopolize the supply of currency and enacted exclusions against everybody else, it is bound to furnish all which the wants of business require. . . . The system should passively allow the volume of circulating credits to ebb and flow, according to the ever-changing wants of business. It should imitate, as closely as possible, the natural laws of trade, which it has superseded by artificial contrivances." And in a similar discussion in my message of January 4, 1876, it was said that resumption should be effected "by such measures as would keep the aggregate amount of the currency self-adjusting during

all the process, without creating at any time an artificial scarcity, and without exciting the public imagination with alarms, which impair confidence, contract the whole large machinery of credit, and disturb the natural operations of business."

MEANS OF RESUMPTION.

"Public economies, official retrenchments, and wise finance," are the means which the St. Louis Convention indicates as provision for reserves and redemptions.

The best resource is a reduction of the expenses of the Government below its income; for that imposes no new charge on the people. If, however, the improvidence and waste, which have conducted us to a period of falling revenues, oblige us to supplement the results of economies and retrenchments by some resort to loans, we should not hesitate. The Government ought not to speculate on its own dishonor, in order to save interest on its broken promises, which it still compels private dealers to accept at a fictitious par. The highest national honor is not only right, but would prove profitable. Of the public debt, \$985,000,000 bear interest at six per cent. in gold, and \$712,000,000 at five per cent. in gold. The average interest is 5.68 per cent.

A financial policy which should secure the highest credit, wisely availed of, ought gradually to obtain a reduction of one per cent. in the interest on most of the loans. A saving of one per cent. on the average would be \$17,000,000 a year in gold. That saving, regularly invested at four and a half per cent., would, in less than thirty-eight years, extinguish the principal. The whole \$1,700,000,000 of funded debt might be paid by this saving alone, without cost to the people.

PROPER TIME FOR RESUMPTION.

The proper time for resumption is the time when wise preparations shall have ripened into a perfect ability to accomplish the object with a certainty and ease that will inspire confidence and encourage the reviving of business. The earliest time in which such a result can be brought about is the best. Even when the preparations shall have been matured, the exact date would have to be chosen with reference to the then existing state of trade and credit operations in our own country, the course of foreign commerce, and the condition of the exchanges with other nations. The specific measures and the actual date are matters of detail having reference to ever-changing conditions. They belong to the domain of practical, administrative statesmanship. The captain of a steamer about starting from New York to Liverpool does not assemble a council over his ocean-chart and fix an angle by which to lash the rudder for the whole voyage. A human intelligence must be at the helm to discern the shifting forces of the waters and the winds; a human hand must be on the helm to feel the elements day by day, and guide to a mastery over them.

PREPARATIONS FOR RESUMPTION.

Such preparations are everything. Without them, a legislative command fixing a day, an official promise fixing a day, are shams. They are worse: they are a snare and a delusion to all who trust them. They destroy all confidence among thoughtful men, whose judgment will at last away public opinion. An attempt to act on such a command or such a promise, without preparation, would end in a new suspension. It would be a fresh calamity, prolific of confusion, distrust, and distress.

THE ACT OF JANUARY 14, 1875.

The act of Congress of the 14th of January, 1875, enacted that, on and after the 1st of January, 1879, the Secretary of the Treasury shall redeem in coin the legal-tender notes of the United States on presentation at the office of the Assistant Treasurer in the city of New York. It authorized the Secretary

"to prepare and provide for" such resumption of specie payments by the use of any surplus revenues not otherwise appropriated; and by issuing, in his discretion, certain classes of bonds.

More than one and a half of the four years have passed. Congress and the President have continued ever since to unite in acts which have legislated out of existence every possible surplus applicable to this purpose.

The coin in the Treasury claimed to belong to the Government had on the 30th of June, fallen to less than \$45,000,000, as against \$59,000,000 on the 1st of January, 1875, and the availability of a part of that sum is said to be questionable. The revenues are falling faster than appropriations and expenditures are reduced, leaving the Treasury with diminishing resources. The Secretary has done nothing under his power to issue bonds.

The legislative command, the official promise, fixing a day for resumption, have thus far been barren. No practical preparations toward resumption have been made. There has been no progress. There have been steps backward.

There is no necromancy in the operations of government. The homely maxims of every-day life are the best standards of its conduct. A debtor who should promise to pay a loan out of surplus income, yet be seen every day spending all he could lay his hands on in riotous living, would lose all character for honesty and veracity. His offer of a new promise, and his profession as to the value of the old promise, would alike provoke derision.

RESUMPTION-PLAN OF THE ST. LOUIS PLATFORM.

The St. Louis platform denounces the failure for eleven years to make good the promise of the legal-tender notes. It denounces the omission to accumulate "any reserve for their redemption." It denounces the conduct "which, during eleven years of peace, has made no advances toward resumption, no preparations for resumption, but, instead, has obstructed resumption, by wasting our resources and exhausting all our surplus income; and, while professing to intend a speedy return to specie payments, has annually enacted fresh hinderances thereto." And, having first denounced the barrenness of the promise of a day of resumption, it next denounces that barren promise as "a hinderance" to resumption. It then demands its repeal, and also demands the establishment of "a judicious system of preparation" for resumption. It cannot be doubted that the substitution of "a system of preparation" without the promise of a day, for the worthless promise of a day without "a system of preparation," would be the gain of the substance of resumption in exchange for its shadow.

Nor is the denunciation unmerited of that improvidence which, in the eleven years since the peace, has consumed \$4,500,000,000, and yet could not afford to give the people a sound and stable currency. Two and a half per cent. on the expenditures of these eleven years, or even less, would have provided all the additional coin needful to resumption.

RELIEF TO BUSINESS DISTRESS.

The distress now felt by the people, in all their business and industries, though it has its principal cause in the enormous waste of capital occasioned by the false policies of our Government, has been greatly aggravated by the mismanagement of the currency. Uncertainty is the prolific parent of mischiefs in all business. Never were its evils more felt than now. Men do nothing, because they are unable to make any calculations on which they can safely rely. They undertake nothing, because they fear a loss in everything they would attempt. They stop and wait. The merchant dares not buy for the future consumption of his customers. The manufacturer dares not make fabrics which may not refund his outlay. He shuts his factory and discharges his workmen. Capitalists cannot lend on security they

consider safe, and their funds lie almost without interest. Men of enterprise, who have credit, or securities to pledge, will not borrow. Consumption has fallen below the natural limits of a reasonable economy. Prices of many things are under their range in frugal, specie-paying times before the civil war. Vast masses of currency lie in the banks unused. A year and a half ago the legal tenders were at their largest volume, and the \$12,000,000 since retired have been replaced by fresh issues of \$15,000,000 of bank-notes. In the mean time, the banks have been surrendering about \$4,000,000 a month, because they cannot find a profitable use for so many of their notes.

The public mind will no longer accept shams. It has suffered enough from illusions. An insincere policy increases distrust. An unstable policy increases uncertainty. The people need to know that the Government is moving in the direction of ultimate safety and prosperity, and that it is doing so through prudent, safe, and conservative methods, which will be sure to inflict no new sacrifice on the business of the country. Then the inspiration of new hope and well-founded confidence will hasten the restoring processes of Nature, and prosperity will begin to return.

The St. Louis Convention concludes its expression in regard to the currency by a declaration of its convictions as to the practical results of the system of preparation it demands. It says: "We believe such a system, well devised, and, above all, intrusted to competent hands for execution, creating at no time an artificial scarcity of currency, and at no time alarming the public mind into a withdrawal of that vaster machinery of credit by which ninety-five per cent. of all business transactions are performed—a system open, public, and inspiring general confidence—would, from the day of its adoption, bring healing on its wings to all our harassed industries, set in motion the wheels of commerce, manufactures, and the mechanic arts, restore employment to labor, and renew in all its natural sources the prosperity of the people."

The Government of the United States, in my opinion, can advance to a resumption of specie payments on its legal-tender notes by gradual and safe processes tending to relieve the present business distress. If charged by the people with the administration of the executive office, I should deem it a duty so to exercise the powers with which it has been or may be invested by Congress, as best and soonest to conduct the country to that beneficent result.

CIVIL-SERVICE REFORM.

The convention justly affirms that reform is necessary in the civil service; necessary to its purification; necessary to its economy and its efficiency; necessary in order that the ordinary employment of the public business may not be "a prize fought for at the ballot-box, a brief reward of party zeal, instead of posts of honor assigned for proved competency and held for fidelity in the public employ." The convention wisely added that "reform is necessary even more in the higher grades of the public service. President, Vice-President, judges, Senators, Representatives, cabinet officers—these, and all others in authority, are the people's servants. Their offices are not a private perquisite; they are a public trust."

Two evils infest the official service of the Federal Government:

One is, the prevalent and demoralizing notion that the public service exists not for the business and benefit of the whole people, but for the interest of the office-holders, who are, in truth, but the servants of the people. Under the influence of this pernicious error public employments have been multiplied: the numbers of those gathered into the ranks of office-holders have been steadily increased beyond any possible requirement of the public business, while inefficiency, peculation, fraud, and malversation of the public funds, from the high places of

power to the lowest, have overspread the whole service like a leprosy.

The other evil is, the organization of the official class into a body of political mercenaries, governing the caucuses and dictating the nominations of their own party, and attempting to carry the elections of the people by undue influence, and by immense corruption-funds systematically collected from the salaries or fees of office-holders. The official class in other countries, sometimes by its own weight and sometimes in alliance with the army, has been able to rule the unorganized masses even under universal suffrage. Here, it has already grown into a gigantic power capable of stifling the inspirations of a sound public opinion, and of resisting an easy change of Administration, until misgovernment becomes intolerable, and public spirit has been stung to the pitch of a civic revolution.

The first step in reform is the elevation of the standard by which the appointing power selects agents to execute official trusts. Next in importance is a conscientious fidelity in the exercise of the authority to hold to account and displace untrustworthy or incapable subordinates. The public interest in an honest, skillful performance of official trust must not be sacrificed to the usufruct of the incumbents.

After these immediate steps, which will insure the exhibition of better examples, we may wisely go on to the abolition of unnecessary offices, and finally to the patient, careful organization of a better civil-service system, under the tests, wherever practicable, of proved competency and fidelity.

While much may be accomplished by these methods, it might encourage delusive expectations if I withheld here the expression of my conviction that no reform of the civil service in this country will be complete and permanent until its Chief Magistrate is constitutionally disqualified for reelection; experience having repeatedly exposed the futility of self-imposed restrictions by candidates or incumbents. Through this solemnity only can he be effectually delivered from his greatest temptation to misuse the power and patronage with which the Executive is necessarily charged.

CONCLUSION.

Educated in the belief that it is the first duty of a citizen of the republic to take his fair allotment of care and trouble in public affairs, I have for forty years, as a private citizen, fulfilled that duty. Though occupied in an unusual degree during all that period with the concerns of government, I have never acquired the habit of official life. When, a year and a half ago, I entered upon my present trust, it was in order to consummate reforms to which I had already devoted several of the best years of my life. Knowing as I do, therefore, from fresh experience, how great the difference is between gliding through an official routine and working out a reform of systems and policies, it is impossible for me to contemplate what needs to be done in the Federal Administration without an anxious sense of the difficulties of the undertaking. If summoned by the suffrages of my countrymen to attempt this work, I shall endeavor, with God's help, to be the efficient instrument of their will.

SAMUEL J. TILDEN.

Steps were taken early in the political canvass to prevent any disturbances at the elections in the Southern States. On August 15th the Secretary of War addressed the following letter to General Sherman, the commander of the Army:

WAR DEPARTMENT, WASHINGTON CITY, }
August 15, 1876.

To General W. T. SHERMAN, commanding United States Army.

SIR: The House of Representatives of the United

States, on the 10th inst., passed the following preamble and resolutions:

Whereas, The right of suffrage prescribed by the constitutions of the several States is subject to the fifteenth amendment to the Constitution of the United States, which is as follows:

"ARTICLE XV., SECTION 1. The right of citizens of the United States to vote shall not be denied or abridged by the United States, or by any State, on account of race, color, or previous condition of servitude.

"SEC. 2. The Congress shall have power to enforce this article by appropriate legislation."

And whereas, The right of suffrage, so prescribed and regulated, should be faithfully maintained and observed by the United States and the several States and citizens thereof; and

Whereas, It is asserted that the exercise of the right of suffrage is in some of the States, notwithstanding the efforts of all good citizens to the contrary, resisted and controlled by fraud, intimidation, and violence, so that in such cases the object of the amendment is defeated; and

Whereas, All citizens, without distinction of race, or class, or color, are entitled to the protection conferred by such article; therefore, be it

Resolved, by the House of Representatives, That all attempts by force, fraud, terror, intimidation, or otherwise, to prevent the free exercise of the right of suffrage in any State, should meet certain, condign, and effectual punishment; and that in any case which has heretofore occurred, or that may occur, in which violence or murder has been or shall be committed by one race or class upon the other, the prompt prosecution and punishment of the criminal, or criminals, in any court having jurisdiction, is imperatively demanded, whether the crime be one punishable by fine or imprisonment, or one demanding the penalty of death.

The President directs that, in accordance with the spirit of the above, you are to hold all the available force under your command, not engaged in subduing the savages of the Western frontier, in readiness to be used, upon call or requisition of the proper legal authorities, for protecting all citizens, without distinction of race, color, or political opinion, in the exercise of the right to vote as guaranteed by the fifteenth amendment, and to assist in the enforcement of certain, condign, and effectual punishment upon all persons who shall attempt, by force, fraud, terror, intimidation, or otherwise, to prevent the free exercise of the right of suffrage, as provided by the laws of the United States; and have such force so distributed and stationed as to be able to render prompt assistance in the enforcement of law. Such additional orders as may be necessary to carry out the purpose of these instructions will be given you from time to time, after consultation with the officers of the Government.

Very respectfully, your obedient servant,

J. D. CAMERON, Secretary of War.

On September 4th Attorney-General Taft issued the following circular of instruction to the United States marshals in the election districts:

Sir: The laws of the United States having made it my duty to exercise general direction over the marshals as to the manner of discharging their offices, I have prepared for their use this circular letter of instructions as to the coming elections, intending the same also as a reply, once for all, to numerous applications in like connection from private citizens in various States.

In the present condition of legislation the United States occupy a position toward voters and voting which varies according as the election is for State and other local officers only, or for members of Congress and presidential electors. In elections at which members of the House of Representatives are chosen, which by law include elections at which the electors for President and Vice-President are appointed, the United States secure voters against whatever in general hinders or prevents them from a free exercise of the elective franchise, extending that care alike to the registration lists, the act of voting, and the personal freedom and security of the voter, as well as against violence on account of any vote he may intend

to give as against conspiracy, because of any that he may already have given.

The peace of the United States, therefore, which you are to preserve, and whose violation you are to suppress, protects, among others, the rights specified in the last paragraph; and any person who by force violates those rights breaks that peace and renders it your duty to arrest him, and to suppress any riots incident thereto, or that threaten the integrity of the registration or election, to the end that the will of the people in such election may be ascertained and take effect, and that offenders may be brought before the courts for punishment. Notorious events in several States, which recently and in an unusual manner have been publicly reprobated, render it a grave duty of all marshals who have cause to apprehend a violation of the peace of the United States, connected as above with the elections to be held upon the Tuesday after the first Monday in November next, to be prepared to preserve or to restore such peace. As the chief executive officer of the United States in your district, you will be held responsible for all breaches of peace of the United States which diligence on your part might have prevented, and for the arrest and security of all persons who violate that peace in any of the points above enumerated.

Diligence in these matters requires, of course, that you be and continue present in person or by deputy at all places of registration or election at which you have reason to suspect that the peace is threatened, and that, whenever an embodiment of the *posse comitatus* is required to enforce the laws, such embodiment be effected. You will observe that the "special" deputies mentioned in section 2021 of the Revised Statutes have peculiar duties assigned to them—duties which otherwise do not belong to deputy-marshals. Such "special" deputies can be appointed only in cities of 20,000 inhabitants or upward. But the duties assigned to marshals and their deputies by section 2022, or other like statutes, belong to all duly appointed deputies, whether they be general or "special," within the meaning of that and the preceding section. Deputies to discharge this latter class of duties may be appointed to any number whatever, according to the discretion of the marshal in all States in which sheriffs have a similar power. Section 2020 has no limit imposed upon the appointment of deputies by sheriffs, because in such States the laws of the United States "prior to the 10th of June, 1872," left marshals also unlimited as to the number of their deputies.

In discharging the duties above mentioned, you will doubtless receive the countenance and support of all good citizens of the United States in your respective districts. It is not necessary to say that it is upon such countenance and support that the United States mainly rely in their endeavor to enforce the right to vote which they have given or have secured. The present instructions are intended only to counteract that partial malice, wrong-headedness, or inconsideration, which sometimes triumphs at critical moments over the conservative and in general prevailing forces of society, and to which the present and passing condition of the country gives more than ordinary strength, and therefore requires the Government to particularly observe and provide against. In this connection I advise that you and each of your deputies, general and "special," have a right to summon to your assistance, in preventing and quelling disorder, "every person in the district above fifteen years of age, whatever may be their occupation, whether civilians or not, and including the military of all denominations—militia, soldiers, marines—all of whom are alike bound to obey you. The fact that they are organized as military bodies, whether of State or of the United States, under the immediate command of their own officers, does not in any wise affect their legal character. They are still the *posse comitatus*." I prefer to quote the above statement of the laws upon this point from an opinion

by my predecessor, ex-Attorney-General Cushing, because it thus appears to have been well settled for many years. (6 Opinions, 466, May 27, 1854.)

I need hardly add that there can be no State law or State official in this country who has jurisdiction to oppose you in discharging your official duties under laws of the United States. If such interference shall take place—a thing not anticipated—you are to disregard it entirely. The laws of the United States are supreme, and so, consequently, is the action of officials of the United States in enforcing them. There is, as virtually you have already been told, no officer of a State whom you may not, by summons, embody into your own *posses*; and any State *posse* already embodied by a sheriff will, with such sheriff, be obliged, upon your summons, to become part of a United States *posse*, and obey you, or your deputy acting *virtute officia*. The responsibility which devolves upon an officer clothed with such powers, and required to guard the highest rights of citizens, corresponds in degree with those powers and rights, and exacts of such officer consideration, intelligence, and courage. It is proper to advise you that, in preparing this circular, I have considered recent important judgments given by the Supreme Court of the United States upon acts of Congress which regulate this general topic.

I have founded the above instructions upon such acts as are affected by those judgments. I need in this place add no more than that these judgments do not concern State elections. You will find appended, in full or by reference, such statutory provisions as it seems important that you and your deputies shall in this connection read and consider. In matters of doubt, you are of course entitled to the advice of the United States Attorney for your district. These instructions have been submitted to the President, and have his approval.

Very respectfully, your obedient servant,
ALPHONSO TAFT, Attorney-General.

On September 7th, General Sherman, under the direction of the preceding letter of the Secretary of War, issued a general order for the guidance of the Army. It embraced the above instructions of the Attorney-General to the marshals, and then called the attention of all officers of the Army to section 5522 of the Revised Statutes in regard to interfering with supervisors of election, marshals or deputies, and also to an extract of a letter of the Secretary of War to General Meade, dated August 25, 1863, heretofore issued as the instructions of the department, which extract is as follows:

The obligation of military individuals, officers, and soldiers, in common with all citizens, to obey the summons of a marshal or sheriff, must be held subordinate to their paramount duty as members of a permanent body. Hence troops can act only in their proper organized capacity under their own officers, and in obedience to the immediate orders of those officers. The officer commanding troops summoned to the aid of a marshal or sheriff must also judge for himself, and upon his official responsibility, whether the service required of him is lawful and necessary, and compatible with the proper discharge of his ordinary military duties, and must limit his action absolutely to proper aid in the execution of a lawful precept exhibited to him by the marshal or sheriff. If time will permit, every demand from a civil officer for military aid, whether it be for the execution of civil process or to suppress insurrection, should be forwarded to the President, with all material facts in the case, for his orders; and in all cases the highest commander whose orders can be given in time to meet the emergency will alone assume the responsibility of action. By a timely disposition of troops where there is reason to apprehend neces-

sity for their use, and by their passive interposition between hostile parties, danger of collision may be averted.

He further called attention to the proclamation of the President of the United States of May 3, 1871, in regard to the enforcement act in which the President enjoins upon all good citizens, and especially upon all public officers, to be zealous in the enforcement thereof, and warns all persons to abstain from committing any of the acts thereby prohibited. The following paragraphs of the general order publishing that proclamation for the guidance of the Army were published in this order of September 7th:

The President directs that, whenever occasion shall arise, regular forces of the United States stationed in the vicinity of any locality where offenses described by the aforesaid act, approved April 30, 1871, may be committed, shall, in strict accordance with the provisions of said act, be employed by their commanding officers in assisting the authorized civil authorities of the United States in making arrests of the persons accused under the said act; in preventing the rescue of persons arrested for such cause; in breaking up and dispersing bands of disguised marauders, and of armed organizations against the peace and quiet or lawful pursuits of citizens in any State. Whenever troops are employed in the manner indicated in this order, the commanding officer will at the earliest opportunity make a full report of his operations to the proper superior authority.

The election took place on the 7th of November, and the following are the official returns of the popular vote:

STATES.	Hayes (Rep.).	Tilden (Dem.).	Coeper (Conserv.).	Smith (Prohib.).

* Returning-Board count.

The votes of Florida, Louisiana, and South Carolina, giving Hayes a majority, were disputed by the friends of Tilden, and the reader is referred to those States respectively.

The Constitution of the United States makes it the duty of Congress to canvass the electoral votes and to declare the name of the person elected. But as the Lower House of Congress was Democratic by a large majority and the Senate Republican, and as the Democrats of the House denied the correctness of the returns from the three States above mentioned, it became probable that the two Houses would not agree in declaring the result; therefore neither candidate could hold the office of President as a result of the election.

To avoid the uncertainties and excitement of the country in prospect, an arrangement was made, under the legislation of Congress, which resulted in uniting the two Houses in declaring Rutherford B. Hayes as the successful candidate. But the history of all these proceedings forms a part of the record of 1877, which will be found in the next volume of this series.

Number of State conventions, 22; of associations, 69; of Church organizations, 656; of Sunday-schools, 640; of teachers and pupils in the same, 59,463; of church-edifices, 756; total valuation of church property above indebtedness, \$7,465,495. The fourteen Universalist theological schools, colleges, and seminaries, reported for 1876 a total of ninety-nine professors and teachers, 1,086 students, and \$2,385,000 of assets. The total net assets of the Universalist Publishing House at Boston were \$30,000. It also published six periodicals. The entire list of Universalist periodicals includes five general weekly papers, one bi-weekly paper, four Sunday-school papers, one monthly magazine, the *Universalist Quarterly*, and the annual *Register*.

The General Convention of Universalists in the United States met at Rochester, N. Y., October 18th. The Rev. Henry W. Rugg, of Rhode Island, was chosen president. The treasurer reported that the present value of the Murray Centenary fund was \$12,742.54. Defaults in interest had occurred on two loans, of \$6,878.75 and \$9,000 respectively. The principal of the John G. Gunn Memorial fund remained at the amount of \$3,000. Gifts to the amount of \$600 had been granted during the year from this fund. The debt of the convention had been reduced \$4,300 during the year, and was reported to be now \$25,200. The total amount of moneys passing through the hands of the treasurer on general account during the year had been \$42,884.33. The Board of Trustees reported that the actual income of the general fund for the year had been \$20,655.88, and the actual expenditures, \$19,639.84. Forty scholarships had been in force during the year, and ten beneficiaries of the convention had been graduated. The amount of the aid rendered by the convention to students had been \$7,200, and \$1,092 had been received in repayment of former loans on this account. There had been expended in this department, since the establishment of theological scholarships by the convention, \$50,280, of which sum \$5,520 appeared as a free gift, and \$540 had been remitted or canceled by the Board of Trustees, leaving \$44,220 as the amount of loans which had been made in accordance with the existing rules.

The General Convention called the attention of the State conventions to the desirableness of electing a class of officers called State superintendents, and advised the trustees to define for these officers their relations to the General Convention, and their duties in connection with it. It recommended the appointment of a committee of six persons in Western missionary work, to be made by the convention on nominations by the united delegates to the convention each year from west of the Alleghany Mountains; the committee to report to the Trustees of the General Convention, and work in harmony with them, and with the General Secretary, and to be the agents of the trustees in disbursing such sums as may be ap-

propriated for missionary work in the West. A resolution was adopted recommending the churches to organize and sustain conference and prayer meetings. A motion was adopted to endeavor to complete the Murray Centenary fund during the year.

URUGUAY (REPÚBLICA ORIENTAL DEL URUGUAY), sometimes also called La Banda Oriental, an independent republic of South America, extending from 30° to 33° 55' south latitude, and from 52° 40' to 58° west longitude. It is bounded on the north by the Brazilian province of Rio Grande do Sul, on the east by the South Atlantic, on the south by the Rio de la Plata, and on the west by the Argentine Republic.

In an official statistical table for the year 1875, the area of the republic is set down at 72,170 square miles; and the population for 1874 at 450,000, against 221,248 for 1860. In the department of Montevideo, the most important of the thirteen which constitute the territorial division of the country, there were 127,496 inhabitants, comprising 70,609 Uruguayans, 16,761 Italians, 16,352 Spaniards, 7,829 French, and 15,945 of other nationalities.

The President of the Republic is Colonel L. Latorre, invested with dictatorial powers from March 11, 1876, to March, 1877.

The cabinet is composed of the following ministers: Interior, J. M. Montero; Foreign Affairs, A. Velazco; Finance, A. Vasquez; and War and the Navy, E. Vasquez.

The consul-general of Uruguay for the whole United States is Señor E. C. B. García, resident in New York.

In the budget for 1875 the expenditure was estimated at \$5,902,350, exclusive of the national-debt service; and in that for 1876 at \$4,552,571. The national revenue yielded, in 1873, the sum of \$9,904,617.49; and in 1874 that of \$8,739,181.

It was estimated that for the fiscal year 1876-'77 the revenue, including the yield of the new imposts decreed in 1875-'76, will not fall short of \$9,000,000. In this case there would be a considerable surplus to apply upon the payment of the national debt, which payment the Government proposes to resume as soon as circumstances permit.

The following table shows the amount of the debt at the beginning of the year 1875:

Twelve per cent. home debt.....	\$15,750,498 42
Nine " " ".....	2,632,408 18
Six " " ".....	7,233,647 80
Total home debt.....	\$25,696,554 40
Foreign debt.....	14,574,560 00
International debt.....	8,121,150 00
Total national debt.....	\$48,692,264 40

The foregoing figures include the titles for interest corresponding to the year 1875—say, \$1,814,097.60.

The interest and sinking-fund services of the home first, and afterward of the foreign debt, were suspended in 1875, owing to the political and financial crises by which the country was

afflicted; but there was no interruption in the service of the international debt. In the absence of official data, it is impossible to give here a statement of the floating debt.

Owing to the rescission of the contract made in 1875 with the bank of Maná & Co., the Government, by decree of April 26, 1876, assumed the charge of the emission of that bank, engaging, however, not to emit any unconvertible paper-money, and setting apart for the sinking-fund of the notes the yield of various imposts, estimated to amount to \$1,200,000.

The proceeds of direct taxation in the department of Montevideo alone, for the seven years 1869-'75, were as follows:

YEARS.	Amounts.	YEARS.	Amounts.
1869.....	\$169,000	1873.....	\$300,000
1870.....	300,000	1874.....	400,000
1871.....	325,000	1875.....	420,000
1872.....	380,000		

The interests of public instruction are sedulously attended to in Uruguay. In the year 1875 there were in the republic 227 primary municipal schools, with an attendance of 15,564, including both sexes; and 142 private schools, with an aggregate of 7,114 scholars—that is to say, a total of 22,678 (12,001 males and 10,677 females) attending school throughout the country—or one out of every nineteen inhabitants.

The value of the foreign commerce for the years 1872, 1873, and 1874, was as follows:

COMMERCE.	1872.	1873.	1874.
Imports.....	\$19,467,132	\$21,075,446	\$16,600,000
Exports.....	15,499,056	16,801,772	16,002,000
Total.....	\$34,966,188	\$37,877,218	\$32,602,000

It should be remarked that the figures for 1874 are only approximate, the commercial statistics not having been completed before the time of the publication of the report already referred to.

The shipping movement at the port of Montevideo for the year 1875 comprised 3,385 vessels, with an aggregate of 1,927,887 tons; and the coasting-trade at all the ports for the year 1874 was carried on by 13,208 vessels, including all craft.

In 1875 the total number of miles of railway completed was 235. The branch of the Central Railway from Santa Lucia to San José was opened to traffic on May 20, 1876.

The city of Montevideo has six lines of horse-cars.

The following table recapitulates the reports of the Emigration Board for the years therein expressed:

YEARS.	Arrived.	Applied for Occupation.	Received Occupation.
1870.....	21,143	1,305	1,210
1871.....	17,912	748	714
1872.....	11,516	916	877
1873.....	24,389	1,480	1,444
1874.....	18,754	2,708	2,640
1875.....	5,398	1,493	1,401

V

VENEZUELA (ESTADOS UNIDOS DE), UNITED STATES OF, a republic of South America, extending from 1° 8' to 12° 16' north latitude, and from 60° to 78° 17' west longitude. Its boundaries are: the Caribbean Sea on the north, the Atlantic Ocean and British Guiana on the east, Brazil on the south, from which empire it is separated by the Pacaraima Mountains, and the United States of Colombia on the west. Its maximum length from east to west is about 900 miles, and its maximum breadth from north to south, 770. The area is variously estimated at from 408,000 to 481,000 square miles, including the islands. The republic is divided into twenty States, one Federal District, and one Territory, which, with their capitals and the populations of both in 1878, are as follows:

The President of the Republic is General Guzman Blanco, elected February 20, 1878. The Minister of the Interior and Justice is Dr. D. B. Urbaneja; of Foreign Affairs, General J. Gutierrez; of Finance, Señor S. Goiticoa; of Public Worship, Public Instruction, and Public Works, Colonel J. Muñoz Tebar; of War and Marine, General M. Gil; and of Public Credit, General J. G. Ochoa.

The national revenue for the fiscal year 1874-'75 amounted to \$5,824,676.16, and the expenditure to \$5,100,560.79. About 60 per cent. of the revenue is appropriated to defraying the expenses of the Government, and the remainder is applied upon the national debt. On June 30, 1875, the national debt was as follows:

Home debt.....	\$12,585,779 81
Foreign debt.....	49,241,165 29
Total.....	\$61,826,944 56

The regular army is composed of about 10,000 men.

Public education and intellectual culture are

making considerable progress. The country has several universities, that of Caracas being the most important, with about twenty professors and over two hundred students, a library of more than 25,000 volumes, a physical cabinet, a laboratory of chemistry, and a museum of natural history. It occupies a very handsome, well-built edifice, in the centre of the city. Colleges and preparatory schools exist in all the towns of the republic, and the number of elementary schools has increased very much through the care of President Guzman Blanco, since the issue of the decree of June 27, 1870, which gave a new organization to public instruction. In 1855 there were in the whole republic but 211 schools, with 5,438 pupils; now there are 1,181 schools, and 48,140 pupils; 691 are called federal schools, 209 are municipal schools, and 281 private establishments. The federal schools are maintained at the expense of the Government, and in the last year the expenditure was \$264,877.80, part of which (\$93,188.86) was supplied by a small tax on bills and receipts for sums of over ten dollars, and collected under the form of stamps (*estampillas de escuelas*). A number of young men have of late been sent to the United States for the purpose of acquiring, at the expense of the Government of Venezuela, a perfect theoretical and practical knowledge of the best modern methods of teaching.

The destination and value of exports for the year 1874-'75 are given in the following table:

COUNTRIES.	Value.
Germany.....	\$5,449,752 86
Spain.....	595,814 44
Colombia.....	503,007 23
United States.....	3,799,170 51
France.....	2,568,088 19
England.....	290,975 60
Italy.....	48,618 70
Danish colonies.....	19,512 64
Spanish colonies.....	2,868 08
French colonies.....	67,667 21
Dutch colonies.....	2,642,960 67
British colonies.....	1,453,959 48
Total.....	\$17,808,840 90

The sources and approximate* value of the imports for the same year were as follows:

COUNTRIES.	Value.
Germany (Hamburg).....	\$1,541,231 94
England.....	2,518,847 75
United States, New York.....	\$2,079,814 88
" Philadelphia.....	577,171 25
France.....	2,656,958 78
Spain.....	1,817,378 77
Italy.....	846,554 00
Trinidad.....	29,878 75
Trinidad.....	772,740 89
Curacao.....	1,016,882 27
Porto Rico.....	408 00
Canary Islands.....	3,583 00
St. Thomas.....	179,329 07
Total.....	\$10,877,606 67

* The total value may be set down at about \$12,000,000.

Several lines of ocean-steamers touch at the Venezuelan ports: the Hamburg line, the French line from Saint-Nazaire and Martinique, and a branch line of the Royal Mail. There is at present no direct steam connection with the United States, and all the trade between the two countries is carried on by sailing-vessels.

The inland trade has lately been much facilitated by new cart-roads; and very soon a net of well-constructed roads will cover the whole country, while five or six years ago there were but two roads, namely, from La Guayra to Caracas, and from Puerto Cabello to Valencia. In the year 1875 more than \$1,500,000 was spent in these public works. The total length of roads already finished is about 1,000 miles. Venezuela has not yet any railroads. The building of a line between Caracas and La Guayra has been resolved upon; the survey is made and the preparatory work almost concluded.

The postal-service is well organized; telegraphic lines connect the principal towns (Puerto Cabello, Valencia, La Victoria, La Guayra) with the capital, and other lines are in course of construction. The republic has postage-stamps of one, five, ten, and twenty cents.

Periodicals printed in the country are free of postage.

VERMONT. The Republican party of this State assembled in convention at Burlington on the 29th of March, for the purpose of electing delegates to the National Republican Convention to be held at Cincinnati. As delegates at large, L. P. Poland, of St. Johnsbury; Wheelock G. Weazey, of Rutland; George Howe, of Brattleboro; and George H. Bigelow, of Burlington, were elected. The following resolutions were adopted by the convention:

Resolved, That in this centennial year we again affirm our devotion to those fundamental principles upon which the Republican party was founded. Among these are:

1. The preservation of the liberties and equal rights of all citizens throughout, and the impartial and vigorous administration of the laws in every part of the country for the protection and enforcement of public and private rights, and the punishment of violence and crime.

2. The pure and economical administration of every department of the Government, so as to produce the greatest benefit to the people, with as little burden of taxation as may be consistent therewith.

3. The safety of the republic depends upon the intelligence as well as virtue of its citizens; and it is essential that the public-school system shall be maintained, in order that every child may receive such education as will fit him for useful citizenship; and we are unalterably opposed to any division of the public-school money for any purpose whatever.

4. We rally to the standard of the Republican party as the only one under which we can obtain an honest and effective maintenance of the Government, as well as for the defense of the Treasury against the unjust demands and expenditures growing out of the rebellion.

5. The best interests of all citizens, of every condition and pursuit, imperatively demand the speediest return to a specie basis of values and currency, and

we hail with gratification the act of the Republican Congress definitely providing for that end; and we are firmly opposed to a repeal thereof, or to any step backward in the matter.

6. We are in favor of the untiring prosecution and punishment of public frauds and crime wherever existing, and we repeat the declaration, "Let no guilty man escape."

7. We demand that our national candidates shall be men of tried integrity, who will carry out this policy of reform, and preserve inviolate the great results of the war.

STATE SEAL OF VERMONT.

The Democrats of Vermont met in State Convention at Montpelier on June 1st, to nominate their candidates for Governor and other State officers; also for presidential electors, and to appoint ten delegates to the National Democratic Convention at St. Louis. With regard to the State ticket, W. H. H. Bingham, of Stow, was nominated as candidate for the office of Governor; for Lieutenant-Governor, E. B. Baldwin, of Sharon, and for State Treasurer, James B. Mattocks, of Danville, were nominated. As Democratic candidates for presidential electors, there were nominated: W. L. Rodman, of Bridgewater; Lucius Robinson, of Newport; George L. Waterman, of Hyde Park; Amos Aldrich, of Woodford; and Stephen L. Goodell, of Brandon. The delegates at large to the National Convention were: Marcus D. Gilman, of Montpelier; Bradley B. Smalley, of Burlington; Jasper Rand, of St. Albans; and Phineas S. Benjamin, of Wolcott.

The following platform was adopted by the convention:

Whereas, The Democrats of Vermont, in convention assembled, recognizing the present deplorable condition of the morals and business interests of the country as the result of a departure from the fundamental principles of government as taught and practised in the early days of the republic, and that a return to those principles, and a radical reform in the administration of the Government, are absolutely necessary for the relief of the people and for the preservation of our free institutions, cordially invite the freemen of the State, of whatever political predilections, to unite with them in the following resolutions:

1. Fidelity to all the provisions of the Constitution of the United States; thorough retrenchment and economy in Federal and State administrations; the

lessening of the burdens imposed on labor, or by the reduction of offices and taxation.

2. An honest civil-service reform; strict accountability of our officials, enforced by competent civil and criminal remedies; the restoration of the Democratic tests of honesty, fidelity, and capacity as qualifications for public officials.

3. Honest payment of the public debt; sacred preservation of the public faith.

4. Free schools exempt from sectarian control; no appropriation of public money for sectarian institutions. A free press, accountable for abuse to civil and criminal laws.

5. Home rule; no centralization of State or Federal power; no Federal interference in the State or municipal elections.

6. Exposure and speedy punishment of corruption and peoulation in the administration of public affairs.

7. Gold and silver as the only legal tender; no currency inconvertible with coin; coin the only currency recognized by the Constitution.

8. Steady steps toward the resumption of specie payments; no steps backward.

9. Tariff for the purpose of revenue only.

10. In the confidence that our delegates to the National Democratic Convention at St. Louis will support only those candidates who are the proper representatives of their principles, we leave them to the free exercise of their discretion in the choice of men best fitted to bring about thorough reform in the administration of our national affairs.

11. In the interest of honest and pure government outraged, our free institutions periled, and to redeem the American name from the stigma cast upon it by the astounding and unparalleled corruption of the party now in power, we cordially invite the cooperation with us of all honest men, irrespective of former party affiliation.

12. That the thanks of the people are due to the House of Representatives of the United States for reducing appropriations and confining expenditures within the proper limits; also for instituting investigations, and unearthing frauds and corruptions in high places; and that in this convention we commend the action of the Democrats of New York and Connecticut in the large reduction of State taxation which they have produced, as a practical return to the economy and strict accountability which always characterized the administration of the Government under the rule of Democrats.

The Republicans held their State Convention at Montpelier on June 27th, for the purpose of nominating their State and electoral tickets. For the office of Governor, Horace Fairbanks, of St. Johnsbury, was nominated. For the offices of Lieutenant-Governor and State Treasurer, Redfield Proctor, of Rutland, and John A. Page, of Montpelier, were nominated without opposition. As candidates for presidential electors at large, Jacob Estey, of Brattleboro, and Charles E. Houghton, of Bennington, were nominated.

As the platform of this convention, two resolutions were reported and accepted by the convention: the one adopting the platform which had been shortly before adopted by the National Republican Convention at Cincinnati; the other promising for the State ticket as large a majority of votes at the election as was ever before obtained.

The election, held on September 5th, resulted in the complete success of the Republican candidates. The aggregate number of votes polled in the State for Governor was 65,786, of which

Mr. Fairbanks received 44,698, Mr. Bingham, 21,088: showing a majority of 23,660 for the former over the latter.

With regard to the State Legislature, the thirty members elected for the Senate were all Republicans. In the House of Representatives there are 209 Republicans and 81 Democrats.

The Legislature assembled for the regular session at Montpelier on the 4th of October, 1876, when both Houses were promptly organized. In the Lower House, John W. Stewart, Republican, was elected Speaker by a vote of 186 to 27; the latter number having been cast for J. W. Bliss, the Democratic nominee for that office.

The two Houses successively met in joint assembly on the 16th, 21st, and 24th of November, and elected the Secretary of State, with some other officers of the Executive Department; the seven Judges of the Supreme Court, and a number of the principal officers controlling the management of charitable and other institutions under State charge. For Secretary of State, George Nichols, of Northfield, the present incumbent, was reelected for two years; for Auditor of Accounts, Jedediah B. Ladd, of Alburg; for Adjutant and Inspector-General, James S. Peck, of Montpelier; for Quartermaster-General, Levi G. Kingsley, of Rutland; for Railroad Commissioner, Marion W. Bailey, of St. Albans; for Superintendent of Public Education, the present incumbent, Edward Conant, of Randolph, was reelected for another two-years' term; for Chief-Justice of the Supreme Court, John Pierpont, of Vergennes; for Associate Justices: first district—James Barret, of Woodstock; second district—Hoyt H. Wheeler, of Jamaica; third district—Homer E. Boyce, of St. Albans; fourth district—Timothy P. Redfield, of Montpelier; fifth district—Jonathan Ross, of St. Johnsbury; sixth district—H. Henry Powers, of Morristown. All of these judges were reelected.

At the election of November 7, 1876, the Republican candidates for presidential electors were chosen; also their nominees for Congressmen generally. The popular vote for the Republican electors was 44,092; for the Democratic electors, 20,254: Republican majority, 23,838.

The vote polled for presidential electors was canvassed by the county clerks on November 21st. At the opening of their meeting, counsel for the Democratic party appeared before the Board of Canvassers, and, upon the ground which he maintained that they were vested with judicial as well as ministerial powers, he claimed and offered to prove that Henry N. Sollace, one of the Republican electors returned as elected, was ineligible to such office, because he at the time held the office of Postmaster of Bridport; that the votes cast for him, being therefore null and void, could not be counted nor he declared elected; but that the votes cast for Amos Aldrich, the Demo-

cratic elector, who had received the next highest number, should be counted and he declared elected. His argument was replied to by counsel for the Republicans, who averred that in the State of Vermont this Board of Canvassers was not vested with judicial but with ministerial powers only, although similar boards in some of the other States had judicial powers also. To this the Democratic counsel made a rejoinder, after which he submitted to the board a written protest, dated Springfield, November 21st, and signed by Amos Aldrich and George M. Fisk, "requesting the board to report to the Secretary of State, and to the Governor, that H. N. Sollace, one of the candidates for electors, was on the 7th of November holding the office of Postmaster of Bridport." They "protested against the board declaring the said Sollace elected or appointed an elector, and further requested the board to declare the person having the next highest number of votes duly elected as an elector . . . and certify the same to the Governor, with the number of votes he received."

Having heard the arguments of counsel on both sides, the board deliberated on the subject among themselves, at the end of which the following resolution was offered by one of the members, and unanimously adopted by all:

Resolved, That this Board of Canvassers are of the opinion that their powers are simply ministerial, and that their duties are clearly defined by the statute of the State. They therefore decline to receive evidence outside of the certificates of votes by the proper town authorities.

The board then canvassed the votes as officially returned, and formally informed the Governor that "Jacob Estey, Charles E. Houghton, Henry N. Sollace, Roswell Farnham, and Alvin C. Welch, had been duly elected presidential electors from Vermont." The board then adjourned *sine die*.

The Legislature continued in session eight weeks, and closed it by final adjournment on the 28th of November, 1876.

A large number of useful laws on various subjects of general and local importance were enacted. Among them were many acts relating to public schools—common, normal, and graded—school-districts, school-directors, and other matters pertaining to education. From among the number, we here subjoin the substantial part of the one which defines what instruction is to be imparted in the common schools of Vermont:

An Act relating to Studies in Common Schools.—SECTION 1. Section 19, chapter 23, of the General Statutes, is hereby amended to read as follows: "Each organized town in the State shall keep and support one or more schools, provided with competent teachers of good morals, for the instruction of the young in orthography, reading, writing, English grammar, geography, arithmetic, free-hand drawing, history and Constitution of the United States, and good behavior; and special instruction shall be given in the geography, history, constitution, and principles of government of the State of Vermont."

An act making provision for the support of

the government assesses a tax of twenty-five cents on the hundred dollars for the year 1876, to be paid into the Treasury by the 1st of June, 1877. The tax for 1877 is assessed by the same act at the rate of thirty-five cents on the hundred dollars.

The material condition of Vermont in regard to her manufactures, trade, and other interests, especially her agricultural and dairy operations, appears to be eminently prosperous.

The aggregate value of taxable property in the State assessed for 1875 was \$99,498,536, made up of \$81,106,760 in real estate, and \$18,386,766 in personal property. For 1876 it was \$99,717,533, composed of \$81,198,221 in real estate, and \$18,519,312 in personal property.

The total list of State taxes for 1875 amounted to \$1,150,968.29; for 1876 it was \$1,154,901.08: showing an excess of \$3,932.74 in favor of the latter year.

Of all the New England States, Vermont has the largest number of acres of improved land. Her whole area consists at present of 3,073,257 acres of improved land, 1,386,934 of woodland, and 68,613 of waste land. Maine, the largest of those States in extent of territory, has 155,464 acres less in improved land than Vermont.

VIRGINIA. The public debt of the State of Virginia consisted on the 30th of September, the close of the fiscal year, of \$18,239,600 in consols with coupons receivable for taxes, \$1,997,415.80 registered bonds convertible into consols, and \$9,252,310.58 registered bonds not convertible, making \$29,489,326.38 as the total of the State bonds. There was also \$3,510,834.35 of accrued interest unpaid. The annual interest charge is \$1,751,175.83. The principal of this debt was all incurred prior to the civil war, and funded anew in 1871. The statement does not include \$15,239,370.74 known as "West Virginia's Third," which was set apart by the funding act for settlement by the State of West Virginia. There is a library-fund consisting of \$1,430,645.25 of available stocks and \$703,072.63 West Virginia certificates, which forms no part of the debt proper, and the sinking-fund contains \$4,986,771.90. The arrears of unpaid interest from the library-fund on the 1st of August were \$108,816.22, and on the 30th of September there was \$521,267.09 due the sinking-fund.

The following is a statement of the receipts and disbursements of the Treasurer for the year:

Balance on hand October 1, 1875	\$23,417 90
Amount received on all accounts during the year, including \$1,111,430.13 in renewals of notes in bank, and which constitute no part of the revenue proper	2,790,519 79
Total	\$25,516,287 73
Total disbursements during the same period, including \$1,111,430.13 in renewals of notes, as stated above	2,773,501 00
Balance on hand October 1, 1876, as per books of this office	\$42,736 00

The principal expenses were as follows:

For ordinary expenses of the government.....	\$975,283 85
For extraordinary expenses.....	183,482 88
For public free schools.....	443,000 00
For interest on debt.....	1,105,805 88

The payments on account of public institutions, included in "ordinary expenses," were as follows:

The Central (colored) Lunatic Asylum.....	\$58,749 96
The Eastern (white) Lunatic Asylum.....	60,000 00
The Western (white) Lunatic Asylum.....	60,000 00
The Deaf, Dumb, and Blind.....	40,000 00
The Virginia Military Institute.....	25,000 00
The University of Virginia, appropriation \$30,000, paid in part.....	27,500 00

Making a total of.....\$366,249 96

The revenues from taxation for the year amounted to \$2,879,839.66, which exceeded the average of the previous six years by \$201,276.28, while the ordinary expenses were less by \$108,906.44 than the average for six years. The estimated expenses for ordinary purposes for the year ending September 30, 1877, are \$1,068,199.

On the 30th of September the number of convicts in the penitentiary was 1,099, of whom 202 were employed at the works of the

Old Dominion Granite Company, 57 on the railroad, and 729 were in the male department of the prison, and 111 in the female department. The average number of inmates during the year was 1,021, maintained at a total cost of \$26,265.44, or \$25.72 *per capita*. The institution was greatly overcrowded, 171 cells being occupied on the 30th of September by 729 men.

The Fish Commissioners of the State have been engaged in stocking the James and Roanoke Rivers with California salmon, and placing other varieties of salmon, bass, and trout, in different ponds and streams of the State. About 800,000 shad were also hatched and turned into the Rappahannock, and a large amount of herring-spawn was deposited in streams near tide-water.

There was no election for State officers this year. The Republicans held a convention at Lynchburg on the 12th of April for the purpose of selecting delegates to the National Convention of the party, at which the following platform was adopted:

Obverse.

Reverse.

STATE SEAL OF VIRGINIA.

The Republicans of Virginia, reaffirming their allegiance to the national Republican party in this centennial year as an event which calls for the expression of gratitude to Almighty God that our civil and religious liberties have been preserved through all the vicissitudes of the country, that the American people have successfully maintained before the world their capacity for self-government, and that the Union remains unbroken either by foreign aggression, civil discord, or domestic violence. The past of our national history is seen, but its future depends upon the preservation of the great fundamental principles which the past has consecrated, and which are expressed in the Declaration of Independence and in the Constitution of the United States with its several amendments. To these the Republican party has always been devoted and faithful. It has carried the Government forward into the front rank among the nations; it has granted amnesty with unexampled liberality; it has gradually diminished the public debt; it has furnished the country with a national currency. It has maintained an economical standard of public expenditures. It has required a faithful collection and disbursement of the public revenues, and it has de-

veloped the material resources of the country by increasing the facilities of intercommunication between the different sections of the country: Therefore,

Resolved, 1. That we will remain faithful to the principles of the national Republican party in things concerning the administration of the national affairs, until every right guaranteed by the Constitution shall be fully secured and enjoyed, and all existing laws faithfully executed.

2. We favor honesty and economy in the administration of the Government, and recommend such retrenchment in the civil service as can be made without impairing the efficiency of the different departments of public business; and at the same time favor liberality, just compensation in the pay of public servants, believing it to be the means to secure the honest and faithful discharge of duty, private or public.

3. We are in favor of the quick and condign punishment of all dishonest and corrupt officers of the Government, no matter what their station, and pledge our support to secure that result.

4. That the honor and credit of this nation must be maintained inviolate; and, to put this beyond dis-

pute, specie payments should be resumed at the earliest practicable moment.

6. We believe free schools to be the palladium of civil liberty, and that they should be supported by the general taxation of the people; and we are opposed to any division of the school-money for the benefit of any sect or denomination whatever, or to any interference with the schools by any sect or denomination. We denounce the action of the Democratic authorities of this State, by whom the money raised for free-school purposes has been taken for other purposes, thus robbing the children of the State of that which will best fit them for becoming good citizens.

6. We believe the safety of free institutions depends upon the purity of the ballot; and we ask the Congress of the United States to pass a law for the protection of its citizens in the right of the elective franchise, by which they may obtain the benefit thereof, and be certain that the ballot deposited for the candidate of their choice will be counted for him and them, and not substituted by a stuffed ballot.

7. We indorse the Administration of the President as distinguished throughout by measures that will preeminently redound to the honor and credit of this nation, and mark a new era in the history of our republic; and especially do we commend the determination expressed by the President to ferret out the guilty and dishonest officials, in the memorable saying, "Let no guilty man escape."

8. We cordially invite all citizens of Virginia, who are in favor of making this centennial year 1876 a year of peace and good-will, to help us in electing the candidate that will be nominated by the National Republican Convention to be held in Cincinnati in June next.

The Democratic Convention took place in Richmond on the 31st of May.

Delegates to the National Convention at St. Louis were chosen, an electoral ticket was nominated, and a State Central Committee appointed. Several speeches were made, expressing the sentiments of prominent delegates, but no platform was adopted. Some resolutions relating to finance and reform were tabled, the majority opposing any declarations whatever. Later in the canvass, on the 31st of August, the State Conservative Committee issued an address defining the position of the party, and discussing the issues of the day.

The total vote for presidential electors in November was 235,228, of which the Democratic candidates received 139,670, and the Republicans 95,558; Democratic majority, 44,112. The total vote on the Constitutional amendments was 227,732, of which 129,373 were in favor of ratification, and 98,559 against it. The amendments were very generally favored by the Conservatives, and opposed by the Republicans. Of eleven members of Congress chosen, all but one are Democrats. The Legislature of 1876-'77 is composed of 37 Democrats and 6 Republicans in the Senate, and 101 Democrats, 25 Republicans, and 6 Independents in the House of Representatives. This makes the Democratic majority 81 in the Senate and 70 in the House, or 101 on joint ballot.

One of the constitutional amendments ratified requires that all persons, before voting,

shall pay a capitation-tax, and disfranchises all who have been convicted of bribery at any election, embezzlement of public funds, treason, felony, or petit larceny. The registration provision of the constitution was struck out. Another amendment authorizes the Legislature by a two-thirds vote to enfranchise persons who have been disfranchised for engaging in duels. Another restores to the Legislature its authority to restrict the debt and taxation of cities and towns, and to limit the exercise of municipal powers generally.

Some excitement was occasioned by the sending of a detachment of Federal troops to Petersburg just prior to the election, and keeping it there until the 18th of November. On hearing of this action the Governor of the State issued the following proclamation:

To the People of Virginia: Information has just been received, from authentic sources, that a detachment of the United States Army was this day quartered at Petersburg, with orders to remain until after the elections, and to be under the sole direction of Federal officials. The voting-places at Petersburg are being surrounded with a cordon of bayonets on the eve of the elections.

It is provided by the Constitution of the United States that the Government thereof shall protect each of the States, on the application of the Legislature (or the Executive, when the Legislature cannot be convened), against domestic violence.

No domestic violence, no breach of the peace, no molestation of any citizen in the exercise of any right, exists, or is threatened, or apprehended, or likely to arise, in this Commonwealth. Perfect peace, order, and security, reign throughout all our borders. Every citizen, of whatever race, color, or condition, is protected, can be protected, and will be protected, in all his personal and political rights, privileges, and immunities, by all the authorities of this State.

No application, by the Legislature or by the Executive, has been made to the President for protection against domestic or other violence.

No complaint is made, anywhere, that the rights of any citizen are assailed or threatened. Nevertheless, in the midst of profound peace, and without a constitutional requisition from any quarter, the President of the United States has stationed troops in a city of this Commonwealth, with the design, as cannot be doubted, of intimidating the people, and controlling the pending elections for partisan purposes.

And, whereas, so flagrant a usurpation of ungranted authority endangers the liberties of the people, and the integrity of the government, imperils the freedom of the elective franchise, and is well calculated, as it is doubtless designed, to incite and foment the domestic violence which is falsely pretended to be threatened:

Now, therefore, I, James L. Kemper, Governor of Virginia, solemnly protesting before the States of the Union, and in the name of the Constitution, against this despotic invasion of our guaranteed rights, do call upon the good people of this Commonwealth, and I command the authorities and officers thereof, to keep the peace at any cost, and to persevere in abstaining from every act and manifestation which might be made a pretext for the employment of armed force in our midst: and I enjoin upon all such moderation and self-denying forbearance, such patience and composure, as will prevent the possibility of any disturbance of the public order.

Done at Richmond, this fourth day of November, in the year of our Lord one thousand eight hundred

and seventy-six, and in the one hundred and first year of the Commonwealth.

JAMES L. KEMPER.

By the Governor:

JAMES McDONALD,
Secretary of the Commonwealth.

In response to a resolution of the Senate calling for information, the President of the United States, on the 14th of December, said:

It is well understood that the presence of United States troops at the polling-places never prevented the full exercise of the franchise of any citizen, of whatever political faith. If, then, they have had any effect whatever upon the ballots cast, it has been to insure protection to the citizen casting it, in giving it to the candidate of his unbiased choice without fear, and thus securing the very essence of liberty. It may be the presence of twenty-four United States soldiers, under the command of a captain and lieutenant, quartered in the custom-house at Petersburg, Va., on the 7th of November, at a considerable distance from any polling-place, without any interference on their part whatever, and without going near the polls during the election, *may have secured a different result from what would have been obtained if they had not been there* (to maintain peace in case of riot), *on the face of returns*. But if such is the case, it is only proof that in this one congressional district in the State of Virginia the legal and constitutional voters have been able to return as elected the candidate of their choice.

General Sherman, in his report to the Secretary of War on the subject, made the following statement:

Company B, Captain Breckinridge, of the Second United States Artillery, was posted at Petersburg, Va., from November 4th to November 13th, when it was recalled to its proper station, Fort Foote, Maryland. To a more complete understanding of the case, I will add that, on the 2d day of November, a gentleman came to me from the Attorney-General, representing that there was reason to apprehend a breach of the peace at Petersburg, Va., and asking a detachment of troops to be sent there. You being then absent, I saw Judge Taft in person, and he advised that a company of soldiers be sent to Petersburg if practicable; and the next day, being in New York City, I saw General Hancock in person, and, after some inquiries as to available troops, I ordered him to send the above designated company to Petersburg, to remain during the election of November 7th, and then to return to its post.

Governor Kemper, alluding to the subject in his annual message, said:

The posting of a band of soldiers close to the voting-places of that city, on the eve of the elections, was as unexpected as a thunderbolt out of a cloudless sky. The entire Commonwealth was in a condition of profound peace. No indication or apprehension of any possible disorder existed, and this government was ready and able to protect the rights of all its citizens in every contingency. Not even a

STATE CAPITOL OF VIRGINIA.

private quarrel, leading to any single case of assault and battery, had occurred for months in the community in which the armed force was thus stationed. . . . Emboldened by the presence of these troops, an inferior ministerial officer of the United States appointed a large number of special deputies for service at Petersburg on the day of the election; and these appointees, including in their number recent malefactors, and wearing the insignia of national authority, assumed to direct and control many votes of a particular class. The effect of the intrusion of national force was to intimidate voters, to control an election for partisan purposes, and to overthrow within certain territorial limits the freedom of the elective franchise. I record for your information, but I forbear to discuss, the particulars connected with a revival of prætorian power, which imperils our institutions and our liberties.

The session of the Legislature began on the 6th of December, but before the adjournment over the Christmas holidays little had been done beyond preparation for legislation. A special committee of five Senators and nine members of the House was appointed, to which could be referred all propositions to amend the constitution of the State. Edmund C. Burks was chosen Judge of the Supreme Court, to fill a vacancy caused by the death of Judge Wood Bouldin. In response to a joint resolution, Governor Kemper submitted a special message indicating what offices could be abolished, and wherein the clerical work at the Capitol could be reduced. Among other sug-

gestions was one that the offices of Adjutant-General, Superintendent of Public Printing, Register of the Land-Office, and Second Auditor, could be advantageously abolished.

Early in the session a series of resolutions was adopted expressing sympathy for the people of South Carolina, and admiration for "the firm, manly, and patriotic assertion of their rights by the people of South Carolina, by their chosen representatives, and by their wise, prudent, and courageous Governor, Wade Hampton, who have with moderation and forbearance borne outrages committed upon them and the constitution and laws of their State, and appealed with calm confidence to the legal tribunals of the State and to the enlightened judgment of the American people."

The Legislature of 1875-'76 had refused to make an appropriation for a display of the resources of the State at the Centennial Exhibition, on account of the poverty of the people and the embarrassment of the State Treasury. From the same considerations the Governor, in October, declined to take part in the celebration of a special Virginia day at Philadelphia.

The University of Virginia during the year

received a gift of \$55,000 from W. W. Corcoran, of Washington, and \$2,000 from a citizen of the State of New York, whose name was withheld from the public.

The committee, headed by A. J. B. Beresford Hope, in England, which raised the funds for the memorial statue of "Stonewall" Jackson, set up in Richmond in 1875, having a balance of over £245 unexpended, transmitted it to the Governor to be used for the foundation of a Jackson prize at the Lexington Military Academy. It has been decided to invest it as a permanent fund, from the income of which gold medals, to be known as "The Jackson Hope Medals," shall be provided, to be awarded to the most distinguished members of the successive graduating classes of the Virginia Military Institute.

The Lee Monument Association has been formed, and is engaged in raising funds to procure an equestrian statue of the late General Robert E. Lee, to be given to the State and placed on the Capitol grounds at Richmond.

(For the action of the Board of Arbitration to fix the boundary between this State and Maryland, see MARYLAND, in this volume.)

W

WALKER, Sir BALDWIN WAKE, a British naval officer, born in 1808; died February 14, 1876. In October, 1828, he rendered valuable aid in the reduction of the castle of Morea, the last hold of the Turks in the Peloponnesus, and for this service was rewarded with the order of the Redeemer of Greece, and the Cross of the Legion of Honor. In 1834 he became commander, and in 1838 captain. For a time he was a rear and a vice admiral in the Turkish Navy, and in 1840 commanded the Turkish fleet which operated on the coast of Syria, participating in the attack on Beyrout and the bombardment of Acre. In 1847 he was appointed Surveyor of the Navy, attained flag rank in 1853, was appointed to the command of the South African station in 1860, and afterward to that of the East Indian station. He was created a baronet in 1856, a K. C. B. in 1841, and was a knight of different foreign orders.

WARREN, JOSEPH, an enterprising citizen of Buffalo, N. Y., where he died, September 30, 1876. He was born in Waterbury, Vt., July 24, 1829. He graduated at the University of Vermont, and went to Albany, N. Y., where he became assistant editor of the *Country Gentleman*, and also Professor of Latin and Greek at the Albany Academy. He became associate editor of the *Buffalo Courier* in 1854, and subsequently editor-in-chief. He took a prominent part in politics, was a member at large of the Democratic State Central Committee, and for ten years had been a recognized leader of the Democratic party in Western New York. He labored zealously to promote the in-

terests of Buffalo. In 1857 he was elected Superintendent of Public Schools. He advocated the project of the public-park system, and served on the Park Commission from its formation in 1871 till his death. He was one of the organizers of the plan to erect the city and county buildings. It was largely through his exertions that the Buffalo Asylum for the Insane was located in that city, and he served as one of its managers, and chairman of the Executive Committee, until within about a month of his death. He was also instrumental in the establishment of the State Normal School in Buffalo, and was a member of its Board of Trustees. He took an active part in the organization of the Fine-Arts Academy, and was interested in the project of the Buffalo, New York & Philadelphia Railroad. He was formerly President of the Young Men's Christian Association in Buffalo; was a member of the Council of the Medical Department of the University of Buffalo, and for several years prior to his death was President of the State Associated Press.

WEST VIRGINIA. The Senate of West Virginia was in session as a Court of Impeachment for several weeks in January and February for the trial of E. A. Bennett, Auditor, and John S. Burdett, Treasurer, on the impeachment begun in 1875 (see ANNUAL CYCLOPEDIA for that year). The result was the conviction and removal from office of Burdett, and the acquittal of Bennett.

The State is in a sound financial condition. It has not yet assumed the payment of that portion of the old debt of Virginia set apart

its share, and makes no report of funded indebtedness. The condition of the Treasury for the last two fiscal years is shown in the following statement:

Balance in the Treasury, October 1, 1874.....	\$282,265 13
Received from all sources during fiscal year ending September 30, 1875.....	547,426 46
Total receipts.....	\$829,791 58
Disbursements for all purposes during the fiscal year ending September 30, 1875.....	576,171 97
Balance in the Treasury, October, 1875.....	\$258,619 61
Received from all sources during the fiscal year ending September 30, 1876.....	636,884 52
Total receipts.....	\$890,454 13
Disbursements for all purposes during the fiscal year ending September 30, 1876.....	682,891 43
Balance in Treasury, October 1, 1876.....	\$207,563 65

At the close of the last fiscal year the general fund, from which all ordinary expenses must be paid, was exhausted, and the Governor borrowed \$70,000 under authority conferred upon him by law—\$24,000 from the banks in Wheeling, and \$46,000 from the school-fund.

These are to be paid from appropriations of 1877. The deficiency making it necessary to borrow for current expenses was occasioned by delinquency in the payment of taxes. There was due on the 1st of October, on account of taxes of 1875, the sum of \$117,349.10.

The system of public schools of the State is gradually improving. The expenditures for school purposes during the year amounted to \$1,000,938.16 against \$921,778.90 in 1875. The number of children enrolled was 184,760; number attending schools, 128,540; average daily attendance, 70,112. There were 3,127 school-houses, valued at \$1,660,467.33; and 3,683 teachers, to whom was paid over \$538,400 in salaries. These figures show a substantial increase over those of 1875.

The Institution for the Deaf, Dumb, and Blind, at Romney, is supported at a cost of about \$30,000 a year. The attendance during the year was 65 deaf-mutes and 19 blind persons. In connection with the school are four shops in which shoemaking, tailoring, mattress-making, broom-making, etc., are taught.

Reverse.

STATE SEAL OF WEST VIRGINIA.

The Hospital for the Insane, at Weston, had 397 inmates on the 30th of September, of whom 222 were males and 175 females. Accommodations for 90 patients have been added during the year, and a new brick building erected for colored patients. The average cost, per week, for each inmate of the hospital was \$2.38. The appropriation asked for, for current expenses for 1877, is \$60,840. The institution is now crowded, and an extension is urged by the superintendent.

The penitentiary, at Moundsville, contained 157 State and 82 United States prisoners at the close of the year. The latter are taken on contract with the Federal Government at forty cents per day. The cost of feeding prisoners during the year was on an average 10.95 cents per day, *per capita*. The penitentiary is not self-supporting, and appropriations are asked for, amounting to \$42,000 for 1877, and \$25,-

000 for 1878. Of the former sum \$15,000 is wanted to complete and equip the workshops.

A convention of the Democrats of the State, held at Charleston, on the 8th of June, made nominations for State officers and presidential electors at large; chose delegates to the National Convention of the party; appointed a State Central Committee; and adopted a declaration of principles. The State ticket was as follows: For Governor, H. M. Matthews; for Attorney-General, Robert White; for Auditor, Joseph S. Miller; for Treasurer, Thomas J. West; for Superintendent of Schools, W. K. Pendleton; for Judges of Supreme Court of Appeals, A. F. Haymond and Okey Johnson for the full term, and T. C. Green for the unexpired term of Judge Paull. Majority and minority reports were made by the Committee on Resolutions. The former consisted of four resolu-

tions, the first urging harmony in the party, and the last arraigning the Republicans. The second was as follows:

Resolved, That the great principles which, in our opinion, underlie and must sustain the national Democratic party, of which we are an integral part, are: 1. Restriction of the Federal Government to its original sphere of action, and to the powers prescribed and limited by the Constitution. 2. The independence of the Supreme Court of the United States preserved against intimidation or undue influence on the part of the coordinate departments of the General Government. 3. Subordination of the military to the civil power. 4. The equality and constitutional self-government of the States, leaving to each of them respectively the solution of questions and difficulties arising therein, subject only to the Constitution of the United States. 5. No occupation of State territory by United States forces, except in aid of civil authority, upon demand of the Governor, as in the Constitution prescribed. 6. Reform of civil service, in such manner that honesty and competency shall again be regarded in the selection of Federal officers, and that such officers shall not be permitted to interfere with the freedom of elections, nor be subjected to contributions to further the political aims or aspirations of the appointing power. 7. Complete and universal unconditional amnesty for all those who participated in the civil war upon a basis of mutual reconciliation, such as the spirit of the age demands and the permanency of our institutions requires. 8. A return to the old landmarks of Anglo-Saxon liberty, viz.: no suspension of the writ of *habeas corpus* in times of peace; trial by a jury of the *vicinage* when the prisoner demands it; freedom of the press, and no religious or expurgatory political tests for suffrage or office-holding. 9. No interference by the General Government with education and religion in the States, upon any pretext whatever, however plausible. 10. Firm and uncompromising resistance to the further infection of the American mind with the spirit of speculation, plunder, and universal corruption in office, inaugurated by the Republican party, fostered by the war, and culminating in the disgusting indecency practised by the present Administration.

The third related to national finances, and was the chief cause of division in the committee. It was as follows:

Resolved, That while we belong to a debtor State, and believe that the Republican party has treated such States unfairly and unjustly, by its financial policy, and while we favor an immediate repeal of the "specie resumption act," taxation of United States bonds like other property, and the abolition of the present banking system, yet, at the same time, we emphatically deprecate the effort to divide the Democratic party upon issues involving money only, and recommend that such issues be remitted to the congressional districts, or otherwise subordinated to those great moral and constitutional questions which underlie the very existence of the Union and its institutions.

The corresponding declaration of the minority was as follows:

Upon national questions, while counseling harmony and toleration on the part of our representatives in the National Convention, we desire the unconditional repeal of the Republican measure for the resumption of specie payments, the abolition of special exemptions upon the property of wealthy individuals and corporations, and such other financial reforms as should furnish the business and labor of the country with a sound and ample currency which, without forced contraction, without forced resumption, will aid in restoring prosperity to our land.

There were also resolutions in favor of preserving the public-school system "free from sectarian influence or control," reducing taxation, reforming the judiciary, and submitting to a vote of the people the question of removing the capital. The vote on substituting the financial resolution of the minority report for that of the majority stood—yeas 176½, nays 805½; on substituting the whole minority report for that of the majority—yeas 226, nays 260. The majority report was then adopted by a vote of 289½ to 179½. The following was adopted unanimously as an addition to the platform:

Resolved, That we pledge the Democratic and Conservative party to the preservation of our public-school system, free from sectarian influence and control, and promise to its promotion and improvement the earnest and active efforts of our party.

The Republicans had met in convention in May to select delegates to the national nominating body at Cincinnati, and held their convention for the nomination of candidates for State officers at Parkersburg, on the 27th of July. General Nathan Goff, Jr., was nominated for Governor; Moses Frankenberger for Treasurer; Charles M. Shinn for Auditor; John A. Hutchinson for Attorney-General; F. H. Craggs for Superintendent of Schools; and W. H. H. Flick, R. L. Berkshire, and R. S. Brown, for Judges of the Supreme Court of Appeals. The Committee on Resolutions made a majority and a minority report. The following is a synopsis of the former:

Arraignment of the Democratic party for its non-conformity with the pledges of six years ago, to economize and reform; on the contrary, increasing taxes and expenditures; multiplying the number of officials, raising their salaries, imposing an unwise constitution upon the people, inimical to their interests; the vagueness and uncertainty of its language, which has been a constant source of conflict between the legislative, executive, and judicial departments, changing the road-law, making it oppressive in its unjust discriminations; in re-establishing the old county court system; in the reconstruction of too large and expensive a penitentiary, that it might be filled with Federal convicts to cheapen the labor of our mechanics; in tampering with the school-laws; in providing a homestead-exemption law that permits the landlord to strip the tenant of his furniture and clothing; in covering up the frauds of its public officials; in having, by excessive taxation, driven many citizens to other States; in destroying local self-government, and concentrating the power in the hands of cliques at court-houses; in so arranging the disbursements of the county funds as to create a class of money-changers, shavers, sharpers, and Shylocks; appropriating moneys for bogus railroads, boom companies, etc.; with unusual privilege for the excessive benefit of bankrupt corporations, etc.; demanding such amendments to the present constitution as will relieve it from the odium of incongruities and absurdities; opposing the restoration of the test-oath; pledging a reduction of State taxation; demanding the abolition of the county court system; the restoration of township and local self-government; the exclusion of everything sectarian or partisan from the public schools; the selection of men for public positions who are honest, capable, and sober; the prompt and vigorous punishment of public men guilty of fraud or misconduct; demanding a just homestead-law; indorsing the principles of the National Republican

Convention, and pledging their undivided support to its nominees; calling them the friends of honest labor, and not the manipulators of political intrigues, the real reformers and not pretenders, statesmen and not politicians; and, finally, calling upon all men, of all parties, to unite with them in relieving the people of this State from the existing evils and in the reestablishment of good government.

The minority report was in favor of submitting to a vote of the people the question of removing the capital, and it was adopted, after some modification, as an addition to the platform given above.

The Greenback party also made nominations for Governor and presidential electors, the candidate for the former being James M. Laidley.

The State election occurred on the 10th of October, and resulted in the choice of the Democratic candidates. The total vote for Governor was 100,015, of which Matthews received 56,206, Goff 43,477, and Laidley 332. Matthews's plurality over Goff was 12,729, majority over all 12,397. The largest Democratic majority was that for Attorney-General, Robert White having 57,843 votes, to 42,196 for John A. Hutchinson, and six scattering, making White's majority 15,641. The total vote cast for presidential electors in November was 99,939, of which the Democratic candidates had 56,565, the Republican candidates 42,001, and the Greenback ticket 1,373. The plurality of Tilden over Hayes was 14,564; majority over all, 13,191. Democratic members of Congress were chosen in all of the three districts. The majorities were 1,835 in the first district, 3,773 in the second, and 7,576 in the third. The Legislature of 1876-'77 consists of 19 Democrats and 5 Republicans in the Senate, and 49 Democrats and 16 Republicans in the House, giving the Democrats a majority of 14 in the Senate, 33 in the House, and 47 on a joint ballot. Henry Mason Matthews, the new Governor, is a lawyer, residing in Lewisburg, and had been Attorney-General four years prior to his election to the chief executive office.

The new Capitol building, constructed by the authority and at the expense of the city of Wheeling, was turned over to the State, and formally accepted, on the 6th of January, 1877. It cost \$100,000.

WHEELER, WILLIAM ALMON, was born at Malone, N. Y., June 30, 1819. At the age of nineteen he entered the University of Vermont, where he continued two years. After four years' study of the law in Malone he began practice. During this time he was made Town Clerk, School Commissioner, and School Inspector, and, soon after the adoption of the State constitution of 1846, was elected District Attorney for the county. He was elected by the Whigs a Representative in the Legislature of 1849 and 1850, and in 1859 and 1860 he was a member of the State Senate, where he was chosen president *pro tempore*. He was Cashier of the Malone Bank from 1851 to 1865. In 1854 he became a trustee of the second-mortgage bonds of the old Northern Railroad (af-

terward merged in the Ogdensburg & Lake Champlain), and, as President of the Board of Trustees, was virtual manager of the road for eleven years. In 1860 Mr. Wheeler was elected to Congress, and served one term. In 1867 he was chosen a member of the State Constitutional Convention, and when that body assembled he became its president. In 1868 he was again elected to Congress from his native district, and was three times reelected in succession. He served as a member of the Committees on Appropriations and Southern Affairs, and was chairman of the Committees on the Pacific Railroad and Commerce. In 1875 he visited New Orleans, and prepared an adjustment for the political difficulties in Louisiana, which became known as the "Wheeler Compromise." In June, 1876, Mr. Wheeler was nominated for Vice-President of the United States by the National Republican Convention assembled in Cincinnati. (For the results of the election see UNITED STATES.) Mr. Wheeler has acted with the Republican party since its organization, and was previously a Whig.

WILLIAMS, BARNEY, died in New York, April 25th. He was born in Cork, Ireland, in 1823. His name was Bernard Flaherty, but he was almost entirely known by his professional name, Barney Williams. As early as 1836 he was connected with the old Franklin Theatre in Chatham Square, New York. In 1845 he was the manager of the Vauxhall Garden in the Bowery. In 1850 he was married to Maria Pray, then the widow of Charles Mestayer. His wife was an excellent actress, and subsequently Mr. and Mrs. Williams generally took the leading characters in the same plays. In 1854 they played a very successful engagement in San Francisco. In 1855 they went to England, where Mr. Williams achieved a notable success as *Ragged Pat* in "Ireland as it was." He subsequently played this part with great success in the chief cities of England, Ireland, and Scotland. He returned to New York in September, 1859, and fulfilled a long engagement at Niblo's Garden. He afterward appeared in the chief cities of the United States. In 1867 he assumed the management of Wallack's old Broadway Theatre in New York, where he remained for two years. He and his wife subsequently played in the chief cities of Great Britain, the United States, and Canada. Mr. Williams always represented Irish characters, and had a world-wide reputation as an Irish comedian. His wife survives him. He was a brother-in-law of the comedian William J. Florence, Mrs. Florence (who is also a well-known *comédienne*) and Mrs. Williams being sisters. Mr. Williams's mother died in New York December 18, 1876, aged 80 years.

WISCONSIN. The Legislature of this State closed its session of 1876 on the 14th of March, after sixty-three days' continuance. A large amount of business was transacted within that

time, embracing 415 acts, 16 joint resolutions, and 19 memorials to Congress.

The most important act of the session was apparently that relating to railroad, express, and telegraph companies in the State of Wisconsin. The main purpose of this law is to correct or repeal former laws which sought to regulate fares and freights of railroads. Such was the case in a special manner with the law commonly known as the "Potter Law," the enactment of which, two years previously, not only aroused so much ill-will in the railway companies operating in Wisconsin that they took an attitude of defiance against the law and openly violated its provisions as manifestly unjust, unconstitutional, and void, but alarmed those companies also whose lines are located in other States of the Union.

The new law, while it keeps the railway companies under salutary restrictions to guard the interests of the State and her citizens against arbitrary and unjust exactions, does also amend or repeal the objectionable provisions of former laws. A prominent feature of it is the abolition of the former board of three Railroad Commissioners, and the substitution of one such commissioner only, whom the Governor, by and with the consent of the Senate, is required to appoint within ten days from the passage and publication of this act, "and who shall hold his office for the term of two years from the 15th day of February, and until his successor is appointed and qualified."

STATE SEAL OF WISCONSIN.

The duties of this officer are specified by the act as follows:

SECTION 2. The Railroad Commissioner shall inquire into any neglect or violation of the laws of this State by any railroad corporation doing business therein, or by the officers, agents, or employes thereof; and shall also, from time to time, carefully examine and inspect the condition of each railroad in the State, and of its equipment, and the manner of its conduct and management with relation to the public safety and convenience. He shall also examine and ascertain the pecuniary condition and the manner of financial management of each and every railroad corporation doing business in this State.

In order to enable him to make the report and return required of him by law, the act in section 3 enjoins "the president, or managing officer, of each railroad corporation in the State, to make to the Railroad Commissioner annually, in the month of October, such returns, and in the form he may prescribe, as will afford the information required for his report;" under penalty of one hundred dollars for every day's willful delay, or refusal of such return, after the 31st day of October.

This law was enacted after a most vigorous and long-continued struggle, in which almost every member of the Legislature took an active part. It having been passed by the House of Representatives, in which it was first introduced, the Senate also, after repeated and excited debates, finally passed it on the 18th of February, by a vote of yeas 20, nays 7.

Among the sums of money appropriated for different objects by the Legislature of 1876 are the following: \$25,000 for the publication of the Geological Survey; \$1,500 for the State Historical Society; \$20,000 for the Centennial Exhibition; \$126,000 for the Northern Hospital for the Insane; \$84,000 for the State Hospital for the Insane; \$40,000 for the Institute for the Deaf and Dumb; \$18,000 for the Institute for the Blind; \$90,000 for rebuilding the Institute for the Blind; \$31,000 for the current expenses of the Industrial School for Boys; also \$15,000 for a shoe-shop in the said school; \$27,870 for the current expenses of the State-prison; and \$4,000 for the soldiers' orphans' pensions.

The Republicans of Wisconsin met in convention at Madison on the 22d of February, "to nominate a presidential electoral ticket, and to select twenty delegates to the National Republican Convention to be held at Cincinnati."

After organization, the following nominations were reported by a committee appointed for the purpose and by the eight congressional district committees in their numerical order, and all of the reports were unanimously adopted by the convention:

Electors at large—W. H. Hiner, of Fond du Lac County, and Francis Campbell, of Lafayette.

Delegates at large—Philetus Sawyer, of Winnebago; David Atwood, of Dane; Mark Douglas, of Jackson; and James H. Howe, of Kenosha.

The following platform was reported and unanimously adopted by the convention:

1. The Republicans of Wisconsin, in State Convention assembled, in response to the call of the National Union Republican Committee for the Republicans of the several States of the Union to elect delegates for their National Convention, send fraternal greetings to the Republicans in all parts of our beloved land, with the cordial assurances to all patriotic citizens who honor the flag of our common country as the emblem of liberty, equality, and fraternity, of our earnest desire to see the republic enter upon the second century of its prosperous career free from sectional strife or injustice of any name or

nature; and that we will endeavor to promote friendly feeling and permanent harmony throughout the entire country, and will maintain and support all measures, acts, and laws, the enforcement of which shall secure to every citizen his constitutional rights, including the full and free exercise of the right of franchise without intimidation or fraud.

2. We are in favor of vigorous efforts to prosecute and punish those who have been guilty of official dishonesty, and to detect and bring to punishment all who have in any way or form conspired to defraud the Government of its just and legal revenues.

3. We believe in the unwritten law of the land, which declares it unwise for a Chief Magistrate to hold his office beyond two terms; and we accept the declaration of President Grant in harmony with this law as but another claim to our veneration and gratitude.

4. We believe in international arbitration in lieu of war; and we regard the scene of two nations strong enough to be above fear and wise enough to be above passion, adjusting their claims before this tribunal, as among the proudest monuments of the republic.

5. While endeavoring to reduce the national debt that was incurred in the presence of organized treason and armed rebellion within a political party which again aspires to the control of the Government, we are opposed to impairing the credit of the nation by depreciating any of its obligations, and in favor of sustaining in every way the national faith and financial honor. We believe in honest money; that the currency of the nation should, as soon as consistent with business interests and safety, be made equal to gold, and, until that time, should continue as a legal tender.

6. We hold as of priceless value and of the greatest importance the common-school system of this country, which, supported by just and equal taxation of property for the benefit of all, and accessible to the children of citizens of every nationality, color, condition, or creed, should be maintained absolutely free from sectarian control; and that popular education is the right arm of the national safety under a free and tolerant government, whose guarantee of liberty can only be perpetuated while knowledge pervades the masses.

7. While reiterating our firm devotion to the prin-

MILWAUKEE.

ciples that were cherished and established by the American patriots of 1776, as incorporated in their Declaration of Independence, in the Constitution of the Union, and in the laws of Congress, we cannot ignore the fact, which is indelibly written in our national history, that, for the privilege of celebrating the centennial of this republic, the freemen of America are indebted not only to its founders but also to its defenders; and that if to-day we have a country or a government whose existence is worth celebrating, it is because, in the hour of its greatest peril, its interests and welfare were intrusted to a party which gave no aid or comfort to the enemies of our common country, and which now gives the only security or means for present or future safety, prosperity, and honor, as a power for good among the nations.

8. With a renewal of our pledges to the platform of principles adopted by the Republican State Convention in July last, we enter upon the campaign of 1876 with assurances from all directions that the

party of law, order, progress, and freedom, will achieve another glorious victory.

The Democrats met in State Convention at Milwaukee on June 7, 1876, for the purpose of selecting delegates to the Democratic Convention at St. Louis for the nomination of candidates for President and Vice-President of the United States.

The following were chosen as the four delegates at large: Theodor Rudolf, of La Crosse; James R. Doolittle, of Racine; George B. Smith, of Dane; and Alexander Mitchell, of Milwaukee.

The platform was reported as adopted at this convention. When the time arrived for the Committee on Resolutions to report, a motion was made to adjourn *sine die*, which was

carried. This method seems to have been resorted to as a means to prevent a disturbance in the convention, and perhaps a split in the party, owing to a disagreement among the members about the currency question. There would have been two reports submitted from it—namely, a majority report, wholly ignoring that question, and a minority report urging the emission and circulation of paper-money.

A third political party, called the "Independent" or "Greenback" party, from its preference for that kind of money before all others under certain conditions, held a State Convention at Madison, on May 10th, in order that Wisconsin might be represented in the Independent National Convention to be held at Indianapolis on the 17th of that month. Only a few persons attended. Their number, which was about a dozen at the hour fixed for the opening of the convention, did not exceed twenty-five at any time till its final adjourn-

2. That the Government paper currency should be convertible into Government bonds of long time and low interest, at the will of the holder, and be receivable for all public dues, including customs.

3. That the act of 1875, called the resumption act, should be immediately repealed.

4. That, as soon as practicable, Government paper currency should supersede the circulation of the national banks.

5. That for the present there should be a widely discriminating tariff for revenue only.

6. That our common schools should be free, non-partisan, and non-sectarian.

7. A genuine civil-service reform, and the honest administration of the Government.

The election of November 7th resulted in favor of the Republican candidates. The aggregate votes polled in the State for President numbered 256,038; of which the Republican nominee received 130,067, the Democratic 123,926, the Independent or Greenback, with some scattering votes included, 2,045. The votes for presidential electors in 1876 were

nearly 90,000 more than those for Governor in 1876, when they numbered 169,469, of which Mr. Ludington received 85,155, and Mr. Taylor 84,314.

Of the eight Congressmen from Wisconsin, five Republicans were elected, namely: in the first, second, third, seventh, and eighth districts; and three Democrats, in the fourth, fifth, and sixth.

The State Legislature was divided as follows: In the Senate—Republicans, 23; Democrats, 10; doubtful, 1. In the House of Representatives—Republicans, 58; Democrats, 42.

The whole amount of public revenue from all sources during the fiscal year ending September 30, 1876, including \$277,681.44, balance in the State Treasury on October 1, 1875, was \$1,976,074.09. The aggregate disbursements for all public expenditures during the same year were \$1,660,207.48; leaving an available surplus in the Treasury, on October 1, 1876, of \$315,866.61.

The estimated receipts for 1877 are set down at \$1,300,896.64; the expenditures at \$975,727.98.

The entire amount of the State debt on September 30, 1876, was \$2,252,057, and consists of the following items: State bonds outstanding, \$14,000; certificates of indebtedness to trust-fund, \$2,238,000; and currency certificates, \$57.

The amount belonging to each of the pro-

STATE CAPITOL, MADISON.

ment. The convention, however, was both temporarily and permanently organized, and, on appropriate motions, a committee of three was appointed to frame and report resolutions, and to nominate delegates to Indianapolis; an electoral ticket was nominated, and a Central Committee of nine reorganized.

The following platform was adopted:

Resolved, That we are in favor of the following general principles and measures:

1. An exclusive Government currency, to be issued in such volume as will meet the average demands of the country.

ductive trust-funds of the State, at the same date, was as follows: School-fund, \$2,625,798.06; university fund, \$222,735.56; Normal School fund, \$968,917.84; and Agricultural College fund, \$238,479.40; making a total of \$4,050,930.86. There was in these funds a total decrease during the year of \$8,063.82.

A State Board of Assessment, consisting of the Secretary of State, the State Treasurer, and the Attorney-General, was appointed by law to make an equalized valuation of the property in the State, as a guide to assessment for taxation; many complaints of too high valuation of their property in previous assessments having been made by parties from different sections in the State. The board completed their work at the beginning of June, 1876, and the total results were as follows: The aggregate value of the taxable property in Wisconsin, as assessed in the preceding year, amounted to \$353,021,413, composed of \$271,820,329 of real estate, and \$81,201,204 of personal property. In the tables of equalized valuations, compiled by the said Board of Assessment, the whole amount of the taxable property in Wisconsin is set down at \$423,596,290, of which sum \$337,073,148 represents real estate, and \$86,523,142 personal property; making a total increase of more than \$70,500,000 over the preceding assessment.

In 1876 returns have been made to the Secretary of State from all the counties in Wisconsin, exhibiting the description and value of real and personal property within their limits not liable to taxation. The aggregate value of such property in the State is \$18,524,196. Of this sum, \$4,516,459 represents church property, and \$7,487,627 railroad property.

No reports were made in 1876 by the Regents of the State University, or by the Superintendents of the normal schools, concerning their respective condition and management.

In the Wisconsin Hospital for the Insane, the number of patients under treatment during the year was 557. The number remaining in the Hospital on September 30, 1876, was 355. The cost of their maintenance for the year was \$97,279.27, including payments for repairs and minor improvements.

In the Northern Hospital for the Insane, at Oshkosh, the whole number of patients under treatment during the same year was 604; and those remaining in the institution on September 30th were 503. The sum expended for the support of this institution was \$97,857.26.

In the Institute for the Deaf and Dumb, the whole number of pupils during the year was 191. Its expenses amounted to \$42,624.14.

In the Institution for the Education of the Blind, the entire number of persons receiving instruction during the year was 86. The cost of maintaining this institution for that time was \$22,710. The sum of \$47,610 was also expended on its new building.

The Industrial or Reform School for Boys during the year had 415 inmates in the aggre-

gate, of whom there were 318 remaining in the school on September 30th.

The number of convicts in the State penitentiary on September 30, 1876, was 266, their average number during the year having been 261.

The geological survey of the State has been prosecuted during the year in six different fields.

The Board of Fish Commissioners, which was partly reorganized by the Legislature of 1876, has purchased a suitable site for a hatching-house near Madison, and provided the necessary buildings and appliances. In this place, and at Milwaukee, great numbers of fish of different varieties have been hatched during the year. They are to be introduced into Lake Michigan and the interior waters of Wisconsin.

The aggregate length of railroads operating within the State is 2,427 miles, of which 141 miles were built in 1876. The law concerning these railroads, which was passed in February, 1876, and went into force from its passage and publication, appears to have been in practical working for the rest of the year to the satisfaction of both the railway companies and the people of the State.

The application of a Miss Goodell for admission to the bar of Wisconsin was rejected by the Supreme Court of the State. The main reason of the refusal is rested by Chief-Justice Ryan, in his decree for that purpose, on the plain ground of Nature, saying:

We cannot but think the common law wise in excluding women from the profession of the law. The profession enters largely into the well-being of society, and, to be honorably filled and safely to society, exacts the devotion of life. The law of Nature destines and qualifies the female sex for the bearing and nurture of the children of our race, and for the custody of the homes of the world and their maintenance in love and honor. And all life-long callings of women inconsistent with these radical and social duties of their sex, as is the profession of the law, are departures from the order of Nature, and, when voluntary, treason against it.

An artesian well of great depth (960 feet) has recently been bored with success at Prairie du Chien, Wis. The flow is 603 gallons per minute.

WISE, HENRY ALEXANDER, died at Richmond, Va., September 12, 1876. He was born at Drummondtown, Accomack County, Va., December 8, 1806. He graduated at Washington College, Pa., in 1825, studied law, and settled in Nashville, Tenn., but in 1830 returned to Accomack. In 1833 he was elected to Congress by the Jackson party, and after the election fought a duel with his competitor for the office. He was twice reelected. In Congress he went over to the opposition on the development of Jackson's bank policy, and took strong ground in favor of slavery. In 1837 he was second to Mr. Graves, of Kentucky, in his duel with Mr. Cilley, of Maine, in which the latter was killed. In 1842 the Senate rejected the nomination of Mr. Wise as

minister to France, but he was subsequently appointed minister to Brazil, and resided at Rio de Janeiro from May, 1844, till October, 1847. In 1848 and 1852 he supported the Democratic candidates for President. He was elected Governor of Virginia in 1855, after a very vigorous canvass, directed especially against the "Know-Nothings." Toward the close of his term occurred the seizure of Harper's Ferry by John Brown, whose execution (December 2, 1859) was one of the last acts of his administration. In February, 1861, he was a member of the State Convention, in which, from the Committee on Federal Relations, he made a report which aimed at compromise and a peaceable adjustment with the seceded States. After the secession of Virginia he was appointed brigadier-general in the Confederate army. His force was driven out of the Kanawha Valley by the national troops under General J. D. Cox, and at Gauley Bridge lost a large quantity of arms and stores. Subsequently he commanded at Roanoke Island, N. C., where his forces were defeated by Burnside's expedition, his son, O. J. Wise, being among the killed.

WOLOWSKI, LOUIS FRANÇOIS MICHEL

RAYMOND, a French senator, born at Warsaw, August 31, 1810; died August 4, 1876. He took an active part in the Polish Revolution of 1830, was a staff-captain during the first struggle, and subsequently a Councilor of State. He went to Paris as secretary of legation, where the disasters of Poland forced him to remain. In 1834 he was naturalized, was elected to the Legislative and Constituent Assemblies in 1848, and after the *coup-d'état* returned to private life. He founded the first company of the *Crédit Foncier* of Paris, which afterward became the *Crédit Foncier* of France. He was nominated to the Legion of Honor in 1857. In 1871 he was elected to the National Assembly from Paris, and in 1875 was chosen life-senator, the fifteenth, by 249 votes, acting in both bodies with the Left Centre. He was the author of several valuable works on political economy, of which we mention "De l'Organisation du Travail" (1845); "Études d'Économie politique et de Statistique" (1848); "De l'Organisation du *Crédit foncier*" (1849); "Les Finances de la Russie" (1864); "La Banque d'Angleterre et les Banques d'Écosse" (1867); "La Liberté commerciale" (1868); and "L'Or et l'Argent" (1870).

INDEX OF CONTENTS.

A

- ABDUL-AZIZ**.—Sultan of Turkey, biography, 1, 2; ascends the throne, 1; first acts of his reign, 1; journey through Europe, 1; ineffectual reforms, 1; internal disturbances, 2; visit of the Khedive, 2; revolt in the Herzegovina, 2; abdication and death, 2; autopsy, 2; his efforts to abolish the law of succession, 2.
- ABDUL-HAMID II.**—Sultan of Turkey, biography, 2, 3; succeeds Murad V., 2; his previous life, 2, 3; his tastes and character, 3.
- Abyssinia**.—Area and population, 3; war with Egypt, 3-5; cause of the war, 3; Egyptian expedition of 1876, 3; position of the Egyptians at Casschor, 3, 4; Abyssinian tactics, 4; surprise and defeat of the Egyptians, 4; fruitless conference between the commanders, 4; revolt of the Abyssinian chief Walda Michael, and sacking of Zakmaga, 4, 5; reduction of the rebellion, 5; reported capture of Massowah, 5.
- ADAMS, CHARLES F.**—Accepts the nomination as Governor of Massachusetts, 514.
- Adventists, Seventh-Day**.—Special session of the General Conference, 5; annual session of the same, 6; statistics, 6; camp-meeting at Lansing, 6.
- Afghanistan**.—Area, population, reigning Amir, army, 6; special Russian and Indian embassies, 6, 7; military preparations, 7; incursions in India of the Afridis, 7; Schlagintweit on the relations with Russia and Persia, 7; former conflicts of Persia with the predatory Turkomans, 7, 8; the Russian frontier threatened, 7; Persia and Herat, 7; Afghan occupation of Mymana, 7; probable league of Russia, Persia, and Afghanistan, to subdue the Turkomans, 8; Captain Burton on the Central Asia complications, 8; the Amir's hostility to England, 8.
- Africa**.—Area and population, 8; England and the Orange Free State, 8; transactions regarding a union of the Transvaal Republic and Cape Colony, 8; British war with Dahomey, 8, 9; Zanzibar, 9; Abyssinia, 9; insurrections in Morocco and Algiers, 9; lawlessness in Tunisia, 9; Liberia, 9; Socotra purchased by Great Britain, 9; Commodore Hewett's expedition against the Niger tribes, 9; troubles on the Gaboon, 9.
- AGOULT, MARIE, Countess D'**.—A French authoress, biographical sketch, 9, 10.
- Agriculture**.—Reports of the crops in the United States for 1876: Corn, 10; cotton, 10; potatoes, 10, 11; sweet potatoes, 11; hay, 11; beans, 11; peas, 11; buckwheat, 12; sorghum, 12; tobacco, 12; flaxseed, 12; apples, 12; pears, 18; grapes, 18; winter wheat, 18; winter rye, 18; production increasing, 13.
- AIRD, THOMAS**.—A British poet, biographical sketch, 14.
- Alabama**.—Session of the Legislature, 14; new salaries to officials, 14; report of the joint committee on the election of George E. Spencer to the United States Senate, 14; report of the commissioners for the liquidation of the State debt, 14; their classification and plan for commuting the debt, 14, 15; act passed ratifying the compromise, 15; amounts of the new issue, 15; new revenue code, 16; amendments of the registration and election laws, 16; the school-fund, 16; State University, 16; law for corporations, 16; commissioners of immigration, 16, 17; miscellaneous acts of the session, 17; sale of the Chattanooga Railroad, 17; two Republican Conventions, 17; nominations, 17; resolutions, 17; Democratic Convention, 17; nominations, 17; resolutions, 18; address to the people, 18; State election, 18; session of the Legislature, 18.
- ALBRECHT, WILHELM EDUARD**.—A German jurist, biographical sketch, 18.
- Algeria**.—Area and population, 19; jurisdiction, 19; commerce, 19; percentage of French and foreign vessels, 19; tonnage, 19; commercial navy, 19; public instruction, 19; land-grants to colonists, 20; railways, 20; mission of the Sherif El-Hadad, 20; his reception, 20; position of the sherif, 20; rebellion in the province of Constantine, 21; suppressed, 21.
- ALSINA, ADOLFO**.—A statesman of the Argentine Republic, biographical sketch, 21.
- AMBROS, AUGUST W.**—A German composer and author, biographical sketch, 21.
- America**.—The Centennial Exhibition, 22; Presidential election, 22; Indian battle, 22; struggle in Mexico, 22; war in San Salvador, 22; revolution in Honduras terminated, 22; state of Brazil, 22; disturbance in Colombia, 22.
- ANDRAL, GABRIEL**.—A French physician and author, biographical sketch, 22.
- ANDRASSY, Count**.—Austrian premier, resigns in consequence of the Hungarian compact complications, 387; his understanding with the Hungarian cabinet regarding the Eastern question, 387, 393.
- Anglican Churches**.—Convocation of Canterbury, 22; resolutions of Old Catholics, 22; speech of the Archbishop of Canterbury, 22; provision for infirm clergymen, 22; second meeting, 22; proceedings, 23; third meeting, 23; proceedings, 23; Convocation of York, 24; provision for supernumerary clergymen, 23; number of clergymen and benefices in England and Wales, 23; second meeting of the convocation, 23; letters from American bishops on a universal Church Conference, and on letters of commendation for emigrants, 23; burial of the unbaptized, 23; third meeting, 23; rubric concerning the communion-service, 23; burial without hymns or address, 23; resolution with reference to the Bulgarian outrages, 24; resolu-

- tion on liquor-traffic, 34; Convocation of York, 34; refusal of communion to non-believers in a personal Satan, Jenkins vs. Cook, 34; assumption of the title "Reverend" by Nonconformist ministers in grave-inscriptions, case of H. Keet, 35; prosecution of Rev. C. J. Biddale, ritualist, for violations of the Public Worship Regulation Act, 35; Church Congress at Plymouth, 35; letter from the Archbishop of Canterbury with reference to a Pan-Anglican Synod in 1878, 36; Synod of the Irish Church, 26; Church Missionary Society, 36; anniversary of the Society for the Propagation of the Gospel, 37; South American Missionary Society, 37.
- ASTONELLI, Cardinal GIACOMO.**—Biographical sketch, 27.
- Archæology.**—Dr. Schliemann's excavations at Mycenæ, 28-31; discovery of the site of Troy, 28; Ceanola's explorations in Cyprus, 31-34.
- Argentine Republic.**—Population of provinces and capitals, 34; dispute with Chili on the partition of Patagonia, 34; members of Government, and governors of provinces, 34; revenue returns, 34; public-works loan, 34, 35; condition of finances, 35; commercial depression, 35, 36; national-loan contract for 1876-77, 35; postal treaty with England, 36; extradition treaty with Belgium, 36; trade statistics, 36; new railways, 36, 37; immigration statistics, 38.
- Arizona.**—Financial report, 38; public-school expenses, 38; school tax, 38, 39; educational statistics, 39.
- Arkansas.**—Republican Convention, 39; Democratic Convention, 39, 40; election statistics, 40; Board of Finance created, 40; new State loans, 40; Treasury account, 40; plan for testing the validity of State bonds, 41; public schools and institutes, 41; demand for immigrants, 41.
- Army of the United States.**—Commission on reorganization of the Army, 41; estimates of Army expenses, 41, 43; desertions, 43; Army claims, 43; national cemeteries, 43; mortality in the Army, 42; signal-service, 42; active operations of the Army, 42; Belknap, Secretary of War, resigned, succeeded by Taft and Cameron, 42; military operations against the Sioux Indians, 42, 43; death of General Custer, 43; surrender of Sioux of the Missouri River agencies to Colonel Miles, 43; transference of military headquarters to Washington, 43; aggregate strength of the Army, 43.
- ARNIM, Count HARRY VON.**—Trial and conviction of, 348.
- Asia.**—Area and population, 44; Russian and English influence and progress, 44; journey of the Prince of Wales in India, 44; Lord Lytton succeeds Lord Northbrook as Viceroy of India, 44; English complications with China in consequence of the Margary murder, 44; Chinese operations against Kashgar, 44; island of Hainan opened to commerce, 44; mutiny on the Anna, and consequent difference with the German Government, 44; progress of Japan, 44; Japanese treaty with Corea, 44; Persian expeditions against the Kurds and Turkomans, 44; Dutch war in Acheen, 44; slavery abolished in Sumatra, 44; Spanish expedition against Soooloo pirates, 44; cholera in Asiatic Turkey, 44; cyclone in Bengal, 44.
- Astronomical Phenomena and Progress.**—Veiled solar spots, 44, 45; temperature of sun's surface, 45; the sun's atmosphere, 45; minimum of sun-spots, 45; an intramercurial planet, 45; new minor planets, 45, 46; Saturn and his rings, 46; comets, 46, 47; meteors, 47, aerolites and fire-balls, 47, 48; star systems, 48; Omega Leonis, 48; Gamma Coronæ Australia, 48; Eta Cassiopeia, 48, 49; Sirius, 49; Procyon, 49; Cincinnati catalogue of double stars, 49; variable stars, 49; Pleiades, 49; spectroscopic observations, 49, 50; nebula, 50; changes in Messier's nebula No. 17, 50; variable nebula in the Pleiades, 50; Knobel's reference catalogue, 50; award of Royal Astronomical Society's medal, 50.
- AVERSBERG, ANTON ALEXANDER, Count VON.**—An Austrian statesman and poet, death and biography of, 51.
- Australia and Polynesia.**—Area and population, 51; religious and nativity statistics, 51, 52; statistics of births, deaths, taxation, revenue, debt, imports, exports, education, railroads, telegraphy, post-office, for the several colonies, 52; population of principal cities of New Zealand, 52; agricultural statistics of do., 52; census of South Australia, 52; new mines, 53; cable between Sydney and New Zealand, 53; exploration, 53; Tasmania, death of last native, 53; incursion of Feejee cannibals, and defeat by Sir A. Gordon, 53; crew of Dancing Wave destroyed by Solomon-Island cannibals, 53; periodicity of Australian lakes, 53; expedition of D'Alberty, 53, 54; extinction of native Australians, 54.

- CERNOLA, Count LUIGI DI.**—Explorations in Cyprus, 81-84.
- CHAIK D'EST ANGE, G. L. V. A. C.**—A French publicist, biographical sketch, 89.
- CHELIUS, MAXIMILIAN J.**—A German surgeon, biographical sketch, 89.
- Chemistry.**—Chemistry of the brain, 89, 90; influence of chemical factories on public health, 90, 91; Bartlett's ozone-generator, 91; improved gas jet, 91, 92; absorption of nitrogen by plants, 92; new oxide of manganese, 92; oxides of manganese sources of ozone, 92, 93; new disinfectant, 93; spontaneous combustion of coal, 93, 94; fertilizers in beet-culture, 94; influence of sewage on the ground-atmosphere, 94; wearing of platinum retorts by sulphuric acid, 94, 95; thymol an anti-ferment, 95; estimated strength of astringents, 95, 96; adulteration of coffee, 96; boric acid as an antiseptic, 96, 97; chemical production of cellulose, 97; test for alcohol, 97; iodine extracted from sea-weed, 97, 98; solubility of tin, arsenic, and antimony, in nitric acid, 98; a new oxide of sulphur, 98, 99; sulphur as a mordant, 99; change in composition of the water of the Nile, 99; crystallized hydrate of chlorohydric acid, 100; silver bromide sensitive to the green ray, 100; new test for arsenic, 100, 101; distribution of arsenic in the tissues, 101; ammonia as a chemical impurity, 101, 102; eosin, 102, 103.
- Chili.**—Dispute with the Argentine Republic concerning the Patagonian territory, 106; public officers, 108; area and population, 108; army, 108; navy, 108, 104; revenue and Government expenses, 104; comparison of annual revenues since the foundation of the republic, 104; comparison of customs receipts, 104; reduction of Government expenses, 105; the consolidated Bank of Chili, 105; exports and imports in 1875, 106; mineral wealth of Northern Atacama, 106; shipping, railroads, and telegraphs, 106; education, 106, 107; abolition of the compulsory study of Latin in the universities, 107; elections, 107.
- China.**—Area and population, 107; number of foreign residents, 107; population of chief cities, 107; foreign commerce, 107, 108; shipping, 108; difficulties with England concerning the Margary murder, 108; the British procure the opening of an important city of Yunnan, three new ports, and the Yang-tse-Kiang to foreign commerce, 109 dispute with Germany concerning the mutiny on the German ship *Anna*, 109; the Portuguese prevent the erection of a Chinese custom-house near Macao, 109; the war with Kashgaria, 109; local rebellions, 109, 110; famines, 110; inundation, 110; the congregation of a French chapel murdered, 110; Kiangchow, on the island of Hainan, opened to commerce, 110; Ichang, on the Upper Yang-tse, and two other ports, thrown open, 110, 111; first railroad opened in China, 111, 112; Li-Hung-Chang, who negotiated the agreement with England, 112; statistics of Protestant missions in China and adjacent countries, 112, 113.
- Chinese Immigration.**—Commission of the California Senate to investigate, 84, 85; resolutions of California Legis-

ture regarding, 84, 85; do. of meeting of San Francisco citizens, 85; diplomatic correspondence, 281, 282.

Christian Connection.—Number of ministers, schools, etc., 118.

Christian Union.—Resolutions of General Council, 113, 114; declaration of principles, 114.

CHRISTIANCY, ISAAC P.—Senator from Michigan, 181; on the constitutional amendment relating to school-funds, 175.

CLIFFORD, JOHN H.—Biographical sketch, 114.

COLERIDGE, Sir JOHN TAYLOR.—A British lawyer, biographical sketch, 114.

COLLET, LOUISE R.—A French authoress, biographical sketch, 114.

COLLINS, MONTIMER.—An English novelist, biographical sketch, 114, 115.

Colombia.—Population, 115; public officers, 115; revenue and expenditures, 116; public debt, 116; commercial statistics, 116; shipping, 116; education, 116, 117; railways, 117; contract to construct an interoceanic canal, 117, 118; revolution in Cauca incited by the clericals, 118.

Colorado.—Constituted a State, 118; State constitution, 118-120; financial condition, 120; public lands, 120; State election, 120, 121; mines, 121; United States Senators, 121.

Commerce of the United States.—Imports and exports, 1874-75, 121; coin and bullion, 121; imports and exports, 1876, 121, 122; items of export, 1874-75, 122; of import, 1876, 122-124; of export, 1876, 124, 125; imports at New York, 1873-76, 126; imports, 1872 and 1876, 126; destination of exports from New York, 1875, 126; articles of export from New York, 1875-76, 126; receipts of produce at New York, 1875-76, 126, 127; United States exports, 1872 and 1876, 127.

Congregationalists.—Statistics, 127; Congregational Union, 127, 128; Home Missionary Society, 128; Board for Foreign Missions, 128; Missionary Association, 128; Ontario and Quebec Union, 128, 129; New Brunswick and Nova Scotia, 129; statistics of England and Wales, 129; anniversaries in England and Wales, 129, 130; Congregationalists in Australasia, etc., 130; on the Continent, 130.

Congress.—International Health, at Brussels, 72; geographical, 73; statistical, 73A.

Congress, United States.—First session of the Forty-fourth, 121.

In the Senate, a resolution for the amendment of the Constitution relative to the election of President and Vice-President proposed, 123; another and similar proposed, 123; another relative to meeting of electors in States, 123.

In the House, a resolution to amend the Constitution relative to the establishment of religion offered, 123; another relative to the presidential term, 123; a substitute reported, 123; amendment reported by the minority of the committee, 123; reasons for the report of the minority, 123; another amendment relative to a third term, 124; reasons in opposition to a one-term limitation, 124; reasons against prohibiting a reelection after one term, 124; a six-year term, 125; its advantages, 125; amendment fixing a six-year term offered, 126; rejected, 126; amendment to make a President for six years afterward ineligible offered and rejected, 126; resolution to make a President ineligible for a second term considered and rejected, 126; amendment to make the President and Vice-President Senators for life offered and referred, 127; amendment to make the term six years again offered, 127; amendment to make the term of all civil officers four years offered, 127; another amendment relative to direct taxes offered, 127; amendment to regulate the manner of electing President and Vice-President offered, 123; do. on electing Senators, 123; do. relative

to laws respecting religion and taxes, 123; do. relative to the term of the presidency, 123; do. relative to the establishment of religion, 123.

In the Senate, resolutions relative to the tenure of the office of the President *pro tempore*, 123; the President *pro tem.* may rightfully continue to hold his office unless his term as Senator shall sooner terminate, or he shall be removed for cause until the Vice-President shall return, or a new Vice-President be elected and qualified, 129; reasons for this opinion, 129; not a question of personal rights, but of the right of the Senate to change its presiding officer at its pleasure, 140; reason why he is named in the Constitution, 140; results which would follow provided the Senate had not the power to choose, 140; the Constitution does not say that the President *pro tem.* shall be a Senator, 141; the Constitution devolves upon a Senator to discharge the duties of President *pro tem.* if the Senate assign them, 141; dissent from that view, 141; wish to maintain the authority of the Senate, 141; the act of March 1, 1792, must have great weight in the consideration of this question, 142; it is not enough to say that the President *pro tem.* is an officer of this body, 142; the right to remove is derived by implication, 142; but this officer is designated as a successor to the presidency in a certain contingency, 142; why has this question been brought before us? 142; provision of the Constitution relative to the presidency, 142; the power of removal does not exist as to the President *pro tem.*, 142; adoption of the first resolution, 144; second resolution, that the death of the Vice-President does not vacate the office of President *pro tem.*, adopted, 144; third resolution, that the office is held at the pleasure of the Senate, considered, 144; are the words *pro tempore* in the Constitution used in technical parliamentary sense, or is their meaning fixed by the context? 144; the question discussed, 144; this clause, empowering the Senate to elect, was inserted merely to rebut an implication that would arise from the statement that the Vice-President should be President of the Senate, 145; what is a President *pro tempore*? 145; what does it mean? 146; the office does not terminate on the particular day of our session, 146; the framers of the Constitution must have expected these words to have the same construction they were known to have by the immemorial practice of the House of Lords, 146; the Constitution does not fix the term, 146; the resolution declares a plain principle of law, 147; this power of the Senate over the office cannot be cut short by any act of Congress whatever, 147; when the Vice-President is absent, the Senate is on the same footing with every other deliberative body, 147; what is the law with regard to deliberative bodies that elect their own presiding officer? 147; extract from Cushing's "Treatise," 147; when the duties of President of the United States are devolved upon the President *pro tem.* of the Senate by the death of the President, can the Senate then change the President *pro tem.* at pleasure, and thus, in effect, change the Executive of the nation? 148; he would still be President *pro tem.* after becoming President of the United States, 148; the usage of the Senate for seventy years concurs with the opinion that the office of President *pro tem.* of the Senate is one of fixed tenure, and is not subject to removal at the pleasure of the Senate, 149; what is the clause of the Constitution? 149; what was the intention of the framers? 150; is it believed that he could be removed after he became President of the United States? 150; any such construction must be erroneous, 151; the power of the Senate is not the same over this officer as over its other officers, 151; why does not the Constitution say the Senate shall choose a President *pro tem.* when necessary? 152; the

natural import of the language, 152; motion indefinitely to postpone lost, 152; resolution agreed to, 153.

In the Senate, a resolution offered to adopt the joint rules of the previous session, 153; motion to strike out the twenty-second, 153; the Senate being an existing body, its rules exist with it, but the House expires once in two years, and its rules expire of course, 153; action in the House on rules, 154; the twenty-second rule, 154; this rule relates to the subject of the count of electoral votes, 155; does a joint rule become void by the expiration of a Congress? 155; if a joint rule is not binding on the House, how can it be on the Senate? 155; the twenty-second rule is very objectionable, 155; why is it said that the Senate is a perpetual body? 156; no reason unless that one-third goes out at every Congress, 156; there is a Congress always in existence, 156; rules of the House expire with the House, 156; the House not at all times an organized body, 157; what does the Constitution say? 157; at every Congress the House adopts rules, 157; amendment adopted, 158.

In the Senate, a bill offered to provide for counting the electoral vote, 158; provisions of the bill, 158, 159; the measure of power committed to Congress over the counting, accepting, or rejecting the electoral votes of the electors, 159; contents of the Constitution on the subject, 159; object of the bill to guard against all possibility of the abuse of power, 160; it proposes to vest in the two Houses, acting separately, the power of deciding on duplicate returns, 160; perhaps it had better be vested in somebody outside the two Houses, 160; motion to strike out the provision, 160; also to amend, 161; power of the President of the Senate to decide on duplicate returns, 161; how the bill is defective, 161; subject full of difficulty, 162; amendments proposed, 162; can you constitute an umpire between the two Houses? 162; two constructions are contended for here, 162; votes on the amendments, 162-166; bill passed, 166.

In the Senate, resolutions on the nationality of the Government, 166; do. on the rights of the States, 166.

In the House, resolutions on the currency, 166; do. on the condition of financial affairs, 166; vote on the same, 166, 167; do. relative to a third presidential term, 167; vote on the same, 167; do. relative to the nationality of the Government, 167; vote on the same, 168; do. on the Government as a Federal Union, 168; vote on the same, 168; do. of inquiry relative to presidential acts done at a distance from Washington, 169; reply of President Grant, and memoranda as to other Presidents, 169, 170.

In the Senate, a bill to fix the President's salary considered and passed, 171; do. considered and passed in the House, 172; veto of President Grant, 173.

In the House, a resolution to amend the Constitution relative to religion and schools reported from the Judiciary Committee with an amendment, 173; substitute proposed, 173; the substitute embodies the original amendment, and adds to it a nullifying clause, 173; reasons for the amendment, 173; resolution passed, 173.

In the Senate, the above resolution presented and considered, 174; a mere *brutum fulmen*, 174; not a word relating to the appropriation of public money, 174; substitute proposed, 175; other substitutes, 175; the people are in earnest on this question, 175; the resolution, 175; its object, 175; the nature of the substitute, 175; you can drive an omnibus through this resolution, 176; it simply protects a school-fund, 176; referred to the Judiciary Committee, 176; report to strike out, and insert a substitute, 176; amendment agreed to, 177; question of its passage presented, 177; look at the leading principle of the Constitution, 177; the people of a State should have exclusive power to manage their local affairs, 177; better

to leave the subject to the States, 178; this article is an accusation against a large body of loyal fellow-citizens, 178; what the resolution proposes, 179; the remedy stops far short of the evil, 179; this is a favorable time to accomplish the object, 180; this power is not in the Federal Government, 180; no man can mistake the object of this debate, 180; we see where it tends, 180; resolution failed to pass, 180.

In the House, resolutions relative to fraud or intimidation in the exercise of the right of suffrage offered, 180; agreed to, 181.

In the House, the amnesty bill considered, 182; provisions of the bill, 182; the bill lost, 182; motion to reconsider the vote, 182; imputation on the Republican side of the House, 182; record of what the party has done, 182; did it prohibit any man all his civil rights? 182; the exclusion of the fourteenth amendment, 182; numbers relieved from disabilities, 183; one exception in the amendment proposed, 183; reason of this exception, 184; cruelties at Andersonville, 184; message of Mr. Davis, 184; retaliation refused, 184; no proposition to punish Mr. Davis, 185; too late to debate the general question of amnesty, 185; if Mr. Davis was guilty beyond all, why was he not tried? 185; is one man in the country so powerful for evil that we dare not grant him amnesty? 185.

It was hoped the country had suffered long enough from feuds, 186; the question before the House, 186; alleged reason for excepting Mr. Davis from amnesty, 186; the testimony advanced is exclusively *ex parte*, 187; report of Surgeon Jones, 187; what he says, 187; the case of Wirz, 188; what is the proposition to be established? 188; consequences if the gentleman's proposition is true, 188; the real facts about Andersonville, 189; all its horrors grew out of the necessities of the occasion, 190; report of Secretary Stanton, 190; the great question is, Who was responsible for this state of things? 190; exchange of prisoners, 190, 191; previous question moved and carried, 192; amendment relative to the oath proposed, 192; bill committed and reported back, 192; bill failed to pass, 192.

In the House, a bill relative to the Centennial celebration reported, 194; features of the bill, 194; reasons urged for the passage of the bill, 194; history of the celebration, 195; in view of all this legislation, can Congress escape the responsibility it has so often assumed? 196; where do you derive the power to make appropriation? 196; no doubt about the constitutional power, 196.

The spirit of the Centennial is obedience to the Constitution, 197; the greatest invention of American genius is the absolute subordination of governmental power to the rigid rule of the Constitution, 197; the jealousy of centralizing power was the key-note of the Revolution, 197; ours is a Government of granted powers, 197; opinions of the Supreme Court, 197, 198; are not expenditures for national dignity authorized? 198; no word *national* in the Constitution, 198; question of the power to pass the bill examined, 199, 200; bill passed in the House, 201; do. in the Senate, 202.

In the House, a bill to redeem the fractional currency reported, 202; the bill, 202; amendment, 202; final passage in both Houses, 202.

A resolution relative to the issue of silver coin, 202; its passage in both Houses, 203.

Repeal of the Homestead law in Alabama, Mississippi, Louisiana, Arkansas, and Florida, 203; the act, 203; close of the session, 203.

CORNING, ROSCOE.—Senator from New York, 181; relative to the tenure of office of the President *pro tempore*, 180; on the joint rules, 157.

- Connecticut*.—State election on constitutional amendments, 208; James E. English appointed Senator in Congress, 208; biographical sketch, 208; Convention of the Greenback party, 204; resolutions, 204; Democratic Liberal Convention in February, 205; nominations, 205; platform, 205; Republican Convention, 205; nominations, 205; platform, 205, 206; Greenback party Convention, 206; Liquor Prohibition party nominations, 206; election of Democratic candidates, 206; J. T. Waite elected to Congress, 206; organization of General Assembly, 206, 207; tax assessments, 207; State finances, 207; savings-banks, 207; insurance companies, 207; railroads, 207; industrial condition, 207; freshet at Sprague, 207; public schools, 207, 208; public institutes, 208; W. H. Barnum elected Senator, 208; spring session of the Assembly, 208; amendments to the constitution passed, 208, 209; amendments proposed, 209; Republican Convention in August, 209; nominations, 209; platform, 209; Democratic Liberal Convention, 210; nominations, 210; platform, 210, 211; Greenback party Convention, 211; election, 211; constitutional amendments approved, 211; success of Democratic ticket, 211; Warner elected to Congress, 211; meeting of Legislature, 211; finances in 1876, 211.
- Constitutional Amendment*.—Known as the Blaine amendment, 173; report on, 173; amendment, 178; passed, 174.
- CONYNGHAM, Marquis of.—Biographical sketch, 212.
- COOPER, HENRY.—Senator from Tennessee, 181; on counting the electoral vote, 160.
- COOPER, PETER.—Presidential candidate, biographical sketch, 212.
- Costa Rica*.—Area and population, 212, 218; public officers, 218; revenue and expenditures, 218; budget, 218; commerce, 218; railway, 218; telegraph-line, 218; revolution, 218; Herrera provisional President, 218; condition of the country in December, 218.
